**APIONTA** (Lat.), n. n. pl.  $A^2p(a^3p)\text{'i}^2\text{-}o^2n\text{'ta}^3$ . Gr., ἀπιοντα (neut. pl. of ἀπιών, pres. particip. of ἀπείναι, to go away). 1. The excretions. [L, 119; M, 13.] 2. The seminal fluid. [Hippocrates (L, 53).]

**APIOS** (Lat.), n. f.  $A^2p(a^3p)\text{'i}^2\text{-}o^2s$ . Gr., ἄπιος, a pear. Fr., *apios*. 1. See APION (1st def.). 2. An ancient name for a species of *Euphorbia*. [Theophrastus, Dioscorides (A, 311).] 3. A genus of twining papilionaceous plants established by Linnaeus (so called from the pear-like shape of its tubers). [B, 34.]—**A. bâtarde**, **A. faux** (Fr.). See *LATHYRUS tuberosus*.—**A. ischas**. Gr., ἄπιος ἰσχάς. An ancient name for the horseradish (*Cochlearia armoracia*). [Pliny (A, 318).]—**A. tuberosa** [Pursh]. Syn.: *Glycine apios* [Linnaeus]. The wild bean or ground-nut; a species growing in the woods of the United States and Canada, bearing oval, fleshy, very nutritious tubers, which may be used as a substitute for the potato. [B, 34.]

**APIOSPOREÆ** [Matthieu] (Lat.), n. f.  $A^2p(a^3p)\text{'i}^2\text{-}o\text{'spo}^2re^2\text{-}e(a^2\text{-}e^2)$ . See APIOSPOREI.

**APIOSPOREI** (Lat.), n. m. pl.  $A^2p(a^3p)\text{'i}^2\text{-}o\text{'spo}^2re^2\text{-}i(e)$ . From *Apiosporium*, one of the genera. A tribe of perisporiaceous *Fungi* made by Endlicher, including *Apiosporium*, *Illosporium*, *Sclerococcum*, and other genera; divided by Reichenbach into *A. genuin*s (including *Illosporium*, and three or four other genera) and *Perisporii*. [B, 170.]

**APIOSPORLÆ, APIOSPORH** (Lat.), n's f. pl. and m. pl.  $A^2p(a^3p)-i^2-o-spo-r'i^2-e(a^3-e^2)$ , -i(e). See **APIOSPOREI**.

**APIOSPORINEI** (Lat.), n. m. pl.  $A^2p(a^3p)-i^2-o-spo-r'i^2-n(e^2-i^2)$ . Fries's term for an order of pyrenomycetous *Fungi*. [B, 170.] See **SPHEROPSIDEL**.

**APIOSPORIUM** (Lat.), n. n.  $A^2p(a^3p)-i^2-o-spo-r'i^2-n^2m(u^4m)$ . A genus of perisporiaceus *Fungi*, established by Kunze, forming a coal-black deposit on plants. [A, 396; B, 121.]

**APIRIA** (Lat.), n. f.  $A^2p(a^3p)-i^2-r'i^2-a^3$ . See **APIERIA**.

**APIRINE**, n.  $A^2p-i^2r-en$ . See **APYRINE**.

**APIRO DI ANGOLI** (It.), n.  $A^3-pe-ro$  de  $A^3n-go-le$ . A cold sulphurous spring in Italy. [A, 385.]

**APIROPODOUS**, adj.  $A^2p-i^2r-o^2p-o^2d-u^3s$ . Lat., *apiropodus* (from *ἀπείρος*, countless, and *πῶς*, a foot). Fr., *apiripode*. Sp., *apiripodo*. Having many (more than six) feet (said of insects). [L, 41.]

**APIS** (Lat.), n. f.  $A(a^3)p-i^2s$ . Gr., μέλισσα. Fr., *abeille*. Ger., *Biene*. It., *ape*. Sp., *abeja*. The bee; a genus of hymenopterous insects including the bees. Bees, powdered, are occasionally used as a diuretic (three bees at a dose). [B, 117.] See also **APISIN**, **BEE**, **HONEY**, and **WAX**.—**A. Adansonii** [Latreille]. A variety of *A. mellifica* found throughout the continent of Africa except in its northern part. [B, 49.]—**A. cerifera** [Scop.]. See *A. mellifica*.—**A. domestica** [Ray]. See *A. mellifica*.—**A. dorsata** [Fab.]. A large east Asiatic species distinguished by bearing on the metatarsus of the hind-legs 13 distinct rows of bristles instead of 10 as in other species. [B, 49.]—**A. fasciata** [Latreille]. A variety of honey-bee (*A. mellifica*) found in Egypt, Arabia, and France. [B, 49; L, 65.]—**A. florea** [Fabius]. A very small species found in southern Asia. [B, 49.]—**A. gregaria** [Geoffrois]. See *A. mellifica*.—**A. indica** [Fab.]. A species found in southern Asia. [B, 49.]—**A. ligustica** [Spin.]. A variety of the *A. mellifica* found in northern Italy; having the first segment of the abdomen yellow and a black thorax. The same variety in France has a yellow thorax. [B, 49.]—**A. mellifera** [Fourier]. *A. mellifica* [Linnaeus]. Fr., *abeille mellifique* (ou domestique). Ger., *Honigbiene*. It., *ape peccia*. Sp., *abeja comun* (6 *trabajador*). The common honey-bee. Five varieties, differing in color and size, are known, viz.: (1) the ordinary honey-bee, or *A. mellifica* proper, of which the Grecian bee, or *A. cecropia*, is a subvariety; (2) the *A. ligustica*; (3) the Egyptian bee, or *A. fasciata*; (4) the African bee, or *A. Adansonii*; (5) the Madagascar bee, or *A. unicolor*. [B, 49.] The homœopathists apply the term also to a medicinal preparation of the poison of the bee.—**A. pallida**. A South American species. [L, 65.]—**A. unicolor** [Latreille]. A black honey-bee (a variety of *A. mellifica*) found in Madagascar. [B, 49; L, 65.]—**A. vulgaris alvearium** [Ray]. See *A. mellifica*.

**APISIN**, n.  $A^2p-i^2s-i^2n$ . Fr., *apisine*. Ger., *Apisin*. The poison of the bee. [L, 41.]

**APISINATION** (Fr.), n.  $A^2p-e-se-na^3-se-o^2n^2$ . Inoculation with the poison of the bee. [L, 41.]

**APITES** (Lat.), n. m.  $A^2p(a^3p)-i^2(e^2)-te^2s$ . Gen., *api'tæ*. Gr., ἀπίτης (olivos understood). Perry. [Dioscorides (A, 311).]

**APIUM** (Lat.), n. n.  $A(a^3)p-i^2-u^3m(u^4m)$ . Said to be from *apis*, a bee, because the plants to which the name was anciently applied are specially liked by bees; according to others, from Celtic *appon*, water, related to Sansk., *apya*, that which grows in the water. Fr., *ache*. Ger., *Eppich*. It., *appio*. Sp., *apio*. 1. An ancient name for celery, parsley, and a number of allied plants. [A, 312; B, 2.] A genus of umbelliferous plants established by Tournefort; divided by Spach into the sections *A. and Petroselinum*, and the latter being made a distinct genus by Hoffmann. [B, 170.]—**A. annui** [Crantz]. See **AMMI** **nigrum**.—**A. anisum** [Crantz]. See **ANISUM**.—**A. dictum** [Tournefort]. The *Pimpinella anisum*. [B, 211.]—**A. carvi** [Crantz]. The *Carum carvi*. [B, 173.]—**A. crispum** [Bauhin]. A variety of *A. petroselinum*. [B, 211.]—**A. domesticum**. See *A. petroselinum*.—**A. dulce [Tournefort et al.]. The *A. graveolens*. [B, 211.]—**A. graveolens** [Linnaeus]. Fr., *ache des marais* [Fr. Cod.]. Ger., *Wasserpeppich*. Syn.: *A. palustre* [Bauhin]. Celery, smallage; a biennial herb, with the lower leaves pinnately dissected and set on long petioles, the upper leaves 3-parted, the**

APIUM GRAVEOLENS. (A, 327.)

flowers devoid of involucre, and the fruit roundish-ovate, laterally compressed, brown, and about  $\frac{1}{2}$  inch long. In its wild state, the plant has a foetid odor (whence the species-name), a rank, coarse taste, and even poisonous properties. All parts of the plant are aromatic, and the seeds contain both a volatile and a fixed oil. The root is sometimes used as a diuretic, and was reckoned one of the five "major aperitives" by the ancients, and the seeds were re-

garded as one of the four lesser heating seeds. By cultivation celery is rendered sweet, crisp, juicy, and agreeable. [A, 301, 320, 327; B, 33, 34.]—**A. heleoselinum**. See *ÆGOPONIUM podagraria*.—**A. hortense** [Dod.]. The *A. petroselinum*. [B, 211.]—**A. hortense magnum petroselinum** [Bauhin]. The *Ligusticum peregrinum*. [B, 211.]—**A. involucreatum** [Roxburgh]. See *CARUM roxburghianum*.—**A. macedonicum** [Bauhin]. The *Seseli macedonicum*. [B, 211.]—**A. montanum** [Bauhin]. The *Peucedanum oreoselinum*. [B, 211.]—**A. officinarum** [Bauhin]. The *A. graveolens*. [B, 211.]—**A. paludarium**. See *A. graveolens*.—**A. palustre**. A name given by Bauhin and others to the *Sium angustifolium*, *Sium latifolium*, and *A. graveolens*. [B, 211.]—**A. palustre minus**. The *Sium nodiflorum* and *A. graveolens*. [B, 211.]—**A. peregrinum** [Bauhin]. The *Pimpinella peregrina*. [B, 211.]—**A. petraeum** [Bauhin]. The *Seseli macedonicum*. [B, 211.]—**A. petroselinum** [Willdenow]. Fr., *ache persil*. Ger., *Petersilie*. See *CARUM petroselinum*.—**A. primum**. See *A. graveolens*.—**A. rapaceum**. Of Miller, a variety of the *A. graveolens*. [B, 214.]—**A. rusticum** [Apuleius]. The *Ranunculus sceleratus*. [B, 121.]—**A. sativum**, *A. sativum vulgare*. The *A. petroselinum*. [B, 211.]—**A. sium**. See *Sium angustifolium*.—**A. silvestre** [Pliny]. Mint. [B, 121.] See **MENTHA**.—**A. silvestre Dodonæi**, *A. silvestre lacteo succo turgens* [Bauhin]. The *Peucedanum silvestre*. [B, 211.]—**A. tuberosum** [Desfontaines], *A. variegatum* [Desfontaines]. Varieties of *A. petroselinum*. [B, 173.]—**A. vulgare** [Lamarck]. The *A. petroselinum*. [B, 173.]—**A. vulgare ingratus** [Bauhin]. The *A. graveolens*. [B, 211.]—**Herba apii**. See *Herba apii dulcis*.—**Herba apii alpinii**. The herb of *Carum petroselinum*. [B, 180.]—**Herba apii dulcis** (seu *graveolentis*, seu *hortensis*, seu *officinarum*, seu *palustris*). The herb of *A. graveolens*. [B, 180.]—**Herba apii petroselinii**. The herb of *Carum petroselinum*. [B, 180.]—**Herba apii sativi**. See *Herba apii dulcis*.—**Mundificativum ex apio**. An old preparation made by boiling to a thick consistence 1 pint of the juice of *A. graveolens*, 9 oz. of honey, and 3 oz. of wheat flour. [L, 94.]—**Radix** (et semen) *apii* (seu *apii dulcis*, seu *apii graveolentis*, etc.). The root and seed of *A. graveolens*. [B, 180.]—**Semen apii alpinii**. The fruit of *Carum petroselinum*. [B, 180.]—**Semen apii macedonici** (seu *petraei*, seu *saxatilis*). The fruit of *Seseli macedonicum*. [B, 180.]

**APIVOROUS**, adj.  $A^2p-i^2v'o-ru^3s$ . Lat., *apivorus* (from *apis*, a bee, and *vorare*, to devour). Fr., *apivore*. Ger., *bienenfressend*. Substisting on bees. [L, 41.]

**APLACENTAL**, adj.  $A^2p-la^2s-e^2nt-a^2l$ . Lat., *aplacentalis* (from *a priv.*, and *placenta* [q. v.]). Fr., *aplacentaire*. Having no placenta. [L, 147.]

**APLACENTALIA, APLACENTARIA** (Lat.), n's n. pl.  $A^2p-(a^3p)-la^2-se^2nt(ke^2nt)-a(a^3)li^2-a^3$ , -*ri^2-a^3*. See **IMPLACENTALIA**.

**APLANASIA** (Lat.), n. f.  $A^2p(a^3p)-la^2n(la^3n)-a(a^3)zhi^2(siz^2)-a^3$ . See **APLANATISM**.

**APLANATIC**, adj.  $A^2p-la^2n-a^2t-i^2k$ . Fr., *aplanétique*. Ger., *aplanatisch*. Possessed of the quality of aplanatism. [L, 30, 108.]

**APLANATISM**, n.  $A^2p-la^2n-a^2t-i^2zm$ . From *a priv.*, and *πλανάν*, to wander. Fr., *aplanétisme*. Ger., *Aplanatismus*. It., *aplanetismo*. Complete or almost complete freedom from spherical aberration (said of lenses). [A, 385; L, 56.]

**APLANES** (Lat.), n. m.  $A^2p(a^3p)-la^2n-ez(e^2s)$ . Gen., *aplane'tos(-tis)*. From *ἀπλανής*, steady, fixed. A genus of saprolegniaceus *Fungi* (*Oosporeæ*). [B.]—**A. Braunii**. A species distinguished from the rest of the *Saprolegniaceæ* by the habitual absence of asexual reproduction by conidia (gonidia). [B, 54.]

**APLANÉTIQUE, APLANÉTISME** (Fr.), adj. and n.  $A^3-pla^2-na-tek$ , -*ti^2zm*. See **APLANATIC** and **APLANATISM**.

**APLANI** (Fr.), adj.  $A^3-pla^3-ne$ . See **APPLANATUS**.

**APLANISSEMENT** (Fr.), n.  $A^3-pla^3-nes-ma^3n^2$ . See **APPLANATIO**.

**APLANTOCHILIDES** (Lat.), n. f. pl.  $A^2p(a^3p)-la^2nt(la^3nt)-o-ki^2li^2d-ez(e^2s)$ . A family of the *Araneida* (spiders). [B, 77.]

**APLASIA** (Lat.), n. f.  $A^2p(a^3p)-la(la^3)zhi^2(siz^2)-a^3$ . From *a priv.*, and *πλάσσειν*, to fashion. Fr., *aplasie*. Ger., *Aplasia*. Defective formation or growth of a part. [A, 385.]—**A. of inactivity**. A. due to insufficient use of a part. [D, 3.]—**Laminar a.** Fr., *aplasie lamineuse progressive* [Lande]. See **Progressive facial atrophy**.

**APLASTIC**, adj.  $A^2p-la^2st-i^2k$ . Lat., *aplasticus*. Fr., *aplastique*. Ger., *aplastisch*. 1. Pertaining to aplasia. [D, 20.] 2. Destitute of coagulability, defective in fibrin (said of the blood). [A, 385; M, 3.] 3. Not attended with organic exudation (said of inflammations). 4. Incapable of becoming organized. 5. Resolvent or preventive of plastic exudation. [H. G. Piffard, "Jour. of Cutan. and Vener. Dis.," Jan., 1883 (D).]

**APLATISSEMENT** (Fr.), n.  $A^3-pla^3-tis-ma^3n^2$ . See **APPLATISSEMENT**.

**APLECTREÆ** (Lat.), n. f. pl.  $A^2p(a^3p)-le^2k'tre^2-e(a^3-e^2)$ . From *a priv.*, and *πλήκτρον*, a spur, because the petals are not spurred. A subtribe of fumariaceus plants made by Boissier. [B, 121, 170.]

**APLECTRUM** (Lat.), n. n.  $A^2p(a^3p)-le^2k'tru^3m(u^4m)$ . From *a priv.*, and *πλήκτρον*, a spur (because the lip of the corolla is without a spur). A genus of orchidaceous plants, established by Nuttall. [B, 34.]—**A. hiemale** [Nuttall]. Adam-and-Eve, nutty-root; a species growing throughout the woods of the United States. Its globose corn consists of a glutinous substance with thick connecting fibres. [B, 34.]

**APLESTIA** (Lat.), n. f.  $A^2p(a^3p)-le^2st-i^2-a^3$ . Gr., ἀπλεστία. Fr., *aplestie*. Ger., *Aplestie*. See **ACORIA** (3d def.).

**APLEURIA** (Lat.), n. f.  $A^2p(a^3p)-lu^2-r'i^2-a^3$ . From *ἀπλευρος*, without sides or ribs (i. e., narrow-chested). Fr., *apleurie*. Ger.,

*Apleurie*. A defect of development characterized by absence of ribs. [Breschet (L, 116).]

**APLEUROSPERMIE** [Tausch], **APLEUROSPERMIE** [Spach] (Lat.), n's f. pl.  $A^2p(a^3p)\text{-lu}^2\text{-ro-spu}^2\text{rm}(spe^2\text{rm})\text{-e}(a^2\text{-e}^2)\text{-e}^2\text{-e}(a^2\text{-e}^2)$ . A tribe of umbelliferous plants comprising *Eryngium* and one or two other genera. [B, 170.]

**APLEUROUS**, adj.  $A^2p\text{-lu}^2\text{-ru}^2\text{s}$ . Gr., *ἀπλευρος* (from *a* priv., and *πλευρά*, a rib or the side). Lat., *apleurus*. Sp., *apleuro*. Lacking in ribs or in their proper development (probably in the sense of being narrow-chested). [Aristotle (A, 311); Hippocrates (L, 53).]

**APLOCEROUS**, adj.  $A^2p\text{-lo}^2\text{s}\text{-u}^2\text{-u}^2\text{s}$ . Lat., *aplocerus* (from *ἀπλός*, simple, and *κέρας*, a horn). Fr., *aplocère*. Having the antennae simple, not branched (said of insects). [A, 306.]

**APLOMB** (Fr.), n.  $A^3\text{-plo}^2\text{n}^2$ . Erectness and normal configuration of the body. [A, 300.]

**APLOPAPPUS** (Lat.), n. m.  $A^2p(a^3p)\text{-lo-pa}^2p(pa^3p)\text{-pu}^2s(pu^4s)$ . From *ἀπλός*, simple, and *πάππος* (see PAPPUS). See HAPLOPAPPUS.

**APLOPERISTOMATOUS**, **APLOPERISTOMOUS**, adj's.  $A^2p\text{-lo-p}^2\text{-r}^2\text{-sto}^2\text{m}\text{-a}^2\text{-u}^2\text{s}$ ,  $\text{-i}^2\text{st}\text{-o}^2\text{m}\text{-u}^2\text{s}$ . Lat., *aploperistomatus* (from *ἀπλός*, simple [see also PERISTOME]). Fr., *aploperistomé*. Sp., *aploperistomo*. Having the peristome simple, or composed of one row of teeth; belonging to or resembling the *Aploperistomati* (a class of mosses made by Bridel, including *Splachnum* and fourteen other genera). [B, 77, 170; L, 116.]

**APLOSPORÉE** (Lat.), n. f. pl.  $A^2p(a^3p)\text{-lo-spo}^2\text{-re}^2\text{-e}(a^2\text{-e}^2)$ . From *ἀπλός*, single, and *σπόρος*, a seed. A division of *Algæ* made by Decaisne, comprising the tribes *Spionaceæ*, *Ectocarpeæ*, *Chordarieæ*, *Dictyoteæ*, *Fucaeæ*, and *Laminariæ*; afterward divided into the orders *Vaucheriæ*, *Ectocarpeæ*, *Spongodiæ*, *Actinocladæ*, *Batrachospermæ*, *Chordariæ*, *Sphacelariæ*, *Sporochnoiæ*, *Dictyoteæ*, *Laminariæ*, *Fucaeæ*, and *Sargassæ*; and divided by Brongniart into the families *Spongodiæ*, *Laminariæ*, and *Fucaeæ*. [B, 170.] Also, and more correctly, written *Haplosporeæ*. [B, 121.]

**APLOSTACHYOUS**, adj.  $A^2p\text{-lo-sta}^2k\text{-i}^2\text{-u}^2\text{s}$ . Lat., *aplostachyus* (from *ἀπλός*, simple, and *στάχυς*, an ear of corn). Fr., *aplostachyé*. Having the flowers arranged in simple spikes. [L, 116.]

**APLOSTEGUS** (Lat.), adj.  $A^2p(a^3p)\text{-lo-st}^2\text{-e}^2\text{-g-u}^2\text{s}(u^4s)$ . From *ἀπλός*, single, and *στέγη*, a dwelling. Fr., *aplostégue*. Having only one chamber for habitation (said of a section of *Foraminifera*). [Orbigny (L, 116).]

**APLOSTEMONOUS**, adj.  $A^2p\text{-lo-ste}^2\text{m}\text{-o}^2\text{n-u}^2\text{s}$ . See HAPLOSTEMONOUS.

**APLOSTOMOUS**, adj.  $A^2p\text{-lo-st}^2\text{-o}^2\text{m-u}^2\text{s}$ . Lat., *aplostomus* (from *ἀπλός*, simple, and *στόμα*, a mouth). Fr., *aplostome*. Sp., *aplostomo*. In zoology, having the lip simple. [Férussac, Menke (L, 116).]

**APLOTAXIS** (Lat.), n. f.  $A^2p(a^3p)\text{-lo-ta}^2x(ta^2x)\text{-i}^2\text{s}$ . Gen., *aplotaxeos* (-is). From *ἀπλός*, simple, and *τάξις*, a series. See HAPLOTAXIS.

**APLOTOMY**, n.  $A^2p\text{-lo-t}^2\text{-o-mi}^2$ . Lat., *aplotomia* (from *ἀπλός*, simple, and *τέμνω*, to cut). Fr., *aplotomie*. Sp., *aplotomia*. A simple incision. [A, 385.]

**APLUDE** (Lat.), n. f.  $A^2p(a^3p)\text{-lu}^2\text{-lu}^2\text{-da}^2$ . Bran. [D, 99.]

**APLYSIA** (Lat.), n. f.  $A^2p(a^3p)\text{-li}^2\text{s}(lu^2s)\text{-i}^2\text{-a}^2$ . From *ἀπλυσία*, filth, from its emitting a dark-colored liquid. Fr., *aplysie*. A genus of molluscs of the family *Aplysiadeæ*, order *Opisthobranchiata*, class *Gastropoda*. [A, 359.]—**A. depilans**. Fr., *lièvre de mer*. The sea-hare; a species recommended by Pliny as a remedy for scrofula. [L, 105.]

**APLYSIADÆ** (Lat.), n. f. pl.  $A^2p(a^3p)\text{-li}^2\text{s}(lu^2s)\text{-i}^2\text{-e}(a^2\text{-e}^2)\text{-de}(da^2\text{-e}^2)$ . The sea-hares; a family of opisthobranchiate gastropodous molluscs; slug-like animals with extensive epipodia, the shell being absent or rudimentary and concealed by the mantle; including *Aplysia*, *Dolabella*, and other genera. [A, 359.]

**APNÉE** (Fr.), n.  $A^3p\text{-na}$ . See APNŒA.

**APNEOLOGY**, n.  $A^2p\text{-ne-o}^2\text{-l-o-j}^2$ . For deriv., see APNŒA and -logy<sup>8</sup>. See APNŒOLOGY.

**APNEUMATIC**, adj.  $A^2p\text{-nu}^2\text{-ma}^2\text{-t}^2\text{-i}^2\text{k}$ . From *ἀπνεύματος* (from *a* priv., and *πνεύμα*, air). See ANAEROPLASTIC.

**APNEUMATOSIS** (Lat.), n. f.  $A^2p(a^3p)\text{-nu}^2\text{-ma}^2\text{-to-si}^2\text{s}$ . Gen., *apneumatosis* (-sis). From *a* priv., and *πνευματόν*, to inflate. Absence or deficiency of inflation (said of the pulmonary tissue). [D, 18.]—**Congenital a.** See ATELECTASIS.

**APNEUMIA** (Lat.), n. f.  $A^2p(a^3p)\text{-nu}^2\text{-mi}^2\text{-a}^2$ . From *a* priv., and *πνεύμων*, a lung. Fr., *apneumie*. Ger., *Apneumie*. It., *apneumia*. Congenital absence of the lungs. [A, 385.]

**APNEUMONERVIA**, **APNEUMONEURIA** (Lat.), n's f.  $A^2p(a^3p)\text{-nu}^2\text{-mo}^2\text{-n-u}^2\text{-e}^2\text{-ri}^2\text{-v}^2\text{-i}^2\text{-a}^2$ ,  $\text{-u}^2\text{-ri}^2\text{-a}^2$ . From *a* priv., *πνεύμων*, a lung, and *nervus* (*νεῦρον*), a nerve. Fr., *apneumonervie*. Defective action of the nerves of respiration. [K.]

**APNEUSTA** (Lat.), n. n. pl.  $A^2p(a^3p)\text{-nu}^2\text{-sta}^2$ . From *ἀπνευστος*, breathless. Fr., *apneustes*. See BRANCHIATA.

**APNEUSTIA** (Lat.), n. f.  $A^2p(a^3p)\text{-nu}^2\text{-st}^2\text{-i}^2\text{-a}^2$ . Gr., *ἀπνευστία*. Fr., *apneustie*. Ger., *Apneustie*, *Athenlosigkeit*. It., *apneustia*. See APNŒA.

**APNEUSTOUS**, adj.  $A^2p\text{-nu}^2\text{-tu}^2\text{s}$ . Gr., *ἀπνευστος*. Lat., *apneustus*. Fr., *apneustus*. Ger., *athemlos*. Breathless or incapable of breathing. [A, 385; M, 13.]

**APNŒA** (Lat.), n. f.  $A^2p(a^3p)\text{-ne}^2\text{-o}^2\text{-e}^2\text{-a}^2$ . Gr., *ἀπνοια*. Fr., *apnée* (4th def.). Ger., *Apnoë*, *Athemlosigkeit*, *Erstickung*. It., *apnea* (4th def.). Sp., *apnea*. 1. A condition of the blood in which the oxygen is in excess of the usual amount and the carbon dioxide is reduced in quantity, so that the respiratory centre is in a state of

rest and no respiratory movements take place. It may be produced by breathing rapidly for some time. [Rosenthal (J).] 2. Absence of respiratory movements. [Blout (J, 50).] 3. Insensible respiration. [J.] 4. As commonly but improperly used, asphyxia by failure of the respiratory apparatus. [J, 19.]—**A. infantum**. Spasms of the glottis in infants. [D, 39.]—**A. neonatorum**. See *ASPHYXIA neonatorum*.—**A. uterina**. See *ASTHMA uterinum*.—**Cardiac a.** 1. A dependent on disease of the heart (e. g., the period of a in the phenomenon known as Cheyne-Stokes respiration [q. v., under *RESPIRATION*]). [A, 411.] 2. A complete stoppage of respiration as the patient is falling asleep (in heart diseases). [L, 170.]—**Hysterical a.** A due to hysteria.—**Nervous a.** A due to functional or organic disease of the respiratory centres. [L, 170.]—**Placental a.** See *PLACENTAL PHTHISIS*.

**APNŒASPHYXIA** (Lat.), n. f.  $A^2p(a^3p)\text{-ne}^2\text{-o}^2\text{-e}^2\text{-a}^2\text{-s}(a^2\text{-s})\text{-fi}^2x(fu^2x)\text{-i}^2\text{-a}^2$ . Fr., *apnœosphixie*. See *ASPHYXIA*.

**APNŒIC**, adj.  $A^2p\text{-ne}^2\text{-i}^2\text{k}$ . Gr., *ἀπνοος*. Lat., *apnouis*. Fr., *apnétique*. Ger., *apnötisch*. Pertaining to or affected with apnœa. [D, 18.]

**APNŒOLOGIA** (Lat.), n. f.  $A^2p(a^3p)\text{-ne}^2\text{-o}^2\text{-e}^2\text{-a}^2\text{-o}^2\text{-l-o}^2\text{-j}^2\text{-i}^2\text{-gi}^2\text{-a}^2$ . For deriv., see APNŒA and -logy<sup>8</sup>. Fr., *apnœologie*. Sp., *apnœologia*. The study or science of the different forms of apnœa. [L, 43.]

**APNOICUS**, **APNOOS**, **APNOUS**, **APNUS** (Lat.), adj's.  $A^2p(a^3p)\text{-no}^2\text{-i}^2\text{k-u}^2\text{s}(u^4s)$ ,  $a^2p(a^3p)\text{-no}^2\text{-o}^2\text{s}$ ,  $\text{-no-u}^2\text{s}(u^4s)$ ,  $\text{-nu}^2\text{s}(nu^4s)$ . See APNŒIC.

**APNOACONINE**, n.  $A^2p\text{-o-a}^2\text{k-o}^2\text{n-en}$ . From *ἀπν*, from, and *aconitine*. A base derived from aconine having the composition  $C_{26}H_{37}NO_{10} = C_{26}H_{35}(O)(OH)NO_7$ . [B, 207.]

**APNOACONITINE**, n.  $A^2p\text{-o-a}^2\text{k-o}^2\text{n-i}^2\text{-en}$ . For deriv., see *APNO-* and *ACONITE*. An artificial alkaloid,  $C_{26}H_{41}NO_{11} = C_{26}H_{35}(O)(OH)(O.CO - C_6H_5)NO_7$ , formed by the deacylation of true aconitine. [B, 5, 207.]

**APOATROPINE**, n.  $A^2p\text{-o-a}^2\text{t-ro}^2\text{-p-en}$ . A derivative of atropine, obtained by Resci by treating atropine with nitric acid, alkalinizing the product with ammonia, and then extracting with chloroform. Its molecular formula,  $C_{17}H_{21}NO_2$ , differs from that of atropine by the elements of one molecule of water. Its administration produces characteristic convulsions. ["Drug. Circ.," Jan., 1883, p. 5 (B).]

**APOBŒNON** (Lat.), n. n.  $A^2p(a^3p)\text{-o-be}^2\text{-e}^2\text{-a}^2\text{-no}^2\text{n}$ . From *ἀποβᾶνεν*, to turn out, eventuate. The termination of a disease, in recovery or in death. [L, 53.]

**APOBAMIA** (Lat.), n. n.  $A^2p(a^3p)\text{-o-ba}^2\text{m}(ba^2m)\text{-ma}^2$ . Gen., *apobamatos* (-tis). Gr., *ἀποβάμια* (from *ἀποβάττειν*, to dip). 1. A tincture or infusion. [A, 311.] 2. An old term for a liquid popularly termed "medicorum liquor," in which heated gold had been quenched or boiled. [Cardanus (L, 53).]

**APOBÉE** (Fr.), n. A plant used by the negroes of Guinea in small-pox. [L, 105.]

**APOBIOSIS** (Lat.), n. f.  $A^2p(a^3p)\text{-o-bi}^2(bi^2)\text{-o-si}^2\text{s}$ . Gen., *apobiosis* (-sis). Gr., *ἀποβίωσις* (from *ἀποβίων*, to die). Fr., *apobiose*. It., *apobiosi*. Death (either of the individual or of a part). [A, 385.]

**APOBLASTEMA** (Lat.), n. n.  $A^2p(a^3p)\text{-o-bla}^2\text{st}(bla^2st)\text{-e}(a\text{'-ma}^2)$ . Gen., *apoblastematos* (-tis). Gr., *ἀποβλάστημα*. Ger., *Nebenspross*. A shoot or scion. [D, 130.]

**APOBLEMA** (Lat.), n. n.  $A^2p(a^3p)\text{-o-ble}(bla\text{'-ma}^2)$ . Gen., *apoblematos* (-tis). Gr., *ἀποβλημα*. 1. See *ABORTIO* (2d def.). 2. A subgenus of the genus *Distoma* of Dujardin. [L, 18.]

**APOHOLE** (Lat.), n. f.  $A^2p(a^3p)\text{-o-h}^2\text{-o-l}^2\text{-e}(a)$ . Gr., *ἀποβολή*. Fr., *apobolie*. An expulsion, especially an abortion. [A, 385; L, 50.]

**APOBRASMA** (Lat.), n. n.  $A^2p(a^3p)\text{-o-bra}^2\text{z}(bra^2z)\text{-ma}^2$ . Gen., *apobrasmatos* (-tis). Gr., *ἀποβρᾶσμα* (from *ἀποβράσσειν*, to throw out froth). 1. Froth, effervescence. [A, 322.] 2. Bran. [A, 322; G.] See FURFUR. 3. A critical discharge, especially by expectoration. [A, 322.]

**APOBREGMA** (Lat.), n. n.  $A^2p(a^3p)\text{-o-bre}^2\text{-g-ma}^2$ . Gen., *apobregmatos* (-tis). Gr., *ἀποβρεγμα* (from *ἀποβρέγειν*, to steep). An infusion. [M, 13.]

**APOBROCHISMUS** (Lat.), n. m.  $A^2p(a^3p)\text{-o-bro}^2(bro^2)\text{-ki}^2z(ch^2z)\text{-is}^2\text{-mu}^2\text{s}(mu^4s)$ . Gr., *ἀποβροχισμός* (from *ἀποβροχίζειν*, to strangle). Fr., *apobrochisme*. Ligation. [A, 322.]

**APOCAFFEINE**, n.  $A^2p\text{-o-ka}^2\text{-f-fe}^2\text{-en}$ . Fr., *apocafféine*. Ger., *Apocoffein*. A derivative of caffeine forming prismatic crystals,  $CO.O - C(CO.OH) - N(CH_3)$ . [B, 3, 207.]

**APOCALBASUM**, n. Perhaps a corruption of *ὀποκάλπασον* (see *OPOCARPASON*). Fr., *apocalbase*. Sp., *apocilbaso*. A gum-resin, supposed to be obtained from a species of *Euphorbia*, used as an arrow poison. [L, 41, 105.]

**APOCAPNISMUS** (Lat.), n. m.  $A^2p(a^3p)\text{-o-ka}^2p(ka^2p)\text{-ni}^2z(ni^2s)\text{-mu}^2\text{s}(mu^4s)$ . Gr., *ἀποκαπνισμός*. Fr., *apocapnisme*. Ger., *Räucherung*. It., *Sp.*, *apocapnismo*. Fumigation. [L, 41.]

**APOCAPOUC**, n. A poisonous Madagascar tree, the oil of the nut of which is applied by the natives to the hair. [Flacourt (L, 105).]

**APOCARPASON** (Lat.), n. n.  $A^2p(a^3p)\text{-o-ka}^2rp(a^2\text{-s-o}^2\text{n})$ . See *OPOCARPASON*.

**APOCARPÆ** (Lat.), n. f. pl.  $A^2p(a^3p)\text{-o-ka}^2rp(e(a^2\text{-e}^2))$ . A cohort of polypetalous plants including the alliances *Rosales*, *Saxales*, *Ficoidales*, *Crassales*, and *Balsamales*. [Lindley (B, 170).]

**APOCARPÆÆ** (Lat.), n. f. pl.  $A^2p(a^3p)\text{-o-ka}^2rp(e^2\text{-e}(a^2\text{-e}^2))$ . In Benth and Hooker's classification of monocotyledonous plants, the sixth series, comprising the orders *Triurideæ*, *Alismaceæ*, and *Naiadaceæ*. [B, 42.]

**APOCARPHOLOGIA** (Lat.), n. f.  $A^2p(a^3p)-o-ka^3r-fo^1l-o^1j^2$ . (gi<sup>2</sup>)-a<sup>3</sup>. See CARPHOLOGIA.

**APOCARPOUS**, adj.  $A^2p-o-ka^3r-p/u^3s$ . Lat., *apocarpus* (from *apo*, away from, and *καρπός*, a fruit). Fr., *apocarpé*. Ger., *auffruchtig*. Sp., *apocarpio*. In botany, having but one carpel, or having carpels non-adherent to each other except by the interposition of the ovary. [B, 7, 121.]

**APOCARTERESIS**, **APOCARTERIA** (Lat.), n's f.  $A^2p-(a^3p)-o-ka^3rt-e^2r-e(a)/si^2s$ , -ka<sup>3</sup>rt-e(a)/ri<sup>2</sup>-a<sup>3</sup>. Gen., *apocartere'seos* (-sis), *apocarterice*. Ger., *ἀποκαρτερήσις*. Gr., *freiwilliger Hunger-tod*. Suicide by starvation. [M, 13.]

**APOCATASTASIS** (Lat.), n. f.  $A^2p(a^3p)-o-ka^2t(ka^3t)-a^2s(a^3s)^{-}ta^3-si^2s$ . Gen., *apocatasta'seos* (-sis). Gr., *ἀποκατάστασις*. Fr., *apocatastase*. Ger., *Apokatastasi*. It., *apocatastasi*. Sp., *apocatastasi*. Syn.: *restitutio ad integrum*. A complete return to the normal state. [A, 322.]

**APOCATHARSIS** (Lat.), n. f.  $A^2p(a^3p)-o-ka^2(ka^3)-tha^3r-si^2s$ . Gen., *apocathar'seos* (-sis). Gr., *ἀποκαθάρισις* (from *ἀποκαθαίρειν*, to purge away). Fr., *apocatharsie*. Ger., *Apocatharsie*. It., *apocatharsi*. Sp., *apocatharsis*. Vomiting and purging. [A, 322.]

**APOCATHARTIC**, adj.  $A^2p-o-ka^2th-a^3rt-i^2k$ . Gr., *ἀποκαθαρτικός*. Lat., *apocatharticus*. Fr., *apocathartique*. It., *apocathartico*. Sp., *apocathartico*. Thoroughly cleansing or purgative, or pertaining to apocatharsis. [A, 322; L, 43.]

**APOCAULESIS**, **APOCAULISIS** (Lat.), n's f.  $A^2p(a^3p)-o-ka^1(ka^2-ul)-e(a)/si^2s$ , -ka<sup>1</sup>l/(ka<sup>3</sup>ul)-i<sup>2</sup>s-i<sup>2</sup>s. Gen., *apocaul'e'seos* (-sis), *apocaulis'is*. Gr., *ἀποκαύλισις* (from *ἀποκαυλίζειν*, to break short off). Fr., *apocaulise*. 1. A transverse fracture. 2. Avulsion or amputation of the penis. [L, 50.]

**APOCENOSIS** (Lat.), n. f.  $A^2p(a^3p)-o-se^2n(ke^2n)-o-si^2s$ . Gen., *apoceno'seos* (-sis). Gr., *ἀποκένωσις* (from *ἀποκένουν*, to empty). Fr., *apocénose*. Ger., *Apocénose*. It., *apocenosìs*. Sp., *apocenosìs*. A discharge, flux, evacuation; according to some authors, a partial evacuation, as opposed to *cenosis*, a general evacuation; in the pl., *apocenosés*, as used by Cullen and Swediaur, diseases characterized by fluxes without fever. [A, 322; G, 16, 33; L, 84.]—**APOCENOSSES CUTANEA**. In Struve's classification of skin diseases, a class embracing anomalies of secretion. [G, 33.]

**APOCENOTIC**, adj.  $A^2p-o-se^2n-o^2t-i^2k$ . Lat., *apocenoticus*. Fr., *apocénotique*. Ger., *apocenotisch*. Pertaining to, affected with, or causing apocenosés. [L, 46; M, 13.]

**APOCERYGMA** (Lat.), n. n.  $A^2p(a^3p)-o-se^2r(ke^2r)-i^2g(u^6g)/ma^3$ . Gen., *apoceryg'matos* (-tis). Gr., *ἀποκέρυγμα* (from *ἀποκέρυττειν*, to proclaim). A physician's declaration to a patient as to his condition. [Hippocrates (L, 53).]

**APOCHINAMIN** (Ger.), n.  $A^2-po-chi^2i^2n-a^3-men'$ . See APOQUINAMINE.

**APOCHINIDIN** (Ger.), n.  $A^3-po-chi^2i^2n-i^2d-en'$ . See APOQUINIDINE.

**APOCHOREMA**, **APOCHOREON** (Lat.), n's n.  $A^2p(a^3p)-o-ko(ch^2o)-re^2ra/ma^3$ , -ko(ch^2o)/re^2-o^2n. Gen., *apochore'm'atos* (-tis), -cho'rei. From *ἀποχωρεῖν*, to pass off. An excretion, especially the faeces. [A, 322; L, 53.]

**APOCHREMA** (Lat.), n. n.  $A^2p(a^3p)-o-ke^2m(ch^2re^2m)/ma^3$ . Gen., *apochrem'matos* (-tis). Gr., *ἀποκρέμμα* (from *ἀποκρέμπεσθαι*, to expectorate). Sputum. [L, 53.]

**APOCHREMPIS** (Lat.), n. f.  $A^2p(a^3p)-o-ke^2mp(ch^2re^2mp)^{-}si^2s$ . Gen., *apochrem'p'seos* (-sis). Gr., *ἀποκρέμψις*. Expectoration (the act). [Hippocrates (M, 13).]

**APOCHREMPITICUS** (Lat.), adj.  $A^2p(a^3p)-o-ke^2mp-(ch^2re^2mp)/ti^2k-u^3s(u^4s)$ . Pertaining to expectoration. [M, 13.]

**APOCHROESIS**, **APOCHROMATISMUS** (Lat.), n's f. and m.  $A^2p(a^3p)-o-ke(ch^2ro-e^2)-o-si^2s$ , -kro(ch^2ro)-ma^3-ti^2z(t)^2s/mu^3s(mu^4s). Gen., *apochro'e'seos* (-sis), -chromat'ismi. Gr., *ἀποχρωσις*. Ger., *Entfärbung*. Decolorization. [A, 322.]

**APOCHYLISIS** (Lat.), n. f.  $A^2p(a^3p)-o-ki^2l(ch^2u^4l)/i^2s-i^2s$ . Gen., *apochylis'eos* (-sis). See APOCHYLISMUS.

**APOCHYLISMA** (Lat.), n. n.  $A^2p(a^3p)-o-ki^2l(ch^2u^4l)-i^2z(i)^2s/ma^3$ . Gen., *apochylis'matos* (-tis). Gr., *ἀποχύλισμα* (from *ἀποχύνειν*, to extract the juice from a plant). Fr., *apochylisme*, *rob*. An expressed and inspissated juice. [L, 53.]

**APOCHYLSMUS** (Lat.), n. m.  $A^2p(a^3p)-o-ki^2l(ch^2u^4l)-i^2z(i)^2s/mu^3s(mu^4s)$ . The process of expressing juice. [L, 50.]

**APOCHYMA** (Lat.), n. n.  $A^2p(a^3p)-o-k^2(o^2ch^2)/i^2m(u^4m)-a^3$ . Gen., *apochym'matos* (-tis). Gr., *ἀποχύμα* (from *ἀποχεῖν*, to ooze out). Any gummy exudation, especially zopissa (q. v.). [A, 322.]

**APOCHYSIS** (Lat.), n. f.  $A^2p(a^3p)-o^2k(o^2ch^2)/i^2s(u^4s)-i^2s$ . Gen., *apochys'eos* (-sis). Gr., *ἀποχύσις*. 1. Decantation. [L, 50.] 2. Cataract. [D, 90.]

**APOCNA** (Lat.), n. n. pl.  $A^2p(a^3p)-o^2s(o^2k)/i^2n-a^3$ . Jussieu's name for the *Apocynaceae*. [B.] See APOCYNACEAE.

**APOCINAT-E** (Lat.), n. f. pl.  $A^2p(a^3p)-o-si^2n(ki^2n)-a(a^2)/te-(ta^3-e^2)$ . An order of plants made by Necker, including the genera *Asclepias* and *Vinca*. [B, 120.]

**APOCINCHENE**, n.  $A^2p/o-si^2n-ken'$ . Ger., *Apocinchen*. A product obtained, along with methyl chloride, by decomposing cinchene with hydrochloric acid. [B, 207.]

**APOCINEAE** (Lat.), n. f. pl.  $A^2p(a^3p)-o-si^2n(ki^2n)^{-}e(a^3-e^2)$ . Fr., *apocinéés*. See APOCYNACEAE.

**APOCINUM** (Lat.), n. n.  $A^2p(a^3p)-o^2s(o^2k)/i^2n-u^3m(u^4m)$ . See APOCYNUM.

**APOCLASIS** (Lat.), n. f.  $A^2p(a^3p)-o^2k/la^2-si^2s$ . Gen., *apoclas'e'seos* (-sis). Gr., *ἀποκλασις* (from *ἀποκλάν*, to break off). See APOCLASM (2d def.).

**APOCLASM**, n.  $A^2p/o-klazm$ . Gr., *ἀπόκλασμα*. Lat., *apoclasma*. Fr., *apoclasme*. Ger., *Apoklasma*. Sp., *apoclasmo*. 1. See APAGMA. 2. The breaking away of a part. [L, 73.] 3. The part broken away. [A, 322.]

**APOCLEISIS** (Lat.), n. f.  $A^2p(a^3p)-o-klh'(kla^1i^2)-si^2s$ . Gen., *apoclei'seos* (-sis). Gr., *ἀποκλείσις* (from *ἀποκλείσθαι*, to turn away from food). A loathing of food. [Hippocrates (A, 325).]

**APOCODEINE**, n.  $A^2p-o-ko^2de^2en$ . Lat., *apocodeína*, *apocodéine*. Fr., *apocodéine*. Ger., *Apocodéin*. An amorphous alkaloid, of the composition  $C_{18}H_{21}NO_3 \cdot H_2O$ , obtained by Matthieson and Burnside by treating codeine with zinc chloride. It has properties very similar to those of codeine. [L, 78.]

**APOCOFFEIN** (Ger.), n.  $A^3-po-ko^2f-fe^2en'$ . See APOCAFFEINE.

**APOCOLCHICEINE**, n.  $A^2p-o-ko^2l-ki^2s'e^2en$ . A body obtained by heating colchicine with hydrochloric acid. [L, 65.]

**APOCONITA**, n. A purgative Guiana fruit. [A, 385.]

**APOCOPE** (Lat.), n. f.  $A^2p(a^3p)-o^2k'o-pe(p)a$ . Gr., *ἀποκοπή* (from *ἀποκόπτειν*, to cut off). Fr., *apocope*. 1. A cutting away, amputation. [A, 322.] 2. A wound or fracture with loss of substance. [A, 385.]

**APOPOCUS**, adj.  $A^2p-o^2k'o-pu^3s$ . Gr., *ἀπόκοπος*. Castrated. [Strabo (A, 311).]

**APOPTICUS** (Lat.), adj.  $A^2p(a^3p)-o-ko^2p/ti^2k-u^3s(u^4s)$ . Occurring as the result of the removal of a part. See PLETHORA *apoptica*.

**APOCRENATE**, n.  $A^2p-o-ke^2n'at$ . Fr., *apocrénate*. A salt of apocrenic acid. [L, 41.]

**APOCRENIC**, adj.  $A^2p-o-ke^2n'i^2k$ . Lat., *apocrenicus* (from *ἀπό*, from, and *κρήνη*, a fountain). Fr., *apocrénique*. Ger., *apokrenisch*. It., *apocrenico*. Derived from a fountain. [B.]—**A. acid**. Lat., *acidum apocrenicum*. Fr., *acide apocrénique*. Ger., *Apokrensäure*. It., *acido apocrenico*. A name given by Berzelius to a brown amorphous substance obtained by him from the mineral spring of Porla, in Sweden, and existing, according to him, in humus and the sediment of chalybeate waters. [B, 38.]

**APOCRISIS** (Lat.), n. f.  $A^2p(a^3p)-o^2k'ri^2s-i^2s$ . Gen., *apocris'eos* (-sis). Gr., *ἀποκρίσις* (from *ἀποκρίναι*, to separate). Fr., *apocrisie*. An evacuation, especially one of a critical nature. [A, 322, 385.]—**A. morbosa**. A contagious effluvia or miasm. [Hippocrates (L, 53).]

**APOCRITICUS** (Lat.), adj.  $A^2p(a^3p)-o-kri^2t/i^2k-u^3s(u^4s)$ . Gr., *ἀποκρητικός*. 1. Secretory, capable of secreting. [Galen (A, 111).] 2. Evacuant. [L, 50.]

**APOCRITUS** (Lat.), adj.  $A^2p(a^3p)-o^2k'ri^2t-u^3s(u^4s)$ . Gr., *ἀπόκρητος*. Discharged or evacuated by crisis. [L, 50.]

**APOCROUSTIC**, adj.  $A^2p-o-krust/i^2k$ . See APOCRUSTIC.

**APOCRUSIS** (Lat.), n. f.  $A^2p(a^3p)-o-kru^2(kru)/si^2s$ . Gen., *apocru'seos* (-sis). Gr., *ἀποκρούσις* (from *ἀποκρούειν*, to beat off). Repulsion.

**APOCRUSTIC**, adj.  $A^2p-o-krust/i^2k$ . Gr., *ἀποκρουστικός*. Lat., *apocrusticus*. Fr., *apocrostique*. Ger., *apokrustisch*. Sp., *apocristico*. Astringent, refrigerant, or repellent. [L, 41.]

**APOCRUSTICON**, **APOCRUSTICUM** (Lat.), n's n.  $A^2p(a^3p)-o-kru^2st(krust)/i^2k-o^2n$ , -u^3m(u^4m). An old remedy said to have apocrustic qualities. [Galen (L, 53).]

**APOCRYPHICUS**, **APOCRYPHUS** (Lat.), adj's.  $A^2p(a^3p)-o^2k-ri^2f(ru^6f)/i^2k-u^3s(u^4s)$ , -o^2k'ri^2f(ru^6f)u^3s(u^4s). Gr., *ἀποκρυφός*. Ger., *apokryphisch*. Concealed, obscure (said of ulcers). [Martini, "Mag. d. ges. Heilk.," 1, 23 (L, 50).]

**APOCYESIS** (Lat.), n. f.  $A^2p(a^3p)-o-si(ku^6)-e(a)/si^2s$ . Gen., *apocy'e'seos* (-sis). Gr., *ἀποκύσις*. Fr., *apocysie*. Sp., *apociesis*. See PARTURITION.

**APOCYETICUS** (Lat.), adj.  $A^2p(a^3p)-o-si(ku^6)-e^2t/i^2k-u^3s(u^4s)$ . Relating to childbirth. [L, 50.]

**APOCYMA** (Lat.), n. n.  $A^2p(a^3p)-o^2s(o^2k)/i^2(u^4)-ma^3$ . See APOCHYMA.

**APOCYN**, n.  $A^2p/o-si^2n$ . See APOCYNIN.

**APOCYN** (Fr.), n.  $A^3p-o-sa^2n^2$ . See APOCYNUM.—**A. chanvrin**. See APOCYNUM *cannabinum*.—**A. gobe-mouche**. See APOCYNUM *androsæmifolium*.

**APOCYNNA** (Lat.), n. n. pl.  $A^2p(a^3p)-o^2s(o^2k)/i^2n(u^4n)-a^3$ . Adanson's name for a family of plants comprising *Apocynum*, *Gentiana*, *Asclepias*, *Menyanthes*, and other genera now referred to distinct orders. [B, 170.]

**APOCYNACEAE** (Lat.), n. f. pl.  $A^2p(a^3p)-o^2s(o^2k)/i^2n(u^4n)-a(a^3)^{-}she^2(ke^2e)-a(a^3-e^2)$ . For deriv. see APOCYNUM. Fr., *apocynées*. Ger., *Apocynaceen*, *Hundstodgewächse*. It., *apocynacee*. Syn.: *Apocynæ* [Jussieu], *Contortæ* [Linnaeus], *Vinceæ* [De Candolle]. The dogbanes; an order of plants in the systems of De Candolle, Endlicher, and Lindley, comprising trees or shrubs with acid milky juice, with exstipulate entire leaves, and with flowers which have a 5-parted calyx and corolla, the latter twisted in aestivation, 5 stamens with filaments distinct, and 1 or 2 many-seeded ovaries with the stigmas united above into a pulley-shaped mass. By Lindley they are referred to the gentianial alliance, and by Bentham and Hooker to the cohort *Gentianales*. Lindley divides them into 5 tribes: 1. *Willoughbeæ*, with parietal placentæ. 2. *Cariacæ*, with a single 2-celled ovary containing naked seeds. 3. *Plumieræ*, with a double ovary and naked seeds. 4. *Parsonsæ*, with a single 2-celled ovary and comose seeds. 5. *Wrightæ*, with a double ovary and comose seeds. De Candolle makes the same division, but adds a sixth tribe, the *Alstoniæ*. Endlicher makes 3 suborders: 1. The *Cariacæ*, having a bacciform or capsular fruit consisting of two united carpels or a single carpel and a bilocular or unilocular ovary

with parietal placentae. 2. The *Ophiorhiza*, which have a drupaceous fruit springing from a double ovary. 3. The *Eupapocynae*, or *Apocynae* proper, which have a fruit containing two follicles. This last suborder is subdivided into five tribes, the *Plumerieae*, the *Alstonieae*, the *Echiteae*, the *Wrightieae*, and the *Gelsemieae*. Others admit a fourth suborder (or tribe), the *Allamandeeae*, having a parietal placentae, a multilocular ovary, and a bivalve capsule. [B. 34, 104, 121, 197.]

**APOCYNACEOUS**, adj.  $A^2p\text{-}o^2s\text{-}i^2n\text{-}a\text{'shu}^2s$ . Lat., *apocynaceus*. Fr., *apocynacé*. It., *apocinaceo*. 1. Of or resembling *Apocynum*. 2. Of or pertaining to the *Apocynaceae*. [B.]

**APOCYNE** (Fr.), n.  $A^2p\text{-}o\text{-}sen$ . See APOCYNIN.

**APOCYNEAE** (Lat.), n. f. pl.  $A^2p(a^3p\text{-}o^2s(o^2k)\text{-}i^2n(u^n)\text{'e}^2\text{-}e(a^3\text{'e}^2)$ . Fr., *apocynées*. Ger., *Apocynen*. It., *apocinee*. See APOCYNACEAE.

**APOCYNEIN**, n.  $A^2p\text{-}o\text{-}si^2n\text{'e}^2\text{-}i^2n$ . A glucoside obtained from *Apocynum cannabinum*. [B. 207.]

**APOCYNEOUS**, adj.  $A^2p\text{-}o\text{-}si^2n\text{'e}^2\text{-}u^2s$ . Lat., *apocyneus*. Fr., *apocyné*. See APOCYNACEOUS.

**APOCYNIN**, n.  $A^2p\text{-}o^2s\text{'i}^2n\text{-}i^2n$ . Fr., *apocyne*, *apocynine*. Ger., *Apocynin*. It., Sp., *apocinina*. 1. An amorphous resinous body found in the roots of *Apocynum cannabinum*. [B. 207.] 2. A preparation made from the root of *Apocynum androsaemifolium*. [B. 14.]

**APOCYNON** (Lat.), n. n.  $A^2p(a^3p\text{-}o^2s(o^2k)\text{'i}^2n(u^n)\text{'n}\text{-}o^2n$ . A small bone in the left side of frogs, formerly highly esteemed in medicine, and also worn around the neck to prevent attacks by biting dogs. [Pliny (B. 134).]

**APOCYNUM** (Lat.), n. n.  $A^2p(a^3p\text{-}o^2s(o^2k)\text{'i}^2n(u^n)\text{'u}^2m\text{'u}^4m$ . From  $\alpha\pi\acute{o}$ , from, and  $\kappa\upsilon\nu\acute{o}\varsigma$  (gen.,  $\kappa\upsilon\nu\acute{o}\varsigma$ ), a dog, because believed to be fatal to dogs. [Pliny (B. 34).] Fr., *apocyn*. Ger., *Hundskohl*. A genus of apocynaceous herbs with erect stalks, campanulate corollae, and silky seeds. [B. 34.]—**A. africanum angustifolium undulatum** [Moris]. See GOMPHOCARPUS *crispus*.—**A. androsaemifolium** [Linnaeus]. Fr., *attirape-mouche*. Dog's bane; a species growing wild in the United States. It stands about 3 feet high, with leaves dark-green superiorly and lighter in color inferiorly, and a white corolla with red stripes. Its root, which is used in medicine, is cylindrical, about  $\frac{1}{4}$  of an inch thick, covered with a rather thick pale-brown, bitter bark. It contains a bitter principle, starch, resin, and caoutchouc, and is used as a drastic cathartic and emetic, and in small doses as a stomachic tonic. It was also used by the Indians in the treatment of syphilis. A variety, *A. androsaemifolium*, var. *incanum*, differs in having leaves hoary-pubescent inferiorly. [B. 33, 34, 180.]—**A. canadense foliis androsami** [Boccone]. See *A. androsaemifolium*.—**A. canadense maximum flore minimo herbaceo**. See *A. cannabinum*.—**A. cannabinum** [Linnaeus]. Fr., *chanvre du Canada*. Canadian or Indian hemp; a species growing in the eastern United States and Canada. It has a stalk 2 to 4 feet high, and white flowers arranged in dense cymes. The variety *A. cannabinum*, var. *pubescens*, is distinguished by the pubescence on the inferior surface of the leaves and cymes, and the variety *A. cannabinum*, var. *hypericifolium*, by the narrow oblong shape of the leaves. By some, these varieties are regarded as distinct species. The root of *A. cannabinum*, the a. of the U. S. Ph., resembles that of *A. androsaemifolium*, but has a thicker bark and the wood is soft and fragile instead of tough, as is the case with the latter. It contains apocynin, apocynin, starch, and tannic acid, and has a strong, nauseating odor and a bitter, acrid taste. It is diuretic, diaphoretic, and expectorant, and in large doses emetic and cathartic. A textile fibre is obtained from the plant. [B. 33, 34, 180.]—**A. citrifolium**. A poisonous species growing in the West Indies, which its leaves are said to be used as a febrifuge. [Pouppé-Desportes (B. 46).]—**A. compressum** [Mönnch]. See *A. venetum*.—**A. erectum** [Plukenet]. See *A. cannabinum*.—**A. fetidum** [Burmann]. See *PERIDIERIA fetida*.—**A. folio oblongo** [Bauhin]. See *PERILOCA graeca*.—**A. folio subrotundo** [C. Bauhin]. See *MARSDENIA erecta*.—**A. frutescens** [Afzelius]. See *ICHNOCARPUS Afzelii*.—**A. hirsutum**, etc. [Plukenet]. See *GONOLOBUS hirsutus*.—**A. hypericifolium** [Aiton]. The *A. cannabinum*, var. *hypericifolium*. [B. 34.]—**A. indicum** [Lamarck]. Syn.: *Cynanchum indicum* [Lamarck]. A shrub growing in Cochinchina and the Moluccas, where the leaves, either raw or cooked, are used to improve the digestion and as a galactagogue. The root has been employed in gastric troubles and to obviate the ill effects resulting from eating poisonous fish and crabs. [B. 180.]—**A. juvenas**, **A. juvenas** [Loureiro]. A shrub of Cochinchina the root of which is regarded by the Chinese as prolonging life. It is also reputed to be tonic, astringent, styptic, and antisyphilitic, and is used to dye the beard black. It is now referred to *Tylophora*. [B. 46, 180; L. 75.]—**A. maculatum**. A poisonous species indigenous to the Antilles. [Pouppé-Desportes (B. 46).]—**A. maritimum**. See *A. venetum*.—**A. muscipulum** [Mönnch]. See *A. androsaemifolium*.—**A. piscatorium** [Douglas]. See *A. cannabinum*.—**A. pubescens** [R. Brown]. The *A. cannabinum*, var. *pubescens*. [B. 34.]—**A. repens** [Camm]. See *PERILOCA graeca*.—**A. reticulatum**. 1. Of Loureiro, see *A. indicum*. 2. Of Linnaeus, an East Indian species. [B. 211.]—**A. salicifolium** [Med. Act. Palat.]. See GOMPHOCARPUS *fruticosus*.—**A. scandens virginianum**, etc. [Moris]. See GONOLOBUS *obliquus*.—**A. sibiricum** [Palas]. See *A. venetum*.—**A. spinosum**. A poisonous species indigenous to the Antilles. [Pouppé-Desportes (B. 46).]—**A. syriacum**. Of Clusius, a species confounded with the *Asclepias syriaca* (*Cornuti*), but probably to be referred to *Calotropis procera*. [B. 211, 214.]—**A. tiliaefolium** [Lamarck]. See *DREGEA volubilis*.—**A. venetum** [Linnaeus]. Fr., *tue-chien de Venise*. A perennial herbaceous variety growing on the shores of the Adriatic and of the Black Sea. It was formerly known as *Tithymalus maritimus*, and the root was employed as an emetic and cathartic. [B. 180.]—**A. villosum**. See *A. cannabinum*, var. *pubescens*.—**A. viminale** [Bass.].

See SARCOSTEMMA *viminale*.—**Herba apocyni folio subrotundo**. The herb of *Marsdenia erecta*. [B. 180.]

**APOCYRTUMENON** (Lat.), n. n.  $A^2p(a^3p\text{-}o\text{-}su^2r(ku^6r)\text{'tu}^2\text{-}(tu)^2me^2n\text{'o}^2n$ . Gr.,  $\alpha\pi\omicron\kappa\upsilon\rho\tau\upsilon\mu\epsilon\nu\omicron\nu$  (from  $\alpha\pi\omicron\kappa\upsilon\rho\tau\alpha\theta\alpha\iota$ , to become prominent [ $\alpha\pi\omicron\sigma\tau\eta\mu\alpha$  understood]). An abscess gathered to a pointed head. [Hippocrates (L. 14).]

**APODA** (Lat.), n. n. pl.  $A^2p(a^3p\text{'o}\text{'da}^2$ . From a priv., and  $\pi\omicron\upsilon\varsigma$ , a foot. Fr., *apodes*. 1. A class of animals having no feet or organs homologous with feet, or fish without ventral fins. 2. Aristotle's third section of air-breathing animals. [B. 28; L. 73.] 3. In botany, groups of the *Hydnei*, *Polyptori*, and *Agarici* in which the pileus is not supported by a pedicel. [Nees v. Esenbeck (B. 121).]

**APODACRYTIC**, adj.  $A^2p\text{-}o\text{-}da^2k\text{'ri}^2t\text{'i}^2k$ . Gr.,  $\alpha\pi\omicron\delta\alpha\kappa\rho\upsilon\tau\iota\kappa\acute{o}\varsigma$  (from  $\alpha\pi\omicron\delta\alpha\kappa\rho\upsilon\epsilon\iota\nu$ , to weep, also to cease to weep). Lat., *apodacryticus*, *apodacrytus*. Fr., *apodacrytique*. It., *apodacritico*. Sp., *apodacritico*. 1. Exciting the flow of the tears. 2. Restraining it. [L. 51, 53.]

**APODAL**, adj.  $A^2p\text{'o}^2d\text{'a}^2l$ . For deriv., see APODA. Fr., *apode*. Ger., *apodisch*. See APODOUS.

**APODAN**, n.  $A^2p\text{'o}^2d\text{'a}^2n$ . An apodous animal. [L.]

**APODANTHEAE** (Lat.), n. f. pl.  $A^2p(a^3p\text{'o}^2d\text{'a}^2n(a^3n)\text{'the}^2\text{'e}^2\text{-}(a^3\text{'e}^2)$ . From *Apodanthes*, one of the genera. A division of rafflesiaceae plants established by R. Brown. [B. 104, 197.]

**APODEMA** (Lat.), n. n.  $A^2p(a^3p\text{'o}^2d\text{'e}^2m\text{'a}^3$ . Gen., *apodem'atos* (-tis). See pl., APODEMATA.

**APODEMAL**, adj.  $A^2p\text{'o}^2d\text{'e}^2m\text{'a}^2l$ . Relating to an apodema. [B. 100.]

**APODEMATA** (Lat.), n. n., pl. of *apodema*.  $A^2p(a^3p\text{'o}^2d\text{'e}^2m\text{'a}^3\text{'ta}^3$ . Perhaps from  $\alpha\pi\omicron\delta\epsilon\iota\nu$ , to bind or tie fast. Fr., *apodèmes*. Apodemes; certain processes of the exoskeleton in crustaceans, usually dipping inward in the form of septa for the attachment of muscles, but sometimes extending outward. They are distinguished from the epidermata by consisting of two plates, one of which proceeds from one, and the other from the other, of two adjacent somites. According to their situation, they are termed inter-maxillary, thoracic, etc. [A. 301, 359; L. 168.]

**APODEMES**, n. pl.  $A^2p\text{'o}^2d\text{'e}^2m$ . See APODEMATA.

**APODEMIALGIA** (Lat.), n. f.  $A^2p(a^3p\text{'o}^2d\text{'e}^2m\text{'i}^2a\text{'l}(a^3l)\text{'ij}^2\text{'i}^2\text{'a}^3$ . (gr<sup>2</sup>) $\text{'a}^3$ . From  $\alpha\pi\omicron\delta\eta\mu\iota\alpha$ , a journey, and  $\alpha\lambda\gamma\epsilon\iota\nu$ , to grieve. Fr., *apodémialgie*. Ger., *Apodemialgie*. *Hinanswehe*. It., *apodemialgia*. A morbid condition in which there is a strong desire to leave home; the reverse of homesickness. [Hoyer (L. 50).]

**APODES**, **APODI** (Lat.), n's m. pl.  $A^2p(a^3p\text{'o}^2d\text{'e}^2s(\text{'de}^2s)$ , -di(-de). See APODA (3d def.).

**APODIA** (Lat.), n. f.  $A^2p(a^3p\text{'o}^2d\text{'i}^2a^3$ . From a priv., and  $\pi\omicron\upsilon\varsigma$ , the foot. Fr., *apodie*. Ger., *Apodie*, *Fusslosigkeit*. Sp., *apodia*, *apodasia*. The condition of being without feet or lower extremities. [L. 32, 44.]

**APODIPOSI** (Lat.), n. f.  $A^2p(a^3p\text{'o}^2d\text{'i}^2p\text{'o}^2si^2s$ . Gen., *apodipo'seos* (-sis). See *Fatty DEGENERATION* and *STEATOSIS*.

**APODOCÉPHALE** (Fr.), adj.  $A^3\text{-}p\text{'o}\text{-}do\text{'sa}\text{'fa}^2l$ . Having the flowers sessile and collected in heads. [L. 41.]

**APODOGYNOUS**, adj.  $A^2p\text{'o}^2d\text{'j}^2n\text{'u}^2s$ . Lat., *apodogynus*. Fr., *apodogyne*. Not adherent to the ovary at its base (said of the discs of flowers). [Richard (B. 17).]

**APODON** (Lat.), n. n., sing of *apoda* (q. v.).  $A^2p(a^3p\text{'o}^2d\text{'o}^2n$ .

**APODOPNIQUE** (Fr.), adj.  $A^3\text{-}p\text{'o}\text{-}do^2p\text{'nek}$ . From  $\alpha\pi\omicron\delta\omicron\varsigma$  (=  $\alpha\pi\omicron\delta\omicron\varsigma$ ), a return, and  $\pi\upsilon\epsilon\iota\nu$ , to breathe. Re-establishing respiration in cases of asphyxia (said of remedies, apparatus, etc.). [L. 41.]

**APODOSIS** (Lat.), n. f.  $A^2p(a^3p\text{'o}^2d\text{'o}^2si^2s$ . Gen., *apodo'seos* (-sis). Gr.,  $\alpha\pi\omicron\delta\omicron\varsigma$ . It., *apodosi*. 1. A passing from one part into another (as from the small into the large intestine). 2. A return, restitution. [A. 322.]

**APODOSPOREI** (Lat.), n. m. pl.  $A^2p(a^3p\text{'o}^2d\text{'o}\text{'spo}^2re^2i\text{'e}$ . From a priv.,  $\pi\omicron\upsilon\varsigma$ , a foot, and  $\sigma\pi\omicron\rho\alpha$ , a seed. A group of pyrenomycetous *Fungi* made by Bail, including genera in which the spores have no pedicel; opposed to the *Podosporei*, in which the spores are pedicellate. [B. 121.]

**APODOUS**, adj.  $A^2p\text{'o}^2d\text{'u}^2s$ . Lat., *apodus* (from a priv., and  $\pi\omicron\upsilon\varsigma$ , a foot). Fr., *apode*. Ger., *apodisch*, *fusslos*. Destitute of feet or their analogues; of fishes, lacking ventral fins. [L.]

**APODYTERIUM** (Lat.), n. n.  $A^2p(a^3p\text{'o}^2d\text{'i}^2t\text{'e}^2r\text{'i}^2u\text{'m}$ . Gr.,  $\alpha\pi\omicron\delta\upsilon\tau\eta\rho\iota\upsilon\mu$  (from  $\alpha\pi\omicron\delta\upsilon\epsilon\iota\nu$ , to take off one's clothing). Sp., *apoditerio*. 1. An ancient term for the room in which bathers removed their clothing. 2. A room in which patients removed their clothing previous to an operation. [L. 53.]

**APOGALACTISMUS** (Lat.), n. m.  $A^2p(a^3p\text{'o}\text{'ga}^2l(ga^3l)\text{'a}^2k\text{'(a}^3k)\text{'ti}^2z\text{'(ti}^2s)\text{'mu}^2s(\text{'mu}^2s)$ . Gr.,  $\alpha\pi\omicron\gamma\alpha\lambda\alpha\kappa\tau\iota\sigma\mu\acute{o}\varsigma$  (from  $\alpha\pi\omicron\gamma\alpha\lambda\alpha\kappa\tau\iota\zeta\epsilon\iota\nu$ , to wean). Fr., *apogalactisme*. Ger., *Apogalactismus*. It., Sp., *apogalactismo*. See ABLACTATION.

**APOGALACTISTICUS** (Lat.), adj.  $A^2p(a^3p\text{'o}\text{'ga}^2l(ga^3l)\text{'a}^2k\text{'(a}^3k)\text{'ti}^2z\text{'(ti}^2k\text{'u}^2s(\text{'u}^2s)$ . Proceeding from or relating to weaning. [L. 50.]

**APOGALACTOS**, **APOGALACTUS** (Lat.), adj's, and n's m.  $A^2p(a^3p\text{'o}\text{'ga}^2l(ga^3l)\text{'a}^2k\text{'(a}^3k)\text{'to}^2s$ ,  $\text{'tu}^2s(\text{'tu}^2s)$ . See ABLACTATUS.

**APOGAMIA** (Lat.), n. f.  $A^2p(a^3p\text{'o}\text{'ga}^2m(ga^3m)\text{'i}^2a^3$ . From  $\alpha\pi\acute{o}$ , apart from, and  $\gamma\acute{\alpha}\mu\omicron\varsigma$ , marriage. Ger., *Apogamie*. See APOGAMY.

**APOGAMOUS**, adj.  $A^2p\text{'o}^2g\text{'a}^2m\text{'us}$ . Pertaining to or characterized by apogamia.

**APOGAMY**, n.  $A^2p\text{'o}^2g\text{'a}^2m\text{'i}^2$ . See APOGAMIA. Non-sexual reproduction; a term sometimes used in botany as synonymous with parthenogenesis, but generally used in a more restricted sense to express the development in ferns, apart from any sexual act, of

a bud upon the spots where the archegonia are usually developed, which bud subsequently grows into a perfect plant. [B, 49, 54.] See also APANDRY, APOGYN, and APOSPORY.

**APOGASTRA, APOGASTRIA** (Lat.), n's n. pl.  $A^2p(a^3p)-o-ga^2s(ga^2s)/tra^3$ , -tri<sup>2</sup>-a<sup>3</sup>. From a priv., *ποῦς*, a foot, and *γαστήρ*, the belly. A section of molluscs having no feet on the belly. [Latreille (L, 50).]

**APOGEOSIS** (Lat.), n. f.  $A^2p(a^3p)-o-je(ga)-o'si^2s$ . Gen., *apogeos/seos (-sis)*. See AGEUSIA.

**APOGEOTROPIC**, adj.  $A^2p-o-je-o-tro^2p/i^2k$ . From *ἀπό*, away from, *γῆ*, the earth, and *τρέπειν*, to turn. Fr., *apogéotropique*. Turning away from the ground (said of plants in their growth). [B, 229.]

**APOGEUSIS, APOGEUSIA, APOGEUSIS, APOGEUS-TIA** (Lat.), n's f.  $A^2p(a^3p)-o-ju^2-o'si^2s$ , -ju<sup>2</sup>/si<sup>2</sup>-a<sup>3</sup>, -ju<sup>2</sup>/si<sup>2</sup>s, -ju<sup>2</sup>st/-i<sup>2</sup>-a<sup>3</sup>. From *ἀπό*, apart from, and *γεῦσις*, the sense of taste. See AGEUSIA.

**APOGLAUCOSIS** (Lat.), n. f.  $A^2p(a^3p)-o-gla^4(gla^4-u)-ko'si^2s$ . Gen., *apoglaucos/seos (-sis)*. Gr., *ἀπογλαυκωσις*. Fr., *apoglaucosis*. Ger., *Apoglaucosis*. Sp., *apoglaucosis*. The formation of a glaucoma. [Dioscorides (A, 311).]

**APOGLUCIC ACID**, n.  $A^2p-o-glu^2/si^2k$ . From *ἀπό*, and *glucic*. Syn.: *apogluconic acid*. Fr., *acide apogluconique* (ou *apogluconique*). Ger., *Apogluconsäure*. An acid formed by the decomposition of glucic acid and having the formula  $C_{18}H_{22}O_{11}$  ( $= C_{18}H_{20}O_8 + 3H_2O$ ) when dried at 100° C., and  $C_{18}H_{18}O_9$  ( $= C_{18}H_{16}O_6 + 2H_2O$ ) when dried at 140°. [B, 2.]

**APOGON** (Lat.), adj.  $A^2p(a^3p)-o-go^2n$ . Gen., *apogon/ois*. Gr., *ἀπογώνω*. Fr., *apogone*. Ger., *bartlos*. Sp., *apogóno*. Beardless. [L, 50.]

**APOGONA** (Lat.), n. n. pl.  $A^2p(a^3p)-o-g^2/o^2n-a^3$ . Gr., *ἀπόγονα* (n. pl. of adj. *ἀπόγονος*, descended from). The foetus and its appendages. [Hippocrates (A, 325).]

**APOGONI** (Lat.), n. m. pl. of adj. *apogon* (q. v.).  $A^2p(a^3p)-o-go^2(nine)$ . Fr., *apogones*. A section of mosses named by Palisot-Beauvais, in which the urn has no peristome; comprising *Sphagnum* and several other genera. [B, 121, 170.]

**APOGYN**, n.  $A^2p-o-g^2/e^2n-i^2$ . From *ἀπό*, apart from, and *γυνή*, a female. The form of non-sexual reproduction in plants in which development takes place directly from the female generative organ without the formation of the female generative element. [McNab, "Proc. of the Roy. Dubl. Soc.," Oct., 1885, p. 466 (B).]

**APOHYAL**, n.  $A^2p-o-hi^2a^2l$ . Fr., *apohyal*. The first pieces of the styloid cornua of the hyoid bone. [G. St.-Hilaire (L, 43, 116).]

**APOLAR**, adj.  $A^2p-o-la^2r$ . From a priv., and *πόλος* (see POLE). Ger., *apolar*, *fortsatzlos*. It., *apolare*. Sp., *apolar*. Having no poles or processes (said particularly of nerve cells). [J.]

**APOLEMIADÆ** (Lat.), n. f. pl.  $A^2p(a^3p)-o-le^2m-i^2(e)-a^3de$ , -da<sup>2</sup>-e<sup>2</sup>. A family of physophoridous hydrozoa characterized by a hydrosoma with nectocalyces and hydrophyllia, the latter grouped with the other organs at considerable intervals along the coenosarc; the coenosarc filiform; and the pneumatocyst small. [Huxley (A, 359).]

**APOLEMPISIS** (Lat.), n. f.  $A^2p(a^3p)-o-le^2mp/si^2s$ . Gen., *apolemp/seos (-sis)*. See APOLEPSIS.

**APOLEPISIS** (Lat.), n. f.  $A^2p(a^3p)-o-le^2p/i^2s-i^2s$ . Gen., *apolepis/seos (-sis)*. From *ἀπολεπίω*, to peel off. Fr., *apolepisme*. Ger., *Apolepismus*, *Abshulferung*. Desquamation. [L, 50.]

**APOLEPISMA** (Lat.), n. n.  $A^2p(a^3p)-o-le^2p-i^2z(i^2s)/ma^3$ . Gen., *apolepis/matos (-tis)*. Gr., *ἀπολεπίσμα*. A husk, peel; anything cast off by desquamation. [A, 311, 322.]

**APOLEPISMUS** (Lat.), n. m.  $A^2p(a^3p)-o-le^2p-i^2z(i^2s)/mu^2s$ , -mu<sup>2</sup>s. See APOLEPSIS.

**APOLEPSIA, APOLEPSIS** (Lat.), n's f.  $A^2p(a^3p)-o-le^2p/si^2a^3$ , -si<sup>2</sup>s. Gen., *apolep/sie*, -lep/seos (-sis). Gr., *ἀποληψία* (from *ἀπολαμβάνειν*, to arrest). Fr., *apolepsie*. Ger., *Apolepsie*. It., *apolepsia*. Sp., *apolepsia*. 1. The cessation of the function of an organ. 2. The suppression of any natural function. 3. Aphonia. 4. Asphyxia. 5. Epilepsy. [A, 301; L, 46, 50, 53, 94.]

**APOLEPTICUS** (Lat.), adj.  $A^2p(a^3p)-o-le^2p/ti^2k-u^2s(u^4s)$ . Relating to or suffering with apolepsia. [M, 13.]

**APOLEXIS** (Lat.), n. f.  $A^2p(a^3p)-o-le^2x/i^2s$ . Gen., *apoler/seos (-is)*. Gr., *ἀπολήξις*. Fr., *apolerie*. Sp., *apoleris*. The period of life when the strength grows less. [Hippocrates (L, 53).]

**APOLINOSIS** (Lat.), n. f.  $A^2p(a^3p)-o-li^2n-o'si^2s$ . Gen., *apolino/seos (-sis)*. Gr., *ἀπολίνωσις* (from *ἀπολύνω*, to tie with a thread). Fr., *apolinose*. It., *apolinosi*. Sp., *apolinosi*. The cure of an anal fistula by means of a ligature. [Paulus Aegineta (L, 53).]

**APOLIPSIS** (Lat.), n. f.  $A^2p(a^3p)-o-li^2ps/i^2s$ . Gen., *apolip/seos (-sis)*. Gr., *ἀπολipsis* (from *ἀπολείπειν*, to leave behind). 1. Aphonia, especially if sudden. 2. Partial catalepsy. [L, 50.]

**APOLLINARIS** (Lat.), adj. and n. f.  $A^2p(a^3p)-o-li^2n-a(a^3)/ri^2s$ . 1. Of or pertaining to Apollo. [B, 121.] See HERBA a. 2. (N.) An ancient name for several narcotic plants, including *Hypocyamus*. [Pliny, Apuleius (A, 312).] 3. (N.) A spring in the valley of the Ahr, in Rhenish Prussia, the water of which is used largely as a beverage, alone or mixed with wine, and to some extent medicinally as an alkaline remedy. The following table shows an average of eight analyses by Bischof and Mohr:

Sodium carbonate.....	6.964 grains in a pint.
Magnesium carbonate.....	2.751 " " "
Calcium carbonate.....	1.900 " " "
Sodium chloride.....	2.743 " " "
Sodium sulphate.....	1.548 " " "

Sodium phosphate {	traces
Potassium salts {	
Iron oxide, with alumina.....	0.049 grain in a pint.
Silicic acid.....	0.009 " " "
Carbonic acid (free and semi-combined).....	42.81 cub. in. " " "
Carbonic acid (combined).....	12.44 " " "

[A, 363.]

**APOLYOTHALAME** (Lat.), n. f. pl.  $A^2p(a^3p)-o-li^2-i^2(u^4s)-o-tha^2(thai^3)/a^3-me(ma^3-e^2)$ . Of Trevisan, a suborder of florideous *Algæ*, comprising the single tribe *Ceramiceæ*. [B, 170.]

**APOLYSIA** (Lat.), n. f.  $A^2p(a^3p)-o-li^2s(lu^4s)/i^2-a^3$ . Gr., *ἀπολυσία*. See APOLYSIS (1st def.).

**APOLYSIS** (Lat.), n. f.  $A^2p(a^3p)-o-li^2s(lu^4s)-i^2s$ . Gen., *apolys/seos (-sis)*. Gr., *ἀπόλυσις* (from *ἀπολύειν*, to loose). Fr., *apolyse*. Sp., *apólisis*. 1. A weak condition of the limbs or the loosening of a bandage. [Erotian (L, 94).] 2. The expulsion of a foetus or the secundines. [L, 84.] 3. Numbness of the extremities. [M, 13.] 4. The termination or resolution of a disease. [L, 53.] 5. Release from confinement. [M, 60.]

**APOLYTICUS** (Lat.), adj.  $A^2p(a^3p)-o-li^2t(lu^4t)/i^2k-u^2s(u^4s)$ . Gr., *ἀπολυτικός*. Relating to, suffering with, or tending to apolysis. [M, 13.]

**APOMAGMA** (Lat.), n. n.  $A^2p(a^3p)-o-ma^2g(ma^3g)/ma^3$ . Gen., *apomag/matos (-tis)*. Gr., *ἀπομάγμα* (from *ἀπομάσσειν*, to wipe clean). 1. Anything suitable for removing or cleaning away sordes or excrement. [Hippocrates (L, 53).] 2. A cathartic. [L, 70.]

**APOMATHEMA** (Lat.), n. n.  $A^2p(a^3p)-o-ma^3-the(thai^3)/ma^3$ . Gen., *apomathem/atos (-tis)*. Gr., *ἀπομάθημα*. Forgetfulness. [Hippocrates (L, 53).]

**APOMATOSTOMUS** (Lat.), adj.  $A^2p(a^3p)-o-ma^3-to^2s-to^2m-u^2s(u^4s)$ . Fr., *apomatostome*. Used by Menke of gasteropods having no opercula. [L, 116.]

**APOMELI** (Lat.), n. n.  $A^2p(a^3p)-o-m^2e^2l-i^2(e)$ . Gr., *ἀπομέλι*. An ancient mixture of honey or honey-comb and vinegar cooked until the pungency of the vinegar was lost; used to promote the action of the intestines and kidneys. [Galen (L, 53).]

**APOMESOSTOMUS** (Lat.), adj.  $A^2p(a^3p)-o-me^2s-o^2s-to^2m-u^2s(u^4s)$ . From *ἀπό*, away from, *μέσος*, the centre, and *στόμα*, a mouth. Fr., *apomésostome*. Without a central mouth. [L, 116.]

**APOMORPHIA** (Lat.), n. f.  $A^2p(a^3p)-o-mo^2rf/i^2-a^3$ . See APOMORPHINE.

**APOMORPHICUS** (Lat.), adj.  $A^2p(a^3p)-o-mo^2rf/i^2k-u^2s(u^4s)$ . Of or pertaining to apomorphine. [B.]

**APOMORPHIN** (Ger.), n.  $A^3-po-mo^2rf-en'$ . See APOMORPHINE. —*A hydrochlorat*, *Salzsaures A*. See APOMORPHINE *hydrochloride*.

**APOMORPHINA** [Fr. Cod.] (Lat.), n. f.  $A^2p(a^3p)-o-mo^2rf-i^2(e)/na^3$ . Apomorphine. [B, 113]. —*Apomorphine hydrochloras* [U. S. Ph.]. See APOMORPHINE *hydrochloride*.

**APOMORPHINE**, n.  $A^2p-o-mo^2rf/en$ . For deriv., see *apo\** and *MORPHINE*. Lat., *apomorphina* [Fr. Cod.], *apomorphinum*. Fr., *apomorphine*. Ger., *Apomorphin*. It., Sp., *apomorfina*. An artificial alkaloid,  $C_{17}H_{17}NO_2$ , derived from morphine and codeine by various processes which cause their dehydration. It forms crystals, soluble in water, and more readily so in alcohol, in ether, and in chloroform. It is official in the Fr. Cod. [B, 5.] —*A. hydrochlorate*, *A. hydrochloride*. Lat., *apomorphine hydrochloras* [U. S. Ph.], *apomorphinum hydrochloricum* [Ger. Ph.], *chlorhydras apomorphinicus* [Fr. Cod.], Fr., *chlorhydrate d'apomorphine*. Ger., *Apomorphinhydrochlorat*, *salzsaures Apomorphin*. It., *cloridrato di apomorfina*. Sp., *cloridrato de apomorfina*. A salt of the composition  $C_{17}H_{17}NO_2 \cdot HCl$ , forming a white or grayish crystalline powder, soluble in water. It readily becomes green on exposure to moisture and light. In doses of  $\frac{1}{15}$  of a grain it is an antemetic, but in doses of from  $\frac{1}{10}$  to 1 grain it is emetic. [B; L, 65.]

**APOMORPHINUM** (Lat.), n. n.  $A^2p(a^3p)-o-mo^2rf-i^2(e)/nu^2m$ , -nu<sup>2</sup>m. See APOMORPHINE. —*A. hydrochloricum* [Ger. Ph.]. See APOMORPHINE *hydrochloride*.

**APOMORPHOSIS** (Lat.), n. f.  $A^2p(a^3p)-o-mo^2rf-o'si^2s$ . Gen., *apomorpho/seos (-sis)*. Gr., *ἀπομόρφωσις*. Fr., *apomorphose*. It., *apomorfosi*. In chemistry, a metamorphosis in which a body acting upon another body takes something away from the latter. [Gerhardt (A, 301).]

**APOMYELINE**, n.  $A^2p-o-mi^2e^2l-en$ . From *ἀπό*, from, and *μυελός*, the brain. An organic principle,  $C_{44}H_{109}N_3PO_8$ , belonging to the series of monophosphatides, obtained by Thudichum from the human brain. [B, 220.]

**APOMYLENAS, APOMYLENE** (Lat.), n's f.  $A^2p(a^3p)-o-mi^2l(mu^4l)-e(a)/na^3s(na^3s)$ , -le(a)/ne(na). Gr., *ἀπομύληνας* (from *ἀπομύλλω*, to make mouths). Sp., *apomylena*. 1. A distortion or convulsion of the cheek or adjacent parts particularly when occasioned by a blow or wound. [Erotian (L, 94).] 2. Protrusion of the lips. [L, 53.]

**APOMYSTOSE** (Fr.), n.  $A^3-po-mi^2st-os$ . See APOMYSTOSIS.

**APOMYTHOSIS, APOMYTOSIS** (Lat.), n's f.  $A^2p(a^3p)-o-mi^2th(mu^4th)-o'si^2s$ , -mi<sup>2</sup>t(mu^4t)-to'si<sup>2</sup>s. Gen., *apomytho/seos (-sis)*, -mytto/seos (-sis). From *ἀπομύττω*, to blow one's nose. Fr., *apomytose*. It., *apomytosi*. Sp., *apomytosis*. A spasm and trembling of the head, with sonorous respiration and agitation of the whole body, in an effort to clear the nose. It differs from sneezing in that the breathing is stertorous. [L, 132.]

**APONE** (Fr.), n.  $A^3-pon$ . From a priv., and *πόνος*, pain. An anodyne. [V. Poulet, "Bull. gén. de therap.," Feb. 15, 1886; "N. Y. Med. Jour.," March 13, 1886, p. 312.]

**APONECROSIS** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o-ne<sup>2</sup>k-ro'si<sup>2</sup>s. Gen., *aponecro'seos* (-sis). Gr., ἀπονέκρωσις (from ἀπονεκρῶν, to kill utterly). Death [Epictetus (A, 311).]

**APONEUROGRAPHY, APONEUROLOGY**, n's. A<sup>2</sup>p-o-nu<sup>2</sup>-ro<sup>2</sup>g-ra<sup>2</sup>f-i<sup>2</sup>, -ro<sup>2</sup>l-o-j<sup>2</sup>. From ἀπονεύρωσις (see APONEUROSIS), and γράφειν, to write, or λόγος (see -logy\*). Lat., *aponeurographia*, *aponeurologia*. Fr., *aponeurographie*, *aponeurologie*. Ger., *Aponeurographie*, *Aponeurologie*. It., *aponeurografia*, *aponeurologia*. Sp., *aponeurografia*, *aponeurologia*. The anatomy of the aponeuroses. [L, 43.]

**APONEUROSE** (Ger.), n. A<sup>3</sup>-po-noi-ro'ze<sup>2</sup>. See APONEUROSIS.—**Insertionsa'**. See APONEUROSIS of insertion.—**Umhüllungsa'**. See APONEUROSIS of investment.

**APONEUROSIS** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o-nu<sup>2</sup>-ro'si<sup>2</sup>s. Gen., *aponeuro'seos* (-sis). Gr., ἀπονεύρωσις. Fr., *aponevrose*. Ger., *Aponeurose*. It., *aponeurosi*. Sp., *aponeurosis*, *aponeurosis*. 1. A cord or tendon. [Hippocrates (L, 53).] 2. A white shining membrane made up of interlacing fibres; the term is often used synonymously with fascia. [C, 1.]—**Abdominal a.** Fr., *aponevrose abdominale*. A term which has been applied to the abdominal fascia, the a. of the oblique muscles of the abdomen, and the abdominal tunic. [L, 1.]—**Anterior a. of the transversalis abdominis**. The anterior fibrous portion of the transversalis abdominis, which is blended with its fellow of the opposite side. [L, 142.]—**Anterior crural a.** The fibrous layer which in many of the lower animals descends from the fold of the flank to the patella and inner surface of the leg, and is connected with the fascia lata. [L, 13.]—**Anterior perineal a.** Fr., *aponevrose périnéale antérieure* (ou superficielle). See *Superficial perineal fascia*.—**Antibrachial a.** Fr., *aponevrose antibrachiale* (ou anti brachiale). The continuation of the brachial a. on to the forearm. It is attached to the superior borders of the anterior and posterior annular ligaments of the wrist, and sends prolongations between the muscles of the forearm. [L, 41.]—**A. analis**. See *Anal fascia*.—**A. bicipitis**. See *Semilunar fascia*.—**A. cranii**. See *Epicranial a.*—**A. cruris**. See *Fascia lata*.—**A. dorsalis**. See *Dorsal fascia*.—**A. dorsalis manus profunda**. Fr., *aponevrose dorsale profonde de la main*. That portion of the dorsal fascia of the hand which covers the interosseous muscles and is attached to the metacarpal bones. [L, 7.]—**A. dorsalis manus superficialis**. Fr., *aponevrose dorsale superficielle de la main*. A thin layer of fibrous tissue lying upon the tendons of the extensor communis digitorum. [L, 7.]—**A. epicranial**. See *Epicranial a.*—**A. femoralis**. See *Fascia lata*.—**A. ischio-pubica**. Fr., *aponevrose ischio-pubique*. The anterior portion of the superficial perineal fascia which extends between the pubic arch and the ischial tuberosities. [Velpeau (L, 7).]—**A. ischio-rectalis**. See *Ischio-rectal fascia*.—**A. lumbaris**. See *Lumbar fascia*.—**A. occipito-frontalis**. See *Epicranial a.*—**A. of insertion**. Fr., *aponevrose d'insertion*. Ger., *Insertionsaponeurose*. It., *aponeurosi di inserzione*. An a. which serves as the means of attachment of a muscle to a bone; a flattened tendon. [A, 301; L, 32.]—**Aponeuroses of intersection**. Fr., *aponevroses d'intersection*. Syn.: *partial aponeuroses*. The fibrous bands which form part of the continuity of some muscles. [A, 301; L, 32.]—**Aponeuroses of investment**. See *General aponeuroses*.—**A. of the arm**. See *Brachial a.*—**A. of the deltoid muscle**. See *Deltoid a.*—**A. of the diaphragm**. The central tendon of the diaphragm. [L, 7.]—**A. of the external oblique muscle**. The broad fibrous expansion of the external oblique muscle which blends with its fellow of the opposite side at the linea alba; below, its fibres become closely aggregated, forming Poupart's ligament. [L, 142.]—**A. of the forearm**. See *Antibrachial a.*—**A. of the internal oblique muscle**. The fibrous expansion of the internal oblique muscle. At the outer border of the rectus abdominis it divides into two layers, inclosing the muscle as far as a point about midway between the umbilicus and the pubes, the outermost blending with the a. of the external oblique, and the innermost with that of the transversalis. Above, it is attached to the ensiform process of the sternum and to the cartilages of the seventh and eighth ribs. [L, 142.]—**A. of the leg**. Fr., *aponevrose jambière*. The a. covering the calf of the leg. It is continuous above with the fascia lata and the periosteum over the head and anterior and inner borders of the tibia, and the head of the fibula; below, it is blended with the periosteum over the internal and external malleoli and the annular ligaments. It sends numerous septa into the calf, between the muscles. [L, 142.]—**A. of the soft palate**. A thin layer of fibrous tissue attached above to the hard palate and blended with the tendon of the tensor palati muscle. [L, 156.]—**A. palmaris externa**. Fr., *aponevrose palmaire externe*. A layer of fibrous tissue covering the palmar muscles, between which it sends numerous septa. [L, 7.]—**A. palmaris interna**. Fr., *aponevrose palmaire interne*. A layer of fibrous tissue, consisting chiefly of transverse fibres arising from the radial border of the fifth metacarpal bone, which envelops the muscles of the little finger, and is lost between them and the interossei. [L, 7.]—**A. palmaris profunda**. Fr., *aponevrose palmaire profonde*. A layer of fibrous tissue in the palm of the hand, covering the interossei muscles and the deep palmar arch. It is attached above to the carpal ligament and below to the metacarpophalangeal ligament. [L, 5.]—**A. perineal media**. See *Middle perineal a.*—**A. perineal profunda**. See *Deep perineal a.*—**A. pharyngis**. See *Pharyngeal a.*—**A. plantaris externa**. The external portion of the plantar fascia. [L, 31.]—**A. plantaris media**. The central portion of the plantar fascia. [L, 31.]—**A. praevertebralis**. See *Prevertebral fascia*.—**A. temporalis**. See *Temporal fascia*.—**A. vertebrales**. See *Vertebral a.*—**A. volaris**. See *Palmar fascia*.—**Brachial a.** Fr., *aponevrose brachiale*. The a. enveloping the muscles of the arm. It is attached above to the acromion and below to the internal and external tuberosities of the os brachii. [L, 41.]—**Cervical a.** Fr., *aponevrose cervicale*. See *Cervical fascia*.—**Contentive aponeuroses**. See *General aponeuroses*.—**Coronal a.** See *Epicranial a.*—**Crural a.** Fr., *aponevrose crurale*. Sp., *aponeuro-*

*sis crural*. See *Fascia lata*.—**Deep cervical a.** Fr., *aponevrose cervicale profonde*. See *Deep cervical fascia*.—**Deep perineal a.** Fr., *aponevrose périnéale profonde*. See *Deep perineal fascia*.—**Deltoid a.** A prolongation of the brachial a. which covers the deltoid muscle, into which it sends numerous septa. It is continuous with the fascia covering the pectoralis major and infraspinatus muscles, and is attached to the acromion, the clavicle, and the spine of the scapula. [L, 1.]—**Dorsal a. of the metacarpus**. Fr., *aponevrose dorsale du métacarpe*. A fibro-cellular tissue mainly composed of transverse fibres, prolonged downward from the lower border of the posterior annular ligament of the wrist over the extensor tendons of the fingers. [L, 41.]—**Epicranial a.** Fr., *aponevrose épiciénienne*, *calotte aponevrotique*. Ger., *Schädelhaube*. The fibrous structure connecting the two portions of the occipito-frontalis muscle. It is also attached to the protuberance and superior curved lines of the occipital bone, and is continuous with the fibres of the auricular muscles. [L, 142.]—**External scapular a.** The analogue in the lower animals of the suprascapular a. of man. [L, 13.]—**Femoral a.** See *Fascia lata*.—**General aponeuroses**. Fr., *aponevroses générales*. Syn.: *aponeuroses of investment*. A name given by Bichat to the aponeuroses which cover the muscles of a limb and retain them in position. They send prolongations between the muscles, and as a rule are attached by their extremities to bones. [L, 32.]—**Gluteal a.** Fr., *aponevrose fessière*. A term applied to the fascia covering the gluteal muscles. [L, 13.]—**Iliac a.** See *Iliac fascia*.—**Infraspinous a.** A fibrous tissue continuous with the a. of the arm and attached to the circumference of the infraspinous fossa. It gives origin to some of the fibres of the infraspinatus muscle and sends off septa separating that muscle from the teres major and minor muscles. [L, 156.]—**Lumbar a.** See *Lumbar fascia*.—**Middle perineal a.** Fr., *aponevrose périnéale moyenne*. See *Middle perineal fascia*.—**Occipito-frontal a.** See *Epicranial a.*—**Orbital a.** Fr., *aponevrose orbitaire*. A fibrous tissue in the orbit which gives off prolongations that cover the muscles, pass into the eyelids, and extend over certain portions of the eyeball. [L, 41.]—**Palmar a.** Fr., *aponevrose palmaire*. Sp., *aponeurosis palmar*. See *Palmar fascia*.—**Partial aponeuroses**. Fr., *aponevroses partielles*. Sp., *aponevroses parciales*. See *Aponeuroses of intersection*.—**Pedal a.** Fr., *aponevrose pédieuse*. A prolongation of the dorsal fascia of the foot which covers the extensor brevis digitorum. [L, 142.]—**Pelvic a.** Fr., *aponevrose pelvienne*. See *Pelvic fascia*.—**Perineal a.** Fr., *aponevrose périnéale*. See *Perineal fascia*.—**Plantar a.** Fr., *aponevrose plantaire*. See *Plantar fascia*.—**Posterior a. of the transversalis abdominis**. The middle layer of the lumbar fascia (q. v.). [L, 142.]—**Scapular a.** Fr., *aponevrose scapulaire*. It., *aponeurosi scapolare*. The a. covering the scapular muscles. [Chaussier (L, 91).]—**Subscapular a.** A thin fibrous membrane attached to the circumference of the subscapular fossa, giving rise to some of the fibres of the subscapular muscle. [L, 156.]—**Superficial perineal a.** Fr., *aponevrose périnéale superficielle* (ou ischio-pubio-vulvaire). See *Superficial perineal fascia*.—**Supra-hyoid a.** Fr., *aponevrose sus-hyoïdienne*. A fold of the cervical fascia extending between the two bellies of the digastric muscle and attached to the hyoid bone. [L, 7.]—**Supraspinous a.** A fibrous tissue attached to the circumference of the supraspinous fossa, which gives rise to some of the fibres of the supraspinatus muscle. [L, 156.]—**Tibial a.** See *A. of the leg*.—**Vertebral a.** The a. which separates the muscles of the shoulder and arm from those which support the head and arm. See also *Lumbar fascia*. [L, 142.]

**APONEUROSITIS** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o-nu<sup>2</sup>-ro-si(sey)ti<sup>2</sup>s. Gen., *aponeurositis*. For deriv., see APONEUROSIS and -itis\*. Inflammation of an aponeurosis. [L.]

**APONEUROTIC**, adj. A<sup>2</sup>p-o-nu<sup>2</sup>-ro<sup>2</sup>t'ik. Lat., *aponeuroticus*. Fr., *aponevrotique*. Ger., *aponeurotisch*, *flechsig*. It., *aponeurotico*. Sp., *aponeurótico*. Relating to, resembling, or constituting an aponeurosis. [L.]

**APONEUROTOME**, n. A<sup>2</sup>p-o-nu<sup>2</sup>-ro<sup>2</sup>-tom. From ἀπονεύρωσις (see APONEUROSIS), and τέμνω, to cut. Fr., *aponevrotome*. Ger., *Aponeurotom*. It., *aponeurotomo*. A curved blunt-pointed bistoury with a cutting edge extending only part of the length of the blade. It was invented by Civiale for dividing the abdominal aponeurosis in suprapubic cystotomy. [L, 32.]

**APONEUROTOMY**, n. A<sup>2</sup>p-o-nu<sup>2</sup>-ro<sup>2</sup>t'o-mi<sup>2</sup>. Lat., *aponeurotomy*. Fr., *aponevrotomie*. It., *aponeurotomy*. Sp., *aponeurotomía*. The dissection of aponeuroses or the section of an aponeurosis. [L, 43.]

**APONÉVROSE** (Fr.), n. A<sup>3</sup>-po-nav-ros. See APONEUROSIS.—**A. buccale**, **A. bucco-pharyngienne**. See *Bucco-pharyngeal fascia*.—**A's capsulaires** [Chaussier]. See *General aponeuroses*.—**A. cervicale**. See *Cervical fascia*.—**A. coraco-claviculaire**. See *Coraco-clavicular fascia*.—**A. crurale**. See *Fascia lata*.—**A's de contention**. See *General aponeuroses*.—**A's d'enveloppe**. See *General aponeuroses*.—**A. digastrique**. See *Supra-hyoid aponeurosis*.—**A. d'insertion**. See *Aponeurosis of insertion*.—**A's d'intersection**. See *Aponeuroses of intersection*.—**A. dorsale du metacarpe**. See *Dorsal aponeurosis of the metacarpus*.—**A. dorsale du pied**. The dorsal fascia of the foot. [L, 41.]—**A. dorsale profonde de la main**. See *Aponeurosis dorsalis manus profunda*.—**A. dorsale superficielle de la main**. See *Aponeurosis dorsalis manus superficialis*.—**A. du périnée**. See *Perineal fascia*.—**A's engainantes**. See *Aponeuroses of investment*.—**A. fémorale**. See *Fascia lata*.—**A. fessière**. See *Gluteal aponeurosis*.—**A's générales**. See *General aponeuroses*.—**A. ischio-pubio-vaginale**.—**A. ischio-pubio-vulvaire**. See *Superficial perineal fascia*.—**A. jambière**. See *Aponeurosis of the leg*.—**A. lombo-dorsale**. See *Lumbo-dorsal fascia*.—**A. lombo-iliaque**. See *Iliac fascia*.—**A's musculaires**. A term applied indifferently to aponeuroses of insertion and those of intersection. [L, 72.]—**A. orbitaire**. See *Orbital aponeurosis*.—**A. palmaire**. See *Palmar fascia*.—**A. parotidéo-massétérière**.

See *Parotideo-maseterica* FASCIA.—**A. partielle**. See APONEUROSIS of *intersection*.—**A. pédiense**. See *Pedal* APONEUROSIS.—**A. pelvienne**. See *Pelvic* FASCIA.—**A. péloviennne supérieure**. See *Superior pelvic* FASCIA.—**A. périnéale**. See *Perineal* FASCIA.—**A. périnéale antérieure**. See *Superficial perineal* FASCIA.—**A. périnéale moyenne**. See *Middle perineal* FASCIA.—**A. périnéale profonde**. See *Deep perineal* FASCIA.—**A. plantaire superficielle**. See *Superficial plantar* FASCIA.—**A. plantaire**. See *Plantar* FASCIA.—**A. superficielle du bas-ventre**. The superficial fascia of the abdomen. [L. 7.]—**A. sus-hyoïdienne**. See *Supra-hyoid* APONEUROSIS.—**A. tibiale**. See APONEUROSIS of the leg.—**A. transverse du bas-ventre**. See APONEUROSIS of the *transversalis abdominis*.

**APONEUROSIS** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o-ne<sup>2</sup>v(ne<sup>2</sup>)-ro<sup>2</sup>/si<sup>2</sup>s. See APONEUROSIS.

**APONÉVROTIQUE** (Fr.), adj. A<sup>2</sup>p-o-nav-ro-tek. See APONEUROTIC, and for other words in *Aponev*, not here given, see the corresponding words in *Aponeu*.

**APONIA** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o-ni<sup>2</sup>a. Gr., *ἀπονία* (from *a* priv., and *πόνος*, pain). Fr., *aponie*. Ger., *Aponie*. Sp., *aponia*. See ANODYNIA.

**APONIPSIS** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o-ni<sup>2</sup>p/si<sup>2</sup>s. Gen., *aponip/seos* (-sis). Gr., *ἀπονίψις*. A washing. [Orbasius (A, 311).]

**APONITROSIS** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o-ni<sup>2</sup>t-ro<sup>2</sup>/si<sup>2</sup>s. Gen., *aponitro/seos* (-sis). From *ἀπονιτρον*, to rub off with *νίτρον*. Fr., *aponitrose*. The cleansing of a wound with sodium carbonate (the nitre of the ancients). [L. 41, 119.]

**APONOGETACEÆ** (Lat.), n. f. pl. A<sup>2</sup>p(a<sup>3</sup>p)-o-n-j-e<sup>2</sup>t(ge<sup>2</sup>t)-a(a<sup>3</sup>/she<sup>2</sup>(ke<sup>2</sup>)-e(a<sup>3</sup>-e<sup>2</sup>). Of Planchon, a family of plants comprising *Aponogeton* and one other genus. [B, 170.]

**APONOGETON** (Lat.), n. n. A<sup>2</sup>p(a<sup>3</sup>p)-o-n-j-e<sup>2</sup>(ga)/to<sup>2</sup>n. From *Apona* (= *Abano*), and *γέτον*, neighboring, because growing near Abano. A genus of potamoineous plants. [B, 170, 173.]—**A. distachyum** [Linnaeus]. A species indigenous to the Cape of Good Hope, having an edible root. [B, 173.]—**A. monostachyum**. **A. monostachys**. See under *SPATHULUM*.

**APONOUS**, adj. A<sup>2</sup>p-o-nu<sup>2</sup>s. Gr., *ἀπονός* (from *a* priv., and *πόνος*, distress). Lat., *aponos*, *aponus*. Fr., *apone*. 1. Easy, comfortable (said of patients). [Hippocrates (A, 311).] 2. Causing no pain (said of medicines). [L, 116.]

**APONOVIC ACID**, n. A<sup>2</sup>p-o-n-vi<sup>2</sup>k. From *ἀπό*, from, and *quinovic acid*. Gr., *Απονοβιασική*. A substance of the constitution C<sub>12</sub>H<sub>16</sub>O<sub>4</sub>, formed along with other products by the action of sulphuric acid upon quinovic acid. [B, 207.]

**APOO**, n. A Chinese name for the *Urtica nivea*. [B.]

**APOODER**, n. The Ashantee name for a variety of *Leucas*, the bruised leaves of which, mixed with lime-juice, are applied to inflamed surfaces. [Waring (L, 63).]

**APOPALLEISIS, APOPALSIS** (Lat.), n's f. A<sup>2</sup>p(a<sup>3</sup>p)-o-pa<sup>2</sup>l-(pa<sup>2</sup>l)-le(a<sup>3</sup>/si<sup>2</sup>s. Gen., *apopalle/seos* (-sis), *-pal/seos* (-sis). Gr., *ἀποπάλλωσις, ἀπόπαλις* (from *ἀποπάλλειν*, to cast away). An expulsion, extrusion. [Hippocrates (A, 325).]

**APOPARTHENEUSIS** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o-pa<sup>2</sup>r-the<sup>2</sup>n-u<sup>2</sup>/si<sup>2</sup>s. Gen., *apopartheneu/seos* (-sis). From *ἀποπαρθενεύειν*, to deprive of virginity. The deflowering of a virgin. [L, 119.]

**APOPATEMA** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o-pa<sup>2</sup>t(pa<sup>2</sup>t)-e(a<sup>3</sup>/ma<sup>2</sup>s. Gen., *apopatema/seos* (-sis). Gr., *ἀποπάτημα*. Excrement. [A, 325.]

**APOPATESIS** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o-pa<sup>2</sup>t(pa<sup>2</sup>t)-e(a<sup>3</sup>/si<sup>2</sup>s. Gen., *apopate/seos* (-sis). Gr., *ἀποπάτησις*. A going to stool. [Galen (A, 311).]

**APOPATOS, APOPATUS** (Lat.), n's m. or f. A<sup>2</sup>p(a<sup>3</sup>p)-o-pa<sup>2</sup>t-o<sup>2</sup>s, -tu<sup>2</sup>s(tu<sup>2</sup>s). Gr., *ἀπόπατος*. 1. Excrement. [Hippocrates (A, 311).] 2. A privy. [A, 311.]

**APOPEDASIS** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o-pe<sup>2</sup>d(a<sup>3</sup>/si<sup>2</sup>s. Gen., *apopedas/seos* (-sis). From *ἀποπηδάν*, to slip away from. Dislocation at a joint from debility. [D, 141.]

**APOPETALOUS**, adj. A<sup>2</sup>p-o-pe<sup>2</sup>t(a<sup>3</sup>/u<sup>2</sup>s. From *ἀπό*, away from, and *πέταλον*, a leaf. Fr., *apopétale*. Ger., *getrenntblättrig*. See *DIALYPETALOUS*.

**APOPEUSIS** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o-fu<sup>2</sup>/si<sup>2</sup>s. Gen., *apopeu/seos* (-sis). From *ἀποφεύγειν*, to escape from. Escape from a dangerous disease. [M, 60.]

**APOPHEGMASIA** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o-fle<sup>2</sup>g-ma(ma<sup>2</sup>/zi<sup>2</sup>. (si<sup>2</sup>)-a<sup>3</sup>. From *ἀποφλεγματίζειν*, to cleanse from phlegm. A discharge of phlegm, particularly from the mouth. [L, 94.]

**APOPHEGMATIC**, adj. A<sup>2</sup>p-o-fle<sup>2</sup>g-ma<sup>2</sup>t(i<sup>2</sup>k. Gr., *ἀποφλεγματικός*. Lat., *apophlegmaticus*. Fr., *apophlegmatique*. Ger., *apophlegmatisch*. It., *apoflemmatico*. Sp., *apoflegmatico*. Exciting discharges of phlegm or mucus from the mouth or nose. [L, 46.]

**APOPHEGMATISANS** (Lat.), adj. A<sup>2</sup>p(a<sup>3</sup>p)-o-fle<sup>2</sup>g-ma<sup>2</sup>t-(ma<sup>2</sup>/zi<sup>2</sup>(i<sup>2</sup>s)-a<sup>3</sup>nz(a<sup>3</sup>n<sup>2</sup>s). Fr., *apophlegmatisant*. See *APOPHEGMATIC*.—**A. per nares**. See *ERRHINE*.—**A. per os**. See *SIALAGOGUE*.

**APOPHEGMATISMUS** (Lat.), n. m. A<sup>2</sup>p(a<sup>3</sup>p)-o-fle<sup>2</sup>g-ma<sup>2</sup>-ti<sup>2</sup>(zi<sup>2</sup>/mu<sup>2</sup>s(mu<sup>2</sup>s). Gr., *ἀποφλεγματισμός*. Fr., *apophlegmatisme*. Ger., *Schleimbeführung*. It., *apoflemmatismo*. 1. A discharge of mucus from the body. [M, 13.] 2. A salagogue. [L, 56, 84.]

**APOPHEGMATIZANT**, adj. A<sup>2</sup>p-o-fle<sup>2</sup>g-ma<sup>2</sup>t(i<sup>2</sup>z-a<sup>3</sup>nt. See *APOPHEGMATISANS*.

**APOPHRADES** (Lat.), n. f. pl. A<sup>2</sup>p(a<sup>3</sup>p)-o-fra<sup>2</sup>x(dez(de<sup>2</sup>s). Gr., *ἀποφράδες* (f. pl. of adj. *ἀποφράς* [ὑμῶν understood]). Unlucky days, i. e., those on which no critical change in a disease, or an unfavorable one, takes place. [Laurentinus (L, 53).]

**APOPHRAXIS** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o-fra<sup>2</sup>x(fra<sup>2</sup>/xi<sup>2</sup>s. Gen.,

*apophrax/eos* (-is). Gr., *ἀποφράξις* (from *ἀποφράσσειν*, to obstruct). Suppression of the menses. [Hippocrates (A, 325).]

**APOPHTHARMA** (Lat.), n. n. A<sup>2</sup>p(a<sup>3</sup>p)-o<sup>2</sup>p-tha<sup>2</sup>r-ma<sup>2</sup>. Gen., *apophtharmatos* (-tis). Gr., *ἀποφθάρμα*. 1. An abortifacient. [D, 130.] 2. An abortive fetus. [A, 322.]

**APOPHTHORA** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o<sup>2</sup>p-tho-ra<sup>2</sup>. Gr., *ἀποφθορά* (from *ἀποφθείρειν*, to miscarry). Abortion. [Hippocrates (A, 311).]

**APOPHTHOROUS**, adj. A<sup>2</sup>p-o<sup>2</sup>p-tho-ru<sup>2</sup>s. Fr., *apophthore*. See *ABORTIFACIENT*.

**APOPHYAS** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o<sup>2</sup>f(i<sup>2</sup>u<sup>2</sup>)-a<sup>3</sup>s(a<sup>3</sup>s). Gen., *apophyados* (-dis). Gr., *ἀποφύας* (= *ἀπόφυσις* [see *APOPHYSIS*]). An offshoot, especially of a vessel. [Hippocrates (L, 53).]

**APOPHYLLATE**, n. A<sup>2</sup>p-o<sup>2</sup>f(i<sup>2</sup>u<sup>2</sup>)-lat. A salt of apophyllic acid. [B.]

**APOPHYLENIC ACID**, n. A<sup>2</sup>p-o-fi<sup>2</sup>l-le<sup>2</sup>n(i<sup>2</sup>k. See *APOPHYLLIC ACID*.

**APOPHYLLIC ACID**, n. A<sup>2</sup>p-o-fi<sup>2</sup>l(i<sup>2</sup>k. From *ἀπό*, from, and *φύλλον*, a leaf. Fr., *acide apophyllique* (ou *apophyllénique*). Ger., *Apophyllensäure*. An acid, C<sub>8</sub>H<sub>7</sub>NO<sub>4</sub>, obtained by the oxidation of cetrarine. It has the composition (CO.O) = N(CH<sub>3</sub>) - C<sub>6</sub>H<sub>3</sub> - CO.OH, or that of the acid methyl ether of cinchomeronic acid. [B, 41, 207.]

**APOPHYLOUS**, adj. A<sup>2</sup>p-o-fi<sup>2</sup>l(i<sup>2</sup>u<sup>2</sup>s. In botany, eleutherophyllous; the same as apetalous or aposepalous, but applied to the perianth when it consists of but one whorl (perigonium). [B, 167.]

**APOPHYSAR**, adj. A<sup>2</sup>p-o<sup>2</sup>f(i<sup>2</sup>s)-a<sup>3</sup>r. Lat., *apophysaris*. See *APOPHYSEAL*.

**APOPHYSATE**, adj. A<sup>2</sup>p-o<sup>2</sup>f(i<sup>2</sup>s)-at. Lat., *apophysatus*. Fr., *apophysé*. Sp., *apofisado*. Provided with an apophysis. [L, 119.]

**APOPHYSE** (Fr., Ger.), n. A<sup>2</sup>p-o-fes, -fu<sup>2</sup>e<sup>2</sup>. See *APOPHYSIS*.—**A. ancyroïde** (Fr.). The coracoid process of the scapula. [L, 49.]—**A's articulaires** (Fr.). See *Articular* APOPHYSES.—**A. basilaire de l'occipital** (Fr.). The basilar process of the occipital bone. [L, 55.]—**A's clinoides** (Fr.). See *Clinoid* APOPHYSES.—**A's clinoides antérieures** (Fr.). The anterior clinoid processes of the sphenoid bone. [L, 7.]—**A's clinoides postérieures** (Fr.). The posterior clinoid processes of the sphenoid bone. [L, 7.]—**A. coracoïde** (Fr.). See *Coracoid* PROCESS.—**A. coronoid** (Fr.). A term applied indifferently to the coronoid process of the inferior maxilla and that of the scapula. [L, 7.]—**A. crista galli** (Fr.). See *Crista galli*.—**A. de Rau** (Fr.). See *Processus gracilis mallei*.—**A's d'Ingrassias** (Fr.). See *APOPHYSES of Ingrassias*.—**A's ensiformes** (Fr.). See *Ensiform* APOPHYSES.—**A. épineuse** (Fr.). The spinous process of a vertebra and the jugular process of the occipital bone. [L, 7, 41.]—**A's fausses** (Fr.). See *False* APOPHYSES.—**A. geni**, **A. génienne** (Fr.). See *Genial* APOPHYSIS.—**A. grêle du marteau** (Fr.). See *APOPHYSIS gracilis*.—**A. jugale** (Fr.). See *Zygomatic* APOPHYSIS.—**A. malaire** (Fr.). See *Malar* APOPHYSIS.—**A. mastoïde** (Fr.). See *Mastoid* APOPHYSIS.—**A. montante**, **A. nasale** (Fr.). The nasal process of the superior maxilla. [L, 7, 41.]—**A. odontoïde** (Fr.). See *Odontoid* APOPHYSIS.—**A's orbitaires** (Fr.). See *Orbital* APOPHYSES.—**A. palatine** (Fr.). See *Palatine* APOPHYSIS.—**A. paramastoïdienne** (Fr.). See *Jugular* APOPHYSIS.—**A. pétée** (Fr.). The petrous portion of the temporal bone. [L.]—**A. préoccipitale** (Fr.). See *Jugular* APOPHYSIS.—**A's ptérygoïdes** (Fr.). See *Pterygoid* APOPHYSES.—**A. ptérygoïdienne** (Fr.). The pyramidal process of the palate bone. [L, 41.]—**A'npunkt** (Ger.). See *Apophyseal* POINT.—**A. pyramidale** (Fr.). See *A. ptérygoïdienne* and *A. pétée*.—**A. serpiforme** (Fr.). A prolongation of the lower jaw of certain birds, near its posterior angle. [L, 158.]—**A. sphénoïdale** (Fr.). See *Sphenoidal* APOPHYSIS.—**A. styloïde** (Fr.). See *Styloid* APOPHYSIS.—**A's transverses** (Fr.). The transverse processes of a vertebra. [L, 41.]—**A. vaginale** (Fr.). See *Vaginal* APOPHYSIS.—**A's vraies** (Fr.). See *True* APOPHYSES.—**A. zygomatic** (Fr.). See *Zygomatic* APOPHYSIS.—**Grande a. uniforme de l'éthmoïde** (Fr.). See *Processus uncinatus major*.—**Petite a. uniforme de l'éthmoïde** (Fr.). See *Processus uncinatus minor*.

**APOPHYSE** (Fr.), adj. A<sup>2</sup>-po-fe-sa. Provided with an apophysis. [L, 41.]

**APOPHYSEAL**, adj. A<sup>2</sup>p-o-fi<sup>2</sup>s'e<sup>2</sup>-a<sup>3</sup>l. Of or pertaining to an apophysis.

**APOPHYSIFORM**, adj. A<sup>2</sup>p-o-fi<sup>2</sup>s'i<sup>2</sup>-fo<sup>2</sup>rm. Lat., *apophysiformis* (from *ἀπόφυσις* [see *APOPHYSIS*], and *forma*, form). Fr., *apophysiforme*. Sp., *apofisiforme*. Having the shape of an apophysis. [L, 41.]

**APOPHYSIS** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o<sup>2</sup>f(i<sup>2</sup>s)(u<sup>2</sup>s)-i<sup>2</sup>s. Gen., *apophys/eos* (-sis). Gr., *ἀπόφυσις* (from *ἀποφύειν*, to put forth an offshoot). Fr., *apophyse*. Ger., *Apophyse*, *Fortsatz*. It., *apofisi*. Sp., *apofisis*. 1. A process projecting from a bone which it has never been separated from nor movable upon. [L, 156.] 2. A fleshy excrescence. [Hippocrates (L, 53).] 3. In botany, a protuberance at the base of the receptacle in some mosses. [B, 19.]—**Acromial a.** Fr., *apophyse acromiale*. See *ACROMION*.—**Ancyroid a.** Fr., *apophyse ancyroïde*. The coracoid process of the scapula.—**A. calaniformis**. See *Styloid a.*—**A. gracilis**. Fr., *apophyse grêle du marteau*. See *Processus gracilis mallei*.—**A. humilior exterior et insignior** [Casseri]. See *Tuberculum mallei*.—**A. lenticularis**. The point of the incus where it articulates with the stapes. [L, 113.]—**Apo-physes mamillares**. The olfactory bulbs. [L, 119.]—**Apo-physes of Ingrassias**. Fr., *apophyses d'Ingrassias*. The greater wings of the sphenoid bone. [L, 44.]—**A. ravana**. See *A. gracilis*.—**Arachnoid a.** An old name for a network of nerve filaments. [L, 63.]—**Arthroïdial a.** That portion of the endosternite in an *Astacus*, which unites with the endopleurite to form part of the articular cavity of a limb. [B, 100.]—**Articular apophyses**. Fr., *apophy-*

*ses articulaires*. The articular processes of a vertebra. [L. 41, 44.]—**Atactic apophyses**. An old term for venous radicles. [L. 63.]—**Basilar a.** Fr., *apophyse basilaire*. The basilar process of the occipital bone. [L. 41, 44.]—**Clinoid apophyses**. Fr., *apophyses clinoides*. The clinoid processes of the sphenoid bone. [L. 41.]—**Coracoid a.** Fr., *apophyse coracoïde*. It., *apofisi coracoide*. The coracoid process of the scapula. [L. 41, 44.]—**Coronoid a.** Fr., *apophyse coronoidé*. It., *apofisi coronoidé*. The coronoid process of the scapula. [L. 44.]—**Ensisiform a.** Fr., *apophyse ensiforme*. It., *apofisi ensiforme*. See *ALÆ ossis sphenoidalis*.—**False apophyses**. Fr., *apophyses fausses*. See *EPIPHYSES*.—**Genial a.** Fr., *apophyse génie* (ou *généenne*). It., *apofisi geniale*. See *Genial tubercle*.—**Malar a.** Fr., *apophyse malarie*. The malar process of the superior maxilla. [L. 41.]—**Mastoid a.** Fr., *apophyse mastoïde*. It., *apofisi mastoïde*. The mastoid process of the temporal bone. [L. 41, 44.]—**Mesophthalmal a.** That part of the endosternite, in an *Astacus*, which unites with its fellow to form the arch over the sternal canal. [B. 100.]—**Metacromial a.** Fr., *apophyse metacromiale*. A term applied to the superior branch of a bifurcated acromion. [L. 158.]—**Odontoid a.** Fr., *apophyse odontoidé*. Ger., *Zahnfortsatz des Epistropheus*. It., *apofisi odontoidé*. The odontoid process of the axis. [L. 44, 49.]—**Orbital apophyses**. Fr., *apophyses orbitales*. The prominences at each extremity of the orbital arch. [L. 41.]—**Palatine a.** Fr., *apophyse palatine*. It., *apofisi palatina*. A triangular eminence on the naso-palatine surface of the superior maxilla. [L. 41.]—**Paraphthalmal a.** That portion of the endosternite in an *Astacus*, which passes upward and forward and unites with the endopleurites of its own apodeme and of the apodeme in front of it. [B. 100.]—**Pterygoid apophyses**. Fr., *apophyses pterygoides*. The pterygoid processes of the sphenoid bone. [L. 41.]—**Sphenoidal a.** Fr., *apophyse sphénoïdale*. It., *apofisi sfenoidale*. The sphenoidal process of the nasal bone. [L. 41.]—**Styloid a.** Fr., *apophyse styloïde*. It., *apofisi stiloïde*. A term applied to the styloid process of the temporal bone or that of the radius. [L. 32.]—**Transverse apophyses**. Fr., *apophyses transverses*. The transverse processes of a vertebra. [L. 41, 44.]—**True apophyses**. Fr., *apophyses vraies*. Apophyses which have never been epiphyses. [L.]—**Vaginal a.** Fr., *apophyse vaginale*. The vaginal process of the temporal bone. [L. 41.]—**Zygomatic a.** Fr., *apophyse zygomatique*. Ger., *Wangenfortsatz*. It., *apofisi zigomatica*. The zygomatic process of the temporal bone. [L. 41.]

**APOPIESMA** (Lat.), n. A<sup>2</sup>p(a<sup>2</sup>p)-o-pi(pe)-e<sup>2</sup>(e<sup>2</sup>s)/ma<sup>3</sup>. Gen., *apopies mato(s)-tis*. Gr., *ἀποπίεσμα* (from *ἀπινέειν*, to squeeze out). See *EPIPIESMA*.

**APOPLANESIS, APOPLANIA** (Lat.), n's f. A<sup>2</sup>p(a<sup>2</sup>p)-o-pla<sup>2</sup>n(pla<sup>2</sup>n)-e(a)/si<sup>2</sup>s, -pla<sup>2</sup>n(pla<sup>2</sup>n)/i<sup>2</sup>a<sup>3</sup>. Gen., *apoplanescos (-sis), -plan'ia*. Gr., *ἀποπλάνησις* (from *ἀποπλάνασθαι*, to wander). Fr., *apoplanése*. Sp., *apoplanésis*. The presence of a fluid in an unnatural situation (e. g., an extravasation, also ectopic menstruation). [A. 322.]

**APOPLECTA** (Lat.), n., f. of adj. *apoplectus* (*vena* understood). A<sup>2</sup>p(a<sup>2</sup>p)-o-plek'ta<sup>3</sup>. The internal jugular vein. [Bartholin (L. 53).]

**APOPLECTIC**, adj. A<sup>2</sup>p-o-plek'ti<sup>2</sup>k. Gr., *ἀποπληκτικός*. Lat., *apoplecticus*. Fr., *apoplectique*. Ger., *apoplektisch*. It., *apoplectico*. Sp., *apoplectico*. 1. Pertaining to, of the nature of, or affected with, apoplexy. [L.] 2. See *ANTAPOPLECTIC*.

**APOPLECTIFORM**, adj. A<sup>2</sup>p-o-plek'ti<sup>2</sup>-fo<sup>2</sup>rm. Fr., *apoplectiforme*. See *APOPLECTOID*.

**APOPLECTOID**, adj. A<sup>2</sup>p-o-plek'toid. For deriv., see *APOPLEXY* and *-oid*\*. Resembling apoplexy (said by M. Hall of the paralytic phenomena which follow congestion of the nervous centres as the result of poisoning with strychnine). [A. 301.]

**APOPLEXED**, adj. A<sup>2</sup>p'o-ple<sup>2</sup>xd. Affected with apoplexy. [L. 73.]

**APOPLEXIA** (Lat.), n. f. A<sup>2</sup>p(a<sup>2</sup>p)-o-ple<sup>2</sup>x'i<sup>2</sup>a<sup>3</sup>. Apoplexy.—**A. a fumo carbonum**. See *Mephitic APOPLEXY*.—**A. atonica**. See *Atonic APOPLEXY*.—**A. atrabiliaria**. A high grade of melancholy, etc., imputed to resorption of bile. [Morgagni (L. 132).]—**A. biliosa**. Fr., *apoplexie bilieuse*. Apoplexy attributed to a deposit of bile in the brain. [Cruveilhier (L. 92).]—**A. capillaris**. See *Capillary APOPLEXY*.—**A. cataleptica**. See *CATALEPSY*.—**A. cerebri**. See *Cerebral APOPLEXY*.—**A. choriodes**. *A. choriodes*. See *Chorioid APOPLEXY*.—**A. convulsiva**. A term under which Mehlhose reports the case of a man subject to convulsions, who became comatose, and had convulsions of the facial and ocular muscles. [Mag. f. d. ges. Heilk., 1836, p. 468 (L).]—**A. cordis**. See *Cardiac APOPLEXY*.—**A. dysarthritica**. A variety of metastatic apoplexy occurring in the course of arthritic affections, in which the articular pains disappear and vertigo, headache, etc., appear. [L. 132.]—**A. epileptica**. See *Epileptic APOPLEXY*.—**A. ex congestione**. See *Congestive APOPLEXY*.—**A. ex hamorrhagia**. See *Sanguineous APOPLEXY*.—**A. ex inanitione**. Apoplexy due to inanition with consequent cerebral anemia. [Abercrombie (D. 35).]—**A. exquisita**. See *A. fortis*.—**A. exsanguinea**. See *A. ex inanitione*.—**A. febricosa**. A form of paroxysmal fever accompanied with deep sleep and stertor. [L. 132.]—**A. flatulenta**. An apoplectic condition due to flatulence. [M. 60.]—**A. fortis**. Entonic apoplexy; a form in which the symptoms set in suddenly and severely. [L. 136.]—**A. fortissima**. *A. fulminans*. See *Fulminant APOPLEXY*.—**A. hamorrhagica**. See *Sanguineous APOPLEXY*.—**A. hepatica**. See *Hepatic APOPLEXY*.—**A. hydrocephalica**. See *Hydrocephalic APOPLEXY*.—**A. hysterica**. See *Hysterical APOPLEXY*.—**A. imperfecta**. See *Atonic APOPLEXY*.—**A. infantum**. An apoplectic condition occurring in children as the result of dentition, intestinal irritation, etc. [L. 192.]—**A. inflammatoria** [Van Swieten]. An old term for a condition characterized by severe headache, fever, delirium, conjunctival injection, laceration, and a hard pulse; attributed to inflammation of the brain or its membranes. [L. 132; M. 60.]—**A. interarachnoidea**. A variety of meningeal apoplexy in which the hemorrhage

takes place into the cavity of the arachnoid. [L. 45; M. 66.]—**A. intermeningialis**. See *Meningeal APOPLEXY*.—**A. intestinalis neonatorum**. See *MELÆNA neonatorum*.—**A. lactea**. See *ASPHYXIA*.—**A. suspiriosa**. A state of deep sleep attended with sighing, infrequent respiration. [L. 132.]—**A. temulenta**. Apoplexy from drunkenness. [L. 119.]—**A. traumatica**. See *Traumatic APOPLEXY*.—**A. vaporosa**. See *Hysterical APOPLEXY*.—**A. venenata**. Apoplexy due to poisoning. [M. 60.]—**A. vera**. See *Sanguineous APOPLEXY*.—**A. verminosa**. See *Vermineous APOPLEXY*.

**APOPLEXIE** (Fr., Ger.), n. A<sup>2</sup>p-o-ple<sup>2</sup>x-e, -e'. See *APOPLEXY*.—**A. des membranes muqueuses** (Fr.). Ecchymosis of the mucous membranes. [Cruveilhier (M. 72).]—**A. des membranes séreuses** (Fr.). Ecchymosis of the serous membranes. [Cruveilhier (M. 72).]—**A. du tissu cellulaire** (Fr.). Hemorrhage into the cellular tissue. [Cruveilhier (M. 72).]—**A. faible**. A mild form of apoplexy. [Lullier-Winslow (L. 91).]—**A. fondroyante** (Fr.). See *Fulminant APOPLEXY*.—**A. pituiteuse** (Fr.). See *Serous APOPLEXY*.

**APOPLEXY**, n. A<sup>2</sup>p'o-ple<sup>2</sup>x-i<sup>2</sup>. Gr., *ἀποπληξία* (from *ἀποπλησσω*, to strike down). Lat., *apoplexia*. Fr., *apoplexie*. Ger., *Apoplexie*, *Schlagfluss*, *Hirnschlag*, *Hirnschlagfluss*. It., *apoplessia*. Sp., *apoplejia*. Properly, a stroke of paralysis. In typical cases, the individual suddenly loses consciousness and all control over the voluntary muscles. If he does not die at once, he remains for a considerable length of time profoundly unconscious, breathing stertorously, and, besides the total loss of voluntary control over the muscles, it is commonly found that certain muscles, especially those of one side of the body, are completely paralyzed, so that they fail to balance the tonic action of their opponents (see *HEMIPLEGIA*). This condition may gradually end in more or less complete recovery. The term is also made to cover cases in which the foregoing description applies only in part; thus, the loss of consciousness may be incomplete and transitory, there may be no paralysis, and the phenomena may be gradual in their appearance. As the cause of the symptoms in the typical cases is commonly an escape of blood into the substance of the brain, in consequence of the rupture of a blood-vessel, the use of the term has been extended, in a pathological as opposed to its clinical sense, so as to include various forms of hemorrhage into and between the tissues. [A. D. 1; L. 87, 132.]—**Amphiblastoid a.** See *Retinal a.*—**A. of the choroid** (or *choroid*). See *Chorioid a.*—**A. of the heart**. See *Cardiac a.*—**A. of the liver**. See *Hepatic a.*—**A. of the lungs**. See *Pulmonary a.*—**A. of the retina**. See *Retinal a.*—**A. of the spinal cord**, **A. of the spinal meninges**. See *Spinal a.*—**A. of the testicle**. Fr., *apoplexie du testicule*. Hemorrhage into the substance of the testicle. [Cruveilhier (M. 72).]—**Arterial a.** Fr., *apoplexie artérielle*. A. due to rupture of an artery. [Cruveilhier (L. 92).]—**Arthritic a.** Lat., *apoplexia arthritica*. Fr., *apoplexie arthritique*. See *Gouty a.* and *Rheumatic a.*—**Asthenic a.** Ger., *asthenische Apoplexie*. A. (generally serous) due to depression of the vital powers. [L. 136.]—**Atonic a.** Lat., *apoplexia atonica*. Ger., *atonische Apoplexie*. A condition in which the symptoms of a. come on gradually and do not reach a high degree of development. [Copland (M).]—**Atrabiliaria a.** See *APOPLEXIA atrabiliaria*.—**Bulbar a.** Fr., *apoplexie bulbaire*. Hemorrhage into the substance of the medulla oblongata; manifested chiefly by inability to swallow, difficulty of protruding the tongue, huskiness of the voice, tumultuous action of the heart, dyspnoea, gastric derangements, and paralysis of one or both sides of the body. [a. 8.]—**Capillary a.** Lat., *apoplexia capillaris*. Fr., *apoplexie capillaire*. Ger., *capilläre Apoplexie*. Sp., *apoplejia capilar*. A form of cerebral hemorrhage in which the blood is effused in minute quantities from ruptured capillaries. [D. 70.]—**Cardial a.** Lat., *apoplexia cordis*. Fr., *apoplexie du cœur*. Extravasation of blood into the substance of the heart. [Cruveilhier (D. 1).]—**Cataleptic a.** Lat., *apoplexia cataleptica*. See *CATALEPSY*.—**Cerebral a.** Lat., *apoplexia cerebri* (seu *cerebri*). Fr., *apoplexie cérébrale*. Ger., *Gehirnapoplexie*. It., *apoplessia cerebrale*. Sp., *apoplejia cerebral*. A. due to hemorrhage into or upon the cerebrum.—**Chorioid** (or *Chorioida*, or *Chorioid*, or *Chorioida*) a. Lat., *apoplexia chorioides* (seu *chorioides*). Fr., *apoplexie chorioidienne*. Ger., *Chorioidaalapoplexie*. Hemorrhage into or upon the tunica chorioides of the eye. [Hock (A. 319).]—**Complicated a.** An a. followed by paralysis, or one that comes on during the course of another disease. [L. 169.]

—**Congestive a.** Lat., *apoplexia ex congestione*. An apoplectic state due to cerebral congestion. [Andral (D).]—**Consecutive a.** A. attributed to the suppression of an habitual hæmorrhage or other evacuation or an eruption. [L. 136.]—**Cutaneous a.** Fr., *apoplexie cutanée*. 1. A determination of blood to the skin. [M. 8.] 2. Purpura hæmorrhagica. [M. 72.]—**Embolie a.** Apoplectic cerebral embolism; loss of consciousness, etc., due to cerebral embolism. [L. 192.]—**Entonie a.** [Good]. Ger., *entonsche Apoplexie*. See **APOPLEXIA FORTIS**.—**Epileptic a.** Fr., *apoplexie épileptique*. A state of coma with epileptoid phenomena, observed occasionally in cerebral and acute inflammatory diseases. [A. 385.]—**Essential a.** Fr., *apoplexie essentielle*. See **Nervous a.**—**Febrile a.** See **APOPLEXIA FEBRICOSA**.—**Fulminant a.** Lat., *apoplexia fulminans*. Fr., *apoplexie foudroyante*. Ger., *plötzliche Apoplexie*. It., *apoplessia fulminante*. 1. A sudden and overwhelming a., speedily causing death. [D. 72.] 2. As formerly used, sudden death from some such cause as the bursting of an aneurysm. [A. 385.]—**Gouty a.** Lat., *apoplexia arthritica*. Fr., *apoplexie gouteuse* (ou *arthritique*). Apoplectic meningitis of gouty origin. [A. 385.]—**Hæmorrhagic a.** Lat., *apoplexia hæmorrhagica*. See **Sanguineous a.**—**Heat a.** See **SUNSTROKE**.—**Hepatic a.** Lat., *apoplexia hepatica*. Fr., *apoplexie hépatique* (ou *du foie*). Hæmorrhage into the substance of the liver. [Cruveilhier (M. 72).]—**Hydrocephalic a.** Fr., *apoplexie hydrocéphalique*. A comatose state due to hydrocephalus. [A. 385.]—**Hysterical a.** Lat., *apoplexia hysterica*. Fr., *apoplexie hystérique*. An apoplectic state due to hysteria. [A. 385.]—**Idiopathic a.** Fr., *apoplexie idiopathique*. A. due to effusion of blood or serum into the ventricles of the brain. [Lullier-Winslow (M. 71).]—**Ingravescent a.** A form in which the symptoms come on gradually and increase in severity, usually ending in death. [L. 136.]—**Interlobular a. of the lung.** Hæmorrhage between the pulmonary lobes or lobules. [L. 170.]—**Inverted a.** Catalepsy. [B. 117.]—**Meningeal a.** Lat., *apoplexia meningea*. Fr., *apoplexie méningée*. Ger., *Meningeal apoplexie*. It., *apoplessia meningea*. Sp., *apoplejia meningea*. A hæmorrhagic or serous effusion within the skull or the vertebral canal, but not into the substance of the brain or the spinal cord. [L. 87.]—**Mephitic a.** Lat., *apoplexia mephitica*. Fr., *apoplexie mephitique*. Ger., *mephitische Apoplexie*. Asphyxia due to inhaling a noxious gas, especially carbon dioxide. [L. 132.]—**Metastatic a.** Lat., *apoplexia metastatica*. Fr., *apoplexie métastatique*. A. due to a metastasis, as of gout. [Copland (M).]—**Milk a.** Lat., *apoplexia lactea*. Ger., *Milchapoplexie*. An old term for a form of a. attributed to a metastasis of the milk.—**Muscular a.** Fr., *apoplexie musculaire* (ou *des muscles*). An effusion of blood into the muscular tissue. [Cruveilhier (M. 72).]—**Narcotic a.** Fr., *apoplexie narcotique*. An apoplectic state due to narcotic poisoning. [A. 385.]—**Nervous a.** Lat., *apoplexia nervosa*. Fr., *apoplexie nerveuse*. Ger., *nervöse Apoplexie*. It., *apoplessia nervosa*. Sp., *apoplejia nervosa*. 1. A state in which, although the symptoms of cerebral congestion and hæmorrhage are observed during life, no evidence of those conditions is found after death. [Sandra (D. 1).] 2. Acute anæmia of the brain. [D. 18.]—**Nodular pulmonary a.** Hæmorrhage into the air-cells of the lungs. [L. 170.]—**Ovarian a.** Fr., *apoplexie de l'ovaire* (ou *ovarique*). Hæmorrhage into the substance of the ovary. [A. 180.]—**Pancreatic a.** Fr., *apoplexie du pancréas*. Hæmorrhage into the substance of the pancreas. [D. 48.]—**Parturient a.** See **Vitular FEVER**.—**Passive a.** See **Asthenic a.**—**Phlegmonous a.** See **APOPLEXIA INFLAMMATORIA**.—**Pituitous a.** See **Serous a.**—**Placental a.** Lat., *apoplexia placentæ*. Fr., *apoplexie placentaire* [Jacquiemier]. Ger., *Placentarapoplexie*. Hæmorrhage into the substance of the placenta. Cf. **Utero-placental a.**—**Polypous a.** A. said to depend upon "polypous concretions of the blood." [Ettmüller (B. 117).] Cf. **Embolie a.**—**Primary a.** Lat., *apoplexia primitiva*. See **Nervous a.** (1st def.).—**Progressive a.** Fr., *apoplexie progressive*. A. in which the symptoms (paralysis, etc.) increase very gradually. [Cruveilhier (L. 92).]—**Puerperal a.** See **Vitular FEVER**.—**Pulmonary a.** Lat., *apoplexia pulmonalis* (see **pulmonum**). Fr., *apoplexie pulmonaire*. Ger., *Apoplexie der Lunge*. It., *apoplessia polmonale*. Sp., *apoplejia pulmonaria*. Hæmorrhage from the pulmonary capillaries into the air-cells and terminal bronchi, and into the surrounding tissue. [D. 1.]—**Renal a.** Lat., *apoplexia renalis*. Fr., *apoplexie du rein*. Ger., *Nierenapoplexie*. Hæmorrhage into the substance of the kidney. [Cruveilhier (M. 72).]—**Retinal a.** Lat., *apoplexie retinalis*. Fr., *apoplexie de la rétine*. Ger., *Netzhautapoplexie*. It., *apoplessia della retina*. Sp., *apoplejia de la retina*. Hæmorrhage into the substance of the retina; common in nephritic retinitis and in leucæmia. [F.]—**Rheumatic a.** Fr., *apoplexie rhumatismale*. Rheumatic meningitis. [A. 385.]—**Sanguineous a.** Lat., *apoplexia sanguinea*. Fr., *apoplexie sanguine*. Ger., *Gehirnblutschlag*. It., *apoplessia sanguigna*. A. due to extravasation of blood into or upon the brain. [D. 1.]—**Serous a.** Lat., *apoplexia serosa*. Fr., *apoplexie séreuse*. Ger., *Gehirnwassererguss*. It., *apoplessia sierosa*. Sp., *apoplejia serosa*. A. dependent on a sudden serous effusion into or upon the brain. [D.]—**Simple a.** Lat., *apoplexia simplex*. See **Nervous a.** (1st def.).—**Spasmodic a.** Lat., *apoplexia spasmodica*. An apoplectic condition characterized by slight paralysis which is usually transitory. [L. 104.]—**Splinal a.** Lat., *apoplexia spinalis*. Fr., *apoplexie spinale* (ou *de la moëlle épinière*). Ger., *Rückenmarkschlag*. It., *apoplessia spinale*. Sp., *apoplejia espinal*. Syn.: *hæmatorrhachis*. Hæmorrhage into the substance of the spinal cord.—**Splenic a.** Fr., *apoplexie splénique* (ou *de la rate*). Ger., *Milzapoplexie*. 1. Hæmorrhage into the substance of the spleen. [Cruveilhier (M. 72).] 2. See **Splenic FEVER** and **Contagious ANTHRAX**.—**Subconjunctival a.** Lat., *apoplexia subconjunctivalis*. Fr., *apoplexie sous-conjunctive*. Ger., *subconjunctive Apoplexie*. It., *apoplessia sotto la congiuntiva*. Sp., *apoplejia debajo la conjuntiva*. Extravasation of blood beneath the conjunctiva, continuous or in isolated patches. [F.]—**Subretinal a.** Fr., *apoplexie sous-rétinienne*. See **Chorioid a.**—**Suppurative a.** Lat., *apoplexia purulenta* [Pringle]. A form of

a. attributed to suppurative processes and fever. [L. 132.]—**Sympathetic a.** Fr., *apoplexie sympathique*. A. supposed to be due to some other disease, to the suppression of an habitual discharge, etc. [A. 301.]—**Symptomatic a.** A. due to other disorders, such as gout. [L. 194.]—**Toxic a.** See **Narcotic a.** and **Mephitic a.**—**Traumatic a.** Lat., *apoplexia traumatica*. Fr., *apoplexie traumatique*. A. due to traumatism.—**Uncircumscribed pulmonary a.** Diffuse hæmorrhage into the intervascular tissue, with laceration of the pulmonary texture and sometimes of the pleura. [Laennec (L. 170).]—**Uterine a.** Fr., *apoplexie de l'utérus*. Hæmorrhage into the muscular tissue of the uterus. [Cruveilhier (M. 72).]—**Utero-placental a.** Fr., *apoplexie utéro-placentaire* [Jacquiemier] (ou *du placenta* [Cruveilhier]). Extravasation of blood into the decidua serotina. [A. 46.]—**Venous a.** Fr., *apoplexie veineuse*. Apoplectic effusion due to venous congestion. [Cruveilhier (L. 92).]—**Vermineous a.** Lat., *apoplexie verminosa*. Fr., *apoplexie vermineuse*. An apoplectic state due to intestinal worms. [A. 385.]—**Vitular a.** Lat., *apoplexie vitular*. See **Vitular FEVER**.—**Weak a.** A. due to depressing causes acting upon an exhausted encephalon or upon a reduced state of the system at large. [L. 136.]

**APOPNUSIS** (Lat.), n. f.  $A^2p(a^3p)-o^2p-nu^2si^2s$ . Gen., *apopneusos* (-sis). From *ἀπνέω*, to breathe forth, to exhale. Ger., *Ausathmen* (1st def.), *Aushauchen* (2d def.). 1. Expiration. [M. 13.] 2. Exhalation. [J.]

**APOPNICTICUS** (Lat.), adj.  $A^2p(a^3p)-o^2p-ni^2k/ti^2k-u^2s(u^2s)$ . Pertaining to or affected with apopnisis. [M. 13.]

**APOPNIXIS** (Lat.), n. f.  $A^2p(a^3p)-o^2p-ni^2x'i^2s$ . Gen., *apopnixeos* (-is). Gr., *ἀπνίξις* (from *ἀπνέειν*, to choke). Fr., *apopnixe*. Ger., *Erstickung*. Suffocation (applied particularly to "suffocation of the womb"). [Moschio (A. 325).]

**APOPNOE, APOPNCEA** (Lat.), n's f.  $A^2p(a^3p)-o^2p-no^2e(a)$ ,  $-o^2p-ne^2$  (no<sup>2</sup>e<sup>2</sup>a<sup>2</sup>). Gr., *ἀπνοή*, *ἀπνῶνα*. See **APOPNUSIS**.

**APOSEUDACONINE**, n.  $A^2p-o-su^2d-a^2k-o^2n-en$ . From *ἀπῶ*, from, and *pseudaconine*. An amorphous base of the constitution  $C_{27}H_{39}NO_6 = C_{27}H_{37}NO_6(OH)_2$ , formed by dehydrating pseudaconine. [B. 207.]

**APOSEUDACONITINE**, n.  $A^2p'o-su^2d-a^2k-o^2n'i^2t-en$ . A derivative of pseudaconitine,  $C_{35}H_{47}NO_{11}$ , formed by dehydrating pseudaconitine. [B. 207.]

**APOPSYCHIA** (Lat.), n. f.  $A^2p(a^3p)-o^2p-si^2k(su^2k)/i^2a^2$ . From *ἀποψύχειν*, to faint. Fr., *apopsychie*. Ger., *Apopsychie*. See **APSYCHIA**.

**APOPSYXIA, APOPSYXIS** (Lat.), n's f.  $A^2p(a^3p)-o^2p-si^2x(su^2x)/i^2a^2-i^2s$ . Gen., *apopsyxie*, *-sya^2eos* (-is). Gr., *ἀποψύξις*. 1. Exhalation. 2. Evaporation, refrigeration. 3. Fainting. 4. Death. [M. 13.]

**APOPTOSIS** (Lat.), n. f.  $A^2p(a^3p)-o^2p-to^2si^2s$ . Gen., *apoptoseos* (-sis). Gr., *ἀπόπτωσις* (from *ἀπνέω*, to fall off). Fr., *apoptose*. A loosening (as of a crust, of a bandage, or of ligaments). [A. 385; L. 41; M. 13.]

**APOQUINAMINE**, n.  $A^2p-o-kwi^2n'a^2m-en$ . Fr., *apoquinamine*. Ger., *Apochinamin*. An artificial alkaloid,  $C_{19}H_{29}N_3O$ , derived from quinamine, conquinamine, or quinaidine by the action of hydrochloric acid; a white, amorphous substance. [B. 5.]

**APORETIN**, n.  $A^2p-o-re^2ti^2n$ . See **APORRHETIN**.

**APORHÉTINE** (Fr.), n.  $A^3-po-ra-ten$ . See **APORRHETIN**.

**APORIA** (Lat.), n. f.  $A^2p(a^3p)-o^2ri^2a^2$ . Gr., *ἀπορία* (from *ἀπορος*, having no way out). Fr., *Aporie*. 1. Distress, discomfort. [Hippocrates, Aretæus (A. 311).] 2. A difficulty (in diagnosis, treatment, etc.) from which there seems to be no escape. [M. 13.]

**APOROBANCHIA, APOROBRANCHIÆ** (Lat.), n's n. and f. pl.  $A^2p(a^3p)-o(o^2)-ro(ro^2)-bra^2n^2/ki^2(ch^2i^2)-a^2$ ,  $-e(a^2-e^2)$ . From *ἀπορος*, wanting, and *βράχχιον*, a gill. See **APOROBANCHIATA**.

**APOROBANCHIATA** (Lat.), n. n. pl.  $A^2p(a^3p)-o(o^2)-ro(ro^2)-bra^2n^2/ki^2(ch^2i^2)-a^2(a^2)$ . Fr., *aporobranches*. 1. Aporobranchians; an order of *Arachnida* characterized by having no stigmata, or respiratory pores, on the surface. [Latreille (L. 108).] 2. An order of the *Paracephalera* in which the respiratory organs are often hardly discoverable. [De Blainville (L. 180).]

**APOROCEPHALOUS**, adj.  $A^2p-o-ro-se^2f'a^2l-u^2s$ . Lat., *aporocephalus* (from *ἀπορος*, difficult to distinguish, and *κεφαλή*, the head). Fr., *aporocephale*. Ger., *ungewissköpfig*. Sp., *aporocefalo*. In zoology, having the head scarcely distinguishable. [L. 109.]

**APOROSA** (Lat.), n. n. pl. and f. s.  $A^2p(a^3p)-o-ro^2sa^2$ . From *ἀπορος*, having no passage. 1. A group of coralligenous zoophytes of the suborder *Sclerodermata*, order *Zoantharia*, class *Actinozoa*, having well-developed lamellar septa, no tabulæ, and the corallum composed of compact, imperforate sclerenchyma. [A. 359.] 2. A genus of plants. [B.] See **SCCEPA**.

**APORRHAIÐÆ** (Lat.), n. f. pl.  $A^2p(a^3p)-o^2r-ra^2(r'a^2)/i^2d-e(a^2-e^2)$ . From *Αporrhais*, one of the genera. See **CERITHIADÆ**.

**APORRHÉE** (Fr.), n.  $A-po^2r-ra$ . See **APORRHÆA**.

**APORRHETIN**, n.  $A^2p-o^2r-re^2ti^2n$ . From *ἀπῶ*, from, and *ῥητιν*, resin. Fr., *aporrhétine*. Ger., *Aporrhetin*. It., *aporetina*. A resin obtained by dissolving in alcohol that portion of the alcoholic extract of rhubarb which is insoluble in water, precipitating with ether, and treating the precipitate with alcohol; the a. remains undissolved. [B. 2.]

**APORRHINOSIS** (Lat.), n. f.  $A^2p(a^3p)-o^2r-r'i^2n-o^2si^2s$ . Gen., *aporrhinosos* (-sis). From *ἀπῶ*, from, and *ῥίς*, the nose. Ger., *Nasenfluss*. It., *aporrhinosi*. Sp., *aporrhinosi*. A discharge from the nasal passages. [M. 13.]

**APORRHIPSIS** (Lat.), n. f.  $A^2p(a^3p)-o^2r-r'i^2p-si^2s$ . Gen., *aporrhipseos* (-sis). Gr., *ἀπρῆψις* (from *ἀπρῆπτειν*, to throw aside). A throwing off of the clothes, especially from about the chest (as under the influence of dyspnoea or delirium). [Hippocrates (A. 322).]

**APORRHŌE, APORRHŌEA** (Lat.), n's f.  $A^2p(a^3p)-o^2r-ro-$   
e(a),  $-o^2r-re/(ro'e^2)-a^3$ . Gr., ἀπορροή, ἀπορροία (from ἀπορρεῖν, to flow  
from). Fr., *aporrhée*. 1. Any exhalation or discharge. [M, 13.]  
2. An old term for alopecia (q. v.). [Moschion (A, 325).]

**APORRHOSIS** (Lat.), n. f.  $A^2p(a^3p)-o^2r-ro-si^2s$ . Gen., *aporrhosis* (sis). From ἀρρῶ, completely, and ὀρρῶν, to turn into whey.  
Ger., *Vermolkung*. Conversion into whey-like material. [M, 13.]

**APORRHYSIS** (Lat.), n. f.  $A^2p(a^3p)-o^2r-r(i^2)(ru^2)-si^2s$ . Gen.,  
*aporrhysis* (sis). Gr., ἀπορρύσις. See **APORRHŌEA**.

**APORY**, n.  $A^2p-o-r(i^2)$ . See **APORIA**.

**APOS** (Lat.), n. m.  $A(a^3)/po^2s$ . See **APUS**.

**APOSEMMA** (Lat.), n. n.  $A^2p(a^3p)-o^2s-se^2m(ke^2m)/ma^2$ . Gen.,  
*aposemmatos* (tis). Gr., ἀπόσκημα. See **APOSEPSIS**.

**APOSENOSIS** (Lat.), n. f.  $A^2p(a^3p)-o^2s-se^2n(ke^2n)-o-si^2s$ . See  
**APOSENOSIS**.

**APOSEPARNISIS** (Lat.), n. f.  $A^2p(a^3p)-o^2s-se^2p(ke^2p)-a^3rn/-$   
 $i^2s-i^2s$ . Gen., *aposeparnis* (sis). See **APOSEPARNISMUS**.

**APOSEPARNISMUS** (Lat.), n. n.  $A^2p(a^3p)-o^2s-se^2p(ke^2p)-$   
 $a^3rn-i^2s/ma^2$ . Gen., *aposeparnis* (sis). The fragment of  
bone removed by aposeparnism (q. v.), also the injury itself.  
[L, 50.]

**APOSEPARNISMUS** (Lat.), n. m.  $A^2p(a^3p)-o^2s-se^2p(ke^2p)-$   
 $a^3rn-i^2s/ma^2$ . Gen., *aposeparnis* (sis). From ἀπό, away  
from, and σκαρπνίζω, to hew. Fr., *aposeparnismos*. Ger., *Ab-*  
*hiebel, Beilschnitt*. It., *aposeparnismo*. Sp., *aposeparnismo*.  
A slanting wound, as with a hatchet, by which a superficial piece  
of bone (especially of the skull) is cut entirely away. [Galen (A,  
322), Oribasius (A, 311).]

**APOSEPSIS** (Lat.), n. f.  $A^2p(a^3p)-o^2s-se^2p(ke^2p)/si^2s$ . Gen.,  
*aposepsis* (sis). Gr., ἀποσπῆσις (from ἀποσπῆσθαι, to fall sud-  
denly). Fr., *aposepsie*. Ger., *Aposepsie*. Sp., *aposepsia*. 1.  
A sudden falling or determination of humors to the lower parts.  
2. Metastasis. [M, 13.]

**APOSCHASIS** (Lat.), n. f.  $A^2p(a^3p)-o^2s-ka^2(ch^2a^3)-si^2s$ . Gen.,  
*aposchasis* (sis). Gr., ἀποσχασίς (from ἀποσχάζω, to cut  
open). Fr., *aposechie*. Sp., *aposechia*. A slight incision,  
especially venesection or scarification. [Hippocrates (A, 311); L,  
41, 50, 53.]

**APOSCHASMA** (Lat.), n. n.  $A^2p(a^3p)-o^2s-ka^2(ch^2a^3)/ma^2$ .  
Gen., *aposchasmatos* (tis). The site of a scarification. [A, 322.]

**APOSCHASMUS** (Lat.), n. m.  $A^2p(a^3p)-o^2s-ka^2(ch^2a^3)/mu^2s$ .  
Gen., *aposchasmus* (tis). See **APOSCHASIS**.

**APOSCYTHISIS** (Lat.), n. f.  $A^2p(a^3p)-o^2s-si^2th(ku^2th)/i^2s-i^2s$ .  
Gen., *apocythis* (sis). From ἀποσκηθίζω, to strip off the scalp  
after the manner of the Scythians. Ger., *Scalpiren*. Scalping;  
the removal of a living person's scalp. [D, 80.]

**APOSCYTHISMA** (Lat.), n. n.  $A^2p(a^3p)-o^2s-si^2th(ku^2th)-i^2z-$   
 $i^2s/ma^2$ . Gen., *apocythis* (sis). The spot denuded by  
scalping, or the piece of skin removed. [D, 80.]

**APOSCYTHISMUS** (Lat.), n. m.  $A^2p(a^3p)-o^2s-si^2th(ku^2th)-$   
 $i^2z-i^2s/mu^2s$ . Gen., *apocythis* (sis). See **APOSCYTHISIS**.

**APOSEPALOUS**, adj.  $A^2p-o-se^2p(a^2l)-u^2s$ . See **DIALYSEPALOUS**.

**APOSEPIDINE**, **APOSEPIDINE**, n's.  $A^2p-o-se^2p(e^2d)-en-$   
 $i^2d-en$ . Lat., *aposepidine* (from ἀπό, from, and σπιδίνω, putrefac-  
tion). Fr., *aposepidine* [Braconnot]. Ger., *Aposepidin*. A  
product of the putrefaction of the so-called protein compounds, consist-  
ing of impure leucine. [B, 2.]

**APOSEPSIA**, **APOSEPSIS** (Lat.), n's f.  $A^2p(a^3p)-o-se^2p/si^2a^3$ .  
 $-si^2s$ . Gen., *aposepsia*, *-sepsis* (sis). Gr., ἀποσπῆσις. Fr., *apose-*  
*psie*. Putrefaction. [A, 385.]

**APOSIA** (Lat.), n. f.  $A^2p(a^3p)-o^2z-si^2(a^2)-a^3$ . From ἀ, priv., and  
 $\pi\acute{o}\sigma\iota\varsigma$  (from πίνω, to drink), a drinking. Fr., *apose*. See **ADIPSIA**.

**APOSITIA** (Lat.), n. f.  $A^2p(a^3p)-o-si^2shi^2(t^2)-a^3$ . Gr., ἀποσιτία  
(from ἀπό, away from, and σιτία, food). Fr., *apositie*. Ger., *Apo-*  
*sitie*. It., *apozitia*. Sp., *apozitia*. Aversion to food. [Galen (A,  
325).]

**APOSITIC**, adj.  $A^2p-o-si^2t(i^2)k$ . Gr., ἀποσιτικός. Lat., *apo-*  
*siticus*. Fr., *apositique*. Pertaining to, affected with, or (especial-  
ly) causing apositia. [A, 322, 325, 385.]

**APOSITY**, n.  $A^2p-o-si^2t(i^2)$ . See **APOSITIA**.

**APOSKÈME** (Fr.), n.  $A^2p-o-ske^2m$ . See **APOSEPSIS**.

**APOSEPARNISMOS** (Lat.), n. m.  $A^2p(a^3p)-o^2s-se^2p(ke^2p)-a^3rn-$   
 $i^2z-i^2s/mo^2s$ . See **APOSEPARNISMUS**.

**APOSEPSIE** (Fr.), n.  $A^2p-o-ske^2m$ . See **APOSEPSIS**.

**APOSMELEUMA** (Lat.), n. n.  $A^2p(a^3p)-o^2s-mi^2l-u^2/ma^2$ . Gen.,  
*aposomeleumatos* (tis). Gr., ἀποσμιλευμα. A fragment removed  
by chiseling. [D, 80.]

**APOSMELEUSIS** (Lat.), n. f.  $A^2p(a^3p)-o^2s-mi^2l-u^2/si^2s$ . Gen.,  
*aposomeleusis* (sis). From ἀποσμιλευω, to chisel off. Ger., *Ab-*  
*meisselung*. Removal by chiseling. [D, 80.]

**APOSMODATIQUE** (Fr.), adj.  $A^2p-o-smo-da^2-ték$ . Suitable  
for cleansing the teeth. [L, 41.]

**APOSORBIC ACID**, n.  $A^2p-o-so^2rb/i^2k$ . For deriv., see **Apo-**  
**SORBIN**. Fr., *acide aposorbique*. Ger., *Aposorbinsäure*. A  
dibasic crystalline acid,  $C_6H_8O_7 = C_6H_5 - (OH)_2 - (CO.OH)_2$ , de-  
rived from sorbin. [B, 4.]

**APOSAS** (Lat.), n. f.  $A^2p(a^3p)-o^2sp/a^2s/a^2s$ . Gen., *apospas-*  
*ados* (tis). Gr., ἀποσπῆσις. See **APOSEPSIA**.

**APOSASIS** (Lat.), n. f.  $A^2p(a^3p)-o^2sp/a^2s/si^2s$ . Gen., *apospas-*  
*sis* (sis). See **APOSEPSIS**.

**AOSPASMA** (Lat.), n. n.  $A^2p(a^3p)-o-spa^2z/spa^2s/ma^2$ . Gen.,  
*asposmastos* (tis). Gr., ἀόσπασμα. 1. A portion torn off by

apospasmus (q. v.). [A, 322.] 2. Apospasmus. [A, 322.] 3. In the  
pl., *asposmata*, an old term for certain metallic products, includ-  
ing tutty. [A, 325.]

**APOSEPASMUS** (Lat.), n. m.  $A^2p(a^3p)-o-spa^2z/spa^2s/mu^2s$   
(mu^2s). Gr., ἀποσπασμός (from ἀποσπῆναι, to tear away). Fr., *apo-*  
*spasme, arrachement*. Ger., *Abtrennung, Losreissung*. It., *Sp.*,  
*apospasmo*. A violent tearing asunder of parts, especially liga-  
ments. [L, 41.]

**APOSEPASTIC**, adj.  $A^2p-o-spa^2s/ti^2k$ . Gr., ἀποσπαστικός. Lat.,  
*apospasticus*. Fr., *apospastique*. 1. Derivative, revulsive (said of  
drugs). [A, 385.] 2. Exerting traction (said of mechanical appli-  
ances). [A, 322.]

**APOSEPHACELIS, APOSEPHACELISMUS** (Lat.), n's f.  
and m.  $A^2p(a^3p)-o^2s-fa^2(fa^2)-se^2l(ke^2l)/i^2s-i^2s$ ,  $-se^2l(ke^2l)-i^2z(i^2s)/mu^2s$   
(mu^2s). Gen., *aposephacelis* (sis), *-is* (mi). Gr., ἀποσφάκελσις  
(from ἀποσφάκελίζω, to be affected with mortification). Fr., *apose-*  
*phacelésie*. It., *aposephacismo*. Sp., *aposephacismo*. Mortification,  
especially if due to constriction. [Hippocrates (A, 325).]

**APOSEPHAGE** (Lat.), n. f.  $A^2p(a^3p)-o^2s-fa^2-j(e^2ga)$ . Gr., ἀποσφάγη.  
Jugulation. [Hippocrates (L, 53).]

**APOSEPHAGMA** (Lat.), n. n.  $A^2p(a^3p)-o^2s-fa^2g(fa^2g)/ma^2$ .  
Gen., *aposephagmastos* (tis). Gr., ἀποσφάγμα. Fr., *aposephagme*.  
See **HYPOSPHAGMA**.

**APOSEPHINXIS** (Lat.), n. f.  $A^2p(a^3p)-o^2s-fi^2nx/i^2s$ . Gen., *apose-*  
*phinxis* (sis). Gr., ἀποσφίγξις (from ἀποσφίγγω, to bind up). Com-  
pression as with a bandage. [Hippocrates (L, 53).]

**APOSEPONGISMUS** (Lat.), n. m.  $A^2p(a^3p)-o^2s-po^2n(po^2n^2)-ji^2z-$   
 $(zi^2s)/mu^2s(mu^2s)$ . Gr., ἀποσπογγισμός (from ἀποσπογγίζω, to wipe  
off as with a sponge). Fr., *aposepongisme*. Sponging, cleansing  
with a sponge. [Oribasius (A, 311).]

**APOSEPORY**, n.  $A^2p-o^2s-po^2r-i^2$ . From ἀπό, without, and σπό-  
ρος, a seed. That form of non-sexual reproduction in plants, con-  
sisting in the development of a perfect plant directly from a spore-  
producing part or organ without the production of spores. [McNab,  
Sci. Proc. of the Roy. Dubl. Soc., Oct., 1885, p. 466 (B).]

**APOSTAGMA, APOSTALAGMA** (Lat.), n's n.  $A^2p(a^3p)-o-$   
 $sta^2(sta^2g)/ma^2$ ,  $-sta^2(sta^2l)-a^2g(a^2g)/ma^2$ . Gen., *apostag-*  
*mastos* (tis), *-stalagmastos* (tis). Gr., ἀποστάγμα, ἀποστάλαγμα (from ἀπο-  
στᾶν, or ἀποσταλάζω, to trickle away). Fr., *apostagme, mēre-*  
*goutte* (1st def.). 1. The sweet liquor which exudes from grapes be-  
fore they have been pressed. [L, 53.] 2. See **Wandering Abscess**.

**APOSTASIA** (Lat.), n. f.  $A^2p(a^3p)-o^2s-ta(ta^3)/zi^2(si^2)-a^3$ . Gr.,  
ἀποστασία. See **APOSTASIS** and **APOSTEMA**.

**APOSTASIACEE** [A. Richard, Lindley] (Lat.), n. f. pl.  $A^2p-$   
 $(a^3p)-o^2s-ta(ta^3)-zi^2(si^2)-a(a^3)/se^2(ke^2)-e(a^2-e^2)$ . From *Apostasia*, one  
of the genera. Fr., *Apostasiaceae*. Ger., *Apostasiaceen*. An order  
of plants separated from the orchids, from which it differs in that  
the stamens are separated from the style and from each other. It  
includes 1 or 2 genera only. [B, 19, 170.]

**APOSTASIACEOUS**, adj.  $A^2p-o-staz/i^2-a^3shu^2s$ . Of or per-  
taining to the *Apostasiaceae*. [B.]

**APOSTASIEE** [R. Brown] (Lat.), n. f. pl.  $A^2p(a^3p)-o-sta(sta^3)-$   
 $zi(se^2e^2-e(a^2-e^2))$ . See **APOSTASIACEE**.

**APOSTASIS** (Lat.), n. f.  $A^2p(a^3p)-o-st^2a^3-si^2s$ . Gen., *aposta-*  
*sis* (sis). Gr., ἀπόστασις (from ἀπό, away from, and ἵστηναι, to  
stand). Fr., *apostase*. Ger., *Apostasie*. It., *apostasi*. Sp., *apósta-*  
*sis*. 1. Abscession, especially the termination of a disease by the  
formation of an abscess or by some critical discharge. [Hippocra-  
tes, A, 322.] 2. An abscess, especially a wandering abscess or one  
that is accompanied by the separation of a piece of bone. [A, 322;  
D, 95.] 3. Metastasis. [Galen (A, 322).]

**APOSTATICUS** (Lat.), adj.  $A^2p(a^3p)-o-sta^2t(sta^2t)/i^2k-u^2s(u^2s)$ .  
Pertaining to apostasis. [D, 129.]

**APOSTAXIS** (Lat.), n. f.  $A^2p(a^3p)-o-sta^2x(sta^2x)/i^2s$ . Gen.,  
*apostaxis* (sis). Gr., ἀποσταξίς. 1. A morbid exuding of the juices  
of a plant. [B, 19.] 2. A distillation or defluxion of humors. [L,  
84.] 3. See **EPISTAXIS**.

**APOSTELSALBE** (Ger.), n.  $A^3-po-st^2e^2l-za^2lb-e^2$ . See **UNGU-**  
**ENTUM apostolorum**.

**APOSTEM** (Ger.), n.  $A^3-po-st^2em'$ . See **ABSCISS**.—**A'kraut**.  
The *Scabiosa arvensis*. [B, 180].—**A'röhrechen**, **A'röhrelein**,  
**A'röschchen**. The *Leontodon taraxacum*. [L.]

**APOSTEMA** (Lat.), n. n.  $A^2p(a^3p)-o^2s-te(ta^3)/ma^2$ . Gen., *aposte-*  
*mastos* (tis). Gr., ἀπόστημα. Fr., *apostème*. Ger., *Apostem*. It.,  
Sp., *apostema*. See **ABSCISS**.—**A. ventosum**. Subcutaneous em-  
physema. [Avicenna (L, 128).]

**APOSTEMATE**, v. intr.  $A^2p-o-st^2em-at$ . To suppurate, to  
form an abscess. [L, 56.]

**APOSTEMATIAS** (Lat.), n. m. and f.  $A^2p(a^3p)-o-st^2em-a(a^3)/-$   
 $shi^2(t^2)-a^2s(a^2s)$ . Gen., *apostematiae*. A person who has an internal  
abscess. [A, 322; Aræteus (L, 84).]

**APOSTEMATIC**, adj.  $A^2p-o-st^2em-a^2t(i^2)k$ . Gr., ἀποστημα-  
τικός. Lat., *apostematicus*. Fr., *apostématique*. Ger., *apostema-*  
*tisch*. It., *apostematico*. Sp., *apostemático*. Pertaining to or af-  
fected with an abscess. [L, 43.]

**APOSTEMATION**, n.  $A^2p-o-st^2em-a^3shu^2n$ . Lat., *apostem-*  
*atio*. The formation of an abscess. [Wiseman (A, 302).]

**APOSTEMATON, APOSTEMATUM** (Lat.), n's n.  $A^2p-$   
 $(a^3p)-o-st^2em-a(a^3)/shi^2(t^2)-o^2n$ ,  $-u^2m(u^2m)$ . Gr., ἀποστημάτων (dim.  
of ἀπόστημα). A small abscess. [Oribasius (A, 311).]

**APOSTEMATIUS** (Lat.), adj.  $A^2p(a^3p)-o-st^2em-a(a^3)/shi^2(t^2)-$   
 $u^2s(u^2s)$ . See **APOSTEMATIC**.

**APOSTEMATODES** (Lat.), adj.  $A^2p(a^3p)-o-st^2em-a^3-to^2-dez-$   
(de^2s). Gr., ἀποστηματοδής (from ἀπόστημα, an abscess, and εἶδος,

resemblance). Fr., *apostématoïde*. Ger., *abscessähnlich*. Resembling an abscess. [Hippocrates (A, 311).]

**APOSTEMATOPHTHISIS** (Lat.), n. f.  $A^2p(a^3p)-o-ste^2m/a^3-to-ti(te)/si^2s$ . Gen., *apostematophthisis/eos (-sis)*. From *ἀποστήμα* (see APOSTEMA), and *φθίσις* (see PHTHISIS). Syn.: *tubex apostemate*. Phthisis due to suppuration. [A, 323.]

**APOSTEMATOUS**, adj.  $A^2p-o-ste^2m/a^2t-u^3s$ . Lat., *apostematousus*. See APOSTEMATIC and APOSTEMATODES.

**APOSTÈME**, n.  $A^2p'o-stem$ . See APOSTEMA.

**APOSTÈME** (Fr.), n.  $A^3-po-ste^2m$ . See APOSTEMA.—**A. aqueux**. Hydrarthrosis (q. v.). [Paré (L, 41).]

**APOSTERIGMA** (Lat.), n. n.  $A^2p(a^3p)-o-ste^2r-i^2g/ma^3$ . Gen., *aposterig/matos (-tis)*. Gr., *ἀποστήριγμα* (from *ἀποστήριζειν*, to fix firmly, to rest on, or to determine toward). 1. A pad or other prop or support. [Galen (A, 325).] 2. See APOSCHEMA. 3. A settled, obstinate disease, especially a chronic painful abdominal affection. [Hippocrates (L, 53); Bégin (M, 13).]

**APOSTERIXIS** (Lat.), n. f.  $A^2p(a^3p)-o-ste^2r-i^2x/i^2s$ . Gen., *aposterix/eos (-is)*. Gr., *ἀποστήριξις*. A propping, supporting; also a fulcrum. [Hippocrates (A, 311).]

**APOSTHIA** (Lat.), n. f.  $A^2p(a^3p)-o-ste^2s/thi^2-a^3$ . From *α* priv., and *πῶσθ*, the penis or the foreskin. Absence of the foreskin or of the penis. [G; M, 13.]

**APOSTHUME**, n.  $A^2p'o^2s-thu^2m$ . A corruption of *aposteme*. [A, 302.] See APOSTEMA.

**APOSTOLÉ** (Fr.), n.  $A^3-po^2s-to-la$ . An extract. [Chéreau (A, 301).]

**APOSTRACOS** (Lat.), adj.  $A^2p(a^3p)-o^2st/ra^3-ko^2s$ . From *ἀποστράκειν*, to bake to a crust. Dry and bloodless (said of bones). [Hippocrates (D, 83).]

**APOSTRACOSIS** (Lat.), n. f.  $A^2p(a^3p)-o^2st-ra^3-ko^2s/i^2s$ . Gen., *apostraco^2s/eos (-sis)*. From *ἀποστράκουσθαι*, to become dry. See OSTRACOSIS.

**APOSTRACUM** (Lat.), n. n.  $A^2p(a^3p)-o^2st/ra^3-ku^2m(ku^4m)$ . A piece of dry, dead bone. [A, 322.]

**APOSTROPHE** (Lat.), n. f.  $A^2p(a^3p)-o^2st/ro-fe/fa$ . Gr., *ἀποστροφή* (from *ἀποστρέφειν*, to turn away from). Fr., *apostrophe*. 1. Aversion to food. [Paulus Aegineta (A, 325).] 2. A diversion of the humors. [M, 13.] 3. In botany, the process of aggregation of chlorophyll granules along the lateral walls of a plant-cell, under the influence of a strong light. [B, 229.] Cf. EPISTROPHE.

**APOSTROPHICUS, APOSTROPHIUS** (Lat.), adj's.  $A^2p(a^3p)-o^2st-ro^2f/i^2k-u^2s/u^2s$ ,  $-o^2st/ro-fu^2s(fu^4s)$ . Gr., *ἀποστροφικός*. Pertaining to or affected with apostrophe. [L, 50.]

**APOSTUME**, n. and v. intr.  $A^2p'o^2s-tu^2m$ . Fr., *apostume* (n.), *apostumer* (v.). See APOSTEMA and APOSTEMATE.

**APOSURA** (Lat.), n. n. pl.  $A^2p(a^3p)-o-su^2(su^4ra^3)$ . From *α* priv., *πῶς*, a foot, and *οὐρα*, a tail. Fr., *aposures*. A tribe of *Lepidoptera* the larvae of which have no organs of locomotion at the anal extremity. [Cuvier (L, 180).]

**APOSYMBECCOTA** (Lat.), n. n. pl.  $A^2p(a^3p)-o-si^2m(su^4m)-be^2-be^2k/o-ta^3$ . Gr., *ἀποσυμβεγκότα* (from *ἀποσυμβεῖν*, to occur, exist, be present). An old term for negative signs in disease (i. e., signs significant by their absence). [Galen, Hippocrates (A, 325).]

**APOSYRINGOSIS** (Lat.), n. f.  $A^2p(a^3p)-o-si^2r(su^4r)-i^2n^2-go^2s/i^2s$ . Gen., *aposyringo^2s/eos (-sis)*. Gr., *ἀποσυρρινγώσις* (from *ἀποσυρρινγούσθαι* = *συρρινγούσθαι*, to end in a fistula). Fr., *aposyringose*. Ger., *Fistelbildung*. A conversion into or formation of a fistula. [M, 13.]

**APOSYRMA** (Lat.), n. n.  $A^2p(a^3p)-o-su^4r(su^4r)/ma^3$ . Gen., *aposyr/matos (-tis)*. Gr., *ἀποσύρμα* (from *ἀποσύρειν*, to tear away). Fr., *aposyrme*. It., *aposirma*. Sp., *aposirma*. An abraded spot, a superficial ulcer. [Hippocrates (A, 325); Rayer (G); Paulus Aegineta (L, 50).]

**APOSYRMUS** (Lat.), n. m.  $A^2p(a^3p)-o-su^4r(su^4r)/mu^2s(mu^4s)$ . Abrasion (the process as distinguished from the result). [L, 50.]

**APOTE** (Fr.), adj.  $A^3-pot$ . See APOTOUS.

**APOTECARY**, n.  $A^2p-o^2t/e^2k-a-ri^2$ . See APOTHECARY.

**APOTESMA** (Lat.), n. n.  $A^2p(a^3p)-o-te^2l-e^2z/e^2s/ma^3$ . Gen., *apotesm/matos (-tis)*. Gr., *ἀποτέσμα* (from *ἀποτελεῖν*, to finish). Fr., *apotésme*. The termination of a disease. [Cælius Aurelianus (A, 325).]

**APOTÉLESMATIQUE** (Fr.), adj.  $A^3-po-ta-le^2s-ma^2t-ek$ . Consequent on the accomplishment of an act. [A, 385.]

**APOTEXIS** (Lat.), n. f.  $A^2p(a^3p)-o-te^2x/i^2s$ . Gen., *apotex/eos (-is)*. Gr., *ἀποτέξις* (1st def.), *ἀποτέξις* (2d def.). 1. Parturition. [Sextus Empiricus (A, 311).] 2. A melting away, emaciation, phthisis. [Hippocrates (A, 311); M, 13.]

**APOTHANASIA** (Lat.), n. f.  $A^2p(a^3p)-o-tha^2n(than^2n)-a(a^3)/zi^2-si^2-a^3$ . From *ἀποθνήσκειν* (a strengthened form of *θνήσκειν*), to die. Absolute, undoubted death. [M, 13.]

**APOTHANATICUS** (Lat.), adj.  $A^2p(a^3p)-o-tha^2n(than^2n)-a^2t-(a^2t)/i^2k-u^2s(u^4s)$ . Caused by death. [M, 13.]

**APOTHECA** (Lat.), n. f.  $A^2p(a^3p)-o-the(than^2n)/ka^3$ . Gr., *ἀποθήκη*. Fr., *officine, apothicairerie*. Ger., *Apotheker*. It., *spezieria, farmacia*. Sp., *botica, farmacia*. An apothecary's shop (anciently, any shop or place or vessel for storage). [A, 323; L, 51.]

**APOTHECARY**, n.  $A^2p-o^2t/e^2k-a-ri^2$ . Lat., *apothecarius*. Fr., *apothicairer, pharmacien*. Ger., *Apotheker*. It., *speziale, farmacista*. Sp., *apotecario, boticario*. Syn.: *pharmacist, pharmacist, druggist, chemist* (1st def.); *general practitioner* (2d def.). 1. Properly, a person who prepares medicinal substances for use in

individual cases and dispenses them in small quantities. He may therefore be called a pharmacist or a pharmaceutist, although the latter terms are also used particularly to designate those who study the science and art of pharmacy or who conduct pharmaceutical operations on a large scale and furnish apothecaries with finished pharmaceutical products. In the United States, an a. is often called a druggist, but this term seems more suitable to a dealer in drugs than to him who prepares them. In Great Britain and Ireland an a. is commonly called a chemist—evidently a misuse of the word. 2. As used by the British, a "general practitioner" who, not being a legally qualified physician or necessarily qualified as a surgeon, is a licentiate or member of the Apothecaries' Society of London, and pursues both the practice of medicine and the business of compounding and dispensing drugs.

**APOTHECASTER** (Lat.), n. m.  $A^2p(a^3p)-o^2t-e^2k-a^2st(a^3st)/-u^2r(e^2r)$ . Ger., *Apothekaster*. One who practises as an apothecary without legal authorization. [L, 50.]

**APOTHECIOPSOE** (Lat.), n. f. pl.  $A^2p(a^3p)-o-the(than^2n)-si^2-(ki^2)-o^2p-so^2r(ea^3-e^2)$ . From *ἀποθήκη* (see APOTHECIUM), and *ψόρα*, a lichen. A suborder of lichens (*Dermatopsora* or *Thallopsora*), made by Reichenbach, comprising the families *Collema-ceae*, *Usneaceae*, and *Parmeliaceae*. [B, 170.]

**APOTHECIUM** (Lat.), n. n.  $A^2p(a^3p)-o-the(than^2n)/si^2(ki^2)-u^2m-(u^4m)$ . From *ἀποθήκη*, to lay by, stow away. Fr., *apothécie, apothécon*. Ger., *Apothecium*. It., *apotecio*. Sp., *apotecion*. A horny disc containing the spores in lichens. It may be either external or occupy the interior of cavities (perithecia) in the lichen, and is always developed from the hyphae of the thallus. It consists

CROSS-SECTION OF AN APOTHECIUM. [B, 138]

sc, spore cases, or asci; par, the filaments, or paraphyses, accompanying them; cl, cortical layer; g, gonidia.

of asci, or club-shaped vertical sacs filled with spores, and paraphyses, or filamentous vertical branches of the hyphae. [B, 54, 75.] 2. In a general sense, any reproductive organ in cryptogamous plants, containing spores, as the sporothecia and sori in ferns, and the capsular fructification of *Algae*. [B, 121, 198.]—**A. adnatum**. An a. in a lichen which is adherent by its entire inferior surface to the thallus. [B, 198.]—**A. capituliforme**. *A. cephaloideum*. Ger., *knopfförmiges A.* Syn.: *cephalodium* [Sprengel]. An a. with a projecting convex surface, surrounded by a depressed and reflexed border. [B, 198.]—**A. crateriforme**. Ger., *becherförmiges A.* Syn.: *sporocarpium calyculatum* [Meyer], *cymatium excipuli-forme* [Wallroth]. An a. in lichens consisting of a more or less excavated, pediculate or sessile, receptacle, filled with pulverulent matter. [B, 198.]—**A. lecanorinum**. Fr., *apothécie lecanorine*. Ger., *schüsselförmiges A.* Syn.: *scutella*. An a. (1st def.) with depressed centre, surrounded by an elevated border formed by the thallus. [B, 121, 198.]—**A. lecidium**. Fr., *apothécie lecidine*. Syn.: *patella, patellula* [Acharius]. An a. patelliform, in which the elevated surrounding border is formed not by the thallus but by the peripheral portion (*margo proprius*) of the conceptacle. [B, 121, 198.]—**A. lirelliforme**, *A. lirellinum*. Fr., *apothécie lirelle*. Ger., *strichförmiges A.* *Strichlein*. Syn.: *lirella* [Acharius]. A more or less elongated slit-like form of a. in lichens. [B, 121, 198.]—**A. patellaforme**, *A. patelliforme*. Fr., *apothécie patelliforme*. An a. (1st def.) which resembles the a. lecanorinum, but is nearly flat in the centre. [B, 198.]—**A. peltiforme**, *A. peltiforme*. Fr., *apothécie peltiforme*. Ger., *schildförmiges A.* *Schild*. Syn.: *pelta* [Acharius]. A flattened a. without an elevated border. [B, 121, 198.]—**A. plano-scutellatum**. See *A. patelliforme*.—**A. pyrenocarpum**. Fr., *apothécie pyrenocarpe*. An a. in the pyrenocarpous lichens, consisting of a globular body containing the spores. [B, 121.]—**A. scutelliforme**. See *A. lecanorinum*.—**A. sessile**. An a. in a lichen which is adherent only by its middle to the thallus, and is free at its border. [B, 198.]—**A. verruciforme**. Ger., *wurzelförmiges A.* *Knopf*. Syn.: *tuberculum* [Acharius]. A wart-shaped a. in lichens. [B, 198.]

**APOTHEKE** (Ger.), n.  $A^3-po-ta/ke^2$ . 1. An apothecary's shop. 2. A medicine chest. [L, 46.]

**APOTHEKER** (Ger.), n.  $A^3-po-ta/ke^2r$ . An apothecary. [L.] **A.-Blackfish**. See *SEPIA officinalis*.—**A'-buch**. A pharmacopoeia, a dispensatory; also an apothecary's record of prescriptions. [L, 43.]—**A'-gewicht**. Apothecaries' weight, troy weight. [L, 46.] **A'-gras**. See *TRITICUM repens*.—**A'-kuust**. Pharmacy (the art). [L.]—**A'-ordnung**. A dispensatory. [L, 46.]—**A'-rose**. The *Rosa gallica*. [B, 180.]—**A'-schierling**. See *CICUTA virosa*.—**A'-schwamm**. See *SPONGIA officinalis*.—**A'-sepie**. See *SEPIA officinalis*.—**A'-topf**. A gallipot. [A, 315.]—**A'-waaren**. Drugs. [L, 43.]—**A'-wissenschaft**. Pharmacology. [L, 46.]

**APOTHELIAL**, adj.  $A^2p-o-the^2l/a^2l$ . From *ἀπό*, from, and *θήλη*, the nipple (see EPITHELIUM). Ger., *apothelial*. A term used

by Haeckel to designate all tissues arising, directly or indirectly, from the exoblast and entoblast, the latter structures being termed epithelial. [Haeckel, "Jenaische Ztg.," xviii, 1884 (J.).]

**APOTHEME**, n. A<sup>2</sup>p/o-them. Lat., *apothema* (from ἀποτίθειν, to put aside). Fr., *apothème*. Ger., *Apothem*, *Absatz*, *Rindensstoff*. Syn.: corticin. A name given by Berzelius to an insoluble brown deposit formed in vegetable infusions and decoctions, as the result of heating, evaporation, exposure to the air, and some other influences; a mixture of various substances in a state of decomposition. [B, 2, 5.]

**APOTHERAPEIA, APOTHERAPEUSIS** (Lat.), n's f. A<sup>2</sup>p-(a<sup>3</sup>p)-o-the<sup>2</sup>r-a<sup>3</sup>-pi/(pa<sup>3</sup>/i<sup>2</sup>-a<sup>3</sup>, pu<sup>2</sup>/si<sup>2</sup>s. Gen., *apotherapei'a*, *peu'-seos* (-sis). Gr., ἀποθεραπεία, ἀποθεραπεύσις (from ἀποθεραπεύειν, to give medical treatment). Fr., *apothérapie*. Ger., *Apothérapie*, *Nacheur* (2d def.). 1. A perfect or completed cure or recovery. [Hippocrates (L, 53).] 2. An ancient method of completing ordinary medical treatment by a course of baths, inunctions, exercise, etc. [Galen (L, 53).]

**APOTHERAPEUTICA, APOTHERAPEUTICE** (Lat.), n's f. A<sup>2</sup>p(a<sup>3</sup>p)-o-the<sup>2</sup>r-a<sup>3</sup>-pu<sup>2</sup>/ti<sup>2</sup>-ka<sup>2</sup>, -se(ka). Gr., ἀποθεραπευτική (τέχνη understood). Fr., *apothérapeutique*. Ger., *Apothérapeutik*. The science or art of apotherapies. [L, 51.]

**APOTHERAPEUTICUS** (Lat.), adj. A<sup>2</sup>p(a<sup>3</sup>p)-o-the<sup>2</sup>r-a<sup>3</sup>-pu<sup>2</sup>/ti<sup>2</sup>-ka<sup>2</sup>-u<sup>3</sup>(u<sup>3</sup>s). Gr., ἀποθεραπευτικός. Pertaining to apotherapies. [L, 51.]

**APOTHERAPIA** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o-the<sup>2</sup>r-a<sup>3</sup>-pi(pe)<sup>2</sup>-a<sup>3</sup>. See APOTHERAPEUSIS.

**APOTHERIOSIS** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o-the<sup>2</sup>r-i<sup>2</sup>-o<sup>3</sup>/si<sup>2</sup>s. Gen., *apotherio'seos* (-sis). Gr., ἀποθρίσις (from ἀποθρίσσειν, to change into a beast). Fr., *apothérose*. It., *apoteriosi*. Sp., *apoteriosis*. 1. A transformation of the body into the likeness of a beast (as in the fabled locust-eaters of Ethiopia). [Velschius (A, 322).] 2. An extreme loss of control over the emotions (as in violent anger). [A, 322.] 3. The conversion of matter into a part of an animal organism; assimilation. [Velschius (A, 301).]

**APOTERMOS** (Lat.), adj. A<sup>2</sup>p(a<sup>3</sup>p)-o-thu<sup>3</sup>rm(the<sup>2</sup>rm)/o<sup>3</sup>s. Gr., ἀποτέρος. 1. Wanting in heat (said of the aged, from their sensitiveness to cold). [Aretæus (A, 322).] 2. As a n., a kind of drink mentioned by Hippocrates. [A, 311.]

**APOTERMUM** (Lat.), n. n. A<sup>2</sup>p(a<sup>3</sup>p)-o-thu<sup>3</sup>rm(the<sup>2</sup>rm)/u<sup>3</sup>rm-(u<sup>3</sup>m). Gr., ἀποτέρον. Fr., *apothermon*. An ancient condiment made of mustard, oil, and vinegar. [Galen (L, 53).]

**APOTERMUS** (Lat.), adj. A<sup>2</sup>p(a<sup>3</sup>p)-o-thu<sup>3</sup>rm(the<sup>2</sup>rm)/u<sup>3</sup>rm-(u<sup>3</sup>s). See APOTERMOS.

**APOTHESES** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o-th'e<sup>2</sup>s/i<sup>2</sup>s. Gen., *apotheseos* (-sis). Gr., ἀπόθεσις (from ἀποτίθειν, to put aside). Fr., *apothèse*. It., *apotesi*. Sp., *apotesis*. The adjustment (setting) of a broken bone. [Hippocrates (L, 53).]

**APOTHECAIRE** (Fr.), n. A<sup>3</sup>-po-te-ka<sup>2</sup>r. An apothecary.

**APOTHECAIRERIE** (Fr.), n. A<sup>3</sup>-po-te-ka<sup>2</sup>r-e<sup>2</sup>r-e. An apothecary's shop. [L, 43.]

**APOTHECAIRESSE** (Fr.), n. A<sup>3</sup>-po-te-ka<sup>2</sup>r-e<sup>2</sup>s. A woman who acts as an apothecary (as in a convent). [L.]

**APOTILIMMA** (Lat.), n. n. A<sup>2</sup>p(a<sup>3</sup>p)-o-thi<sup>2</sup>m/ma<sup>3</sup>. Gen., *apotilm'atos* (-tis). Gr., ἀποτίλιμμα (from ἀποτίλλειν, to squeeze out). An expressed juice, or the dregs left after expression. [Goræus (L, 53).]

**APOTHAUSIS** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o-thra<sup>4</sup>z/(thra<sup>3</sup>u<sup>3</sup>)-si<sup>2</sup>s. Gen., *apothraus'eos* (-sis). Gr., ἀποθραύσις (from ἀποθραύειν, to break in pieces). Fr., *apothrause*. 1. Communion (of a bone). [A, 322.] 2. The removal of a fragment of bone. [L, 94.]

**APOTHAUSMA** (Lat.), n. n. A<sup>2</sup>p(a<sup>3</sup>p)-o-thra<sup>4</sup>z/(thra<sup>3</sup>u<sup>3</sup>)-ma<sup>3</sup>. Gen., *apothaus'atos* (-tis). Gr., ἀποθραύσμα. A splinter of bone. [D, 80.]

**APOTHYMIA** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o-thi<sup>2</sup>m(thu<sup>3</sup>m)/i<sup>2</sup>-a<sup>3</sup>. From ἀποθύμιος, distasteful. An aversion to anything. [M, 13.]

**APOTILMUS** (Lat.), n. m. A<sup>2</sup>p(a<sup>3</sup>p)-o-ti<sup>2</sup>l/mu<sup>3</sup>s(mu<sup>4</sup>s). Gr., ἀποτίλιμος (from ἀποτίλλειν, to pluck out). A tearing away of a part. [A, 311.]

**APOTOCOS, APOTOCUS** (Lat.), adj's. A<sup>2</sup>p(a<sup>3</sup>p)-o-t'o-ko<sup>2</sup>s, -ku<sup>3</sup>s(ku<sup>4</sup>s). Gr., ἀπότοκος (from ἀποτίσκειν, to bring forth). Abortive. [Hippocrates (A, 325).]

**APOTOME, APOTOMIA** (Lat.), n's f. A<sup>2</sup>p(a<sup>3</sup>p)-o-t'o-me(ma), -o<sup>2</sup>t'o-mi<sup>2</sup>-a<sup>3</sup>. Gr., ἀποτομή (from ἀποτμήναι, to cut off). See AMPUTATION.

**APOTOUS**, adj. A<sup>2</sup>p'o-tu<sup>3</sup>s. Gr., ἀποτος. Lat., *apotus*. Fr., *apote*. Not addicted to drink. [Hippocrates (A, 311).]

**APOTREPSIS** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o-tre<sup>2</sup>p/si<sup>2</sup>s. Gen., *apotrep'seos* (-sis). Gr., ἀποτρέψις (from ἀποτρέπειν, to turn back, check). The resolution of an inflammatory swelling. [L, 119.]

**APOTRIMMA** (Lat.), n. n. A<sup>2</sup>p(a<sup>3</sup>p)-o-tri<sup>2</sup>m/ma<sup>3</sup>. Gen., *apotrim'atos* (-tis). Gr., ἀποτίριμμα (from ἀποτίρειν, to rub off). Anything removed by attrition. [Dioscorides (A, 311).]

**APOTRIPSIS** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o-tri<sup>2</sup>p/si<sup>2</sup>s. Gen., *apotrip'seos* (-sis). Attrition, abrasion. [L, 50.]

**APOTROPÆOS, APOTROPÆUS** (Lat.), adj's. A<sup>2</sup>p(a<sup>3</sup>p)-o<sup>2</sup>t-ro-pe/(pa<sup>3</sup>/e<sup>2</sup>)-o<sup>2</sup>s, -u<sup>3</sup>s(u<sup>4</sup>s). Gr., ἀποτροπæος (from ἀποτρέπειν, to turn away). Capable of averting evils (said anciently of the *dii averruncæ*, or of sacrifices offered to them, also of amulets). [Hippocrates, Foesius (A, 325).]

**APOTROPE, APOTROPŌIA** (Lat.), n's f. A<sup>2</sup>p(a<sup>3</sup>p)-o<sup>2</sup>t-ro-pe/(pa), -ro<sup>2</sup>-pi<sup>2</sup>-a<sup>3</sup>. Gr., ἀποτροπή, ἀποτροπία. See APOTROPHE (1st and 2d def's).

**APOTUS** (Lat.), adj. A<sup>2</sup>p(a<sup>3</sup>p)-o-tu<sup>3</sup>s(tu<sup>4</sup>s). See APOTOUS.

**APOUS**, adj. A<sup>2</sup>pu<sup>3</sup>s. See APODOUS.

**APOXE, APOXERA** (Lat.), n's f. A<sup>2</sup>p(a<sup>3</sup>p)-o<sup>2</sup>x/(e)a, -e(a)/ra<sup>3</sup>. G., ἀπόξη, ἀπόξηρα (from ἀποξέειν, to scrape small). An acuminate part. [Hippocrates (L, 53).]

**APOXESIS, APOXYISIS** (Lat.), n's f. A<sup>2</sup>p(a<sup>3</sup>p)-o<sup>2</sup>x/e<sup>2</sup>s-i<sup>2</sup>s, -o<sup>2</sup>x-i(u<sup>3</sup>/si<sup>2</sup>s. Gen., *apoxe'seos* (-sis), -ys'eos (-sis). Gr., ἀπόξυσις (from ἀποξέειν, to scrape off). Abrasion. [A, 311; D, 80.]

**APOXYISMA** (Lat.), n. n. A<sup>2</sup>p(a<sup>3</sup>p)-o<sup>2</sup>x-i<sup>2</sup>zu<sup>3</sup>(u<sup>3</sup>s)/ma<sup>3</sup>. Gen., *apoxys'matos* (-tis). Gr., ἀπόξυσμα. See APOTRIMMA.

**APOXYSMUS** (Lat.), n. m. A<sup>2</sup>p(a<sup>3</sup>p)-o<sup>2</sup>x-i<sup>2</sup>z(u<sup>3</sup>s)/mu<sup>3</sup>s(mu<sup>4</sup>s). Gr., ἀποξύσμος (from ἀποξύνειν, to make sour [1st def.], or ἀποξέειν, to scrape off [2d def.]). 1. A turning sour. [A, 311.] 2. See APOXYISIS.

**APOYOMATLI**, n. A Mexican name for the *Cyperus articulatus*. [B, 121.]

**APOZEMA**, n. A<sup>2</sup>p'o-ze<sup>2</sup>m. See APOZEMA.

**APOZEMA** (Lat.), n. n. A<sup>2</sup>p(a<sup>3</sup>p)-o<sup>2</sup>z/e<sup>2</sup>m-a<sup>3</sup>. Gen., *apozem'atos* (-tis). Gr., ἀπόζεμα (from ἀποξέειν, to boil). Fr., *apozème*. Ger., *Apozem*, *Absud*. It., *apozema*. A decoction or infusion to which several medicinal ingredients are subsequently added, designed for occasional use only and prepared at the time of using. [A, 301; Fr. Cod. (B).]—**A. album**. See **APOZÈME blanc**.—**A. antidiarrhœicum**. See **APOZÈME antidiarrhœique**.—**A. antiscorbuticum**. See **APOZÈME antiscorbutique**.—**A. aperiens** et **antiscorbuticum**. A preparation described by Sydenham, made by boiling grass root, chicory root, fennel root, and asparagus, each 1 oz., Corinthian raisins and ordinary stoned raisins, each 2 oz., the leaves of the hepatica (*Anemone hepatica*), heart's-tongue (*Scotopendrium vulgare*), and maidenhair (*Adiantum capillus Veneris*), each 1 handful, and beccabunga leaves 2 handfuls, in 2 lbs. of boiling water, adding 1 lb. of Rhenish wine, straining, infusing, while still hot, with 1 handful of leaves of scurvy-grass (*Cochlearia officinalis*), and after a second straining, adding 2 oz. each of syrup of orange juice and "syrup of the five roots" (*i. e.*, those of celery, parsley, asparagus, butcher's-broom, and fennel), and 1 oz. of a preparation called aqua cinnamomi hordeata. The dose was 1 lb., twice a day. [B, 90.]—**A. de acetosa compositum**. See **Tisane d'OSEILLE composée**.—**A. de cortice radicis punice** [Fr. Cod.]. See **APOZÈME d'écorce de racine de GRENADIER**.—**A. de couso** [Fr. Cod.]. See **APOZÈME de ROUSSO**.—**A. helveticum**. See **APOZÈME suisse**.—**A. laxativum** [Fr. Cod.]. See **APOZÈME laxatif**.—**A. purgans** [Fr. Cod.]. See **APOZÈME purgatif**.—**A. salsaparillæ compositum** [Fr. Cod.]. See **APOZÈME de SALSEPAREILLE composé**.—**A. sudatorium** [Fr. Cod.]. See **APOZÈME sudorifique**.—**A. Sydenhami**. See **APOZÈME blanc**.—**A. vernifugum**. See **APOZÈME d'écorce de racine de GRENADIER**.

**APOZEMA**, n. A<sup>2</sup>p'o-ze<sup>2</sup>m. See APOZEMA.

**APOZÈME** (Fr.), n. A<sup>3</sup>-po-ze<sup>2</sup>m. See APOZEMA.—**A. alexipharmaque**. An old decoction of polypodium and angelica roots, leaves of *Centaurea benedicta*, and tamarinds, in which crushed epithymum and bugloss flowers were infused. [L, 112.]—**A. amer** [Sp. Ph., 1798; Ferrara Ph., 1832]. The Sp. Ph. ordered 14 parts of germander, 7 each of absinthium and lesser centaury, and 690 of water, to be reduced to one half, and 7 parts of chamomile added. The Ferrara Ph. ordered 60 parts each of gentian and *Triticum repens*, 28 each of willow and ash barks, 5 of ammonium chloride, and 4,320 of water, to be reduced by heat to 1,440 parts. [L.]—**A. antidiarrhœique**. Lat., *apozema antidiarrhœicum*. A mixture of normal phosphate of calcium 10 parts, bread crumb 20, subnitrate of bismuth 5, syrup of rhatany 60, tincture of canella 5, and Sydenham's laudanum 1 part. [L, 77.]—**A. anti-laiteux**. See **PETIT-LAIT de Weiss**.—**A. antiscorbutique** [Fr. Cod., 1866]. Lat., *apozema antiscorbuticum*. A preparation made by infusing for 2 hours, in a closed vessel, 1 part each of burdock and waterdock roots in 100 parts of water, expressing, filtering, and adding 10 parts of antiscorbutic syrup. [Fr. Cod., 1866 (L, 77).]—**A. blanc** [Fr. Cod.]. Lat., *apozema* (seu decoction) *album*. Syn.: *decoction blanche de Sydenham*. A preparation made by triturating together 10 parts each of normal calcic phosphate and powdered gum arabic, 20 of bread crumb, and 60 of white sugar, boiling with water, and after straining, adding 10 of orange-flower water. [B, 113.]—**A. laxatif** [Fr. Cod.]. Lat., *apozema laxativum*, *ptisana regalis*. Syn.: *tisane royale*. A preparation made by macerating 15 parts each of parsley leaves, senna leaves, and sodium sulphate, 5 each of aniseed and coriander fruit, and a sliced lemon in 1,000 parts of cold water, and filtering. [B, 113.]—**A. purgatif** [Fr. Cod.]. Lat., *apozema purgans*. Syn.: *médecine noire*. A preparation made by infusing 10 parts of senna leaves and 5 of rhubarb in 100 of boiling distilled water, adding 15 of sodium sulphate and 60 of manna, and decanting. [B, 113.]—**A. sudorifique** [Fr. Cod.]. Lat., *apozema sudatorium*. A preparation made by boiling 60 parts of grated guaiac wood in water, adding 30 of sarsaparilla root, 10 of sassafras root, and 20 of licorice, and decanting. [B, 113.]—**A. suisse**. Lat., *apozema helveticum*. An old mixture of cows' urine and fennel-water; used in dropsy and hepatic diseases. [L, 77.]—**A. vernifuge**. See **A. d'écorce de racine de GRENADIER**.

**APOZEMICAL**, adj. A<sup>2</sup>p'o-ze<sup>2</sup>m/i<sup>2</sup>k-a<sup>3</sup>l. Pertaining to or resembling a decoction. [L, 56, 73.]

**APOZESIS** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o<sup>2</sup>z/e<sup>2</sup>s-i<sup>2</sup>s. Gen., *apozeseos* (-sis). The making of a decoction. [L, 50.]

**APOZEUXIS** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-o<sup>2</sup>z-u<sup>3</sup>x/i<sup>2</sup>s. Gen., *apozoux'eos* (-is). Gr., ἀποζεύξις (from ἀποζεύγνυσθαι, to be parted from). A separation of diseased parts. [D, 141.]

**APOZYMOS, APOZYMUS** (Lat.), adj's. A<sup>2</sup>p(a<sup>3</sup>p)-o<sup>2</sup>zi(zu<sup>3</sup>)-mo<sup>3</sup>s, -mu<sup>3</sup>s(mu<sup>4</sup>s). Gr., ἀπόζυμος. In a state of fermentation, or swollen as the result of fermentation (said of the abdomen). [Hippocrates (A, 311, 325).]

**APPAKOVAY KALUNG**, n. An East Indian name for *Bryonia rostrata*. [L.]

**APPARAT** (Ger.), n.  $A^3p\text{-}pa^3\text{-}ra^3t'$ . See **APPARATUS**.—**Art-riüser A.** See **Anatomical APPARATUS** (2d def.).—**Athmungs'a.** See **Respiratory APPARATUS** and **INHALER**.—**Bewegungs'a.** See **Locomotor APPARATUS**.—**Contentiv-A.** See **Retentive APPARATUS**.—**Dampf'a.** See **ATOMIZER**.—**Eisenbahn-A.** See **Railway APPARATUS**.—**End-A.** A general term applied to the terminations of sensory nerves, such as the touch-corpuscles, etc. [Gruenhagen (K).]—**Erkältungs'a.** See **Refrigerating APPARATUS** and **Cold-water coil**.—**Ersatz'a.** See **Prothetic APPARATUS**.—**Gefühls'a.** See **Tactile APPARATUS**.—**Ge-höra'.** See **Auditory APPARATUS**.—**Geschmacks'a.** See **Gustatory APPARATUS**.—**Harna'.** See **Urinary APPARATUS**.—**Inhalations'a.** See **INHALER**.—**Kopf-kühla'.** A cold-water coil for the head, in the shape of a helmet. [W. N. Popow, "Illustr. Mntsch. d. ärztl. Polytechn." Aug., 1883, p. 171 (D).]—**Krankenhebe'a.** An apparatus by which a person confined to bed may lift himself up or be lifted up. [P. Hase, *ibid.*, June, 1883, p. 123 (D).]—**Kreis-laufsa'.** See **Circulatory APPARATUS**.—**Kühlender A.** See **Refrigerating APPARATUS** and **Cold-water coil**.—**Lagerungs'a.** An apparatus for more or less completely immobilizing a patient in bed in cases of fracture. [L. 44.]—**Nervena'.** See **APPARATUS of innervation**.—**Pinsela'.** An apparatus for the application of medicaments with a brush. [Ultzmann, "Wiener Klinik," i, ii, 1883; "Illustr. Mntsch. d. ärztl. Polytechn." May, 1884, p. 111 (D).]—**Punctionsa'.** See **ASPIRATOR** and **THORACOCENTESIS**.—**Queck-silber-pneumatischer A.** See **APPARATUS hydrargyro-pneumaticus**.—**Respirations'a.** See **Respiratory APPARATUS** and **INHALER**.—**Schallempfindender A.** See **Sound-perceiving APPARATUS**.—**Schallleitender A.** See **Sound-conducting APPARATUS**.—**Schleifa'.** See **Railway APPARATUS**.—**Schwebes'a.** See **Suspension APPARATUS**.—**Seha'.** See **Visual APPARATUS**.—**Strecka'.**

ULTZMANN'S PINSELPAPPARAT.  
( $\frac{1}{2}$  NATURAL SIZE.)

a, a straight endoscopic tube; b, the ob-turator; c, a brush with a movable guard.

See **Extension APPARATUS**.—**Taschena'.** A portable apparatus (one capable of being carried in the pocket). [L. Vorstädter, "Illustr. Mntsch. d. ärztl. Polytechn." Aug., 1884, p. 171.]—**Thrä-nena'.** See **Lacrymal APPARATUS**.—**Verdauungs'a.** See **Digestive APPARATUS**.—**Wechselzugesa'.** A variable extension appar-atus.

**APPARATUS** (Lat.), n. m.  $A^2p(a^2p)\text{-}pa^3r\text{-}a(a^2)\text{'tu}^3s\text{'(tu}^4s\text{'}$ . From *appareare*, to prepare for, put in order, make ready. Gr.,  $\pi\alpha\rho\alpha\rho\kappa\epsilon\nu\eta$ . Fr., *appareil*. Ger., *Apparat*. It., *apparato*, *apparecchio*. Sp., *aparato*. 1. A mechanism or a collection of instruments or appliances for the accomplishment of a definite operation or process. 2. In physiology, a group of co-ordinated organs (*i. e.*, organs taking part in the performance of a common function). [Bichat (A, 385).] 3. An assemblage of pathological phenomena. [L. 49.] 4. (Obs.) the pre-eruptive stage of an exanthematous fever. [B, 117.] 5. (Obs.) the operation of cystotomy. [E.]—**Absorbent a.** Fr., *appareil absorbant*. The blood-vessels and lymphatic vessels. [L. 41.]—**Aërotherapeutical a.** Fr., *appareil aëro-thérapeutique*. Ger., *aërotherapeutischer Apparat*. See **Pneumatic a.** and **INHALER**.—**Amesbury's a.** See **Amesbury's SPLINT**.—**Anæsthetic a.** **Anæsthetizing a.** Fr., *appareil anesthésiant*. Ger., *Anästhesirungsapparat*. See **INHALER**.—**Anatomical a.** Lat., *a. anatomicus*. Fr., *appareil anatomique*. Ger., *anatomischer Apparat*. 1. A set of dissecting instruments. 2. Syringes, cannulæ, etc., for arterial injection.—**Antiseptic spray a.** See under **ATOMIZER**.—**A. altns.** Fr., *haut appareil*. See **Suprapubic cystotomy**.—**A. anatomicus, A. arteriosus.** See **Anatomical a.**—**A. chirurgicus.** Surgical instruments and appliances. [D. 129.]—**A. chyli-ficationis.** See **Digestive a.**—**A. continens.** See **Retentive a.**—**A. hydrargyro-pneumaticus.** Fr., *appareil hydrargyro-pneuma-*

*tique*. Ger., *quecksilberpneumatischer Apparat*. An a. for collect-ing and storing gases over mercury. [L. 80, 91.]—**A. hypogastricus.** See **Suprapubic cystotomy**.—**A. lateralis.** See **Lateral cystotomy**.—**A. ligamentosus colli.** See **Occipito-axial liga-ment**.—**A. ligamentosus sinus tarsi.** The interosseous astragalo-calcaneal ligament. [L. 31.]—**A. ligamentosus vertebra-rum colli et capitis.** The ligamentous structures connecting the head and the spinal column.—**A. locomotorius.** See **Locomotor a.**—**A. magnus, A. major.** Fr., *grand appareil*. See **Median cystotomy**.—**A. medicaminum.** Ger., *Arzneivorrath*. A stock

BARTLETT'S CLAVICLE APPARATUS. (CODMAN & SHURTLEFF, BOSTON.)

of medicines. [L. 50.]—**A. minor.** Fr., *'petit appareil*. Syn.: *cutting on the gripe*. An old method of operating for stone in the bladder by cutting down directly on the calculus in the perineum after forcing it down with the fingers inserted into the rectum. [A. 439.]—**A. of animal life.** Fr., *appareil de la vie animale*. It., *apparecchio della vita di relazione*. The assemblage of organs by means of which the relations of an animal to the external world are established and maintained: including the locomotor a., the sensory a., the a. of phonation, etc. [Bichat (L. 41).]—**A. of in-nervation.** Fr., *appareil de l'innervation*. Ger., *Nervenapparat*.

BARWELL'S APPARATUS FOR TALIPES.  
[A, 276.]

BAUER'S APPARATUS  
FOR HIP-JOINT DIS-EASE.

The nervous system. [L. 44.]—**A. of organic life.** Fr., *appareil de la vie organique*. It., *apparecchio della vita di nutrizione*. The assemblage of organs by means of which the processes of digestion, secretion, excretion, respiration, and circulation are carried on. [Bichat (L. 41).]—**A. of phonation.** Fr., *appareil de la phonation*. Ger., *Phonationsapparat*. See **Vocal a.**—**A. pneu-mato-chemicus.** Fr., *appareil hydropneumatique*. Ger., *pneumatisch-chemischer Apparat*. An a. for collect-ing and storing gases over water. [L. 80, 91.]—**A. pro extensione.** See **Extension a.**—**A. respiratorius.** See **Respiratory a.**—**A. uropoieticus.** See **Urinary a.**—**Appun's a.** A form of vowel a. (*q. v.*) in which reeds are substituted for tuning-forks. [L. 160.]—**Artificial phonatory a.** See **Artificial LARYNX**.—**Auditory a.** Fr., *appareil de l'audition*. Ger., *Gehörapparat*. It., *apparecchio dell' uditio*. The external ear, the auditory canal, the tympanum, the internal ear, and the Eustachian tube. [L. 44.]—**Aveling's a.** An a. for the immediate transfusion of blood, consisting of a rubber tube having a cannula and a stop-cock at each end and a collapsible bulb holding 2 fluid-drachms in the middle. One cannula is inserted into the donor's vein, and the other into the patient's vein, the a. having been previously filled with warm water. The tube being compressed with the fingers on the

AVELING'S APPARATUS FOR IMMEDIATE TRANSFUSION.

donor's side of the bulb, the latter is slowly squeezed so as to propel its contents into the patient's circulation; while pressure is still kept up on the bulb, it is discontinued on the donor's side of the bulb and applied on the patient's side; the bulb is then allowed to expand and fill with blood from the donor. This alternation is continued until the desired amount of blood has been transfused. There are no valves, and the stopcocks are closed only while the cannulae are being inserted into the veins.—**Barruel's a.** An a. for charging water with carbonic acid by the intermittent method. [L, 77.]—**Bartlett's clavicle a.** An a. for treating fractures of the clavicle and dislocations of its outer end; adaptable to either side by shifting the hand strap.—**Barwell's a.** A device for making continuous traction on the foot, in imitation of the action of one or more muscles, for the correction of talipes. A fan-shaped piece of adhesive plaster, having several slits converging toward its apex, and a metallic ring secured to the apex, is adjusted to the sole of the foot; a strip of tin or zinc is made to encircle the limb above the swell of the calf, and secured in position with adhesive plaster; this metallic band is provided with rings at points corresponding to those from which the force is to be exerted; a piece of rubber tubing, adjusted by means of a chain, is stretched by means of hooks between the apex of the fan-shaped piece of plaster and the proper ring on the metallic band. [A, 276.]—**Bauer's a.** 1. A device for making extension in cases of hip-joint disease by means of a key rack-and-pinion mechanism. It is attached to the shoe below, and takes its bearing by a perineal band above. 2. A wire frame filled in with wire gauze, fashioned like the posterior half of a pair of breeches, provided with foot-pieces for making extension by a screw-movement; used in hip-joint disease, also after operations on, or injuries of, the bones of the lower limbs.—**Beindorff's a.** A stove resembling a marine condenser; used in pharmacies for furnishing boiling and distilled water, etc. [L, 77.]—**Bonnafond's a.**

BOUNAFOND'S EUSTACHIAN-TUBE INJECTION APPARATUS. (AFTER MATHIEU.)

An arrangement of flasks communicating with the barrel of a syringe, for generating various gases and vapors and injecting them into the Eustachian tube.—**Bozeman's a.** A wooden framework that may be fastened to a table, furnished with pads and straps, for supporting and securing a woman in the knee-elbow posture during operations for vesico-vaginal fistula, etc. The chest and head (with the face turned to one side) rest on an upholstered support.—**Buck's a.** 1. An a. for applying elastic extension to the lower limb by means of a

weight and pulley. A stirrup of adhesive plaster is attached to the sides of the limb and forms a loop below the foot; to a block of wood placed within the loop in such a manner as to spread it, thus making it clear the malleolus, is attached the cord to which the weight is attached, a rubber ring being interposed. The pulley is fastened to the bedstead. Counter-extension was originally made with a perineal band fastened to the head of the bedstead, as shown in the cut, but is now accomplished by simply elevating the foot of the bed. In cases of fracture of the thigh, four short coaptation splints are used. 2. An iron support, capable of attach-

BOZEMAN'S SUPPORTING APPARATUS.

ment to a bedstead, for suspending a limb.—**Bunion a.** Bigg's bunion a., for making lateral traction on the great toe, consists of a delicate lever of spring steel, with an oval ring at the centre to surround the bunion. The upper end is attached to the instep by a laced band, and the toe to the extremity of the spring by a piece of webbing.—**Cardio-vascular a.** See *Circulatory a.*—**Carriage-spring a.** A name sometimes applied to a more or less complicated internal calcareous framework or skeleton which supports the arms in many of the *Brachiopoda*. [A, 359.]—**Circulatory a.** Fr., *appareil circulatoire*. Ger., *Kreislaufsapparat*. It., *apparecchio della circolazione*. The heart, arteries, veins, and capillaries. [L.]—**Condensing a.** See *CONDENSER*.—**Continuous extension a.** Fr., *appareil à extension continue*. Any extension a. which acts constantly (as by the action of an elastic material or a weight).—**Copulatory a.** That part of the generative a. which is concerned in copulation. [B, 100.]—**Cystotomia cum apparatu alto.** See *Suprapubic cystotomy*.—**Cystotomia cum apparatu majore.** See *Median cystotomy*.—**Dauvergne's a.** An a. similar to the ancient ambe (*q. v.*); used for dislocations at the shoulder of long standing. [D, 76.]—**Davis's a.** See *Davis's splint*.—**Desault's a.** See *Desault's splint*.—**Diapnogenous a.** Fr., *appareil diapnogene* [Breschet]. See *Sudoriparous a.*—**Diffusion a.** Fr., *appareil à diffusion*. Ger., *Diffusionsapparat*. An a. for illustrating or taking advantage of the law of diffusion of gases (see *DIFFUSION*). In the form shown in the figure, a cylindrical porous cell (like those used in galvanic batteries) is fixed by means of a rubber cork to the upper end of an upright glass tube. A bulb is blown near the lower end of the tube, and the end itself is drawn out to a fine point and bent upward, the bend being filled with colored water. If an inverted vessel filled with hydrogen is held over the porous jar, the hydrogen will enter in faster than the air can pass out, so that the increased pressure in the cell will force the colored water out in the form of a jet through the fine end of the tube. [A, 9.]—**Digestive a.** Fr., *appareil digestif*. Ger., *Verdauungsapparat*. It., *apparecchio della digestione*. Sp., *aparato digestivo*. The parts concerned in digestion; the mouth, teeth, salivary glands, pharynx, oesophagus, stomach, intestines, liver, and pancreas. [L, 44.]—**Distilling a.** See *DISTILLATION*.—**Electro-magnetic a.** Fr., *appareil électro-magnétique*. An a. in which a bar of soft iron is converted into an artificial magnet by the action of a current of electricity. [B.]—**Encephalic a.** Fr., *appareil encéphalique*. See *ENCEPHALON*.—**Enema a.** See *SYRINGE*.—**Esmarch's a.** See *Esmarch's bandage*.—**Evacuating a.** See *EVACUATOR and Stomach-pump*.—**Extension a.** Lat., *a. pro extensione*. Fr., *appareil à extension*. Ger., *Extensionsapparat*, *Streckapparat*. It., *apparecchio ad estensione*. An a. for extending or stretching a part (usually a limb). See *EXTENSION*.—**Female genital a.** Fr., *appareil génital de la femme*. Ger., *weiblicher Geschlechtsapparat*.

BIGG'S BUNION APPARATUS.

The internal, external, and accessory genital organs of the female; also, from an obstetrical point of view, the pelvis. [A, 15.]—**Filamentous a.**, **Filiform a.** Fr., *appareil filamenteux*. A peculiar structure observed in the upper part of the embryonal vesicles in certain plants just before the period of fecundation. It is formed by a transformation of the vesicular contents into a series of granules, disposed in lines radiating from the summit of the vesicle, the lines gradually becoming tinted and the substance between them assuming the form of filaments which can be dissociated from one another by teasing with a needle. [B,

cannulae and stopcocks, being made of one continuous piece of rubber. [B. E. Fryer, "Med. Record," Apr. 15, 1874.]—**Fumigation a.** See FUMIGATOR.—**Gastro-vascular a.** Fr., *appareil gastro-vasculaire*. A system of tubes, terminating in blind extremities, connected with the stomachs of certain gasteropods, by means of which the nutriment is distributed through the body. [L, 158.]—**Geissler's a.** 1. See *Geissler's TUBES*. 2. A device for determining the quantity of carbon dioxide present in a carbonate by ascertaining the weight lost by the salt on the addition of an acid. It consists of three parts, *A*, *B*, and *C*. *C* is ground so as to fit into *A* by an air-tight joint; *b c* is a glass tube, open at both ends, its lower end fitting into *C* by a joint ground water-tight, and is kept in position by means of a movable cork; the joints formed by the perforated stopper, *e*, are air-tight. Having been weighed, the substance to be decomposed is put into the flask, *A*, water is added as shown in the cut, and the substance is shaken toward the side of the flask. *C* is now filled nearly to the top with dilute nitric or hydrochloric acid, by means of a pipette, without raising the tube, *b*. *B* is rather more than half filled with concentrated sulphuric acid, and *b* is closed at the top by placing over it a small piece of rubber tubing with a glass rod fitted into the distal end. After weighing the whole, the decomposition is effected by opening *b* a little, causing acid to pass from *C* into *A*; the carbon dioxide passes through the

BUCK'S EXTENSION APPARATUS.

BUCK'S SUSPENSION APPARATUS.

121.]—**Fox's a.** An a. for fracture of the clavicle, consisting of a pad in the axilla and an arrangement to adducting the arm and suspending the wrist from the opposite shoulder. — **Friinkel's a.** A pneumatic a. arranged in the shape of an accordion. [E.]—**Freezing a.** See ATOMIZER.—**Frigorific a.** Fr., *appareil frigorisque*. A term applied to the sympathetic nerves, because they contain vaso-constrictor fibres stimulation of which causes contraction of the arterioles and consequent lowering of temperature in the parts supplied by them. [K, 31.]—**Fryer's transfusion a.** A modification of Aveling's transfusion a., having two bulbs instead of one, and the whole a., except the terminal

bent tube, *h*, into the sulphuric acid, by which it is dried, and issues at *d*. When the decomposition is effected, *A* is gently heated, the stopper is removed from *b*, and the carbon dioxide still present is sucked out at *d*. After cooling, the a. is weighed again, and the loss of weight is that of the carbon dioxide expelled. [A, 9.]—**Generative a.**, **genital a.** Fr., *appareil de la génération*. Ger., *Geschlechtsapparat*. It., *apparecchio della generazione*. Sp., *aparato genital*. The organs of generation in either sex; also, according to Bichat, the fecundated ovum. [L, 41.]—**Genito-urinary a.** Fr., *appareil génito-urinaire*. Ger., *Urogenitalapparat*. A collective term for the generative and urinary a'es.—**Gustatory a.** Fr., *appareil du goût*. Ger., *Geschmacksapparat*. It., *apparecchio di gusto*. The terminations of the nerves of taste in the mucous membrane of the tongue. [D, 76.]—**Helmholtz's a.** See *Helmholtz's GALVANOMETER*.—**Hodgen's a.** A modification of Smith's anterior splint.—**Hudson's a.** A supporting a. for the fingers and hands in cases of wrist-drop, furnished with springs and to be attached to the forearm and hand. [A, 276.]—**Immobilizing a.** Fr., *appareil d'immobilisation*. Ger., *Immobilisirungsapparat*. It., *apparecchio d'immobilizzazione*. Any a. or dressing designed to render a part nearly or quite immovable. [D, 76.]—**Immovable a.** Fr., *appa-*

*relinamovibile*. Ger., *permanenter Apparat*. It., *apparecchio inamovibile*. See *Starch BANDAGE* and *Plaster-of-Paris BANDAGE*.—**Induction a.** An a. for the employment of induced electricity. [L.]

See *Induced ELECTRICITY* and *FARADIZATION*.—**Injection a.** See *Anatomical a.* (2d def.), *SYRINGE*, and *ASPIRATOR*.—**Irrigation a.** See *IRRIGATOR*.—**Jarvis's a.** See *Jarvis's ADJUSTER*.—**Kempedick's a.** A device for reducing the temperature by means of a rubber bag introduced into the rectum, connected with two tubes for the ingress and egress of water.

A DIFFUSION APPARATUS.  
(AFTER ROSCOE AND SCHORLEMMER.)

GEISSLER'S APPARATUS.  
[A, 9.]

[W. N. Popow, "Illustr. Mntsch. d. ärztl. Polytechn." Aug., 1883, p. 171 (D).]—**Kipp's a.** An a. for the intermittent generation of hydrogen sulphide by the action of sulphuric acid on iron sulphide.

FRÄNKEL'S PNEUMATIC APPARATUS.

[L, 77.]—**Lacrymal a.** Fr., *appareil lacrymal*. Ger., *Thränen-apparat*. It., *apparecchio lacrimale*. Sp., *aparato lacrimal*. The

lacrymal glands, the canaliculi lacrimales, the lacrymal sac, and the nasal duct. [L.]—**Larrey's a.** A form of immovable a. (said to have been the first employed) made by applying bandages soaked in a mixture of lead-water, camphorated spirit, and white of egg. [D, 93.]—**Leiter's a.** A refrigerating a. consisting of a coil of flexible

HODGSON'S SUSPENDING APPARATUS.

metallic tubing fashioned into various shapes, according to the part to which it is to be applied, through which cold water is made to run. [F.] Cf. *Cold-water COIL*.—**Levis's a.** An a. for the treatment of fracture of the clavicle, consisting of a wedge-shaped pad for the axilla, a sling for the forearm, and suitable straps for their adjustment and retention.—**Light-conducting a.** Ger., *lichtleitender Apparat*. A collective

HUDSON'S WRIST-DROP APPARATUS. (AFTER SAYRE.)

name for those portions of the eye (comprising the cornea, the humors, the lens, and their appendages) which are concerned in the transmission of light. [Bull (B, 233).]—**Light-perceiving a.** Ger., *lichtempfindender Apparat*. A collective name for the organs

concerned in the perception of light, comprising the retina, the optic nerve, and the cerebral visual centres. [Bull (B, 233).]—**Locomotor a.** Lat., *a. locomotorius*. Fr., *appareil de la locomotion*. Ger., *locomotorischer Apparat*. It., *apparecchio della locomozione*. The organs or mechanism by means of which locomotion is accomplished.—**Lonsdale's a.** An a. for treating fracture of the patella. Two upright rods are attached to a long posterior splint. Movable arms sliding on these rods, and capable of being fixed with thumb-screws at various heights, have depending from them semilunar padded plates for holding the fragments in position. [A, 441.]—**Lund's a.** Ger., *Trachtenswinger*. A device for correcting proclivita of the uterus in the lower animals; a triangular frame of iron, to be secured to the vulva by means of straps and rings. [D, 76.]—**Magneto-electric a.** Fr., *appareil magnéto-électrique*. Ger., *magneto-elektrischer Rota*

LEVIS'S CLAVICLE APPARATUS.

O, no; O<sup>s</sup>, not; O<sup>s</sup>, whole; Th, thin; Th<sup>s</sup>, the; U, like oo in too; U<sup>s</sup>, blue; U<sup>s</sup>, hull; U<sup>s</sup>, full; U<sup>s</sup>, urn; U<sup>s</sup>, like ù (German).

tionsapparat. It., *apparecchio magneto-elettrico*. A machine by which an induced current of electricity is generated, without the use of a battery, by causing a double coil to revolve in close proximity to the arms of a horse-shoe magnet. [A, 376.]—**Malgaigne's a.** An a. for correcting forward displacement of the upper fragment in fractures of the leg. A steel band to span the forepart of the limb is

CLARKE'S MAGNETO-ELECTRIC APPARATUS. (AFTER PRIVAT-DESCHANEL.)

secured by a strap to a posterior splint. The band is perforated by a screw which is turned so that its point penetrates the soft parts, enters the bone, and presses the latter backward. [A, 441.]—**Marsh's a.** See *Marsh's TEST*.—**Micropyle a.** A peculiar structure found on the dorsum of some *Edriophthalmia*. [B, 100.]—**Nebulizing a.** See *ATOMIZER*.—**Neurothelic a.** Fr., *appareil névrothèle* [Bres-

SAYRE'S SUSPENSION APPARATUS.

chet]. The papillæ of the skin. [J, 33.]—**Nooth's a.** An a. for saturating water with carbon dioxide; consisting of three vertically disposed glass vessels, in the first of which the gas is generated, in the second passed into water, and in the third stored under pressure. [B, 7.]—**Occlusor a.** A mechanism for closing the orifice of the stigmata in insects. It consists of four parts: a thickening of one-

half the circumference of the chitinous lining of the stigma, called the *bow*; a *lip*, formed by the remainder of the circumference; a chitinous process, called the *lever*, joined to either the bow or the lip; and a muscle attached to the lever and by its contraction bringing the lip and the bow into apposition. [B, 100.]—**Olfactory a.** Fr., *appareil d'olfaction*. Ger., *Geruchsapparat*. It., *apparecchio dell' odorato* (o dell' olfatto). The nasal cavities and the terminations of the olfactory nerve. [L, 44.]—**Phonatory a.** See *Vocal a.* and *Artificial LARYNX*.—**Physick's a.** See *Physick's SPLINT*.—**Pneumatic a.** Fr., *appareil pneumatique*. Ger., *pneumatischer Apparat*. See *Fränkel's*, *Tobold's*, and *Waldenburg's a.* and *Pneumatic CABINET*.—**Polydactylous a.** Fr., *appareil polydactyle*.

N. R. SMITH'S SUSPENSION APPARATUS. [A, 389.]

It., *apparecchio polidattile*. An a. for the treatment of fractures; like a fracture-box, except that the side-pieces are replaced by movable pins which can be so placed as to exactly circumscribe the outlines of the limb. [D, 76.]—**Pouillet's a.** See *SERICEPS* and *Pouillet's TRACTOR*.—**Pros's a.** A mechanical contrivance for making continuous traction on the obstetrical forceps, somewhat as in Joulin's *aide-forceps* (q. v.), but with the counter-pressure bearing upon a section of a bed forming part of the a. [A, 15.]—**Prothetic a.** Fr., *appareil prothétique*. Ger., *Ersatzapparat*. It., *apparecchio di protesì*. One designed to take the place of parts of the body that are lacking (e. g., an artificial limb). [D, 76.]—**Railway a.** Ger., *Eisenbahnapparat*, *Schleifapparat*. It., *apparecchio a ferrovia*. An a. devised by Volkmann for supporting an injured limb and allowing it to move up and down with the body, or when extension is applied, especially in military practice or under other circumstances in which a proper bed is not at hand. Two rails, like those of a tramway, run lengthwise on a plank placed under the limb, and a frame furnished with wheels is fitted upon the track thus formed. The limb is supported on the frame by any requisite number of strips of bandage stretched from side to side. [J. Wolff (A, 319).]—**Rectocolonic enema a.** An a. like a stomach-pump, for throwing enemata high into the large intestine. [E.]—**Refrigerat-**

TOBOLD'S ILLUMINATING APPARATUS.

**inga.** Fr., *appareil refroidissant*. Ger., *Erkältungsapparat*. Any a. for producing cold or for reducing the heat of the body. [L.] See *Leiter's a.* and *Cold-water COIL*.—**Registering a.** Fr., *appareil enregistreur*. Ger., *Registrierapparat*. A device for recording the variations of the pulse, respiration, etc., by means of a tracing made by a movable lever on a surface which is moved at a uniform rate

by clockwork. [L. Landois (A, 319).]—**Respiratory a.** Lat., *a. respiratorius*. Fr., *appareil respiratoire*. Ger., *Respirationsapparat*. It., *apparecchio della respirazione*. 1. The organs of respiration (larynx, trachea, bronchi, and pulmonary air-vesicles). [L, 44.] 2. See **RESPIRATOR**.—**Retentive a.** Lat., *a. continens*. Fr., *appareil contentif*. Ger., *Contentivapparat*. It., *apparecchio contentivo*. 1. A dressing or bandage designed simply to retain parts in apposition, or to hold an application in place. 2. See **IMMOBILIZING a.**—**Richardson's a.** See **ATOMIZER**.—**Ruhmkorff's a.** See **Ruhmkorff's coil**.—**Sayre's a.** See **Suspension a.** (2d def.). *Sayre's splint*, and *Plaster-of-Paris jacket*.—**Scultetus's a.** See **Many-tailed bandage**.—**Secretary a.** Fr., *appareil sécrétoire*. Ger., *Secretionsapparat*. A general term for the organs of secretion (secreting glands).—**Segmental a.** The segmental organs; a general term for a collection of tubular structures in the embryo of every amniotic animal, constituting the rudiments of the kidneys and of certain portions of the generative organs. They comprise the pronephros, the mesonephros, and the metanephros. [A. Thomson (A, 5).]—**Seutin's a.** See **AMOVO-INAMOVIBLE**.—**Sexual a.** See **Generative a.**—**Sound-conducting a.** Ger., *schalleitender Apparat*. A term for those parts of the auditory a. which are concerned in the conduction of sound, comprising the auricle, external auditory canal, and the tympanum, with the Eustachian tube and mastoid cells. [Politzer (B, 232).]—**Sound-perceiving a.** Ger., *schallempfindender Apparat*. That portion of the auditory a. which is concerned with the perception of hearing, comprising the auditory nerve, with the nerve centre from which it springs and its peripheral expansion, or the organs of the labyrinth. [Politzer (B, 232).]—**Specific-gravity a.** See **SPECIFIC GRAVITY AND HYDROMETER**.—**Spectral a.** See **SPECTROSCOPE**.—**Spray a.** Fr., *appareil à vapeur*. Ger., *Dampfapparat*. It., *apparecchio di vapore*. Sp., *aparato de vapor*. See **ATOMIZER**.—**Sudoriparous a.** The sweat glands.—**Suspension a.** **Suspensory a.** Fr., *appareil de suspension*. Ger., *Suspensionsapparat*. It., *apparecchio a sospensione*. Sp., *aparato de suspensión*. 1. An a. for suspending a portion of the body, such as the head, the mammary gland, or a limb. Smith's s. a. (Smith's anterior splint) consists of a quadrangular frame of stout iron wire curved to fit the lower limb in a state of slight flexion at the knee, to be suspended by hooks and a cord to a longitudinal bar situated over the bed. [A, 389.] 2. A device employed by L. A. Sayre for suspending the entire person (partly by the head and partly by the axillæ) in order to straighten the spinal column during the application of an immovable cuirass. [A, 276.]—**Tactile a.** Fr., *appareil du toucher*. Ger., *Gefühlsapparat*. It., *apparecchio del tatto*. The terminations of the nerves of tactile sensation. [D, 76.]—**Tobold's a.** An illuminating a., consisting of a system of lenses inclosed in a tube, together with a movable reflector, for use with the laryngoscope.—**Urinary a.** Lat., *a. urinarius*. Fr., *appareil urinaire*. Ger., *Harnapparat*. The kidneys, ureters, bladder, and urethra. [L, 44.]—**Urogenital a.** See **Genito-urinary a.**—**Uropeletic a.** The kidneys.—**Velpeau's a.** See **Dextrin bandage**.—**Visual a.** Fr., *appareil de la vision*. Ger., *Schapparat*. It., *apparecchio della vista*. The eye and its appendages. [L, 44.]—**Vocal a.** Fr., *appareil vocal*. The larynx and its dependences. [Bichat (L, 41).]—**Volta-faradaic a.** An induction a. (q. v.) in which a galvanic current is made use of. [D, 76.]—**Vowel a.** A device for determining the over-tones of a vowel. Helmholtz's consists of a series of tuning-forks, vibrated by electric magnets, with a resonator that can be opened and closed at will in front of each. [L, 160.]—**Vulvo-vaginal secretory a.** Fr., *appareil sécréteur vulvo-vaginal*. A general term for the sudoriparous, sebaceous,

WALDENBURG'S PNEUMATIC APPARATUS.  
(AFTER KNAUTHIE.)

and muciparous glands of the vulva, together with the two vulvo-vaginal glands. [A, 15.]—**Waldenburg's a.** An a. for the inhalation of compressed or rarefied air, or for expiration into the same; consisting of two cylindrical jars, one inverted within the other, the latter being filled with water. Rarefaction is produced by the action of weights drawing the inner jar upward, and condensation by loading the same jar with other weights. [Knauthie (A, 319).]—**Worrenberg's a.** An a. for polarization by reflection. [L, 49.]

and muciparous glands of the vulva, together with the two vulvo-vaginal glands. [A, 15.]—**Waldenburg's a.** An a. for the inhalation of compressed or rarefied air, or for expiration into the same; consisting of two cylindrical jars, one inverted within the other, the latter being filled with water. Rarefaction is produced by the action of weights drawing the inner jar upward, and condensation by loading the same jar with other weights. [Knauthie (A, 319).]—**Worrenberg's a.** An a. for polarization by reflection. [L, 49.]

**APPAREIL** (Fr.), n.  $A^3p\text{-}pa^3r\text{-}e^2y'$ . See **APPARATUS**.—**A. à attelle**. See **A. ordinaire**.—**A. à dix-huit chefs**. See **Many-tailed bandage**.—**A. à indications continues**. See **Registering apparatus**.—**A. amidonné**. See **Starch bandage**.—**A. amovible**. See **AMOVO-INAMOVIBLE**.—**A. angulaire** [Piorry]. See **Digestive apparatus**.—**A. angichole** [Piorry]. The liver, gall-bladder, and biliary ducts. [L, 82.]—**A. angîème** [Piorry]. See **Circulatory apparatus**.—**A. angîémospène** [Piorry]. The vascular system of the spleen. [L, 82.]—**A. angiove** [Piorry]. The generative apparatus of the female. [L, 82.]—**A. angîure** [Piorry]. See **Urinary apparatus**.—**A. à pansement**. Appliances for surgical dressings. [D, 142.]—**A. à vapeur**. See **ATOMIZER**.—**A. brancard**. See **LITTER**.—**A. contentif**. See **Retentive apparatus**.—**A. de carton**. An immovable dressing made largely of pasteboard. [D, 93.]—**A's de formation**. Gall's term for those fibres in the brain which extend from the cerebral peduncles to the cortex. [K.]—**A. de la dépuration urinaire**. See **Urinary apparatus**.—**A. de pansement**. 1. See **A. à pansement**. 2. A dressing when applied. 3. The preparation and regular arrangement of articles of dressing to be used. [L, 87.]—**A. de réunion**. Gall's term for those fibres in the brain which extend from the cortex to the central portions. [K.]—**A. dextriné**. See **Dextrin bandage**.—**A. diapnogène** [Breschet]. See **Sudoriparous apparatus**.—**A. du toucher**. See **Tactile apparatus**.—**A. éclairateur**. An illuminating apparatus.—**A. élytro-ptérygoïdée**. An apparatus devised by Chassagny for dilating the cervix uteri. The process of distension causes wing-like attachments to diverge within the vagina, thus preventing the escape of the dilating portion from the cervical canal. [A, 15.]—**A. enregistreur**. See **Registering apparatus**.—**A. filamenteux**. See **Filamentous apparatus**.—**A. gazo-injecteur**. An apparatus for directing a stream of gas or vapor upon a surface or into a cavity of the body; consisting of a flask for generating the gas or vapor, and a flexible tube and nozzle. [Bernatzik (D, 18).] Cf. **Bonnafond's apparatus**.—**A. gommé**. A bandage stiffened with gum arabic. [D, 93.]—**A. hypoparathétique**. See **Suspension apparatus** (1st def.).—**A. latéral**. **A. latéralisé**. See **Lateral cystotomy**.—**A. névrothèle**. See **Neurothelic apparatus**.—**A. omnium**. An apparatus for continuous distillation and many other pharmaceutical processes; so called from the multiplicity of its uses. [L, 77.]—**A. ordinaire**. A collection of simple dressings, such as compresses, bandages, etc. [D, 93.]—**A. ouaté**. An immovable dressing underlain with cotton. [D, 93.]—**A. plâtre**. A plaster bandage or splint. [D, 93.]—**A. sensitif externe**. The organs of special sense. [L, 41.]—**A. sensitif interne**. The brain and spinal cord. [L, 41.]—**A. suspendu**. See **Suspension apparatus**.—**A. thermo-électrique**. See **Thermo-electric pile**.—**Grand a.** See **Median cystotomy**.—**Haut a.** See **Suprapubic cystotomy**.—**Petit a.** See **APPARATUS minor**.

**APPAREILLEMENT, APPAREIEMENT, APPARÉMENT** (Fr.), n's.  $A^3p\text{-}pa^3r\text{-}e^2y'\text{-}ma^3n^2$ ,  $\text{-}re\text{-}ma^3n^2$ . The selection of two animals, male and female, for breeding purposes, with a view to improving the stock. [A, 385; L, 41, 124.]

**APPARITION**, n.  $A^3p\text{-}pa^3r\text{-}i^2sh'u^3n$ . Lat., *apparitio* (from *apparere*, to appear). Fr., *apparition*. Ger., *Erscheinung*. It., *apparimento*. Sp., *aparición*. 1. A visual hallucination. 2. In physiology, the sudden aggregation into an element or corpuscle of principles previously present but scattered. [A, 385.]

**APPARITOR** (Lat.), n. m.  $A^3p(a^3p)\text{-}pa^3r(pa^3r)^2i^2o^2r$ . Gen., *apparitoris*. An artificial aid.—**A. auris**. One of the varieties of small coiled tubes to be worn in the external auditory meatus for the purpose of aiding the hearing. [F.]

**APPAT DE VASE** (Fr.), n.  $A^3p\text{-}pa^3d'va^2z$ . A popular name for the *Ammodytes tobianus*. [L, 105.]

**APPATRONNEMENT** (Fr.), n.  $A^3p\text{-}pa^3\text{-}tron\text{-}ma^3n^2$ . See **APPAREILLEMENT**.

**APPAUVRI** (Fr.), adj.  $A^3p\text{-}o\text{-}vre$ . 1. In botany, *depauperatus*, scanty in number. [B, 198.] 2. In pathology, impoverished, deficient in some of its essential constituents (said of the blood and other animal fluids). [A, 301.]

**APPAUVRISSEMENT** (Fr.), n.  $A^3p\text{-}po\text{-}vres\text{-}ma^3n^2$ . Impoverishment, deterioration. [A, 385.]

**APPEL** (Malay), n. An East Indian name for the *Premna integrifolia*. [B, 172; L, 105.]

**APPELDOREN** (Ger.), n.  $A^3p\text{-}pe^2l\text{-}do^2re^2n$ . The maple-tree. [L, 46.]

**APPENDAGE**, n.  $A^3p\text{-}pe^2nd'aj$ . Gr., *προσθήκη*. Lat., *appendix* (from *appendere*, to hang to). Fr., *appendice*. Ger., *Anhang*. It., *appendice*. Sp., *apéndice*. A dependent, supplementary, or accessory structure; in zoology, any symmetrical part joined to the side of the trunk; in botany, any part attached to an organ as an addition to the usual structure of the latter. [A, 312, 322, 345, 385.]—**Auricular a.** Lat., *appendix auriculæ* (seu *auricularis*). Fr., *appendice auriculaire*, *oreillette*. Ger., *Herzohr* (1st def.). *Anhang des Aurikels*. It., *appendice auricolare*. Sp., *appendice auricular*. 1. A projecting portion of the auricle of the heart. That of the right auricle is a small conical pouch, with dentate margins, projecting forward and to the left, overlapping the root of the pulmonary artery; that of the left auricle is somewhat constricted at its junction with the sinus, its margins are deeply dentate, and it projects forward and to the right from the left side of the atrium,

resting on the root of the pulmonary artery. [C; L.] 2. Virchow's term for an isolated portion of cartilage in front of the tragus or beneath the external ear in the form of a round or elongated prominence. [F, 32.]—**Basilar a's.** Fr., *appendices basillaires* (ou *soyes*). Little bands sometimes found at the lower part of the loculi of an anther. [A, 345.]—**Cecal a.** Fr., *appendice cæcal*. See **APPENDIX CÆCI**.—**Caudal a.** Fr., *appendice caudal*. A tail, or a prolongation of the vertebral column in the form of a tail. [L, 41.]—**Cutaneous a's.** **Dermal a's.** The nails and hair, also other analogous structures in the lower animals.—**Diverging a's.** The parts which diverge from the axis of the body, for the purpose of supporting the latter, and, when modified, become arms, legs, wings, etc. [L, 14.]—**Epiploic a's.** See **APPENDICES EPIPLICA** (under **APPENDIX**).—**Fœtal a's.** Fr., *annexes fœtales*. Ger., *Anhänge des Fötus*. The placenta, umbilical cord, chorion, and amnion.—**Heo-cæcal a.** Fr., *appendice iléo-cæcal*. See **APPENDIX CÆCI**.—**Natatorial a's.** A's suitable for swimming. [B, 100.]—**Pyloric a.** See **PYLOIC GLAND**.—**Pituitary a.** See **PITUITARY BODY**.—**Pyloric a's.** See **APPENDICULÆ PYLORICÆ**.—**Uterine a's.** Lat., *annexa* (seu *adnexa*) *uteri*. Fr., *annexes de la matrice*. Ger., *Anhänge der Gebärmutter*. It., *appendici dell' utero*. Sp., *apéndices* (ó *anejos*) *del útero*. The ovaries and oviducts.—**Vermicular a.** **Vermiform a.** Lat., *appendix vermiformis*. Fr., *appendice vermiculaire* (ou *vermiforme*). Ger., *Wurmanhang*. See **APPENDIX CÆCI**.

**APPENDENS** (Lat.), adj. A<sup>2</sup>p(a<sup>3</sup>p)-pe<sup>2</sup>nd'e<sup>2</sup>nz(e<sup>2</sup>ns). Fr., *appendant*. Having the hilum below the top, but not below the middle (said of seeds). [Mirbel (A, 345).]

**APPENDICE** (Fr.), n. A<sup>3</sup>p-pa<sup>3</sup>n<sup>2</sup>-des. See **APPENDAGE**.—**A. auriculaire.** See **Auricular APPENDAGE**.—**A. auriculaire du vermis latéral.** A convoluted lateral mass figured by Leuret and Gratiolet as situated on the lower surface of the cerebellum in apes. [L, 35.]—**A's basillaires.** See **Basilar APPENDAGES**.—**A. cæcal.** See **APPENDIX CÆCI**.—**A. caudal.** See **Caudal APPENDAGE**.—**A. collectifère.** In botany, the extremity of the branches of the style, in the *Compositæ*, when the former bears collectors only, the stigma not being prolonged upon it. [Cassini (A, 345).]—**A. conoïdal.** See **Auricular APPENDAGE**.—**A. digital.** See **APPENDIX CÆCI**.—**A's épiploïques.** See **APPENDICES EPIPLICA** (under **APPENDIX**).—**A. funiculaire.** See **APPENDIX FUNICULARIS**.—**A. iléo-cæcal.** See **APPENDIX CÆCI**.—**A. lobulaire antérieur.** See **APPENDIX LOBULARIS ANTERIOR**.—**A. naso-buccal.** See **PROBOSCIS**.—**A's prostatiques.** Small crypts or accessory glands found in the walls of the seminal reservoirs in certain fishes. [L, 158.]—**A's pyloriques.** See **APPENDICULÆ PYLORICÆ**.—**A. rostral.** See **PROBOSCIS**.—**A. sous-sternal.** **A. sternal.** See **XIPHOID CARTILAGE**.—**A. supérieur.** See **Superior vermiform PROCESS**.—**A. sus-sphénoïdal du cerveau.** See **PITUITARY BODY**.—**A. terminal.** See **APPENDIX TERMINALIS**.—**A. vermiculaire.** See **APPENDIX CÆCI**.—**A. vermiculaire supérieur.** See **Superior vermiform PROCESS**.—**A. vermiforme.** See **APPENDIX CÆCI**.—**A. vermiforme supérieur.** See **Superior vermiform PROCESS**.—**A. xiphoïde.** The xiphoid cartilage.

**APPENDICÉ** (Fr.), adj. A<sup>3</sup>p-pa<sup>3</sup>n<sup>2</sup>-de-sa. Provided with an appendage or appendages. [L, 41.]

**APPENDICIFORM**, adj. A<sup>2</sup>p-pe<sup>2</sup>nd-i<sup>2</sup>s'i<sup>2</sup>-fo<sup>2</sup>rm. Lat., *appendiciformis* (from *appendix* [q. v.], and *forma*, form). Fr., *appendiciforme*. Ger., *anhangförmig*. Sp., *appendiciforme*. Having the form of an appendage. [L, 41.]

**APPENDICITIS** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-pe<sup>2</sup>nd-i<sup>2</sup>-si(ke)'ti<sup>2</sup>s. Gen., *appendicitidis*. For deriv., see **APPENDIX** and *-itis*\*. Inflammation of the appendix cæci. [Weir, "N. Y. Med. Jour.," Jan. 15, 1887, p. 79.]

**APPENDICLE**, n. A<sup>2</sup>p-pe<sup>2</sup>nd-i<sup>2</sup>k'l. See **APPENDICULA**.

**APPENDICULA** (Lat.), n. f. dim. of *appendix* (q. v.). A<sup>2</sup>p-(a<sup>3</sup>p)-pe<sup>2</sup>nd-i<sup>2</sup>k'u<sup>2</sup>(u)-la<sup>3</sup>. Fr., *appendicule*. Ger., *Anhängselchen*. Sp., *apéndiculo*. A small appendage; in botany, an appendix or small appendix. [B, 41, 98; L, 41.] 2. In ferns, the fruit-bearing tip of the frond, which by the folding in of its edges forms the indusium for the sori. [B, 198.] 3. A tooth-like process upon the lower part of the pileus in *Hydnei*. [B, 121.]—**A. cæci.** **A. cæci vermiformis.** See **APPENDIX CÆCI**.—**A. cerebri.** See **PITUITARY BODY**.—**Appendiculæ epiploicæ.** **Appendiculæ pinguedinosæ.** See **APPENDICES EPIPLICA** (under **APPENDIX**).—**Appendiculæ farinifère** [Kaulf]. The polysporous sporangia of the *Rhizocarpe*. [B, 198.]—**Appendiculæ pyloricæ.** Fr., *appendices pyloriques*. Small diverticula of the small intestine, near the stomach, in many fishes, which resemble Lieberkühn's glands and secrete digestive fluids. [L, 158.]—**A. vermiformis.** See **APPENDIX CÆCI**.

**APPENDICULAR**, adj. A<sup>2</sup>p-pe<sup>2</sup>nd-i<sup>2</sup>k'u<sup>2</sup>-la<sup>3</sup>r. Lat., *appendicularis*. Fr., *appendiculaire*. Pertaining to or of the nature of an appendage; in zoology and embryology, pertaining to the limbs as distinguished from the head and trunk; in botany, applied to organs which are attached to the axile organs and which have not in their turn other organs attached to them. [B, 121.]

**APPENDICULARIA** (Lat.), n. n. pl. A<sup>2</sup>p(a<sup>3</sup>p)-pe<sup>2</sup>nd-i<sup>2</sup>k-u<sup>2</sup>(u)-la(la<sup>3</sup>)'ri<sup>2</sup>-a<sup>3</sup>. A genus of the *Tunicata*, constituting by itself the order *Ascidia larvalia*. [B, 28.]

**APPENDICULATE**, adj. A<sup>2</sup>p-pe<sup>2</sup>nd-i<sup>2</sup>k'u<sup>2</sup>-lat. Lat., *appendiculatus*. Fr., *appendiculé*. Ger., *mit Anhängselchen versehen*. Sp., *apéndiculado*. Furnished with one or more appendages or projecting accessory parts. [B, 121, 198.]

**APPENDICULUM** (Lat.), n. n. A<sup>2</sup>p(a<sup>3</sup>p)-pe<sup>2</sup>nd-i<sup>2</sup>k'u<sup>2</sup>(u)-lu<sup>3</sup>m-(lu<sup>4</sup>m). See **APPENDICULA**.

**APPENDICULUS** (Lat.), n. A<sup>2</sup>p(a<sup>3</sup>p)-pe<sup>2</sup>nd-i<sup>2</sup>k'u<sup>2</sup>(u)-lu<sup>3</sup>s(lu<sup>4</sup>s). Dim. of *Appendix*. Fr., *appendicule*. 1. In ferns, a nerve which enters the interior of an areola and there stops without coming into contact with the opposite side of the latter. 2. A name given

by Léveillé to one of the simple or branched filaments found at the base of the conceptacle in *Erysiphe*. [B, 121.]

**APPENDIGASTER** (Lat.), adj. A<sup>2</sup>p(a<sup>3</sup>p)-pe<sup>2</sup>nd'i<sup>2</sup>-ga<sup>2</sup>st-(ga<sup>2</sup>st)'u<sup>2</sup>r(e<sup>2</sup>r). From *appendix* (q. v.), and *gastron*, the belly. Fr., *appendigastre*. Ger., *anhangbauchig*. Having a long, slender pedicle attached to the abdomen or corselet. [L, 116.]

**APPENDIX** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-pe<sup>2</sup>nd'i<sup>2</sup>x. Gen., *append'icis*. 1. An appendage (q. v.); an accessory or salient part of an organ; also an appendicular organ. 2. An ancient name for a thorny shrub supposed to have been the barberry (*Berberis vulgaris*) or the hawthorn (*Crataegus oxyacantha*), or, as used by Pliny (in the pl., *appendices*), the berries of those plants. [A, 312; B, 121, 134.]—**Anterior a. of the hyoid bone.** A prolongation of the body of the bone, in solipeds, contained within the muscular tissue of the tongue. [L, 13.]—**A. ad cerebrum.** The pituitary body. [I, 3.]—**Appendices allantoidis.** See **DIVERTICULA ALLANTOIDIS**.—**A. auriculæ.** **A. auricularis.** See **Auricular APPENDAGE**.—**A. bombycina.** See **Vermiform PROCESS**.—**A. cæci.** **A. cæci vermiformis.** Fr., *appendice cæcal* (ou *iléo-cæcal*, ou *vermiforme*, ou *vermiculaire*). Ger., *wurmförmiger Anhang des Blinddarms*. It., *appendice iléo-cæcale* (o *vermiforme*, o *vermiculare*). Sp., *apéndice cecal* (o *vermicular*). The vermiform a. (or appendage) of the cæcum; a slender cylindrical diverticulum, from 1

THE ABDOMINAL VISCERA, SHOWING THE APPENDIX CÆCI. (AFTER SAPPÉY [A, 440].)

1, anterior surface of the liver; 2, gall-bladder; 3, 3, section of the diaphragm; 4, posterior surface of the stomach; 5, lobus Spigelii of the liver; 6, coeliac axis; 7, coronary artery of the stomach; 8, splenic artery; 9, spleen; 10, pancreas; 11, superior mesenteric vessels; 12, duodenum; 13, upper extremity of the small intestine; 14, lower end of the ileum; 15, 15, mesentery; 16, cæcum; 17, appendix vermiformis; 18, ascending colon; 19, 19, transverse colon; 20, descending colon; 21, sigmoid flexure of the colon; 22, rectum; 23, urinary bladder.

to 5 inches long and  $\frac{1}{2}$  in. thick in the human subject, springing from the inner and posterior part of the cæcum at its lower portion, below and a little behind the opening of the ileum. Its opening of communication with the cæcum is sometimes guarded by a valve-like fold of mucous membrane. It is sometimes free for its whole length, and sometimes provided with a short fold of mesentery in a portion of its extent. Its coats are very thick, the muscular coat consisting of longitudinal fibres only, and the mucous membrane being provided with tubules and numerous closed follicles. It generally contains a quantity of clear, thick mucus, and foreign substances sometimes find their way into it, giving rise to inflammation and sometimes to ulcerative perforation followed by peritonitis. Its function is unknown. [A, 440: C.]—**A. cerebri.** The pituitary body. [I, 3.]—**Appendices coli adiposæ.** See **APPENDICES EPIPLICA**.—**A. copulatoria.** A prolongation of the epidermis of the *Tricocephalus dispar*, through which the penis passes, and which enters the vagina of the female during copula-

tion and retains the two together. [L. 16.]—*A. cutanea septi narium*. Ger., *Hautanhang der Nasenscheidewand*. Syn.: *statica septi narium*. The cutaneous edge of the septum narium. [A. 322.]—*A. ensiformis*. See *Xiphoid cartilage*.—*A. epididymidis*. See *Vas aberrans*.—*Appendices epiploicae*. Fr., *appendices épiploïques*. Ger., *Fettanhänge des Dickdarms*. It., *appendici epiploiche*. Certain small fringe-like projections of the serous coat of the colon and the upper part of the rectum containing fat and resembling the omentum. [A. 301; C.; L. 142.]—*Appendices fallopiæ*. See *Appendices epiploicae*.—*A. funicularis*. Fr., *appendice funiculaire*. Ger., *Anhängsel vom Nabelstrang herührend*. That portion of an ovule of a plant to which the funiculus is attached. It is spongy or indurated and differs in color from the rest of the embryo. Also called *epiphysis*, *strophium*, *caruncula*, *spongiola seminis*, etc. [B. 198.]—*A. funicularis adnata*. The *a. funicularis* when it is attached to the rest of the embryo by its entire length. [B. 198.]—*A. funicularis libera*. The *a. funicularis* when it is attached by one extremity only to the rest of the embryo. [B. 198.]—*A. glandule pituitarie*. The anterior lobe of the pituitary body. [I. 3.]—*A. glandule thyroideæ*. See *Pyramid of the thyroïd gland*.—*A. inferior ligamenti cruciati epistrophei*. See *Crus inferius ligamenti cruciati epistrophei*.—*A. lobularis* [Chaussier].—*A. lobularis anterior*. See *Folliculus*.—*Appendices musculose diaphragmatis*. The pillars of the diaphragm. [L.

THE OPENING OF THE APPENDIX CÆCI.  
(AFTER LE BON [A. 440].)

1, small intestine; 2, ileo-cæcal valve; 3, cæcum; 4, opening of the appendix vermiformis; 5, mucous fold at the opening of the appendix; 6, large intestine; 7, folds of the mucous membrane.

44.]—*A. of the epididymis*. See *Vas aberrans*.—*Appendices omentales*, *Appendices pinguedinosæ*. See *Appendices epiploicae*.—*Appendices pyloricae*. See *Appendiculae pyloricae*.—*A. seminis*. See *A. funicularis*.—*A. superior anterior ligamenti cruciati epistrophei*. See *Crus superius ligamenti cruciati epistrophei*.—*A. superior ligamenti transversi*. A small band of the ligamentum latum epistrophei which is attached to the upper part of the ligamentum transversum. [L. 31.]—*A. superior posterior ligamenti transversi*. See *A. superior ligamenti transversi*.—*A. suprasphenoidalis* [Chaussier]. The pituitary body. [I. 3.]—*A. terminalis* [Cassini]. Fr., *appendice terminal*. Ger., *Anhängsel der Spitze*. An appendix at the apex of the anther, especially one consisting of the connective produced beyond the apex of the anther. [B. 198.]—*A. ventriculi*. 1. The pituitary body. [I. 3.] 2. The duodenum. [L.]—*A. vermicularis*, *A. vermiformis*. See *A. cæci*.—*A. vesicæ*. A hernia-like protrusion of the mucous membrane of the bladder between the fibres of its muscular coat, constituting sacculation (*q. v.*). [L. 142.]—*Auricular a.* See *Auricular appendage*.—*Ensiform a.* The xiphoid cartilage.—*Vermiform a.* See *A. cæci*.—*Xiphoid a.* The xiphoid cartilage.

**APPENSIO** (Lat.), n. f. *A<sup>2</sup>p(a<sup>3</sup>p)-pe<sup>2</sup>n'si<sup>2</sup>-o*. Gen., *appensio'nis*. See *ANALEPSIS* (3d def.).

**APPENSUS** (Lat.), adj. *A<sup>2</sup>p(a<sup>3</sup>p)-pe<sup>2</sup>ns'u<sup>3</sup>s(u<sup>4</sup>s)*. From *appendere*, to hang up. 1. See *APPENDENS*. 2. Hung upon the person like amulets (*appensa*). [L. 119.]

**APPENZELL** (Ger.), n. *A<sup>2</sup>p(pe<sup>2</sup>n)-tze<sup>2</sup>*. A Swiss town near which there is a cold carbonated magnesium spring, the water of which is used for atonic dyspepsia, also a whey-cure establishment. [A. 385; L. 49, 63.]

**APPERCEPTION**, n. *A<sup>2</sup>p-pu<sup>2</sup>r-se<sup>2</sup>p'shu<sup>3</sup>n*. From *ad*, to the last degree, and *percipere*, to perceive. Fr., *aperception* [Leibnitz]. Ger., *Apperception*, *Wahrnehmung der Wahrnehmung*. 1. As used by Leibnitz, the conscious reception of sensory impressions, as distinguished from perception in general, which might be either conscious or unconscious. The conscious perception of a color, for example, represents, according to Leibnitz, the sum of a number of lesser perceptions, no one of which would by itself be capable of affecting the consciousness. [B. 235.] 2. The faculty of appreciative perception (nearly equivalent to thought) as opposed to mere sensory perception. [Kant, quoted by J. Ross, "Med. Chron.," Jan., 1886, p. 253.]

**APPERCEPTIVE**, adj. *A<sup>2</sup>p-pu<sup>2</sup>r-se<sup>2</sup>p'ti<sup>2</sup>v*. Fr., *apperceptif*. Ger., *appercepiend*. Pertaining to apperception. [A. 304; J. Ross, "Med. Chron.," Jan., 1886, p. 265.]

**APPETENCE**, **APPETENCY**, n's. *A<sup>2</sup>p(pe<sup>2</sup>t-e<sup>2</sup>ns, -e<sup>2</sup>ns-i<sup>2</sup>*. Lat., *appetentia* (from *appetere*, to long for). Fr., *appétence*. Ger., *Appetenz*, *Naturtrieb*. It., *appetenzza*. Sp., *apetencia*. See *APPETITE*.

**APPÉTABLE**, **APPÉTISANT** (Fr.), adj's. *A<sup>3</sup>p-pa-tebl, -teza<sup>2</sup>n<sup>2</sup>*. See *APPETIZING*.

**APPÉTIT** (Fr.), n. *A<sup>3</sup>p-pa-te*. 1. See *APPETITE*. 2. The *Allium schoenoprasum* in the Middle Ages, also *A. ascalonium*. [B. 121, 173.]—*A. besoin*. Appetite or hunger caused by actual want of

food. [Fonssagrives (L. 87).]—*A. bizarre*, *A. dépravé*. See *Pica*.—*A. désiré*. A desire to eat simply for the pleasure of doing so. [Fonssagrives (L. 87).]—*A. d'habitude*. A desire to eat coming on at certain hours because the person has been in the habit of eating at those hours. [Fonssagrives (L. 87).]

**APPETITE**, n. *A<sup>2</sup>p-pe<sup>2</sup>t-it*. Gr., *ὀρεξις* (from *ὀρέεω*, to long for). Lat., *appetitus*. Fr., *appétit*. Ger., *Appetit*. It., *appetito*. Sp., *apetito*. 1. A desire or disposition to do anything which is attended with a physical sensation of pleasure; as commonly understood, the desire to eat or drink. 2. In chemistry, affinity. [L. 73.]—*Canine a.* See *CYNOREXIS*.—*Depraved a.* See *Pica*.—*Sexual a.*, *Veneral a.* Desire for sexual intercourse. [A. 385.]

**APPETITION**, n. *A<sup>2</sup>p-pe<sup>2</sup>t-i<sup>2</sup>sh'u<sup>3</sup>n*. See *APPETITE*.

**APPETITIVE**, adj. *A<sup>2</sup>p-pe<sup>2</sup>t-i<sup>2</sup>t-i<sup>2</sup>v, a<sup>2</sup>p-pe<sup>2</sup>t-i<sup>2</sup>t-i<sup>2</sup>v*. Fr., *appétitif*. Pertaining to an appetite. [A. 306.]

**APPETITLICH** (Ger.), adj. *A<sup>3</sup>p-pe<sup>2</sup>t-et'i<sup>2</sup>ch<sup>2</sup>*. See *APPETIZING*.

**APPETITUS** (Lat.), n. m. *A<sup>2</sup>p(a<sup>3</sup>p)-pe<sup>2</sup>t-i<sup>2</sup>(o')tu<sup>3</sup>s(tu<sup>4</sup>s)*. Gen., *appetit'us*. See *APPETITE*.—*A. amissio*. See *CYNOREXIA*.—*A. caninus*. See *CYNOREXIS*.—*A. carentia*, *A. deficiens*, *A. deperditio*. See *ANOREXIA*.—*A. depravatus*, *A. erroneus*. See *Pica*.

**APPETIZER**, n. *A<sup>2</sup>p-pe<sup>2</sup>t-i-zu<sup>2</sup>r*. An excitant of the appetite. [L. 56.]

**APPETIZING**, adj. *A<sup>2</sup>p-pe<sup>2</sup>t-i-z'i<sup>2</sup>ng*. Fr., *appétissant*. Ger., *appetitlich*. Tempting to the appetite (said of articles of food).

**APPLANATE** (Lat.), n. f. pl. *A<sup>2</sup>p(a<sup>3</sup>p)-pla<sup>2</sup>n(pla<sup>3</sup>n)-a(a<sup>3</sup>)te-(ta<sup>3</sup>-e<sup>2</sup>)*. A section of the genus *Tremella*, including species with flat receptacle. These species are now referred to *Exidia*. [B. 121.]

**APPLANATIO** (Lat.), n. f. *A<sup>2</sup>p(a<sup>3</sup>p)-pla<sup>2</sup>n(pla<sup>3</sup>n)-a(a<sup>3</sup>)shi<sup>2</sup>-(ti<sup>2</sup>-o)*. Gen., *applanatio'nis*. Fr., *aplatissement*, *aplatissement*. Ger., *Applattung*, *Flachwerden*. A flattening (as of the cornea after supuration or in the course of phthisis bulbi). [F.]

**APPLANATUS** (Lat.), adj. *A<sup>2</sup>p(a<sup>3</sup>p)-pla<sup>2</sup>n(pla<sup>3</sup>n)-a(a<sup>3</sup>)tu<sup>3</sup>s-(tu<sup>4</sup>s)*. Fr., *aplati*. Flattened on the anterior aspect. [B. 121.]

**APPLE**, n. *A<sup>2</sup>p-pl*. A-S., *æppel*, *æpl*. Perhaps from Sanscr., *ap*, water, and *p'halā*, fruit. [Prior (B. 7).] Gr., *ἄπλον*. Lat., *malum*, *pomum*. Fr., *pomme*. Ger., *Apfel*. It., *pomo*, *mela*. Sp., *manzana*. The fruit of the *Pyrus malus*, also any large fleshy fruit. [L. 108.]—*Acid of a's*. See *MALIC ACID*.—*Adam's a.* See the major list, also *POMUM ADAMI* and *CITRUS LIMETTA*.—*Alligator a.* The fruit of *Anona palustris* (*q. v.*). [B. 19.]—*Amorous a.* See *Love-a.*—*A. berry*. The *Billardiera*. [B. 19.]—*A. brandy*. See *A. jack*.—*A. essence*. A flavoring preparation consisting of 1 part of amyl valerianate and 6 or 8 parts of alcohol. [A. 308.]—*A. eye*. See *EXOPHTHALMIA*.—*A. hawk*. The *Cratogeomys aestivalis*. [B. 34.]—*A. jack*. Ger., *Apfelbranntwein*. A spirituous liquor made by distilling cider.—*A. of Peru*. 1. The genus *Nicandra*. [B. 34.] 2. The fruit of *Nicandra physaloides*. [B. 19.] 3. The *Datura stramonium*. [L. 105.]—*A. of Sodom*. 1. The *Calotropis gigantea*. 2. The gall of the *Quercus infectoria*. Cf. *Dead-Sea a.* 3. The *Solanum sodomium*. [B. 19.] 4. The *Solanum mammosum*. [B. 34.]—*A. of the eye*. Ger., *Augapfel*. The globe of the eye, also the pupil.—*A. oil*. See *AMYL VALERIANATE*.—*A. poultice*. See *Cataplasma pomi redolentis*.—*A. tree*. Fr., *poimier*. Ger., *Apfelbaum*. 1. The *Pyrus malus* and its varieties. 2. In Australia and New South Wales, a name given to several species of *Angophora* and to the *Eucalyptus Stuartiana*. [B. 19.]—*A. whisky*. See *A. jack*.—*A. worts*. See the major list.—*Argyle a.* The *Eucalyptus pulverulenta*. [B. 19.]—*Armenian a.* See *APRICOT*.—*Balsam a.* The fruit of *Momordica balsamina*. [B. 19.]—*Beef-a.* The *Sapota rugosa*. [B. 19.]—*Bitter a.* The fruit of colocynth. [L.]—*Brush-a.* The *Achras australis*. [B. 19.]—*Carthaginian a.* The pomegranate (*Punica granatum*). [B. 19.]—*Cherry-a.* The *Pyrus baccata*. [B. 19.]—*Crab-a.* See *PYRUS coronaria* and *Siberian crab-a.*—*Curassoa a's*. See *Fructus auranti immaturi*.—*Custard-a.* See *ANONA squamosa* and *ASIMINA triloba*.—*Dead-Sea a's*. Bussorah galls; the galls of *Quercus infectoria*. [B. 19; L.]—*Devil's a.* The fruit of *Mandragora officinalis*. [B. 19.]—*Egg-a.* The fruit of the egg-plant (*Solanum esculentum*). [B. 19.]—*Elephant a.* The fruit of *Feronia elephantum*. [B. 19.]—*Jew's a.* See *Egg-a.*—*Kan a.* See *ABERIA kaffra*.—*Kangaroo-a.* The fruit of *Solanum laciniatum*. [B. 19.]—*Kei a.*, *Kei a. of the Cape*. See *ABERIA kaffra*.—*Love-a.* The tomato (the fruit of *Lycopersicum esculentum*). [B. 19; L. 120.]—*Mada a.* 1. The fruit of the egg-plant (*Solanum esculentum*). [B. 19.] 2. The Bussorah gall (the gall of *Quercus infectoria*). [L.]—*Malay a.* The *Eugenia malaccensis*. [B. 19.]—*Mammec a.* The fruit of *Mammec americana*. [B. 19.] Cf. *ACHRAS*.—*Mandrake a.* The fruit of *Mandragora officinalis*. [B. 19.]—*May a.* 1. The *Podophyllum peltatum*. 2. The *Passiflora incarnata*. [B. 19.]—*Median a.* The *Citrus medica*. [B. 19.]—*Mess a.* The *Karstenia quinqueraria*. [B. 19.]—*Monkey-a.* 1. A West Indian name for the *Anona palustris*. 2. A Sierra Leone name for the *Anisophyllea laurina*. 3. The *Citrus flava*. [B. 19.]—*Moor's a.* The tomato (*Lycopersicum esculentum*). [B. 19.]—*Oak-a.* See *GALL*.—*Otaheite a.* The fruit of *Spondias dulcis*. [B. 19.]—*Perisan a.* An old name for the peach (*Malus persica*). [B. 19.]—*Pine-a.* 1. An old name for the pine-cone (the cone of *Pinus silvestris*). [B. 19.] 2. See *ANANAS sativus*.—*Prarie-a.* The *Psoralea esculenta*. [B. 19.]—*Rennet-a's*. See *POMA rennetia*.—*Rose-a.* A name given to various species of *Eugenia*. [B. 19.]—*Sage a.* The gall formed upon the *Salvia officinalis*. [B. 71.]—*Sea-a.* The *Manicaria Plukenetii*. [B. 19.]—*Siberian crab-a.* The *Pyrus prunifolia* and *P. baccata*. [B. 75.]—*Star-a.* The fruit of *Chrysophyllum cainito*. [B. 19.]—*Sugar-a.* The *Kollinia Sieberi* and the *Anona squamosa*. [B. 19.]—*Thorn-a.* The *Datura stramonium*. [B. 19.]—*STRAMONIUM*.—*Wild balsam-a.* The *Echinocystis lobata*. [B. 19.]—*Wild star-a.* The *Chrysophyllum*

*oliviforme*. [B, 19.]—**Wood-a**. The *Feronia elephantum*. [B, 19, 72.]

**APPLEWORTS**, n. pl. A<sup>2</sup>p/pl-wu<sup>2</sup>rts. A name for the botanical suborder *Pomaceæ*. [B, 19.]

**APPLICATA** (Lat.), n., n. pl. of adj. *applicatus*. A<sup>2</sup>p(a<sup>3</sup>p)-pli<sup>2</sup>-ka(ka<sup>3</sup>)/ta<sup>3</sup>. From *applicare*, to apply. 1. An old term for a class of causes of disease acting by contact with the surface of the body. [Boerhaave (L, 41).] 2. In hygiene, articles of clothing, cosmetics, etc., applied to the surface of the body. [L, 32.] 3. Dressings, remedies, etc., applied to the body. [A, 385.]

**APPLICATE**, adj. A<sup>2</sup>p/pli<sup>2</sup>-at. Lat., *applicatus*. Fr., *appliqué*. Ger., *angelegt*. See **APRESSED**.

**APPLICATIF** (Fr.), adj. A<sup>3</sup>p-ple-ka<sup>3</sup>t-ef. See **APRESSED**.

**APPLICATION**, n. A<sup>2</sup>p-pli<sup>2</sup>-ka<sup>3</sup>/shu<sup>3</sup>n. Gr., *ἐπιθεσις* (1st def.), *ἐπιθημα* (2d def.). Lat., *applicatio* (1st def.), *applicatum* (2d def.). Fr., *application*. Ger., *Anwendung* (1st def.), *Angelegte* (2d def.). It., *applicazione*. Sp., *aplicación*. 1. The act of applying anything (such as a forceps, a leech, a plaster, etc.). 2. Anything applied (said of surgical dressings and of remedies used externally or applied to a particular part). 3. In botany, the state of being applied or appressed. [B.]

**APPLICATIVUS** (Lat.), adj. A<sup>2</sup>p(a<sup>3</sup>p)-pli<sup>2</sup>-ka<sup>3</sup>-ti(te)/vu<sup>3</sup>s(wu<sup>4</sup>s). Fr., *applicatif*. Ger., *aneinander gefügt*. In botany, appressed. [B, 1.]

**APPLICATOR** (Lat.), n. m. A<sup>2</sup>p(a<sup>3</sup>p)-pli<sup>2</sup>-ka(ka<sup>3</sup>)/to<sup>2</sup>r. Gen., *applicato<sup>2</sup>ris*. Fr., *porte-ovate*. An instrument for applying remedies to a particular part, such as the uterine canal or the urethra; either a flexible shaft on which cotton imbued with the medicament is wrapped, or a tube to contain the medicament with a piston for expelling it.

**APPLICATUM** (Lat.), n., n. of adj. *applicatus*. A<sup>2</sup>p(a<sup>3</sup>p)-pli<sup>2</sup>-ka<sup>3</sup>/tu<sup>3</sup>m(tu<sup>4</sup>m). See pl., **APPLICATA**.

**APPLICATUS** (Lat.), adj. A<sup>2</sup>p(a<sup>3</sup>p)-pli<sup>2</sup>-ka<sup>3</sup>-a(a<sup>3</sup>)/tu<sup>3</sup>s(tu<sup>4</sup>s). From *applicare*, to apply. Fr., *appliqué*. Ger., *aneinander gelehnt*. Applied; in botany, appressed (q. v.). [B.]

**APPLIED**, adj. A<sup>2</sup>p-plid'. See **APRESSED**.

**APPOSED, APPPOSITE**, adj's. A<sup>2</sup>p-pozd', a<sup>2</sup>p-po-zi<sup>2</sup>t. Lat., *appositus* (from *appone*, to place by the side of). Fr., *apposé*. Ger., *nebeneinander stehend*. In botany, placed near to; in a reciprocal sense, placed near together. [B, 123.]

**APPOSITION**, n. A<sup>2</sup>p-po-zi<sup>2</sup>sh'u<sup>3</sup>n. Gr., *πρόσθεσις*. Lat., *appositio*. Fr., *apposition*. Ger., *Anlagerung*. It., *apposizione*. Sp., *apósición*. 1. An addition of parts. [Hippocrates (L, 53).] See **PHOSTHESIS**. 2. The act of bringing the lips of a wound or the fragments of a broken bone into their proper relations; also the state of their being in such relations. 3. Growth by accretion (said of crystals, of plants, of the animal embryo, of the formation of bone from the periosteum, etc.). [A, 300, 385; L, 49.] See also **A. THEORY**.

**APPOSITIONAL**, adj. A<sup>2</sup>p-po-zi<sup>2</sup>sh'u<sup>3</sup>n-a<sup>2</sup>l. Pertaining to apposition (q. v.).

**APPOSITORIUM** (Lat.), n. n. A<sup>2</sup>p(a<sup>3</sup>p)-po<sup>2</sup>z(po<sup>2</sup>s)-i<sup>2</sup>t-o<sup>2</sup>ri<sup>2</sup>-u<sup>3</sup>m(u<sup>4</sup>m). See **ADAPTER**.

**APPOSITUS** (Lat.), adj. A<sup>2</sup>p(a<sup>3</sup>p)-po<sup>2</sup>z(po<sup>2</sup>s)/i<sup>2</sup>t-u<sup>3</sup>s(u<sup>4</sup>s). See **APPOSED**.

**APPREHENSIO** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-pre<sup>2</sup>-he<sup>2</sup>n'shi<sup>2</sup>(si<sup>2</sup>)-o. Gen., *apprehensio<sup>2</sup>nis*. From *apprehendere*, to seize upon. 1. See **ANALEPSIS** (2d def.). 2. An old term for catalepsy. [P. Zacchias (L, 53).]

**APPRELLE** (Fr.), n. A<sup>3</sup>p-pre<sup>2</sup>l. The *Equisetum arvense*. [L, 105.]

**APRESSED**, adj. A<sup>2</sup>p-pre<sup>2</sup>st'. Lat., *appressus* (from *apprimere*, to press to). Fr., *apprimé, appressé, appliqué*. Ger., *angedrückt*. Also written *adpressed*. In botany, touching, or having the surface closely applied to something, but without adherence or connection. [B, 19.]

**APPRIMÉ** (Fr.), adj. A<sup>3</sup>p-pre<sup>2</sup>-ma. See **APRESSED**.

**APPROCHE** (Fr.), n. A<sup>3</sup>p-prosh. Sexual intercourse. [L, 111.]

**APPROCHÉ** (Fr.), adj. A<sup>3</sup>p-pro-sha. Approximated. [B.]

**APPROPRIATION**, n. A<sup>2</sup>p-pro<sup>2</sup>/pri<sup>2</sup>-a<sup>3</sup>/shu<sup>3</sup>n. Lat., *appropriatio*. 1. In chemistry, the union or combination of two substances. [L, 46.] 2. The act or process by which an organism or any part of an organism seizes upon foreign material (nutritive or medicinal) and incorporates it with itself. [A, 325; K.] See **ASSIMILATION**.

**APPROXIMATE, APPROXIMATED**, adj's. A<sup>2</sup>p-pro<sup>2</sup>x'-i<sup>2</sup>m-at, -at-e<sup>2</sup>d. Lat., *approximatus* (from *approximare*, to approach). Fr., *approché*. Ger., *gendhert*. 1. Placed close together (said of the teeth). [L, 108.] 2. In botany, brought near; in a reciprocal sense, brought near together. [B, 198.]

**APPROXIMATIO** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-pro<sup>2</sup>x'/i<sup>2</sup>-ma(ma<sup>3</sup>)/sh<sup>2</sup>(ti<sup>2</sup>)-o. Gen., *approximatio<sup>2</sup>nis*. Fr., *approchement*. Ger., *Annäherung*. It., *approssimazione*. Sp., *aproximación*. An approximation; according to Ettmüller, a pretended method of ridding a person of a disease by causing the latter to seize upon another organism, animal or vegetable, brought into contact with him for that purpose. [L, 32, 53.]

**APPUI** (Fr.), n. A<sup>3</sup>p-pwe. 1. A fulcrum, a support. 2. The point of insertion of a muscle. [A, 385.]

**APPUYÉ** (Fr.), n. A<sup>3</sup>p-pwe-a. In botany, supported, *suffultus*. [B, 198.]

**APIACTA** (Lat.), n., n. pl. of adj. *apractus*. A<sup>2</sup>p(a<sup>3</sup>p)-ra<sup>2</sup>-k(rak<sup>3</sup>)/ta<sup>3</sup>. Gr., *ἀπακτα* (from *ἀπακτείνω*, to do nothing, to be idle

[*aídoia* understood]). Genital organs that are useless on account of functional incapacity. [K, 4; L, 53.]

**APRAGMONIA** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-ra<sup>2</sup>-g(rak<sup>3</sup>)/mo<sup>2</sup>/ni<sup>2</sup>-a<sup>3</sup>. Gr., *ἀπραγμοσύνη*. Inactivity, inertness. [M, 13.]

**APRAXIA** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-ra<sup>2</sup>-x(rak<sup>3</sup>)/i<sup>2</sup>-a<sup>3</sup>. Gr., *ἀπραξία*. Ger., *Apraxie*. Complete loss of the power of communication, whether by words or by signs, also of knowledge of the uses of objects; only a few unintelligible interjections are uttered, and the subject washes in his soup, drinks the water provided for his ablutions, etc. [R. Arndt (D, 18).]

**ÂPRE** (Fr.), adj. A<sup>3</sup>pr. Rough, harsh, scabrous, bitter, disagreeable. [A, 385; B.]—**Ligne â**. See **LINEA aspera**.

**APRÊLE** (Fr.), n. A<sup>3</sup>-pre<sup>2</sup>l. See **APRELLE**.

**ÂPRETÉ** (Fr.), n. A<sup>3</sup>pr-ta. The quality of being harsh to the taste. [A, 301.]

**APRICA** (Lat.), n., n. pl. of adj. *apricus*. A<sup>2</sup>p(a<sup>3</sup>p)-ri(re)/ka<sup>3</sup>. Sunny, dry places in which certain plants (*plantæ apricæ*) grow readily. [B, 121.]

**APRICARIUM** (Lat.), n. n. A<sup>2</sup>p(a<sup>3</sup>p)-ri<sup>2</sup>-ka(ka<sup>3</sup>)/ri<sup>2</sup>-u<sup>3</sup>m(u<sup>4</sup>m). Ger., *Sonnenhaus*. See **SOLARIUM**.

**APRICATION**, n. A<sup>2</sup>p-ri<sup>2</sup>-ka<sup>3</sup>/shu<sup>3</sup>n. Lat., *apricatio* (from *apricari*, to bask in the sun). Gr., *ἡλιωσις*. Fr., *aprication*. Ger., *Aprikation*. The treatment of disease by exposing the patient to the sun. [A, 304.] Cf. **Sun-BATH** and **INSOLATION**.

**APRICOT**, n. A<sup>2</sup>/pri<sup>2</sup>-ko<sup>2</sup>t. O. E., *apricock, abricot*. Gr., *πρακοκκίον, πρακόκιον*. Lat., *præcoquum* (neut. of adj. *præcoquus* [= *præcox*], precocious). Pers., *al-barquq*. Fr., *abricot*. Ger., *Aprikose*. It., *albercocca, albicocca*. Sp., *albaricoque*. The Armenian apple (Gr., *μᾶλον ἀρμενιάκον*; Lat., *malum armeniacum*); the fruit of *Prunus armeniaca* (*Armeniaca vulgaris*), resembling a peach externally, but having a stone like that of a plum. Dried a's are known in the East as *mishmish*. The grain, or "meat," of the

THE APRICOT. (A, 327.)

stone has properties like those of the bitter almond, and is often employed in making the liqueur known as *ratafia*. [A, 300, 321, 327.]—**A. essence**. Ger., *Aprikosenäther*. A flavoring preparation consisting of chloroform. 1 part; butyric ether, 10 parts; valerianic ether, 5 parts; cenanthylic ether, 1 part; amyl alcohol, 2 parts; amylbutylic ether, 1 part; a saturated alcoholic solution of tartaric acid, 1 part; glycerin, 4 parts; and alcohol, 100 parts. [Kletzinski (A, 308).]—**A.-plum**. Ger., *Aprikosenpflaume*. A species of plum growing in France, often preserved in sugar and exported. [B.]—**Briançon a**. The fruit of *Armeniaca brigantica*, from the seeds of which *huile de marmotte* is expressed. [L, 120.]

**APRICUS** (Lat.), adj. A<sup>2</sup>p(a<sup>3</sup>p)-ri(re)/ku<sup>3</sup>s(ku<sup>4</sup>s). Contr. from *apericus* (from *aperire*, to lay bare). 1. Open, exposed to the sun. 2. Growing especially in sunny situations (said of plants). [A, 312.]

**APIKOSE** (Ger.), n. A<sup>3</sup>-pre<sup>2</sup>-ko<sup>2</sup>ze<sup>2</sup>. The apricot. [B.]—**A'näther**. See **APRICOT essence**.—**A'nbaum**. See **PRUNUS armeniaca**.—**A'nkern**. The kernel of an apricot. [A, 315.]—**A'n-pflaume**. See **APRICOT-plum**.—**Wilde A'n**. The fruit of *Couropita guianensis* (*Lecythis bracteata*). [B, 180.]

**APRILBLUME** (Ger.), n. A<sup>2</sup>-pre<sup>2</sup>l'blu-me<sup>2</sup>. The wood-anemone (*Anemone nemorosa*). [B.]

**APRILMUSCHEL** (Ger.), n. A<sup>2</sup>-pre<sup>2</sup>l'mush-e<sup>2</sup>l. The oyster. [L.]

**APRINON** (Lat.), n. n. A<sup>2</sup>p(a<sup>3</sup>p)-ri(re)/no<sup>2</sup>n. An ancient name for the pomegranate. [Pliny, *Dioscorides* (L, 105).] See **APRYNON**.

**APROCTA** (Lat.), n., n. pl. of adj. *aproctus*. A<sup>2</sup>p(a<sup>3</sup>p)-ro<sup>2</sup>k'ta<sup>3</sup>. A group of the *Turbellaria* having no anal aperture. [L, 11.]

**APROCTHELMINTHES** (Lat.), n. f. pl. A<sup>2</sup>p(a<sup>3</sup>p)-ro<sup>2</sup>k'the<sup>2</sup>-mi<sup>2</sup>nth(ez'e<sup>2</sup>s). From a priv., *πρᾶκτός*, the anus, and *ἐλμύς*, a worm. Fr., *aprocthelminthes*. Ger., *afterlose Eingeweidewürmer*. Syn.: *Helminthoprocta*. Intestinal worms having no anus. [A, 322.]

**APROCTIA** (Lat.), n. f. A<sup>2</sup>p(a<sup>3</sup>p)-ro<sup>2</sup>k'shi<sup>2</sup>(ti<sup>2</sup>)-a<sup>3</sup>. From a priv., and *πρᾶκτός*, the anus. Fr., *aproctie*. Ger., *Aftermangel, Hinternlosigkeit*. Absence or an imperforate condition of the anus. [A, 322.]

**APROCTOSIS** (Lat.), n. f.  $A^2p(a^3p)\text{-ro}^2k\text{-to}^2si^2s$ . Gen., *aprocto'seos* (-sis). Fr., *aproctose*. Properly, the formation of the defect termed *aproctia* (q. v.), but commonly used as synonymous with that word. [A, 322.]

**APROCTOUS**, adj.  $A^2p\text{-ro}^2k\text{-tu}^2s$ . Lat., *aproctus*. Ger., *ap-terlos*. Having no anal aperture. [B, 100.]

**APRON**, n.  $A^2pu^2rn$  (-pru<sup>n</sup>). Fr., *tablier*. Ger., *Schürze*. It., *grembiule*. Sp., *mandil*. A term sometimes applied to any structure resembling the garment so called (e. g., the omentum, also the subcutaneous fat of the anterior abdominal wall).—A. of *succor*. Sp., *mandil de socorro*. An appliance devised by N. Landa y Alvarez, a Spanish army surgeon, for transporting wounded men by

THE APRON OF SUCCOR. (AFTER LONGMORE.)

hand; a stout piece of canvas, fashioned at one end so as to be secured over a man's shoulders, and having at the other end a stitched fold for receiving a wooden bar. [A, 244.]—**Hottentot a.** See *Pudendal a.*—**Masonic a.** A name sometimes given to a sort of a. attached to the waist and used for supporting the penis and testicles in cases of gonorrhœa. [B.]—**Pudendal a.** Fr., *tablier des Hottentotes*. An hypertrophy of the nymphæ and the præputium clitoridis in the form of an a. hanging down over the vulva.

**APRONIA** (Lat.), n. f.  $A^2p(a^3p)\text{-ro}^2ni^2a^3$ . From *Apros*, an ancient city. [Pliny (B, 121).] An old name for the black bryony. [L, 84.]

**APROSIA** (Lat.), n. f.  $A^2p(a^3p)\text{-ro}^2zi^2(si^2)\text{-a}^3$ . An ancient name for the *Salvia officinalis*. [L, 105.]

**APROSOPIA** (Lat.), n. f.  $A^2p(a^3p)\text{-ro}^2s\text{-o}^2pi^2a^3$ . From a priv., and *πρόσωπον*, the face. Fr., *aprosopie*. Ger., *Aprosopie*, *Gesichtslosigkeit*. It., *aprosopia*. Sp., *aprosopia*. A congenital malformation characterized by absence of the eyelids and more or less of the rest of the face. [D, 142; F; L, 50.]

**APROSOPUS** (Lat.), adj.  $A^2p(a^3p)\text{-ro}^2s\text{-o}^2pu^2s$  (pu<sup>s</sup>). Gr., *ἀπρόσωπος*. Fr., *aprosope*. Ger., *gesichtsmangelnd*. Affected with *aprosopia*. [L, 50.]

**APROSTATOTROPHIE** [Piorry] (Fr.), n.  $A^3\text{-pro}^2s\text{-ta}^2s\text{-to-tro}$ . From a priv., *πρόσταιρα*, the prostate, and *τροφή*, nutrition. Atrophy of the prostate. [L, 82.]

**APRYNON** (Lat.), n. n.  $A^2p(a^3p)\text{-ri}^2n$  (ru<sup>n</sup>) $\text{-o}^2n$ . The pomegranate-tree. [Dioscorides (B, 121).]

**APSELAPHESIA, APSELAPHESIS** (Lat.), n's f.  $A^2p(a^3p)\text{-se}^2l\text{-a}^3\text{-fe}$  (fa<sup>2</sup>) $\text{-zi}^2(si^2)\text{-a}^3$ , -si<sup>2</sup>s. Gen., *apselaphesise*, -phe<sup>s</sup>seos (-sis). From a priv., and *ψηλάφωσις*, to touch), a feeling, touching. Fr., *apselaphésie*. Ger., *Apselaphesie*. A form of partial paralysis of sensation characterized by loss of the sense of touch, independently of loss of the other elements of cutaneous sensibility; observed especially in cases of degeneration of the posterior columns of the spinal cord. [A, 319.]

**APSINTHATUM** (Lat.), n. n.  $A^2p(a^3p)\text{-si}^2nth\text{-a}$  (a<sup>2</sup>) $\text{-tu}^2m$  (tu<sup>m</sup>). Gr., *ἀψίνθατον*. An ancient stomachic preparation consisting largely of absinthium. [Aetius (L, 53).]

**APSINTHITES** (Lat.), n. m.  $A^2p(a^3p)\text{-si}^2nth\text{-i}$  (e) $\text{'tez}$  (te<sup>2</sup>s). See **ABSINTHITES**.

**APSINTHIUM** (Lat.), n. n.  $A^2p(a^3p)\text{-si}^2nth\text{-i}^2\text{-u}^2m$  (u<sup>m</sup>). See **ABSINTHIUM**.

**APSITHURIA, APSITHYRIA** [the latter to be preferred] (Lat.), n's f.  $A^2p(a^3p)\text{-si}^2th\text{-u}^2(u)\text{-ri}^2a^3$ , -i<sup>2</sup>r(u<sup>r</sup>) $\text{-i}^2a^3$ . From a priv., and *ψιθύρειν*, to whisper. A form of paralysis or spasm of the larynx in which there is inability to whisper. [J. Solis-Cohen, "Med. and Surg. Reporter," Nov. 10, 1883, p. 508; L. Elsborg, "N. Y. Med. Jour.," Dec. 20, 1884, p. 685.]

**APSYCHIA** (Lat.), n. f.  $A^2p(a^3p)\text{-si}^2k$  (su<sup>2</sup>ch<sup>2</sup>) $\text{-i}^2a^3$ . Gr., *ἀψυχία* (from a priv., and *ψυχή*, life). Fr., *apsychie*. Ger., *Apsychie*, *Bewusstlosigkeit*, *Ohnmacht*. It., *apsichia*. Sp., *apsiquia*. Loss of consciousness, fainting. [Hippocrates (A, 325).]

**APSYCHICUS** (Lat.), adj.  $A^2p(a^3p)\text{-si}^2k$  (su<sup>2</sup>ch<sup>2</sup>) $\text{-i}^2k\text{-u}^2s$  (u<sup>s</sup>). See **APSYCHOS**.

**APSYCHISMIE** [Piorry] (Fr.), n.  $A^3p\text{-se-k}i^2z\text{-me}$ . Idiocy. [L, 82.]

**APSYCHOS, APSYCHUS** (Lat.), adj's.  $A^2p(a^3p)\text{-si}$  (su<sup>2</sup>) $\text{-ko}^2s$  (ch<sup>2</sup>o<sup>s</sup>), -ku<sup>s</sup> (ch<sup>2</sup>u<sup>s</sup>). Gr., *ἀψυχος*. Pertaining to or affected with *apsychia*. [A, 322.]

**APSYXIA** (Lat.), n. f.  $A^2p(a^3p)\text{-si}^2x$  (su<sup>2</sup>x) $\text{-i}^2a^3$ . Gr., *ἀψυξία* [Aretæus]. See **APSYCHIA**.

**APTANDRACEÆ** (Lat.), n. f. pl.  $A^2p(a^3p)\text{-ta}^2n$  (ta<sup>2</sup>n) $\text{-dra-}$  (dra<sup>2</sup>) $\text{-se}^2(ke^2)\text{-e}$  (a<sup>2</sup>-e<sup>2</sup>). From *Aptandra*, the only genus. An order of plants made by Miers. [B, 170.]

**APTENUS** (Lat.), adj.  $A^2p(a^3p)\text{-te}$  (ta) $\text{'nu}^2s$  (nu<sup>s</sup>). Gr., *ἀπτεν*. See **APTEROUS**.

**APTERA** (Lat.), n., n. pl. of adj. *apterus* (see **APTEROUS**).  $A^2p\text{-}$  (a<sup>2</sup>) $\text{-te}^2r\text{-a}^3$ . Fr., *aptères*. Ger., *Flügellose*. It., *apteri*. The division of ametabolic insects including lice and some other parasitic insects; so called because in the adult state they have no wings. [B, 28.]

**APTERAL**, adj.  $A^2p\text{-te}^2r\text{-a}^3l$ . See **APTEROUS**.

**APTERANTHÆÆ** (Lat.), n. f. pl.  $A^2p(a^3p)\text{-te}^2r\text{-a}^2n$  (a<sup>2</sup>n) $\text{'the}^2\text{-e}$  (a<sup>2</sup>-e<sup>2</sup>). From a priv., *πτερόν*, a wing, and *ἄθος*, a flower. Fr., *apteranthées*. A section of burmanniaceous plants including colorless aphyllous species having the segments of the perianth non-alate and with 3 stamens and a unilocular ovary. [B, 104.]

**APTERIA** (Lat.), n. f.  $A^2p(a^3p)\text{-te}$  (ta) $\text{'ri}^2a^3$ . From a priv., and *πτερόν*, a wing. A genus of burmanniaceous plants, closely allied to *Burmannia* but distinguished by the fruit not being provided with wings. [B, 19.]—**A. setacea**. A North American species. [B, 19.]

**APTERIÆÆ** (Lat.), n. f. pl.  $A^2p(a^3p)\text{-te}^2r\text{-i}$  (e) $\text{'e}^2\text{-e}$  (a<sup>2</sup>-e<sup>2</sup>). A tribe of burmanniaceous plants, made by Miers, including the genus *Apteria*. [B, 170.]

**APTERION, APTERIUM** (Lat.), n. n.  $A^2p(a^3p)\text{-te}$  (ta) $\text{'ri}^2\text{-o}^2n$ , -u<sup>m</sup> (u<sup>m</sup>). Ger., *Federrain*. A naked space on the skin of a bird (i. e., one having no contour-feathers). [Nitzsch (A, 322).]—**A. alæ inferius**. Ger., *unterer Flügelrain*. An a. extending over the lower part of the upper arm, the great wing-membrane, the axillary wing-membrane, and sometimes the forearm of birds. [L, 194.]—**A. alæ superius**. An a. extending over a portion of the upper arm and the great wing-membrane of birds which separates the axillary tract from the other feathered parts. [L, 194.]—**A. colli laterale**. Ger., *Halbseitenrain*. An a. upon the side of the neck of birds; it varies greatly in extent according to the genus. [L, 194.]—**A. crurale**. Ger., *Unterschenkelrain*. An a. at the upper end of the tibial region of birds. [L, 194.]—**A. mesogastræi**. An a. in the middle line of the ventral surface of birds. [L, 194.]—**A. nuchale**. An a. at the nape of the neck of some birds. [L, 194.]—**A. spinale**. Ger., *Rückgratsrain*. An a. sometimes occurring upon the backs of birds. [L, 194.]—**A. temporale**. An a. sometimes occurring upon the heads of birds. [L, 194.]—**A. trunci laterale**. Ger., *Rumpfseitenrain*. An a. on the side of the trunk of birds. [L, 194.]

**APTEROCARPÆ** (Lat.), n. f. pl.  $A^2p(a^3p)\text{-te}^2r\text{-o-kar}^2p\text{-e}$  (pa<sup>2</sup>-e<sup>2</sup>). From a priv., *πτερόν*, a wing, and *κάρπος*, a fruit, because

the fruit is usually not alate. A tribe of polygonaceous plants, made by Meissner, including the subtribes *Ceratogoneae*, *Rumicceae*, *Eupolygoneae*, *Coccolobaceae*, and *Triplariideae*. [B, 121, 170.]

**APTERODICEROUS**, adj.  $A^2p^2te^2r-o-d^2is^2e^2r-u^2s$ . Lat., *apterodicerus* (from a priv., *πτερόν*, a wing, *dis*, twice, and *képas*, a horn). Fr., *apterodicer*. Sp., *apterodicer*. Without wings and having two antennae. [L, 41, 116.]

**APTEROLOGIA** (Lat.), n. f.  $A^2p(a^2p)-te^2r-o-lo^2ji^2(gi^2)-a^2$ . For deriv., see **APTEROS** and *-logy*. That department of entomology which relates to the *Aptra*. [A, 316.]

**APTEROUS**, adj.  $A^2p^2te^2r-u^2s$ . Gr., *ἄπτερος* (from a priv., and *πτερόν*, a wing). Lat., *apterus*. Fr., *aptere*. Ger., *flügellos*, *ungeflügelt*. It., *aptero*. Sp., *aptero*. 1. In zoology, having no wings or analogous organs. 2. In botany, destitute of alae. [B, 34, 100.]

**APTERYGIA** (Lat.), n. n. pl.  $A^2p(a^2p)-te^2r-i^2j(u^2g)^2i^2-a^2$ . From a priv., and *πτερυξ* (gen., *πτερυγος*), a fin. Fr., *apterygiens*. *Mul-lusca* having no locomotor appendages. [B, 38.]

**APTERYGLÆ** [Jussieu] (Lat.), n. f. pl.  $A^2p(a^2p)-te^2r-i^2j(u^2g)^2i^2-e(a^2-e^2)$ . See **MALPIGHIEÆ**.

**APTERYGIDÆ** (Lat.), n. f. pl.  $A^2p(a^2p)-te^2r-i^2j(u^2g)^2i^2-d-e(a^2-e^2)$ . From a priv., and *πτερυξ*, a wing. A family of wingless birds of the order *Cursores*, comprising the single genus *Apteryx*, indigenous to New Zealand. [A, 359.]

**APTERYGIÆÆ** [Jussieu] (Lat.), n. f. pl.  $A^2p(a^2p)-te^2r-i^2j(u^2g)^2i^2-e(e^2-e^2-e^2)$ . See **MALPIGHIEÆ**.

**APTISTOS** (Lat.), adj.  $A^2p(a^2p)-ti^2st-o^2s$ . Gr., *ἄπτιστος* (from a priv., and *πίσσω*, to husk). Not decorticated (said of grain). [Hippocrates (A, 325).]

**APTITUDE**, n.  $A^2p^2ti^2-tu^2d$ . Lat., *aptitudo* (from *aptare*, to fit). Fr., *aptitude*. Ger., *Fähigkeit*, *Anlage*. It., *attitudine*. Sp., *aptitud*. Any natural tendency or disposition to a particular kind of behavior under certain influences, or to undergo certain normal or abnormal changes. [A, 385.]

**APTOSIMEÆ** (Lat.), n. f. pl.  $A^2p(a^2p)-to-si^2m^2e^2-e(a^2-e^2)$ . From *Aptosimum*, one of the genera. Of Benham, a subtribe of *Gratiolææ*, characterized by having alternate leaves. [B, 121, 170.]

**APTALIA** (Lat.), n. f.  $A^2p(a^2p)-ti^2(tu^2k)-a^2l(a^2)^2i^2-a^2$ . From a priv., and *πτάλον*, saliva. Fr., *aptyalie*. Ger., *Speichelmangel*. A deficiency of the saliva. [M, 13.]

**APTALIZOMENOS** (Lat.), adj.  $A^2p(a^2p)-ti^2(tu^2k)-a^2l(a^2)^2i^2-z-o^2m^2e^2n-o^2s$ . From a priv., and *πταλίζομενος*, part. of *πταλίζεσθαι*, to ptyalize. Curing, preventing, or not causing ptyalism, as *unguentum mercuriale aptalizomenon*. [B, 97.]

**APTCHYUS** (Lat.), n. m.  $A^2p(a^2p)-ti^2k(tu^2k)-u^2s(u^2s)$ . From a priv., and *πύχης* (= *πύξις*), a fold. A name given to the operculum of certain extinct *Mollusca*. [B, 7.]

**APTYSTIA** (Lat.), n. f.  $A^2p(a^2p)-ti^2st(tu^2k)^2i^2-a^2$ . From a priv., and *πύστιν*, to spit. 1. Aptyalia (*q. v.*). 2. Absence of expectoration. [Hippocrates (A, 322).]

**APTYSTOS, APTYSTUS** (Lat.), adj's.  $A^2p(a^2p)-ti^2st(tu^2k)^2i^2-o^2s, -u^2s(u^2s)$ . Gr., *ἄπυστος*. 1. Not spit out. 2. Not accompanied with expectoration (said of dry pleurisy). [Hippocrates (A, 322).]

**APULOSIS** (Lat.), n. f.  $A^2p(a^2p)-u^2l(u^2)-lo^2si^2s$ . Gen., *apulo/seos* (-sis). Gr., *ἀπουλωσις*. Cicatrization. [Dioscorides (A, 311).]

**APULOTIC**, adj.  $A^2p-u^2l^2t^2i^2k$ . Gr., *ἀπουλωτικός*. Lat., *apulo-ticus*. Healing, causing cicatrization. [Dioscorides (A, 311).]

**APUS** (Lat.), adj.  $A(a^2)^2pu^2s(pu^2s)$ . Gr., *ἄπους* (from a priv., and *πούς*, a foot). See **APODOUS**; as a n., the swift (*Cypselus a.*), so called from its seldom lighting on the ground, a bird formerly used as a remedy for epilepsy, weak eyes, and nephritic pain. [A, 311, 322, 325; L, 94.]

**APUSSEY**, n. The Ashantee name of a leguminous plant, supposed to be allied to *Robinia*, the bark of which, pounded with cardamom, is used topically for headache. [Waring (A, 316).]

**APUTTASY**, n. A Guinea plant, the decoction of which is used in scorbutic affections of the mouth. [L, 105.]

**APYETOS, APYETUS** (Lat.), adj's.  $A^2p(a^2p)-i(u^2e)-e(a^2to^2s, -tu^2s(tu^2s))$ . Gr., *ἄπυετος* (from a priv., and *πύον*, pus). Fr., *apyète*, *apyique*. 1. Not suppurating. 2. Deficient in pus. [A, 325.]

**APYICUS** (Lat.), adj.  $A^2p(a^2p)-i(u^2e)^2k-u^2s(u^2s)$ . See **APYETOS**.

**APYITES** (Lat.), n. m.  $A^2p(a^2p)-i^2(u^2e)-i(e)^2tez(te^2s)$ . Gen., *apyite*. Fr., *apyite*. An old name for perry. [L, 116.]

**APYOUS**, adj.  $A^2p^2i^2-u^2s$ . See **APYETOS**.

**APYRECTIC**, adj.  $A^2p-i^2re^2k^2ti^2k$ . Gr., *ἄπυρεκτικός* (from a priv., and *πύρεσσω*, to be feverish). Lat., *apyrecticus*, *apyrectos*, *apyrectus*. See **APYRETIC**.

**APYRENÆMATA** (Lat.), n. n. pl.  $A^2p(a^2p)-i^2r(u^2r)-e^2n-e^2m^2(a^2e^2m^2)-a^2-ta^2$ . From a priv., *πύρη*, the stone of a fruit, and *αἷμα*, blood. The *Mammalia*, because their red blood-corpuscles are non-nucleated. [Gulliver (K).]

**APYRENOMELE** (Lat.), n. f.  $A^2p(a^2p)-i^2r(u^2r)-e^2n-o-me(ma)^2le(la)$ . From a priv., *πύρη*, the stone of a fruit, and *αἷμα*, a probe. Fr., *apyrenomèle*, *sonde sans bouton*. Ger., *Sonde ohne Knöpfchen*. A probe or sound without a terminal enlargement. [A, 322.]

**APYRENUS** (Lat.), adj.  $A^2p(a^2p)-i^2r(u^2r)-e(a^2)^2nu^2s(nu^2s)$ . Fr., *apyrène*. Ger., *kerulos*. Without a kernel, or pit (said of fruits). [B, 123.]

**APYRETIC**, adj.  $A^2p-i^2re^2t^2i^2k$ . Gr., *ἄπυρετος* (from a priv., and *πυρετός*, fever). Lat., *apyretus*, *apyreticus*. Fr., *apyrétique*. Ger., *apyretisch*, *feberlos*, *feberfrei*. It., *apyretico*. Sp., *apyrético*. Free from fever. [D, 1.]

**APYREXIA** (Lat.), n. f.  $A^2p(a^2p)-i^2r(u^2r)-e^2x^2i^2-a^2$ . Gr., *ἀ-*

*πυρεξία* (from a priv., and *πυρεσσω*, to be feverish). Fr., *apyrexie*. Ger., *Apirexie*. It., *apiressia*. Sp., *apirexia*. Freedom from fever. [L, 50.]

**APYRIQUE** (Fr.), adj.  $A^3-pe-re^2x-ek$ . See **APYRETIC**.

**APYRINA** (Lat.), n. f.  $A^2p(a^2p)-i^2r(u^2r)-i(e)^2na^2$ . 1. The current-vine. [L, 97.] 2. See **APYRINE**.

**APYRINE**, n.  $A^2p^2i^2r-en$ . Lat., *apyrina*, *apyrinum*. Fr., *apyrine*. Ger., *Apprin*. It., Sp., *apirina*. An alkaline substance said to be contained in the nut of the *Cocos nucifera* and that of the *Cocos lapidea*. [B, 2.]

**APYROMELE** (Lat.), n. f.  $A^2p(a^2p)-i^2r(u^2r)-o-me(ma)^2le(la)$ . Gr., *ἀπυρομήλη*. See **APYRENOMELE**.

**APYRON** (Lat.), n. n.  $A^2p(a^2p)-i^2r(u^2r)-o^2n$ . Gr., *ἀπυρον* (from a priv., and *πῦρ*, fire). An ancient name for various substances prepared without the aid of fire, especially sulfur vivum and æthiops mineralis. [Dioscorides (L, 53).]

**APYROTHION, APYROTHIUM** (Lat.), n's n.  $A^2p(a^2p)-i^2r(u^2r)-o-thi(the)^2o^2n, -u^2m(u^2m)$ . From a priv., *πῦρ*, fire, and *θειον*, sulphur. Sulfur vivum; unsmelted native sulphur. [L, 50.]

**APYROUS**, adj.  $A^2p^2i^2r-u^2s$ . Lat., *apyrus* (from a priv., and *πῦρ*, fire). Fr., *apyre*. Ger., *feuerfest*, *feuerbeständig*. It., Sp., *apiro*. Refractory to heat. [B, 86.]

**APYRUM** (Lat.), n. n.  $A^2p(a^2p)-i^2r(u^2r)-u^2m(u^2m)$ . 1. See **APYRON**. 2. Brugnatelli's name for an apyrous salt found by him in urine. [L, 50.]

**APYRUS** (Lat.), adj.  $A^2p(a^2p)-i^2r(u^2r)-u^2s(u^2s)$ . From a priv. (1st def.), or a collect. (2d def.), and *πῦρ*, fire. 1. Apyrous. 2. Resembling fire. [L, 50.]

**APYUS** (Lat.), adj.  $A^2p(a^2p)-i(u^2e)^2u^2s(u^2s)$ . Gr., *ἄπυος* (from a priv., and *πύον*, pus). See **APYETOS**.

**AQUA** (Lat.), n. f.  $A(a^2)^2kwa^2$ . Fr., *eau*. Ger., *Wasser*. It., *acqua*. Sp., *agua*. 1. Water. 2. Natural water in the purest attainable state [U. S. Ph.]; natural water purified by filtration if necessary [Br. Ph.]; water filtered through alternate layers of sand and charcoal [Ger. Ph.]. 3. Cataract. 4. Urine. 5. Ichor. [Foesius (L, 53).] 6. As a pharmaceutical preparation, water containing a volatile substance in solution, obtained either by distilling the substance with water or by dissolving it in water after distillation. In this sense it corresponds to the Fr. *eau distillée* or *hydrolat*. 7. In the plural, *aque*, formerly applied to the liquor annui. [L, 51.]—**A. acetatis superplumbici**. See **Liquor PLUMBI subacetatis**.—**A. acidula alcalina**. See **Liquor sodæ effervescens** and **Liquor POTASSÆ effervescens**.—**A. acidula cum bicarbonate magnesiæ**. See **A. MAGNESIÆ aerata** [Belg. Ph.].—**A. acidula hydrosulphurata**. Fr., *eau gazeuse hydrosulfurée*. A mineral water containing hydrogen sulphide.—**A. acidula martialis**. Fr., *eau gazeuse martiale*. A preparation formerly official in a number of pharmacopœias, made by combining carbonic-acid water and scales of iron in varying proportions and decanting after several days. [L, 85.]—**A. acidula salina**. See **Eau acidule saline**.—**A. acidula simplex**. See **A. ACIDI CARBONICI**.—**A. acidula simplicior**. See **Eau gazeuse simple**.—**Aque acidule**. Aerated waters.—**A. acidulo-salsa** [Fr. Cod.]. See **Eau acidule saline**.—**A. acoustica**. Fr., *eau acoustique*. 1. An old term for any fluid preparation used in diseases of the ears. [L.] 2. See **Liquor Cotunnii**.—**A. acustica Ludwigi**. *A. acustica* of Ludwig. Fr., *eau acoustique de Ludwig*. It., *acqua acustica di Ludwig*. A camphorated alcoholic infusion of valerian, rosemary, lavender, laurel berries, and castoreum, with the addition of ammonia-water and essence of juniper; formerly in repute as a remedy for deafness. [A, 314.]—**A. acuta**. See **A. solvens**.—**A. ad glugivas**. See **Eau gingivale de Vogt** and **Eau gingivale de Kopp**.—**A. ad gonorrhœam Quercetani**. Fr., *eau contre la gonorrhée*. A preparation official in the Würtem. Ph. of 1798; made by mixing 20 parts of Venice turpentine, 4 of Florentine iris root, 4 of dry mint, 4 of *Origanum dictamnus*, 5 each of the seeds of rue and *Vitex agnus castus*, and 24 of white wine, and distilling one half over a water-bath. [L, 85.]—**A. adstringens**. See **Liquor ALUMINIS compositus**.—**A. ad synoviam**. See **A. grisea**.—**A. aerata**. See **A. ACIDI CARBONICI**.—**Aque aerate**. Aerated waters. [L, 119.]—**A. aerata alcalina**. See **A. mephitico-alcalina**.—**A. aeris fixi**. See **A. ACIDI CARBONICI**.—**A. aere orbata**. Water deprived of air by boiling. [L, 165.]—**A. aere hepatico impregnata**. See **A. hydrogenata sulphurata**.—**A. ætherea**. Fr., *eau éthérée*. A mixture of ether and water in any proportions. [L, 165.]—**A. ætherea camphorata**. A mixture of 1 part of camphor, 3 parts of ether, and 60 of distilled water [L, 165], or 1 part of camphor, 10 parts of ether, and 200 of distilled water. [L, 63.]—**A. æthiopica**. See **Acqua d'Égitto**.—**A. africana**. Fr., *eau d'Afrique*. See **Acqua d'Égitto**.—**A. alba prima**. An alchemical term for the urine of maidens. [L, 53.]—**Aque albulæ**. See **Acqua Albule**.—**A. albuminaria**. **A. albuminosa**. See **Eau albumineuse**.—**A. alcalina carbonica**. **A. alcalina effervescens**. See **Eau alcaline gazeuse**.—**A. alcalina mineralis aerata**. See **A. mephitica alcalina**.—**A. alcalina oxyuriatica**. See **Javelle WATER**.—**Aque alcalinæ**. Alkaline waters. [L, 119.]—**Aque alcalinæ aeratæ**. Aerated alkaline waters. [L, 119.]—**A. alexiteria**. Fr., *eau alexitère*. A term formerly applied to various fluid preparations regarded as having alexiteric properties. [L, 85.]—**A. alexiteria oxygenata**. See **A. CILIORI**.—**A. alexiteria simplex**. Fr., *eau alexitère simple*. A preparation official in the Batav. Ph. of 1805 and the Brunsw. Dispens. of 1777, made by distilling 5,120 parts of a mixture of 375 parts each of *Artemisia maritima* tops and fresh angelica leaves and sufficient water. [L, 85.]—**A. alexiteria spirituosâ**. Fr., *eau alexitère spiritueuse*. A preparation official in the Batav. Ph. of 1805, made by taking 120 grammes each of the tops of *Artemisia maritima* and fresh angelica leaves, 150 grammes of fresh mint leaves, 7 kilogrammes of alcohol, and sufficient water, and distilling 7 kilogrammes. [L, 85.]—**A. alexiteria**

**spirituosa cum aceto.** *A. alexiteria spirituosa* to which vinegar has been added. [L, 119.]—*A. Alibourii.* Fr., *eau d'Alibour.* See COLIBRIO of Saint-Jermnon.—*Aque Allobrogum.* An old Roman name for Aix-les-Bains. [A, 42.]—*A. alina.* Alcohol. [B, 50.]—*A. aloetica mercurialis.* Fr., *eau doctique mercurielle.* A preparation official in the Dispensatorium Fuldense of 1791, made by mixing 10 parts of mercury bichloride, 6 of ammonium chloride, 5 of aqueous extract of aloes, and 2,880 of lime-water. [L, 85.]—*A. Al-regl.* See *Liquor calcei.*—*A. aluminata* [Sp. Ph.]. Sp., *solución de sulfato aluminico potásico* [Sp. Ph.]. A solution of 1 part of alum in 144 of rose-water. [L, 123.]—*A. aluminosa.* See *Acqua aluminosa.*—*A. aluminosa bateana.*—*Aque aluminosa composita.* See *Liquor ALUMINIS compositus.*—*Aque aluminosae.* Aluminous mineral waters. [L, 119.]—*A. aluminosa Fallopi.* Fr., *eau aluminée de Fallope.* See *Aluminous SOLUTION of Fallopius.*—*A. amara.* See *A. sulphatis MAGNESIÆ carbonicæ.* and Cf. *Acqua amara.*—*A. amara Meyer.* Ger., *meyerisches Bitterwasser.* A mixture of 32 parts of magnesium sulphate, 4 of sodium bicarbonate, 8 of sodium sulphate, and 500 of water impregnated with 3 volumes of carbonic anhydride. [L, 63.]—*A. amarella.* A mixture of sodium chloride, lead acetate, and water; used for dyeing the hair. [L, 120.]—*A. ammoniacalis.* See *Liquor AMMONII carbonatis.* It may be applied also to any solution containing ammonia. [L.]—*A. angelica.* Fr., *eau angélique.* A mixture of 7 parts of cream of tartar, 56 of manna, 226 of water, and 14 of lemon-juice, with a little orange-peel added, the whole clarified with white of egg and filtered. [L, 85.]—*A. angelica viennensis.* See *CASSIA cum manna.*—*A. anhaltina.* Fr., *eau d'Anhalt.* Ger., *Anhalt'sches Wasser.* It., *acqua d'Anhalt (o anhaltina).* Syn.: *spiritus anhaltinus.* A preparation made by digesting 6 days and distilling 120 parts of turpentine, 90 of powdered aloes-wood, 22 each of mastic, cloves, nutmeg, cubeb, and canella, 9 each of saffron, fennel, and bayberries, and 1,800 of alcohol. [Palatin. Dispens., 1764.] Several old pharmacopœias give the preparation with trifling variations. [L, 85.]—*A. anodina.* See *A. anodyna.*—*A. anodina pragensis.* Fr., *eau de Prague.* See *Acqua anodina di Praga.*—*A. anodyna.* Fr., *eau anodyne.* A name given to several preparations containing ammonia, opium, and camphor in varying proportions. [L, 85.]—*A. antarthetica effervescens.* See *Liquor LITHÆ effervescens.*—*A. antarthetica de Luyens.* See *Acqua del Cardinale di Luyens.*—*A. antithysterica fetida.* *A. antithysterica pragensis.* See *A. fetida antithysterica.*—*A. antiblemorrhœica.* See *Acqua antiblemorrhœica.*—*A. antiptileptica de Langio.* *A. antiptileptica Langii.* Fr., *eau antiptileptique de Lange.* A preparation official in the Würtem. Ph. of 1798 and the Pruss. Ph. of 1829, made by macerating for 3 days and distilling one half of a mixture of 180 parts of *Convallaria majalis* flowers, 30 of lavender flowers, 15 each of French lavender flowers and nutmeg, 22 of canella, 7 each of long pepper and cubeb, 15 each of mistletoe, peony root, and white dittany, and 2,880 of generous wine. [L, 85.]—*A. antimelancholica.* Fr., *eau antimelancolique.* A preparation official in the Würtem. Ph. of 1798, made by infusing for 24 hours and distilling one half of a mixture of 7 parts of saffron, 30 each of borage, bugloss, and rosemary-leaves, 60 of lemon-peel, 120 of bugloss-root, 180 of fructus cydoniæ, and 2,880 of white wine.—*A. antiniasmatica Beisserii.* See *A. cupri ammonio-muriaticæ.*—*A. antiniasmatica composita.* See *CUPRUM chloratum ammoniacale cum hydragyro solum concentratum.*—*A. antiniasmatica Koechlini.* A mixture of 1 part of liquor antiniasmaticus (q. v., under *Liquor*) and 80 parts of water. [B, 270.]—*A. antiniasmatica simplex.* See *A. cupri ammonio-muriaticæ.*—*A. antiphtalmica de Loche.* See *Acqua antiophthalmica di Loche.*—*A. antiputrida.* A solution of 1 part of potassium permanganate in 200 of water. [L, 63.]—*A. antiscorbutica.* Fr., *eau antiscorbutique.* A preparation official in the Swed. Ph. of 1773, made of equal parts of cochlearia, sorrel, agrimony, beccabunga, lesser chelidonium, wild chiorry, hack bean, and veronica, distilled with a sufficient quantity of water. [L, 85.]—*A. antivenerialis preservativa.* A solution of caustic potash. [L, 119.]—*A. aperitiva viennensis.* See *A. laxativa viennensis.*—*Aque apollinæ.* Springs situated between Tarquinii and Cerveteri, now known as "Bagni di Stagliani." [L, 30.]—*Aque aponeuses.* See *ABANO.*—*A. apoplectica.* 1. See *A. AMMONIÆ.* 2. A preparation official in the Würtem. Ph. of 1798, made by macerating for three days and distilling one half of a mixture of 64 parts of sage, 4 each of marjoram and wild thyme, 12 of flowers of lily of the valley, 1 part each of lavender and rosemary, 6 parts of cinnamon, 4 of cubeb, 3 of cloves, 2 of mace, and 7,680 of water. [L, 85.]—*A. apoplectica Langii.* A preparation very similar to the preceding. [L, 85.]—*Aque aquisgranænses.* See *AACHEN.*—*A. ardens.* 1. See *ALCOHOL.* 2. Oil of turpentine. [B, 18.]—*A. argentea.* See *MERCURY.*—*A. aromatica.* Fr., *eau aromatique.* A preparation official in several European pharmacopœias, not differing materially from that of the Ger. Ph. (1st ed.), which is made by macerating for 24 hours a mixture of 1 part of cinnamon, 2 parts each of lavender flowers, rosemary-leaves, and peppermint-leaves, 4 parts of salvia leaves, 1 part of fennel fruit, 26 parts of 83-per-cent. alcohol, and 120 of water. [L, 123.]—*A. aromatica danica.* See *SPIRITUS aromaticus.*—*A. aromatica spirituosa.* Fr., *eau aromatique spiriteuse.* Ger., *geistig-aromatisches Wasser.* Kinderbalsam. A preparation official in the Austr. Ph. of 1855, made by macerating for 12 hours and distilling 2 parts each of lavender flowers, melissa, *Mentha crispa*, and salvia-leaves, 1 part each of cloves, cinnamon, mace, nutmeg, and ginger root, 23 of 83-per-cent. alcohol, and 100 of water. [L, 123.]—*A. arsenicalis Biettil.* See *Liquor AMMONII arsenici.*—*A. arsenicalis antipedicularis.* See *Acqua arsenicale antipediculare.*—*A. arsenicalis Pearsonii.* See *Liquor arsenicæ arsenicalis.*—*A. artienlorum.* See *SYNOVIA.*—*A. asthmatica.* Fr., *eau antiasthmique.* A preparation official in the Würtem. Ph. of 1798, made by digesting and distilling 60 parts each of alder, Florentine iris, and licorice roots, 90 each of ground ivy, coltsfoot, chenopodium, hyssop, white horehound, and pennyroyal,

30 each of anise and fennel, 3,600 of water, and 360 of alcohol. Other old pharmacopœias order very similar preparations. [L, 85.]—*A. astricta.* Frozen water. [L, 119.]—*A. atheniensis.* Fr., *eau athenienne.* A French preparation for cleansing the scalp; an alcoholic solution of potash-soap, with some solution of potash and aromatic oil. [F. Goppelsröder (A, 377).]—*A. aneta.* Mercury.—*A. auditoria.* See *Liquor Cotunnii.*—*Aque augustæ.* *Aque augustæ-tarbellæ.* See *Aque tarbellæ.*—*A. aurea.* A "spirit distilled from human brains." [B, 260.]—*A. aurea divina Ferri.* See *Loto HYDRARGYRI flava.*—*Aque Aurellæ.* An ancient name for Baden-Baden. [L, 37.]—*Aque Badiæ.* *Aque badigæ.* *Aque badizæ.* See *BATH* (1st def.).—*Aque Balneoli.* See *BAGNOLES.*—*A. balsamica.* 1. Of Fuller, a mixture of 3 handfuls each of ivy, horehound, hyssop, and pennyroyal, 8 grms. each of mint and iris root, 160 grms. of turpentine, 2,000 of milk, and 160 of alcohol. [L, 63.] 2. Of Jackson, an aromatic dentifrice containing Spanish peltitory balsam of tolu, etc. [L, 53.]—*A. balsamica arterialis.* See *A. Binelli.*—*Aque bareddigine.* *Aque bareginenses.* *Aque baretginenses.* See *BAREGES.*—*A. barytica.* See *Solutio BARYTÆ muriaticæ.*—*A. bateana.* See *Liquor ALUMINIS compositus.*—*Aque bathionæ.* *Aque bathonienses.* See *BATH* (1st def.).—*Aque Beerii.* A mixture of 8 parts of cuprum aluminatum, 100 of distilled water, 3 of tinctura anodyna, and 2 of lead acetate. [L, 57.]—*A. Beisserii.* See *A. antiniasmatica Beisserii.*—*Aque bellæ.* The springs of Aquabella, now Aigue-Belle, in Savoy. [L, 30.]—*A. bellilucana.* *Aque bellilucanæ.* See *BALARUC.*—*A. benedicta.* See *A. calcei.*—*A. benedicta composita.* According to the Sardinian (1773) and Turin (1833) pharmacopœias, 4 handfuls of creeping thyme and 1 handful each of chamomile, savory, and thyme are to be digested for three days in 6 lbs. of wine. Half of the mixture is then to be distilled off, and ½ oz. each of *Acorus aromaticus*, *Laurus cassia*, cinnamon, and mace is to be infused in the distillate. The whole is then distilled. [A, 362.]—*A. benedicta Rulandii.* Fr., *eau bévite de Ruland.* See *Vinum ANTIMONIUM.*—*A. benzoata aerata.* A mixture of 512 parts of carbonic-acid water, 15 each of borax and potassium benzoate, and 2 of potassium bicarbonate. [L, 165.]—*Aque Biggerroni.* See *BIGORRE.*—*A. bilina.* See *BLIN.*—*Aque Binelli.* Fr., *eau de Binelli.* It., *acqua di Binelli.* A hæmostatic preparation containing creasote, named from its inventor. [L, 37.]—*Aque bonnenses.* See *BONNES.*—*A. borbonensis.* See *BOURBONNE-LES-BAINS.*—*Aque borbonicæ.* *Aque Borbonis.* See *BOURBON L'ARCHAMBAULT.*—*Aque borvoniæ.* *Aque Borvonis.* See *BOURBONNE-LES-BAINS.*—*A. Bredfeldii.* A mixture of 5 parts of compound tincture of musk, 250 of rose-water, and 1,500 of cologne-water. [L, 63.]—*A. bristolensis.* See *BRISTOL.*—*A. Brocchieri.* See *EAU de Brocchieri.*—*A. bromata.* See *A. bromi.*—*A. bromata Erlemmeyeri.* A solution of 4 parts of potassium bromide, 4 of sodium bromide, and 2 of ammonium bromide in 750 of carbonic-acid water. [A. Poehl, "St. Petersb. med. Woch.," May 3 (15), 1886, p. 167 (L).]—*A. buhlii.* Boiling water. [L, 119.]—*A. buxtoniensis.* See *BATH* (1st def.).—*A. cerulea.* Sp., *solución de sulfato cuprico-amónico* [Sp. Ph.]. A preparation official in the Belg., Gr., Sp., and Pruss. (5th ed.) pharmacopœias. The Belg. Ph. orders 15 parts of sulphate of copper, 800 of distilled water, and 95 of an ammoniæ (sp. gr., 0.935); the Sp. Ph., 1 part of copper sulphate, 576 parts of distilled water, and sufficient a. ammoniæ to dissolve the precipitate first thrown down; the Gr. and Pruss. Ph's order 1 part of cuprum limatum, 2 parts of ammonium chloride, 48 of lime-water, and 384 of distilled water. [L, 123.]—*A. Cesaris.* See *A. regia.*—*A. calida.* Hot water.—*Aque calidæ.* 1. Vichy. 2. Bath (1st def.).—*Aque calidæ Belgarum transductorum.* See *BATH* (1st def.).—*A. camphorata.* See *A. CAMPHORÆ.*—*A. camphorata acidula.* Fr., *eau camphrée.* A preparation official in the Sp. Ph. of 1798; a mixture of 1 part of camphor and 23 parts of carbonic-acid water. [L, 85.]—*A. camphorata-ætherea.* Fr., *eau étherée camphrée.* Sp., *solución de éter alcanforada* [Sp. Ph.], *agua eterea alcanforada.* A mixture of 2 parts of camphor, 6 of ether (sp. gr., 0.758), and 120 of distilled water. [L, 123.]—*A. camphorata bateana.* A mixture of copper sulphate, camphor, and boiling water in varying proportions. [L.]—*Aque cantuarienses.* See *CANTERBURY.*—*A. carbolica.* A 1-per-cent. solution of carbolic acid in water. [L, 63.]—*A. carbolisata* [Ger. Ph.]. Fr., *soluté d'acide phénique* [Fr. Cod.], *eau phéniquée.* Ger., *carbolsaures Wasser.* Syn.: *a. acidi carbolici* [U. S. Ph., 1870], *solutio acidi carbolici* [Norw. Ph.], *solutio acidi phenylici* [Swed. Ph.], *acidum carbolicum solum* [Russ. Ph.]. In the Ger. Ph., a 3-per-cent. solution of carbolic acid in water; in the U. S. Ph. (1870), a solution of 1 part of glycerite of carbolic acid in 128 parts of water; in the Fr. Cod., a solution of 1 part, in the Russ. Ph., one of 10 parts, and in the Norw. and Swed. Ph's, one of 20 parts of carbolic acid in 1,000 parts of water. [B; L.]—*A. carbonica.* See *A. ACIDI CARBONICI.*—*A. carbonica ferrata.* A solution of iron and potassium tartrate in carbonic-acid water. [Kirsch (L, 57).]—*A. carbonica oxygenata.* See *A. carbonica.*—*A. carbunculi.* Fr., *eau carbunculeuse.* A mixture official in the Bruns. Disp. of 1777, the Palatin. Disp. of 1764, and the Würtem. Ph. of 1798, of a large number of aromatic seeds, herbs, and roots and wine, supposed to prevent the striking in of carbuncular diseases. [L, 85.]—*A. cardinalis.* See *Acqua del Cardinale di Luyens.*—*A. carnellitana.* *A. Carnelitarum.* Fr., *eau des Carnes.* See *SPIRITUS MELISSÆ compositus.*—*A. Carmichaelis.* See *A. benedicta composita.*—*A. carninativa.* Fr., *eau carnivative.* Ger., *Windwasser.* A preparation official in the Austr. Ph., made by macerating for 24 hours and distilling 2,000 parts of a mixture of 30 parts each of lemon- and orange-peels, mint-leaves, cloves, coriander seeds, and fennel, 100 of Roman chamomile flowers, and 2,000 of water. [L, 123.] Cf. *CLARETUM ex sex seminibus.*—*A. carninativa regia.* Ger., *königliches Windwasser.* A mixture of a carninativa simplex, aromatic spirits, white sugar, and cochineal. [L, 123.]—*A. carninativa simplex.* Fr., *eau carnivative simple.* Ger., *einfaches Windwasser.* An aromatic water obtained

by the distillation of various aromatic and sweet-smelling substances with water; official in the Austr. Ph. of 1820, the Brunsw. Dispens. of 1777, the Sardin. Ph. of 1773, and the Würtem. Ph. of 1798. [L. 85.]—**A. carminativa spiritusosa.** Fr., *eau carminative spiritueuse*. A preparation official in the Würtem. Ph. of 1798, made by digesting for 3 days and distilling 3,600 parts of a mixture of 1,800 parts of water, 3,240 of alcohol, 60 each of sweet-flag, mint, and serpyllum, 180 of chamomile, 75 each of anise and fennel, 90 each of cinnamon, mace, bayberries, and juniper, and 60 of orange-peel. [L. 85.]—**Aque caroline.** See CARLSBAD.—**A. carrica.** See LIQUOR CALCIS.—**A. catapultarum.** See *A. vulneraria*.—**Aque cathartice amare.** Bitter purging waters. [L. 119.]—**Aque celene.** See CALDAS DEL REY.—**A. cephalica.** An old term applied to several aromatic waters, on account of their supposed virtues in apoplexy. Cf. *A. aromatica* and *A. apoplectica*. [L.]—**A. cephalica Caroli Quinti.** Fr., *eau céphalique de Charles Quint*. A preparation official in the Palatin. Disp. of 1764, made by digesting for 6 days and distilling 60 parts each of sweet marjoram, balm, and origanum tops, 15 each of cloves, cardamoms, cinnamon, grana paradisi, mace, and nutmeg, and 2,180 of alcohol. [L. 85.]—**A. cerebri.** See *A. tartari*.—**Aque chalybeate.** Fr., *eaux chalybées*. Chalybeate waters. [L. 119.]—**A. chlorata.** See *A. chlori*.—**A. chlorinica.** See *A. chlori* and HYDROCHLORIC ACID.—**A. chloroformata.** Fr., *eau chloroformisée*. See *A. chloroformi*.—**A. chrysele.** See *A. regia*.—**Aque cilene.** See *Aque celene*.—**A. citrina.** A distillation of orange- and lemon-peels and alcohol. [L. 119.]—**A. coelestina.** See *A. permansens*.—**A. coelestis.** Fr., *eau celeste*. It, *acqua celesta*. 1. A solution of ammonio-sulphate of copper, prepared extemporaneously by dissolving the sulphate in water and adding ammonia till all turbidity is removed and a sky-blue solution is produced. It has been official in various degrees of strength in different pharmacopœias. [B. 10, 50.] Cf. *A. cœrulea*. 2. See *A. cœrulea*. 3. Alcohol. [B. 260.]—**A. cœrulea.** See *A. cœrulea*.—**A. coelestrensis.** See COLCHESTER.—**A. coloniensis.** See SPIRITUS odoratus.—**A. coloniensis medicinalis.** See *Alcoholatum aromaticum de citreis*.—**A. colorata.** Colored water; used to give a pleasing tint to mixtures and as a placebo. [L. 63.]—**A. confortativa.** Fr., *eau confortante*. A mixture official in the Sax. Ph. of 1837, of a cinnamonoli buglossata 1 part, and waters of violets, of red roses, of borage, and of black cherry, each 4 parts. [L. 85.]—**A. communis.** The official title for water in the Ger. Ph.—**A. communis destillata.** See *A. destillata*.—**Aque composita.** Compound waters. [L. 119.]—**Aque concentrata.** Concentrated waters; ordered made, in the Dan., Swiss, and Ger. Ph's, by distilling 10 parts of a water containing volatile principles in solution; the Russ. and Roumanian Ph's order the distillation of a relatively large quantity of a volatile principle with water. [B. 95.]—**A. confortativa.** See *A. confortativa*.—**A. congregations.** See MERCURY.—**A. Conradi.** A mixture of 3 parts of corrosive sublimate, 100 of distilled water, and 5 to 10 of tinctura opii crocata, used as an eye-water. [Reuss (L. 157).]—**A. contra alopeciam.** A mixture of 5 parts of tincture of galls, 1 part of tincture of cantharides, 15 parts of cologne-water, and 50 of rose-water; or 20 parts each of glycerin and mistura oleobalsamica, 1 part of tincture of cantharides, 60 parts of spirits of wine, and 2 of tannic acid. Both should be filtered. [L. 63.]—**Aque Convenarum.** See *Baignères de BIGNORE*.—**A. cordialis frigida.** Fr., *eau cordiale froide*. A preparation official in the Würtem. Ph. of 1798, made by distilling two thirds of a mixture of 75 grammes of cinnamon, 360 each of red sanders, bugloss, and sorrel waters, 540 each of rose, raspberry, and black-cherry waters, and the juice of 8 lemons. [L. 85.]—**A. cordialis temperata.** Fr., *eau cordiale tempérée*. A preparation very similar to the preceding, but much more complex. [L. 85.]—**A. corrodens.** Strong vinegar or any corrosive fluid. [B. 50.]—**A. corrosiva.** See *A. caustica*.—**A. cosmetica.** Fr., *eau cosmétique*. Syn.: *lac virginum*. Cosmetic-water; in several old pharmacopœias, a mixture of tincture of benzoin and water. [L. 162.]—**A. cosmetica orientalis.** A mixture of 3 parts of corrosive sublimate, 300 of distilled water, white of egg as desired, 10 parts of lemon-juice, 24 of sugar, and 40 of some aromatic water. [Bernatzik (L. 57).]—**A. Cotunnii.** See PERILYMPH.—**A. crystallina.** *A. crystallina*. See *Solutio TARTARI depurati*.—**Aque cupree.** Waters containing copper. [L. 119.]—**A. depurata.** Water purified by filtration, distillation, etc. [L.]—**A. descensus.** *Aque descensus*. See *A. descensus*.—**A. destillata.** Fr., *eau distillée*. Ger., *destillirtes Wasser*. It, *acqua distillata*. Sp., *agua destilada*. The official title of distilled water in a large number of pharmacopœias. The U. S. and Br. Ph's order the first 50 parts passing over to be thrown away, and the next 800 preserved, and the U. S. Ph. directs the condenser of the distilling apparatus to be made of glass or block tin. [L. 65.]—**Aque destillate** [Ger. Ph.]. Fr., *eaux distillées*. Ger., *destillirtes Wasser*. Waters impregnated with volatile substances during distillation. [L. 65.]—**A. destillata simplex.** The official title of a destillata in the Austr. and Hung. Ph's. [B. 95.]—**A. de tribus.** *A. diaton.* See MIXTURE PYROTARTARICA.—**A. discussoria.** See *A. vulneraria*.—**A. distillata.** See *A. destillata*.—**A. diuretica e nucleis.** Fr., *eau diurétique*. A preparation official in the Palat. Disp. of 1764, made by digesting for two days and distilling one half of a mixture of 48 parts of wine, 3 of dry elder flowers, 2 each of bitter almonds and peach pits, and 1 part of cherry pits. [L. 85.]—**A. divina.** *A. divina Fernelii*. See LIQUOR HYDRARGYRI MURIATICI CORROSI.—**Aque domitiana.** An old Roman name for Aix-les-Bains. [A. 42.]—**A. driburgensis.** See DREIBURG.—**A. dulcis.** Soft water. [L. 119.]—**A. dura.** Hard water. [L. 119.]—**A. e lacu.** Lake water.—**A. elementaris.** An old name for dew. [L. 105.]—**A. elsabon.** See *A. holsabon*.—**A. embryonum.** See *A. aromatica* [Ger. Ph.] and ELIXIR vite mulierum.—**A. emetica.** See LIQUOR ANTIMONYI TARTARISATI.—**Aque emissorum.** See AQUEDUCT OF SYLVIVS.—**Aque enggenses.** See ENGHEN.—**A. epidemica.** Fr., *eau épidémique*. See ALEXITERIA SPIRITUOSA.—**A. epidemica londonensis.** A preparation official in the Würtem. Ph. of 1798, made by macerating and dis-

tilling 4,320 parts of white wine, 30 each of angelica, tormentilla, gentian, zedoary, and licorice roots, chelidonium, rosemary, rue, sage, *Artemisia vulgaris*, wormwood, anagallis, scabiosa, *Artemisia dracunculul*, agrimony, balm, scordium, little centaury, blessed thistle, betony, and *Drosera rotundifolia* herbs. [L. 85.]—**A. epileptica Langii.** Fr., *eau épileptique de Lange*. It, *acqua antilepittica di Langio*. A limpid, aromatic liquid, made by distilling a mixture of linden flowers 70 parts, flower-de-luce 140, fresh peony seeds 130, and generous white wine 200, adding bruised cinnamon 10 parts, nutmeg 20, cardamon, cubeb, and long pepper, each 2, lavender flowers 30, and rosemary, mistletoe, peony root, and dittany, each 15, and redistilling the whole; used internally and externally for epilepsy. [A. 314.]—**A. essentialis.** It, *acqua essenziale*. An aqueous solution of a volatile active principle obtained by distilling fresh plants without the addition of water. [B.] Cf. HYDROLAT.—**A. ex Baniaries.** Sp., *agua de Banières*. A preparation official in the Sp. Ph., made extemporaneously by mixing 2.16 parts of magnesium sulphate, 0.01 part of tartrate of antimony, 0.06 of iron sulphate, 276.48 parts of sodium tartrate and 276.48 of water. [L. 123.]—**A. ex flumine.** River water. [L. 120.]—**A. ex nive.** Snow water. [L. 120.]—**A. ex puteo.** Well water.—**Aque extemporaneæ.** Aqueous solutions of the volatile oils made either by shaking the latter with water, by rubbing up the oils with sugar, etc., and then dissolving in water, or [U. S. Ph.] by causing water to percolate through cotton moistened with the oil. [B. 95.]—**Aque fabarie.** See FAVIERES.—**A. fabrorum.** The water in which smiths cool iron and steel. It is a feeble chalybeate. [L. 105.]—**A. ferrata.** A chalybeate water. [L.] Cf. *A. fabrorum*.—**A. ferrata effervescentes.** A mixture of 1 part of iron citrate and 400 parts of carbonic-acid water. [Kisch (L. 57).]—**Aque ferree, Aque ferrosa.** Chalybeate waters. [L.]—**A. ferruginosa aerata.** See *Eau ferrée gazeuse*.—**Aque ferruginosa.** See *Aque ferrosa*.—**A. fervens.** Hot water. [L. 119.]—**Aque flaviæ.** See CHAVES.—**A. fluvialis.** *A. fluvialis*. River water. [L.]—**A. fetida.** See *A. MERCURII*.—**A. fetida antihysterica.** The Ger. Ph. orders 1 part of castoreum canadense, 12 parts of asafoetida, 8 of Roman chamomile flowers, 12 of peppermint-leaves, 8 each of galbanum and climbing thyme, 6 of myrrh, 16 each of valerian and zedoary roots, 4 of angelica root, 150 of alcohol (sp. gr. 0.892), and 300 of water; 300 parts to be distilled. The Gr. Ph. orders 12 parts each of asafoetida and peppermint-leaves, 8 each of castoreum, chamomile flowers, coriander seeds, galbanum, and climbing thyme, 16 each of zedoary and valerian roots, 6 of myrrh, 4 of angelica root, 144 of alcohol (sp. gr. 0.840), and water q. s.; 288 parts to be distilled. [L. 123.]—**A. fetida pragensis.** Fr., *eau de Prague*. Ger., *stinkendes Pragerwasser*. It, *acqua antisterica fetida (o di Praga)*. A tincture containing galbanum, asafoetida, valerian, zedoary, angelica, mint, chamomile, coriander, and castoreum; formerly used in Germany for hysteria. [A. 314.]—**A. fontana.** *A. fontis*. See *Spring water*.—**Aque forgiarum.** 1. See FORGES-LES-EAUX. 2. See *A. fabrorum*.—**A. fortis.** Fr., *eau forte*. Ger., *Aqua fortis*. It, *acqua forte*. Sp., *agua fuerte*. See NITRIC ACID.—**A. fortis diluta.** Dilute nitric acid.—**A. fortis duplex.** See *Double a. fortis*.—**A. fortis secundaria.** Dilute nitric acid. [L.]—**A. fortis simplex.** See *Single a. fortis*.—**A. frigida.** 1. Cold water; usually applied to water below 64° F. [L.] 2. Mercury. [L. 53.]—**A. gingivalis.** See *A. ad gingivas*.—**A. Goulardii.** *A. Goulardii propria*. See LIQUOR PLUMBI SUBACETATIS DILUTUS.—**A. græca.** Fr., *eau grèque*. A hair-dye containing nitrate of silver. [L. 120.]—**Aque Grani.** *Aque grania.* *Aque gratiana.* Ancient names for Aix-la-Chapelle. See AACHEN.—**A. grisea.** *A. grisea Gohlfi.* *A. grysea.* Fr., *eau grise*. A preparation official in several old pharmacopœias, containing nitrate of mercury and an infusion of a number of herbs. [L. 85.]—**A. gummosa.** Fr., *tisane de gomme* [Fr. Cod.]. Sp., *solución de gomu arábica* [Sp. Ph.]. A solution of 1 part of gum arabic in 48 parts of water [Sp. Ph.], or 50 parts [Fr. Cod.]. [L. 123.]—**A. hæmostatica** [Pagliari]. Fr., *eau hæmostatique*. A solution, official in the Belg. Ph., of 1 part of benzoin and 2 parts of potash alum in 20 of water. [L. 123.]—**A. hæmostatica Monseli.** A preparation made by mixing a solution of 6 parts of alum in 100 of rose-water with one of 3 parts of tannin in 100 of rose-water. [B. 270.]—**A. halogenata.** See *A. chlori*.—**Aque helveticæ.** *Aque helveticæ.* See BADEN (Switzerland).—**A. hepatica.** Fr., *eau hépatique*. It, *acqua epatica*. See *A. hydrosulphurata*.—**A. hepatica acidula.** See *A. sulphureo-acida*.—**A. hepatisata.** See *A. hepatica*.—**A. hepatisata fortior.** See *A. sulphureo-acida*.—**A. holsabon.** Salt water. [B. 50.]—**A. hordeata.** See *Decoctum HORDEI*.—**A. hordeata cum gummi.** A preparation official in the Geneva Ph. of 1780, made by boiling 6 parts of barley in a small quantity of water, which water is rejected, adding 56 parts of boiling water, reducing one half, and adding 1 part of licorice and 3 parts of gum arabic. [L. 162.]—**A. hungarica.** See *A. reginæ hungaricæ*.—**A. hydrocyanica vegetabilis.** Fr., *eau hydrocyanique*. A mixture, official in the Batav. Ph. of 1805 and the Lusitanian Ph. of 1836, of 1 part of essential oil of bitter almonds, 12 parts of alcohol, and 128 of distilled water. [L. 85.]—**A. hydrogenata sulphurata.** *A. hydrosulphurata.* *A. hydrosulphureta acidula* (seu acidula). An aqueous solution of hydrogen sulphide. [L.] See *Eau sulphurée* and *Acidum sulpho-hydricum liquidum*.—**A. hysterica.** Fr., *eau antihysterique*. A preparation official in the Bruns. Disp. of 1777 and the Würtem. Ph. of 1798, made by digesting for 2 days and distilling 1,440 parts of a mixture of 252 parts of water, 180 of alcohol, 30 each of imperatoria, *Ligusticum levisticum*, peony, and zedoary roots, 45 each of balm, feverfew, mint, and chamomile, and 30 each of lemon-peel, cloves, *Laserpitium latifolium*, and fennel. [L. 85.]—**A. imbrum.** Rain water.—**A. imperialis.** Fr., *eau impériale*. A preparation official in the Turin Ph. of 1833, made by boiling and expressing 664 parts of water, 7 of lemon-peel, 10 of cream of tartar, and 55 of water. Also applied to an old distilled preparation of aromatic herbs, alcohol, and water. [L. 85, 94.]—**A. infernalis.** Fr., *eau infernale*. Syn.: *hell water*. A term applied to

the juice of the fruit of the *Saguerus saccharifer*, which is very corrosive. [L. 105.]—*A. intercus*. *A. intercutem*, *Aque intercutis*. See ANASARCA.—*Aque jasse*. An old name for the springs of Saint Leonard. [L. 30.]—*A. javellensis*, *A. Javelli*. See *Javelle WATER*.—*A. kalina effervescens*. See *Liquor POTASSÆ effervescens*.—*Aque labodæ*. See SCIACCA.—*A. labyrintli*. See PERILYMPH.—*A. labyrintli membranacei*. See ENDOLYMPH.—*A. labyrintli lasei*. See PERILYMPH.—*Aque lapidificantes*. Waters which deposit an earthy sediment upon standing or after boiling. [L. 164.]—*Aque larodæ*. See SCIACCA.—*A. laxativa viennensis*. Fr., *eau laxative de Vienne*. Ger., *Wiener Laxiertränkehen*. A preparation official in the Palat. Disp. of 1764 and the Würtem. Ph. of 1793, made by digesting for several hours 90 parts of senna-leaves, 45 of dried currants, 11 of polypodium root, 7 of coriander, 15 of cream of tartar, and 900 of boiling water, filtering, and adding to the filtrate 200 of manna. Slightly differing formulæ are found in several old pharmacopœias. [L. 85.] Cf. *Infusum SENNÆ compositum*.—*A. liberans*. See *A. CALCIS magis composita*.—*A. lili*. See ORPIMENT.—*A. lithontriplica*. See *A. mephitico-alcalina*.—*A. lixivie caustice*. See *Liquor POTASSÆ*.—*A. lubrica*. An old term for mercury. [L. 53.]—*A. lubricata*. A mucilaginous or demulcent drink made of water, sugar, etc. [B. 50.]—*A. lucens*. See MERCURY.—*A. Lucia*, *A. Lucii*. Fr., *eau de luce*. See *Spiritus AMMONIÆ cum succino*.—*Aque luvenses Tungroorum*. See SPA.—*A. magnanimitatis*, *A. magnanimitatis simplex*. Fr., *eau de magnanimité*. It., *acqua di magnanimità*. An old term for an alcoholic infusion of red ants, used as an aphrodisiac. [A. 314.]—*A. magnesio-effervescens* [Fr. Cod.]. See *Eau magnésienne*.—*A. marina*. Salt water, sea-water. [B. 50; L. 53.]—*A. marina arte facta* (seu *factitia*). Artificial sea-water. [L. 164.]—*A. maritima effervescens*. See *Eau ferrée gazeuse*.—*Aque martiales*. Chalybeate waters. [L. 119.]—*A. mastichina*. Fr., *eau de mastic*. A preparation official in the Würtem. Ph. of 1798 and the Brunsw. Disp. of 1777, made by digesting for 3 days and distilling 108 parts of a mixture of 144 parts of water, 12 of mastic, 3 of nutmeg, and 36 of alcohol. [L. 85.]—*Aque mattiacæ*. The old Roman name for Wiesbaden. [A. 363.]—*Aque medicatæ*. See *Aque destillatæ* and *Aque extemporatæ*.—*A. medicinalis Hussonii*. Fr., *eau médicinale d'Husson*. A mixture of 1 part of tincture of gratiola and 2 parts of Spanish wine. [B. 270.]—*A. megl*. See *A. VITRIOLI*.—*A. mellis*. See HYDROMEL.—*A. mephitico-alcalina*. Fr., *eau mephitique gazeuse*. Syn.: *potio alcalina*. A solution, official in a number of old pharmacopœias, of potassium bicarbonate in carbonic-acid water; used for gravel. [L. 85.] Cf. *A. supercarbonatatis sodæ* and *Eau alcaline gazeuse*.—*A. mercurialis*. Fr., *eau mercurielle*. A term loosely applied to almost any solution containing mercury. See *Acetum philosophicum*.—*A. mercurialis charras*. See *Liquor HYDRARGYRI nitralis*.—*A. mercurialis composita*. See *Liquor HYDRARGYRI perchloridi*.—*A. mercurialis nigra*. See *Lotio HYDRARGYRI nigra*.—*A. mercurialis pro scabiosis*. A preparation of Horstius consisting of equal parts of corrosive sublimate and euphorbium with an excess of arsenic beyond what the menstruum can dissolve. In a similar preparation of Zwelper's, aloes was added, and in that of Junken a number of ingredients were employed. [B. 59.]—*A. mercurii*. See under MERCURIUS.—*A. metallorum*. An alchemical name for mercury. [L. 77.]—*Aque metus*. See HYDROPHOBIA.—*Aque minerales*. Mineral waters. [L. 119.]—*Aque minerales acidulæ*. Mineral waters containing gases. [L. 45.]—*Aque minerales artificiales*. Artificial mineral waters. [L. 119.]—*Aque minerales ferrugineæ*. See *Aque ferræ*.—*Aque minerales sulphuræ*. Mineral waters containing sulphur. [L. 45.]—*A. mineralis*. A mineral water.—*A. mineralis cathartica*. 1. A mineral water having cathartic properties. 2. See *Mixtura MAGNÆSÆ sulphuricæ*.—*A. mineralis ferruginosa* [Gr. Ph.]. See *Eau ferrée gazeuse*.—*A. mineralis pulluensis*. An artificial Pullna water, made of 21 parts of magnesium sulphate, 3 of magnesium chloride, 15 of sodium sulphate, 1 each of sodium and calcium chlorides, and 625 of carbonic-acid water. [Gr. Ph. (L. 123).]—*A. mineralis seidlitzensis artificialis*. An artificial Seidlitz water made of 30 parts of magnesium sulphate, 4 each of sodium bicarbonate and tartaric acid, and 650 of water. [Gr. Ph. (L. 123).]—*A. mirabilis*. An old term for several aromatic preparations used for the relief of colic. Cf. *A. aromatica* and *Spiritus PIMENTÆ*.—*A. Monterossi*. See *ACQUA stagnatica di Monterossi*.—*A. Morgagni*. Fr., *eau (ou liquide) de Morgagni*. Ger., *Morgagni'sche Flüssigkeit*. It., *acqua di Morgagni*. Sp., *agua de Morgagni*. A fluid which was formerly supposed to surround the crystalline lens and separate it from the capsule. [F.]—*A. mulsa*. See HYDROMEL.—*A. muriatico-mercurialis*. See *Lotio HYDRARGYRI lutea*.—*A. natro-effervescens* [Fr. Cod.]. Fr., *eau acide bicarbonatée*. It., *acqua degl' Inghesi*. A preparation consisting of 15 grains of sodium bicarbonate dissolved in a little water and placed in a bottle with 22 fluidounces of water charged with carbon dioxide under a pressure of 7 atmospheres. [B.]—*A. nephretica*. Fr., *eau antinephritique*. A mixture of 7 parts of sodium carbonate and 720 of lime-water, official in several old pharmacopœias; also see *Spiritus MYRSICÆ*. [L. 85.]—*A. nephritica*. Snow water. [L. 119.]—*Aque nerenses*, *Aque Neri*, *Aque Neris*. See NERIS.—*A. nigra*. See *Lotio HYDRARGYRI nigra*.—*A. Nisnii*. See BOURBON-LANCY.—*A. nivalis*, *A. nivata*. Snow water. [L. 119.]—*A. non maderaciens mannis*. See MERCURY.—*A. nubis*. See *A. solvens*.—*A. obscura*. See CATARACT.—*A. odorifera*. Fr., *eau odoriférante*. A preparation official in the Würtem. Ph. of 1793, made by digesting for three days and distilling three quarters of a mixture of 60 parts each of cinnamon, rose and convallaria blossoms, 45 each of cloves, lignum rhodii, and fresh lemon-peel, 30 each of marjoline, lavender, and rosemary, 1,440 of water, and 2,880 of alcohol. [L. 85.]—*A. omnium florum*. A liquid obtained by the distillation of cow dung collected in May; formerly used in phthisis. [L. 164.]—*A. ophthalmica*. Fr., *eau ophthalmique*. 1. Any variety of liquid application for the eyes.

2. A mixture of 2 parts of ammonium chloride and 31 of water, official in the Batav. Ph. of 1811. [L. 85.]—*A. ophthalmica adstringens*. See *A. ophthalmica aluminosa* and *Collyrium adstringens zinci*.—*A. ophthalmica alba*. A mixture of 5 parts each of zinc sulphate and zinc oxide, 20 of tincture of opium, 40 of alcohol, and 1,000 of rose-water. [B. 270.]—*A. ophthalmica aluminosa*. A preparation official in several old pharmacopœias, consisting of alum and water in varying proportions. [L. 85.]—*A. ophthalmica cærulea*. See *Solutio CUPRI ammoniacalis*.—*A. ophthalmica Conradi*. Fr., *eau ophthalmique de Conrad*. See *Collyrium ex HYDRARGYRO muriatico corrosivo*.—*A. ophthalmica Lanfranci*. See *Mixture cathérétique*.—*A. ophthalmica mercurialis*. Fr., *eau ophthalmique mercurielle*. See *Collyrium ex murate HYDRARGYRI oxygenato*.—*A. ophthalmica nigra Graefi*. A mixture of 3 parts of calomel, 5 of extract of hyoscyamus, 150 of rose-water, and 500 of lime-water. [B. 270.]—*A. ophthalmica Odhelli*. See *Decoctum RUTÆ zincatum*.—*A. ophthalmica pragensis*. A mixture of 1 part of zinc sulphate, 1 part of mucilage of gum arabic, and 50 parts each of rose-water and elder-flower-water. [B. 270.]—*A. ophthalmica resolvens*. Fr., *eau ophthalmique resolutive*. A preparation official in the Hamburg Cod. of 1835, containing 1 part of antimony and potassium tartrate, 60 parts of laudanum, and 240 of water. [L. 85.]—*A. ophthalmica Romerhausenii*. See *A. ophthalmica feniculata*.—*A. ophthalmica Saturnii* (seu *saturnina*). A mixture of 1 part of acetate of lead, 15 parts of mucilage of quince-seeds, and 240 of rose-water. [B. 270.]—*A. ophthalmica vitriolica*. See *Collyrium adstringens zinci*.—*A. orientalis*. A hair-dye containing nitrate of silver. [L. 120.]—*A. orientalis Hebreæ*. A mixture of 1 part of corrosive sublimate, 600 parts of emulsion of bitter almonds, and 3 of tincture of benzoin. [L. 57.]—*Aque Originis*. See BANDE.—*A. oxygenata*. Fr., *eau oxygénée*. 1. Water containing oxygen in solution. 2. See *A. CHLORI*.—*A. oxygeno-muriatica*, *A. oxymuriata*. See *A. CHLORI*.—*Aque paciace*. See PASSY.—*A. Pagliari*. See *A. hæmostatica*.—*A. palestina*. Verdigris. [B. 50.]—*A. paludosa*, *A. palustris*. Pond water. [L. 119.]—*Aque panonica*. See BADEN (1st def.).—*A. paralyseos*. Fr., *eau de primèrère*. See under PARALYSIS.—*Aque Passeri*. See PASSY.—*Aque patavina*. See ABANO.—*Aque pavor*. See HYDROPHOBIA.—*A. pedum*. Urine. [K. 3.]—*A. pericardii*. The pericardial fluid. [B. 260.]—*A. perlata*. See *A. confortativa*.—*A. permanens*. A liquid formed by the "philosophical solution" of the two most perfect metallic bodies (gold and silver) at the same time. [B. 50.]—*A. pestifentialis*. Syn.: *alcohol camphoratum crocatum*. A mixture of spirits of camphor and tincture of saffron in varying proportions; formerly official in several pharmacopœias. [L. 85.]—*Aque Petrimontis*. See PYRMONT.—*A. phagedenica*. Fr., *eau phagédénique* [Fr. Cod.]. Ger., *phagedénisches Wasser*. It., *acqua fagedénica*. Sp., *agua fagedénica*. 1. A solution of 1 part of corrosive sublimate in 30 parts of lime-water [Ger. Ph., Swiss Ph.], 1 to 250 [Dan. Ph.], or 1 to 300 [Fr. Cod.], or 1 to 144 [Netherl. Ph.]. 2. An old term for an aqueous solution of corrosive sublimate and sal ammoniac. [A. 305.]—*A. phagedenica decolorata*. Ger., *farbloßes phagedénisches Wasser*. A solution containing 16 grains of corrosive sublimate, 1 drachm of ammonium chloride, and 4 lbs. of water. [L. 129.]—*A. phagedénica flava*. A preparation made by dissolving 1 part of corrosive sublimate in an equal quantity of distilled water and adding 248 parts of lime-water. [L. 123.]—*A. phagedénica lutea*. Ger., *gelbes phagedénisches Wasser*. A mixture of one part of corrosive sublimate and 128 of lime-water. [L. 129.]—*A. phagedénica nigra*. See *Lotio HYDRARGYRI nigra*.—*A. phagedénica rubra*. A preparation official in the Gr. Ph., containing one part of corrosive sublimate and 240 of water. [L. 123.]—*A. phagedénica* [Fr. Cod.]. See *A. phagedénica*.—*A. philosophica*. An alchemical name for various liquids, including distilled vinegar. [B. 50.]—*A. philosophorum*. Of the alchemists, the radical moisture found in animal, vegetable, and liquid substances. [B. 200.]—*A. physagoga*. Fr., *eau physagogue*. A preparation official in the Würtem. Ph. of 1798, made by distilling one half of a mixture of 24 parts of aniseed, 3 of *Laserpitium latifolium* seeds, 1 each of cinnamon, nutmeg, galangal, caraway, and mace, 384 of white wine, and 48 of alcohol. [L. 85.]—*A. picea* [Fr. Cod.]. See *A. PICIS*.—*Aque pituitæ*. See *Aque segetanæ*.—*Aque pisane*. An old name of a warm mineral spring northeast of Pisa. [L. 30.]—*A. plumbia*. See *Liquor PLUMBI subacetatis dilutus*.—*Aque plumbiæ*. See PLUMBIBES.—*A. plumbica*. See *A. plumbica*.—*A. pluvia*, *A. pluvialis*. Rain water. [B. 50.]—*A. pontificalis*. Fr., *eau pontificale*. An old term for the spiritus millefolii acetatus, the liquor vulnerarius vegetabilis Dippelii, the spiritus rosmarini acetatus, and the spiritus aromaticus. [L. 97.]—*A. pragensis*. See *A. fetida pragensis*.—*A. preservativa*. See *A. antivenerealis*.—*A. prophylactica*. Fr., *eau prophylactique*. Syn.: *acetum bezoardicum Sylvii*. A preparation official in the Würtem. Ph. of 1798, made by digesting for 12 hours 1 part each of angelica and zedoary roots, 2 parts of petasites root, 12 of freshly sliced lemon, 4 each of rue, balm, and scabiosa leaves, 2 of calendula flowers, 24 of young walnuts, and 144 of vinegar. [L. 85.]—*Aque prokina*. See PROVINS.—*A. pugilum*. See *A. regia*.—*A. pulverisata*. Nebulized or atomized water. [B.]—*A. pura*. Pure water. [L.]—*A. putealis*, *A. puteana*. Well water. [L.]—*Aque pyramontana*. See PYRMONT.—*A. rabelliana*, *A. Rabellii*, *A. rabelliana*. Fr., *eau de Rabel*. See *Mixtura sulfurico-acida*.—*A. regalæ* [Fr. Cod.]. *A. regia*, *A. regina*, *A. regis*. See NITRO-HYDROCHLORIC ACID.—*A. regine hungaricæ*. See *Spiritus ROSMARINI compositus*.—*A. rosa*. A name applied to two mineral springs in Switzerland, the one in the canton of Ticino and the other in the canton of Grison. [L. 30.]—*A. rubeca*. An alchemical term for the urine of men. [L. 53.]—*A. rubicunda*. See *A. VITRIOLI*.—*Aque sambucica*. See AIX-LES-BAINS.—*A. saccharata*. See *Eau sucrée*.—*A. Salschütz factitia* [Swiss Ph.]. An artificial mineral water made by placing in a tightly corked bottle 70 parts of magnesium sulphate, 5 of sodium bicarbonate, 700 of

distilled water, and 15 of dilute sulphuric acid (sp. gr., 1.117). [L, 123.]—*A. saischützensis*. See *A. sedlitzensis*.—*A. salina pyramantana*. See PYRAMONT.—*Aque salietia*. See SELTZ.—*A. salmatina*. Salt water. [B, 50.]—*A. salubris*. Mineral water. [L, 45.]—*A. Sanctæ Elisabethæ*.—*A. Sanctæ Isabelle*. See *A. reginæ hungaricæ*.—*A. Sanctæ Lucie*. See *A. Lucie*.—*A. sapphirina*.—*A. sappharina*. See *A. celestis*.—*A. Saturni*. See *A. saturnina*.—*A. saturnia*. An acidulous mineral spring. [B, 50.]—*A. saturnina*. See *Liquor PLUMBI subacetatis dilutus*.—*A. scelopetaria*. See *A. vulneraria*.—*A. scelopetaria aromatica*. See *Alcohol SALVIE vulnerariæ*.—*A. scelopetaria spirituosæ*. See *A. vulneraria spirituosæ*.—*A. scelopetaria Thedenii*. See *A. vulneraria Thedenii*.—*A. secunda*. A very dilute solution of nitric acid used for cleaning the surface of silver. [B, 86.]—*A. sedativa*.—*A. sedativa Raspaill* [Belg. Ph., Swiss Ph., Russ. Ph.]. Fr., *eau sédative* [Fr. Cod.]. A preparation official in the Belg., Swiss, Russ., and Sp. Ph.'s. The Belg. Ph. orders 20 parts of sodium chlorate, 873 of water, 100 of a. ammoniæ (sp. gr., 0.935), 2 of camphor, and 5 of alcohol; the Swiss Ph., 60 of sodium chlorate, 1,000 of water, 100 of a. ammoniæ (sp. gr., 0.960), 1 of camphor, and 9 of spirits; the Russ. Ph., 60 of sodium chlorate, 900 of water, 200 of a. ammoniæ (sp. gr., 0.960), 0.77 of camphor, and 9.23 of spirits. The Sp. Ph. orders 3 grades, of which the first contains 60 parts of sodium chlorate, 1,000 of water, 60 of a. ammoniæ (sp. gr., 0.923), 0.4 of camphor, and 9.6 of spirits; the second, 80 parts of sodium chlorate; and the third, 90, the other proportions and ingredients remaining the same. [L, 123.]—*A. sedlitzensis*.—*A. sedlitzensis extemporanea*. Sp., *agua de Sedlitz*. An artificial seltzer water ordered made by the Belg. Ph. of 60 parts of magnesium sulphate, 930 of water, and 5 each of sodium bicarbonate and tartaric acid; the Sp. Ph. orders 60 of magnesium sulphate, 1,920 of water, 25 of sodium bicarbonate, and 10 of concentrated sulphuric acid. [L, 123.]—*Aque selluntice*. See SELTZ.—*A. segl.* See *A. vitrioli*.—*Aque selluntice*. See SELTZ.—*A. seltzeriana*. Sp., *agua de Seltz*. An artificial water official in the Sp. Ph., containing 6 parts of calcium chloride, 5 of magnesium chloride, and 11.52 of water saturated with carbonic anhydride, or 20 parts of sodium chloride, 16 of sodium carbonate, 1 of sodium phosphate, 1 of sodium sulphate, and water as in the first. [L, 123.]—*Aque seltzeriana*. See SELTZ.—*A. serena*. See AMATROSI.—*Aque sextie*.—*Aque sextilie*. See AIX-LES-BAINS.—*A. sica*. See MERCURY.—*Aque sicca*. An ancient town of Gaul, near the present Toulouse, the situation of mineral springs highly esteemed by the Romans. [L, 30.]—*A. sine pari*. See *Eau sans pareille*.—*A. sodacea*. Carbonic-acid water. [L, 119.]—*A. solvens*. A name given to a strong solvent liquid obtained by distillation; especially applied to distilled vinegar and nitric acid. [B, 50.]—*A. spadana*.—*Aque spadana*. See SPA.—*Aque sineusane*. Mineral springs near Rocca di Mandragone in Italy. They were held in high esteem by the Romans. [L, 30.]—*Aque solis*. See BATH (1st def.).—*Aque spirituosæ*. Distilled waters containing alcohol. [B, 95.]—*A. splenetica*. Fr., *eau splénétique*. A preparation official in the Würtem. Ph. of 1798, containing 4 parts of tincture of castoreum, 11 of mistura pyrotartarica, 90 each of a. melissæ, mint-water, and the a. epileptica Langii, and 7 of oleosaccharum of rosemary. [L, 85.]—*Aque statiellæ*. See ACQUA.—*A. stettinensis ad usus externos*. Fr., *eau de Stettin*. A preparation official in the Brunsw. Disp. of 1777, made by expressing and filtering 16 parts each of pomegranate flowers and crystallized acetate of lead, 4 of white argol, 7 of tormentilla root, 30 of saccharat alum, 4 each of corrosive sublimate and red sandal wood, and 480 of alcohol. [L, 85.]—*A. stibiata*. See *Liquor ANTIMONIÏ tartarisati*.—*A. stillatitia*. See *A. destillata*.—*Aque stillatitie simplices*. See *Aque destillata*.—*Aque stillatitie spirituosæ*. See *Aque spirituosæ*.—*A. stomachica*. Fr., *eau stomachique*. A preparation official in the Würtem. Ph. of 1798, made by distilling one half of a mixture of 1 part each of cinnamon, galangal root, and nutmeg, 3 of fresh mint, and 96 of generous wine. [L, 85.]—*A. stygia*. See NITRIC acid.—*A. styptica*. Fr., *eau styptique*. Sp., *solución de sulfato zincico aluminoso* [Sp. Ph.]. A preparation official in the Sp. Ph., containing 1 part each of zinc sulphate and alum, and 24 parts of rose-water. [L, 123.] See also *Solutio sulphatis cupri composita*.—*A. styptica clementina*. See *Acqua stytica clementina*.—*A. sulfurata*. Sp., *agua sulfurea*. 1. See *Eau sulfurée*. 2. A preparation official in the Sp. Ph., containing 5 parts each of sodium carbonate, enlorate, and crystallized monosulphate, and 40 of water. [L, 123.]—*A. sulphurata acida*.—*A. sulphurata acidula*.—*A. sulphurato-acida*. See *A. sulphureo-acida*.—*A. sulphurato-stibiata*. See *Aqua CALCARIE sulphurato-stibiata*.—*Aque sulphuræ*. A term applied to sulphur springs by Sydenham. [B.]—*Aque Tacapnæ*. Warm mineral springs in Tripoli. [L, 109.]—*A. tarbellæ*.—*Aque tarbellicæ*. See DAX.—*A. tartarea*. The distillate from a mixture of antimony, nitre, and water. [L, 119.] Cf. *ANTIMONIUM diaphoreticum non ablutum*.—*A. tepida*. Tepid water; water ranging in temperature from 85° to 92° F. [B.]—*A. thediana*.—*A. Thedeni*. See *A. vulneraria Thedenii*.—*A. theriacalis bezoardica*. A liquor distilled from the theriaca Andromachi, the mithridate of Damocrates, tormentilla root, ash bark, and a large number of other ingredients. [L, 94.]—*A. theriacalis composita*.—*A. theriacalis frigida*.—*A. theriacalis romana*. See *A. scordii composita*. [L, 30.]—*A. soteria*.—*A. thermarum*. Mineral water. [L, 30.]—*A. tofana*.—*A. toffana*.—*A. toffana*. See *Acqua Tofana*.—*A. tonitrualis*. Water that falls in a thunder-shower. [B, 260.]—*A. traumatica*. See *A. vulneraria*.—*A. traumatica Senderi*. A milk-like mixture composed of 1 part of powdered sulphate of cinchonine and 2 parts of powdered alum dissolved in 200 parts of distilled water, with the addition of 5 parts of tincture of opium and 20 of tincture of benzoin; used as an application to wounds. [Pharm. Centrall., 1882; "Am. Jour. of Pharm.," June, 1882, p. 308 (B).]—*A. traumatica Thedenii*.—*A. traumatica vegeto-mineralis Thedenii*. See *A. vulneraria Thedenii*.—*A. Tungrorum*. See SPA.—*A. valens*. See *A. fortis*.—*A. vegeto-mineralis* [Fr.

Cod.]. See *Liquor PLUMBI subacetatis dilutus*.—*A. vegeto-mineralis Goulardii*. See *A. Goulardii*.—*A. vegeto-mercurialis Pressavini*. Fr., *eau végétomercurelle*. An aqueous solution of the tartrate of mercury and potassium. [L, 85.]—*Aque Verbigenæ*. See *Aque Helveticæ*.—*A. vichiensis artificialis*.—*A. viciensis artificialis*. An artificial Vichy water; official in the Belg. Ph., containing 6 parts of sodium bicarbonate, 0.3 part each of sodium and calcium chlorates, 0.6 of sodium sulphate, 0.25 of magnesium sulphate, 0.05 of iron sulphate, and 1,000 of carbonated water. [L, 123.]—*Aque Vici calidi*.—*Aque viciensis*. See VICHY.—*A. vini*. See ACETUM and ALCOHOL.—*A. vinosa*. See *A. vulneraria*.—*Aque vinosa*. See *Aque spirituosæ*.—*A. virginea viscosa*. See *A. permanens*.—*A. viridis Hartmanni*. Fr., *eau de Hartmann*. A preparation official in the Liépian Disp. of 1794, composed of 7 parts each of verdigris and burned alum, 15 of honey, and 360 of white wine. [L, 85.]—*A. visceralis*. Fr., *eau viscérale*. A very complex preparation, official in the Würtem. Ph. of 1798, made by distilling a mixture of crabs' eyes, calves' lungs, and a great number of herbs with water. [L, 85.]—*A. viscosa*. See MERCURY and *A. permanens*.—*A. vitæ*. Fr., *eau de vie*. Ger., *Aquavit*. 1. Mercury in its alchemical sense. 2. Alcohol. 3. A preparation containing alcohol. 4. Brandy. 5. A commercial term for ardent spirits of the first distillation, the so-called "low wines." [B, 2, 50.] 6. Of Paracelsus, a preparation made by infusing rose-leaves, rosemary, hellebore, cinnamon, mace, nutmeg, cloves, ginger, and other vegetable aromatics, with bean-shells and the juices of chelidonium, thapsia, and melissa, in ardent wine. [B, 255.]—*A. vitæ camphorata*. See *Alcoholatum CAMPHORÆ debile*.—*A. vitæ germanica*. See *Tinctura JALAPÆ composita*. [Belg. Ph.]—*A. vitæ rectificata*. Rectified spirit; alcohol obtained by the rectification of spirit of wine. [B, 97.]—*A. vitrioli alba*. See *Collyrium adstringens zinci*.—*A. vitriolica camphorata*. See *Liquor zinci sulphatis cum camphora*.—*A. vitriolica cerulea*. See *A. styptica*.—*A. vitrioli cerulea*. See *A. cerulea*.—*A. viva*. See MERCURY.—*A. vulneraria*. Fr., *eau vulnéraire*. Ger., *Wundwasser*. See *A. vulneraria Thedenii*.—*A. vulneraria spirituosæ*, and *Alcohol SALVIE vulnerariæ*.—*A. vulneraria acida*.—*A. vulneraria alba*.—*A. vulneraria Thedenii*. See *A. vulneraria Thedenii*.—*A. vulneraria alba*. See *A. vulneraria spirituosæ*.—*A. vulneraria romana*. See *A. pontificalis*.—*A. vulneraria rubra*. See *ALCOOLATURE vulnéraire*.—*A. vulneraria spirituosæ*. Fr., *eau vulnéraire spiritueuse*. Ger., *geistiges Wundwasser*. It., *acqua vulneraria spirituosæ*. Sp., *agua vulneraria spirituosæ*.—*Alcohol de salvia vulnerario* [Sp. Ph.]. A stimulating application for wounds; the Ger. Ph. (1st ed.) orders 1 part each of peppermint, rosemary, rue, and salvia leaves, herba absinthii, and lavender flowers, 18 of dilute alcohol, and 50 of water, to be macerated 2 days and 36 parts distilled; the Sp. Ph., 6 parts each of agrimony, artemisia, and betony leaves, 4 each of the tops and flowers of wormwood, hypericum, *Mentha arvensis*, salvia, and tansy, 2 each of the leaves and tops of lavender, marjoram, rosemary, and scordium, to be digested for 2 days in 192 parts of white wine, and 96 parts distilled; the Russ. Ph., 1 part each of lavender flowers, salvia, rosemary, and peppermint leaves, wormwood, and origanum herbs, 15 parts of dilute alcohol, and 50 of water, to be digested 24 hours, and 36 parts distilled. [L, 123.]—*A. vulneraria Thedenii*. Ger., *Theden's saures Wundwasser* (oder *Schusswasser*). A preparation containing acetic acid, alcohol, and sulphuric acid in varying proportions, either with or without honey or sugar. [B, 97.]—*A. vulneraria vinosa*. See *A. vulneraria spirituosæ*.—*A. vulnerata*. See *A. vulneraria*.—*Balneum aque marine artificialis* [Belg. Ph.]. Fr., *bain de sel marin* [Fr. Cod.]. Sp., *baño de mar* [Sp. Ph.]. A bath to be made extemporaneously with 5,000 grammes of sea-salt [Fr. Cod.], or with a mixture of sodium chloride 7,980 grammes [Belg. Ph.], (4,830 grammes [Sp. Ph.]), sodium sulphate 3,150 grammes [Belg. Ph.], (862.5 [Sp. Ph.]), magnesium chloride 2,900 grammes [Belg. Ph.], (949 [Sp. Ph.]), and calcium chloride 730 grammes [Belg. Ph.], (230 [Sp. Ph.]). [B, 95.]—*Double a. fortis*. Lat., *a. fortis duplex*. An aqueous solution of nitric acid of the sp. gr. of 1.36 and of half the strength of concentrated nitric acid. [B, 5.]—*Single a. fortis*. Lat., *a. fortis simplex*. An aqueous solution of nitric acid of the sp. gr. of 1.22 and of half the strength of double a. fortis. [B, 5.]—*Syrupus cum a. picea*. See *Syrupus piceis liquidus*.

**AQUÆDUCTUS** (Lat.), n. m. A<sup>2</sup>k(a<sup>3</sup>)-kwe(kwa<sup>3</sup>-e<sup>2</sup>)-du<sup>3</sup>kt(dukt)<sup>1</sup>-u<sup>3</sup>s(u<sup>3</sup>s). Gen., *aqueductus*. From *agua*, water, and *ducere*, to conduct. See *AQUEDUCT*.—*A. cerebri*. See INFUNDIBULUM (2d def.).—*A. cochleæ*. See *AQUEDUCT of the cochlea*.—*A. communicantis*. A small canal of the temporal bone, transmitting a small venous twig to the termination of the transverse sinus. [Verga, "Ann. univers. di med.," 1856, p. 175 (L, 31).]—*A. Cotunnii*. See *AQUEDUCT of the vestibule*.—*A. Fallopii*. See *AQUEDUCT of Fallopius*.—*A. Sylvii*. See *AQUEDUCT of Sylvius*.—*A. temporalis*. A canal sometimes found at the posterior part of the superior angle of the petrous portion of the temporal bone, for the passage of the squamoso-petrosal sinus. [Verga (L, 31).]—*A. vestibuli*. See *AQUEDUCT of the vestibule*.

**AQUÆMETUS** (Lat.), n. m. A<sup>2</sup>k(a<sup>3</sup>)-we<sup>2</sup>m'(wa<sup>3</sup>-e<sup>2</sup>m)-e<sup>2</sup>t-u<sup>3</sup>s(u<sup>3</sup>s). Gen., *aquæmetus*. More properly written *aque metus* (dread of water). See HYDROPHOBIA.

**AQUALA** (Lat.), n. f. A<sup>2</sup>k(a<sup>3</sup>)-ka(wa<sup>3</sup>)/la<sup>3</sup>. An old name for sulphur and for arsenic. [L, 104.]

**AQUALICULUS** (Lat.), n. m. A<sup>2</sup>k(a<sup>3</sup>)-ka<sup>3</sup>-li<sup>2</sup>k(u<sup>3</sup>)-lu<sup>3</sup>s(lu<sup>3</sup>s). An old term for the abdomen, especially its lower portion. [Galen (A, 325).]

**AQUA-MALARIAL**, adj. A<sup>2</sup>'kwa<sup>3</sup>-ma<sup>3</sup>-a<sup>3</sup>/ri<sup>2</sup>-a<sup>3</sup>l. See *A. m. FEVER*.

**AQUAMARINE**, n. A<sup>2</sup>k-wa<sup>3</sup>-ma<sup>3</sup>-en'. Ger., *Aquamarin*. The green variety of topaz. [B, 180.]—*Oriental a. Ger., orient-*

*talischer Aquamarin*. The green variety of the beryl, formerly used in medicine. [B, 180.] See *Quinque fragmenta LAPIDUM pretiosorum*.

**AQUAPUNCTEUR** (Fr.), n. A<sup>3</sup>-ka<sup>3</sup>-pu<sup>n</sup>-k<sup>2</sup>-tu<sup>5</sup>r. An instrument for performing aquapuncture (q. v.).

MATHIEU'S AQUAPUNCTEUR.

**AQUAPUNCTURE**, n. A<sup>1</sup>-kwa<sup>3</sup>-pu<sup>n</sup>-k<sup>2</sup>-tu<sup>5</sup>r. From *aqua*, water, and *punctura*, a puncture. Fr., *aquapuncture*. Ger., *Aquapunctur*. It., *acquapuntura*. Sp., *aguapuntura*. 1. A French method of producing counter-irritation or revulsion by forcing a fine jet of water or some other liquid into or through the unbroken skin. Mathieu's instrument for the purpose (see **AQUAPUNCTEUR**) is a force-pump capable of forcing the liquid even into the subcutaneous tissue, the delivery tube being held at a distance of about a third of an inch from the skin. A wheal-like elevation of the skin usually results, with occasionally a minute extravasation of blood at its centre. The pain is severe at first, but usually disappears in 15 or 20 minutes. The method has been used successfully in neuralgia, muscular rheumatism, etc. [A, 319.] 2. The subcutaneous injection of water as a placebo. [B.]

**AQUARACINIA-ACU** (Port.), n. A<sup>3</sup>-kwa<sup>3</sup>-ra<sup>3</sup>-then'ya-a<sup>3</sup>'ku. See **AQUARACINHA-ACU**.

**AQUARA-IBI**, n. See **AQUARAIBAY** and **SCHINUS molle**.

**AQUARIUM** (Lat.), n. n. A<sup>2</sup>-k(a<sup>3</sup>)-wa(wa<sup>3</sup>)/ri<sup>2</sup>-u<sup>3</sup>m(u<sup>4</sup>m). Lit., a watering-place for cattle: a vessel or tank made entirely or largely of glass, for containing living aquatic animals or plants. [A, 385.]—**A. fluviatile**. An a. made in the form of a conduit so as to be filled with running water. [B, 198.]—**A. lacustre**. An a. in the form of a basin. [B, 198.]—**A. palustre**. An a. consisting of a swampy basin; used in the cultivation of swamp-plants. [B, 198.]—**A. uliginosum**. An a. filled with boggy soil and stagnant water, for the cultivation of bog-plants. [B, 198.]

**AQUARIUS** (Lat.), adj. A<sup>2</sup>-k(a<sup>3</sup>)-wa(wa<sup>3</sup>)/ri<sup>2</sup>-u<sup>3</sup>s(u<sup>4</sup>s). Pertaining to water, aqueous; as a n., an old name for iron. [Ruland, Johnson (A, 325).]

**AQUASTER** (Lat.), n. m. A<sup>2</sup>-k(a<sup>3</sup>)-wa<sup>2</sup>st(wa<sup>3</sup>st)/u<sup>5</sup>r(e<sup>2</sup>r). Gen., *aquast'ri*. A word used by Paracelsus to signify a faculty by which past events or distant objects are conceived of as present; a sort of second sight, regarded by Paracelsus as a variety of magical science. [B, 255.]

**AQUATE**, n. A<sup>1</sup>-kwat. A substance containing water of crystallization with which it is in molecular combination. [B, 159.]

**AQUATIC**, adj. A<sup>2</sup>-k-wa<sup>2</sup>/i<sup>2</sup>k. Lat., *aquaticus*, *aquatilis*. Fr., *aquatique*, *aquatile*. Ger., *aquatisch*, *wasserlebens*. It., *acquatico*. Sp., *acuítico*. Belonging or living in water (said of animals and plants, and sometimes applied to animals that simply spend most of their time in or on the water).—**A. respiratory**. Pertaining to or performing the function of a respiration. [L.]

**AQUATICÆ** (Lat.), n. f. pl. A<sup>2</sup>-k(a<sup>3</sup>)-wa<sup>2</sup>t(wa<sup>3</sup>t)/i<sup>2</sup>s(i<sup>2</sup>k)-e(a<sup>3</sup>-e<sup>2</sup>). Of Endlicher, a class of apetalous plants comprising the orders *Ceratophylleæ*, *Callitrichinæ*, and *Podostemmeæ*. [B, 170.] Cf. **APETALÆ**.

**AQUATICAL**, **AQUATILE**, adj's. A<sup>2</sup>-k-wa<sup>2</sup>/i<sup>2</sup>k-a<sup>2</sup>l, A<sup>2</sup>-k-wa<sup>2</sup>-i<sup>2</sup>l. See **AQUATIC**.

**AQUATUM** (Lat.), n. n. A<sup>2</sup>-k(a<sup>3</sup>)-wa(wa<sup>3</sup>)/tu<sup>3</sup>m(tu<sup>4</sup>m). 1. A dilute, watery preparation. 2. The chalazion of an egg. [Severinus (A, 325); L, 104.]

**AQUAVIT** (Ger.), n. A<sup>3</sup>-kwa<sup>3</sup>-fet'. See **AQUA vitæ**.

**AQUEDUC**, **AQUÉDUC** (Fr.), n's. A<sup>3</sup>-k-du<sup>k</sup>-ka-du<sup>k</sup>. See **AQUEDUCT**.—**A. de Cotugno**. See **AQUEDUCT of the vestibule**.—**A. de Fallopie**. See **AQUEDUCT of Fallopio**.—**A. des tubercules quadrifumeaux**, **A. de Sylvius**. See **AQUEDUCT of Sylvius**.—**A. du limaçon**. See **AQUEDUCT of the cochlea**.

**AQUEDUCT**, n. A<sup>2</sup>-k-we<sup>2</sup>-du<sup>3</sup>kt. Gr., *ὕδωρ ὁδὸς* [Oribasius]. Lat., *aqueductus* (= *aqua ductus* [from *ducere*, to lead, conduct]). Fr., *aqueduc*, *aquéduc*. Ger., *Wasserleitung*. It., *acquedotto*. Sp., *acueducto*. A canal, channel, or tube for the conveyance of a watery liquid (said also of a few canals which transmit blood-vessels or nerves). [L.]—**A. of Cotunnus**. Lat., *aqueductus Cotunnii* (from the Latinized name of Cotugno). Fr., *aqueduc de Cotugno*. See **A. of the vestibule**.—**A. of Fallopio**. Lat., *aqueductus Fallopii* (from the Latinized name of Falloppio). Fr., *aqueduc de Fallopie*. Ger., *Falloppische Wasserleitung*, *Spiralgang in der Paukenhöhle*. It., *acquedotto di Falloppio*. Sp., *acueducto de Fallopio*. A canal in the petrous portion of the temporal bone, transmitting the facial nerve; it begins at the upper part of the lamina cribrosa, passes outward and backward over the labyrinth of the ear, and terminates in the stylo-mastoid foramen. [C; L, 142.]

—**A. of Sylvius**. Lat., *aquæ ductus Sylvi* (from the Latinized name of Dubois). Fr., *aqueduc de Sylvius*, *entonnoire*, *canal intermédiaire des ventricules*. Ger., *Sylvischer Gang*, *Sylvische Wasserleitung*, *Canal der Vierhögel*. It., *acquedotto di Silvio*, *canale intermediario dei ventricoli*. Sp., *acueducto de Silvio*. Syn.: *iter e tertio ad quartum ventriculum, canalis medianus* (seu *corporum sui tuberculorum*) *quadrigeniorum*). A narrow canal, about half an inch long, leading from the third into the fourth ventricle of the brain. It is lined with ciliated epithelium and surrounded with gray matter which is in relation with the roots of the third, fourth, and fifth nerves. [I, 15; K.]—**A. of the cochlea**. Lat., *aqueductus cochleæ*. Fr., *aqueduc du limaçon*. Ger., *Wasserleitung der Schnecke*. It., *acquedotto della chiocciola*. Sp., *acueducto del caracol*. A small canal which arises in the scala tympani, in the neighborhood of the fenestra rotunda, and opens into the cranial cavity near the lower edge of the pyramid, effecting an immediate communication of the arachnoid space with the perilymphatic fluid of the labyrinth. [F, 32.]—**A. of the vestibule**. Lat., *aqueductus vestibuli* (seu *Cotunnii*), *canalis endolymphaticus*. Fr., *aqueduc du vestibule*. Ger., *Wasserleitung des Vorhofs*. It., *acquedotto del vestibolo*. Sp., *acueducto del vestibulo*. A canal which arises as a thin membranous tube from the utricle, in the immediate neighborhood of the embouchure of the superior and posterior semicircular canals, then proceeds through a thin osseous canal to the posterior wall of the pyramid, and opens into a spacious cul-de-sac covered by the dura mater and connected with the endolymphatic spaces of the labyrinth. [F, 32.]—**Sylvian a.** See **A. of Sylvius**.

**AQUEO-IGNEOUS**, adj. A<sup>2</sup>-k'-we-o-i<sup>2</sup>g'-ne-u<sup>3</sup>s. From *aqua*, water, and *ignis*, fire. Of, pertaining to, or produced by the aid of water and heat, or superheated water. [B, 39.]

**AQUEO-IGNEOUSLY**, adv. A<sup>2</sup>-k'-we-o-i<sup>2</sup>g'-ne-u<sup>3</sup>s-li<sup>2</sup>. In an aqueo-igneous manner. [B, 39.]

**AQUEOLA** (Lat.), n.f. A<sup>2</sup>-k(a<sup>3</sup>)-we(wa)/o-la<sup>3</sup>. See **AQUULA**.

**AQUEOSE**, adj. A<sup>1</sup>-kwe-os. See **AQUEOUS**.

**AQUEOUS**, adj. A<sup>1</sup>-kwe-u<sup>3</sup>s. Lat., *aqueosus*, *aqueus*. Fr., *aqueux*. Ger., *wässerig*. It., *acquoso*. Sp., *acuoso*. Watery; resembling, containing, combined with, dissolved in, diluted with, made with, or formed from water. [B.]

**AQUEOUSNESS**, n. A<sup>1</sup>-kwe-u<sup>3</sup>s-ne<sup>2</sup>s. See **AQUOSITY**.

**AQUETTE** (Fr.), n. A<sup>3</sup>-ke<sup>2</sup>t. 1. See **ACQUA Tofana**. 2. An Italian liqueur made of wine, water, and various aromatics. [L, 42.]

**AQUEUS** (Lat.), adj. A(a<sup>3</sup>)/kwe(kwe<sup>2</sup>)-u<sup>3</sup>s(u<sup>4</sup>s). See **AQUEOUS**.

**AQUEUX** (Fr.), adj. A<sup>3</sup>-ku<sup>5</sup>. See **AQUEOUS**.

**AQUICOLE** (Fr.), adj. A<sup>3</sup>-ke-kol. From *aqua*, water, and *colere*, to inhabit. See **AQUATIC**.

**AQUIDUCOUS**, adj. A<sup>2</sup>-k-wi<sup>2</sup>-du<sup>2</sup>/ku<sup>3</sup>s. Lat., *aquiducus* (from *aqua*, water, and *ducere*, to lead). Hydragogue. [Cælius Aurelianus (A, 325).]

**AQUIFEROUS**, adj. A<sup>2</sup>-k-wi<sup>2</sup>/e<sup>2</sup>r-u<sup>3</sup>s. Lat., *aquiferus* (from *aqua*, water, and *ferre*, to bear). Fr., *aquifère*. Ger., *wassertragend*. Water-carrying (said of the water-vascular system of the *Annuloidæ*). [B, 28.] See **A. CANALS**.

**AQUIFOLIACEÆ** (Lat.), n. f. pl. A<sup>2</sup>-k(a<sup>3</sup>)-wi<sup>2</sup>-fo-li<sup>2</sup>-a(a<sup>3</sup>)/se<sup>2</sup>-(ke<sup>2</sup>)-e(a<sup>3</sup>-e<sup>2</sup>). From *acus*, a needle, and *folium*, a leaf. Fr., *aquifoliacées*. Sp., *aquifoliáceas*. Syn.: *Ilicinæ*. The hollyworts; in the systems of De Candolle, Reichenbach, Lindley, and others, an order of shrubs or trees bearing simple, evergreen, exstipulate leaves; and small axillary flowers with 4 to 6 very minute sepals, a 4-cleft or 6-cleft hypogynous corolla, a definite number of stamens inserted into the corolla and alternate with its segments, and a 2- to 8-celled ovary with a single ovule suspended in each cell. The fruit is drupaceous. The principal genera are *Ilex*, *Prinos*, and *Cassine*. [B, 34, 104.]

**AQUIFOLIACEOUS**, **AQUIFOLIOUS**, adj's. A<sup>2</sup>-k-wi<sup>2</sup>-fo-li<sup>2</sup>-a/shu<sup>3</sup>s, fo-li<sup>2</sup>-u<sup>3</sup>s. Fr., *aquifoliacé*. See **ACUMINFOLIOUS**.

**AQUIFOLIUM** (Lat.), n. n. A<sup>2</sup>-k(a<sup>3</sup>)-wi<sup>2</sup>-fo-li<sup>2</sup>-u<sup>3</sup>m(u<sup>4</sup>m). 1. See **ILEX** and **ILEX a.** 2. The leaves of *Ilex a.* [B, 180.]—**A. carolinense** [Cat. car.]. See **ILEX cassine**.—**A. ilex** [Scopoli]. **A. spinosum** [Gärtner]. See **ILEX a.**—**Folia aquifolii**. The leaves of *Ilex a.* [B, 180.]

**AQUIFORM**, adj. A<sup>2</sup>-k-wi<sup>2</sup>-fo<sup>2</sup>rm. From *aqua*, water, and *forma*, form. Resembling water. [L, 73.]

**AQUIFOUX** (Fr.), n. A<sup>3</sup>-ke-fu. See **ALQUIFUZ**.

**AQUIGENOUS**, adj. A<sup>2</sup>-k-wi<sup>2</sup>/e<sup>2</sup>n-u<sup>3</sup>s. From *aqua*, water, and *gignere* (= *gignere*), to grow. Fr., *aquigène*. Growing in the water. [L, 41.]

**AQUILA** (Lat.), n. f. A<sup>2</sup>-k(a<sup>3</sup>)/wi<sup>2</sup>-l-a<sup>3</sup>. Gen., *aquilæ*, -æ. Gr., *ἀετός*. Fr., *aigle*. Ger., *Adler*. It., *aquila*. Sp., *águila*. 1. The eagle. Its gall, distilled with oil of violets, was recommended by Avicenna for pains and ringing in the ears, and its excrement to prevent abortion. Various parts of the bird were used medicinally by the ancients. [L, 94.] 2. An alchemical name for sal ammoniac, mercurius præcipitatus, arsenic, sulphur, the philosopher's stone, and a number of other things more or less mystical. [B, 50.] 3. In the pl., *aquilæ* (fem. pl. of adj. *aquilus*), see **VENÆ aquilæ**.—**A. alba**. An old term for calomel, sal ammoniac, or any white sublimate. [B, 86; L, 109.]—**A. alba philosophorum**. Sal ammoniac. [L, 104.]—**A. celestis**. An old name for some mercurial sublimate (according to various authors, calomel, mercurus sulphate, or white precipitate). [A, 314, 316, 325.]—**Aquilæ lacrimæ**. An old name for some liquid mercurial preparation. [L, 94, 116.]—**A. mercurii**, **A. mitigata**. Old terms for calomel.—**A. nigra**. An old name for some preparation of cobalt, supposed to be the material of the "mercurius philosophorum." [A, 325; L, 84.]—**A. philosophorum**. An old name for mercury ("mercurius metallorum, id est metallum in primam sui materiam redactum"). [B, 50.]—**A. Veneris**. An old preparation of verdi-

gris and sal ammoniac. [L. 104.]—*Lignum aquile*. See ALOES-  
WOOD.—*Vene aquile*. See under VENA.

**AQUILANEUS** (Lat.), n. m.  $A^2k(a^3k)\cdot wi^2l\cdot a(a^3)\cdot ne^2\cdot u^3s(u^4s)$ .  
See *Viscum album*.

**AQUILARIA** (Lat.), n. f.  $A^2k(a^3k)\cdot wi^2l\cdot a(a^3)\cdot ri^2\cdot a^3$ . Ger., *Ad-  
lerholz*. A genus of trees, made by Lamarck, belonging to the order  
*Aquilaria*, distinguished by its 5-parted top-shaped calyx, with  
reflexed sepals and with 10 woolly scales adherent to the interior of  
the calyx tube and alternating with the 10 stamens, which are also  
adherent for almost their whole length to the calyx. The anthers  
are versatile, and there is a single short style placed upon a bilocu-  
lar ovary with a single suspended ovule in each cell. [B. 19.]—*A.*  
*agallocha* [Roxburgh]. Syn.: *Aloexylum agallochum* [Batsch].  
A large tree with alternate lanceolate leaves, growing in Silhet,  
and furnishing one of the best varieties of aloes-wood. [B. 19; L. 105.]—*A.*  
*chilensis* [Sprengel]. Syn.: *Ophiospermum sinense* [Lou-  
reiro]. A species growing in southern China, having lanceolate,  
undulate, shining leaves and solitary, terminal, 6-parted flowers.  
[B. 46.]—*A. malaccensis* [Lamarck], *A. ovata* [Cavanilles].  
Syn.: *Aloexylum ovatum* [Batsch]. A tree 60 feet high growing in  
Malacca and in China; having short-petiolate ovate, acuminate,  
entire leaves, yellow leathery flowers with ovate sepals, and woody  
capsular fruit about 1 inch in length and  $\frac{1}{2}$  inch broad. Its wood  
is the *tignum aspalathum officinale*, one of the varieties of aloes-  
wood. [B. 180.]—*A. secundaria* [De Candolle]. A tree, growing  
in the Moluccas, closely resembling the *A. malaccensis*, and like it  
furnishing a variety of aloes-wood. [B. 180.]

**AQUILARIACEÆ** (Lat.), n. f. pl.  $A^2k(a^3k)\cdot wi^2l\cdot a(a^3)\cdot ri^2\cdot a^3$ .  
 $a(a^3)\cdot se^2(ke^2)\cdot e(a^3\cdot e^2)$ . Fr., *aquilaria*. The aquilariads; an order  
of calcyciferous trees, placed by Lindley in the daphnall alliance,  
comprising fragrant tropical species with minute apetalous flowers.  
By some this order is referred to the *Thymelæceæ* or to the *Ulmaceæ*.  
The principal genus is *Aquilaria*. [B. 19, 170.]

**AQUILARIADS**, n. pl.  $A^2k\cdot wi^2l\cdot a^3\cdot ri^2\cdot a^2dz$ . See AQUILARIACEÆ.

**AQUILARIÆ** [Decaisne], **AQUILARINÆ** [R. Brown],  
**AQUILARINÆ** [De Candolle] (Lat.), n's. f. pl.  $A^2k(a^3k)\cdot wi^2l\cdot a^3\cdot ri^2\cdot a^3$ .  
 $i(e)\cdot e^2\cdot e(a^3\cdot e^2)$ ,  $i(e)\cdot ne(na^3\cdot e^2)$ ,  $i^2n\cdot e^2\cdot e(a^3\cdot e^2)$ . See AQUILARIACEÆ.

**AQUILEGIA** (Lat.), n. f.  $A^2k(a^3k)\cdot wi^2l\cdot e(a^3)\cdot ji^2(gi^2)\cdot a^3$ . From  
*aquila*, an eagle, on account of the spurred petals. A genus of ran-  
unculaceous plants of the tribe *Heleboræ*, distinguished by hav-  
ing 5 equal, ovate, spreading, colored sepals, and 5 equal, tubular,  
spurred petals larger than the sepals. [B. 34.]—*A. alpina*. A  
European species with larger flowers and shorter spurs than *A. vul-  
garis* [B. 19], to which it is sometimes referred. [B. 7.]—*A. cæru-  
lea*. The Rocky Mountain long-spurred columbine; a species  
found in the western United States. [B. 75.]—*A. canadensis* [Lin-  
næus]. The American columbine; found throughout the United  
States, having flowers of a bright scarlet without, yellow within,  
and with straight spurs; supposed to have similar medicinal prop-  
erties to those of *A. vulgaris*. [J. U. and C. G. Lloyd, "Drugs  
and Med. of N. Am.," Sept., 1885, p. 211.]—*A. communis*. See  
*A. vulgaris*.—*A. silvestris*. See *A. vulgaris*.—*A. vulgaris* [Lin-

AQUILEGIA CANADENSIS (AFTER  
J. U. AND C. G. LLOYD.)

THE FLOWER OF AQUILE-  
GIA VULGARIS. (AFTER  
DE LANCESSAN.)

næus]. Fr., *ancolie*, *aiglantine*, *cornette*, *galantine*, *colombine*,  
*gonneau*, *clochette*, *gants de Notre-Dame*, *manteau royal*. Ger.,  
*gemeine Akelei*, *Pantöffelchen*. Sp., *aquilema*, *güantes de Nuestra  
Señora*. The columbine; a species indigenous to Europe and cul-  
tivated in America, distinguished by the incurvation of the spurs  
upon the petals. It stands from 1 to 2 feet high, and bears large  
flowers which in the natural state are purple, but under cultivation  
assume all shades from purple to white. A syrup prepared from  
the flowers has been used as a calamine in cases of bronchitis, and  
is a more delicate test than syrup of violets; the seeds are reputed  
diaphoretic, diuretic, and depurative, and were formerly much  
given to children with the eruptive fevers; the whole herb and the  
root are considered emmenagogue, aperient, antiscorbutic, and  
diuretic. [A. 260, 304; B. 34; D. 119.]—*Flores*, *herba*, *radix*, *et  
semina aquilegæ*. The flowers, herb, root, and seeds of *A. vul-  
garis*, formerly official under this title. [B. 180.]

**AQUILEGIEÆ** [H. Baillon], **AQUILEGINÆ** [Reichenbach]  
(Lat.), n's. f. pl.  $A^2k(a^3k)\cdot wi^2l\cdot e^2(ji^2)\cdot i(e)\cdot e^2\cdot e(a^3\cdot e^2)$ ,  $i(e)\cdot ne(na^3\cdot e^2)$ .  
Fr., *aquilegiées*. A section of ranunculaceous plants including *Aqui-  
legia*, *Isopyrum*, and other genera. [B. 170.]

**AQUILEGIFOLIUS** (Lat.), adj.  $A^2k(a^3k)\cdot wi^2l\cdot e^2(ji^2)\cdot i(e)\cdot e^2\cdot e(a^3\cdot e^2)$ .

$i^2\cdot u^2\cdot su^4s$ ). From *aquilegia* (q. v.), and *folium*, a leaf. Having  
leaves like those of the columbine. [B.]

**AQUILEGIA** (Lat.), n. f.  $A^2k(a^3k)\cdot wi^2l\cdot i^2\cdot i^2\cdot a^3$ . See AQUILEGIA.

**AQUILENA** (Lat.), n. f.  $A^2k(a^3k)\cdot wi^2l\cdot e(a^3)\cdot na^3$ . The larkspur.  
[L. 94.] See *DELPHINIUM consolida*.

**AQUILICIA** (Lat.), n. f.  $A^2k(a^3k)\cdot wi^2l\cdot i^2sh(i^2k)\cdot i^2\cdot a^3$ . See LEEA.  
—*A. ottilis* [Gärtner], *A. sambucina* [Linnæus]. See LEEA *sam-  
bucina*.

**AQUILICIEÆ** [Jussieu] (Lat.), n. f. pl.  $A^2k(a^3k)\cdot wi^2l\cdot i^2s(i^2k)\cdot i(e)\cdot e^2\cdot e(a^3\cdot e^2)$ . Fr., *aquiliées*. See LEEACEÆ.

**AQUILINA** (Lat.), n. f.  $A^2k(a^3k)\cdot wi^2l\cdot i(e)\cdot na^3$ . See AQUILEGIA.

**AQUILINUS** (Lat.), adj.  $A^2k(a^3k)\cdot wi^2l\cdot i(e)\cdot nu^3s(nu^4s)$ . Fr.,  
*aquilin*. Ger., *adlerähnlich*. Resembling an eagle or an eagle's  
beak. [L. 42, 116.]

**AQUINO** (It.), n.  $A^3\cdot kwe^2no$ . An Italian town (the ancient Aquin-  
um) near which there is a cold sulphurous spring. [A. 385.]

**AQUIPARIA** (Lat.), n. n. pl.  $A^2k(a^3k)\cdot wi^2l\cdot pa(pa^3)\cdot ri^2\cdot a^3$ . From  
*aqua*, water, and *parire*, to bring forth. Fr., *aquipares*. Animals  
which bring forth their young in water. [L. 180.]

**AQUIPAROUS**, adj.  $A^2k\cdot wi^2pa^3\cdot ru^3s$ . Lat., *aquiparus*. Fr.,  
*aquipare*. 1. Water-producing (said of glands the secretion of which  
contains a large amount of water, like the parotid, as contrasted with  
muciparous glands). [K.] 2. Laying eggs or bringing forth young  
in the water. [L. 109.]

**AQUO-CAPSULITIS, AQUO-MEMBRANITIS** (Lat.), n's. f.  
 $A(a^3)\cdot kwo\cdot ka^2p(ka^2p)\cdot su^2(su)\cdot i^2de(i^2)\cdot ti^2s$ ,  $me^2m\cdot bra^2n(bra^2n)\cdot i(e)\cdot ti^2s$ .  
Gen., *aquo-capsulitis*, *membranitis*. For deriv., see *AQUA*,  
*CAPSULA* (or *MEMBRANA*), and *-itis*. See *Serous* *IRITIS*.

**AQUOSITAS** (Lat.), n. f.  $A^2k(a^3k)\cdot wo^2s(i^2t\cdot a^3s(a^3s))$ . Gen.,  
*aquositas*. 1. Aqueosity (q. v.). 2. An old term for the contents  
of a hydatid tumor or a watery cyst. [B.]

**AQUOSITY**, n.  $A^2k\cdot wo^2s(i^2t\cdot a^3s)$ . Lat., *aquositas*. Fr., *aquosité*.  
Ger., *Aquosität*, *Wässerigkeit*. Sp., *acuosidad*. 1. The state of being  
watery. [L. 52.] 2. A watery liquid.

**AQUOSUS** (Lat.), adj.  $A^2k(a^3k)\cdot wo^2s(i^2t\cdot a^3s)$ . 1. Aqueous (q.  
v.). 2. In botany, gorged with fluid. [B.]

**AQUULA** (Lat.), n. f.  $A^2k(a^3k)\cdot wu^2(wu)\cdot la^3$ . 1. Any little col-  
lection of water, such as a drop of water or a bleb. [L. 50.] 2. A  
term applied by Celsus to hernia of the cornea, meaning a prolapse  
of the membrane of Descemet through an ulceration of the anterior  
layers of the cornea which has not led to perforation. [Beer, Hirsch  
(F).] 3. The crystalline lens of the eye. [L. 104.] 4. See CHALAZION.  
—*A. acustica*, *A. auditura*, *A. cotumuli*, *A. labyrinthi*, *A. labyrinthi  
externa*. See PERILYMPH.—*A. labyrinthi interna*,  
*A. labyrinthi membranacea*. See ENDOLYMPH.

**ARA** (Lat.), n. f.  $A(a^3)\cdot ra^3$ . An altar. [A. 322.]—*A. parva*. Gr.,  
*Βομῶς μικρός*. An ancient name for a sort of bandage attributed to  
Sostrotus. [Galen (A. 325).]

**ARABETTE** (Fr.), n.  $A^3\cdot ra^3\cdot be^2t$ . The botanical genus *Arabis*.  
[A. 385.]—*A. des Alpes*, *A. printanière*. See *ARABIS alpina*.—*A.  
rose*. See *ARABIS rosea*.

**ARABIA** (Lat.), n. f.  $A^2r(a^3r)\cdot a(a^3)\cdot bi^2\cdot a^3$ . A genus of aralia-  
ceous plants. [B.]—*A. digitata* [Roxburgh]. See *PARATROPIA  
venulosa*.

**ARABIC ACID**, n.  $A^2r(a^3r)\cdot bi^2k$ . Fr., *acide arabique*. Ger.,  
*Arabinsäure*. See ARABIN.

**ARABICUS** (Lat.), adj.  $A^2r(a^3r)\cdot a^2b(a^3b)\cdot i^2k\cdot u^3s(u^4s)$ . Fr.,  
*arabique*. Ger., *arabisch*. It., *arabico*. Sp., *arabico*. Arabian,  
Arabic.—*Antidotus hepatica arabica*. See under ANTIDOTUS.—*Faba  
arabica*. See under FABA.—*Gummii arabicum*. See  
ACACIA (2d def.).—*Lapis ar.* See under LAPIS.

**ARABIDÆ** [Lindley], **ARABIDÆÆ** [De Candolle, Reichen-  
bach, Koch, Brongniart] (Lat.), n's. f. pl.  $A^2r(a^3r)\cdot a^2b(a^3b)\cdot i^2d\cdot e(a^3\cdot e^2)$ ,  
 $a^2b(a^3b)\cdot i^2d\cdot e^2\cdot e(a^3\cdot e^2)$ . From *Arabis* (q. v.). Fr., *arabidées*.  
A tribe or section of cruciferous plants belonging to the *Pleurorhi-  
zææ* or *Siliqueosæ*, characterized by bearing a straight elongated  
silique, with seeds usually biserial and having accumbent cotyle-  
dons. [B. 121, 170.]

**ARABIDINÆ** (Lat.), n. f. pl.  $A^2r(a^3r)\cdot a^2b(a^3b)\cdot i^2d\cdot i(e)\cdot ne(na^3\cdot e^2)$ .  
Fr., *arabidinées*. A subseries of cruciferous plants be-  
longing to the *Cheiranthææ*, comprising those genera with accum-  
bent cotyledons. [H. Baillon (B. 121).]

**ARABIN**, n.  $A^2r(a^3r)\cdot i^2n$ . Lat., *arabinum*. Fr., *arabine*. Ger.,  
*Arabin*. It., *arabina*. Syn.: *arabic* (or *gummic*) *acid*. The essen-  
tial constituent of gum arabic and the gum of cherry and plum  
trees, in which it occurs combined with calcium or with calcium  
and potassium. It is found also in the sugar-beet. It is a vitreous  
mass, soluble in water; chemically, a carbo-hydrate having feebly  
acid properties and a constitution expressed by the formula  
 $nC_6H_{12}O_{11}$  or  $n(C_6H_{12}O_{11})_n\cdot H_2O$ —probably  $C_{36}H_{72}O_{33}$ . On heating  
to 120° C. or over, it is converted into *metarabin*. [B. 4.]

**ARABINIC ACID**, n.  $A^2r(a^3r)\cdot i^2n\cdot i^2k$ . See ARABIN.

**ARABINOSE**, n.  $A^2r(a^3r)\cdot i^2n\cdot os$ . Syn.: *gum sugar*, *pectinose*.  
A carbo-hydrate,  $C_6H_{12}O_6$  (according to Kiliani, identical with lac-  
tose), derived from arabin by decomposition, forming large, trans-  
parent, prismatic crystals of a very sweet taste, readily soluble in  
water. Its aqueous solution has a specific dextrorotatory power of  
116°. [B. 4, 5.] According to C. O'Sullivan, there are four varieties  
obtainable by the decomposition of arabin, differing in their physical  
properties. [“Jour. of the Chem. Soc.,” cclv, p. 41 (B).]

**ARABINUM** (Lat.), n. n.  $A^2r(a^3r)\cdot a^2b(a^3b)\cdot i(e)\cdot nu^3m(nu^4m)$ .  
See ARABIN.

**ARABIS** (Lat.), n. f.  $A^2r(a^3r)\cdot a^3b\cdot i^2s$ . So called because de-  
lighting in a sandy soil, like that of Arabia. Fr., *arabette*. Ger.,  
*Gänsekraut*, *Gänsekresse*. A genus of cruciferous plants, belong-  
ing to the tribe *Arabidææ*, established by Linnæus, characterized

by their erect sepals, their linearly-compressed siliques, their valves each provided with 1 to 3 longitudinal veins, the single row of seeds in each cell, and the accumbent or oblique cotyledons. [B. 34.]—**A. Allionii** [De Candolle]. Fr., *arabette d'Allioni*. Syn.: *Turritis stricta* [Allioni]. A perennial species with white flowers, growing in the meadows of Piedmont. [B. 214.]—**A. arenosa** [Scopoli]. Syn.: *Sisymbrium arenosum* [Linnaeus]. A species found in the sandy limestone regions of Europe; used for the same purposes as *A. sagittata*. [H. Baillon (L. 87).] It is closely allied to, if not identical with, the *A. lyrata*. [B.]—**A. canadensis** [Linnaeus]. The sickle pod; a species growing throughout the eastern sections of the United States, distinguished by its long drooping scythe-shaped pods. [B. 34.]—**A. chinensis** [Rottler]. A species used in India as a stomachic, in the form of *alivér* (q. v.). [D. 79; L. 105.]—**A. ciliata** [Koch]. A species found in rocky districts throughout middle Europe, with oblong, dentate or entire, ciliate leaves, of which those growing upon the stem are sessile and rounded at the base, and with seeds provided with a border and non-alate. There are 2 varieties, *A. ciliata*, var. *glabra* [Koch], the *A. ciliata* of R. Brown, and *Turritis ciliata* [Schleich.] (see *rupestris* [Hoppe], see *alpina* [Linnaeus]), with glabrous stem and leaves, hairy at the edges only; and *A. ciliata*, var. *hirsuta* [Koch], the *Turritis alpestris* [Schleich.], which has both stem and leaves covered all over with short rough hairs. [B. 178; H. Baillon (L. 87).]—**A. glabra** [Bernhardi]. See *A. perfoliata*.—**A. hirsuta**. 1. Of De Candolle, the *A. ciliata*, var. *hirsuta*. 2. Of Scopoli, a European and American species resembling the *A. sagittata*, but with auriculate or cordate leaves and with seeds alate at the apex and not punctate. The stem and leaves are hirsute, except in the variety *A. hirsuta*, var. *glaberrima*, in which the leaves are glabrous or ciliate at the edges only. 3. Of Smith, a variety of *A. sagittata*. [B. 34, 178, 214.]—**A. longisiliqua** [Wallroth]. See *A. sagittata*.—**A. lyrata** [Linnaeus]. The wall- or rock-cress; a species characterized by the smooth entire upper leaves, by the lyrate division of the radical leaves, and by the absence of border from the seeds. It grows in the northern parts of the United States and in Canada. [B. 34; L. 65.]—**A. perfoliata** [Lamarck]. Syn.: *Turritis glabra*. A European species, used for the same purposes as *A. sagittata*. [H. Baillon (L. 87).]—**A. rosea** [De Candolle]. Fr., *arabette rose*. A Calabrian species with purplish-rose-colored flowers. [B. 214.]—**A. sagittata** [De Candolle]. Syn.: *Turritis multiflora*. A species growing throughout rocky districts in Europe, with stem hairy below, glabrous above, finely dentate amplexicaul, sagittate cauline leaves, and oblong-ovate radical leaves tapering to a petiole, straight erect siliques, and finely-punctate seeds with narrow alae. The seeds contain a fixed oil used like rape-seed oil, and the whole plant contains a volatile stimulant principle having properties like those of oil of mustard. [B. 46, 178.]—**A. thaliana** [Linnaeus]. Syn.: *Conringia thaliana* [Reichenbach], *Sisymbrium thalianum* [Gay]. Mouse-ear cress; a European species, naturalized in the United States, having the same uses as *A. sagittata*. [B. 34; H. Baillon (L. 87).]—**A. turrita** [Linnaeus]. A European species with deeply cordate amplexicaul hairy cauline leaves petiolate radical leaves, and seeds provided with broad membranous alae. [B. 178.]

**ARABIST**, n.  $A^2r^2a^2b^2st$ . Fr., *arabiste*. An adherent of the Arabian school of medicine. [A, 385; L. 42.]

**ARABOS** (Lat.), n. m.  $A^2r^2(a^2r^2a^2b^2)os$ . Gr., *ἄραβος*. Ger., *Zähneklappern*. Syn.: *stridor dentium*. A grinding or chattering of the teeth. [A, 322.]

**ARABOSE**, n.  $A^2r^2a^2b^2os$ . Scheibler's name for arabinose (q. v.). ["Ber. d. dtsh. chem. Gesellsch.," "Ann. di chim. e di farm.," Aug., 1886, p. 112 (B).]

**ARABOUTAN**, n. Ger., *Brasilienholzbaum*. The tree furnishing Brazil-wood. [B, 121.] See *CÆSALPINIA*.

**ARABUS** (Lat.), n. m.  $A^2r^2(a^2r^2a^2b^2)us$  (u's). See *ARABOS*.

**ARAC**, n. An East Indian name for rice. [L, 104.] Cf. *ARRACK*.

**ARACA**, n. A weak spirituous liquor prepared by the Tartars from Kumys. [B, 2.] See also *ARSA*.

**ARACACHA** (Lat.), n. f.  $A^2r^2(a^2r^2a^2)ka^3$  (ka<sup>3</sup>)ka<sup>3</sup>. See *ARRACACHA*.

**ARACA-GUACU**, n. A South American name for a plant supposed to be the *Psidium pomiferum*. [L, 105.]

**ARACA-GUAM**, n. A species of guava. [L, 94.]

**ARACA-IBA**, n. A general name for the araca-guacu and the araca-miri. [L, 105.]

**ARACA-MIRI**, n. A Brazilian shrub, supposed to be the *Psidium pyrifera*, the fruit of which, candied or made into marmalade, is considered cooling and moderate y astringent, and the root diuretic and antidyenteric. [L, 104, 105.]

**ARACA-PUDA**, n. The native name of a Malabar plant from which is extracted a substance said to be a specific in diseases of the liver and spleen. [L, 109.]

**ARACATCHA**, n. See *ARRACACHA*.

**ARACEÆ** (Lat.), n. f. pl.  $A^2r^2(a^2r^2a^2)se^2$  (ke<sup>2</sup>)e<sup>2</sup>(a<sup>3</sup>e<sup>2</sup>). From the genus-name *Arum* (q. v.). Fr., *aracées*. Ger., *Arongewächse*. Syn.: *Aroideæ*. The aroids; of Necker, Lindley, and others, an order of monocotyledons belonging to the series *Nudifloræ*, comprising herbs that contain a volatile acid principle and have a creeping rhizome or corm rich in starch. The flowers, which are usually diclinous, are densely arranged in a spadix, often embraced by a large spathe, and are either naked or surrounded by a perianth of from four to six scales. The stamens are hypogynous, and the stigma is sessile. Lindley divided the *A.* into four tribes, the *Cryptocoryneæ*, the *Dracunculeæ*, the *Caladieæ*, and the *Anaporeæ*, to which Endlicher added a fifth, the *Pistiaceæ*, and Meissner, a sixth, the *Lemnaceæ*. This last tribe is usually regarded as a separate order. Brongniart divided the *A.* into the *Callaceæ* and the *Colocasieæ*. Schott, one of the best authorities upon the *A.*, divided them into the *Monoclinous A.*, comprising the tribes *Orontieæ* and

*Calceæ*, and the *Diclinous A.*, including 2 sections: (1) The *Filamentateæ*, comprising the tribe *Stylochitonæ*; and (2) The *Effilamentateæ*, comprising the tribes *Alleclicheæ*, *Arisarceæ*, *Dracunculeæ*, *Zomiacarpeæ*, and *Pythoneæ*, grouped in the subsection *Stenozugmaticeæ*, and the tribes *Caladieæ*, *Philodendreeæ*, *Richardieæ*, and *Asterostigmieæ*, grouped in the subsection *Pachyzugmaticeæ*. Engler divides the *A.* into the sub-families, *Pothoideæ*, *Monsteroideæ*, *Lasiodeæ*, *Philodendroideæ*, *Aglaonemoideæ*, *Colocasieæ*, *Staurostigmieæ*, *Aroideæ*, *Pistiodeæ*, and *Lemnoideæ* (the last corresponding to the order *Lemnaceæ* of most systems); and these are divided into a large number of tribes and subtribes. Benthams and Hooker divide the *A. (Aroideæ)* into three series: A, those with monœcious flowers and no perianth, including the tribes *Arineæ*, *Stylochitonæ*, *Zomiacarpeæ*, *Pythoneæ*, *Colocasieæ*, *Philodendreeæ*, *Dieffenbachieæ*, and *Spathicarpeæ*; B, those with hermaphrodite flowers and no perianth, comprising the tribe *Calceæ*; C, those with flowers all hermaphrodite and a perianth of scales, including the tribes *Zomiacarpeæ* and *Orontieæ*. The *A.* of Le Maout and Decaisne are a tribe of the *Aroideæ* (= *A.* of this work) corresponding to the diclinous *A.* of Schott and including the sections *Anaporeæ*, *Colocasieæ*, *Dracunculeæ*, *Cryptocoryneæ*, and *Pistiaceæ*. [B, 34, 42, 121, 168, 170, 216.]

**ARACEOUS**, adj.  $A^2r^2a^2shu^2s$ . Lat., *araceus*. Fr., *aracé*. Belonging to the *Araceæ* (q. v.).

**ARACH**, n.  $A^2r^2a^2k$ . See *ARRACK* and *ORACH*.

**ARACHAMIDE**, n.  $A^2r^2a^2k^2a^2m^2id$  (id). For deriv., see *ARACHIS* and *AMIDE*. A compound,  $(C_{20}H_{39}O_2.N_2)$ , obtained by the action of ammonia on earth-nut oil. [B, 2.]

**ARACHAN**, n. A place in Central Asia where there are hot springs. [A, 385.]

**ARACHIC ACID**, n.  $A^2r^2a^2k^2i^2k$ . Fr., *acide arachique*. Ger., *Arachinsäure*. See *ARACHIDIC ACID*.

**ARACHICHU** (Sp.), n.  $A^2r^2a^2che^2chu$ . The *Solanum nigrum*. [B.]

**ARACHIDATE**, n.  $A^2r^2a^2k^2id^2at$ . A salt of arachidic acid. [B, 2.]

**ARACHIDE** (Fr.), n.  $A^2r^2a^2ked$ . The genus *Arachis*. [L.]—**A. souterraine**. See *ARACHIS hypogæa*.—**Huile d'a**. See *OLEUM ARACHIDIS* (under *ARACHIS*).

**ARACHIDEÆ** (Lat.), n. f. pl.  $A^2r^2(a^2r^2a^2)ki^2d$  (ch<sup>2</sup>i<sup>2</sup>d<sup>2</sup>e<sup>2</sup>e<sup>2</sup> (a<sup>3</sup>e<sup>2</sup>)). A subtribe of hedysareous plants, made by Lindley, comprising *Arachis* and two other genera. [B, 170.]

**ARACHIDIC ACID**, n.  $A^2r^2a^2k^2i^2d^2i^2k$ . Fr., *acide arachidique*. Ger., *Arachinsäure*. A monobasic, crystalline fatty acid,  $C_{20}H_{40}O_2 = C_{20}H_{39}O.OH$ , obtained from the oil of the *Arachis hypogæa*. [B, 2.]

**ARACHIDNA** (Lat.), n. f.  $A^2r^2(a^2r^2a^2)ki^2d$  (ch<sup>2</sup>i<sup>2</sup>d<sup>2</sup>)na<sup>3</sup>. Gr., *ἄραχίDNA*. "Planta ad Aracum accedens" [Plumier (B, 170).] 1. An ancient name for a leguminous plant supposed to have been the *Lathyrus amphicarpos*. [Theophrastus (A, 311).] 2. See *ARACHIS*.

**ARACHIDNOIDES** (Lat.), n. f.  $A^2r^2(a^2r^2a^2)ki^2d$  (ch<sup>2</sup>i<sup>2</sup>d<sup>2</sup>)no<sup>2</sup>(no<sup>2</sup>)i<sup>2</sup>e<sup>2</sup>(dez)(das). From *ἄραχίDNA* (see *ARACHIDNA*), and *είδος*, likeness. Of Nissolle, the genus *Arachis*. [B, 170.]

**ARACHIN**, n.  $A^2r^2a^2k^2i^2n$ . Fr., *arachine*. Ger., *Arachin*. See *GLYCERYL arachidate*.—**A'säure** (Ger.). See *ARACHIDIC ACID*.

—**A'säureäthylester** (Ger.). See *ETHYL arachidate*.

**ARACHIS** (Lat.), n. f.  $A^2r^2(a^2r^2a^2)ki^2s$  (ch<sup>2</sup>i<sup>2</sup>s). Gen., *arach'idis*, *ar'achis*. From *ἄρακis* (= *ἄρακος* or *ἄραχος*), a leguminous plant men-

THE ARACHIS HYPOGÆA. [A, 327.]

tioned by Theophrastus. Fr., *arachide*. It., *arachide*. Sp., *aráquida*. A genus of leguminous plants of the suborder *Papilionata*

*ceae*, characterized by the fruit maturing under ground. [B. 34.]—**A. africana** [Loureiro], **A. americana** [Tenore], **A. asiatica** [Loureiro], African, American, and Asiatic varieties of the *A. hypogaea*. [L.]—**A. hypogaea** [Willdenow]. Fr., *arachide souteraine*, *pistache de terre*. Ger., *Erdnuss*, *Erdeichel*, *Ackereichel*, It., *arachide ipogea*. Sp., *cacaguate*, *cacahuete*, *cacahuete*, *mani*. The peanut, earth-nut, ground-nut, ground-pea, underground kidney-bean, goober, or pindar (the *amendoin*, or *mandub*, of the Brazilians); a species indigenous to South America, but cultivated in the southern United States and on the west coast of Africa, to which latter locality some have considered it indigenous. It is a diffusely branched trailing annual characterized by the pod being forced beneath the surface of the ground, after the fall of the flower, by the growth of the rigid stalk to which it is attached, where it enlarges rapidly, in the form of a thick, deeply netted, indurated shell, an inch or more long, often contracted between the seeds which are two or three in number. These seeds, roasted, are largely eaten, and have been recommended for habitual constipation; they are used also in the manufacture of chocolate. On expression, they yield a fixed oil (see *Oleum arachidis*). [A. 327; a. 5; B. 2.]—**A. oil**. See *Oleum arachidis*.—**A. subterranea**. See *A. hypogaea*.—**Oleum arachidis**, *Oleum a.* [Ind. Ph.]. Fr., *huile d'arachide* (ou de *pistache de terre*). Ger., *Erdnussöl*. Sp., *aceite de cacaguate* (ó de *mani*). Peanut, or earth-nut, oil; a bland fixed oil, nearly colorless, non-drying (remaining liquid several degrees below 32° F.), of an agreeable odor and taste like those of olive oil. It contains oleic, palmitic, and arachidic acids. It is chiefly used in making soap, but also to a considerable extent for the same purposes as olive oil. It is used by the Chinese for affections of the chest. [A. 327; B. 1, 75.]

**ARACHNE** (Lat.), n. f.  $A^2r(a^3r)-a^2k(a^3ch^2)ne(na)$ . Gr., *ἀράχνη*. See ARANEA, ARACHNOID, and ARACHNE.

**ARACHNIC**, adj.  $A^2r-a^2k'n^2p^k$ . Gr., *ἀραχνικός*. Fr., *arachnique*. Pertaining to the *Arachnida*. [A. 385.]

**ARACHNIDA** (Lat.), n. n. pl.  $A^2r(a^3r)-a^2k(a^3ch^2)ni^2d-a^2$ . Fr., *ἀράχνη*, a spider's web. Fr., *arachnides*. Ger., *Arachniden*, *Spinnehiere*, *spinnenartige Thiere*. It., *aracnidi*. Sp., *arañas*. A class of the *Arthropoda*, comprising animals breathing by means of tracheae or pulmonary sacs, and having the head and thorax fused into a cephalo-thorax which bears 2 pairs of maxillary appendages (chelicerae and pedipalpi) and 4 pairs of legs, and a segmented or unsegmented abdomen (sometimes fused with the cephalo-thorax) which never bears any limbs. The eyes, if present, are 2 to 8 in number, simple, and sessile. It is divided into the orders *Acarida* (mites, ticks, and the itch parasite), *Podosomata*, *Adelarthrosomata*, *Pedipalpi* or *Arthrogastra* (scorpions), and *Araneida* (spiders). It is also divided into the orders *Pulmonaria* or *A.* breathing by pulmonary sacs, including the *Araneida* and *Pedipalpi*, and *Trachearia* or *A.* breathing by tracheae, including the *Acarina*. [B. 27, 28, 180.]—**Acarideous A.** Lamarck's name for a section of his antennated tracheal *A.*, consisting of parasitic animals now classed among the insects, including the genera *Pediculus* (*Phthirus*) and *Ricinus*. [B. 77.]—**Antennated tracheal A.** In Lamarck's classification, the first order of *A.*, comprising individuals furnished with antennae and respiring by plexiform tracheae; they include the crustacean *A.* and the acaridean *A.*, now classed among *Insecta* and *Myriapoda*. [B. 77.]—**A. vagabunda**. See *Crustaceous A.*—**Crustaceous A.** Fr., *arachnides crustacées*. A section of the antennated tracheal *A.* distinguished by their composite eyes, often having a granular surface, by their scaly structure, by the cutting character of their mandibles, and by their wandering habits. They correspond to the class *Myriapoda* and the order *Thysanura* of insects, of other systems. [B. 77.]—**Mastatory A.** Latreille's first section of the *A.*, comprising the orders *Tetracera* (now referred to the *Crustacea*), *Myriapoda* (now regarded as a distinct class), and *Thysanura* (now referred to the insects). [B. 77.]—**Non-antennated branchial A.** Lamarck's name for an order of *A.* corresponding to the pulmonary *A.* (*Pulmonaria*) of other systems, including the *Pedipalpi* (scorpions) and *Araneida* (spiders). [B. 77.]—**Non-antennated tracheal A.** An order in Lamarck's classification, corresponding to the tracheary *A.* (*Trachearia*) of other systems. [B. 77.]—**Spinning A.** Fr., *arachnides fileuses* [Lamarck]. Ger., *Spinnenthiere*. See ARANEIDA.—**Suctorial A.** Latreille's second section of the *A.*, comprising the whole class *A.* of recent systems and some genera now included among the insects. Its orders were the *Parasita*, the *Pycnogonides*, and the *Acera*. [B. 77.]—**Tracheal A.**, *Tracheary A.* See TRACHEARIAE.

**ARACHNIDAN, ARACHNIDEAN**, adj's.  $A^2r-a^2k'ni^2d-a^2n$ ,  $-a^2k'ni^2d'e^2a^2n$ . Belonging to the *Arachnida*. [B. 100.]

**ARACHNIDEN** (Ger.), n. pl.  $A^3r-a^3ch^2'ni^2d-e^2n$ . The *Arachnida*. [B. 180.]—**Lungen-A.**, The *Pulmonariae*. [B. 180.]—**Tracheen-A.** The *Tracheariae*. [B. 180.]

**ARACHNIDES** (Lat.), n. f. pl.  $A^2r(a^3r)-a^2k(a^3ch^2)ni^2d-ez(e^2s)$ . See ARACHNIDA.—**A. pulmonariae**. See PULMONARIAE.—**A. tracheariae**. See TRACHEARIAE.

**ARACHNIDES** (Fr.), n. pl.  $A^3r-a^3k'ned$ . See ARACHNIDA.—**A. fleuses** [Latreille]. The spinning *Arachnida*. [B.] See ARANEIDA.—**A. palpistes**. *Arachnida* which are furnished with palpi instead of antennae (non-antennated *Arachnida*), comprising the whole of the class *Arachnida* of other systems. [B.]—**A. pedipalpes**. See PEDIPALPI.

**ARACHNIDAL**, adj.  $A^2r-a^2k'ni^2d'i^2a^2l$ . Of or pertaining to the arachnidium. [B. 100.] See *A. MAMMILLA* and *A. PAILLE*.

**ARACHNIDIUM** (Lat.), n. n.  $A^2r(a^3r)-a^2k(a^3ch^2)ni^2d'i^2n^2m$  (u<sup>2</sup>m). The organ which furnishes the substance of the web in spiders. It consists of a great number of glands of the acinous, tubular, and other varieties, secreting a viscid material which passes out through the glandular ducts, and is excreted on the surface of minute papillae (the *arachnidial papillae*) placed upon 6 promi-

nent elevations (the *arachnidial mammillae*) located upon the posterior part of the abdomen. The secretion on exposure to the air hardens into a silky material, which by the motion of the spider is drawn out into a long thread. [B. 100.]

**ARACHNIDS**, n. pl.  $A^2r-a^2k'ni^2dz$ . See ARACHNIDA.

**ARACHNITIS** (Lat.), n. f.  $A^2r(a^3r)-a^2k(a^3ch^2)ni(ne)'ti^2s$ . Gen., *arachnitis*. From *ἀράχνη*, a spider's web (see also *-itis*). Fr., *arachnite*. Ger., *Arachnitis*, *Spinnenwebentzündung*. It., *aracniti*. Sp., *aracnitis*. Inflammation of the arachnoid membrane, to which structure alone, however, inflammation is rarely limited. [D. 1; M.] Cf. MENINGITIS.—**A. of the ventricles**. Inflammation of the arachnoid membrane said to line the ventricles of the brain. It is held by some anatomists that no such lining exists, and it has been suggested that, as meningitis elsewhere is usually present, the ventricular trouble may be regarded rather as a result of "contiguous sympathetic effusion" than as an extension of the inflammatory exudation by continuity. [D. 1.]—**Rbachiidian a.**, *Spinal a.* See SPINAL MENINGITIS.

**ARACHNODEITIS** (Lat.), n. f.  $A^2r(a^3r)-a^2k(a^3ch^2)-no-de^2-i(e)ti^2s$ . Gen., *arachnodeitis*. See ARACHNITIS.

**ARACHNODERMOS**, adj.  $A^2r-a^2k'no-du^2rm'u^2s$ . Lat., *arachnodermus* (from *ἀράχνη*, a spider's web, and *δέρμα*, the skin). Fr., *arachnodermaire*. Sp., *aracnodermio*. Having a very delicate skin, like a spider's web (said of insects). [L. 41.]

**ARACHNODES** (Lat.), adj.  $A^2r(a^3r)-a^2k(a^3ch^2)-no^2-dez(das)$ . See ARACHNOID, adj.

**ARACHNODITIS** (Lat.), n. f.  $A^2r(a^3r)-a^2k(a^3ch^2)-no-di(de)'ti^2s$ . Gen., *arachnoditis*. See ARACHNITIS.

**ARACHNOGENE** (Fr.), adj.  $A^3r-a^3k-no-zhe^2n$ . Due to the bite of a spider. [L. 41.]

**ARACHNOGENOSE** (Fr.), n.  $A^3r-a^3k-no-zha-nos$ . Sp., *aracnojenosis*. A morbid condition ascribed to the bite of a spider. [L. 41.]

**ARACHNOID**, adj.  $A^2r-a^2k'noid$ . Lat., *arachnoideus* (from *ἀράχνη*, a spider's web, and *εἶδος* appearance), *araneosus*. Fr., *aracnoïde*, *aracnoïdien*. Ger., *spinnwebig*, *spinnwebenartig*. It., *aracnoide*. Sp., *aracnoideo*. 1. Resembling a spider's web in texture. [B.] 2. Pertaining to the a. membrane. [B.] 3. See ARANEOSUS (2d def.).

**ARACHNOID**, n. Lat., *membrana arachnoidea* (seu *media*, seu *tenuis*), *meninx arachnoidea* (seu *media*). Fr., *aracnoïde*. Ger., *Spinnenwebhaut*. It., *aracnoide*. Sp., *aracnoidea*. The a. membrane; the middle one of the three membranes which invest the brain and spinal cord, separated from the pia mater by the subarachnoid space containing serous fluid. [L. 14; K.] It is usually described as consisting of a parietal and a visceral layer, enclosing the a. space or cavity; Kölliker, however, denies the existence of a parietal layer distinct from the epithelium of the dura mater. [L.] Take maintains that there is no separate membrane answering to this description, and thinks the name should be dropped. ["Edinburgh Med. Jour.," June, 1882, p. 1068.] The term has also been applied to several delicate investing and lining membranes. [L.]—**A. of the eye**. Lat., *aracnoidea oculi*. Fr., *aracnoïde de l'œil*. Ger., *Spinnenwebhaut des Auges*. It., *aracnoide dell'occhio*. Sp., *aracnoidea del ojo*. An old term for a serous membrane which was supposed to line the cornea and spread over the iris, the ciliary body, and the choroid; also for the supposed lining membrane of the lymphatic space between the choroid and the sclerotic. [F.] See LAMINA FUSCA.—**Cerebral a.** Lat., *aracnoidea cerebri* (seu *cerebralis*). Fr., *aracnoïde crânienne*. Ger., *Spinnenwebhaut des Gehirns*. The a. which covers the brain. [L.]—**Internal a.** Fr., *aracnoïde intérieure* [Laennec]. See EPENDYMA.—**Parietal a.** Fr., *aracnoïde pariétale*. The supposed external layer of the a., closely attached to the dura mater. [L.]—**Spinal a.** Lat., *aracnoidea medullae spinalis*. Fr., *aracnoïde spinale* (ou *medullaire vertébrale*). That portion of the a. which is situated within the spinal canal. [L.]—**Visceral a.** Fr., *aracnoïde viscérale*. The internal layer of the a., separated from the pia mater by loose areolar tissue except over the pons Varolii and the lower surface of the cerebellum. [L.]

**ARACHNOIDAL**, adj.  $A^2r-a^2k'noid'a^2l$ . See ARACHNOID, adj.—**A'raum** (Ger.). **A'sack** (Ger.). See SUBARACHNOID SPACE.—**A'villi**, **A'zotten** (Ger.). See PACCHIONIAN BODIES.

**ARACHNOÏDE** (Fr.), adj. and n.  $A^3r-a^3k-no-ed$ . See ARACHNOID.—**A. crânienne**. See Cerebral ARACHNOID.—**A. de l'œil**. See ARACHNOID of the eye.—**A. extérieure**. See Parietal ARACHNOID.—**A. intérieure**. See EPENDYMA.—**A. médullaire vertébrale**. **A. spinale**, **A. vertébrale**. See SPINAL ARACHNOID.

**ARACHNOIDEA** (Lat.), n. f. sing. and n. pl. of adj. *arachnoideus* (*membrana* or *tunica* understood, 1st def. and *animalia*, 2d def.).  $A^2r(a^3r)-a^2k(a^3ch^2)-no-mo^2-i^2d(ed)'e^2a^2$ . 1. See ARACHNOID, n. 2. See ARACHNIDA.—**A. cerebri**, **A. cerebri**. See Cerebral ARACHNOID.—**A. chorioideus** [Arnold]. The outer layer of the choroid coat of the eye. [L. 7.] See LAMINA FUSCA and ARACHNOID of the eye.—**A. lentis**. The capsule of the crystalline lens. [L. 7.]—**A. medullae spinalis**. See SPINAL ARACHNOID.—**A. oculi**. See ARACHNOID of the eye and LAMINA FUSCA.

**ARACHNOIDEAL**, adj.  $A^2r-a^2k-no-i^2d'e^2a^2l$ . Lat., *arachnoideus*. Ger., *arachnoideal*. See ARACHNOID, adj.—**A'zotten** (Ger.). See PACCHIONIAN BODIES.

**ARACHNOIDEAN**, adj.  $A^2r-a^2k-no-i^2d'e^2a^2n$ . See ARACHNOID, adj.

**ARACHNOIDEITIS** (Lat.), n. f.  $A^2r(a^3r)-a^2k(a^3ch^2)-no-i^2d(ed)-e^2-i(e)'ti^2s$ . Gen., *arachnoideitis*. See ARACHNITIS.

**ARACHNOIDES, ARACHNOIDEUS** (Lat.), adj's.  $A^2r(a^3r)-a^2k(a^3ch^2)-no(no^2)-i(e)'dez(das)$ ,  $-i^2d(ed)'e^2-u^2s(u^2s)$ . See ARACHNOID.

**ARACHNOIDITIS** (Lat.), n. f.  $A^2r(a^3r)-a^2k(a^3ch^2)-no-i^2d-i(e)^{-}ti^2s$ . Gen., *arachnoïditidis*. Fr., *arachnoïdite*. See ARACHNITIS.

**ARACHNOITIS** (Lat.), n. f.  $A^2r(a^3r)-a^2k(a^3ch^2)-no-i(e)^{-}ti^2s$ . Gen., *arachnoïtidis*. Fr., *arachnoïte*. See ARACHNITIS.

**ARACHNOLOGY**, n.  $A^2r-a^2k-no^2i^2o-j^2i^2$ . Lat., *arachnologia* (from *ἀράχνη*, a spider). Fr., *arachnologie*. Ger., *Arachnologie*. That department of zoology which relates to the spiders [L. 50], especially the study of spiders applied to the prediction of meteorological conditions. [B. 49.]

**ARACHNOPHILOUS**, adj.  $A^2r-a^2k-no^2i^2i^2u^2s$ . Lat., *arachnophilus* (from *ἀράχνη*, a spider, and *φιλῶν*, to love). Fr., *arachnophile*. Sp., *aracnofilo*. Growing on dead spiders (said of *Fungi*). [L. 116.]

**ARACHNOPODA** (Lat.), n. n. pl.  $A^2r(a^3r)-a^2k(a^3ch^2)-no^2p^2o-da^2$ . From *ἀράχνη*, a spider, and *πούς*, a foot. See PODOSOMATA.

**ARACHNOPODION** (Lat.), n. n.  $A^2r(a^3r)-a^2k(a^3ch^2)-no^2p^2o-di^2o-n$ . From *ἀράχνη*, a spider, and *πόδιον* (dim. of *πούς*), a little foot. Ger., *Spinnefuss*. An instrument devised by Woolhouse for use in the operation of removing a pterygium. [L. 30.]

**ARACHNORRHINITIS** (Lat.), n. f.  $A^2r(a^3r)-a^2k(a^3ch^2)-no^2r-i^2n-i(e)^{-}ti^2s$ . Gen., *arachnorrhinitidis*. From *ἀράχνη*, a spider, and *ῥῖς*, the nose. Sp., *aracnorinitis*. A disease attributed to the presence of a spider in the nasal passages or the frontal sinus. [D. 98.]

**ARACHNOTITIS** (Lat.), n. f.  $A^2r(a^3r)-a^2k(a^3ch)-no-i^2i(te)^{-}ti^2s$ . Gen., *arachnotitidis*. From *ἀράχνη*, a spider, and *ὤς*, the ear. Sp., *aracnotitis*. A disease attributed to the presence of a spider in the auditory canal. [D. 98.]

**ARACHUS** (Lat.), n. m.  $A^2r(a^3r)-a^3ku^2s(ch^2u^4s)$ . Gr., *ἀραχος*. See ARACHUS.—A. de l'Inde (Fr.). See *ABRUS precatorius*.

**ARACHYDIA** (Lat.), n. f.  $A^2r(a^3r)-a^3ki^2d(ch^2u^4d)^{-}na^3$ . See ARACHIDNA.

**ARACHYL**, n.  $A^2r-a^3ki^2l$ . The hypothetical radicle,  $C_{20}H_{30}O$ , of arachidic acid. [B. 2.]

**ARACIDNA** (Lat.), n. f.  $A^2r(a^3r)-a^3si^2d(ki^2d)^{-}na^3$ . See ARACHIDNA.

**ARACIUM** (Lat.), n. n.  $A^2r(a^3r)-a^3(shi^2ki^2)-u^3m(u^4m)$ . See CREPIS.—A. alpinum [Monnier]. The *Sonchus alpinus* of Linnaeus, a species referred by Bentham and Hooker to *Lactuca*. [B. 214.]

**ARACK**, n.  $A^2r-a^2k$ . See ARRACK.

**ARACKA**, n. See ARACA.

**ARACONCHINI, ARACOUCHILI**, n's. See ARACOUCHINI.

**ARACOUCHINI**, n. 1. A native name for a resin of Cayenne, obtained from the *Leica a.*, used as a vulnerary. [L. 30, 105.] 2. A Guiana name for alouchi resin. [A. 355.]

**ARACOUFI**, n. See ARACOUCHINI (1st def.).

**ARACU**, n. See KUMYSS.

**ARACUS** (Lat.), n. m.  $A^2r(a^3r)-a^3ku^2s(ku^4s)$ . Gr., *ἀρακος*. An ancient term for the wild vetch; of Dodonaeus, the *Lathyrus cicera*. [B. L. 84.]—A. americanus. The Indian vetch. [L. 119.]—A. aromaticus. Vanilla. [L. 104.]—A. phaseolus africanus. The Egyptian kidney-bean. [L. 119.]—Capsule *araci aromatici*, *Siliquae araci aromatici*. Vanilla-pods. [B. 180.] See VANILLA.

**ARACYNAPPIL**, n. An old name for some fruit resembling a small orange, or for the plant that bears it. [Ray (L. 94).]

**ARADA**, n. The *Cucumis anguria*. [B. 121.]

**ARADECH**, n. A name given in Languedoc to the *Vaccinium myrtillus*. [B. 121.]

**ARADOS** (Lat.), n. m.  $A^2r(a^3r)-a^3d-o^2s$ . Gr., *ἀραδος* (from *ἀράειν*, to disturb). Literally, a disturbance. As used by Hippocrates, a perturbation of the humors; also any violent movement or disturbance of an organ, like that produced in the stomach by the processes of digestion, in the bowels by purgation, and in the heart by violent exercise. [K. 3; M. 13, 56.]

**ARADS**, n. pl.  $A^2r-a^2dz$ . For deriv., see ARUM. The *Araceae*. [Lindley (B. 197).]

**ARADUS** (Lat.), n. m.  $A^2r(a^3r)-a^3d-u^3s(u^4s)$ . See ARADOS.

**ARÆA** (Lat.), n. f.  $A^2r(a^3r)-e^2(a^3e^2)-a^3$ . Gr., *ἀραιά* (from *ἀραιός*, agreeing with *γαστήρ* understood). The abdomen. [B. 78.]

**ARÆOIDEA** (Lat.), n. n. pl.  $A^2r(a^3r)-e^2(a^3e^2)-o-i^2d-e^2-a^3$ . From *ἀραιός*, rare, light, and *εἶδος*, form. P. T. Meissner's name for the supposed compounds of caloric, considered as a substance. [B. 78.]

**ARÆOMA** (Lat.), n. n.  $A^2r(a^3r)-e^2(a^3e^2)-o^2ma^3$ . Gen., *aræo-matos (-tis)*. Gr., *ἀραιωμα* (from *ἀραιός*, rare, thin). Unoccupied space; space existing between the atoms of substance. [B. 78.]

**ARÆOMETER**, n.  $A^2r-e^2-o^2m-e^2u^2r$ . From *ἀραιός*, rare, and *μέτρον*, a measure. Lat., *aræometrum*. Fr., *aræomètre*. Ger., *Aræometer*. It, *aræometro*. Literally, a measurer of lightness; hence that which measures specific gravity, especially a hydrometer. [B.] See HYDROMETER, and also ALCOHOLOMETER, LACTOMETER, and UNOMETER.

**ARÆOMETRIC**, adj.  $A^2r-e^2-o^2m-e^2u^2r$ . Fr., *aræométrique*. Ger., *aræometrisch*. It., *aræometrico*. Sp., *aræométrico*. Of or pertaining to aræometry. [B.]

**ARÆOMETRY**, n.  $A^2r-e^2-o^2m-e^2u^2r$ . Lat., *aræometria*. Fr., *aræométrie*. Ger., *Aræometrie*. It., *aræometria*. The determination of specific gravity by means of an aræometer; hydrometry. [B.]

**ARÆOS** (Lat.), adj.  $A^2r(a^3r)-e^2(a^3e^2)-o^2s$ . Gr., *ἀραιός*. Thin, rare. [B. 78.]

**ARÆOSARCOS** (Lat.), adj.  $A^2r(a^3r)-e^2(a^3e^2)-o-sa^3r-ko^2s$ . Gr.,

*ἀραιόσαρκος* (from *ἀραιός*, thin, and *σάρξ*, flesh). Having spongy or porous flesh. [Hippocrates (B. 115).]

**ARÆOSIS** (Lat.), n. f.  $A^2r(a^3r)-e^2(a^3e^2)-o^2si^2s$ . Gen., *aræo-sios (-sis)*. Gr., *ἀραιωσις*. The act of making loose, lighter, or more porous; dilution. [B. 78, 115.]

**ARÆOSYNCRITOS** (Lat.), adj.  $A^2r(a^3r)-e^2(a^3e^2)-o-si^2n(su^4n)^{-}kr^2i^2t-o^2s$ . From *ἀραιός*, slight, and *συνκρίναι*, to put together. Of slight frame (said of persons). [Galen (M. 59).]

**ARÆOTES** (Lat.), n. f.  $A^2r(a^3r)-e^2(a^3e^2)-o^2t-e^2(e^2s)$ . Gen., *aræo-te(-tis)*. Gr., *ἀραιότης*. The state of being porous; sponginess. [Hippocrates (B. 115).]

**ARÆOTICA** (Lat.), n., n. pl. of *aræoticos*.  $A^2r(a^3r)-e^2(a^3e^2)-o^2i^2k-a^3$ . Gr., *Αῤῥωτικά*. Remedies or agents which dilute the humors, expand the tissues, or open the pores of the body. [B. 48.]

**ARÆOTICON** (Lat.), n., n. of adj. *aræoticos*. A name given by P. T. Meissner to the supposititious substance caloric. [B. 78.]

**ARÆOTICOS, ARÆOTICUS** (Lat.), adj's.  $A^2r(a^3r)-e^2(a^3e^2)-o^2i^2k-o^2s, -u^3s(u^4s)$ . Gr., *ἀραιωτικός* (from *ἀραιός*, light, rare). Capable of or adapted for expansion or rarefaction. [B. 78.]

**ARÆUS** (Lat.), adj.  $A^2r(a^3r)-e^2(a^3e^2)-u^3s(u^4s)$ . See ARÆOS.

**ARAGALLUS** (Lat.), n. m.  $A^2r(a^3r)-a^3ga^2l(ga^3l)^{-}lu^3s(lu^4s)$ . Of Necker, the genus *Astragalus*. [B. 170.]

**ARAGBADHA** (Sanskrit), n. The *Cassia fistula*. [B. 181.]

**ARAGBADHADI** (Sanskrit), n. A purgative decoction, made of *Cassia fistula* and other ingredients, much used in India. [B. 181.]

**ARAGMA** (Lat.), n. n.  $A^2r(a^3r)-a^3g(a^3g)^{-}ma^3$ . Gen., *arag-matos (-tis)*. Gr., *ἀραγμα* (from *ἀράσσειν*, to strike hard). 1. That which is cast together; also that which is thrown asunder, beaten, or shattered. 2. A throwing together or throwing apart, a shattering; also a rattling or clashing (as of the teeth together). [B. 78, 115.]

**ARAGMOS** (Lat.), n. m.  $A^2r(a^3r)-a^3g(a^3g)^{-}mo^2s$ . See ARAGMA (2d def.).

**ARAGNON** (Fr.), n.  $A^3r-a^3n-yo^2n^2$ . Sp., *arañon*. The fruit of the *Prunus spinosa*, or sloe. [B. 121.]

**ARAGO**, n. See ALAGOA.

**ARAGOACEÆ** (Lat.), n. f. pl.  $A^2r-a^3g-o-a(a^3)^{-}se^2(ke^2)-e(a^3e^2)$ . From *Aragoa*, one of the genera, named after the French physicist Arago. A section of plants made by Don, including genera now classed under the *Scrophulariaceae*. [B. 197.]

**ARAGONA** (It.), n.  $A^3-ra^3-go-na^3$ . A place in Sicily, where there is a cold sulphurous spring. [A. 385.]

**ARAGUS** (Lat.), n. m.  $A^2r(a^3r)-a^3g-a^3u^3s(u^4s)$ . Of Necker, the genus *Astragalus*. [B. 121.]

**ARAH** (Ar.), n. Mastic, or the mastic-tree (*Pistacia lentiscus*). [B. 5, 121.]

**ARAGNÉE** (Fr.), n.  $A^3r-a^2n-ya$ . A spider. [B. 93.] See ARAGNÉE.—A. de mer. The *Sepia officinalis*. [B. 92.]

**ARAIHA**, n. The *Pistacia lentiscus*. [L. 119.] See ARAH.

**ARAIIS-EL-NIL** (Ar.), n. Literally, the "bride of the Nile"; an Egyptian name for the *Nymphaea lotus*. [B. 121.]

**ARAK** (Ar.), n. 1. The *Salvadora persica*. 2. An undetermined species of *Cissus*. [B. 19; Forskål (B. 121).]

**ARAK**, n.  $A^2r-a^2k$ . See ARRACK.

**ARAKA**, n. See ARRACK.

**ARAKACHA, ARAKATSCHA**, n's. The tuber of the *Ar-racacia esculenta*, also of the *Conium moschatum*. [B. 48; L.]

**ARAKI** (Ar.), n. An intoxicating Egyptian beverage made from dates. [B. 7, 48.] See ARRACK.

**ARAL**, adj.  $A^2ra^2l$ . Lat., *aralis*. Of or resembling *Arum*; belonging to the *Arales*. [B. 197.]—A. alliance. See ARALES.

**ARALDA**, n. See DIGITALIS.

**ARALEE** (Tamil), n. The *Nerium odorum*. [B. 172.]

**ARALEs** (Lat.), n., f. pl. of *aralis* (*plante* understood).  $A^2r(a^3r)-a^3y^2le^2s$ . The aral alliance; in Lindley's classification, the 8th alliance of endogens, including those with unisexual petaloid or apetalous flowers borne upon a simple naked spadix and with the embryo surrounded by mealy or fleshy albumen. It comprises the orders *Pistaceae*, *Typhaceae*, *Araceae*, and *Pandanaceae*. The same name is adopted for a cohort of monocotyledonous plants nearly equivalent to Lindley's A. [B. 75, 197.]

**ARALIA** (Lat.), n. f.  $A^2r(a^3r)-a^3y^2li^2a^3$ . Fr., *aralie*. Ger., *Aralie*, *Angelikbaum*. Wild sarsaparilla. A genus of herbs, shrubs, and small trees with alternate or whorled compound leaves, and flowers, borne on jointed pedicels, having 5 ovate petals imbricate in aestivation, 5 stamens, 2 to 5 free styles, and a 2- to 5-celled ovary. It comprises the sections: (1) *Ginseng*, including herbs having 2 to 3 styles and whorled leaves; (2) *Euraria*, erect shrubs with pinnate, bipinnate, or tripinnate leaves, 5 styles, and a 5-carpelled, dorsally ridged fruit; (3) a section consisting of erect or climbing shrubs, or of trees resembling those of the second section, but with digitate leaves. By Baillon the genus is made to include also *Pentapanax*, *Macropanax*, *Brassaiopsis*, *Acanthopanax*, and *Eleutherococcus*, regarded by Bentham and Hooker as distinct genera. [B. 42, 212, 262.]—A. arborea [Linnæus]. See *HEDERA arborea*.—A. bipinnatifida [C. B. Clarke]. Syn.: *Panax bipinnatifidum*. A species growing in the Sikkim Himalayas, resembling *A. pseudoginseng* and perhaps identical with it. [B. 212.]—A. californica. California spikenard; a species closely resembling *A. racemosa*, but much larger. [B. 81.]—A. chinensis [Linnæus]. An arborescent Chinese species with acuminate petioles and decomposed bipinnate leaves, the wood of which is used to make fire by friction. [B. 173, 214.]—A. cochleata [Lamarck]. See *PANAX cochleatus*.—A. cordata [Thunberg]. A species perhaps identical with *A. edulis*.

[B. 267.]—*A. edulis* [Siebold and Zuccarini]. Syn.: *Dimorphanthus edulis*. A species distinguished by the flowers being wholly or in part unisexual. It has aromatic roots, and the young shoots are eaten in China and Japan, where also the plant is used as a remedy in chlorosis, disorders of menstruation, and puerperal diseases. [B. 267.] "Proc. of the Am. Pharm. Assoc.," xxiv, p. 756 (B.).—*A. ginseng*. Syn.: *Panax ginseng*. A species belonging to the section *Ginseng*, growing in Manchuria. Its forked rhizome constitutes the true ginseng, and was formerly exported in large quantities to China. It is now, however, largely replaced by the rhizome of *A. quinquefolia*, of which perhaps it is only a variety. [B. 1.]—*A. hispida* [Linnaeus]. Bristly *a.*, bristly sarsaparilla, wild elder, dwarf elder. A species growing in the North Atlantic United States. It has a stalk 1 to 2 feet high, woody and covered with sharp bristles below, herbaceous above, and bearing dark-colored berries of a disagreeable taste. Its root has been used as a diuretic in dropsy. [B. 5, 34.]—*A. humilis*. See *A. ginseng*.—*A. mühlenbergiana* [Schultes]. See *A. hispida*.—*A. nudicaulis* [Linnaeus]. Fr., *a. nude*. Ger., *nackstenglige Aralie*, *kahler Angelikbaum*. False (or wild) sarsaparilla, shotbush, small spikenard. A perennial herb growing in the Northern and Eastern States. It is nearly stemless, and the greenish flowers are disposed in 3 simple umbels upon a naked scape springing almost directly from the large fleshy rhizome. The leaf-stalk, also springing from the rhizome, bears a single decoumpound leaf longer than the scape. The rhizome contains resin, sugar, starch, and a volatile oil. *A. nudicaulis*, especially the rhizome is aromatic, diuretic, and diaphoretic, and is used in domestic practice as a substitute for sarsaparilla, particularly in syphilis, rheumatism, and skin diseases. [B. 5, 33, 34.]—*A. octophylla* [Lourier]. A tree about 10 feet high, growing in Cochinchina, where its leaves and bark are used as an aperient, diuretic, and diaphoretic. [B. 180.]—*A. palmata*. 1. Of Lamarck, a shrub growing in the Moluccas, the leaves and bark of which are bitter and acrid and are employed as a remedy against gonorrhoea and a disease of the abdomen supposed to be produced by polypi. 2. Of Loureiro, the *A. scandens*. [B. 180.]—*A. papyrifera* [Hooker]. Syn.: *Didymopanax papyrifera*. The rice-paper plant. A small tree growing in swampy districts in Formosa, the white pith of which constitutes the rice-paper of commerce, and is used as a tonic and diuretic. By Bentham and Hooker it is referred to *Fatsia*. [B. 19, 42.] "Proc. of the Am. Pharm. Assoc.," xxiv, p. 755 (B.).—*A. pentaphylla* [Thunberg]. See *A. arborescens*.—*A. polaris*. See *STILBOCARPA polaris*.—*A. polyscias* [Sprengel]. See *POLYSCIAS pinata*.—*A. pseudo-ginseng* [Benthams]. Syn.: *Panax pseudo-ginseng* [Wallich]. A species belonging to the section *Ginseng*, growing in the Khasia Mountains, Sikkim, and Nepal, having a horizontal tuberous rhizome. It is distinguished from *A. ginseng* (of which it is perhaps only a variety) by its narrower, lanceolate, bristly leaves. [B. 212.]—*A. quinquefolia* [A. Gray]. Syn.: *Panax quinquefolius* [Linnaeus]. American ginseng; a species belonging to the section *Ginseng*, indigenous to North America. It is an herb about 1 foot in height, bearing yellowish flowers, a terminal whorl of 3 quinquefoliate leaves, and scarlet berries. The thick, fleshy, fusiform rhizome is one variety of ginseng. It is said to contain *paniquilon* and *panacon*. [B. 34, 270.] See *GINSENG*.—*A. racemosa* [Linnaeus]. Fr., *aralie à grappes*. American spikenard, petty morrel. A perennial herb, growing in the United States and Canada. It has a smooth stalk, 3 to 4 feet high, and bears decoumpound leaves and numerous small umbels of flowers disposed in the form of a decoumpound panicle. Its rhizome is short and thick, has an agreeable aromatic odor and taste, and contains resin, starch, sugar, and probably a little volatile oil. It is used for flavoring beer, and also in domestic medical practice, like the *A. nudicaulis*, as a diaphoretic in thoracic and abdominal diseases, and as an application to ulcers. [B. 5, 33, 34, 180.]—*A. scandens* [Poiré]. A species referred to *Brassaiopsis*. [B. 267.]—*A. spinosa* [Linnaeus]. Fr., *angelique épineuse*. Angelica-tree, toothache-tree, Hercules's club. A species growing in the middle and southern United States. In the former, it is a shrub 8 to 12 feet in height; in the latter, a tree of 20 to 30 feet, with leaves 4 to 6 feet long. The bark is smooth and furnished with transverse rows of spines; the leaves are bipinnate or tripinnate, and borne only or chiefly at the summit of the stem; the white flowers form numerous umbels arranged in the form of a large panicle. The bark has an aromatic odor and bitter taste, and contains starch, sugar, gum, pectin, two resins of acrid properties, a volatile oil, and an uncrystallizable alkaloid [Elkins]; or, according to others, a glucoside, *aralin* [Holden]. It is used as a diaphoretic in syphilitic, rheumatic, gouty, and cutaneous disorders. The bark of the root is said to be emeto-cathartic. The leaves are employed like the bark, and the berries yield a pungent tincture which has been used to relieve the pain of rheumatism, toothache, and colic. [B. 5, 34, 180.]—*A. triphylla* [Poiré]. Syn.: *Panax trifolius* [Linnaeus]. The groundnut, dwarf ginseng; a North American species belonging to the section *Ginseng*; an herb 3 to 6 inches high, bearing white flowers, a terminal whorl of 3 leaves (usually trifoliate), and green berries. Its root is globose and tuberous. [B. 34.]—*A. umbellifera* [Lamarck]. See *OSMOXYLON umbelliferum*.—Bristly *A.* See *A. hispida*.—*Écorce d'a. épineuse* (Fr.). The bark of *A. spinosa*. [B. 5.]

**ARALIACEÆ** (Lat.), n. f. pl.  $A^2r(a^2r)-a(a^2)-li^2-a(a^2)se^2(ke^2)-e(a^2-e^2)$ . Fr., *araliacées*. Ger., *Araliaceen*, *Araliengewächse*. It., *araliacee*. The araliads; ivy-worts. An order of trees, shrubs, and herbs belonging to the umbellal alliance of epigynous exogens [Lindley], the cohort *Umbellales* [Bentham and Hooker], or the order (= cohort) *Umbellifloræ* [Eichler]. It is closely allied to the *Umbelliferae* (in which it is included by some botanists) in the character and arrangement of the flowers and leaves, but differs in that the petals are never inflected and are usually valvate in aestivation, that the ovary usually possesses more than 2 styles and 2 loculi, each loculus containing one ovule, and that the fruit contains from 3 to 5 cells, with one albuminous seed in each cell. The *A.* are divided by Bentham and Hooker into 5 tribes: 1. The *Aralieæ*, including *Aralia* and other genera in which the petals are more or less imbricate and are enlarged at their insertion. 2. The *Mackinlayæ*. 3. The *Panaceæ*, including *Panax* and allied genera. 4. The *Hedereæ*, including *Hedera* and other genera. 5. The *Plerandree*. By Reichenbach and others the *A.* are divided into the *Aralieæ*, plants usually with a woody stem and having a polypetalous corolla valvate in aestivation, and the *Adoxeæ*, comprising the genus *Adoxa*, distinguished by their herbaceous stem, by their corolla being subpolypetalous and imbricate in aestivation, and by the bipartite filaments of their stamens. The latter genus is, however, now usually referred to *Caprifoliaceæ*. [B. 19, 34, 104, 121, 197.]

**ARALIACEOUS**, adj.  $A^2r-a^2li^2-a^2shu^2s$ . Lat., *araliaceus*. Fr., *araliacé*. It., *araliaceo*. Of, pertaining to, or resembling the genus *Aralia*; belonging to the *Araliaceæ*. [B.]

**ARALIADS**, n. pl.  $A^2r-a^2li^2-a^2dz$ . The *Araliaceæ*. [B. 197.]

**ARALIÆ** (Jussieu) (Lat.), n. f. pl.  $A^2r(a^2r)-a(a^2)-li^2-e(a^2-e^2)$ . See *ARALIACEÆ*.

**ARALIATRUM** (Lat.), n. n.  $A^2r(a^2r)-a(a^2)-li^2-a^2s(a^2s)-tru^2m$  (tru'm). Of Vaillant, the genus *Panax*. [B. 197.]

**ARALIE** (Fr., Ger.), n.  $A^2r-a^2li^2-e$ . The *Aralia*. [B. 93, 180.]—*A. à grappes* (Fr.). The *Aralia racemosa*. [B. 173.]—*A. épineuse*. The *Aralia spinosa*. [B. 173.]—*A. ngewächse* (Ger.). The *Araliaceæ*. [B. 35.]—*Dornige A. rinde* (Ger.). The bark of *Aralia spinosa*. [B. 5.]—*Nackstenglige A.* (Ger.). The *Aralia nudicaulis*. [B. 180.]

**ARALIEÆ** (Lat.), n. f. pl.  $A^2r(a^2r)-a^2li^2(a^2li^2)-(e)^2e^2-e(a^2-e^2)$ . Fr., *araliées*. Ger., *Aralieen*. 1. Of Sprengel and of Baillon, an order (series) of umbelliferous plants including *Aralia*, *Panax*, and other genera now described under *Araliaceæ*. 2. Of Reichenbach and others, a section of the *Araliaceæ* (q. v.), including all the genera except *Adoxa*. 3. Of Bentham and Hooker, a tribe of the *Araliaceæ* comprising *Aralia* and 5 other genera. See *ARALIACEÆ*. [B. 121, 170.]

**ARALIETIN**, n.  $A^2r-a^2li^2-i^2e^2t-i^2n$ . Fr., *araliétine*. Ger., *Aralielin*. A substance produced by the decomposition of aralin. [B. 207.]

**ARALIN**, n.  $A^2r-a^2li^2-i^2n$ . Fr., *araliine*. Ger., *Aralin*. A glucoside found by Holden in *Aralia spinosa*. On treatment with dilute acids, it decomposes into glucose and aralielin. [B. 207.]

**ARALIRETIN**, n.  $A^2r-a^2li^2-i^2e^2t-i^2n$ . See *ARALIETIN*.

**ARALOO**, **ARALU** (Sanskrit), n's. The *Calosanthus indica*. [B. 181.]

**ARAMAYONA** (Sp.), n.  $A^2r-a^2m-a^2yo^2na^2$ . A place in the province of Alava, Spain, at which there are two mineral springs, one containing sulphur, the other iron. The former has the following constitution in 1,000 grammes:

Calcium carbonate.....	0.7050
Magnesium carbonate.....	0.0020
Calcium sulphate.....	0.0105
Magnesium sulphate.....	0.0030
Sodium chloride.....	0.0075
Magnesium chloride.....	0.0032

Total solids.....	0.7312
Hydrogen sulphide.....	20.000 cu. cent.
Carbon dioxide.....	a small proportion.

They are resorted to for respiratory and rheumatic affections. [B. 46, 93.]

**ARAN** (Ar.), n. The *Capparis spinosa*. [B. 121.]

**ARANÉ** (Fr.), adj.  $A^2r-a^2na$ . See *ARANÉEN*.

**ARANEÆ** (Lat.), n. f.  $A^2r(a^2r)-a(a^2)-ne^2-a^2$ . From *ἀράνη*, a spider or its web. 1. A spider; also a genus of *Araneida*, made by Linnaeus, comprising a great number of species now relegated to distinct genera. 2. A spider's web. [Pliny.] 3. In anatomy, the arachnoid membrane (in this sense really *f. of araneus*, agreeing with *tunica*, understood). [B. 48, 134.]—*A. diadema* [Linnaeus]. See *EPEIRA diadema*.—*A. domestica* [Linnaeus]. *A. fusca* [Clerck]. See *TEGGERIA DOMESTICA*.—*A. tarantula*. See *TARANTULA*.—*Tela araneæ*. See under *TELA*.

**ARANEÆ** (Lat.), n. f. pl.  $A^2r(a^2r)-a(a^2)-ne^2-e(a^2-e^2)$ . See *ARANEIDA*.

**ARANÉEN** (Fr.), adj.  $A^2r-a^2n-a^2n^2$ . 1. Of or resembling a spider. 2. See *ARANEOSUS* (2d def.).

**ARANÉEUX** (Fr.), adj.  $A^2r-a^2n-a^2u^2$ . See *ARANEOSUS* and *ARANEUS*.

**ARANEIDA** (Lat.), n. n. pl.  $A^2r(a^2r)-a^2n-e(a^2)-i^2d-a^2$ . From *aranea*, and *είδος*, a likeness. Fr., *araignées*. Ger., *Spinnen*. The spiders. An order of articulate (arthropodous) animals belonging to the class *Arachnida*, distinguished by the fusion of the head and thorax into a single mass, by the non-segmentation of the abdomen, by the presence of poison-glands the ducts of which are borne upon the hooked mandibles, and by the absence of chela. [B. 28.]

**ARANEIDÆ** (Lat.), n. f. pl.  $A^2r(a^2r)-a^2n-e(a^2)-i^2d-e(a^2-e^2)$ . See *ARANEIDA*.

**ARANEIDANS**, n. pl.  $A^2r-a^2n-e^2-i^2d-a^2nz$ . See *ARANEIDA*.

**ARANEIDES** (Lat.), n. f. pl.  $A^2r(a^2r)-a^2n(a^2n)-e(a^2)-i^2d-ez(e^2s)$ . See *ARANEIDA*.

**ARANEIFEROUS**, adj.  $A^2r-a^2n-e^2-i^2f-e^2r-u^2s$ . Lat., *araneiferus* (from *aranea*, a spider, and *ferre*, to bear). Fr., *araneifère*. Bearing or producing spiders. [B. 38.]

**ARANEIFORM**, adj.  $A^2r-a^2n-e^2-i^2f-o^2rm$ . Lat., *araneiformis* (from *aranea*, a spider, and *forma*, form). Fr., *araneiforme*. Spider-shaped, having a form like a spider. [B. 116.]

**ARANEIN**, n.  $A^2r-a^2ne^2-i^2n$ . A name given by homœopathic

practitioners to a liquid obtained by puncturing the abdomen of the common spider (*Epeira diadema*). Used as an embrocation. [B, 270.]

**ARANEINA** (Lat.), n. n. pl.  $A^2r(a^3r)-a^2n(a^3n)-e^2-i(e)-na^3$ . The *Araneida*. [B, 27.]

**ARANEOID**, adj.  $A^2r-a^2n-e^2-oid$ . From *Aranea* and εἶδος, likeness. Fr., *araneïde*. Resembling a spider; spider-like. [B, 38.]

**ARANEOLIST**, n.  $A^2r-a^2n-e^2-o^2l-o^2j-i^2st$ . Fr., *araneologue*. One skilled in araneology. [B, 38, 77.]

**ARANEOLGY**, n.  $A^2r-a^2n-e^2-o^2r-o^2j-i^2$ . For deriv., see *ARANEIA* and *-logy*. Fr., *araneologie*. That branch of natural science which treats of spiders. [B, 38.]

**ARANEOSUS** (Lat.), adj.  $A^2r(a^3r)-a^2n(a^3n)-e^2-o^2su^3s(su^4s)$ . Fr., *araneux*. 1. In botany, resembling a spider's web in texture; made up of fine interlacing threads; arachnoid. [B, 1, 121.] 2. Of the pulse, thready, feeble. [B.]

**ARANEUS**, adj.  $A^2r-a^2ne^2-u^3s$ . See *ARANEUS* and *ARANEOSUS*.

**ARANEUM** (Lat.), n. n.  $A^2r(a^3r)-a(a^3)/ne^2-u^3m(u^4m)$ . 1. A cobweb. See *TELA aranea*. 2. A sort of dew or frost, resembling a spider's web in appearance, deposited upon grapes and olives and spoiling them. [Pliny (B, 134).] 3. A term used by Paracelsus as synonymous with *astachilos* (q. v.).

**ARANEUS** (Lat.), adj. and n.  $A^2r(a^3r)-a(a^3)/ne^2-u^3s(u^4s)$ . Fr., *araneux*. 1. Web-like, said of interlaced fine hairs or threads. See *ARACHNOID*. 2. Covered, provided with, or consisting of a fine cobweb-like tissue; consisting of separate filaments, like the ring of an agaric. [B, 93, 121.] 3. As a n., a spider; also a sort of sea-fish. [Pliny (B, 134).]

**ARANGIUM** (Lat.), n. n.  $A^2r(a^3r)-a^2n(a^3n)/ji^2(gi^2)-u^3m(u^4m)$ . See *ARANTHUM* and *AURANTHUM*.

**ARANGOS**, n. A place in Transylvania, where there is a ferruginous alkaline spring. [A, 385.]

**ARANIDEA** (Lat.), n. n. pl.  $A^2r(a^3r)-a^2n(a^3n)-i^2d-e^2a^2$ . Kirby's name for the *ARANEIDA*. [B, 77 (8th ed.).]

**ARANIDES** (Lat.), n. f. pl.  $A^2r(a^3r)-a^2n(a^3n)/i^2d-ez(e^2s)$ . A family of *Arachnida*, made by Latreille, corresponding to the *Araneida*. [B, 77 (8th ed.).]

**ARANJAT**, n. A name given in southern Europe to the *Agaricus aurantiacus*. [B, 121.]

**ARANJUEZ** (Sp.), n.  $A^3r-a^3n-hu-ath^2$ . A place near Madrid, in Spain, where there is a purgative and diuretic spring. [A, 255, 385.]

**ARANTHUM** (Lat.), n. n.  $A^2r(a^3r)-a^2n(a^3n)/shi^2(ti^2)-u^3m(u^4m)$ . The original form of *auranthum* (q. v.). [B, 121.]

**ARANTSKAMMER** [Günther] (Ger.), n.  $A^3r-a^3nts-ka^3m-me^2r$ . Lat., *ventriculus Arantii*. [I, 3.] See *CALAMUS scriptorius*.

**ARANZARI** (Sp.), n.  $A^3r-a^3n-th^2a^3r-e$ . A cold mineral spring in Spain (province of Guipuzcoa) containing sulphur and calcium; used in cutaneous and respiratory diseases. [B, 93.]

**ARÄOMETER** (Ger.), n.  $A^3r-e^2-o^2m-e^2t-e^2r$ . See *AREOMETER*. [B, 49.]—**A.-Pipette**. An instrument consisting of a hydrometer to which is attached a pipette, so arranged that on closing the orifice of the latter with the thumb and so aspirating a portion of the liquid under examination into the pipette, the weight of the portion thus aspirated is constant. [B, 48.]—**Fahrenheit'sches Gewichtsa°**. See *Fahrenheit's hydrometer-Gewichtsa°*. A hydrometer which indicates the specific gravity by the weight required to depress it to a fixed point upon its scale. [B, 49.] See *HYDROMETER of constant volume*.—**Harn-A.** See *UROMETER*.—**Nicholson'sches A.** See *Nicholson's hydrometer*.—**Procent-A., Prozent-A.** A hydrometer the scale of which is so graduated as to indicate directly the percentage composition of the liquid in which it is immersed. [B, 49.] See *Centesimal ALCOHOLOMETER*.—**Scalen-A.** A hydrometer which indicates the specific gravity by the depth (measured upon a scale attached to the instrument) to which it sinks in the liquid examined. [B, 48.] See *HYDROMETER of constant weight*.

**ARÄOMETRIE** (Ger.), n.  $A^3r-e^2-o^2m-e^2t-re^2$ . See *AREOMETRY*.

**ARÄOMETRISCH** (Ger.), adj.  $A^3r-e^2-o^2m-e^2t-ri^2sh$ . See *AREOMETRIC*.

**ARAPABACA** (Lat.), n. f.  $A^3r-a^3p-a^3-ba^3ka^3$ . From *arapabaca*, the Brazilian name of the *Spigelia anthelmia*. Plumier's name for the genus *Spigelia*. [B, 121, 170.]

**ARAPA-MAN**, n. From *attrape-main* = catch the hand. A Languedoc name for the *Galium aparine*. [B, 121.]

**ARAPATAK**, n. A place situated in Siebenbürgen, about 4 hours' ride from Kronstadt, at which there are three springs, used in the treatment of scrofula and rickets, also bathing establishments. The composition of the mineral water is as follows in 1,000 parts:

	Stammbrunnen.	Neubrunnen.	Beldbrunnen.
Total solids.....	3.643	3.359	2.360
Sodium carbonate.....	1.284	0.922	0.627
Calcium carbonate.....	1.175	1.382	0.509
Ferrous carbonate.....	0.208	0.306	0.145
Free carbonic acid.....	1.983	1.536	1.215

[B, 108.]

**ARAR** (Beng.), n. The *Cajanus indicus*. [B, 181.]

**ARAR**, n. Lit., a tree; a name given in Barbary to the *Callitris quadrivalvis* (or *C. articulata*), the tree which furnishes sandarach. [B, 19, 93.]

**ARARA**, n. See *JOHANNESIA*.—**A. fructus americanus**, **A. fructus secundus**. A tree of French Guiana, of unknown botani-

cal station, but allied to the juniper. It is said to be applied to ulcers. [B, 200.]

**ARARE**, n. The *Terminalia citrina*. [B, 121.]

**ARARIBA** (Lat.), n. f.  $A^3r-a^3r-e^2-ba^3$ . From the Brazilian name. 1. A name given by Marcgraff to a whitish wood supposed to be derived from a species of *Pterocarpus* (according to others, from the *Acacia*). 2. A genus of Brazilian trees. 3. *Araroba*. [B, 121.]—**A. bark**, Lat., *cortex araribæ*. A variety of spurious cinchona bark said to be derived from *A. rubra*. It closely resembles the bark called *cinchona rosa*, and contains *aribine*. [B, 23.]—**A. rosa**. A tree the wood of which, according to Guibourt, is identical with Diabul wood or that of *Acacia arabica*. [B, 121.]—**A. rubra** [Martius]. A tree of eastern Brazil, the red bark of which is used by the Indians in dyeing. [B, 121.]—**Cortex araribæ**. See *A. bark*.

**ARARIBINE**, n.  $A^3r-a^3r-e^2-ben$ . See *ARIBINE*.

**ARARIEÆ** (Lat.), n. f. pl.  $A^2r(a^3r)-a^3-ri(re)^2-e^2-e^2(a^3-e^2)$ . Of Dumortier, an order of plants belonging to the *Spadicatæ*, comprising the families *Zosteraceæ*, *Ardeæ*, and *Cyclanthæ*. [B, 170.]

**ARAROA** (Lat.), n. f.  $A^3r-a^3r-o^2-ba^3$ . From the Brazilian name. Chrysarobin or Goa-powder, derived from the *Andira a.*, or, according to some, the *Centrobium tomentosum*. [B, 5, 121.] See *CHRYSAROBIN*.—**A. depurata**. A. purified by solution in benzene; chrysarobin (q. v.). [B, 270.]

**ARAROUT, ARA-ROOT**, n's.  $A^2r-a^3-rut$ . See *ARROW-ROOT*.

**ARARUN**, n. See *ARAR*.

**ARA-RUTA**, n. A native Brazilian name for arrow-root, from which, according to Greenish, the English word is derived. ["Pharm. Jour. and Trans.," Aug. 26, 1876, p. 169 (B).]

**ARASINA GURGI**, n. A variety of gamboge collected in Canara. ["Pharm. Jour. and Trans.," Dec. 2, 1876, p. 451 (B).]

**ARASUM** (Telooogo). The *Ficus religiosa*. [B, 172.]—**A.-marum**, **A. verel**. See *A.*

**ARATA-GUAM**, n. A Brazilian name for the *Anona muricata*. [B, 121.] Cf. *ARATICU*.

**ARATICA**, n. See *ARATICU*.

**ARATICU**, n. A Brazilian name for the *Anona*. [B, 121.]—**A. do mato**. The *Anona silvatica*. [B, 197.]—**A.-ponhe** [Marcgraff], **A.-porche** [Marcgraff], **A. prima** [Ray]. The *Anona muricata*. [B, 211.]

**ARATI-CUPANA** [Marcgraff]. The *Hippomane mancinella*. [B, 211.]

**ARATRUM** (Lat.), n. n.  $A^2r(a^3r)-a^2t(a^3t)/ru^3m(ru^4m)$ . The vomer. [L, 63.]

**ARAUCARIA** (Lat.), n. f.  $A^2r(a^3r)-a^4k(a^3-uk)-a(a^3)/ri^2-a^3$ . From *Araucania*, in South America, where the trees are found. Ger., *Ädantanne*. A genus of evergreen coniferous trees, established by Jussieu, belonging to the subtribe *Araucarieæ*, and distinguished by their whorled branches and their stiff, flattened, sharp-pointed

THE ARAUCARIA IMBRICATA. [B, 49.]

leaves. Salisbury made out of this genus two new genera (*Colymbea* and *Eutassa*), and Link restricted the genus *A.* to the species (*A. brasiliensis* and *A. imbricata*) referred by Salisbury to *Colymbea*. [B, 19, 75, 170.]—**A. Bidwillii** [Hooker]. The bunya-bunya pine; a

lofty tree growing between the Brisbane and Burnett rivers in Australia. It bears large cones containing edible seeds. [B, 19, 49.]—*A. brasiliensis* [Richard]. The Brazil pine. A lofty Brazilian tree which furnishes a very fragrant resin. [B, 49, 197.]—*A. columnaris* [Hooker], *A. Cookii* [R. Brown]. Ger., *Säulenypresse*. A tall Australian species from the cones of which a resinous matter exudes. [B, 49.]—*A. Cunninghamii* [Aiton]. Syn.: *Eutacta (Eutassa) Cunninghamii*. The Moreton Bay pine; an Australian species furnishing no resin but a white transparent exudation. [B, 49, 77.]—*A. Dombeyi* [Richard]. See *A. imbricata*.—*A. excelsa* [R. Brown]. Ger., *Norfolksfichte*, *Norfolktaanne*. Syn.: *Dombeya* (seu *Eutassa*, seu *Atlingia*) *excelsa*. The Norfolk Island pine; a tree growing in New Caledonia and Norfolk Island, and attaining a height of 200 feet and upwards. The seeds are said to be edible; but this is denied. [B, 19, 49.]—*A. imbricata* [Pav.]. Ger., *Chitfichte*. Syn.: *Dombeya chilensis* [Lamarck], *Pinus araucana* [Molin], *Colybea quadrifaria* [Salisbury]. The Chili pine; a tree growing in the mountains of Chili, by some identified with *A. excelsa*. Upon incision it furnishes a milky, glutinous juice of strong odor and taste, called *Dombeya turpentina*. [B, 5.]—*A. Rulei* [Müller]. A New Caledonian species of smaller size than the others. [B, 77.]

**ARAUCARIÆ** (Lat.), n. f. pl. *A*<sup>2</sup>*r*(*a*<sup>2</sup>*r*)<sup>2</sup>—*a*<sup>4</sup>(*a*<sup>3</sup>—*u*)—*ka*<sup>3</sup>*r*—(*e*)<sup>2</sup>—*e*(*a*<sup>3</sup>—*e*). Fr., *araucariées*. Of Reichenbach and others, a subtribe of coniferous trees belonging to the tribe *Abietineæ*, characterized by the spirally arranged deciduous scales of the cones, and the flat or quadrangular leaves, subopposite or disposed in spirals. It includes the genera *Araucaria* and *Dammara*. [B, 75, 170.]

**ARAXAS**, n. Soot. [B, 59.] See **FULIGO**.

**ARAXAT**, n. From Ar., *Ar-ratsat* or *al-rázaz*, lead. An alchemical name for lead. [B, 52.]

**ARAYANA**, n. An unknown tree used in the preparation of chica from the *Bignonia chica*. [B, 197.]

**ARAYA-ANGELI**, n. The *Antiaris saccidora*. [B, 172.]

**ARBACIADÆ** (Lat.), n. f. pl.

**ARBEIT** (Ger.), n. *A*<sup>2</sup>*r*<sup>2</sup>*bit*. Work, labor. [L, 115, p. 894.]—*A*<sup>2</sup>*samm*ler. Literally a labor-accumulator. An apparatus constructed by Fick whereby a contracting muscle is enabled to raise a weight to the greatest possible distance. By means of a lever acting upon a toothed wheel the weight is retained at the point to which it is raised at the end of each contraction of the muscle, so that the result of a series of stimulations applied to a muscle is indicated by the total height to which the weight is lifted. [K, 35.]—*A*<sup>2</sup>*stheilung*. Division of labor; in biology, the assumption of special functions by special parts or individuals constituting a single organism. [B, 49.]—*A*<sup>2</sup>*szeit*. The working hours of a laborer; also the maximum time which is allowed by the rules of hygiene to be consumed in labor. [M, 1.]

**ARBEITER** (Ger.), n. *A*<sup>2</sup>*r*<sup>2</sup>*bit*—*e**r*. A workman.—*A*<sup>2</sup>*herz*. See under **HERZ**.—*A*<sup>2</sup>*lygiene*. See under **HYGIENE**.—*A*<sup>2</sup>*kleinung*. A form of dress designed to obviate the evil effects of certain occupations. [M, 1.]

**ARBI** (Hind., n. The *Colocasia antiquorum*. [B, 172.]

**ARBI**, n. A Basque name for several varieties of cabbage (*Brassica fera* and *oleracea*). [B, 121.]

**ARBOIS** (Fr.), n. *A*<sup>2</sup>*r*—*bwa*<sup>3</sup>. The *Cytisus laburnum*. [B, 173.]

**ÁRBOL** (Sp.), n. *A*<sup>2</sup>*r*—*bo*<sup>2</sup>. A tree. [B.]—*A*<sup>2</sup>*a*—*brea* resin. A grayish-yellow, soft, glutinous substance, of strong, agreeable odor, obtained from the *Canarium album*. [B, 2.]—*A*<sup>2</sup>*a*—*abrea*. Literally the pitch-tree; a Spanish name for the tree furnishing elemi.—*A*<sup>2</sup>*de amor*. The *Cercis siliquastrum*. [B.]—*A*<sup>2</sup>*de coral*. The *Picramnia corallodendron*. [B, 19, 121.]—*A*<sup>2</sup>*del aceite de Maria*. The *Calophyllum Marieæ*. [B, 121.]—*A*<sup>2</sup>*de la vida*. See **ARBOR VITÆ**.—*A*<sup>2</sup>*del cera*. The *Eleoagria utilis*. [B, 121.]—*A*<sup>2</sup>*de leche*. The *Piratinera utilis*. [B, 93.]—*A*<sup>2</sup>*del pan*. The *Artocarpus incisa*. [B.]—*A*<sup>2</sup>*del paraíso*. The *Eleoagnus angustifolia*. [B.]—*A*<sup>2</sup>*de manitas*. The *Cheiranthodendron*. [B, 121.]—*A*<sup>2</sup>*de sangre*. The *Croton sanguifluum*.—*A*<sup>2</sup>*de ule*. A Mexican name for the *Castilleja elastica*.—*A*<sup>2</sup>*paraíso*. See *A. del paraíso*.

**ARBON**, n. A health resort in Switzerland. [A, 385.]

**ARBONNE** (Fr.), n. *A*<sup>2</sup>*r*—*bo*<sup>2</sup>*n*. A place in Upper Savoy, where there is a saline spring. [A, 385.]

**ARBOR** (Lat.), n. f. *A*<sup>2</sup>*r*—*bo*<sup>2</sup>*r*. Gen., *arbo*<sup>2</sup>*r**is*. From the root *arb*—or *urb*—, found in the Sanscr., *urvāra*, fertile land. Ger., *urbar*, fertile. Celt., *arbara*, a plant with seed. [B, 52.] Fr., *arbre*, *it*, *albero*. Sp., *árbol*. Also written *arbos*. A tree; a plant of more or less considerable stature with a woody trunk and branches. Metaphorically, anything tree-like or branching; a term applied in anatomy to certain portions of the body, and in chemistry to an arborescent precipitate produced by the slow reduction of a metal in solution. [B.]—*A*<sup>2</sup>*aculeata caroliniana*, etc. [Plukenet]. The *Xanthoxylum clava Hercules*. [B, 211.]—*A*<sup>2</sup>*africana* [Plukenet]. The *Ochna adropnurea*. [B, 121.]—*A*<sup>2</sup>*alba* [Rumphius], *A*<sup>2</sup>*alba Cayputi* [Rumphius]. The *Melaleuca leucodendra*. [B, 211.]—*A*<sup>2</sup>*alba minor* [Rumphius]. The *Melaleuca Cajuputi*. [B, 51.]—*A*<sup>2</sup>*aluminosa*. The *Decadia aluminosa*. [B, 121.]—*A*<sup>2</sup>*americana*, *alatis foliis*, *succo lacteo venenato* [Plukenet]. The *Rhus vernix*. [B, 211.]—*A*<sup>2</sup>*americana cucurbitifera*, *folio longo mucronato*, *fructu oblongo* [Comm.]. The *Cræscenia cujete*. [B, 211.]—*A*<sup>2</sup>*americana venenata* [Pet.]. The *Rhus vernix*. [B, 211.]—*A*<sup>2</sup>*aquatica brasiliensis*. See **ANINGARA**.—*A*<sup>2</sup>*beniv*. *A*<sup>2</sup>*benzoifera*. The *Styrax benzoïn*. [A, 316; B, 200.]—*A*<sup>2</sup>*bovina* [Hern.]. The *Chionanthus zeylanica*. [B, 211.]—*A*<sup>2</sup>*brasilica dicta*. The tree (*Cassipoua echinata* and other species which furnishes Brazil wood. [B, 211.]—*A*<sup>2</sup>*cacavi* *cacavifera* [Hern.]. *A*<sup>2</sup>*cacavifera americana*, etc. [Plukenet]. The *Theobroma cacao*. [B, 211.]—*A*<sup>2</sup>*camphorifera*, *A*<sup>2</sup>*cam-*

*phorifera japonica* [Breyer]. The camphor-tree, *Camphora officinarum*. [B, 59, 211.]—*A*<sup>2</sup>*citri* [Pliny]. Probably the sandalwood tree, *Callitris quadrivalvis* (seu *articulata*). [Schousboe (B, 180).]—*A*<sup>2</sup>*coeli* [Rumphius]. Perhaps a species of *Adenanthura* (B, 211); according to others (B, 121), a species of *Ailantus* (*A. molicana*).—*A*<sup>2</sup>*conciliorum* [Rumphius]. Fr., *arbre des conseils*. Probably the *Ficus religiosa*. [B, 211.]—*A*<sup>2</sup>*crepitans* [Hern.]. The *Hura crepitans*. [B, 211.]—*A*<sup>2</sup>*Diaboli*. A name given by the Christians in Malabar to the *Ficus religiosa* because adored by the heathens there. [Rheede (B, 211).]—*A*<sup>2</sup>*Diane*. Fr., *arbre de Diane*. Ger., *Silberbaum*, *Dianenbaum*. It., *albero di Diana*. The silver-tree; an arborescent amalgam of silver obtained by pouring mercury into a solution of silver nitrate. [B, 3.]—*A*<sup>2</sup>*dracena*, *A*<sup>2</sup>*dracenis*. The *Dracæna draco*. [B, 211.]—*A*<sup>2</sup>*excœcaus* [Rumphius]. Fr., *arbre aveuglant*. The *Excœcaria agallocha*. [B, 211.]—*A*<sup>2</sup>*exotica fraxini folio*. The *Acer negundo*. [B, 211.]—*A*<sup>2</sup>*exotica spinosa*. The *Guilandina bonducella*. [B, 211.]—*A*<sup>2</sup>*fabifera prima*. The *Erythrina corallodendron*. [B, 211.]—*A*<sup>2</sup>*farinifera*. The sago-palm. [B, 59.]—*A*<sup>2</sup>*febrifuga peruviana* [Ray]. The *Cinchona officinalis* of Linnaeus. [B, 211.]—*A*<sup>2</sup>*ferrea*. 1. The *Dracæna ferrea*. 2. The *Mesua ferrea*. [B, 211.]—*A*<sup>2</sup>*finium regundorum* [Dalech]. The *Bixa orellana*. [B, 211.]—*A*<sup>2</sup>*fraxini folio*. The *Melia azederach*. [B, 211.]—*A*<sup>2</sup>*glutinosa* [Rumphius]. The *Cordia myxa*. [B, 211.]—*A*<sup>2</sup>*incana siliquis torosis*. The *Cajanus indicus*, var. *flavus*. [B, 59.]—*A*<sup>2</sup>*indica*, *A*<sup>2</sup>*indica flore maximo*, etc. The *Dillenia indica*. [B, 211.]—*A*<sup>2</sup>*indica fraxini folio*. The *Aratia spinosa*. [B, 211.]—*A*<sup>2</sup>*indica fructu conoide*. The *Semecarpus anacardium*. [B, 211.]—*A*<sup>2</sup>*indica mamei dicta* [Bauhin]. The mammee-tree, *Mammea americana*. [B, 211.]—*A*<sup>2</sup>*insania*. The *Caragana*. [B, 121.]—*A*<sup>2</sup>*Jovis*. Fr., *arbre de Jupiter*. Ger., *Zinnbaum*. The tin-tree. An arborescent crystalline deposit of metallic tin formed when zinc is added to a solution of tin chloride. [B, 3.]—*A*<sup>2</sup>*jucadice*. See **CASSIA lignea** and **CANELLA alba**.—*A*<sup>2</sup>*Judæ*. Fr., *arbre de Judas* (ou *Judée*). The Judas-tree, or *Cercis siliquastrum*. [B, 211.]—*A*<sup>2</sup>*Judæ americana* [Ray]. [B, 121.]—*A*<sup>2</sup>*versicolor*. See **AYALLA**.—*A*<sup>2</sup>*vinifera*, *A*<sup>2</sup>*vinifera couthon juglandis similis* [Bauhin]. See **COUTON**.—*A*<sup>2</sup>*vitæ*. See the major list.—*A*<sup>2</sup>*vivicans*. See *A*<sup>2</sup>*VITÆ uterina*.—*A*<sup>2</sup>*zagoe amboinensis*. The *Cycas circinalis*. [B, 211.]

**ARBORARIUS** (Lat.), adj. *A*<sup>2</sup>*r*—*bo*—*ra*(*ra*<sup>3</sup>/*ri*<sup>2</sup>—*u*<sup>3</sup>*s*(*u*<sup>3</sup>)). Of or pertaining to a tree. [B, 134.]

**ARBOREAL**, adj. *A*<sup>2</sup>*r*—*bo*—*re*<sup>2</sup>*a*<sup>2</sup>. Of or pertaining to trees; dwelling upon trees. [R. Owen (B, 116).]

**ARBORÉE** (Fr.), n. *A*<sup>2</sup>*r*—*bo*—*ra*. The trunk of a tree. [B, 1.]

**ARBOREI** (Lat.), n. m. pl. *A*<sup>2</sup>*r*—*bo*—*re*<sup>2</sup>*i*(*e*). A name given by Ruelle to *Fungi* which grow upon trees. [B, 121.] Cf. **ARBORUM fungus**.

**ARBOREOUS**, adj. A<sup>3</sup>r-bo're<sup>2</sup>-u<sup>3</sup>s. Lat., *arbores*. It., *arbo-reo*. Of or pertaining to a tree; resembling a tree; growing upon a tree. [B, 7, 116.]

**ARBORES**, n. An old name for a superficial macular eruption of the skin, which subsequently goes on to ulceration; a sort of morphea. [B, 50.]

**ARBORESCENCE**, n. A<sup>3</sup>r-bo'r-e<sup>2</sup>s'e<sup>2</sup>ns. Lat., *arborescentia* (from *arboresci*, to grow into a tree). Fr., *a*. The state of being arborescent; also the assumption of a tree-like form as seen in certain crystals. [B.]

**ARBORESCENT**, adj. A<sup>3</sup>r-bo'r-e<sup>2</sup>s'e<sup>2</sup>nt. Lat., *arborescens*. Fr., *arborescent*. 1. Of a plant, tree-like; or resembling a tree in size and in having a woody stem and branches. 2. Branching like a tree, as a. crystals. [B.]

**ARBORETUM** (Lat.), n. n. A<sup>3</sup>r-bo-re(r)a/tu<sup>3</sup>m(tu<sup>4</sup>m). A grove, or plantation of trees. [B, 134.]

**ARBOREUS** (Lat.), adj. A<sup>3</sup>r-bo're<sup>2</sup>-u<sup>3</sup>s(u<sup>3</sup>s). See ARBOREOUS.

**ARBORICOLA** (Lat.), n., f. of adj., *arboricolus* (*planta* understood). A<sup>3</sup>r-bo-r'i<sup>2</sup>k'o<sup>2</sup>l-a<sup>2</sup>. A vegetable which grows upon a tree. [B, 121.]

**ARBORICOLOUS**, adj. A<sup>3</sup>r-bo-r'i<sup>2</sup>k'o<sup>2</sup>l-u<sup>3</sup>s. Lat., *arboricolus* (from *arbor*, a tree, and *colere*, to inhabit). Fr., *arboricole*. It., *arboricolo*. Sp., *arboricolo*. Growing upon trees. [B, 121.]

**ARBORIFORM**, adj. A<sup>3</sup>r-bo<sup>2</sup>r'i<sup>2</sup>-fo<sup>3</sup>rm. Lat., *arboriformis* (from *arbor*, a tree, and *forma*, shape). Fr., *arboriforme*. Tree-shaped. [B, 116.]

**ARBORISATION** (Fr.), n. A<sup>3</sup>r-bo<sup>2</sup>r-e<sup>2</sup>-za<sup>3</sup>-si<sup>2</sup>-o<sup>2</sup>n<sup>2</sup>. Arborization.—A. *terminale*. See *Terminal* ARBORIZATION.—A. *vasculaire*. Repeated dichotomous division of blood-vessels after the manner of a tree. [B, 93.]

**ARBORISATUS** (Lat.), adj. A<sup>3</sup>r-bo<sup>2</sup>r-i<sup>2</sup>z(i<sup>2</sup>s)-a(a<sup>3</sup>)/tu<sup>3</sup>s(tu<sup>4</sup>s). See ARBORIZED.

**ARBORIZATION**, n. A<sup>3</sup>r-bo<sup>2</sup>r'i<sup>2</sup>z-a/shu<sup>3</sup>n. Fr., *arborisation*. It., *arborizzazione*. Sp., *arborización*. A tree-like figure occurring in minerals; also a similar tree-like figure produced by the injection of the capillary blood-vessels. [B, 93, 116.]—**Terminal** a. Fr., *arborisation terminale*. 1. See *Motor* END-PLATE. 2. A term also sometimes applied to the branched terminations of sensory nerves. [J.]

**ARBORIZED**, adj. A<sup>3</sup>r-bo<sup>2</sup>r-izd. Lat., *arborisatus*. Fr., *arborisé*. Having an appearance like that of a tree; a term applied to agates. [Wright (B, 116).]

**ARBOR-VINE**, n. A<sup>3</sup>r-bo<sup>2</sup>r-vin. A species of *Convolvulus*. [B, 116.]

**ARBOR VITÆ** (Lat.), n. f. Vi(we)'te(ta<sup>3</sup>-e<sup>2</sup>). Fr., *arbre de vie*. Ger., *Lebensbaum*. It., *albero di (o della) vita*. Sp., *árbol de la vida*. Tree of life. 1. In botany, a name given to various trees supposed to have the power of prolonging life, like the *Juniperus sabina*, and especially the *Thuja occidentalis*, and, in New Zealand, to the *Libocedrus doniana*. [B, 19, 78.] 2. In anatomy, an arborescent structure found in various parts of the body; especially the a. v. cerebelli (q. v.). [I.]—A. v. cerebelli. Fr., *arbre de vie du cervelet*. Ger., *Markbaum des kleinen Hirns*. An arborescent structure

THE ARBOR VITÆ CEREBELLI. (FROM RANNEY, AFTER HIRSCHFELD.)

1, corpus dentatum; 2, tuber annulare; 3, section of the middle peduncle; 4, 4, 4, 4, laminae forming the arbor vitæ; 5, 5, olivary body of the medulla oblongata; 6, anterior pyramid of the medulla oblongata; 7, upper extremity of the spinal cord.

seen upon vertical section of the cerebellum, due to the peculiar arrangement of the white and gray laminae. [I, 15.]—A. v. *uterina*. Fr., *arbre de vie de l'utérus*. Sp., *árbol de la vida uterino*. A fanciful term applied to the ridges of the canal of the cervix uteri—an anterior and a posterior median longitudinal ridge, from each of which a number of branching ridges extend obliquely upward. [A, 22.]—**Folia arboris** v. See *Ramuli arboris* v.—**Lignum arboris** v. The wood of *Thuja occidentalis*. [B, 180.]—**Ramuli arboris** v. The leafy branches of *Thuja occidentalis*, formerly official. [B, 180.]

**ARBOS** (Lat.), n. f. A<sup>3</sup>r-bo<sup>2</sup>s. See ARBOR.

**ARBOUFLE D'ASTRACAN** (Fr.), n. A<sup>3</sup>r-bu<sup>2</sup>l da<sup>3</sup>s-tra<sup>3</sup>-ka<sup>3</sup>n<sup>2</sup>. The *Cucurbita clypeata* (melopepo). [B, 121, 173.]

**ARBOUS**, n. A Languedoc name for the *Arbutus unedo*. [B, 121.]

**ARBOUSE** (Fr.), n. A<sup>3</sup>r-buz. 1. The fruit of *Arbutus unedo*. See ARBUTUM. 2. See ARBOUFLE D'ASTRACAN. [B, 38.]

**ARBOUSIER** (Fr.), n. A<sup>3</sup>r-bu<sup>2</sup>-zi<sup>2</sup>-a. The *Arbutus*; especially the *Arbutus unedo*, official under this title in the French Codex, which directs the root, fruit, and leaves to be employed. [B, 93, 113.]—A. *à panicules*, A. *arbre de corail*. The *Arbutus andrachne*. [B, 105.]—A. *commun*. The *Arctostaphylos uva ursi*. [B, 38.]—A. *des alpes*. The *Arctostaphylos alpina*. [B, 38.]—A. *des Pyrénées*. The *Arbutus unedo*. [B, 105.]—A. *raisin d'ours*. The *Arctostaphylos uva ursi*. [B, 38.]

**ARBOUSSE, ARBOUSTE** (Fr.), n's. A<sup>3</sup>r-bus, -bust. See ARBOUSE.—A. d'Astrakhan. See ARBOUFLE D'ASTRACAN.

**ARBRE** (Fr.), n. A<sup>3</sup>rbr. A tree. [B.]—A. *à baume*. Any tree with a balsamic juice. [B, 38.]—A. *à beurre*. A name given to several sapotaceous trees, especially the *Bassia butyracea*. [B, 121, 173.]—A. *à bourre*. The *Areca crinita*. [B, 38.]—A. *à brai*. A Manilla tree the resin of which is used in ship-building. [B, 38.]—A. *à café*. The *Gymnocladus dioica*. [B, 121.]—A. *à catebasses*. The *Crescentia cujele*. [B, 121.]—A. *à cannelle*. The *Laurus quixos*. [B, 121, 173.]—A. *à chandeliers*. See A. *à suif*.—A. *à chapelet* (ou *chapelets*). 1. The *Melia azedarach*. 2. The *Abrus precatorius*. [B, 173.]—A. *à chou*. The cabbage-tree (*Andira inermis*). [B, 121.]—A. *à cire*. A name given to several trees from which a vegetable wax is obtained; especially to the *Myrica cerifera* (and other species of *Myrica*), *Ceroxylon andicola*, *Rhus succedanea* (and other species of *Rhus*), *Ligustrum glabrum*, and *Hibiscus syriacus*. [B, 121.]—A. *à cordes*. A species of fig-tree growing in the Isle of Bourbon, where ropes are made from its bark. [B, 38.]—A. *à conis*. A name given to several species of *Crescentia*, especially *Crescentia cujele*. [B, 121, 173.]—A. *à dentelle*. The *Lagetta linearis*. [B, 93.]—A. *à enivrer*. A name given to several trees which are used for poisoning or stupefying fish so that they can be more readily taken; especially applied to species of *Piscidia*, *Galega* (*G. sericea*), and *Phyllanthus*, and to the *Anamirta coccinula*. [B, 121, 173.]—A. *à éponges*. A species of *Acacia*. [B, 38.]—A. *à éprouves*. See A. *ordéal*.—A. *à fraises*. See ARBUTUS *unedo*.—A. *à franges*. The *Chionanthus virginica*. [B, 121.]—A. *à galle de l'Inde*. The *Acacia bambolala*. [B, 121.]—A. *à grives*. A name given to the *Sorbus aucuparia*, *Crataegus azarolus*, and *Pyrus aria*. [B, 38, 121.]—A. *à huile*. See A. *à l'huile*.—A. *à la cire*. See A. *à cire*.—A. *à la fièvre*. The *Vismia guianensis* and *Vismia cayennensis*. [B, 121.]—A. *à la flèche*. The *Aloe dichotoma*. [B, 121.]—A. *à la foire*. See A. *à la fièvre*.—A. *à la gale*. The *Rhus toxicodendron*. [B, 173.]—A. *à la glu*. The *Ilex aquifolium*. 2. The *Hippomane biglandulosa*. [B, 121.]—A. *à la gomme*. A name given to the *Metrosideros costata*, the *Eucalyptus resinifera*, the *Acacia*, and other trees furnishing gum. [B, 121, 173.]—A. *à l'ail*. A name applied to several trees distinguished by their garlicky odor, like the *Peltiveria alliacea*, and species of *Cassia*, *Seguiera*, and *Cerdana*. [B, 121.]—A. *à lait*. 1. The *Piratinera utilis*. 2. In Demerara, the *Tabernaemontana utilis*. [B, 121, 173.]—A. *à lait de Demerara*. See A. *à lait* (2d def.).—A. *à la laque du Malabar*. The *Butea frondosa*. [B, 121.]—A. *à la main*. The *Cheiranthodendron platanoides*. [B, 121.]—A. *à la mûre*. The *Uvaria longifolia*. [B, 121.]—A. *à la nuit*. The *Premna corymbosa* (*integrifolia*). [B, 173.]—A. *à lance*. The *Lansium domesticum*. [B, 93.]—A. *à la pistache*. The *Staphylea trifoliata*. [B, 121.]—A. *à la puce*. See A. *à la gale*.—A. *à laque du Malabar*. See A. *à la laque du Malabar*.—A. *à la vache*. Syn.: *lait de vache*. The *Piratinera utilis*. [B, 173.]—A. *à l'encens*. See A. d'encens.—A. *à l'huile*. A name applied to *Aleurites cordata*, *Terminalia catappa*, and to species of *Elaeococca* and *Dipterocarpus*. [B, 121, 173.]—A. *à l'oseille*. The *Oxydendron arboreum*. [B, 173.]—A. *à Marie*. The balsam-of-Tolu tree (*Myroxylon toluifera*). [B, 121.]—A.

*à pain*. The bread-fruit tree; *Artocarpus incisa*. [B, 121.]—A. *à pain des Cafres*. The *Zamia caffra*. [B, 173.]—A. *à papier*. The *Broussonetia papyrifera*. [B, 121.]—A. *à pauvre homme*. The *Ulmus campestris*. [B, 121.]—A. *à perruque* (ou *à perruques*). The *Rhus cotinus*. [B, 121.]—A. *à pipa*. A species of *Rhus*. [B, 121.]—A. *à pois Cafre*. The *Erythrina corallodendron*. [B, 121.]—A. *à poivre*. The *Schinus molle* and *Vitex agnus castus*, also a species of *Xylopia*. [B, 121.]—A. *à salade*. The *Olar*. [B, 121.]—A. *à sang*. The *Vismia cayennensis*. [B, 121.]—A. *à savon*. A name given to species of *Sapindus* and *Quillaja*. [B, 121.]—A. *à savonnettes*. The *Sapindus saponaria*. [B, 121.]—A. *à sel*. The *Areca madagascariensis*. [B, 121.]—A. *à séringue* (ou *à séringues*). The seringa-tree or caoutchouc-tree. [B, 121.] See SIPHONIA.—A. *à sole*. See A. *de soie*.—A. *à suif*. 1. The *Stillingia sebifera*. 2. The *Myristica kombo*. 3. The *Pentadesma butyraceum*. [B, 121, 173.]—A. *à tan*. The *Weinmannia tinctoria*. [B, 121.]—A. *à toucas*. A Brazilian tree with an oily fruit. The stems are used for masts. [B, 121.]—A. *au castor*. The *Magnolia glauca*. [B, 106.]—A. *au chou*. The cabbage-palm (*Oreodoxa oleacea*). [B, 121.]—A. *au corail*. 1. The *Erythrina corallodendron* of the West Indies. 2. The *Adenanthra pavonina*. [A, 385.]—A. *au kermès*. See A. *au vermillon*.—A. *au lis*. The tulip-tree (*Tulipa*) and the *Magnolia*. [B, 121.]—A. *au mastic*. The *Amirys elemifera*. [B, 173.]—A. *au poivre*. See A. *à poivre*.—A. *au raisin*. The *Staphylea* and *Coccoloba*. [B, 121.]—A. *au sagou*. The sagoutree (*Sagrus Rumphii*), also other species of *Sagrus* and the *Saguerus Rumphii*. [B, 121, 173.]—A. *au vermillon*. The *Quercus coccifera*. [B, 121.]—A. *au vernis*. A name applied to several trees from which varnish is obtained, especially the *Aleurites cordata*,

*Terminalia catappa*, and *Rhus vernic.* [B, 121.]—*A. aux anémones.* The *Calycanthus*. [B, 173.]—*A. aux écus.* See *A. aux quarante écus.*—*A. aux fraises.* The *Arbutus unedo*. [B, 173.]—*A. aux grives.* See *A. à grives.*—*A. aux lis.* See *A. au lis.*—*A. aux pois.* The *Caragana arborescens*. [B, 121.]—*A. aux quarante écus.* The *Ginkgo biloba*. [B, 121.]—*A. aux quatre épices.* The *Ravensara aromatica*. [B, 121, 173.]—*A. aux savonnets.* See *A. à savonnets.*—*A. aux savons.* See *A. à savon.*—*A. aux serpens.* The *Aristolochia* and *Ophioxylon*. [B, 121.]—*A. aux tulipes.* See *A. au lis.*—*A. à velours.* The *Tournefortia argentea*. [B, 121.]—*A. à vernis.* See *A. au vernis.*—*A. à vessie.* The *Colutea arborescens*. [B, 121.]—*A. aveuglant.* The *Excæcaria agallocha*. [B, 173.]—*A. banian.* The banyan-tree, *Ficus indica* (seu *bangalensis*). [B, 121.]—*A. baume.* See *A. à baume.*—*A. d'amour.* The *Cercis siliquastrum*. [B, 121.]—*A. d'Angolan.* The *Alangium hexapetalum*. [B, 121.]—*A. d'argent.* The *Protea argentea* and *Elæagnus angustifolia*. [B, 121, 173.]—*A. de Caroni* (ou *Carony*). The *Galipea officinalis*. [B, 38.]—*A. de castor.* See *A. au castor.*—*A. de ciel.* See *A. du ciel.*—*A. de corail.* 1. The *Erythrina corallodendron*. 2. The *Arbutus andrachne*. [B, 121.]—*A. de Cypre.* 1. The *Pinus halepensis*. 2. The *Taxodium distichum*. 3. The *Cordia gerascanthus*. [B, 121.]—*A. de Cythère.* The *Spondias dulcis*. [B, 121.]—*A. de Diane.* See *ARBOR DIANE.*—*A. de Dieu.* The *Ficus religiosa*. [B, 121.] Cf. *ARBOR DIABOLI.*—*A. de dragon.* The *Dracæna draco*. [B, 38.]—*A. de fer.* 1. The *Mesua ferrea*. 2. In the Mauritius, the *Stadmannia ferrea*. [B, 121.] Cf. *ARBOR FERREA.*—*A. de Gordon.* See *A. du ciel.*—*A. de Juda* (ou *Judas*, ou *Judée*). 1. The Judas-tree (*Cercis siliquastrum*). 2. In the Antilles, the *Kleinovia hospita*. [B, 121.]—*A. de Jupiter.* See *ARBOR JOVIS.*—*A. de la folie.* The *Iceia carana*. [B, 173.]—*A. de lait.* See *A. à lait.*—*A. de mai.* The *Hypericum perforatum*; also a species of *Panax* found in the Antilles. [B, 38, 121.]—*A. de Mars.* See *ARBOR MARTIS.*—*A. de Matachan.* The *Melanorrhæa*. [B, 121.]—*A. de mille ans.* The baobab (*Adansonia digitata*). [B, 38.]—*A. de Moïse.* The *Mespilus pyracantha*. [B, 121.]—*A. de mort.* The *Hippomane mancinella*. [B, 121.]—*A. d'encens.* A name applied to a number of trees, including species of *Myrris*, *Bursera*, *Iceia* (especially *I. heptaphylla*), *Protium*, and *Terminalia*. [B, 121, 173.]—*A. de neige.* 1. The *Chionanthus virginica*. 2. The *Viburnum opulus*, var. *roseum*. [B, 38.]—*A. de Paradis.* 1. The *Elæagnus angustifolia*. 2. The *Thuja occidentalis*. [B, 173.]—*A. d'épave.* See *A. ordéal.*—*A. de Purkinje.* See *Purkinje's figure.*—*A. de Sainte-Lucie.* The *Cerasus mahaleb*. **ARBRISSEAU** (Fr.), n.  $A^3r$ -bris-o. A shrub; the same as arbutum (q. v.). [B, 1.]

**ARBROATH**, n.  $A^3r$ -broth. Also written *Aberbrothwick*. A place in Scotland, where there is a ferruginous spring. [A, 385.]

**ARBUSCLE**, n.  $A^3r$ -bu's-s-l. See **ARBUSCULA** (1st def.).

**ARBUSCULA** (Lat.), n. f.  $A^3r$ -bu's(bu's)'ku<sup>2</sup>(ku)-la<sup>2</sup>. Dim. of *arbor*. Fr., *arbrisseau*, *arbuscule*. 1. A shrub or small tree; larger than an arbutum and smaller than a tree, which it resembles in the possession of axillary buds. 2. See **ANABLASTEMA glomerulosum**. [B, 1, 198.]—*A. coralle.* *A. coralloides.* The *Erythrina corallodendron*. [B, 59.]—*A. gummifera brasiliensis.* The *Cadopia* or *Hypericum latifolium*. [B, 59.]

**ARBUSCULAR**, adj.  $A^3r$ -bu's'ku<sup>2</sup>-la<sup>2</sup>-r. Fr., *arbusculaire*. Of, pertaining to, or having the figure of an arbuscula. [B, 116.]

**ARBUSTE** (Fr.), n.  $A^3r$ -bu'st. See **ARBUSTUM**.

**ARBUSTIVA** (Lat.), n., n. pl. of adj., *arbutivus* (*vegetabilia* understood). An order of plants in one of the classifications of Linnaeus comprising *Philadelphus*, *Eugenia*, *Myrtus*, *Caryophyllus*, and *Psidium*. [B, 170.]

**ARBUSTIVE**, adj.  $A^3r$ -bu's'ti<sup>2</sup>v. See **ARBUSTIVUS** (1st def.).

**ARBUSTIVUS** (Lat.), adj.  $A^3r$ -bu's(bu's)-ti(tē)'vu's(wu's).

From *arbor*. Fr., *arbutif*. 1. Covered with trees. 2. Growing upon a tree. [Columella (B, 134).] 3. Of or pertaining to a shrub (arbutum). [B.]

**ARBUSTUM** (Lat.), n. n.  $A^3r$ -bu's(bu's)'tu'm(tu'm). Fr., *arbuté*. 1. In classical Latin, a shrubby or vineyard; also a tree. 2. In botany, a shrub. Cf. **ARBUSCULA**. [B, 1, 134.]

**ARBUSTUS** (Lat.), adj.  $A^3r$ -bu's(bu's)'tu's(tu's). See **ARBUSTIVUS** (1st def.).

**ARBUTE**, n.  $A^3r$ -bu't. See **ARBUTUS unedo**.

**ARBUTEÆ** (Lat.), n. f. pl.  $A^3r$ -bu't(bu't)'te<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). Fr., *arbutées*. Ger., *Arbuten*. A tribe of ericaceous evergreen shrubs belonging to the suborder *Ericineæ*, comprising the genera *Arbutus* and *Arctostaphylos*, characterized by their fleshy fruit and caducous corolla. [B, 104.]

**ARBUTEUS** (Lat.), adj.  $A^3r$ -bu't(bu't)'te<sup>2</sup>-u's(u's). *Arbutean*; of or pertaining to the *Arbutus*. [B, 134.]

**ARBUTIN**, n.  $A^3r$ -bu't-ti'n. For deriv., see **ARBUTUS**. Fr., *arbutine*. Ger., *Arbutin*. It., Sp., *arbutina*. A glucoside extracted from the leaves of *Arctostaphylos* (*Arbutus*) *uva ursi*. It forms colorless acicular, agglomerated crystals of a bitter taste, soluble in water, alcohol, and ether. It was formerly thought to have the formula  $C_{25}H_{34}O_{14}$ , but pure a. has been shown by Schiff to have the constitution  $C_{15}H_{16}O_7 = O.CH - CH.OH - CH.OH - CH.OH - CH.OH - CH_2.OH - CH_2.OH$ . [B, 3.] By heating with sulphuric acid it is converted into glucose and hydroquinone. The same change takes place in the body when a. is ingested, and the physiological action of the latter upon the urinary organs has been ascribed to the hydroquinone which is excreted in the urine. [Menche, "Ctbl. f. klin. Med.," 1883; "Ctbl. f. d. med. Wssnsch.," Sept. 29, 1883, p. 700 (B).]

**ARBUTOSE**, n.  $A^3r$ -bu't-tos. A crystalline substance obtained in the extraction of arbutin from *Arctostaphylos uva ursi*, consisting of arbutin 55 per cent., glucose 35 per cent., and water 10 per cent. ["Pharm. Jour. and Trans.," Feb. 14, 1885 (B); "Proc. of the Am. Pharm. Assoc.," xxxiii, p. 343 (B).]

**ARBUTUM** (Lat.), n. n.  $A^3r$ -bu't(bu't)'tu'm(tu'm). Fr., *arbouise* (1st def.), *arbusier* (2d def.). 1. The fruit of *Arbutus unedo*. 2. The *Arbutus unedo* itself. [B, 134.]

**ARBUTUS** (Lat.), n. f.  $A^3r$ -bu't(bu't)'tu's(tu's). Allied to *arbor*. Fr., *arbutier*. Ger., *Erdbeerbaum*, *Sandbeere*. 1. Of classical writers, the arbuté-tree or *A. unedo*. 2. Of Tournefort, a genus of evergreen ericaceous shrubs belonging to the tribe *Ericineæ*, subtribe *Arbutæ*. Linnaeus subsequently included in this genus the *Arctostaphylos* of Adanson, which has been again separated from *A.* by subsequent botanists. The *A.* of Scopoli is the *Arctostaphylos*. The generic characters of the genus *A.* are the same as those of *Arctostaphylos* (q. v.) except that the fruit is a globular berry covered with granular elevations and contains 5 many-seeded cells. [B, 19, 180.]—*A. aculeata*. A shrub 3 or 4 feet high growing at Cape Horn, bearing edible red berries of an astringent taste. [B.]—*A. alpina* [Linnaeus]. See **ARCTOSTAPHYLOS alpina**.—*A. andrachne* [Linnaeus]. Fr., *arbre de corail*, *arbutier à panicules*. Syn.: *Andrachne frutescens* [Ehrenberg]. An arborescent species indigenous to Greece which has properties similar to those of *A. unedo*. The unripe astringent fruit has been used as a tonic and febrifuge. [B, 38, 46, 197.]—*A. comarus Theophrasti* [Bauhin]. The *A. unedo*. [B, 211.]—*A. furens*. A small shrub growing in Chili, the fruit of which is said to cause delirium when eaten.—*A. hybrida*. The mule *A.* A species said to be a cross between *A. unedo* and *A. andrachne*. [B.]—*A. integrifolia* [Salisbury, Lamarek]. A variety of *A. andrachne*. [B, 46, 173.]—*A. laurifolia* [Lindley]. See *A. Menziesii*.—*A. Menziesii* [Pursh]. The madroña; an evergreen tree with red bark and bright-red berries, grow-

THE ARBUTUS UNEDO. [A, 327.]

ing upon the Pacific coast of North America. The bark is astringent, and is used in the treatment of diarrhoea and dysentery. ["Proc. of the Am. Pharm. Assoc.," xxvii (B).]—*A. mucronata* [Linnaeus fil.]. See **PERNETTYA mucronata**.—*A. myrtilloides* [Humboldt]. See **VACCINIUM stamineum**.—*A. petiolaris* [Humboldt]. A Mexican species. A species of *Phalœna* living upon it furnishes a sort of silk. [B, 173.]—*A. procera* [Douglas]. See

*A. Menziesii*.—*A. texana* [Buckley]. A Texan and Mexican variety of *A. Menziesii*. [B, 215].—*A. tomentosa* [Pursh]. See ARCTOSTAPHYLOS *tomentosa*.—*A. unedo* [Linnaeus]. Gr. *κόμαρος* [Dioscorides]; Lat. *a.* [Vergil]. Fr. *arbusier* [Fr. Cod.], *arbusier des Pyrénées*, *olonier*, *fraiser en arbre*. Ger. *Erdbeerbaum*, *gemeiner Erdbeerbaum*. It. *albatro*, *corbezzolo*. Sp. *madroño*, *madroño*. The strawberry-tree; arbutus-tree. A shrub, sometimes attaining the size of a large tree, growing throughout Continental Europe and in Ireland, distinguished by its scarlet berries, which resemble those of the strawberry in size and appearance. The berries, called *arbutum*, *unedo*, *comarus*, and *mamacyllon*, have a mawkish sweet taste, and, although eaten in some parts of Europe, are said to cause headache, dyspeptic troubles, and, in overdose, narcotic symptoms. In Corsica, a wine having mildly narcotic properties is prepared from them. They have been employed as a diuretic and laxative and in the preparation of cooling drinks. The bark and the stiff leathery leaves are astringent, and are employed in diarrhoea and dysentery. The fruit, bark, and leaves are official in the Fr. Codex. [B, 19, 59, 180].—*A. uva ursi* [Linnaeus]. See ARCTOSTAPHYLOS *uva ursi*.—*A. vulgaris* [Burr.]. The *A. unedo*. [B, 211].—*Fructus arbuti*. The fruit of *A. unedo*. [B, 95].—*Oriental a.* The *A. andrachne*. [B, 138].—*Trailing a.* 1. The *Epigaea repens*. [B, 34]. 2. The *Arctostaphylos uva ursi*. [B, 59].

**ARC**, n. A<sup>3</sup>r<sup>k</sup>. See ARCH.—**Animal a.** Fr. *a. animal*. It. *arco animale*. A term applied to the parts of an animal, in certain experiments, placed between the poles of a battery. [L, 41].—**A. anastomotique** (Fr.). **ARCA DI-TEMPORO-MAXILLAIRE** (Fr.), n. A<sup>3</sup>r-ka<sup>3</sup>-de-ta<sup>3</sup>m-po-ro-ma<sup>3</sup>x-i<sup>3</sup>la<sup>3</sup>r. See *Temporal MUSCLE*.

**ARCANÉ** (Fr.), n. A<sup>3</sup>r-ka<sup>3</sup>n. See ARCANUM.—**A. corallin**. See *ARCANUM corallinum*.—**A. cosmétique**. See *ARCANUM cosmeticum*.—**A. double**. See *ARCANUM duplicatum*.—**A. fébrifuge de Rivière**. A mixture of 2 parts of calcium phosphate and 1 part of precipitated antimony oxide. [L, 49].

**ARCANIA** (Lat.), n. f. A<sup>3</sup>r-ka(ka<sup>3</sup>)/ni<sup>2</sup>a<sup>3</sup>. Of Dumortier, an order of plants belonging to the class *Virescinia* and including the

families *Equisetaceæ*, *Lentibulaceæ*, *Rhizospermææ*, *Filiceæ*, *Ophioglossææ*, and *Lycopodiaceæ*. [B, 170.]

**ARCANNE**, n. A<sup>3</sup>r-ka<sup>3</sup>n<sup>2</sup>. Red chalk or ruddle. [L, 84.]

**ARCANSON** (Fr.), n. A<sup>3</sup>r-ka<sup>3</sup>n<sup>2</sup>-so<sup>3</sup>n<sup>2</sup>. Colophony; resin. [B.]

**ARCANUM** (Lat.), n. A<sup>3</sup>r-ka(ka<sup>3</sup>)/nu<sup>3</sup>m(nu<sup>3</sup>m). Fr., *arcané*. Ger., *Geheimmittel*. Sp., *arcano*. 1. Any secret preparation. 2. In alchemy, a thing secret, incorporeal, and immortal, which can only be known to man by experience; the virtue or essence of anything, which is more powerful than the thing itself. [Ruland (L, 130)].—**A. album**. See *PULVIS viennensis virgineus*.—**A. Archedeti**. See *LINIMENTUM CALCARÆ sulphurata*.—**A. astrale**. See under *A. specificum*.—**A. bechicum**.—**A. bechicum Willisii**. See *Syrupus KALI sulphurati*.—**A. corallinum**.—**A. corallinum Paracelsi**. An alchemical name for the red oxide of mercury on which alcohol has been burned several times to render it milder. [B, 7, 86].—**A. cosmétique**. Fr., *arcané cosmétique*. A mixture of 1 part of powdered talc and 2 parts of camphorated oil. [L, 85].—**A. duplex**.—**A. duplicatum**. Fr., *arcané double*. Sp., *arcano duplicado*. Normal potassium sulphate; so called because it was regarded as being made up of the alkaline base existing in tartar (arcaneum tartari) combined with the acid principle of sulphuric acid. [B].—**A. duplicatum catholicum**. An amulet composed of colchicum and plantain-roots. [L, 120].—**A. duplicatum depuratum**. Potassium sulphate. [B].—**A. duplicatum Mynsichti**. See *A. duplicatum*.—**A. epilepticum**. A name given by Stisser to the ammonio-sulphate of copper. [B].—**A. holisticum**.—**A. holsteinense**. See *A. duplicatum*.—**A. joviale**.—**A. Jovis**. A preparation made by digesting an amalgam of tin and mercury in spirit of nitre (nitric acid). [L, 104].—**A. Ludemannii**. See *ZINC oxide*.—**A. materiale**. A principle extracted from a substance and representing its essential portion ("extractum specificum materiae corporis viciniis"). When formed from a composite substance, i. e., one composed of a moist and a dry principle (such as air and fire), the a. m. likewise consisted of a moist and a dry component ("aqua stillatitia et coagulum specificum"). [B, 50].—**A. specificum**. An extract representing the inner principle of a substance, especially a principle peculiar to that substance and unmixed with other substances. It was regarded as less ethereal than the quintessence, and was said to have two components—one formative ("formalius"), called the *a. astrale*, and the other of a more material nature. [B, 50].—**A. tartari**.—**A. tartari dulcis**. Old terms for normal tartrate of potassium. [B, 2].—**A. Theophrasti**. "The quintessence of anything most high or the virtue of anything refined by a thousand exaltations." [L, 104].—**A. vitæ**. See *ELIXIR vitæ*.

**ARCATE**, adj. A<sup>3</sup>r<sup>k</sup>/kat. See ARCUATE.

**ARCATURA** (Lat.), n. f. A<sup>3</sup>r-ka<sup>3</sup>-tu<sup>2</sup>(tu<sup>2</sup>/ra<sup>3</sup>). From *arcus*, a bow. Fr., *argure*. Ger., *Vorbiegkeit*. It., *arcatura*. The condition in which the forelegs of horses are unduly curved forward. [L, 44.]

**ARCÄUSBALSAM** (Ger.), n. A<sup>3</sup>r-tsa/u<sup>3</sup>s-ba<sup>3</sup>l-za<sup>3</sup>m. See *BALSAMUM Arcei*.

**ARC-BOIS** (Fr.), n. A<sup>3</sup>r-k-bwa<sup>3</sup>. See *CYTISUS laburnum*.

**ARCE** (It.), n. A<sup>3</sup>r<sup>k</sup>/cha. A cold chalybeate sulphur spring in the Campagna. [L, 124.]

**ARCEAU** (Fr.), n. A<sup>3</sup>r-so. 1. See ARCLUS. 2. An arch.—**A. sternal**. The lower or ventral portion of the rings of which the *Arthropoda* are formed. [L, 158].—**A. supérieur**.—**A. tergal**. The superior or dorsal portion of the rings of which the *Arthropoda* are formed. [L, 158].—**A. ventral**. See *A. sternal*.

**ARCEION** (Lat.), n. n. A<sup>3</sup>r-si<sup>2</sup>(ka<sup>3</sup>)/i<sup>2</sup>-o<sup>3</sup>n. Gr., ἀρκεϊον. See ARCTIUM.

**ARCELL** (Fr.), n. A<sup>3</sup>r-sa-le. The *Venus virginea*. [L, 124.]

**ARCELL**, n. A<sup>3</sup>r-se<sup>2</sup>l. See *PARMELLA caperata*.—**A. corker**. See *PARMELLA omphalodes*.

**ARCELLI** (Lat.), n. n. pl. A<sup>3</sup>r-se<sup>2</sup>l(ke<sup>2</sup>)/li(le). Flask-shaped infusoria found by W. Lambl in the stools of children affected with enteritis. [B, 70.]

**ARCELLINA** (Lat.), n. n. pl. A<sup>3</sup>r-se<sup>2</sup>l(ke<sup>2</sup>)/li(le)/na<sup>3</sup>. A sub-order of the *Amæba*, comprising those in which the body is covered with a carapace. [L, 147.]

**ARCENTHOS**, **ARCENTIS** (Lat.), n's f. A<sup>3</sup>r-se<sup>2</sup>n(ke<sup>2</sup>n)/tho<sup>2</sup>s, -ti<sup>2</sup>s. See ARCEUTHIS.

**ARCERIA** (It.), n. A<sup>3</sup>r-cha<sup>3</sup>/re-a<sup>3</sup>. A locality in Italy where there are cold saline sulphur springs. [L, 124.]

**ARCESTHIDA** (Lat.), n. n. pl. A<sup>3</sup>r-se<sup>2</sup>s(ke<sup>2</sup>s)/thi<sup>2</sup>d-a<sup>3</sup>. Literally juniper berries, but also applied to all fruits of similar conformation and arrangement. [B.]

**ARCEUTHIS**, **ARCEUTHOS**, **ARCEUTHIUS** (Lat.), n's f. A<sup>3</sup>r-su<sup>2</sup>(ku<sup>2</sup>)/thi<sup>2</sup>s, -tho<sup>2</sup>s, -thu<sup>2</sup>s(thu<sup>2</sup>s). Gen., *arceuthidos* (-dis), -ceu<sup>2</sup>/thi. Gr., ἀρκευθίς, ἀρκευθος. The juniper-tree or its fruit. [L, 50, 104.]

**ARCEUTHOBIUM** (Lat.), n. n. A<sup>3</sup>r-su<sup>2</sup>(ku<sup>2</sup>)-tho<sup>2</sup>/bi<sup>2</sup>-u<sup>3</sup>m(u<sup>3</sup>m). From *ἀρκευθίς*, the juniper, and *βιον*, to live, because one species is parasitic on the juniper. A genus of loranthaceous plants of the tribe *Visceæ*, separated by Bieber from the genus *Viscum*. [B, 42, 170].—**A. camphylopodium** [Engelmann]. A species growing on black spruce-trees, found in the United States from New York to the Pacific coast and also in Mexico. ["Proc. of the Am. Pharm. Assoc.," xxvi, p. 247 (B).]

**ARCH**, n. A<sup>3</sup>r-eh. Lat., *arcus*. Fr., *arc*, *arcade*, *arceau*. Ger., *Bogen*. It., *arco*, *arcata*. Sp., *arco*, *arcada*. 1. A segment of a circle. 2. In anatomy, the curved portion of any tissue or organ, or a curve made by a nerve or vessel; applied also to the dorsal and ventral portions of the segments of articulate animals. [L.]—**Alveolar a.** Lat., *arcus alveolaris*. Fr., *arcade alvéolaire*. Ger.,

*Alveolarbogen*. It., *arcata alveolare*. Sp., *arcada alveolare*. The alveolar processes of the maxillæ. [L, 142.]—**Anastomotic a.** Lat., *arcus anastomotus*. Fr., *arcade anastomotique*. Ger., *anastomotischer Bogen*. It., *arcata anastomotica*. Sp., *arcada anastomótica*. A curved vessel uniting two veins or arteries. [L, 44.]—**Anterior aortic a.** A branch of the truncus arteriosus of certain *Amphibia*, distributed to the tongue and the brain. [L, 186.]—**Anterior a. of the arm.** A plexus in front of and above the elbow, formed by a branch of the anastomotic artery of the arm and branches of the ulnar and radial recurrent arteries distributed to the joint and its surroundings. [L, 179.]—**Anterior a. of the atlas.** Lat., *arcus anterior atlantis*. Fr., *arc antérieur de l'atlas*. That portion of the atlas which is anterior to its articular surfaces. [L, 124.]—**Anterior a's of the palate.** Lat., *arcus palato-glossi*. The anterior pillars of the fauces. [L, 115.]—**Anterior carpal a.** An arterial network on the anterior aspect of the wrist, formed of twigs of the carpal branches of the radial and ulnar arteries. [L, 142.]—**Anterior hyoid a.** A general term for the tympano-hyal, stylo-hyal, ephyal, and cerato-hyal a's. [L, 153.]—**Aortic a.** See *A. of the aorta*.—**Aortic a's.** Fr., *arcus aortiques*. Sp., *arcos aorticos*. A term applied to the pairs of arterial vessels situated in the branchial arches of the vertebrate embryo and the adult *Branchiata*, which connect the cardiac and dorsal aortæ. In the human embryo they are five in number; the first and second pairs disappear early in foetal life; from the third pair the carotid arteries are formed, and from the fourth the arch of the aorta and the subclavian arteries; the fifth atrophies on the right side, but on the left is developed into the pulmonary artery, the ductus arteriosus, and the aorta. In the perennibranchiate vertebrates, the a's may be nine in number, of which, however, but five persist throughout life, and from them spring the branches to the branchial tufts. [L, 13, 14, 27.]—**A's of Corti.** See *Rons of Corti*.—**A. of Fallopius.** See *Poupart's LIGAMENT*.—**A. of the aorta.** Lat., *arcus aortæ*. Fr., *arc (ou arcade, ou crosse) de l'aorte*. Ger., *Aortenbogen, bogenförmige Aorte*. It., *arco dell'aorte*. The curved portion of the aorta, extending from the upper border of the left ventricle to the lower border of the body of the fourth dorsal vertebra. The ascending portion is about two inches in length and ascends toward the right to about the level of the upper border of the second costal cartilage; close to the heart it presents three small dilatations termed the "sinuses of Valsalva." The transverse portion commences at the upper border of the second costo-sternal articulation on the right side and passes from right to left, and from before backward, to the left side of the second dorsal vertebra. The descending portion extends from the termination of the transverse portion to the lower border of the body of the fourth dorsal vertebra, where it takes the name of the thoracic aorta. From the ascending portion are given off the coronary arteries of the heart, and from the transverse, the innominate, left carotid, and left subclavian arteries. [L, 142, 172.]—**A. of the colon.** Fr., *arc du colon*. See *Transverse COLON*.—**A's of the foot.** A term applied to certain a's made up of the bones of the foot. The inner longitudinal a. is formed of the os calcis, the astragalus, the navicular, the three cuneiforms, and the first, second, and third toes, the astragalus being the key-stone. The outer longitudinal a. is formed by the os calcis, the cuboid, and the fourth and fifth toes. The transverse a., most marked in the line of the tarso-metatarsal articulations, is maintained by the wedge-shape of the bones and by the plantar ligaments. [C, 3.]—**A. of the palate.** Lat., *arcus palati*. The arch formed by the anterior pillars of the fauces. [L, 115.]—**A. of the pubes.** See *Pubic a.*—**A's of the vertebrae.** See *Vertebral a's*.—**A. of the zygma.** See *Zygomatic a.*—**A.-system.** Ger., *Bogensystem*. A term applied by Meynert to the arching bundles of nerve fibres which connect different regions of a cerebral hemisphere. [I, 31.]—**Arterial a's.** See *Aortic a's* and *Arterial gill-a's*.—**Arterial gill-a's.** In the *Branchiata*, those (the lower) of the aortic a's which contain venous blood. [L, 146.]—**Axillary a's.** Lat., *arcus axillares*. Fibres of the latissimus dorsi which occasionally pass over the vessels and nerves in the axilla to its anterior part, where they become lost in the muscular or fibrous tissues. [L, 142.]—**Branchial a's.** Lat., *arcus branchiales*. Fr., *arcus branchiaux*. 1. The postoral visceral a's, especially the third, fourth, and fifth. 2. In fishes, the bony a's which serve to support the gills; they are attached above to the base of the cranium by ligaments and cellular tissue, and below adhere to a chain of median ossicles. The three first are made up of the hyo-branchial, cerato-branchial, and epibranchial bones, the fourth of the cerato-branchial, epibranchial, and pharyngo-branchial bones, and the fifth of the cerato-branchials alone. [L, 27.]—**Cephalic a's.** Fr., *arcus céphaliques*. See *Postoral a's*.—**Corvical a's.** Fr., *arcus cervicaux*. See *Posthyoid and Aortic a's*.—**Cotylo-pubic a.** See *Pubic a.*—**Cotylo-sacral a.** Syn.: *standing a.* The a. formed by the sacrum and the bony structures extending to the coxo-femoral articulations, the sacrum being the keystone. [J, Wood (L, 133).]—**Crural a.** Lat., *arcus cruralis*. Fr., *arc crural*. It., *arcata crurale*. Sp., *arco crural*. See *Poupart's LIGAMENT*.—**Cubital a.** The curved termination of the anterior carpal artery at the knee, in many quadrupeds. [L, 13.]—**Deep crural a.** **Deep femoral a.** Lat., *arcus cruralis profundus*. A fibrous band, arising apparently from the transversalis fascia, which arches across the crural sheath, and is attached to the centre of Poupart's ligament and the pectineal line. [L, 172.]—**Deep palmar a.** Lat., *arcus palmaris profundus*. Fr., *arcade palmaire profonde*. It., *arcata palmare profunda*. The a. in the palm of the hand formed by the union of the termination of the radial artery and the deep branch of the ulnar. It lies upon the interosseous muscles at the bases of the metacarpal bones, with its convexity downward, and gives off the palmar interosseous arteries and three perforating branches to the dorsal interosseous arteries. [L, 172.]—**Dental a.** Lat., *arcus dentalis*. Fr., *arcade dentaire*. 1. The alveolar a. 2. The curved line formed by the teeth. [L, 41.]—**Dorsal a. of the arm.** A plexus formed by branches of the anastomotic artery of the arm and the profunda and radial and ulnar recurrent arteries,

above and below the elbow joint on its dorsal aspect. [L, 179.]—**Dorsal a. of the foot.** Lat., *arcus dorsalis pedis*. Fr., *arcade dorsale du tarse*. An anastomotic a. on the dorsum of the foot, formed by the union of branches from the tarsal and metatarsal branches of the dorsal artery of the foot. [L, 31.]—**Dorsal carpal a.** See *Posterior carpal a.*—**Dorsal vertebral a.** See *Neural a.*—**Epencephalic a.** The bones covering the epencephalon, which in man unite to form the occipital bone, regarded as the neural a. of the occipital vertebra. [L, 27.]—**Facial a.** Fr., *arc facial*. The first postoral arch. [L, 158.]—**Femoral a.** Lat., *arcus femoralis*. Fr., *arcade fémorale*. It., *arcata femorale*. See *Poupart's LIGAMENT*.—**Frontohæmal a.** See *Tympano-maxillary a.*—**Gill-a's.** See *Branchial a's*.—**Gluteal a.** An opening in the gluteal aponeurosis for the passage of the gluteal vessels and nerves. [L, 45.]—**Hæmal a.** The pre-axial portion of a vertebra, which surrounds a portion of the vascular system, organs of digestion, etc. It is made up of the centrum, the pleurapophyses, hæmapophyses, hæmal spine, and occasionally parts called parapophyses. [L, 27.]—**Hyoid a.** 1. The second postoral arch, reckoning from above downward. It gives origin to the lesser cornu of the hyoid, the styloid bone, and the stapes. [L, 153.] 2. See *Stylo-hyoid a.*—**Inferior maxillary a.** See *Mandibular a.*—**Inferior vertebral a.** **Infravertebral a.** See *Hæmal a.*—**Inguinal a.** See *Poupart's LIGAMENT*.—**Ischiadic a.** The space included between the posterior borders of the ischia of the horse. [L, 13.]—**Ischio-pubic a.** The a. formed by the ischio-pubic rami and the body of the os pubis. [J, Wood (L, 133).]—**Ischio-sacral a.** Syn.: *sitting a.* An a. formed by the sacrum, the descending rami of the ischia, and the intervening ilia. [J, Wood (L, 133).]—**Jaw a.** See *Mandibular a.*—**Jugal a.** See *Zygomatic a.*—**Laryngeal a.** An embryonic a. formed out of a membranous plate running down from the lower part of the skull, from which are developed the inferior constrictor muscle, the cartilages of the larynx, the upper part of the trachea, and the thyreoid body. [G. W. Callender, "Philosoph. Trans." clxi, p. 119 (L).]—**Lateral inferior a's of the skull.** A term applied to the bones inclosing the nose, mouth, and pharynx. [L, 142.]—**Lateral superior a's of the skull.** A term applied to the bones inclosing the cerebrum, cerebellum, and medulla oblongata. [L, 142.]—**Limb a's.** The pectoral and pelvic a's. [L, 12.]—**Lingual a.** See *Hyoid a.*—**Mandibular a.** 1. The uppermost of the postoral arches. It forms the posterior margin of the mouth in the embryo, and from it are developed the lower jaw, the incus, and the malleus of mammals, and the quadrate bone in reptiles and birds. 2. See *Tympanomaxillary a.* [L, 27.]—**Maxillary a.** See *Mandibular a.* and *Palato-maxillary a.*—**Mesencephalic a.** A bony a. formed by the basisphenoid, alisphenoid, parietal, and mastoid bones, and regarded as the neural a. of the parietal vertebra. [L, 27.]—**Middle aortic a.** An a. formed by branches of the truncus arteriosus of certain *Amphibia*, distributed to the limbs and the abdominal viscera. [L, 186.]—**Nasal a.** An anastomotic vessel connecting the two frontal veins. [L, 172.]—**Naso-hæmal a.** See *Tympano-mandibular a.*—**Neural a.** 1. The post-axial portion of a vertebra, which incloses the medullary canal. It is formed by the neurapophyses and neural spine, which are sometimes separated by the diapophyses. [L, 27.] 2. In the higher *Annelida*, that half of a segment to which a branchia is attached. [L, 143.]—**Neuro-frontal a.** See *Prosencephalic a.*—**Neuro-nasal a.** See *Rhinencephalic a.*—**Neuro-occipital a.** See *Epencephalic a.*—**Neuro-parietal a.** See *Mesencephalic a.*—**Occipital a.** An a. formed by plates of cartilage sent up from the trabecule and the hard palate in some of the *Marsupiorhynchii*, which unite above the brain and furnish the side walls of the cranium. [L, 200.]—**Occipito-hæmal a.** See *Pectoral a.*—**Orbital a.** **Orbitar a.** Lat., *arcus orbitalis*. Fr., *arcade orbitale*. Ger., *Orbital-Bogen*. It., *arcata orbitale*. Sp., *arcada orbitaria*. The upper margin of the orbit. [L, 31.]—**Osteoblastic a's.** Ger., *Osteoblastenbogen*. The complete or incomplete a's formed by the osteoblasts of developing bone, which spring from the bony trabecule already formed and finally become bony and form a part of the Haversian system. [I, 35.]—**Palatine a.** See *A. of the palate*.—**Palato-maxillary a.** A term applied to a more or less complete bony a. made up of the palatine, maxillary, and premaxillary bones, or their analogues, and regarded as the hæmal a. of the nasal vertebra. [L, 27.]—**Palato-pterygoid a.** A term sometimes applied to the palato-pterygoid bone in certain fishes, on account of its arched shape. [L, 12.]—**Palato-quadrate a.** A curved surface in the head of fishes, formed by the quadrate and palatine bones or their cartilaginous representatives and the skeletal parts connecting them. [L, 12.]—**Parieto-hæmal a.** See *Styloid a.*—**Pectoral a.** Syn.: *shoulder girdle*. A term applied to the scapula and clavicles, regarded as the hæmal a. of the occipital vertebra. [L, 27.]—**Pelvic a.** A term applied to the bones of the pelvis, regarded as the hæmal a's of the sacral vertebrae. [L, 12.] See also *Cotylo-sacral a.*, *Cotylo-pubic a.*, *Ischio-sacral a.*, and *Ischio-pubic a.*—**Pharyngeal a's.** The fifth pair of branchial a's. [L, 27.]—**Plantar a.** Lat., *arcus plantaris*. Fr., *arc plantaire*. Ger., *Sohlenbogen*. It., *arcata plantare*. An arterial a. formed by the union of the external plantar artery and a communicating branch of the dorsal artery of the foot. It extends from the base of the metatarsal bone of the little toe to the back part of the first interosseous space, with its convexity forward. It gives off three perforating arteries and branches which supply the three outer toes and half of the second toe. [L, 172.]—**Posterior aortic a.** In certain of the *Amphibia*, an a. formed by the branches of the truncus arteriosus that are distributed to the lungs and to the dorsal integument. [L, 186.]—**Posterior a. of the atlas.** Lat., *arcus posterior atlantis*. Fr., *arc postérieur de l'atlas*. Ger., *hinterer Bogen des Trägers*. That portion of the atlas which lies posterior to its articular surfaces. [L, 124, 172.]—**Posterior a. of the palate.** Lat., *arcus palatinus posterior*. The a. formed by the posterior pillars of the fauces. [L, 115.]—**Posterior carpal a.** Lat., *arcus carpi dorsalis*. An arterial a. made by the union of the posterior carpal branch of the radial artery and a similar one of the ulnar. It is

situated upon the posterior surface of the carpus and gives off the dorsal interosseous arteries to the third and fourth interosseous spaces, also branches which anastomose with the anterior interosseous artery of the forearm. [L. 142.]—**Post-hyoid a'es.** The fourth and fifth of the postoral a'es. [A. 23.]—**Postoral a'es, Postoral visceral a'es.** Fr., *arcs branchiaux*. Ger., *Kiemenbogen*. Sickie-shaped ridges which spring from each side of the anterior aspect of the head of all vertebrate embryos at an early period of their development. In the higher vertebrates they are four or five in number, and serve for the development of the lateral and lower parts of the face, the lower jaw, the hyoid apparatus, the outer ear, and the tympano-Eustachian passages. In the *Branchiata* they may be nine in number, and they develop into the gills. Within each a. is one of the aortic a'es, and between them are the branchial clefts. [L. 27, 146.]—**Post-sternal a'es.** See *Postoral a'es*.—**Preoral a'es.** See *Facial PLATES*.—**Presternal a's.** See *Preoral a'es*.—**Prosencephalic a.** A bony a. formed by the prephenoid, orbitosphenoid, and frontal bones, regarded as the neural a. of the fronto-mandibular vertebra. [L. 27.]—**Pubic a.** Lat., *arcus pubis*. Fr., *arcade pubienne*. Ger., *Schambogen*. It., *arcata publica*. Sp., *arco pubiano*. The a. formed by the ascending rami of the pubes and the lower surface of its body. [L. 44.]—**Radial a.** See *Deep palmar a.*—**Rhinencephalic a.** A bony a. formed by the vomer and the prefrontal and nasal bones, regarded as the neural a. of the nasal vertebra. [L. 27.]—**Scapular a., Scapulo-clavicular a., Scapulo-coracoid a.** See *Pectoral a.*—**Senile a.** See *Arcus senilis*.—**Sitting a.** See *Ischio-sacral a.*—**Standing a.** See *Cotylo-sacral a.*—**Stylo-hyoid a.** A term applied to the a. formed by the stylo-hyal, epiphyal, cerato-hyal, basi-hyal, glosso-hyal, and uro-hyal bones, regarded as the hamal a. of the parietal vertebra. [L. 27.]—**Subaxial a'es.** See *Postoral a'es*.—**Subcarpal a.** The analogue in many quadrupeds of the deep palmar a. of man. [L. 13.]—**Sub-central a. of a vertebra.** See *Hamal a.*—**Sub-ocular a.** 1. In certain of the *Branchiata*, an a. formed by the union of a process springing from the anterior end of the hard palate and one springing from the parachordal plate just beneath the auditory capsule. [L. 200.] 2. See *Zygomatic a.*—**Sub-orbital a.** See *Zygomatic a.*—**Subpubic a.** See *Pubic a.*—**Superciliary a'es.** Lat., *arcus superciliares*. Fr., *arcades supercilii*. Ger., *Augenbrauenbogen*. It., *arcate sopraciliari*. Sp., *arcadas sobreciliales*. See *Superciliary RIDGES*.—**Superficial palmar a.** Lat., *arcus palmaris superficialis*. Fr., *arcade palmaire superficielle*. Ger., *oberflächlicher Hohlhandbogen*. It., *arcata palmaris superficiale*. The continuation of the ulnar artery across the palm of the hand. It lies upon the anterior annular ligament, the muscles of the little finger, the tendons of the flexor muscles, and the divisions of the radial and ulnar nerves, with its convexity downward, and anastomoses with a branch from the radial indicis artery. Its principal branches are four in number, which are distributed to the ulnar side of the little finger and the adjoining sides of the little, ring, middle, and index fingers. [L. 142.]—**Superior vertebral a.** See *Neural a.*—**Supracarpal a.** The anastomosis between the epicondylar artery and branches of the posterior radial arteries in many quadrupeds, analogous to the superficial palmar a. of man. [L. 13.]—**Supraorbital a.** Lat., *arcus supraorbitalis*. See *Orbital a.*—**Supravertebral a.** See *Neural a.*—**Temporal a.** See *Zygomatic a.*—**Tergal a.** See *Dorsal a.*—**Thyreohyal a., Thyreo-hyoid a.** The third of the postoral a'es. From it are developed the body and greater cornua of the hyoid bone. [L. 171.]—**Tongue a.** See *Hyoid a.*—**Trabecular a.** An a. formed by the union of the middle trabeculae of the skull, in which lie the pituitary body and the infundibulum. [L. 202.]—**Tympano-mandibular a.** A bony a. in fishes, formed by the epitympanic, mesotympanic, pretympanic, and hypotympanic bones and the articular, splenial, angular, and opercular bones, regarded as the hamal a. of the frontal vertebra. [L. 27.]—**Ventral a.** In the *Annelida*, the ventral half of a segment. [L. 147.]—**Ventral vertebral a.** See *Hamal a.*—**Vertebral a.** A term used indifferently for a neural or a hamal a. [L.]—**Visceral a'es.** Lat., *arcus viscerales*. Fr., *arcs viscéraux*. Ger., *Visceralbogen*. It., *archi viscerali*. See *Postoral a'es*.—**Zygomatic a.** Lat., *arcus zygomaticus*. Fr., *arcade zygomatique*. Ger., *Jochbogen*. It., *arcata zygomatica*. Sp., *arcula zygomatica*. The bony a. formed by the zygomatic process of the temporal bone and that of the malar bone. [L. 172.]

**ARCHÆISM**, n. A<sup>3</sup>r-ke<sup>1</sup>zīm. Fr., *archéisme*. The doctrine of an archæus (q. v.). [L. 43.]

**ARCHÆOPTERYGES** (Lat.), n. f. pl. A<sup>3</sup>r-ke<sup>2</sup>(a<sup>3</sup>rch<sup>2</sup>)'e(a<sup>3</sup>e<sup>2</sup>)-o<sup>2</sup>p-te<sup>2</sup>r<sup>1</sup>(i<sup>2</sup>u<sup>2</sup>)-jez(ge<sup>2</sup>s). From *ἀρχαῖος*, primitive, and *πτερυξ*, a wing. Primeval birds. [L. 173.]

**ARCHÆOSTOMA** (Lat.), n. n. A<sup>3</sup>r-ke<sup>2</sup>(ch<sup>2</sup>a<sup>3</sup>e<sup>2</sup>)-o<sup>2</sup>st'o<sup>2</sup>-ma<sup>3</sup>. Gen., *archæostomatos* (-tis). From *ἀρχαῖος*, primitive, and *στόμα*, the mouth. See *BLASTOPORE*. In the pl., *Archæostomata*, a division of the *Metazoa* in which the aperture in the gastrula becomes the permanent mouth. [L. 121.]

**ARCHÆOSTOMATOUS**, adj. A<sup>3</sup>r-ke-o-sto<sup>2</sup>m'a<sup>2</sup>t-u<sup>3</sup>s. Persistent in the form of a mouth (said of a gastrula when the blastopore does not entirely close up). [L. 66.]

**ARCHÆUS** (Lat.), adj. A<sup>3</sup>r-ke<sup>2</sup>(a<sup>3</sup>rch<sup>2</sup>)-e'(a<sup>3</sup>e<sup>2</sup>)-u<sup>3</sup>s(u<sup>4</sup>s). Gr., *ἀρχαῖος*. Fr., *archée* (2d and 3d def's). Ger., *Archäus* (2d and 3d def's). 1. Original, ancient, fundamental (said of ancient medicine in general, of the natural state before the advent of disease, and of the normal condition of a part). [Hippocrates (A. 325).] 2. As a n., Van Helmont's term for the original vital principle (the ruling principle) of the organism. [A. 300.] 3. An alchemical name for the molten central part of the earth. [A. 300.]—**A. cælestis**. Fr., *archée céleste*. A name given by Paracelsus to *nostoc* (q. v.). [B. 121.]

**ARCHANGEL**, n. A<sup>3</sup>r-kan'je<sup>2</sup>l. A name given to the genera *Archangelica* and *Lamium*. [B. 19.]

**ARCHANGELICA** (Lat.), n. f. A<sup>3</sup>r-ke<sup>2</sup>(a<sup>3</sup>rch<sup>2</sup>)-a<sup>2</sup>n(a<sup>3</sup>n<sup>2</sup>)-je<sup>2</sup>l-(ge<sup>2</sup>l)<sup>1</sup>/i<sup>2</sup>k-a<sup>3</sup>. From *ἀρχαγγέλος*, an archangel, because held to be pre-eminently efficacious. [B. 34.] Ger., *Engelheurz*. Sp., *arcanjélica*.

A genus of umbelliferous herbs separated by Hoffmann from the Linnean genus *Angelica*, and distinguished from it by the dorsal ribs being thick and carinate and the seed being separated from the pericarp, which is covered with oil-tubes. [B. 34.]—**A. atropurpurea** [Hoffmann]. Syn.: *Angelica atropurpurea* [Linnaeus] (seu *triquinaria* [Michaux]). A species growing throughout the northern and western United States. An herbaceous plant 4 to 6 feet in height with dark-purple furrowed stalk and greenish-white flowers surrounded by involucrels of setaceous bracts less than half as long as the pedicels. It has a strong odor and aromatic taste, and the juice of the root when fresh is acrid, but loses its acridity on drying. The whole plant was formerly official, and is used for the same purposes as the *A. officinalis*. [B. 5, 34.]—**A. decurrens** [Ledebour]. A species closely resembling *A. officinalis* growing in northern Asia. [B. 180.]—**A. Gmelini** [De Candolle]. A species distinguished by the obtuse sub-equal ribs of its mericarp with scarcely distinguishable alæ. It is found on the New England sea-coast and in Kamtschatka, where it is used as a substitute for parsley. [B. 34, 180.]—**A. hirsuta** [Torrey and Gray]. A species 3 to 5 feet in height, growing in the Atlantic States, distinguished by its striate stem, the upper part of which, together with the umbels, is tomentous-hirsute at the summit. It is sometimes used to replace the *A. officinalis*. [B. 34.]—**A. litorea** [Agardh]. Ger., *uferständige Engelheurz*. A variety of *A. officinalis* (*A. officinalis*, var. *β* [Mert. and Koch]), found on river-banks in northern Europe. [B. 180.]—**A. officinalis** [Hoffmann]. Ger., *echte oder edle, oder gebrauchliche Engelheurz, Brustheurz*. Syn.: *Angelica* a. [Linnaeus] (seu *officinalis* [Mönch], seu *sativa* [Miller]). Garden angelica; a species growing in damp localities in central and northern Europe, and also said to occur in Labrador, distinguished by its smooth, round, striped stalk and by the bipinnate leaves, the segments of which are lobate and acutely serrate and the terminal segment divided into 3 lobes. The fruit, or seeds as they are commonly called, are ash-colored, oval, obtuse, and 2 or 3 lines in length. The whole plant is aromatic, has a powerful fragrant odor and a sweetish, afterward bitter and aromatic, taste. It contains angelic, valerianic, malic, and tannic acids, resin, sugar, starch, and a bitter principle. Its root, leaves, and fruit—*radix, herba, et semen angelicæ* (seu *angelicæ hortensis*, seu *angelicæ sativæ*, seu *angelicæ archangelicæ*, seu *costi nigri*, seu *podagrace*, seu *smyrnii*)—have been official, and are used as an aromatic tonic, diaphoretic, diuretic, and carminative. The fruit is still official in the Fr. Codex, and the root is the *radix angelicæ* (q. v. for description) of the Ger. Ph. [B. 5, 34, 180.]—**A. sativa** [Fries]. The cultivated variety of *A. officinalis*, by some regarded as a distinct species. [B. 81.]—**A. triquinata**. See *A. atropurpurea*.—**Radix archangelicæ**. See *Radix ANGELICÆ*.

**ARCHANGELICUS** (Lat.), adj. A<sup>3</sup>r-ke<sup>2</sup>(a<sup>3</sup>rch<sup>2</sup>)-a<sup>2</sup>n(a<sup>3</sup>n<sup>2</sup>)-je<sup>2</sup>l-(ge<sup>2</sup>l)<sup>1</sup>/i<sup>2</sup>k-u<sup>3</sup>s(u<sup>4</sup>s). Pertaining to the genus *Archangelica*. [L. 50.]

**ARCHE** (Lat.), n. f. A<sup>3</sup>r-ke<sup>2</sup>(ch<sup>2</sup>a). Gr., *ἀρχή*. The origin, starting-point, or initial stage of a disease. [A. 322.]

**ARCHE** (Fr.), n. A<sup>3</sup>rsh. See *ARCH*.

**ARCHEIOLOGY**, n. A<sup>3</sup>r-ke<sup>2</sup>-bi-o'l-o-jī. From *ἀρχή*, a beginning, *βίος*, life, and *λόγος* (see *-logy*). The study of the earliest forms of life. [L. 63.]

**ARCHEBIOSIS** (Lat.), n. f. A<sup>3</sup>r-ke<sup>2</sup>(ch<sup>2</sup>a)-bi(bi<sup>2</sup>)-o'si<sup>3</sup>s. Gen., *archebiosis* (-sis). From *ἀρχή*, a beginning, and *βίωσις*, life. See *Spontaneous GENERATION*.

**ARCHECPTOMA** (Lat.), n. n. A<sup>3</sup>r-ke<sup>2</sup>(a<sup>3</sup>rch<sup>2</sup>)-e<sup>2</sup>k-to'ma<sup>3</sup>. Gen., *archecptomatos* (-tis). From *ἀρχή*, the anus, and *ἐκπτώμα*, a displacement. Prolapse of the anus. [L. 50.]

**ARCHED**, adj. A<sup>3</sup>rched. Lat., *arcuatus*. Fr., *arcué*. Ger., *bogenförmig*. It., *arcuato*. Sp., *arcuado*. Curved; of the shape of an arch. [L.]

**ARCHÉE** (Fr.), n. A<sup>3</sup>r-ka. See *ARCHÆUS*.

**ARCHEGENES** (Lat.), adj. A<sup>3</sup>r-ke<sup>2</sup>(ch<sup>2</sup>a)'je<sup>2</sup>n(ge<sup>2</sup>n)-ez(as). Gr., *ἀρχηγενής*. See *ARCHEGENOS*.

**ARCHEGENESIS** (Lat.), n. f. A<sup>3</sup>r-ke<sup>2</sup>(ch<sup>2</sup>a)-je<sup>2</sup>n(ge<sup>2</sup>n)'e<sup>2</sup>s-i<sup>3</sup>s. Gen., *archegene<sup>2</sup>seos* (-sis). From *ἀρχή*, a beginning, and *γένεσις* a formation. See *Spontaneous GENERATION*.

**ARCHEGONE**, n. A<sup>3</sup>r-ke<sup>2</sup>-gon. Lat., *archegonium* (from *ἀρχή* and *γενος* [see *ARCHEGONOS*]). Fr., *archéogone*. 1. The female organ in the higher cryptogams (*Bryophyta* and *Pteridophyta*). It consists essentially of a flask-shaped cavity with a long neck, lined by a single layer of cells and inclosing a naked protoplasmic mass, the germ-cell. The latter is fecundated by the sperm-cells or spermatozoids which pass down the neck of the archegone cavity. 2. A name given by Sachs to the secondary embryo sac of gymnosperms. See under *SAC*. [B. 19, 75.]

**ARCHEGONIAL**, adj. A<sup>3</sup>r-ke<sup>2</sup>-go<sup>2</sup>'ni<sup>2</sup>-a<sup>2</sup>l. Relating to an archegonium. [L. 63.]

**ARCHEGONOS** (Lat.), adj. A<sup>3</sup>r-ke<sup>2</sup>g(ch<sup>2</sup>e<sup>2</sup>g'o<sup>2</sup>n)-o<sup>2</sup>s. Gr., *ἀρχηγόνος* (from *ἀρχή*, a beginning, and *γενέσθαι*, to come into existence). Lit., primeval, primitive, original; as applied to diseases, acute. [A. 322.]

**ARCHEGOSARIA** (Lat.), n. n. pl. A<sup>3</sup>r'ke<sup>2</sup>(ch<sup>2</sup>a)-go<sup>2</sup>(go<sup>2</sup>)-sa<sup>4</sup>(sa<sup>3</sup>u<sup>4</sup>)-ri<sup>2</sup>-a<sup>2</sup>. From *ἀρχηγός*, primitive, and *σαῦρα*, a lizard. Primitive (extinct) saurians. [L. 173.]

LONGITUDINAL SECTION OF AN  
ARCHEGONE. (AFTER CAUVET.)

PT, the prothallus; CC, the central cell; ZO, the zoospore; MG, its germinal spot; C, canal of the archegone; 1, 2, cells surrounding the canal; M, mucilage resulting from the liquefaction of the median cellule of the canal.

**ARCHÉISME** (Fr.), n.  $A^3r$ -ka-i<sup>2</sup>zm. See **ARCHÉISM**.

**ARCHEL**, n.  $A^3r$ -ke<sup>2</sup>l. See **ARCHILL**.—**Auvergne a.**, Ground a. See **LECANORA parella**.

**ARCHELL**, n.  $A^3r$ -ke<sup>2</sup>l. See **ARCHILL**.

**ARCHELMINTHES** (Lat.), n. f. pl.  $A^3r$ -ke<sup>2</sup>l(ch<sup>2</sup>e<sup>2</sup>)<sup>2</sup>-mi<sup>2</sup>n'thez-(the's). From *ἀρχή*, a beginning, and *ἄλμυς*, a worm. Ger., *Urwürmer*. The primeval worms, i. e., those which are extinct. [L, 173.]

**ARCHELOGY**, n.  $A^3r$ -ke<sup>2</sup>l-o-i<sup>2</sup>j<sup>2</sup>. Lat., *archeologia* (from *ἀρχή*, a beginning, and *λόγος*, understanding). Fr., *archéologie*. The study of the fundamental principles of anthropology. [A, 301.]

**ARCHEMY**, n.  $A^3r$ -ke<sup>2</sup>m-i<sup>2</sup>. Lat., *archimia*. Fr., *archimie*. The transmutation of metals. [Libavius (L, 50).] Cf. **ALCHEMY**.

**ARCHENA** (Sp.), n.  $A^3r$ -cha'na<sup>3</sup>. A Spanish town in the province of Murcia, with warm feebly alkaline carbonated springs, the water of which is drank and used for bathing. [Rotureau (L, 87).]

**ARCHENAS** (Ar.), n. The juniper. [L, 105.]

**ARCHENCEPHALA** (Lat.), n. n. pl.  $A^3r$ -(a<sup>3</sup>rch<sup>2</sup>)<sup>2</sup>-e<sup>2</sup>n-se<sup>2</sup>f-(ke<sup>2</sup>f)-a<sup>3</sup>la<sup>3</sup>. From *ἀρχεν*, to govern, and *ἐγκεφαλος*, the brain. Fr., *archencephales*. A name given by Owen to the group of mammals which includes man alone. [B, 28.]

**ARCHENDA**, **ARCHENDE**, n's. From Ar., *al-kenda*. A powder prepared from the leaves of a species of *Ligustrum*, applied to the feet by the Egyptians after bathing, also to prevent sweating and fotor [Prosper Alpinus (L, 53)]; powdered henna. [B, 121.]

**ARCHENTERIC**, adj.  $A^3r$ -e<sup>2</sup>n-te<sup>2</sup>r-i<sup>2</sup>k. Of or relating to the archenteron. [B, 146.]

**ARCHENTERON** (Lat.), n. n.  $A^3r$ -(a<sup>3</sup>rch<sup>2</sup>)<sup>2</sup>-e<sup>2</sup>n-te<sup>2</sup>r-o<sup>2</sup>n. From *ἀρχή*, a beginning, and *έντερον*, an intestine. Fr., *archentéron*. Ger., *Urdarm*. The primitive alimentary cavity of the embryo; the cavity of the gastrula. [A. Thomson (A, 5); A, 385.]

**ARCHEOSTIS** (Lat.), n. f. See **ARCHEZOSTIS**.

**ARCHEPHYCEÆ** (Lat.), n. f. pl.  $A^3r$ -(a<sup>3</sup>rch<sup>2</sup>)<sup>2</sup>-e<sup>2</sup>-fi<sup>2</sup>s-(fu<sup>2</sup>k)-e<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). Haeckel's term for the protophytes. [L, 173.]

**ARCHEPTN**, n. A Mexican gum, used to cure scorpions' bites and as a cement. ["Proc. of the Am. Pharm. Assoc.," xxiv, p. 768 (B).]

**ARCHESPERMS**, n. pl.  $A^3r$ -ke<sup>2</sup>-spu<sup>2</sup>rmz. Lat., *archespermæ*. See **ARCHISPERMÆ**.

**ARCHESPORIUM** (Lat.), n. n.  $A^3r$ -(a<sup>3</sup>rch<sup>2</sup>)<sup>2</sup>-e<sup>2</sup>-spo<sup>2</sup>-ri<sup>2</sup>-u<sup>2</sup>m-(u<sup>2</sup>m). In botany, the layer of cells constituting the pollen-sac. [B, 223.]

**ARCHET** (Fr.), n.  $A^3r$ -sha. Ger., *Wippe* (2d def.). It., *archetto*. 1. See **CRADLE**. 2. A instrument like a jeweler's bow, formerly used to rotate the drill in the operation of lithotripsy. [A, 385.]

**ARCHETYPAL**, adj.  $A^3r$ -e<sup>2</sup>t-i<sup>2</sup>p-a<sup>2</sup>l. See **ARCHETYPICAL**.

**ARCHETYPE**, n.  $A^3r$ -ke<sup>2</sup>-tip. Gr., *ἀρχέτυπον* (from *ἀρχή*, a beginning, and *τύπος*, a type). Lat., *archetypum*. Fr., *archetype*. Ger., *Archetyp.* It., *archetipo*. Sp., *arquétipo*. An abstract conception of an original type or pattern on which a group of animals or plants or a system of organs is assumed to have been constructed, and to which their various modifications may be referred. [A, 385; L, 108.]

**ARCHETYPICAL**, adj.  $A^3r$ -e<sup>2</sup>-ti<sup>2</sup>p-i<sup>2</sup>k-a<sup>2</sup>l. Fr., *archétypé*. Ger., *archetypisch*. Relating to or of the nature of an archetype. [L, 108.]

**ARCHEUS** (Lat.), adj.  $A^3r$ -(a<sup>3</sup>rch<sup>2</sup>)<sup>2</sup>-e(a)<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). See **ARCHEUS**.

**ARCHEZOA** (Lat.), n. n. pl.  $A^3r$ -(a<sup>3</sup>rch<sup>2</sup>)<sup>2</sup>-e<sup>2</sup>-zo-a<sup>3</sup>. From *ἀρχή*, a beginning, and *ζῶον*, a living being. The simplest and most ancient primary forms of the *Ovularia*; the extinct animal *Monera* and *Amœbe* and the animal *Synamœbe*. [L, 173.]

**ARCHEZOSTIS** (Lat.), n. f.  $A^3r$ -(a<sup>3</sup>rch<sup>2</sup>)<sup>2</sup>-e<sup>2</sup>-zo<sup>2</sup>s-ti<sup>2</sup>s. An ancient name for the white bryony, so called because its tops or tendrils bind themselves around anything within their reach. [L, 104.]

**ARCHIAMPHIASER** (Lat.), n. m.  $A^3r$ -(a<sup>3</sup>rch<sup>2</sup>)<sup>2</sup>-i<sup>2</sup>-a<sup>2</sup>m-(a<sup>3</sup>m)-fi<sup>2</sup>-a<sup>2</sup>st(a<sup>3</sup>st)-u<sup>2</sup>r(e<sup>2</sup>r). From *ἀρχή*, a beginning (see also **AMPHIASER**). A term proposed by Whitman for the first nuclear spindle, or amphiaser, in maturing ova. [Whitman, "Quart. Jour. of Micr. Sci.," 1878, p. 215 (J).]

**ARCHIATER**, **ARCHIATROS** (Lat.), n's m.  $A^3r$ -(a<sup>3</sup>rch<sup>2</sup>)<sup>2</sup>-i<sup>2</sup>-a(a<sup>3</sup>)<sup>2</sup>-tu<sup>2</sup>r(te<sup>2</sup>r), -tro<sup>2</sup>s. Gr., *ἀρχιάτρος* (from *ἀρχός*, a chief, and *ίατρος*, a physician). Fr., *archiatre*. Ger., *Oberarzt*. It., *archiatro*. Sp., *arquiatro*. A title formerly used to designate the physician to a monarch, but afterward applied to any physician occupying an exalted official position. [A, 385.]

**ARCHIBLAST**, n.  $A^3r$ -ki<sup>2</sup>-bla<sup>3</sup>st. From *ἀρχός*, a chief, and *βλαστός*, a germ. Fr., *archiblaste*. Ger., *Archiblast*, *Hauptkeim* [His], *Keimscheitel*, *Keimscheibe*, *Keimhügel*. Syn.: *discus proligerus* [von Baer], *ovicatricula* (in birds' eggs), *germinal disc*, *newerblast*. His's term for a small, whitish, circular granular areola that surrounds and incloses the germinal vesicle of the ovarian ovum. After fecundation, it becomes the blastoderm (q. v.). The term is sometimes used also as synonymous with epiblast. [A, 4, 8, 15.]

**ARCHIBLASTIC**, adj.  $A^3r$ -ki<sup>2</sup>-bla<sup>3</sup>st-i<sup>2</sup>tk. Ger., *archiblastisch*. Pertaining to the archiblast or to the archiblastula. [L, 146.]

**ARCHIBLASTULA** (Lat.), n. f.  $A^3r$ -ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)<sup>2</sup>-bla<sup>3</sup>st(bla<sup>3</sup>s)-tu<sup>2</sup>(tu)-la<sup>3</sup>. From *ἀρχός*, a chief (see also **BLASTULA**). Haeckel's term for a blastula (q. v.) in the stage of a simple sac the wall of which consists of a single layer of similar cells. [L, 146.] See Fig. 4, plate i.

**ARCHICARIDÆ** (Lat.), n. f. pl.  $A^3r$ -(a<sup>3</sup>rch<sup>2</sup>)<sup>2</sup>-i<sup>2</sup>-ka<sup>2</sup>r(ka<sup>2</sup>r)-i<sup>2</sup>d-e(a<sup>3</sup>-e<sup>2</sup>). From *ἀρχή*, a beginning, and *καρίς*, a prawn or shrimp. The primeval crabs. [L, 173.]

**ARCHICARP**, n.  $A^3r$ -ki<sup>2</sup>-ka<sup>2</sup>rp. Lat., *archicarpium* (from *ἀρχή*, a beginning, and *καρπός*, a fruit). A general name for any

plant-cell which is capable of fertilization by sexual processes and development into a fruit or a new plant. [B, 54.]

**ARCHICUS** (Lat.), adj.  $A^3r$ -ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)<sup>2</sup>-ku<sup>2</sup>s(ku<sup>2</sup>s). Gr., *ἀρχικός*. Properly, primary, principal; used improperly (as if from *ἀρχός*, the anus) as signifying relating to the rectum. [L, 50.]

**ARCHICYTULA** (Lat.), n. f.  $A^3r$ -ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)<sup>2</sup>-si<sup>2</sup>t(ku<sup>2</sup>t)(u<sup>2</sup>u)-la<sup>3</sup>. From *ἀρχός*, a chief, and *κύτος*, a hollow. Haeckel's term for a fertilized egg-cell in which a nucleus has again become evident. [L, 146.] See Fig. 1, plate i, and cf. **ARCHIMONERULA**.

**ARCHIDIACEÆ** (Lat.), n. f. pl.  $A^3r$ -ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)<sup>2</sup>-di(di<sup>2</sup>)-a(a<sup>3</sup>)-se<sup>2</sup>(ke<sup>2</sup>)-e(a<sup>3</sup>-e<sup>2</sup>). Fr., *archidiacées*. A family of mosses, made by Schimper, comprising a few species distinguished by their abnormal development, there being no sporangium, in the proper sense of the word, as in other mosses. [B, 121.]

**ARCHIDIEÆ** (Lat.), n. f. pl.  $A^3r$ -ki<sup>2</sup>d(ch<sup>2</sup>i<sup>2</sup>d)-i(e)<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). Fr., *archidiées*. A tribe of mosses belonging to the family *Archidiacées* and comprising a single genus *Archidium*. [B, 121.]

**ARCHIGASTRULA** (Lat.), n. f.  $A^3r$ -ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)<sup>2</sup>-ga<sup>2</sup>s(ga<sup>2</sup>s)-tru<sup>2</sup>(tru)-la<sup>3</sup>. From *ἀρχός*, a chief, and *γαστήρ*, the belly. Syn.: *bell-gastrula*. A gastrula of which the endoderm and exoderm consist of a single layer of cells, and in which the primitive intestinal cavity has been formed. [L, 146.] See Fig. 6, plate i.

**ARCHIGENES** (Lat.), adj.  $A^3r$ -(a<sup>3</sup>rch<sup>2</sup>)<sup>2</sup>-i<sup>2</sup>j(i<sup>2</sup>j)-e<sup>2</sup>n-ez(e<sup>2</sup>s). See **ARCHEGONOS**.

**ARCHIGENESIS** (Lat.), n. f.  $A^3r$ -(a<sup>3</sup>rch<sup>2</sup>)<sup>2</sup>-i<sup>2</sup>-je<sup>2</sup>n(ge<sup>2</sup>n)-e<sup>2</sup>s-i<sup>2</sup>s. See **ARCHGENESIS**.

**ARCHIGENOS**, **ARCHIGENUS** (Lat.), adj's.  $A^3r$ -ki<sup>2</sup>-j-(ch<sup>2</sup>i<sup>2</sup>j)-e<sup>2</sup>n-o<sup>2</sup>s, -u<sup>2</sup>s(u<sup>2</sup>s). See **ARCHEGONOS**.

**ARCHIGETIDÆ** (Lat.), n. f. pl.  $A^3r$ -ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)<sup>2</sup>-je<sup>2</sup>t(ge<sup>2</sup>t)-i<sup>2</sup>d-e(a<sup>3</sup>-e<sup>2</sup>). A division of the *Bothriidae* having two suctorial discs and a tail-like appendix bearing embryonal hooklets. [B.]

**ARCHIGONOS** (Lat.), adj.  $A^3r$ -ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>j)-o<sup>2</sup>n-o<sup>2</sup>s. See **ARCHEGONOS**.

**ARCHIGONY**, n.  $A^3r$ -ki<sup>2</sup>g-o<sup>2</sup>n-i<sup>2</sup>. For deriv., see **ARCHEGENESIS**. Lat., *archigonia*. Fr., *archigonie*. Ger., *Archigonie*. Spontaneous generation. [L, 173.]

**ARCHIL**, **ARCHILL**, n's.  $A^3r$ -ki<sup>2</sup>l. Lat., *archilium*, *archilla*. Fr., *archile*, *orseille*. A coloring matter, ranging from a violet-red to a blue, obtained from several varieties of lichens. [B, 19; L, 120.]—**Canary a.** See **ROCCELLA tinctoria**.

**ARCHIMAGIA** (Lat.), n. f.  $A^3r$ -ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)<sup>2</sup>-ma<sup>2</sup>(ma<sup>2</sup>)-ji(ge)<sup>2</sup>a<sup>3</sup>. From *ἀρχός*, a chief, and *μαγεία*, magic. Fr., *archimagic*. Sp., *archimajia*. 1. The chemical art. [L, 53.] 2. The art of making gold or silver. [L, 111.]

**ARCHIMIA** (Lat.), n. f.  $A^3r$ -ki<sup>2</sup>m(ch<sup>2</sup>i<sup>2</sup>m)-i(e)<sup>2</sup>a<sup>3</sup>. See **ARCHEMY**.

**ARCHIMONERULA** (Lat.), n. f.  $A^3r$ -ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)<sup>2</sup>-mo<sup>2</sup>n-e<sup>2</sup>r(u<sup>2</sup>u)-la<sup>3</sup>. From *ἀρχός*, a chief, and *μονήριον*, single, solitary. Haeckel's term for a fertilized egg-cell in which the formative and nutritive yolks are not yet distinct, and the nucleus has disappeared. [L, 146.]

**ARCHIMORULA** (Lat.), n. f.  $A^3r$ -ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)<sup>2</sup>-mo<sup>2</sup>r(u<sup>2</sup>u)-la<sup>3</sup>. From *ἀρχός*, a chief, and *μόρον*, a mulberry. Haeckel's term for a morula (q. v.) made up of similar cells. [L, 146.] See Fig. 3, plate i.

**ARCHINEPHRIC**, adj.  $A^3r$ -ki<sup>2</sup>-ne<sup>2</sup>f-i<sup>2</sup>k. Relating to the archinephron. [B.]

**ARCHINEPHRON** (Lat.), n. n.  $A^3r$ -ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)<sup>2</sup>-ne<sup>2</sup>f-ro<sup>2</sup>n. From *ἀρχή*, a beginning, and *νεφρός*, a kidney. The primitive renal excretory apparatus of the embryo.

**ARCHIPIN**, n. See **ARCHEPIN**.

**ARCHIPTERA** (Lat.), n. n. pl.  $A^3r$ -(a<sup>3</sup>rch<sup>2</sup>)<sup>2</sup>-i<sup>2</sup>p-te<sup>2</sup>r-a<sup>3</sup>. From *ἀρχή*, a beginning, and *πτερόν*, a wing. The primeval flies. [L, 173.]

**ARCHIPTERYGIUM** (Lat.), n. n.  $A^3r$ -ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)<sup>2</sup>-te<sup>2</sup>r-i<sup>2</sup>j(u<sup>2</sup>g)-i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). From *ἀρχός*, a chief, and *πτερυγίον*, a wing or a fin. The archetype of the anterior limbs of the higher vertebrates, represented by the pectoral fin of the *Ceratodus*. [L, 173.]

**ARCHISPERMS**, n. pl.  $A^3r$ -ki<sup>2</sup>-spu<sup>2</sup>rmz. Lat., *archispermæ* (from *ἀρχή*, a beginning, and *σπέρμα*, a seed), on account of the geological antiquity of the Gymnosperms. [B, 121.] Ger., *Archispermæ*. See **GYMNOSPERMÆ**.

**ARCHISPONGIÆ** (Lat.), n. f. pl.  $A^3r$ -(a<sup>3</sup>rch<sup>2</sup>)<sup>2</sup>-i<sup>2</sup>-spo<sup>2</sup>n-(spo<sup>2</sup>n)-ji<sup>2</sup>(gi<sup>2</sup>)-e(a<sup>3</sup>-e<sup>2</sup>). From *ἀρχή*, a beginning, and *σπόγγος*, a sponge. The primeval sponges. [L, 173.]

**ARCHISTOM**, n.  $A^3r$ -ki<sup>2</sup>-stom. From *ἀρχή*, a beginning, and *στόμα*, a mouth. Ger., *Urmund*. See **BLASTOPORE**.

**ARCHITECTONIA**, **ARCHITECTURA** (Lat.), n's f.  $A^3r$ -ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)<sup>2</sup>-te<sup>2</sup>k-to-mi<sup>2</sup>a<sup>3</sup>, -tu<sup>2</sup>(tu)/ra<sup>3</sup>. From *ἀρχιτεκτονείν*, to construct. Fr., *architecture*. Ger., *Architektur*, *Körperconstitution*. The bodily constitution. [L, 50.]

**ARCHITIS** (Lat.), n. f.  $A^3r$ -ki<sup>2</sup>(ch<sup>2</sup>e)<sup>2</sup>-ti<sup>2</sup>s. Gen., *architidis*. From *ἀρχός*, the fundment (see also -itis<sup>2</sup>). See **PROCTITIS**.

**ARCHITYPE**, n.  $A^3r$ -ki<sup>2</sup>tip. See **ARCHETYPE**.

**ARCHOCELE** (Lat.), n. f.  $A^3r$ -ko(ch<sup>2</sup>o<sup>2</sup>)-se(ka)/le(a) [as an English word,  $A^3r$ -ko-sell]. From *ἀρχός*, the fundment, and *κύλη*, a hernia. See **RECTAL HERNIA**.—**Vaginal a.** Lat., *a. vaginalis*. A hernia of the rectum projecting into the vagina.

**ARCHOCYSTOCOLPOSYRINX** (Lat.), n. f.  $A^3r$ -ko(ch<sup>2</sup>o<sup>2</sup>)-si<sup>2</sup>st(ku<sup>2</sup>st)-o-ko<sup>2</sup>lp-o-si<sup>2</sup>r(su<sup>2</sup>r)-i<sup>2</sup>n<sup>2</sup>x. Gen., *archocystocolposyrin'gos* (-gis). From *ἀρχός*, the fundment, *κύστις*, the bladder, *κόλπος*, the vagina, and *σyrinx*, a fistula. Ger., *Mastdarm-Harnblasen-Mutterscheidenfistel*. Syn.: *fistula ani*, *vesicæ et vaginae*. A recto-vesico-vaginal fistula. [L, 50.]

**ARCHOCYSTOSYRINX** (Lat.), n. f.  $A^3r$ -ko(ch<sup>2</sup>o<sup>2</sup>)-si<sup>2</sup>st(ku<sup>2</sup>st)-o-si<sup>2</sup>r(su<sup>2</sup>r)-i<sup>2</sup>n<sup>2</sup>x. Gen., *archocystosyrin'gos* (-gis). From *ἀρχός*, the

fundament, κύστις, the bladder, and σῶπις, a fistula. Ger., *Mast-darm-Harnblasenfistel*. A recto-vesical fistula. [A, 322.]

**ARCHOMETRUM** (Lat.), n. n.  $A^3r\text{-}ko(ch^2o^2)\text{-}me^2t/ru^3m(ru^4m)$ . From ἀρχός, the fundament, and μέτρον, a measure. Ger., *Mast-darmmesser*. 1. An instrument for measuring the calibre of the anus. [L, 50.] 2. An anal dilator. [Howship (L, 50).]

**ARCHOPTOMA** (Lat.), n. n.  $A^3r\text{-}ko^2p(ch^2o^2p)\text{-}to^2ma^3$ . Gen., *archoptomatos (-tis)*. From ἀρχός, the fundament, and πτώμα, a fallen body. The mass formed by a prolapse of the rectum. [L, 50.]

**ARCHOPTOSIS** (Lat.), n. f.  $A^3r\text{-}ko^2p(ch^2o^2p)\text{-}to^2si^2s$ . Gen., *archoptoseos (-sis)*. From ἀρχός, the fundament, and πτῶσις, a falling. Fr., *archoptose*. Ger., *Mastdarmvorfall*. Prolapse of the rectum. [L, 50.]

**ARCHOPTOTICUS** (Lat.), adj.  $A^3r\text{-}ko^2p(ch^2o^2p)\text{-}to^2t/i^2k\text{-}u^3s$ . (u's). Pertaining to, caused by, or affected with, prolapse of the rectum. [A, 322.]

**ARCHORRHAGIA** (Lat.), n. f.  $A^3r\text{-}ko^2r(ch^2o^2r)\text{-}ra(ra^3/ji\text{-}gi^2)\text{-}a^3$ . From ἀρχός, the fundament, and ῥήγναι, to break forth. Fr., *archorrhagie*. Ger., *Archorrhagie*, *Darmlutung*. Sp., *arcorragia*. Active rectal hemorrhage. [L, 43.]

**ARCHORRHAGIQUE** (Fr.), adj.  $A^3r\text{-}ko^2r\text{-}ra\text{-}zhék$ . Relating to archorrhagia. [L, 41.]

**ARCHORRHOÏQUE** (Fr.), adj.  $A^3r\text{-}ko^2r\text{-}ra\text{-}ék$ . Relating to archorrhœa. [L, 41.]

**ARCHORRHOËA** (Lat.), n. f.  $A^3r\text{-}ko^2r(ch^2o^2r)\text{-}re(ro^2/e^2)\text{-}a^3$ . From ἀρχός, the fundament, and ῥέω, to flow. Fr., *archorrhée*. Ger., *Archorrhœe*. Sp., *arcorrea*. 1. Passive rectal hemorrhage. [L, 43.] 2. Any pathological discharge from the rectum. [A, 316.]

**ARCHOS** (Lat.), n. m.  $A^3r\text{-}ko^2s(ch^2o^2s)$ . Gr., ἀρχός. The rectum or anus. [L, 53, 84.]

**ARCHOSTEGOMA** (Lat.), n. n.  $A^3r\text{-}ko(ch^2o^2)\text{-}ste^2g\text{-}no^2ma^3$ . Gen., *archostegomatos (-tis)*. From ἀρχός, the fundament, and στεγνύν, to solder together. Stricture of the rectum. [L, 50.]

**ARCHOSTEGNOSIS, ARCHOSTENOSIS** (Lat.), n's f.  $A^3r\text{-}ko(ch^2o^2)\text{-}ste^2g\text{-}no^2si^2s$ ,  $\text{-}ste^2n\text{-}o^2si^2s$ . Gen., *archostegno/seos (-sis)*, *steno/seos (-sis)*. From ἀρχός, the fundament, and στενωσις, a stoppage, or στενωσις, a constriction. The formation of a stricture of the rectum. [D, 81.]

**ARCHOSTENOTA, ARCHOSTENOTES** (Lat.), n's f.  $A^3r\text{-}ko(ch^2o^2)\text{-}ste^2n\text{-}o^2ta$ ,  $\text{-}tez(te^2s)$ . From ἀρχός, the fundament, and στενωσις, narrowness. See ARCHOSTEGOMA.

**ARCHOSYRINX** (Lat.), n. f.  $A^3r\text{-}ko(ch^2o^2)\text{-}si^2r(su^4r)/i^2n^2x$ . Gen., *archosyringos (-gis)*. From ἀρχός, the fundament, and σῶπις, a pipe. Ger., *Mastdarmfistel* (1st def.), *Klystirspritze* (2d def.). 1. Fistula in ano. 2. A syringe for rectal injections. [L, 50.]

**ARCHOXYTES** (Lat.), n. f.  $A^3r\text{-}ka(a^3rch^2)\text{-}o^2x/i^2a^3\text{-}tez(te^2s)$ . Gen., *archoxytes (-tis)*. From ἀρχός, the fundament, and δξύτης, sharpness, acidity. Ger., *Mastdarmsäure*. Acidity of the rectum.

**ARCHUS** (Lat.), n. m.  $A^3r\text{-}ku^3s(ch^2u^3s)$ . See ARCHOS.

**ARCHYDRA** (Lat.), n. n. pl.  $A^3r\text{-}k(a^3rch^2)\text{-}id(u^4d)/ra^3$ . From ἀρχή, a beginning, and ὕδρα, the hydra. Haeckel's name for the hypothetical ancestral form of the *Cœlenterata*. [L, 193.]

**ARCHYDRÆ** (Lat.), n. f. pl.  $A^3r\text{-}k(a^3rch^2)\text{-}id(u^4d)/re(ra^3\text{-}e^2)$ . The hypothetical primeval form of the *Hydroïda*. [L, 173.]

**ARCHYLE** (Lat.), n. f.  $A^3r\text{-}ki(ch^2u^3)/le(la)$ . From ἀρχή, a beginning, and ὕλη, matter. Fr., *archyle*. Ger., *Grundstoff*, *Vorstoff*, *Anfangsstoff*. Syn.: *materia primitiva*. A hypothetical entity, more subtle than light, heat, electricity, etc., assumed to be generated in the human body and to constitute a principle peculiar to man. [Ritgen (A, 322).]

**ARCIDOSSO** (It.), n.  $A^3r\text{-}che\text{-}dos/so$ . A cold chalybeate, carbonated spring in Tuscany. [L, 49.]

**ARCIELOUS** (Fr.), n.  $A^3r\text{-}si^2\text{-}e^2l\text{-}u$ . A popular name in the southeast of France for the *Boletus edulis*. [B, 121.]

**ARCIFERI** (Lat.), n. m. pl.  $A^3r\text{-}si^2f(ki^2f)/e^2r\text{-}i(e)$ . From *arcus*, an arch, and *ferre*, to bear. A group of the *Batrachia salientia* made by Cope, characterized by having teeth and by a longitudinally placed cartilaginous arch uniting the divergent coracoid and epicoracoid bones. The arch of one side overlaps that of the other. [E. D. Cope, "Nat. Hist. Rev.," 1865, p. 97 (L).]

**ARCIFEROUS**, adj.  $A^3r\text{-}si^2f/e^2r\text{-}u^3s$ . Belonging to or resembling the *Arciferi*. [L, 206.]

**ARCIFORM**, adj.  $A^3r\text{-}si^2f\text{-}o^2rm$ . Lat., *arciformis* (from *arcus*, an arch, and *forma*, form). Fr., *arciforme*. See ARCUATE.

**ARCION, ARCIUM** (Lat.), n's n.  $A^3r\text{-}si(ke)/o^2n$ ,  $\text{-}u^3m(u^4m)$ . From ἀρκιον, the burdock. See LAPPA.

**ARCO** (It.), n.  $A^3r\text{-}ko$ . A winter resort in the Tyrol, having a mild equable climate. [L, 57.]

**ARCOCELE** (Lat.), n. f.  $A^3r\text{-}ko\text{-}se(ka)/le(la)$  [as an English word,  $a^3r\text{-}ko\text{-}se$ ]. See ARCOCELE.

**ARCO DE PIPA**, n. A Brazilian name for the *Erythroxylon utile*. [B, 121.]

**ARCOLA** (It.), n.  $A^3r\text{-}ko/la^3$ . A place in Piedmont, where there is a sulphurous chalybeate spring. [L, 124.]

**ARCOLE** (Fr.), n.  $A^3r\text{-}kol$ . A place in Algeria, where there is a cold chalybeate spring. [L, 124.]

**ARCOS** (Lat.), n. n.  $A^3r\text{-}ko^2s$ . Gen., *arceos (-ceis)*. Gr., ἀρκος (from ἀρκύν, to assist). 1.  $\Delta\epsilon\varsigma$  ustum. [Ruland (L, 53).] 2. A resource or preventive. [L, 50.]

**ARCOS DE PEIRAS** (Sp.), n.  $A^3r\text{-}kos\ da\ pa'e\text{-}ra^3s$ . A place in Spain, where there is a cold sulphurous spring. [L, 124.]

**ARCS** (Fr.), n.  $A^3r\text{-}ks$ . A place in the department of Var, France, where there is a chalybeate spring. [L, 57.]

**ARCTATION**, n.  $A^3r\text{-}k\text{-}ta/shu^3n$ . Lat., *arctatio* (from *arctare* [= *artare*], to contract). Fr., *arctation*. Ger., *Verengerung*, *Enge*. It., *arctazione*. Sp., *arctación*. An abnormal diminution in the size of any of the openings or canals of the body, especially the vagina. 2. Constriction. 3. Infibulation. 4. Constipation. [L, 50, 53.]

**ARCTIÆ** (Lat.), n. f. pl.  $A^3r\text{-}k\text{-}ti(te^2/e^2\text{-}e(a^3\text{-}e^2))$ . A division of the *Amphicnemanthæ* made by Reichenbach, including *Arctium* and two or three other genera. [B, 170.]

**ARCTION** (Lat.), n. n.  $A^3r\text{-}k\text{-}ti^2\text{-}on$ . See ARCTIUM.

**ARCTISCA** (Lat.), n. n. pl.  $A^3r\text{-}k\text{-}ti^2s/ka^3$ . From ἀρκτος, a kind of crab mentioned by Aristotle. Syn.: *Macrobiodæ*. The bear-animalcules; a family of the *Acarina* inhabiting damp moss and the gutters of houses. [L, 147.]

**ARCTITUDO** (Lat.), n. f.  $A^3r\text{-}k\text{-}ti^2\text{-}tu^2(tu^4)/do$ . Gen., *arctitudinis*. Fr., *arctitude*. Sp., *arctitud*. See ARCTATION.

**ARCTIUM** (Lat.), n. n.  $A^3r\text{-}k\text{-}shi^2(ti^2)\text{-}u^3m(u^4m)$ . A genus of composite plants now referred to *Lappa*. [B.]—*A. bardana* (Willdenow). See *LAPPA tomentosa*.—*A. lappa* [Linnaeus], *A. majus* [Schkuhr]. See *LAPPA major*.—*A. minus* [Schkuhr]. See *LAPPA minor*.—*A. tomentosum*. See *LAPPA tomentosa*.

**ARCTOPHYLLUM** (Lat.), n. n.  $A^3r\text{-}k\text{-}to\text{-}fi^2(fu^4)/ln^3m(u^4m)$ . From ἀρκτος, a bear, and φύλλον, a leaf. A name given by Apuleius to the *Anthriscus cerefolium*. [B, 121.]

**ARCTOPITHECI, ARCTOPITHECINI** (Lat.), n's m. pl.  $A^3r\text{-}k\text{-}to\text{-}pi^2th\text{-}e(a^3)/si(ke)/ni(ne)$ . From ἀρκτος, a bear, and πίθηκος, an ape. Ger., *Krallenaffen*. The marmosets: a family of the *Simiidae*, without cheek-pouches or ischial callosities, having all the nails except that of the hallux falcate, the pollex non-opposable, and the fore-limbs shorter than the hind-limbs. [L, 12.]

**ARCTOPUS** (Lat.), n. m.  $A^3r\text{-}k\text{-}to^2\text{-}pu^3s(pu^4s)$ . Gen., *arctopodis*. From ἀρκτος, a bear, and πούς, a foot. Ger., *Bärenfuss*. A genus of campylopermous, umbelliferous plants found at the Cape of Good Hope. [L, 124.]—*A. echinatus* [Linnaeus]. A variety furnishing a gum-resin used in the treatment of chronic urethral discharges and syphilis. [B, 71; H. Baillon (L, 87).]

**ARCTOSCORODON** (Lat.), n. n.  $A^3r\text{-}k\text{-}to\text{-}sko^2r\text{-}o\text{-}do^2n$ . From ἀρκτος, a bear, and σκόροdon, garlic. Ger., *Bärenknoblauch*. See *ALLIUM ursinum*.

**ARCTOSTAPHYLOS** (Lat.), n. f.  $A^3r\text{-}k\text{-}to\text{-}sta^2f(sta^3f)/i^2l(u^4l)\text{-}o^2s$ . From ἀρκτος, a bear, and σταφύλη, a bunch of grapes, because bears eat the berries. Fr., *busserole*. Ger., *Bärentraube*. Bearberry; a genus of trailing ericaceous plants, established by Adanson, belonging to the suborder *Ericineæ* and the tribe *Arbutæ*, having a 5-parted calyx, a monopetalous ureolate corolla, and a fleshy drupeous fruit. [B, 34.]—*A. alpina* [Sprengel]. Fr., *arbusier des alpes*. Syn.: *Arbutus alpina* [Linnaeus]. A small shrub, with edible black berries, growing on the Swiss Alps and in the tropical regions of Europe, Asia, and America. [B, 34, 49.]—*A. glauca* [Lindley]. The manzanita; a species found in California. Its leaves, which are petiole, ovate-oblong in shape, and obtuse at the base, about 2 inches in length and of a glaucous hue, are used in medicine like those of *A. uva ursi* and contain *arbutin* and tannin. The *A. glauca* of Watson is the *A. pungens*, var. *platyphylla*. [B, 81, 215.]—*A. nevadensis*. A low, procumbent species found at altitudes of from 8,000 to 10,000 feet in the Sierra Nevada and California. [B, 215.]—*A. officinalis* [Wimmer and Grabowski]. See *A. uva ursi*.—*A. pungens* [Kunth]. A large shrub growing on the Pacific coast of the United States constituting one of the varieties of the manzanita. [B, 75, 215.]—*A. tomentosa* [Douglas]. Syn.: *Arbutus tomentosa* [Pursh]. A North American species. [B, 215.]—*A. uva ursi* [Sprengel]. Fr., *busserole raisin d'ours*. Ger., *Bärentraube*. Syn.: *Arbutus uva ursi* [Linnaeus]. Bearberry; trailing arbutus of Europe. A trailing shrub growing in the Alpine and Arctic districts of Europe and in North America, distinguished by its spatulate, peculiarly veined, glossy-green, leathery leaves, whitish-red flowers in terminal racemes, and scarlet berries. The leaves, which have a faint odor resembling that of hay, and a very astringent, somewhat bitter taste, contain gallic and tannic acids, malates, resin, sugar, a crystalline glucoside *arbutin*, and eri-

THE ARCTOSTAPHYLOS UVA URSI. (AFTER DE LANESSAN.)

*colin* and *ursone*. They are the *uva ursi* of the U. S. Ph., Fr. Cod., Aust. Ph., Hung. Ph., Netherl. Ph., Roum. Ph., Russ. Ph. (*uva ursi folia* [Br. Ph., Greek Ph.], *folia uva ursi* [Ger. Ph., Belg. Ph., Dan. Ph., Norweg. Ph., Swed. Ph., Swiss Ph., Finn. Ph.], *gayuba* [Sp. Ph.]). They are much employed in chronic catarrh of the urinary tract, especially in that dependent upon calculi, and also occasionally as an astringent in diarrhoea, leucorrhoea, bronchitis, and hæmorrhages. [B, 49, 81, 95.]

**ARCTOTELE** (Lat.), n. f. pl.  $A^3rk-to'te^2-e(a^3-e^2)$ . A division of composite plants of the *Arctotideæ* [De Candolle] or the *Cynarææ* [Lindley], comprising *Arctotis* and six or seven other genera. [B, 170.]

**ARCTOTIDEÆ** (Lat.), n. f. pl.  $A^3rk-to'ti^2d'e^2-e(a^3-e^2)$ . 1. Of Cassini, De Candolle, and others, a tribe of composite plants including the subdivisions *Arctoteæ* and *Gorterieæ*, or *Euarctoteæ*, *Gorterieæ*, and *Gründelieæ* [Bentham and Hooker]. 2. Of Reichenbach, the *Arctoteæ*. [B, 42, 170.]

**ARCTOTIS** (Lat.), n. f.  $A^3rk-to'ti^2s$ . A genus of composite plants growing at the Cape of Good Hope and sometimes cultivated in Europe. [B, 19.]

**ARCTOUS** (Lat.), n. m.  $A^3rk-to'u^3s(u^3s)$ . From ἀρκτός, northern. A section of the genus *Arctostaphylos*. [B, 215.]

**ARCTURA** (Lat.), n. f.  $A^3rk-tu^2(tu)^2ra^3$ . Fr., *arcture*. 1. The effects produced by an ingrowing nail. [Linnaeus (A, 301).] 2. See ARCTATION.—**A. unguis**, **A. unguis**. See A. (1st def.).

**ARCTURIA** (Lat.), n. f.  $A^3rk-tu^2(tu)^2ri^2a^3$ . A section of the genus *Drosera*. [B, 19.]

**ARCTURIN**, n.  $A^3rk-tu^2(tu)^2ri^2n$ . Fr., *arcturine*. A bitter substance derived from arbutin. [L, 124.]

**ARCTURUS** (Lat.), n. m.  $A^3rk-tu^2(tu)^2ru^3s(ru^3s)$ . Gr., ἀρκτοῦρος. 1. A plant mentioned by Dioscorides as related to the *Verbascum thapsus*; probably a species of *Celsia*. [B, 121.] 2. A genus of scrophulariaceous plants made by Bentham from the genus *Celsia*, including the species in which the anthers are attached by their centre. [B, 19.]—**A. creticus**. See *Celsia cretica*.

**ARCTUVEIN**, **ARCTUVIN**, n's.  $A^3rk-tu^2ve^2-i^2n$ ,  $-tu^2vi^2n$ . Lat., *arctuinum*. A substance obtained by the action of boiling sulphuric acid on arbutin. [A, 306.]

**ARCUAL** (Fr.), n., adj.  $A^3r-ku^6-a^3l$ . Bent, arched; as a n., the arch of a vertebra. [L, 124.]

**ARCUALIS** (Lat.), adj.  $A^3r-ku^2(ku)-a(a^3)/li^2s$ . Fr., *arcual*. See ARCTATE. Bent, curved. [L, 53.] See *Ossa arcualia* and *SUTURA a*.

**ARCULATE**, adj.  $A^3r-ku^2-at$ . Lat., *arcuatus*. Fr., *arcué*, *arqué*. Ger., *Bogenförmig*. Bow-shaped. [B.]

**ARCUTED**, adj.  $A^3r-ku^2a-te^2d$ . Lat., *arcuatus*. Arched. [B.]

**ARCUTILE**, adj.  $A^3r-ku^2a-ti^2l$ . Lat., *arcuatus*. See ARCTATE.

**ARCUTION**, n.  $A^3rk-u^2-a'shu^3n$ . Lat., *arcutio*. Fr., *arcuation*. Ger., *Krümmung*. It., *arcuazione*. Sp., *arcuación*. 1. A deformity due to forward convexity of the sternum. [Avicenna (A, 53).] 2. A rhachitic or other curvature of any bone. [A, 385.] 3. An old term for the propagation of plants by layering. [L, 108.]

**ARCUTUS** (Lat.), adj.  $A^3r-ku^2(ku)-a(a^3)/tu^3s(tu^3s)$ . 1. See ARCTATE. 2. See MORBUS a.

**ARCUE** (Fr.), adj.  $A^3r-ku^6-a$ . See ARCTATE.

**ARCULA** (Lat.), n. f.  $A^3r-ku^2(ku)-la^3$ . The orbit. [L, 84.]—**A. cordis**. The pericardium. [L, 63.]

**ARCULUS** (Lat.), n. m.  $A^3r-ku^2(ku)-lu^3s(lu^3s)$ . Dim. of *arcus*, a bow. Fr., *arceau*. Ger., *Bogenkörbchen*. It., *arcuccio*. An arched apparatus (commonly called a cradle) used to prevent the contact of the bed-clothes with a diseased or injured part and the suffocation of infants by those sleeping with them. [L, 43, 50.]

**ARCUS** (Lat.), n. m.  $A^3r-ku^3s(ku^3s)$ . See ARCH.—**A. adiposus**. See *A. senilis*.—**A. anastomoticus**. See *Anastomotica* ARCH.—**A. anterior atlantis**, **A. anterior vertebræ primæ colli**. See *Anterior* ARCH of the *atlantis*.—**A. aortæ**. See *Arch* of the *aorta*.—**A. arteriæ subclaviæ**. The curved portion of the subclavian artery. [L, 31.]—**A. arteriosus inferior**. The arterial arch on the greater curvature of the stomach formed by the union of the right and left gastro-epiploic arteries. [L, 31.]—**A. arteriosus superior**. The arterial arch on the lesser curvature of the stomach formed by the union of the right and left coronary arteries of the stomach. [L, 31.]—**A. atlantis anterior**. See *Anterior* ARCH of the *atlantis*.—**A. atlantis posterior**. See *Posterior* ARCH of the *atlantis*.—**A. axillares**. See *Axillary* ARCHES.—**A. brachialis**. See *Brachial* ARCH.—**A. branchiales**. See *Branchial* ARCHES and *Postoral* ARCHES.—**A. carpi dorsalis**. See *Posterior* carpal ARCH.—**A. cartilaginis cricoideæ**. The anterior arched portion of the cricoid cartilage. [L, 175.]—**A. coli intestini**. See *Transverse* COLON.—**A. cricothyroideus**. A curved artery lying across the crico-thyroid ligament, formed by the union of a branch from each superior thyroid artery. [Barkow (L, 31).]—**A. cruralis profundus**. See *Deep* crural ARCH.—**A. cruralis**. See *Poupart's* LIGAMENT.—**A. dentalis**. See *Dental* ARCH.—**A. dorsalis humeri posticus**. The anastomosis just above the olecranon fossa, between the superior profunda artery of the arm and the anastomotic artery of the arm. [L, 63.]—**A. dorsalis pedis superficialis**. Fr., *arcade dorsale du pied superficielle*. An arch formed by the veins uniting the superficial metatarsal veins. [L.]—**A. epiploicus magnus**. The network of the branches of the left gastro-epiploic artery which supply the walls of the stomach. [Barkow (L, 31).]—**A. faucium**. See *Arch* of the *palate*.—**A. glossopalatinus**. See *Arch* of the *palate*.—**A. iliius**. A branch of the renal artery which furnishes branches to the pelvis of the kidney. [Barkow (L, 31).]—**A. jugalis**. See *Zygomatic* ARCH.—**A. major ventriculi**. The greater curvature of the stomach. [L, 175.]—**A. malaris**. See *Zygomatic* ARCH.—**A. medullaris**. See *FORNIX*.—**A. minor ventriculi**. The lesser curvature of the stomach. [L,

174.]—**A. nervi hypoglossi**. The curve in the hypoglossal nerve as it crosses the carotid artery. [L, 63.]—**A. nervosus hemorrhoidalis**. Fr., *arcus nervosus hemorrhoidal*. It., *arco emorroidale*. The filaments connecting the inferior and superior hemorrhoidal plexuses. [L, 7.]—**A. ossium pubis**. See *Pubic* ARCH.—**A. palati**, **A. palati anterior**, **A. palatinus anterior**, **A. palatinus lingualis**. See *Arch* of the *palate*.—**A. palatinus posterior**. See *A. palato-pharyngeus*.—**A. palato-glossus**. See *Arch* of the *palate*.—**A. palato-pharyngeus**. The posterior pillars of the fauces. [L, 115.]—**A. palmaris contractus**. A contraction of the palmar fascia. [L, 63.]—**A. palmaris profundus**. See *Deep* palmar ARCH.—**A. palmaris superficialis**. See *Superficial* palmar ARCH.—**A. palpebralis inferior**. See *A. tarsus inferior*.—**A. palpebralis superior**. See *A. tarsus superior*.—**A. pharyngeus**. See *A. palato-pharyngeus*.—**A. plantaris**. See *Plantar* ARCH.—**A. plantaris profundus**. See *Deep* plantar ARCH.—**A. popliteus**. Fr., *arcade poplitée*. See *LIGAMENTUM popliteum arcuatum*.—**A. posterior atlantis**, **A. posterior vertebræ primæ colli**. See *Posterior* ARCH of the *atlantis*.—**A. pubis**. See *Pubic* ARCH.—**A. semicirculares temporales**. The anastomosing branches between the middle and deep temporal arteries. [L, 31.]—**A. senilis**. Fr., *arc senile*. Ger., *Greisenbogen*. It., Sp., *arco senile*. As most commonly used, the *a. senilis corneæ*.—**A. senilis corneæ**. Fr., *arc senile de la corneë*. Ger., *Greisenbogen*. A degeneration of the periphery of the cornea, consisting in a deposit of fatty granules in the tissue proper of the cornea, which comes on in old age, always affects both eyes simultaneously, and is usually most marked in the upper and lower segments of the cornea. [G.]—**A. senilis lentis**. Fr., *arc senile de la lentille*. Ger., *Greisenbogen der Linse*. It., *arco senile della lente*. Sp., *arco senile de la lente*. Syn.: *gerontoxon lentis*, *incipient cataract*. Certain bifurcated linear opacities in the equatorial portions of the lens, occurring in persons of or past middle age. They may exist for years unchanged. [F.]—**A. subpubicus**. See *Pubic* ARCH.—**A. superciliaris**. See *Superciliary* RIDGE.—**A. superficialis volæ**. See *Superficial* palmar ARCH.—**A. supraorbitalis**. See *Supra-orbital* ARCH.—**A. tarsal inferior**. See *A. tarsus inferior*.—**A. tarsal superior**. See *A. tarsus superior*.—**A. tarsus**. See *A. dorsalis pedis*.—**A. tarsus inferior**. Fr., *arcade palpébrale inférieure*. Ger., *unterer Augenlidbogen*. A curved vessel lying between the tarsal cartilage and the orbicular muscle on the free border of the lower eyelid, formed by the union of a branch of the inferior palpebral artery and the palpebral branch of the nasal artery. [L, 7.]—**A. tarsus superior**. Fr., *arcade palpébrale supérieure*. Ger., *oberer Augenlidbogen*. The communicating branch between the superior palpebral artery and the palpebral branch of the lacrimal artery. [L, 7.]—**A. tendineus fasciæ pelvis**. A thickening of the pelvic fascia, at a level with a line extending from the lower part of the symphysis pubis to the spine of the ischium, to which the levator ani muscle is attached. [L, 7.]—**A. thyreo-cartilagineus**. A communicating branch, at about the level of the angle of the thyroid cartilage, between the superior thyroid arteries of the two sides. [L, 31.]—**A. thyroglanularis intralobularis**. The arterial anastomosis within the thyroid gland. [L, 31.]—**A. thyroglanularis lobularis lateralis**. An anastomosis between the superior and inferior thyroid arteries of the same side. [L, 31.]—**A. thyroglanularis marginalis inferior**. An arterial anastomosis sometimes seen immediately below the thyroid gland. [L, 31.]—**A. thyroglanularis marginalis superior**. An occasional artery lying at the upper border of the thyroid gland. [L, 31.]—**A. thyroglanularis marginalis superior cruciatus**. A communicating branch between the superior thyroid artery of one side and the inferior artery of the other side. [L, 31.]—**A. thyroglanularis marginalis superior simplex**. See *A. thyroglanularis marginalis superior*.—**A. thyroglanularis medius**. An artery sometimes found lying across the middle of the thyroid gland. [L, 31.]—**A. tonsillaris**. See *ISTHMUS of the fauces*.—**A. trachealis anterior**. The communicating branches of the inferior thyroid arteries lying across the trachea. [L, 31.]—**A. ungium**. See *LUNULA*.—**A. venosi digitales**. Venous arches on the dorsum of the first phalanges of the fingers. [L, 117.]—**A. venosus juguli**. A connecting branch between the two anterior jugular veins. [A, 451.]—**A. venosus marginalis**. A venous network on the radial side of the index finger or the ulnar side of the little finger. [L, 117.]—**A. vertebralis**. See *Vertebral* ARCH.—**A. volaris carpi venosus profundus**. The venous network corresponding to the deep palmar arch. [L, 175.]—**A. volaris carpi venosus sublimis**. A venous network in the palm of the hand corresponding to the superficial palmar arch. [L, 175.]—**A. volaris profundus**. See *Deep* palmar ARCH.—**A. volaris sublimis**, **A. volaris superficialis**. See *Superficial* palmar ARCH.—**A. zygomaticus**. See *Zygomatic* ARCH.

**ARCYDES** (Lat.), n. f. pl.  $A^3r-si^2(ku^6)-dez(de^2s)$ . A family of the *Araneida*. [Cambridge (B, 77).]

**ARCYRIA** (Lat.), n. f.  $A^3r-si^2r(ku^6r)/i^2a^3$ . A species of low organisms, variously regarded as of animal and of vegetable nature, belonging to the class *Myxomycetes*, order *Calonemææ*. [B, 76.]

THE ARCYRIA INCARNATA. (AFTER CAUVET.)

A, the closed sporangium; B, the open sporangium (EP), with its capillium (SP).

**ARCYPHYTUM** (Lat.), n. n.  $A^3r\text{-}si^2(ku^6)\text{-}tho^2f'i^2t(u^6t)\text{-}u^3m(u^6m)$ . From *ἀρεῦθος*, the juniper, and *φύτον*, a plant. Of Necker, a genus (= order) of plants including the species (= genera) *Ligustrum*, *Nyctanthes*, *Phyllirea*, *Chionanthus*, *Jasminum*, *Lycium*, *Ilex*, *Myrsine*, *Alstonia*, *Strudmos*, *Atropa*, *Mandrazora*, *Physalis*, *Achras*, *Prinos*, *Styrax*, and others, now referred to distinct orders. [B, 170.]

**ARDA** (Lat.), n. f.  $A^3r\text{-}da^2$ . Gr., *ἄρδα*. See **ARDALOS**.

**ARDABAR**, n. A species of *Arum*. [L, 84.]

**ARDAFIANI**, n. The *Zygophyllum fabago*. [Avicenna (B, 121).]

**ARDALES** (Sp.), n.  $A^3r\text{-}da^3le^2s$ . The situation of several sulphurous springs in Andalusia. [L, 124.]

**ARDALOS** (Lat.), adj. Gr., *ἀρδαλος* (from *ἀρδαλοῦσθαι*, to soil). Soiled, dirty; as a n., filth, sordes. [Hippocrates (A, 325).]

**ARDANYHÁZA**, n. A mineral spring in Langenau, Hungary. [L, 184.]

**ARDAS** (Lat.), n. f.  $A^3r\text{-}da^2s(da^3s)$ . Gr., *ἄρδας*. See **ARDALOS**.

**ARDEA** (Lat.), n. f.  $A^3r\text{-}de^2a^3$ . Gr., *ἀρδιός*. A genus of birds of the division *Ardeidae*, including the herons. [A, 359]—**A. ciconia** [Linnaeus]. See *Ciconia alba*.—**A. cinerea** [Meyer]. Gr., *γενεῖν* *Reiher*, *Fischreiher*. The heron, a European bird furnishing *axungia ardeae*. [B, 180.]—**A. grus**. The crane; its bile was formerly used as an application to wounds, and the dried head and eyes for fistulae and ulcers. [L, 105.]—**A. major** [Gmelin]. See *A. cinerea*.—**A. stellaris**. The bittern; its burned skin and feathers were formerly used to stop hemorrhages. [L, 94.]—**Axungia ardeae**. Gr., *Reiherfett*. Heron's fat; it was formerly used to relieve the pains of gout, for removing specks from the eyes, and for curing deafness. [L, 94.]

**ARDEIDE** (Lat.), n. f. pl.  $A^3r\text{-}de(da)^2i^2d\text{-}e(a^3\text{-}e^2)$ . From *ardea*, a heron. A division of birds of the family *Culirostres*, order *Gratolates*. [A, 359.]

**ARDELLE** (Lat.), n. f. pl.  $A^3r\text{-}de^2l\text{-}le(la^3\text{-}e^2)$ . The small dust-like apothecia of certain lichens. [L, 63.]

**ARDEL ODOGAM** (Tamil). See *JUSTICIA bivalvis*.

**ARDENE** (Fr.), n.  $A^3r\text{-}de^2n$ . The *Melampyrum*. [B, 121.]

**ARDENJOU** (Hind.), n. The *Wrightia antidysenterica*. [B, 172.]

**ARDENT**, adj.  $A^3r\text{-}de^2nt$ . Gr., *καυσώδης*. Lat., *ardens* (from *ardere*, to burn). Fr., *ardent*. Ger., *brennend*. It., *ardente*. Sp., *ardiente*. Causing or accompanied by a sensation of burning. [L]

**ARDENZA** (It.), n.  $A^3r\text{-}de^2nd\text{-}za^3$ . A sea-bathing station near Livorno. [L, 57.]

**ARDES** (Fr.), n.  $A^3rd$ . A town in the department of Puy-de-Dôme, France, having carbonated chalybeate springs. [L, 57.]

**ARDESIA HIBERNICA** (Lat.), n. f.  $A^3r\text{-}de(da)^2i^2z\text{-}si^2s(a^3\text{-}e^2)\text{-}hi^2he\text{-}bu^6rn(bu^6rn)^2i^2k\text{-}a^3$ . See *LAPIS HIBERNICUS*.

**ARDEUR** (Fr.), n.  $A^3r\text{-}du^6r$ . See **ARDOR**.—**A. de la fièvre**. See *ARDOR febrilis*. **A. d'estomac**. **A. du cœur**. See *PYROSIS*.—**A. d'urine**. See *ARDOR urinae*.—**A. du ventricule**. See *PYROSIS*.

**ARDIFRIGI** (Ar.), n. The *Zygophyllum fabago*. [Avicenna (L, 105).]

**ARDIOTHERA** (Lat.), n. f.  $A^3r\text{-}di^2o\text{-}the(tha)^2ra^3$ . Gr., *ἀρδιοθήρα* (from *ἄρδις*, an arrow-point). An ancient forceps for extracting arrow-heads, etc. [A, 311.]

**ARDISIA** (Lat.), n. f.  $A^3r\text{-}di^2s\text{-}i^2a^3$ . From *ἄρδις*, a spear-point, on account of the shape of the anthers. Fr., *ardisie*. Ger., *Spitzblume*. A genus of ardisiaceous plants, established by Swartz. [B.]—**A. basal** [Poiret]. See *EMBELIA basal*.—**A. humilis** [Vahl]. A species the inspissated juice of which is used in India in fevers. [H. Baillon (L, 87).]—**A. tsjeriam-cottam** [Römer and Schultes]. See *EMBELIA tsjeriam-cottam*. [B, 180.]

**ARDISIACEÆ** (Lat.), n. f. pl.  $A^3r\text{-}di^2s\text{-}i^2a^3(a^3\text{-}a^3)\text{-}se^2(ke^2)\text{-}e(a^3\text{-}e^2)$ . From *Ardisia*, one of the genera. The ardisiads; a family of monopetalous plants, made by Jussieu, including *Ardisia* and *Myrsine*. By Reichenbach it was regarded as a family of the *Sapotaceæ* and divided into the *Trientalæ*, *Myrsinæ*, and *Theophrustæ*; by Bartling and Spach it was referred to the order *Myrsinæ* and was divided into the *Ardisiæ*, *Theophrastæ*, and, according to Bartling, into the *Embeliæ*. [B, 170.]

**ARDISIACEOUS**, adj.  $A^3r\text{-}di^2s\text{-}i^2a^3\text{-}shu^2s$ . Resembling *Ardisia*; of or pertaining to the *Ardisiaceæ*. [B.]

**ARDISIADS**, n. pl.  $A^3r\text{-}di^2s\text{-}i^2a^3dz$ . See **ARDISIACEÆ**.

**ARDISIEÆ** (Lat.), n. f. pl.  $A^3r\text{-}di^2s\text{-}i^2e(e)^2e^2\text{-}e(a^3\text{-}e^2)$ . A division of myrsineous (sapotaceous) plants belonging to the family *Ardisiaceæ*, made by Bartling, Spach, and others, comprising *Myrsine*, *Ardisia*, and other genera, including in some classifications genera classed among the *Embeliæ*. [B, 170.]

**ARDMORE**, n.  $A^3rd\text{-}mor$ . A village on the west coast of Ireland with excellent sea bathing. [L, 57.]

**ARDOR** (Lat.), n.  $A^3r\text{-}do^2r$ . Gen., *ardo^2ris*. From *ardere*, to burn. Gr., *καῖμα*. Fr., *ardeur*. Ger., *Hitze*, *Brennen*. It., *ardore*. Sp., *ardor*. 1. A sensation of burning or heat. [L, 83.] 2. Pain. [A, 318.]—**A. febrilis**. Fr., *ardeur de la fièvre*. The heat of fever. [M.]—**A. stomachi**. Fr., *ardeur de l'estomac*. Ger., *Magenbrennen*, *Sodbrennen*. See *PYROSIS*.—**A. urinae**. Fr., *ardeur de l'urine*. Ger., *Harnbrennen*. A burning sensation in the urethra during or after the passage of urine. [A, 385.]—**A. venereus**. 1. Rut. 2. Inordinate sexual desire. [M, 63.]—**A. ventriculi**. See *PYROSIS*.—**A. volaticus**. A redness and heat of the head and face, without other symptoms, lasting at the longest but four days. [L, 132.]

**ARDRAKA** (Sancr.), n. See *AMOMUM zingiber* and *ZINGIBER officinale*.

**ARDROSSAN**, n.  $A^3r\text{-}dro^2s\text{-}sa^3n$ . A sea-bathing resort in Scotland on the Firth of Clyde with a ferruginous spring. [L, 57.]

**ARDRUKUM** (Sancr.), n. See *ZINGIBER officinale*.

**ARDUINA**, **ARDUINIA** (Lat.), n's f.  $A^3r\text{-}du\text{-}e\text{-}na^3\text{-}i^2n\text{-}i^2a^3$ . From Arduini, an Italian botanist. A genus of plants now referred to *Carissa*. [B, 19.]—**A. bispinosa** [Linnaeus]. See *CARISSA arduina* and *CARISSA ferox*.—**A. grandiflora**. See *CARISSA grandiflora*.

**ARDUKUM** (Sancr.), n. The *Zingiber*. [B, 121.]

**ARDURE** (Fr.), n.  $A^3r\text{-}du^6r$ . A burn. [L, 109.]

**ARE** (Scot.), n.  $A^2r$ . See **EAR**.

**AREA** (Lat.), n. f.  $A(a^3)\text{-}re^2\text{-}a^3$ . Akin to *ἀλως*. Fr., *aire*. Ger., *Hof*, *Raum*, *offener Platz*. It., *area*. Sp., *área*. Lit., a vacant place. 1. A surface, district, or space, without reference to its size or shape. 2. As used by Celsus, a vacant space; hence, baldness in any of its varieties, including *alopecia* (that "spreads irregularly without assuming any particular form") and *ophiasis* (q. v.). Certain writers have erroneously regarded the a. of Celsus (a. *Celsi*) as synonymous with *alopecia areata*. [G, 13.] 3. In botany, the receptacle of *Fungi*. [Tode (B, 121).] 4. In entomology, see *AREOLA* (6th def.).—**Ambulacral a.** See *AMBULACRUM*.—**A. Celsi**. See *A. (2d def.)*.—**A. diffusus**. See *ALOPECIA areata*.—**A. embryonalis**. **A. germinativa**. See *EMBRYONIC a.*—**A. glandulosa**. Nees von Esenbeck's term for the semilunar granular cells surrounding the stomata of the epidermis of plants. [B, 198.]—**A. intercruralis**. The interpeduncular space of the brain. ["Science," Apr. 9, 1881, p. 165 (I, K).]—**A. Jonstoni**. See *ALOPECIA areata*.—**A'kokken** (Ger.). Certain micrococci that have been supposed to be peculiar to *alopecia areata*. [B.]—**A. lucida**. See *Transparent a.*—**A. maculeformis**. The vegetative filaments (hyphae) of *Hymenomyces* when aggregated into little masses. [B, 198.]—**A. mammae**. The areola surrounding the nipple.—**A. Martigiani**. The funnel-shaped opening of the hyaloid canal on the posterior surface of the vitreous body, facing toward the optic nerve, through which the hyaloid artery of the fetus runs. [F.]—**A. nummulata** [Squire]. *Alopecia areata* occurring in coin-shaped patches. [G.]—**A. obscura**. **A. opaca**. See *Opaque a.*—**A. ophiasis**. See *OPHIASIS*.—**A. optica**. The visual field. [L, 81.]—**A. pellucida**. See *Transparent a.*—**A. septalis**. See *Septal a.*—**A. serpens**. See *OPHIASIS*.—**A. serpiginosa** [Squire]. *Alopecia areata* with a tendency to spread at the periphery. [G.]—**A. tyria**. *Alopecia areata*. [G.]—**A. vasculosa**. See *Vascular a.*—**A. ventriculi quartil**. The floor of the fourth ventricle of the brain. [L, 115.]—**A. vitellina**. See *Vitelline a.*—**Auditory a.** Syn.: *psycho-acoustic centre*. According to Ferrier, an a. in the second primary convolution of the dog's brain, the destruction of which is followed by deafness in the opposite ear. [Landois (K).]—**Cohnheim's a's**. Fr., *champs de Cohnheim*. Ger., *Cohnheim'sche Felder*. Syn.: *Cohnheim's fields*. The polygonal a's, surrounded by clear lines, seen in the transverse section of a muscular fibre. According to Kölliker, they represent sections of the so-called muscle-columns or fibrils. [J, 30, 42.]—**Crypt a.** The a. surrounding an individual crypt in a collection of crypts, as on the surface of the uterine mucous membrane. [A, 11.]—**Embryonal a.**, **Embryonic a.** Lat., *a. embryonalis* (seu *germinativa*). Fr., *aire embryonnaire* (ou *germinative*). Ger., *Fruchthof*. Syn.: *germinal a.* (or *disc*). In the fecundated ovum of a mammal, the a. of an oval thickening or opacity of the central part of the blasto-

THE AREAS OF THE BLASTODERM. (FROM FLINT, AFTER LIÉGEIS.)

a, the primitive trace; b, the transparent area; c, the opaque area; d, the blastodermic cells; e, villi beginning to appear on the vitelline membrane.

derm, comprising the transparent a. and the opaque a. It subsequently becomes the vascular a. [A. Thomson (A, 5); A, 22.]—**Fetal a.**, **Germ-a.**, **Germinal a.** See *EMBRYONIC a.*—**Interambulacral a.** One of the lune-shaped segments upon the shell of an echinoderm interposed between two ambulacra. It contains no ambulacral tube-feet. [B, 28.] See *AMBULACRUM*.—**Intercalated a's**. See *Non-nucleated a's*.—**Middle lemniscus**. The

median region of the lemniscus as seen in cross-section. [E. C. Spitzka, "Med. Record," Oct. 25, 1884, p. 449 (I, K).]—**Motor a's.** See **MOTOR CENTRES**.—**Non-nucleated a's.** Ger., *kernlose Felder*.

THE VASCULAR AREA OF THE OVUM. (FROM FLINT, AFTER BISCHOFF.)  
a, a, b, the sinus terminalis; c, the omphalo-mesenteric vein; d, the heart; e, f, f, the posterior vertebral arteries.

*Schaltstücke.* Syn.: *intercalated a's.* The clear spaces sometimes found between the endothelial cells of blood-vessels. They are supposed to be due to the removal of portions of the surrounding endothelium, and are always without nuclei and smaller than an endothelial cell. [J, 35.]—**Ocular a.** The facial space occupied by the eyes in spiders. [B, 77.]—**Opaque a.** Lat., *a. opaca* (seu *obscura*). Fr., *aire obscure*. Ger., *dunkler Fruchthof*. The outer part of the embryonic a. after it has become thickened by the accumulation of formative elements derived from the yolk. [A. Thomson (A, 5).]—**Septal a.** Lat., *a. septalis*. The inner surface of each of the laminae which form the septum lucidum. [I, 13; K.]—**Subfrontal a.** The flattened anterior portion of the sternal surface of the *Xiphosura* (*Limulus*). [B, 100.]—**Transparent a.** Lat., *a. lucida* (seu *pellucida*). Fr., *aire transparente* (ou *claire*). Ger., *durchsichtiger Fruchthof*. Sp., *área pelúcida*. The thin central part of the embryonic a. of the ovum; so called from its being clear in comparison with the peripheral part.—**Vascular a.** Lat., *a. vasculosa*. Fr., *aire vasculaire*. Ger., *Gefässhof* (2d def.). Sp., *área vascular*. 1. The a. supplied by a particular artery. 2. In embryology, the embryonic a. after the primitive blood-vessels have formed. [A, 22.]—**Vitelline a.** Lat., *a. vitellina*. Fr., *aire vitelline*. Ger., *Dotterhof*. The outer surface of the vitelline membrane of the ovum, bordering on the opaque a.

**AREÆ** (Lat.), n. f. pl. A(a³)/re²-e(a³-e²). 1. Of Dumortier, a tribe of araceous plants including *Arum* and several other genera. [B, 170.] 2. Of Engler, a tribe of araceous plants of the suborder *Aroideæ*, corresponding to the *Euarineæ* and *Arisarceæ* of Benham and Hooker, comprising the subtribes *Arisarinæ*, *Sauromatineæ*, *Biarinæ*, and *Arinæ*. [Engler (B, 216).]

**AREALU** (Malay), n. The *Ficus religiosa*. [B, 172.]

**AREATUS** (Lat.), adj. A²r(a³r)-e²-a(a³)/tu³s(tu⁴s). In the form of patches. See **ALOPECIA areata**.

**AREC** (Fr.), n. A³-re²k. See **ARECA**.—**A. d'Amérique.** See **OREODOKA oleracea**.—**A. de l'Inde.** See **ARECA catechu**.—**A. poison.** The *Areca lutescens*. [B, 121.]—**A. singe.** The *Areca madagascariensis*. [L, 87.]—**Noix d'a.** See **ARECA nut**.

**ARECA** (Lat.), n. f. A²r(a³r)-e(a)/ka². Fr., *arec*, *arecque*, *aréquier*. Ger., *Arekapalme*. 1. A genus of lofty palmaceous trees bearing pinnate leaves with the stalk rolled into the form of a cylinder, and unisexual flowers on a branched spadix enveloped in a double spathe. 2. In the Fr. Ph., 1867, the a. nut. [B, 19.]—**A. alba** [Bory]. Fr., *palmiste blanc* (ou *commun*). Syn.: *Sublimia palmicavilis*. See **DICRYOSPERMA album**.—**A. americana.** See **A. oleracea**.—**A. Banksii** [Cunningham]. See **A. sapida**.—**A. betel** [Fée]. See **A. catechu**.—**A. catechu** [Linnaeus]. Fr., *arec de l'Inde*. Ger., *Katechupalme*, *Betelnusspalme*. The betel nut palm (the *pinang* of the Malays); a species growing in the East Indies, furnishing the a. (or betel) nut. The tree is cultivated extensively and in many varieties in the East Indies, especially in the neighborhood of the sea-coast. The spathes are used as vessels; the male flower has an exceedingly agreeable perfume, and is used as a medicine; the young leaves are eaten in the form of salad; and in Malabar intoxicating pastilles are made from the juice of the tree. [B. Franck (A, 304); B, 5, 33.] See also **A. nut**.—**A. crinita** [Bory]. Fr., *palmiste-bourre*, *ashe à bourre*. Syn.: *Sublimia cen-*

*tennina* [Commerson]. A species more properly referred to *Acanthophaenix*, growing in the Mascarene Islands. It has an edible top. [B, 188.]—**A. Dicksonii** [Roxburgh]. See **PTYCHOSPERMA**

*Dicksonii*.—**A. edulis.** See **ECTERPE edulis**.—**A. faufel** [Gärtner]. See **A. catechu**.—**A. glandiformis** [Lamarck]. A Moluccan species having properties and uses similar to those of *A. oleracea*. [B, 180.]—**A. globulifera** [Lamarck]. A species the fruit of which is used like that of *A. catechu*. [B, 180.]—**A. guvaca.** See **A. catechu**.—**A. humilis** [Willdenow]. A Moluccan species having properties and uses similar to those of *A. oleracea*. [B, 180.]—**A. indica.** See **A. catechu**.—**A. laxa** [Ham.]. A species growing in the Andaima Islands, the seeds of which are used like *A. catechu*. [B, 270.]—**A. lutescens** [Bory]. Fr., *arec-poison*. See **HYOPHORBE indica**.—**A. madagascariensis** [Martius]. Fr., *arec* (ou *arecque*) *singe*, *arbre à sel*. A species the oil obtained from which is used as an embrocation in gout and rheumatism. [B, 173.]—**A. nagensis** [Griff.]. A Bengal species, used like *A. catechu*. [B, 270.]—**A. nut.** Lat., *areca* [Br. Ph., 1867], *semen arecae*. Fr., *noix d'arec*. Ger., *Arekanuss*. It., *noce d'areca*. Syn.: *betel-nut* (because chewed with the leaf of the betel pepper). The nut of *A. catechu*; a drupe-like nut of about the size of a hen's egg, having a fibrous rind about half an inch thick inclosing the seed, which is about as large as a nutmeg. The nucleus, of a pale orange-color, contains 53 per cent. of fat and 30 per cent. of emulsin, together with sugar, catechu-tannic acid, catechin, gallic acid, and a red (q. v.). The nut is extensively used in the East as a masticatory, and is thought to improve digestion. It colors the tongue and lips scarlet, and in time renders the teeth perfectly black unless, as in China, care is taken to remove the stain. The nut is sliced and wrapped in the leaf of the betel pepper (*Piper betle*), and a little quicklime is added. The seed is astringent, and is reputed tonic and anti-periodic. It has been used in dropsical affections and as an anthelmintic. A fibrous material resembling oakum, but softer, obtained from the husk, has been

used in Ceylon as a dressing for wounds. [Stevenson, "Edinb. Med. Jour.," Feb., 1882 (A); A, 304, 327; B, 5; L, 75.] Cf. **AREKANE**.—**A. oleracea** [Linnaeus]. Fr., *arec d'Amérique*, *chou palmiste*, *arbre*

THE ARECA CATECHU. (AFTER B. FRANCK [A, 304].)

*au chou*. Ger., *Kohlpalme*. See **OREODOKA oleracea**.—**A. oryzæformis** [Rumphius]. See **PTYCHOSPERMA oryzæforme**.—**A. palm.**

See *A. catechu*.—**A. red.** Ger., *Arekaroth*. A brownish-red coloring matter found in the a-nut; odorless, tasteless, and insoluble in cold water. [B. Franck (A. 304).]—**A. rubra** [Bory]. Fr., *palmiste rouge*. A species more properly referred to *Acanthophaeniz*, growing in the Mascarene Islands. It resembles *A. crinita*. [B. 19, 188.]—**A. sapida** [Solander]. A New Zealand species having properties and uses like *A. oleracea*. [B. 180.]—**A. silvestris** [Loureiro]. A species used like *A. catechu*. [B. 270.]—**A. spicata** [Lamarck]. A

THE ARECA-NUT, ENTIRE AND IN SECTION. [A. 327.]

species growing in the Sunda Islands and Amboyna, which by some has been referred to the *Euterpe globosa* (*oleracea*), but which is probably distinct. [B. 188.]—**A. vestitaria** [Giseke]. A species growing in the Isle of Bourbon, from the bark of which a thin white thread is spun that is woven into durable cloth. [B. 188.]—**Nux areca**, *Seimen arecae*. See *A-nut*.

**ARECACEÆ** [Reichenbach] (Lat.), n. f. pl.  $A^2r(a^3r)-e^2k-a(a^3r)-se^2-e(a^3-e^2)$ . See ARECINÆ. 1. As defined by Benth and Hooker it comprises those with pinnatisect leaves, with segments reduplicate in venation; monocious or dioecious flowers; umbilicated seeds with a ventral raphae and a dorsally-placed embryo. It comprises the divisions *Euarceæ*, *Ptychospermeæ*, *Oncospermeæ*, *Iriarteæ*, *Wetteneæ*, *Linospadiceæ*, *Ceroxyleæ*, *Malorticeæ*, *Iguanureæ*, *Chamadoreæ*, *Geonomeæ*, and *Caryotideæ*. 2. A subtribe of the *Areceinæ* [Drude] comprising genera with a 3-carpeled, unilocular, 1-seeded ovary, and a 1-seeded baccate fruit having a thin (rarely woody) endocarp. [Drude (B. 245).]

**ARECA-GOLI** (Hind.), n. The *Ficus benjamina*. [B. 121.]

**ARECANE**, n. See AREKANE.

**ARECARIE** (Lat.), n. f. pl.  $A^2r(a^3r)-e^2k-a(a^3r)-ri^2-e(a^3-e^2)$ . A subdivision of palms, made by Reichenbach. [B. 170.]

**ARECEÆ** (Lat.), n. f. pl.  $A^2r(a^3r)-e^2s(ak^3)-e^2-e(a^3-e^2)$ . 1. A tribe of palmaceous plants, made by Lindley, comprising *Areca*, *Saguerus*, and other genera. [B. 170.] See ARECINÆ. 2. A subtribe of the *Areceinæ* [Drude] comprising genera with a 3-carpeled, unilocular, 1-seeded ovary, and a 1-seeded baccate fruit having a thin endocarp, rarely woody. [Drude (B. 245).]

**ARECHAULETA** (Sp.), n.  $A^3-ra^3-cha^3-sa^3-la^3-ta^3$ . A place in the province of Alva, Spain, where there are springs feebly sulphurous, ferruginous, and alkaline. [Rotureau (L. 87).]

**ARECIN**, n.  $A^2r-e^2si^2n$ . Fr., *arécine*. Ger., *Arecin*. See ARECA red.

**ARECINÆ** (Lat.), n. f. pl.  $A^2r(a^3r)-e^2s(e^2k)-in(en^3)-(a^3-e^2)$ . Fr., *arécinées*. Of Martius, Endlicher, Kunth, and others, a series or tribe of palmaceous plants, comprising *Areca* and other genera having the margins of the leaves depressed, declinous flowers, basilar embryo, and a trilobate, baccate, or drupaceous fruit. [B. 104, 170.]

**ARECINÆÆ** [Brongniart, Spach] (Lat.), n. f. pl.  $A^2r(a^3r)-e^2-si^2n(ki^2n)-e^2-e(a^3-e^2)$ . 1. See ARECINÆ. 2. A tribe of palms of the suborder *Ceroxyleinæ*, distinguished by the baccate fruit composed of carpels either grown together or separating after maturity. It comprises the subtribes *Caryotideæ*, *Geonomeæ*, *Iriarteæ*, *Morenieæ*, and *Areceæ*. [Drude (B. 245).]

**ARECQUE** (Fr.), n.  $A^3-re^2k$ . See AREC.

**AREFACTION**, n.  $A^2r-e^2fa^2k-shu^2n$ . Lat., *arefactio* (from *arefacere*, to make dry). Fr., *aréfaction*. Ger., *Dörren*. It, *arefazione*. Sp., *arefacción*. 1. The drying of a drug so that it may be reduced to a very fine powder. [L. 53.] 2. See ARIDURA.

**AREGMA** (Lat.), n. n.  $A^2r(a^3r)-e^2g^2ma^2$ . Gen., *aregmatos* (-tis). See FRAGMIDIUM.

**AREGON** (Lat.), n. m. and f.  $A^2r(a^3r)-e(a^3)-go^2n$ . Gen., *aregonos* (-nis). Gr., ἀργών from ἀργεῖν, to aid, an auxiliary. The name of a certain resolvent, relaxing, and attenuating ointment mentioned in several of the old dispensatories. [L. 51, 53.]

**AREGOS** (Sp.), n.  $A^3-ra^3-gos$ . A place in Spain, where there are hot sulphur springs. [B. 270.]

**AREKA** (Ger.), n.  $A^3-ra^3-ka^3$ . See ARECA.—**A'nuss**. See ARECA-nut.—**A'palme**. See ARECA.—**Kohitragende A**. See ARECA *oleracea*.

**AREKA** (Tamil), n. The *Bauhinia parviflora*. [B. 177.]

**AREKANE**, n.  $A^2r-e^2k-an$ . A colorless, volatile, oily alkaloid, smelling like weak bouillon and of a strong alkaline reaction, obtained by E. Bombalon from the areca-nut; said to increase the flow of saliva, retard the pulse, and act as a purgative. [“Lancet,” April 10, 1886, p. 709; “N. Y. Med. Jour.,” June 5, 1886, p. 650.]

**AREKEPA**, n. A Carib name for an undetermined species of *Cotula*. [B. 121.]

**AREMAROS**, n. An alchemical name for ciunabar. [B. 50.]

**ARENA** (Lat.), n. f.  $A^2r(a^3r)-e(a^3)-na^3$ . Sand.—**A. rubra**. A lateritious urinary deposit. [L. 53.]

**ARENACEOUS**, adj.  $A^2r-e^2n-a^3-shu^3s$ . Lat., *arenaceus* (from *arena*, sand). Fr., *arenacé*. Ger., *sandartig*. Sandy; made up of, containing, or resembling sand (said of the testa of certain of the Protozoa). [A. 385; B. 147.]

**ARENATRE** (Fr.), adj. and n.  $A^3-ra-na^2r$ . See ARENARIA and ARENARIOUS.

**ARENAMEL**, **ARENAMEN**, n's. Alchemical names for Armenian bole. [L. 53, 84.]

**ARENAPO** (It.), n.  $A^3-ra-na^2po$ . A place in Italy, where there is a cold sulphurous spring. [L. 124.]

**ARENARIA** (Lat.), n. f.  $A^2r(a^3r)-e^2n-a(a^3)-ri^2-a^3$ . Fr., *arén-aire*. Ger., *Sandkraut*. 1. Sandwort; a genus of Caryophyllaceae plants. 2. Generically, any plant which lives in the sand. [B. 121.]—**A. glandulosa** [Jacquin]. **A. marginata** [De Candolle]. See *A. media*.—**A. marina**. 1. Of Smith, see *A. media*. 2. Of Roth, a variety of *A. rubra*. [B.]—**A. maritima** [Linnaeus]. **A. media** [Linnaeus]. Species to be referred to *Spergularia* (q. v.). [B.]—**A. pepioides** [Linnaeus]. Syn.: *Honkeneya pepioides* [Ehrenberg]. A species the fermented juice of which furnishes a sort of food used by the Icelanders. [B. 173.]—**A. rubra**. Ger., *rothes Sandkraut*. It., *a. rossa*. See *SPERGULARIA rubra*.—**Radix arenariae**. The root of *Carex a.* and *Carex hirta*. [B. 180.]

**ARENARIE** (Lat.), n. f. pl.  $A^2r(a^3r)-e^2n-a(a^3)-ri^2-e(a^3-e^2)$ . 1. Sand-plants; plants growing in the sand. 2. Of Lamarck, a section of the *Caryophyllaceæ*. [B. 121, 170.] Cf. ARENARIA.

**ARENARIEÆ** (Lat.), n. f. pl.  $A^2r(a^3r)-e^2n-a^2r(a^3r)-i(e)-e^2-e(a^3-e^2)$ . Of Fenzl and others, a subtribe of Caryophyllaceae plants belonging to the *Stellariaceæ*, including *Arenaria*, *Holosteum*, *Stellaria*, etc. [B. 170.]

**ARENARINÆ** [Reichenbach] (Lat.), n. f. pl.  $A^2r(a^3r)-e^2n-a^2r(a^3r)-i(e)-ne(na^3-e^2)$ . See ARENARIEÆ.

**ARENARIOUS**, adj.  $A^2r-e^2n-a^3-ri^2-u^3s$ . Lat., *arenarius* (from *arena*, sand). Fr., *arenaire*. Growing in a sandy soil (said of plants). [B.]

**ARENARMEI**, **ARENARMEN**, n's. Alchemical names for Armenian bole. [B. 50.]

**ARENATION**, n.  $A^2r-e^2n-a^3-shu^3n$ . Gr., ψαμμισμός. Lat., *arenatio* (from *arena*, sand). Fr., *arénation*. Ger., *sandbad*. It., *arenazione*. Sp., *arenación*. The therapeutical application of heat, either by immersing a portion of the body in hot sand or by applying bags of the same. [A. 385; Andreas Baccius (L. 53).]

**AREND**, **ARENDI** (Hind.), n's. The *Ricinus communis*. [L.]

**AREDRANTE** (Fr.), n.  $A^3-ra^3n-dra^3nt$ . Syn.: *Gomme d'a.* Arindranto, a Madagascar resin, supposed by Bory to be a variety of anime resin. [L. 105.]

**ARENDSEE** (Ger.), n.  $A^3-re^2nd-za$ . A German town, on the lake of the same name, where there is a hydrotherapeutic establishment. [L. 124.]

**ARENGA** (Lat.), n. f.  $A^2r(a^3r)-e^2n^2-ga^3$ . From the native name, *areng*. A genus of palms of the *Areceæ*, subtribe *Euarceæ*, including lofty trees having bipinnatisect leaves, male flowers with 3 sepals and numerous stamens, and seeds with ruminated albumen. [B. 42.]—**A. saccharifera** [Labillardière]. Fr., *palmier condair*. Ger., *A.-Palme*. Syn.: *Palma indica vinaria secunda* [Rumphius], *Borassus gomutus* [Loureiro] (see *saccharifer* [Sprengel]), *Saguerus Rumphii* [Roxburgh] (see *gamuto* [Houttuyn]), *Caryota onusta* [Blanco]. The *contar*, or *cantar*, a species growing in the Moluccas, the Philippines, the Sunda Islands, and Cochinchina. A sort of sago is obtained from the pith, and a saccharine juice from the male spadices (furnishing a brown sugar called *gaula-itan*, which on fermentation affords an alcoholic beverage). From the petiolar fibrils ropes are made. The green fruit is made into a confection and eaten, and the ripe fruit furnishes a highly irritant juice, which causes intense itching when applied to the skin, and inflammation of the mucous membranes. It constituted the hell-water (*aqua infernalis*) used by the natives as a means of warfare. [B. 121, 188.]

**ARENICOLUS** (Lat.), adj.  $A^2r(a^3r)-e^2n-i^2k^3-o-lu^3s(lu^4s)$ . From *arena*, sand, and *colere*, to frequent. Fr., *arénicole*. Ger., *sandbewohnend*. In zoology, living in the sand. [A. 385; L. 109.]

**ARENIFEROUS**, adj.  $A^2r-e^2n-i^2f-e^2r-u^3s$ . From *arena*, sand, and *ferre*, to bear. Fr., *arénifère*. Ger., *sandtragend*. Containing or contaminated with sand. [A. 316.]

**ARENIFORM**, adj.  $A^2r-e^2n-i^2f-o^2rm$ . From *arena*, sand, and *forma*, form. Fr., *aréniforme*. Ger., *sandförmig*. Resembling sand. [L. 116.]

**ARENOSILLA** (Sp.), n.  $A^3-ra-no-sel^2ya^3$ . A place in the province of Cordova, Spain, where there are alkaline springs. [L. 49.]

**ARENOSUS** (Lat.), adj.  $A^2r(a^3r)-e^2n-o^3-su^3s(su^4s)$ . Fr., *arénieux*. Ger., *sandig*. Sp., *arenoso*. Sandy; as a n., a person who passes sandy urine (*urina arenosa*). [B. 145.]

**ARENSBERG** (Ger.), n.  $A^3-re^2ns-be^2rg$ . A bathing station on an island in the Baltic Sea. [A. 385; L. 49.]

**ARENTES** (Lat.), n. f. pl. of pres. particip. *arens* (*cucurbitule* understood).  $A^2r(a^3r)-e^2n^2-ez(e^2s)$ . Dry cups. [L. 84.]

**ARENULA** (Lat.), n. f., dim. of *arena*.  $A^2r(a^3r)-e^2n^2-u^2(u)-la^3$ . Fine sand. [L. 50.]

**ARENULACEOUS**, **ARENULOUS**, adj's.  $A^2r-e^2n^2-u^2-la^3-shu^3s$ ,  $-re^2n^2-lu^3s$ . Fr., *arenulacé*. Sp., *arenuláceo*. Sandy, gritty. [L. 73, 116.]

**AREOLA** (Lat.), n. f., dim. of *area* (q. v.).  $A^2r(a^2r)-e(a^0o)-la^3$ . Gr., *ἀλωρία*. Fr., *aréole*. Ger., *Hof*. It., *areola*. Sp., *areola*. Syn.: *halo*. 1. A zone of hyperemia or pigmentation (e. g., the circular blush surrounding a vaccinal lesion, the pigmented disc surrounding the nipple). [G.] 2. A space between adjacent constituents of organs or tissues, especially between the bundles and laminae of areolar tissue (q. v., under *Tissue*). [J.] 3. In botany, a cell-like pit or depression; an interspace in the cellular tissue of the leaves of mosses; one of the flat polygonal areas of which the crustacean thallus of some lichens is formed. [B, 198.] 4. The term was also applied by R. Brown to the cell nucleus. [J.] 5. In zoology, a scaly plate of a chelonian's shell. [L, 41.] 6. In entomology, the space between two adjacent nervures of the wing. [L, 49.]—**A. apicularis**, **A. basilaris**. Fr., *aréole apiculaire*, *aréole basilaire*. Names given by Cassini to the upper and lower extremities respectively in the rudimentary pericarp of the ovary in the *Compositae*. [B, 1.]—**A. embryonalis**. Ger., *Keimhof*. 1. See *Embryonic AREA*. 2. In botany, Richard's term for the depressed a. upon the exterior of the caryopsis indicating the site of the embryo. [B, 198.]—**A. inflammatoria**. See *Inflammatory a.*—**A. mammae**. See *A. of the breast*.—**A. of Chaussier**. An a. (1st def), surrounding a malignant pustule. [A, 452.]—**A. of the breast**, **A. of the nipple**. Lat., *a. mammae* (seu *papillae*). Fr., *aréole* (ou *aréole*) *de la mamelle* (ou *du mamelon*). Ger., *Warzenhof*, *Brustwarzenhof*. It., *a. del capezolo*. A circular area, usually from an inch to an inch and a half in diameter, surrounding the nipple; of a pink color (varying somewhat with the complexion) in healthy women who are not pregnant; provided with from ten to twenty visible sebaceous follicles. During pregnancy, and sometimes in consequence of uterine disease, it becomes darker in color, occasionally almost black, and somewhat raised above the surrounding skin, and the follicles are enlarged and moisten its surface with their secretion. [A, 22.] Cf. *Secondary a.*—**A. ovarifera**. Fr., *aréole ovarifère*. Cassini's name for one of the small depressions upon the clinanthium in the *Compositae* corresponding to the areolae basillares of the ovaries. [B, 1.]—**A. papillae**, **A. papillaris**. See *A. of the breast*.—**A. umbilicalis**. A dark disc of pigmentation occasionally formed around the navel during pregnancy, from which a brown streak, about  $\frac{1}{2}$  inch wide, runs down toward the pubes. [A, 126.]—**Inflammatory a.** Lat., *a. inflammatoria*. Fr., *aréole inflammatoire*. Ger., *entzündlicher Ring*. A circle of redness surrounding an inflamed point. [L, 44.]—**Primary areolae**. Syn.: *primary marrow cavities*, *small medullary spaces*. Sharpey's term for the cell-spaces in the calcified matrix of an ossifying cartilage-bone which are still occupied by the cartilage cells, either singly or in groups. [J, 30.]—**Secondary a.** Fr., *aréole secondaire*. The spotted peripheral portion of the a. of the breast, or a spotted appearance around it, sometimes formed during the latter part of pregnancy, looking "as if the color had been discharged by a shower of drops." [Montgomery (A, 22); A, 38.]—**Secondary areolae**. Syn.: *large medullary spaces*. Sharpey's term for the comparatively large spaces in an ossifying cartilage-bone which result from the absorption of the partitions between the primary areolae, the spaces becoming filled at the same time with embryonic marrow. [J, 30.]—**True a.** Fr., *aréole vraie*. The central portion of the a. of the breast, containing a great number of sebaceous glands. [A, 38.]—**Vaccinal a.** Fr., *aréole vaccinale*. A ring-shaped redness of the skin which forms around a vaccinal pock, usually on the eighth or ninth day, and fades from the centre toward the border.

**AREOLAR**, adj.  $A^2r-e^0o-la^2r$ . Lat., *areolaris*. Fr., *aréolaire*. Ger., *areolär*, *maschig*, *zellig*. It., *areolare*. Sp., *areolar*. Having or pertaining to areolae or spaces, or pertaining to a tissue or part containing interspaces (see *A. TISSUE*). [J.]

**AREOLATE**, **AREOLATED**, adj's.  $A^2r-e^0o-lat$ ,  $-lat-e^2d$ . Lat., *areolatus*. Fr., *aréolé*. Ger., *gefleht*. Divided into or containing depressed areas (areolae). [B, 1.]

**AREOLATION**, n.  $A^2r-e^0o-la^2shu^2n$ . Fr., *aréolation*. The state of being or the process of becoming areolar or areolate. [L, 41, 56.]

**AREOLUS** (Lat.), n. m.  $A^2r(a^2r)-e(a^0o)-lu^2s(lu^2s)$ . See *AREOLA*.  
**AREOMETER**, n.  $A^2r-e^0o^2m^2et-u^2r$ . See *AREOMETER* and *HYDROMETER*.

**AREOMETRY**, n.  $A^2r-e^0o^2m^2et-ri^2$ . See *HYDROMETRY*.

**AREOTIC**, adj.  $A^2r-e^0o^2t^2ik$ . See *AREOTIC*.

**ARÉQUIER** (Fr.), n.  $A^2r-a-ke-a$ . See *ARECA*.

**AREREH**, n. See *CASSIA a*.

**ARES** (Lat.), n. m.  $A(a^2y)rez(re^2s)$ . Gen., *A'reos* (-ris). Gr., *Ἄρης*. Lit., the god Mars; a name given by the ancients to various metals, also to a pestilence and to a mortal wound. [A, 311, 322.]

**ARES**, n. A word employed by Paracelsus to designate a subtle force akin to (or, according to some, including) the *archæus* (q. v.). [L, 53.]

**ARÉS** (Fr.), n.  $A^3-ra$ . A sea-bathing station in the Gironde. [L, 57.]

**ARESFATU** (Ar.). n. The patella. [J. Hyrtl, quoted by F. B. Stephenson, "N. Y. Med. Jour.," July 24, 1886, p. 92.]

**ARETE** (Lat.), n. f.  $A^2r(a^2r)-e^2t-e(a)$ . Gr., *ἀρετή*. Bodily vigor. [Hippocrates (L, 53).]

**ARÊTE** (Fr.), n.  $A^3r-e^2t$ . 1. An edge formed by the intersection of two planes. [B; I, 39; K.] See *ACIES*. 2. See *ARISTA*. 3. Any one of the component parts of the skeleton of a fish. [A, 385.]—**Grande a.** The vertebral column of a fish. [L, 32.]

**ARETHUSA** (Lat.), n. f.  $A^2r(a^2r)-e^2thu^2(thu^2)sa^2$ . A genus of orchidaceous plants. [B.]—**A. bulbosa** [Linnaeus]. A North American species, the root-tubers of which are used as an application for the relief of toothache and for hastening the maturation of abscesses. [B, 180.]

**ARETHUSEÆ** (Lat.), n. f. pl.  $A^2r(a^2r)-e^2thu^2(thu^2)se^2-e(a^2e^2)$ . A tribe of orchidaceous plants distinguished by the powdery pollen and the single terminal opercular anther. [B, 19.]

**ARETOS** (Lat.), n. m.  $A^2r(a^2r)-e^2t-o^2s$ . From *ἀρετή*, virtue. See *VERBASCUM blattaria*.

**ARETTI** (Teloogoo), n. The *Musa sapientum*. [B, 172.]

**AREUS** (Lat.), adj.  $A^2r(a^2r)-e(a^0u^2s(u^2s))$ . Gr., *Ἄρειος*. Lit., pertaining to Mars; the title of a pessary mentioned by Paulus Ægineta. [L, 104.]

**AREZZO** (It.), n.  $A^3-re^2t^2so$ . A town in Tuscany, where there are several springs containing sodium and calcium carbonates. [L, 57.]

**AREAR**, n. An alchemical name for arsenic. [B, 50.]

**ARGAL**, n.  $A^3r-ga^2l$ . Written also *argol* and *orgal*. From *argilla*, clay. The commercial name of crude tartar as taken from the sides of wine-casks. [B, 2.]

**ARGALIE** (Fr.), n.  $A^3r-ga^2l-e$ . See *HIBISCUS abelmoschus* and *Semen ABELMOSCHI*.

**ARGALOU** (Fr.), n.  $A^3r-ga^2l-u$ . A name given in different parts of France to the *Paliurus aculeatus*, the *Lycium europæum*, and the *Rhamnus cathartica*. [B, 121.]

**ARGAN**, n. See *ARGANIA*.—**A. baum** (Ger.), **A. de Maroc** (Fr.). See *ARGANIA sideroxyton*.—**A. oil**. The oil of *Argania sideroxyton* (q. v.). [B.]

**ARGANIA** (Lat.), n. f.  $A^2r-ga(ga^2y)ni^2a^2$ . From Ar., *arjân*. Fr., *argan*, *arganie*. A genus of sapotaceous plants, having 10 sepals arranged in a double row; 10 stamens, 5 abortive, forming scales placed upon the throat of the corolla, and 5 fertile; and an awl-shaped style. [A, 385; B, 19.]—**A. sideroxyton** [Römer and Schultes]. Ger., *Arganbaum*. Syn.: *Sideroxyton spinosum* [Linnaeus], *Eleodendron a.* [Retzius]. The argan-tree, an evergreen tree growing in Morocco, distinguished by the large girth and small height of its spiny trunk. The drupaceous, egg-shaped fruit is eaten by cattle, and the hard seeds furnish a fixed oil which is used as a substitute for olive-oil. The wood is very hard and heavy. [B, 19, 180.]

**ARGAS** (Lat.), n. m.  $A^3r-ga^2s(ga^2s)$ . A genus of parasitic insects of the order *Acarina*, class *Arachnoidea*, resembling the ticks. [B, 27; G; Packard (L).]—**A. americanus**. Syn.: *Amblomma americanum* [Koch]. A species found in South America; it attacks the skin, causing intense irritation, which, it is said, is sometimes so severe as to cause death. [G.]—**A. chincha** [Gondet]. Fr., *a. chinche*. A species found in Colombia by Gondet. [B.]—**A. de Fischer** (Fr.). Supposed to be the same as the *A. Savignyi*. [L, 183.]—**A. mauritanicus** [Guérin]. Fr., *a. de Maurice*. A variety very similar to the *A. reflexus*, found in the Mauritius. [L, 183.]—**A. monbouta** [Murray]. An Angola species, oblong, coriaceous, resembling slate or shark's skin, speckled with white. It attacks man and the lower animals. [L, 205.]—**A. persicus** [Fischer]. Pers., *malleh*. Fr., *a. de Perse*, *punaïse de Miana*. A species indigenous to Persia and Egypt, from 4 to 6 mm. long, pear-shaped, brownish-red in color, with white indentations on the back. It attacks man at night, sucking the blood and, it is said, causing very alarming symptoms, and even death. [B, 27; G.]—**A. reflexus** [Latreille]. A species from 45 to 65 mm. long, of a rusty-yellow color. It lives in crevices or other secluded places during the day, and attacks birds or man at night. Its bite causes an intense itching, which may last for a very long time. [B, 27.]—**A. Savignyi** [P. Gervaise]. Fr., *a. de Savigny*. A species differing from *A. persicus* by the posterior extremity being more decidedly oval than the anterior. [L, 183.]—**A. Talaje** [Guérin]. A species that infests houses in Central America. It is from 2 to 7 mm. long and nocturnal in its habits. Its bite produces a painful oedematous swelling. [B, 27.]—**A. Tholozani** [Laboulière and Méginn]. A species indigenous to Persia. The male is from 4 to 5 mm. long and from 2 to 3 mm. broad, the female twice as large each way. It is of a brownish color, rectangular in shape, with a pointed anterior and a rounded posterior extremity. [B, 27.]

**ARGAULE** (Fr.), n.  $A^3r-gol$ . The *Hirundo esculenta*. [A, 385.]  
**ARGEL**, n.  $A^3r-gel$ . See *SOLENOTEMMA argel* and *GOMPHOCARPUS fruticosus*.

**ARGELIA** (Lat.), n. f.  $A^3r-jel^2(jel^2)u^2a^2$ . A genus of plants made by Decaisne out of *Solenostemma* (q. v.). [B, 121.]—**A. Delilei** [Decaisne]. See *SOLENOTEMMA argel*.

**ARGEMA**, **ARGEMON** (Lat.), n's n.  $A^3r-jel^2m^2ge^2m^2a^2$ ,  $-o^2n$ . Gen., *argematos* (-tis), *ar'gemi*. Gr., *ἀργεμα*, *ἀργεμον*. Fr., *argéma*, *argémon*. Ancient names for a white spot at the margin of the cornea, due to superficial ulceration following a phlyctenula. [A, 385; Vogel (D, 100).]

**ARGEMONE** (Lat.), n. f.  $A^3r-jel^2m^2ge^2m^2o-ne(na)$ . Gr., *ἀργεμών* (from some plant of the genus having been used as a remedy for argemon [q. v.]). Fr., *argemone*. A genus of annual papaveraceous herbs. [B, 34.]—**A. mexicana** [Linnaeus]. Fr., *argémone* (ou *pavot*) *de Mexique*, *pavot épineux*, *figue infernale*, *chardon béni* des Antilles. Ger., *Stachetmohn*, *Teufelsfeige*, *Doppelklappe*. Syn.: *Papaver spinosum* (C. Bauhin). The prickly poppy; a species indigenous to the southern and western United States, naturalized in the Northern States, having a stalk from 2 to 3 feet high, which, with the calyx and the capsule, is covered with prickles. The flowers have been used as a hypnotic, and the milky juice is said to contain morphine. The seeds yield a purgative oil similar to castor-oil. [A, 321; B, 34.]

**ARGEMONEÆ** (Lat.), n. f. pl.  $A^3r-jel^2m^2ge^2m^2mo-ne^2e(a^2e^2)$ . A tribe of papaveraceous plants, made by Endlicher, including those with reddish-yellow juice. [B, 121.]

**ARGEMONIA** (Lat.), n. f.  $A^3r-jel^2m^2ge^2m^2o-ni^2a^2$ . According to Celsus, the wild poppy (*Papaver argemone*), anciently used as an antidote to snake-bites. [B, 45.]

**ARGEMONRÖSLEIN** (Ger.), n.  $A^3r'ge^2m-on-ru^5s/lin$ . See **PAPAVER argemone**.

**ARGEMOS** (Lat.), n. m.  $A^3r'je^2m(ge^2m)-o^2s$ . Gr., ἀργεμος. See **ARGEMON**.

**ARGENÇON** (Fr.), **ARGENSON** (Fr.), n's.  $A^3r-zha^3n^2-so^2n^2$ . A place near Gap, in the department of the Hautes-Alpes, France, where there is a cold acidulous spring, said to contain iron and carbon dioxide, and having aperient properties, called *Fontaine de Saint-Pierre*, or *Fontaine Vineuse*. [B, 88.]

**ARGENT** (Fr.), n.  $A^3r-zha^3n^2$ . Silver. [B.]—**Acétate d'a.** See **SILVER acetate**.—**Acétylure d'a.** See **SILVER acetylure**.—**Aconitate d'a.** See **SILVER aconitate**.—**Acrylate d'a.** See **SILVER acrylate**.—**Adipate d'a.** See **SILVER adipate**.—**Albuminate d'a.** See **SILVER albuminate**.—**Alun d'a.** See **SILVER ALUM**.—**Amalgame d'a.** See **SILVER amalgam**.—**Amidosulfonate d'a.** See **SILVER amidosulfonate**.—**Ammoniochlorure d'a.** See **SILVER ammoniochloride**.—**Ammonio-nitrate d'a.** See **SILVER ammonio-nitrate**.—**Ammonium d'a.** See **SILVER fulminate**.—**Antimonure d'a.** See **SILVER antimonide**.—**Ara-chidate d'a.** See **SILVER arachidate**.—**A. amalgamé.** See **SILVER amalgam**.—**A. anglais.** An alloy resembling argentan. [B, 38.]—**A. antimonlé sulfuré.** Argyrithrose, or native silver thioantimonite. [B, 38.]—**A. applati.** See **A. en lame**.—**A. ardent.** Metallic silver obtained by decomposing silver nitrate on hot charcoal. [B, 38.]—**A. arsenical.** A native arsenide of silver. [B, 38.]—**A. battu.** Silver-leaf. [B, 38.]—**A. blanc.** Argentiferous lead ore. [B, 38.]—**A. bromuré.** See **SILVER bromide**.—**A. carbonaté.** Silver carbonate. [B, 38.]—**A. chinois.** China silver. [B, 38.]—**A. chloruré.** See **SILVER chloride**.—**A. corné.** Horn-silver. [B, 38.]—**A. décoloré.** Powdered silver obtained from the liquids used in gold refining. [B, 38.]—**A. de mosaïque.** See **Mosaic SILVER**.—**A. détonant.** See **Fulminating SILVER**.—**A. du roi.** See **ARGENTUM regis**.—**A. en coquille.** See **Shell SILVER**.—**A. en feuilles.** Silver-leaf. [B, 38.]—**A. en lames.** Silver in the form of thin plates. [B, 38.]—**A. faux.** Silver-plated copper. [B, 38.]—**A. fin.** See **ARGENTUM regis**.—**A. fulminant.** Fulminating silver. [B, 93.]—**A. fulminé.** See **SILVER fulminate**.—**A. gris.** A sort of ivory. [B, 52.]—**A. haché.** White tombac; an alloy of copper and arsenic. [B, 49.]—**A. ioduré.** See **SILVER iodide**.—**A. muriaté.** Silver chloride. [B, 38.]—**A. noir.** Silver sulphide; also as a generic name, any black ore of silver. [B, 38.]—**A. pur.** **A. purifié** [Fr. Cod.]. Lat., *argentum purissimum* [Fr. Cod.]. Pure metallic silver suitable for pharmaceutical purposes. [B, 113.]—**A. rouge.** A native red thioantimonite of silver (argyrythrose); also, any red ore of silver. [B, 38.]—**A. sulfuré.** See **SILVER sulphide**.—**A. telluré.** Silver telluride. [B, 38.]—**A. trait.** Silver drawn out into a thin wire. [B.]—**A. vert.** A green native bromide of silver. [B, 38.]—**A. vierge.** Virgin silver; pure metallic silver occurring native. [B.]—**A. vif.** Quick-silver; mercury. [B, 38.]—**A. vitreux.** Silver sulphide. [B, 38.]—**Arséniate d'a.** See **SILVER arsenate**.—**Arsénio-méthylate d'a.** See **SILVER arsenmethylete**.—**Arsénite d'a.** See **SILVER arsenite**.—**Arsénure d'a.** See **SILVER arsenide**.—**Auricyanure d'a.** See **SILVER auricyanide**.—**Aurothiocyanate d'a.** See **GOLD and SILVER thiocyanate**.—**Azotate d'a.** See **SILVER nitrate**.—**Azotate d'a. cristallisé** [Fr. Cod.]. Lat., *nitras argenticus cristallizatus* [Fr. Cod.]. Crystallized silver nitrate, a preparation corresponding to the argenti nitras of the U. S. Ph. [B, 113.]—**Azotate d'a. et d'ammonium.** See **SILVER ammonio-nitrate**.—**Azotate d'a. fondu.** See **ARGENTI nitras fusus**.—**Azotate d'a. nitraté.** See **ARGENTI nitras dilutus**.—**Azotite d'a.** See **SILVER nitrite**.—**Bichromate d'a.** See **SILVER dichromate**.—**Bioxyde d'a.** See **SILVER dioxide**.—**Bromate d'a.** See **SILVER bromate**.—**Bromure d'a.** See **SILVER bromide**.—**Cacodylate d'a.** See **SILVER cacodylate**.—**Carbonate d'a.** See **SILVER carbonate**.—**Chlorate d'a.** See **SILVER chlorate**.—**Chlorite d'a.** See **SILVER chlorite**.—**Chlorure d'a.** et d'ammonium. See **SILVER ammonio-chloride**.—**Chromate d'a.** See **SILVER chromate**.—**Citrate d'a.** See **SILVER citrate**.—**Collyre à l'azotate d'a.** [Fr. Cod.]. A preparation intended for use in veterinary practice only, made by dissolving 1 part of silver nitrate in a mixture of 10 parts of the *lindum* of *Sydenham* [Fr. Cod.] and 1,250 parts of rose-water. [B, 113.]—**Crayons d'azotate d'a.** [Fr. Cod.]. Lat., *nitras argenticus fusus* [Fr. Cod.]. See **ARGENTI nitras fusus**.—**Crayons d'azotate d'a. mitigé** [Fr. Cod.]. See **ARGENTI nitras dilutus**.—**Croconate d'a.** See **SILVER croconate**.—**Cyanate d'a.** See **SILVER cyanate**.—**Cyanurate d'a.** See **SILVER cyanurate**.—**Cyanure d'a.** See **SILVER cyanide**.—**Cyanure d'a. et de potassium.** See **SILVER and potassium cyanide**.—**Cyanure d'a. et d'or.** See **SILVER auricyanide**.—**Dento-ammoniate d'a.** See **SILVER fulminate**.—**Dichromate d'a.** See **SILVER dichromate**.—**Dioxyde d'a.** See **SILVER dioxide**.—**Dithionite d'a.** See **SILVER dithionite**.—**Ferri-cyanure d'a.** See **SILVER ferri-cyanide**.—**Ferrocyanure d'a.** See **SILVER ferrocyanide**.—**Fluorure d'a.** See **SILVER fluoride**.—**Formiate d'a.** See **SILVER formate**.—**Fulminate d'a.** See **SILVER fulminate**.—**Fulminate d'a. et de potassium.** See **SILVER and potassium fulminate**.—**Fulminate d'a. et d'hydrogène.** Hydric argentic fulminate. [B.]—**SILVER fulminate.**—**Hémioxyde d'a.** Silver monoxide. [B.]

**ARGENTAL**, adj.  $A^3r-je^2n-ta^2l$ . Fr., *argental*. Containing silver, as a mercury, an ore of silver and mercury. [B, 38, 116.]

**ARGENTALLYLENE**, n.  $A^3r-je^2n-ta^2l/ie^2n$ . From *argentum* and *allylene*. Fr., *argentalylène*. Ger., *Argentallylen*. A white crystalline substance,  $C_3H_5Ag$  or, more probably,  $(C_3H_5)_2Ag_2 = CH_2 - C \equiv CAg - Ag - C \equiv CH_3$ , formed by the action of allylene upon silver. [B, 2, 4.]

**ARGENTAMMONIUM** (Lat.), n. n.  $A^3r-je^2n-t(ge^2n)-a^2m$ . ( $a^3n^2m$ )- $mo^2ni^2-u^2m(u^2m)$ . From *argentum* and *ammonium*. A univalent radicle,  $NH_3Ag$ , formed from ammonium by substituting an atom of silver for one of hydrogen. [B, 2.]—**A. oxide.** See **SILVER and ammonium oxide**.

**ARGENTAN**, n.  $A^3r-je^2n-ta^2n$ . From *argentum*, because of its resemblance to silver. Fr., *a. maillechior*. Ger., *Argentan*, *Neusilber*, *Weisskupfer*. Syn.: *German silver*, *packfong*. An alloy of copper 16 parts, zinc 3 to 10 parts, and nickel 4 to 12 parts, with traces of tin, iron, and lead, resembling silver in appearance and properties and applied to similar technical uses. *White a.* contains 4 parts of nickel, and the finest *Chinese a.* or *electrum* contains 8 parts. When silver-plated, a is also called *Peru silver*, *China silver*, and *alpaca*. The *argyroid* of Moreau, the *argyrophan* of Wolf, and *semiarгент* are silver-plated alloys of similar composition. [B, 2, 38, 48.]

**ARGENTARIA** (Lat.), n. f.  $A^3r-je^2n(ge^2n)-ta(ta^3)/ri^2-a^3$ . From Lat., *argentarius*, relating to silver (*planta* understood). The *Potentilla anserina*. [B.]—**Radix argentariae.** The root of *Potentilla anserina*. [B, 180.]

**ARGENTATE**, n.  $A^3r-je^2n-tat$ . A salt of argentic acid; a compound of argentic oxide with a base. [B.]

**ARGENTATION**, n.  $A^3r-je^2n-ta^2shu^2n$ . Fr., *argmentation*. 1. The act or process of silvering. [B, 116.] 2. The injection of the vessels of an anatomical specimen with mercury. [B, 52.] 3. The staining of a microscopical preparation with silver nitrate. [A, 385.] 4. Argyriasis. [A, 385.]

**ARGENTÉ** (Fr.), adj.  $A^3r-zha^3n^2-ta$ . 1. Silvered. [B, 38.] 2. In zoology, having silvery scales or hair. [A, 385.] 3. In botany, see **ARGENTUS**.

**ARGENTEUS**, adj.  $A^3r-je^2n-te^2u^2s$ . See **ARGENTUS**.

**ARGENTER** (Fr.), v. tr.  $A^3r-zha^3n-ta$ . To silver. [B, 52.]

**ARGENTERIA** (Lat.), n. f.  $A^3r-je^2n(ge^2n)-te(ta^3)/ri^2-a^3$ . See **ARGENTARIA**.

**ARGENTUS** (Lat.), adj.  $A^3r-je^2n(ge^2n)-te^2u^2s(u^2s)$ . Silvery, argentine. In botany, having a silvery lustre (said of leaves). [B, 123.]

**ARGENTEUX** (Fr.), adj.  $A^3r-zha^3n-tu^2s$ . See **ARGENTUS**.

**ARGENTIC**, adj.  $A^3r-je^2n-ti^2k$ . Lat., *argenticus*. Fr., *argentique*. It., *argentico*. Of or containing silver (especially containing silver as a univalent radicle); produced by silver (e. g., a stomatitis). [B.]—**A. acid.** Lat., *acidum argenticum*. Fr., *acide argentique*. It., *acido argentico*. Silver monoxide considered as an oxygen acid. The compounds called argentates were regarded as salts of this acid. [B, 91.]—**A. oxide.** Fr., *oxyde argentique*. Ger., *Silberoxyd*. It., *ossido argentico*. Silver monoxide. [B.]—**SILVER oxide.**

**ARGENTICO-AMMONIC, ARGENTICO-CALCIC, ARGENTICO-PLUMBIC, ARGENTICO-POTASSIC, ARGENTICO-SODIC**, adj.s.  $A^{3r}je^{2n}/ti^2ko-a^2m-mo^2ni^2k-k^2v-si^2k$ ,  $-plu^3m-bi^2k$ ,  $-po^2t-a^2s^2ik$ ,  $-so^2di^2k$ . Fr., *argentico-ammonique*, *argentico-calciqne*, *argentico-plombique*, *argentico-potassique*, *argentico-sodique*. Containing at the same time silver and ammonium, calcium, lead, potassium, or sodium. [B, 38.]

**ARGENTIÈRES** (Fr.), n.  $A^{3r}zha^{2n}ti^2e^{2r}$ . A place in the department of Allier, France, where there are two mineral springs. [O. Henry (B, 137).]

**ARGENTIFEROUS**, adj.  $A^{3r}/ge^{2n}ti^2f/e^{2r}u^2s$ . From *argentum* and Lat., *ferre*, to bear. Lat., *argentiferus*. Fr., *argentifère*. Producing, bearing, or containing silver. [B, 116.]

**ARGENTIFIC**, adj.  $A^{3r}/je^{2n}ti^2f/i^2k$ . From *argentum* and Lat., *facere*, to make. Lat., *argentificus*. Fr., *argentifique*. Making silver; transforming into silver or into money. [B, 38.] Cf. **SEL argentifique**.

**ARGENTILLA** (Lat.), n. f.  $A^{3r}je^{2n}(ge^{2n})ti^2l/a^3$ . See **ARGENTINA**.—**A. vulgaris**. See **POTENTILLA anserina**.

**ARGENTINA** (Lat.), n. f. of adj. *argentinus* (*planta* understood).  $A^{3r}je^{2n}(ge^{2n})ti^2e/na^2$ . Fr., *argentine*. Ger., *Silberkraut*. Silver-weed; the *Potentilla anserina*. As a generic name, the genus *Potentilla*. [Blackwell (B, 170).]—**A. rupestris** [Linnaeus]. See **POTENTILLA anserina**.—**A. vulgaris** [Lamarck]. See **POTENTILLA anserina**.—**Radix argentine**. The root of *Potentilla anserina*. [B, 180.]

**ARGENTINE**, adj.  $A^{3r}/je^{2n}ten(tin)$ . Lat., *argentinus*, *argenteus*. Fr., *argentin*. It., *argentino*. Silvery; made of, or resembling, silver. [B.] See *A. flowers* of **ANTIMONY**.

**ARGENTINE**, n.  $A^{3r}je^{2n}ten(tin)$ . 1. A mineral, consisting of calcium carbonate combined with silica, of silvery-white color and pearly lustre. 2. Metal covered with silver. [B, 116.]

**ARGENTINE** (Fr.), n.  $A^{3r}zha^{2n}ten$ . 1. Silver-weed; the *Potentilla anserina* (or *P. argentea*), official as a. in the Fr. Codex, which directs the flowering herb to be employed. [B, 113.] 2. See **ARGENTINE** (Eng. n.), 1st def.

**ARGENTIREN** (Ger.), v. tr.  $A^{3r}zha^{2n}te^{2r}e^{2n}$ . To silver; a word made from the Fr., *argenter*. [B, 48.]

**ARGENTITE**, n.  $A^{3r}/je^{2n}tit$ . A black crystalline native sulphide of silver. [B, 159.]

**ARGENTOACETONYLUREA**, n.  $A^{3r}ge^{2n}/to-a^2s-e^{2t}/o^2n-i^2u^2re^2s$ . From *argentum*, *acetonyl*, and *urea*. Fr., *argento-acétonylurée*. Ger., *Silberacetonylharnstoff*. A substance,  $C_4H_7AgN_3O_2$ , formed by the action of silver oxide upon acetonylurea. [B, 2.]

**ARGENTO-AZOTATE** (Fr.), n.  $A^{3r}zha^{2n}to-a^2z-o-ta^2t$ . See **ARGENTO-NITRATE**.

**ARGENTO-CHLORIDE**, n.  $A^{3r}je^{2n}/to-kl'o^2ri^2d(i)$ . From *argentum* and *chloride*. A chloride of silver and another element or a radicle. [B.]

**ARGENTO-CYANIDE**, n.  $A^{3r}je^{2n}/o-si^2a^2n-i^2d(i)$ . A compound of silver cyanide with the cyanide of another element or a radicle. [B, 98.]

**ARGENTO-KALIUM** (Lat.), n. n.  $A^{3r}je^{2n}(ge^{2n})/to-kal-(ka^2l)/i^2u^2m(u^2m)$ . From *argentum* and *kaliu*. A radicle compounded of silver and potassium. [B.]—**A.-k. cyanatum**. See **SILVER** and **POTASSIUM cyanide**.

**ARGENTOMETER**, n.  $A^{3r}/je^{2n}to-m^2e^{2t}u^2r$ . From *argentum*, silver, and *μέτρον*, a measure. An instrument for determining the amount of silver in a solution. It consists of a graduated tube, containing the solution to be tested, to which is added a solution of sodium chloride of known strength, and the amount of silver is then estimated by measuring the silver chloride precipitated. [B, 7.]

**ARGENTON** (Fr.), n.  $A^{3r}zha^{2n}to^{2n}$ . See **ARGENTAN**.

**ARGENTONA** (Sp.), n.  $A^{3r}he^{2n}to^{2na^3}$ . A village near Mataró, Spain, where there is a spring containing carbonic acid, sulphate, chloride and carbonate of magnesium, carbonate of iron, organic matter, alumina, and silica; esteemed in the treatment of calculous affections. [A, 255.]

**ARGENTO-NITRATE**, n.  $A^{3r}je^{2n}/to-ni^2trat$ . Lat., *argentinitras*. Fr., *argento-azotate*. A nitrate of silver and another element or a radicle. [B.] See **UREA a-n**.

**ARGENTOPROPARGYL**, n.  $A^{3r}je^{2n}/to-pro-pa^2rji^2l$ . A univalent radicle having the composition  $C\equiv C-CH_2$ , or more probably  $C\equiv C-CH_2$ , being that of propargyl in which silver replaces hydrogen. [B, 2, 4].—**A. ethylate**. Fr., *éthylate d'argentopropargyle*. Ger., *Argentopropargyläthylat*. See **ETHYL argentopropargylate**.

**ARGENTOPROPARGYLATE**, n.  $A^{3r}je^{2n}/to-pro-pa^2rji^2l$ . A propargylate in which silver replaces hydrogen. [B.]

**ARGENTOUS**, adj.  $A^{3r}je^{2n}tu^2s$ . Lat., *argentosus*. Fr., *argenteux*. It., *argentosio*. Containing silver; in chemistry, applied to compounds which contain a relatively greater amount of silver than the ordinary silver compounds (argentic compounds), i. e., to those in which the silver atom has, at least apparently, a valence less than one. [B.]—**A. oxide**. Fr., *oxyde argenteux*. Ger., *Silberoxydul*. It., *ossido argentario*. See **SILVER tetrantoxide**.

**ARGENTUM** (Lat.), n. n.  $A^{3r}je^{2n}(ge^{2n})tu^2m(tu^2m)$ . Allied to *áργος*, white, and this to Sanscr. *ardjuna*, white, and *radjala*, silver, both from the root *radj*, to shine. [B, 38.] Fr., *argent*. It., *argento*. Silver. [B.]—**Argenti ammonio-chloridum**. Silver ammonio-chloride. [L, 63.]—**Argenti ammonio-nitras**. Silver ammonio-nitrate. [L, 63.]—**Argenti chloridum**. Silver chloride. [B.]—**Argenti cyanidum** [U. S. Ph. Lond. Ph. (1836)]. **Argenti cyanuretum**. Silver cyanide. [B, 5.]—**Argenti et potassii ni-**

**tras** [Br. Ph. (1885)]. See *Argenti nitras dilutus*.—**Argenti hydragogum**. *Argenti hydragogum* Boyleii. Ger., *Boyle's Silberarznei*. Silver nitrate, recommended by Robert Boyle as a remedy for dropsy. [B, 48.]—**Argenti iodium** [U. S. Ph.]. Silver iodide. [B.]—**Argenti murias**. Silver chloride. [B, 98.]—**Argenti nitras** [U. S. Ph. Br. Ph. Lond. Ph. (1824)]. Nitrate of silver; in the U. S. Ph., the precipitated crystallized salt, corresponding to the azotate d'argent cristallisé of the Fr. Codex, the *A. nitricum* of the Swiss Ph., and the *A. nitricum crystallisatum* of other pharmacopœias; in the Br. Ph. and Lond. Ph., the fused nitrate, corresponding to the *A. nitricum* of the Ger. Ph., the *crayons d'azotate d'argent* of the Fr. Codex, and the *argenti nitras fusus* of the U. S. Ph. [B.]—**Argenti nitras dilutus** [U. S. Ph.]. Fr., *crayons d'azotate d'argent mitigé* [Fr. Cod.]. Ger., *salpêtraltiges Silbernitrat* [Ger. Ph.]. It., *nitrate d'argento mitigato fuso*. Syn.: *argenti et potassii nitras* [Br. Ph. (1885)], *A. nitricum cum kalio nitrico* [Ger. Ph., Austr. Ph., Hung. Ph., Swiss Ph.], *A. nitricum mitigatum* [Russ. Ph.], *nitras argenticus mitigatus* [Norweg. Ph., Swed. Ph.]. Diluted, or mitigated, nitrate of silver; the mitigated stick. A preparation consisting of nitrate of silver and potassium nitrate fused together and cast in molds. The proportion of silver nitrate in parts per cent. is 95 [Br. Ph. (1885)], 90 [Fr. Cod.], 75 [Rouman. Ph.], 50 [U. S. Ph., Norweg. Ph., Russ. Ph., Swed. Ph.], 33 [Ger. Ph., Swiss Ph., Austr. Ph., Hung. Ph.]. The several pharmacopœias also contain alternate weaker preparations; thus the *A. nitricum bis mitigatum* [Russ. Ph.] and the *nitras argenticus bis mitigatus* [Dan. Ph., Swed. Ph.] contain 33 per cent. of silver nitrate, and the Fr. Codex recognizes preparations of  $\frac{1}{2}$ ,  $\frac{1}{3}$ , and  $\frac{1}{4}$  strength, containing, respectively, 50, 33, and 25 per cent. of silver nitrate. It is used for the same purposes as the fused nitrate, but is less energetic in action. [B, 5, 95.]—**Argenti nitras fusum** [Dub. Ph. (1826, 1830)]. **Argenti nitras fusus** [U. S. Ph.]. Fr., *crayons d'azotate d'argent* [Fr. Cod.], *nitrate d'argent fondu*. Ger., *Silbernitrat* [Ger. Ph.]. It., *nitrate d'argento fuso*. Sp., *nitrate argéntico fundido* [Sp. Ph.]. Syn.: *argenti nitras* [Br. Ph.], *A. nitricum* [Ger. Ph.], *A. nitricum fusum* [Austr. Ph., Hung. Ph., Greek Ph., Russ. Ph., Swiss Ph.], *nitras argenti fusus* [Belg. Ph.], *nitras argenticus* [Dan. Ph., Norweg. Ph., Swed. Ph.], *nitras argenticus fusus* [Fr. Cod., Finn. Ph., Netherl. Ph.]. Fused nitrate of silver; generally prepared in the form of sticks. [B, 5, 95, 113.]—**Argenti nitratilis crystalli** [Dub. Ph. (1826)]. Silver nitrate obtained in the form of crystals by evaporation. [B, 5, 97.] Cf. *Argenti nitras* [U. S. Ph.].—**Argenti oxalas**. Silver oxalate. [B.]—**Argenti oxidum** [U. S. Ph.]. Silver oxide (monoxide). [B.]—**Argenti protoxydum**. Silver monoxide. [B, 98.]—**A. acetium**. Silver acetate. [B, 165.]—**A. ammoniato-nitricum**. Silver ammonio-nitrate. [B, 48.]—**A. bromatum**. Silver bromide. [B.]—**A. chloratum**. Silver chloride. [B, 48.]—**A. chloratum ammoniacale**. **A. chloratum ammoniatum**. Silver ammoniochloride. [B, 27; L, 63.]—**A. chromicum**. Silver chromate. [L, 63.]—**A. corneum**. Horn-silver; silver chloride. [B.]—**A. cyanatum**, **A. cyanogenatum**. Silver cyanide. [B, 5; L, 63.]—**A. divisum**. Metallic silver in a state of fine subdivision. [L, 63.]—**A. factum**. Wrought silver. [B, 134.]—**A. finum**. Fr., *argent fin*. See *A. regis*.—**A. foliatum** [Ger. Ph.]. Silver leaf. [B.]—**A. fugitivum**. Quicksilver, mercury. [B, 48.]—**A. fulminans**, **A. fulminicum**. Fulminating silver. [B, 48.]—**A. fusum**. 1. Mercury. [B, 180.] 2. Fused silver nitrate. [B, 48.]—**A. fusum mitigatum**. See *Argenti nitras dilutus*.—**A. hydrocyanicum**. Silver cyanide. [L, 63.]—**A. hyposulfurosum**. Silver hyposulphite. [L, 63.] See **SILVER thiosulphate**.—**A. in concis**. See *Shell silver*.—**A. infectum**. Unwrought silver. [B, 134.]—**A. in musculis**. See *A. in concis*.—**A. iodatum**. Silver iodide. [B, 48.]—**A. liquidum**. Mercury. [B, 180.]—**A. mercurii**. See under **MERCURIUS**.—**A. metallicum**. Metallic silver. [L, 63.]—**A. mobile**. Mercury. [B, 180.]—**A. mortuum**. Dead silver; i. e., silver as opposed to mercury, or a *vivum*. [B, 199.]—**A. mosaicum**. See *A. musivum*.—**A. muriatico-ammoniatum**. Silver ammonio-nitrate. [B, 165.]—**A. muriaticum**. Silver chloride. [L, 63.]—**A. muriaticum ammoniatum**. See *A. muriatico-ammoniatum*.—**A. musicum**, **A. musivum**. See *Mosaic silver*.—**A. nativum**. Silver occurring in nature. [B, 180.]—**A. natrico-hyposulfurosum**, **A. natrico-subsulfurosum**. Silver and sodium thiosulphate. [B, 108; L, 63.]—**A. nitratum**, **A. nitri**. Silver nitrate. [B, 98.]—**A. nitricum** [Ger. Ph., Swiss Ph.]. Fused silver nitrate [Ger. Ph.], crystallized silver nitrate [Swiss Ph.]. Also, in the Ger. Ph., a volumetric solution of silver nitrate, the liquor argenti nitrici volumetricus (q. v.). [B, 95, 205.]—**A. nitricum bis mitigatum** [Russ. Ph.]. See *Argenti nitras dilutus*.—**A. nitricum crystallisatum** [Ger. Ph. (1st ed.)]. Austr. Ph., Greek Ph., Hung. Ph., Russ. Ph.]. Crystallized silver nitrate, the argenti nitras of the U. S. Ph. [B, 95.]—**A. nitricum cum argento chlorato**. The argenti nitras fusus of the U. S. Ph. [B, 95.]—**A. nitricum cum kalio nitrico** [Ger. Ph.]. See *Argenti nitras dilutus*.—**A. nitricum fusum**. See *Argenti nitras fusus*.—**A. nitricum fusum mitigatum**, **A. nitricum mitigatum** [Russ. Ph.]. See *Argenti nitras dilutus*.—**A. nitricum oxydatum crystallisatum**. Crystallized silver nitrate. [L, 63.]—**A. oxydatum**. Silver oxide. [B.]—**A. oxydatum acetatum**, **A. oxydatum acetium**. Silver acetate. [L, 63.]—**A. oxydatum fuscum**. Silver monoxide. [B, 98.]—**A. oxydatum nitricum**. Silver nitrate. [L, 63.]—**A. oxydatum nitricum fusum**. See *Argenti nitras fusus*.—**A. pictorium**. See *A. mosaicum*.—**A. populi**. Probably potassium carbonate or hydrate. "Sal amarum." [B, 50.] See *SAL amarum*.—**A. postulatum**. See *A. purificatum*.—**A. precipitatum**. Metallic silver prepared by the reduction of silver chloride (precipitated from a solution of silver nitrate by the addition of hydrochloric acid or a chloride). [L, 63.]—**A. purificatum** [Br. Ph.], **A. purissimum** [Fr. Cod.], **A. purum** [Belg. Ph.]. Pure metallic silver, adapted for pharmaceutical and medicinal purposes. In classical Latin a *purum* meant silver without figures or raised work upon it. [B, 95, 134.]—**A. purum divisum**. See *A. precipitatum*.—**A. regis**. Fr., *argent du roi*. Coin-silver, con-

taining in 24 parts 23 of pure silver. [B, 48].—**A. repurgatum**. Refined silver. [L, 63].—**A. rude**. See **A. infectum**.—**A. salitum**. Silver chloride.—**A. sophisticum**. Copper arsenate; white copper ore. [B, 48].—**A. subsulfurosum**. Silver hyposulphite. [L, 63]. See **SILVER thiosulphate**.—**A. sulfuratum**. Silver sulphide. [B].—**A. sulfuricum**. Silver sulphate. [B].—**A. sulphuratum**. **A. sulphuricum**. See **A. sulfuratum**, **A. sulfuricum**.—**A. vivum**. See the major list.—**A. zootinicum**. Silver cyanide. [B, 98].—**Chloruretum argenti ammoniacale**. Silver ammonio-chloride. [B, 271].—**Collyrium argenti nitrici**. See **Collyre à l'azotate d'argent**.—**Crystalli argenti**. See **A. nitricum crystallisatum**.—**Cyanuretum argenti et potassii**. Silver and potassium cyanide. [B, 271].—**Flores argenti**. A preparation, composed of an acetate of mercury, made by digesting yellow precipitate (precipitatus luteus) in acetic acid and washing. [B, 59].—**Lac argenti**. The curdy white precipitate of silver chloride produced by adding common salt to a solution of a silver compound. [B, 3].—**Liquor argenti muriatico-ammoniaci** [Kopp]. A solution of silver in an ammoniacal solution of ammonium chloride; used in chronic nervous affections. [B, 165].—**Liquor argenti nitratis** [Lond. Ph. (1836)]. Solution of nitrate of silver; a solution of silver nitrate 1 drachm in distilled water 1 fl. oz. (imperial measure). [B, 5]. Cf. **Test-solution of nitrate of silver**.—**Liquor argenti nitrici volumetricus** [Ger. Ph.]. See **Volumetric solution of nitrate of silver**.—**Magisterium argenti**. A name given by Augustus Sala (1614) to a crystallized silver nitrate prepared by evaporating a solution of silver in nitric acid. [B, 3, 70].—**Magisterium argenti dejectorium**. A name given by Augustus Sala to a mixture of the nitrates of silver and potassium made by evaporating a solution of silver and nitre in nitric acid. [B, 70].—**Nitras argenti** [Ed. Ph. (1817, 1826)]. Fused silver nitrate. [B, 5, 97].—**Nitras argenti crystallinus**, **Nitras argenti crystallisatus** [Belg. Ph.]. Crystalline silver nitrate. [B, 95, 97].—**Nitras argenti fusus** [Belg. Ph.]. See **Argenti nitras fusus**.—**Scoria argenti**. See **Spuma argenti**.—**Solutio argenti ammoniaci** [Ed. Ph. 1841]. Solution of ammonio-nitrate of silver, Hume's test for arsenious acid; made by dissolving 44 grains of silver nitrate in a fluidounce of distilled water, and adding aqua ammoniac until the precipitate at first thrown down is almost completely re-dissolved. [B, 98].—**Spuma argenti**. A name given by the ancients to litharge obtained by calcination of silver ores. It was employed under this title in medicine by Celsus. [B, 3, 45].—**Sulphas argenti** [Bav. Ph. (1822)]. Silver sulphate. [B, 97].—**Sulphas argenti liquidus** [Bav. Ph. (1822)]. A test-solution, corresponding to the test-solution of sulphate of silver (*q. v.*), made by dissolving silver sulphate 1 part in distilled water 100 parts. [B, 97].

**ARGENTUM VIVUM** (Lat.), n. n. Vi(we)vu<sup>m</sup>(wu<sup>m</sup>). From *vivus*, living. Gr. *χρυσός άργυρος*. Fr., *argent vif*. Ger., *Quecksilber*. It., *argento vivo*. Living (or quick-) silver; mercury. A term used by Pliny and restricted by him to mercury occurring native. [B, 3].—**A. v. purificatum**. Purified mercury. [L, 63].—**Spiritus argenti vivi sublimati**. Spirit of sublimated quicksilver (*i. e.*, of corrosive sublimate). A name given by Libavius (1605) to tin tetrachloride because he prepared it by distilling tin with corrosive sublimate. [B, 3.]

**ARGENTURE** (Fr.), n. A<sup>3</sup>r-zha<sup>3</sup>n<sup>2</sup>-tu<sup>r</sup>. The art or process of silvering. [B, 52.]

**ARGEROLLE** (Fr.), n. A<sup>3</sup>r-zhe<sup>3</sup>r-ol. The *Cratægus azarolus*. [B, 121.]

**ARGHEL**, n. A<sup>3</sup>r-ge<sup>3</sup>l. See **SOLENOTEMMA argel**.

**ARGIL**, n. A<sup>3</sup>r-ji<sup>2</sup>l. Gr., *ἀργίλλος, άργίλος*. Lat., *argilla*. Fr., *argile, glaise*. Ger., *Thon, Thonerde, Aluenerde*. It., *argilla*. Sp., *arcilla*. Clay; a whitish earth, soft to the touch, composed chiefly of silica and alumina, but often containing calcium carbonate and frequently colored with oxide of iron. [A, 301.]

**ARGILE** (Fr.), n. A<sup>3</sup>r-zhel. See **ARGIL**.—**A. factice**. See **ALUMINA depurata**.—**A. ferruginea**. See **A. martiale**. See **ARGILLA ferruginea**.—**A. s'mectitica**. Hydrated aluminium silicates produced artificially. [L, 49].—**Vitriol d'a**. See **Potash-alum**.

**ARGILEUX** (Fr.), adj. A<sup>3</sup>r-zhe-lu<sup>s</sup>. See **ARGILLACEOUS**.

**ARGILLA** (Lat.), n. f. A<sup>3</sup>r-ji<sup>2</sup>l(gi<sup>2</sup>l)/la<sup>3</sup>. Argil (*q. v.*); the bolus alba of the Ger. Ph. [L].—**Argille acetas**, **A. acetica**. See **ALUMINIUM acetate**.—**A. alba**. White bole; pipe-clay. [L, 119].—**A. bolus flava** [Linnaeus]. Lemnian earth. [B].—**A. bolus rubra** [Linnaeus]. Armenian bole. [B].—**A. candida**. See **A. alba**.—**A. cimolia**. Bolus alba. [B, 180].—**A. ferruginea**. Armenian bole. [L, 85].—**A. ferruginea pallidior**. Lemnian earth. [B, 180].—**A. ferruginea rubra**. Armenian bole. [L, 85].—**A. hydrata**. See **ALUMINIUM hydrate**.—**A. hydrochlorica**. See **ALUMINIUM chloride**.—**A. incarnata**. Armenian bole. [B, 180].—**A. kalli-sulfurica**. See **Potash-alum**.—**A. muratica**. See **ALUMINIUM chloride**.—**A. nitrica**. See **ALUMINIUM nitrate**.—**A. ochrea rubra**. Fr., *argile ocreuse rouge*. Armenian bole. [L].—**A. pallida**. See **A. alba**.—**A. plumosa**. Flexible asbestos. [B, 180].—**A. pumex**. See **PUMEX**.—**A. pura**. 1. A preparation formerly official in the Ger. Ph., now called bolus alba. [B, 2]. Burnt alum. [L, 63]. See **ALUMEN exsiccatum**. 3. Aluminium hydrate. [L, 65].—**A. pura hydrata**. Aluminium hydrate. [L].—**A. rubra**. Armenian bole. [L].—**A. rubrica**. Creta rubra. [B, 180].—**A. sulfurica**. See **ALUMINIUM sulphate**.—**Argille sulphas**. **A. sulphurica alcalisata**. See **Potash-alum**.—**A. sulphurica usta**. Burnt alum. [L, 85]. See **ALUMEN exsiccatum**.—**Argille super-sulphas alcalisatum**. See **A. vitriolata**.—**A. tripolitana**. See **TRIPOLI**.—**A. vitriolata**. Supersulphas argillæ alcalisatum (seu alcalisatus). See **Potash-alum**.

**ARGILLACEA** (Lat.), n. f. of adj. *argillaceus* (*terra* understood). A<sup>3</sup>r-ji<sup>2</sup>l(gi<sup>2</sup>l)-la(la<sup>3</sup>)se<sup>2</sup>(ke<sup>2</sup>)-a<sup>3</sup>. See **ARGIL**.

**ARGILLACEOUS**, adj. A<sup>3</sup>r-ji<sup>2</sup>l-la<sup>3</sup>shu<sup>s</sup>. Lat., *argillaceus*.

Fr., *argillacé, argileux*. Ger., *thonig, thonartig, thonähnlich*. Composed of or resembling clay. [B.]

**ARGILLICOLOUS**, adj. A<sup>3</sup>r-ji<sup>2</sup>l-li<sup>2</sup>k'o-lu<sup>s</sup>. Lat., *argillicolus* (from *argilla*, argil, and *colere*, to inhabit). Fr., *argillicole*. Ger., *thonbewohnend*. Living in clay. [L, 116.]

**ARGILLIFORM**, adj. A<sup>3</sup>r-ji<sup>2</sup>l-li<sup>2</sup>-fo<sup>2</sup>rm. From *argilla*, clay, and *forma*, form. Fr., *argilliforme*. Ger., *thonförmig*. Resembling clay. [L, 41.]

**ARGILLITIC**, adj. A<sup>3</sup>r-ji<sup>2</sup>l-li<sup>2</sup>t-i<sup>2</sup>ck. See **ARGILLACEOUS**.

**ARGILLIUM** (Lat.), n. n. A<sup>3</sup>r-ji<sup>2</sup>l(gi<sup>2</sup>l)/li<sup>2</sup>-u<sup>3</sup>m(u<sup>m</sup>). See **ALUMINIUM**.

**ARGILLOS** (Lat.), n. f. A<sup>3</sup>r-ji<sup>2</sup>l(gi<sup>2</sup>l)/lo<sup>2</sup>s. See **ARGILLA**.

**ARGILLOSUS** (Lat.), adj. A<sup>3</sup>r-ji<sup>2</sup>l(gi<sup>2</sup>l)-lo<sup>2</sup>su<sup>s</sup>(su<sup>s</sup>). Growing in clayey soils; in the f. pl., *argillosæ*, as a n., plants so growing. [B, 121.]

**ARGILLOUS**, adj. A<sup>3</sup>r-ji<sup>2</sup>l/lu<sup>s</sup>. Lat., *argillosus*. See **ARGILLACEOUS**.

**ARGININE**, n. A<sup>3</sup>r-ji<sup>2</sup>n-en. Fr., *arginine*. Ger., *Arginin*. A monacid base, C<sub>16</sub>H<sub>14</sub>N<sub>4</sub>O<sub>2</sub>, obtained from the embryos of lupin and the pumpkin, resembling creatinine in its chemical characters. [E. Schulze, E. Steiger, "Ztschr. f. physiol. Chem."; "Ctrbl. f. d. med. Wssnsch.", Mar. 19, 1887, p. 213 (B).]—**A. nitrate**. Fr., *azotate d'a*. Ger., *salpetersaures Arginin*. A crystalline compound, C<sub>6</sub>H<sub>14</sub>N<sub>4</sub>O<sub>2</sub>.HNO<sub>3</sub> +  $\frac{1}{2}$ H<sub>2</sub>O, of a. and nitric acid. [E. Schulze, E. Steiger, l. c. (B).]

**ARGION** (Lat.), n. n. A<sup>3</sup>r-ji<sup>2</sup>(gi<sup>2</sup>)-o<sup>2</sup>n. The plant maidenhair. [Dioscorides (L, 105).] See **ADIANTUM capillus Veneris**.

**ARGISTATUS** (Lat.), adj. A<sup>3</sup>r-ji<sup>2</sup>st(gi<sup>2</sup>st)-a(a<sup>3</sup>)/tu<sup>s</sup>(tu<sup>s</sup>). Smeared with wax. [Ruland, Johnson (L, 53).]

**ARGISSE SAUVAGE** (Fr.), n. A<sup>3</sup>rg-les. The *Polypodium vulgare*. [B, 121.]

**ARGOL**, n. A<sup>3</sup>r-go<sup>2</sup>l. 1. The impure tartar of wine. [L, 65.] 2. The dried dung of cattle, used in Tartary, the Alps, and elsewhere for fuel. [L, 41, 56.]—**Red a**. The brownish-red tartar deposited from red wine. [L, 65.]—**White a**. The gray or brownish-white tartar deposited from white wine. [L, 65.]

**ARGONAUTIDÆ** (Lat.), n. f. pl. A<sup>3</sup>r-go<sup>2</sup>n-a<sup>4</sup>t(a<sup>3</sup>ut)-i<sup>2</sup>d-e-(a<sup>3</sup>-e<sup>2</sup>). A family of the section *Octopoda*, order *Dibranchiata*, class *Cephalopoda*, comprising the single genus *Argonauta* (the "paper sailor" or "paper nautilus"). [L, 147.]

**ARGOOR**, n. An East Indian name for a drug supposed to be cinnabar. [Waring (L, 63).]

**ARGOPHYLLÆ** (Lat.), n. f. pl. A<sup>3</sup>r-go<sup>2</sup>-fi<sup>2</sup>l(fu<sup>1</sup>l)<sup>1</sup>le<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). From *Argophyllum*, the only genus. 1. Of Endlicher and Reichenbach, a division of the *Escalloneæ*, or a family akin to the latter. 2. Of Reichenbach, a subdivision of the *Vaccinieæ*. [B, 170.]

**ARGOS** (Lat.), adj. A<sup>3</sup>r-go<sup>2</sup>s. Gr., *ἀργός*, unwrought (1st def.), or bright or white (2d def.). 1. Crude, unprepared (said of horses' food). [Hippocrates (A, 311; L, 53).] 2. White, bright (said of argil, silver, etc.). [L, 50.]

**ARGOUSIER** (Fr.), **ARGOUSSIER** (Fr.), n's. A<sup>3</sup>r-gu-zi<sup>2</sup>-a. Popular names for the *Hippophae rhamnoides*. [L, 49.]

**ARGUEL** (Fr.), n. A<sup>3</sup>r-ge<sup>2</sup>l. See **SOLENOTEMMA argel**.

**ARGULIDÆ** (Lat.), n. f. pl. A<sup>3</sup>r-gu<sup>2</sup>(gu)/li<sup>2</sup>d-e(a<sup>3</sup>-e<sup>2</sup>). See **ARGULINA**.

**ARGULINA** (Lat.), n. n. pl. A<sup>3</sup>r-gu<sup>2</sup>(gu)-li(le)/na<sup>s</sup>. From *Argulus*, one of the genera. Fr., *argulien*. Ger., *Argulinen*. A tribe of the *Siphonostoma*, characterized by an oval, disc-shaped carapace, a rudimentary abdomen, a small post-abdomen, two aggregate eyes, two pairs of maxillipedes, the front pair provided with suckers or hooks, and a protrusible proboscis with poison-glands. They have been classed as a family of the *Branchiura*. [L, 204, 208.]

**ARGULINIDÆ** (Lat.), n. f. pl. A<sup>3</sup>r-gu<sup>2</sup>(gu)-li<sup>2</sup>n-i<sup>2</sup>d-e(a<sup>3</sup>-e<sup>2</sup>). See **ARGULINA**.

**ARGUMENTUM INTEGRITATIS** (Lat.), n. n. A<sup>3</sup>r-gu<sup>2</sup>(gu)-me<sup>2</sup>nt'u<sup>3</sup>n(u<sup>m</sup>) i<sup>2</sup>n-te<sup>2</sup>g-ri<sup>2</sup>-ta(ta<sup>3</sup>)ti<sup>s</sup>. Lit., a proof of chastity; the hymen (*argumentum*, a proof, and *integritas*, chastity). [L, 45.]

**ARGURITES** (Lat.), adj. A<sup>3</sup>r-gu<sup>2</sup>(gu)-ri(re)/tez(te<sup>s</sup>). See **ARGYRITES**.

**ARGUROS** (Lat.), n. m. A<sup>3</sup>r-gu<sup>2</sup>(gu)-ro<sup>2</sup>s. See **ARGYROS**.

**ARGUTUS** (Lat.), adj. A<sup>3</sup>r-gu<sup>2</sup>(gu)/tu<sup>s</sup>(tu<sup>s</sup>). Sharp, delicate (a botanical descriptive and specific term). [B, 74, 121.]

**ARGUZIA** (Lat.), n. f. A<sup>3</sup>r-gu<sup>2</sup>(gu)/zi<sup>2</sup>-a<sup>3</sup>. A section of the genus *Tournefortia*. [B, 121.]

**ARGUZIE** (Lat.), n. f. pl. A<sup>3</sup>r-gu<sup>2</sup>(gu)/zi<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). Of Link, a suborder of cordaceous plants. [B, 170.]

**ARGYLIEÆ** (Lat.), n. f. pl. A<sup>3</sup>r-ji<sup>2</sup>l(gi<sup>2</sup>l)-i(e)<sup>2</sup>-e<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). From *Argyllia*, the single genus. A tribe of the *Bignoniæ* made by Endlicher. [B, 170.]

**ARGYRÆSCIN**, n. A<sup>3</sup>r-ji<sup>2</sup>-re<sup>2</sup>s/si<sup>2</sup>n. An amorphous glucoside found in the cotyledons of the horse-chestnut; insoluble in ether, soluble in alcohol, and forming a frothy mixture with water. [Rochleder (L, 65).]

**ARGYRANCHE** (Lat.), n. f. A<sup>3</sup>r-ji<sup>2</sup>(gu<sup>2</sup>)-ra<sup>2</sup>n<sup>2</sup>(ra<sup>2</sup>n<sup>2</sup>)/ke(ka). Gen., *argyranthes*. From *άργυρος*, silver, and *άρχευ*, to strangle. An ancient name for quinsy. [A, 318.]

**ARGYRANTHEMUS**, **ARGYRANTHOS**, adj's. A<sup>3</sup>r-ji<sup>2</sup>-ra<sup>2</sup>n<sup>2</sup>(thē<sup>m</sup>-u<sup>3</sup>s, -ra<sup>2</sup>n<sup>2</sup>thū<sup>s</sup>). Lat., *argyranthemus* (from *άργυρεος*, silvery, and *άθος*, a flower). Fr., *argyranthème*. Ger., *silberblumig*. Having shining white flowers. [L, 41, 116.]

**ARGYRE** (Fr.), adj. A<sup>3</sup>r-zher. Silvery. [L, 41.]

**ARGYREIA** (Lat.), n. f. A<sup>3</sup>r-jī<sup>2</sup>(gu<sup>6</sup>r)-rī<sup>2</sup>(ra<sup>2</sup>i<sup>2</sup>)-a<sup>3</sup>. Fr., *argyræa*. An Asiatic genus of convolvulaceous plants. [A, 385.]—**A. arborea** [Loureiro]. A small tree in China and Cochín-China, the leaves and root of which are made into poultices and used in thoracic affections. [B, 180.]—**A. bracteata** [Wallich]. A species the decoction of which is used for scrofulous swellings. [L, 49.]—**A. malabarica**. A Malabar species; used locally in erysipelas and abscesses. [B, 172.]—**A. obtusifolia** [Loureiro]. A climbing shrub of Cochín-China, employed as a mild astringent. [B, 180.]—**A. speciosa**. A species used in India for cataplasms and for the cure of chronic skin diseases. [H. Baillon (L, 87).]

**ARGYRIA, ARGYRIASIS** (Lat.), n's f. A<sup>3</sup>r-jī<sup>2</sup>(gu<sup>6</sup>r)-i<sup>2</sup>a<sup>3</sup>, -jī<sup>2</sup>(gu<sup>6</sup>r)-i<sup>2</sup>a<sup>3</sup>(a<sup>3</sup>)/si<sup>2</sup>s. Gen., *argyrīe*, -ri<sup>2</sup>a<sup>3</sup>e<sup>2</sup>os (-sis). From *ἀργυρῖος*, to be of a silvery color. Fr., *argyrie*, *argyriase*. 1. A discoloration of the skin, the mucous membranes, or certain internal organs, due to an accumulation of particles of silver in the corium. The surface varies in color from gray to dark-blue. Some authors make a distinction between these words and *argyrosis*, applying the former to the discoloration consequent on the prolonged internal administration of silver, and the latter to the effects of its local employment. [A, 301; G.] 2. An old term for a skin disease characterized by silvery spots, probably psoriasis. [L, 50.]

**ARGYRIC**, adj. A<sup>3</sup>r-jī<sup>2</sup>r<sup>2</sup>i<sup>2</sup>k. Fr., *argyrique*. Pertaining to silver or to its effects. [A, 385.]

**ARGYRIDES** (Fr.), n. pl. A<sup>3</sup>r-zhi<sup>2</sup>r-ed. A general term for a group of metals resembling silver, including silver, bismuth, mercury, and lead. [Ampère (L, 32).]

**ARGYRIDISCH** (Ger.), adj. A<sup>3</sup>r-gu<sup>6</sup>r-i<sup>2</sup>d<sup>2</sup>i<sup>2</sup>sh. Containing silver. [L, 40.]

**ARGYRIÆ** (Lat.), n. f. pl. A<sup>3</sup>r-jī<sup>2</sup>(gu<sup>6</sup>r)-i<sup>2</sup>(e)<sup>2</sup>e<sup>2</sup>-a<sup>3</sup>(e<sup>2</sup>-e<sup>2</sup>). Of Choisy and others, a section of the *Convolvulaceæ*, including *Argyria* and three or four other genera with a cotyledonous embryo, the carpels united into a single ovary, and an indehiscent coriaceous or fleshy fruit. [B, 214.]

**ARGYRIQUE** (Fr.), adj. A<sup>3</sup>r-zhi<sup>2</sup>r-ek. See *ARGYRIC*.

**ARGYRITES** (Lat.), adj. A<sup>3</sup>r-jī<sup>2</sup>(gu<sup>6</sup>r)-i<sup>2</sup>e<sup>2</sup>(te<sup>2</sup>z<sup>2</sup>). Gen., *argyrītis*. Fr., *argyrites*. Pertaining to silver; in the fem., *argyritis*, as a n. (*terra* [Gr., γῆ] understood), an old name for silver ore, also for litharge. [A, 311; L, 50, 53.]

**ARGYROCEPHALUS** (Lat.), adj. A<sup>3</sup>r-jī<sup>2</sup>(gu<sup>6</sup>r)-o-se<sup>2</sup>f<sup>2</sup>(ke<sup>2</sup>f<sup>2</sup>-a<sup>3</sup>-lu<sup>3</sup>s(lu<sup>3</sup>s)). From *ἀργυρεός*, silvery, and *κεφαλή*, the head. Fr., *argyrocephale*. Having a silvery-white head. [L, 41, 116.]

**ARGYROCHÆTA** (Lat.), n. f. A<sup>3</sup>r-jī<sup>2</sup>(gu<sup>6</sup>r)-o-ke<sup>2</sup>(ka<sup>3</sup>e<sup>2</sup>)-ta<sup>3</sup>. From *ἀργυρεός*, silvery, and *χαῖτα*, loose, flowing hair. A genus of composite plants established by Cavanilles; now referred to *Parthenium*. [B, 42.]—**A. bipinnatifida** [Cavanilles]. See *PAR-THENIUM hysterocephalus*.

**ARGYROCOMA, ARGYROCOME** (Lat.), n's f. A<sup>3</sup>r-jī<sup>2</sup>(gu<sup>6</sup>r)-o<sup>2</sup>k<sup>2</sup>o<sup>2</sup>-ma<sup>3</sup>, -me(ma). From *ἀργυρεός*, silvery, and *κομή*, foliage. Fr., *argyrocome*. Ger., *weichtägliches Ruhrkraut*. Of Schrank, a genus of plants now referred to *Helipetrum*; of Gärtner, a genus now referred to *Helichrysum*. [B, 42, 121.]

**ARGYRODAMAS** (Lat.), n. m. A<sup>3</sup>r-jī<sup>2</sup>(gu<sup>6</sup>r)-o<sup>2</sup>d<sup>2</sup>a<sup>3</sup>-ma<sup>3</sup>s(-ma<sup>3</sup>s). Gen., *argyrodamant<sup>2</sup>os* (-tis). Gr., *ἀργυροδάμας* (from *ἀργυρεός*, silvery, and *δάμας*, adamant). 1. A precious stone mentioned by Pliny. [A, 311.] 2. An old name for a silvery mineral (perhaps mica) described as refractory to fire and as having very thin laminae which, on being swallowed, were likely to wound the primæ viæ and give rise to inflammation. [Andreas Cæsalpinus (L, 53).]

**ARGYRODENDROS, ARGYRODENDROS AFRICANA** [Commelyn] (Lat.), n's f. (although properly n.). The *Protea argentea*. [B, 121, 211.]

**ARGYROGONIA** (Lat.), n. f. A<sup>3</sup>r-jī<sup>2</sup>(gu<sup>6</sup>r)-o-go-ni(ne)<sup>2</sup>a<sup>3</sup>. Gr., *ἀργυρογονία* (from *ἀργυρος*, silver, and *γονή*, that which engenders). The *semen argenticum* of the alchemists; a liquid preparation with which base metals were made to appear like silver. [L, 53, 94.]

**ARGYROID**, n. A<sup>3</sup>r-jī<sup>2</sup>r<sup>2</sup>-oid. From *ἀργυρος*, silver, and *εἶδος*, resemblance. Silver-plated German silver. [B.] See *ARGENTAN*.

**ARGYROLIBANOS** (Lat.), n. m. A<sup>3</sup>r-jī<sup>2</sup>(gu<sup>6</sup>r)-o-li<sup>2</sup>b<sup>2</sup>a<sup>3</sup>-no<sup>2</sup>s. From *ἀργυρεός*, silvery, and *λίβανος*, the frankincense-tree.

**ARGYROLITHOS, ARGYROLITHUS** (Lat.), n's m. A<sup>3</sup>r-jī<sup>2</sup>(gu<sup>6</sup>r)-o<sup>2</sup>l<sup>2</sup>i<sup>2</sup>th<sup>2</sup>-o<sup>2</sup>s, -u<sup>3</sup>s(u<sup>3</sup>s). From *ἀργυρεός*, silvery, and *λίθος*, a stone. See *ARGYRODAMAS*.

**ARGYROPEE** (Fr.), n. A<sup>3</sup>r-zhi<sup>2</sup>r-o-pa. See *ARGYROPEIA*.

**ARGYROPHÆNUS** (Lat.), adj. A<sup>3</sup>r-jī<sup>2</sup>(gu<sup>6</sup>r)-o-fe<sup>2</sup>(fa<sup>3</sup>e<sup>2</sup>)-nu<sup>3</sup>s(nu<sup>3</sup>s). From *ἀργυρος*, silver, and *φαίνειν*, to shine. Ger., *silberweisschimmernd*. In botany, having a silvery-white lustre. [B, 198.]

**ARGYROPHAN**, n. A<sup>3</sup>r-jī<sup>2</sup>r<sup>2</sup>-o-fa<sup>3</sup>n. From *ἀργυρος*, silver, and *φαίνεσθαι*, to appear. See *ARGYROID*.

**ARGYROPHORUS** (Lat.), adj. A<sup>3</sup>r-jī<sup>2</sup>(gu<sup>6</sup>r)-o<sup>2</sup>f<sup>2</sup>o<sup>2</sup>-ru<sup>3</sup>s(ru<sup>3</sup>s). From *ἀργυρος*, money, and *φορέω*, to bring. Fr., *argyrophore*. Sp., *argiroforo*. Expensive. [L, 94.] See *ANTIDOTUS argyrophora*.

**ARGYROPHTHALMUS** (Lat.), adj. A<sup>3</sup>r-jī<sup>2</sup>(gu<sup>6</sup>r)-o<sup>2</sup>p<sup>2</sup>-tha<sup>2</sup>l<sup>2</sup>(tha<sup>2</sup>l<sup>2</sup>)/nu<sup>3</sup>s(mu<sup>3</sup>s). From *ἀργυρεός*, silvery, and *ὀφθαλμός*, the eye. Fr., *argyrophthalmie*. Ger., *silberaugig*. Having silvery-white eyes. [L, 116.]

**ARGYROPHYLLUS**, adj. A<sup>3</sup>r-jī<sup>2</sup>r<sup>2</sup>-o-fī<sup>2</sup>l<sup>2</sup>u<sup>3</sup>s. Lat., *argyrophyllos* (from *ἀργυρεός*, silvery, and *φύλλον*, a leaf). Fr., *argyrophylle*. Ger., *silberblättrig*. Having silvery leaves. [B, 121.]

**ARGYROPŒIA** (Lat.), n. f. A<sup>3</sup>r-jī<sup>2</sup>(gu<sup>6</sup>r)-o-pe<sup>2</sup>(po<sup>2</sup>e<sup>2</sup>)-i<sup>2</sup>a<sup>3</sup>. Gr., *ἀργυροποιία* (from *ἀργυρος*, silver, and *ποιέω*, to make). Fr., *argyropœie*. Ger., *Argyropœie*. 1. The extraction of silver from ore. [L, 53.] 2. An alchemical term for the pretended transmutation

of the baser metals into silver. [L, 53.] 3. A mercenary, money-making way of practising medicine. [A, 322.]

**ARGYROPYGUS** (Lat.), adj. A<sup>3</sup>r-jī<sup>2</sup>(gu<sup>6</sup>r)-o-pi<sup>2</sup>(pu<sup>2</sup>)/gu<sup>6</sup>s(gu<sup>6</sup>s). From *ἀργυρεός*, silvery, and *πυγή*, the rump. Fr., *argyropyge*. Ger., *silberhumpfig*. Having the hinder part of the trunk white. [L, 41, 119.]

**ARGYROS** (Lat.), n. m. A<sup>3</sup>r-jī<sup>2</sup>(gu<sup>6</sup>r)-ro<sup>2</sup>s. Gr., *ἀργυρος*. 1. Silver. [L, 50.] 2. An old name for the *Mercurialis annua*. [L, 105.]

**ARGYROSIS** (Lat.), n. f. A<sup>3</sup>r-jī<sup>2</sup>(gu<sup>6</sup>r)-o<sup>2</sup>si<sup>2</sup>s. Gen., *argyro<sup>2</sup>sis* (-sis). Fr., *argyrose*. Ger., *Argyrose*. It., *argirosi*. See *ARGYRIA* (1st def.).

**ARGYROSTIGMUS** (Lat.), adj. A<sup>3</sup>r-jī<sup>2</sup>(gu<sup>6</sup>r)-o<sup>2</sup>sti<sup>2</sup>g<sup>2</sup>mu<sup>3</sup>s(-mu<sup>3</sup>s). From *ἀργυρεός*, silvery, and *στιγμα*, a dot. Fr., *argyrostigme*. Ger., *silberfleckig*. In botany, spotted with white. [L, 41, 116.]

**ARGYROSTOMUS** (Lat.), adj. A<sup>3</sup>r-jī<sup>2</sup>(gu<sup>6</sup>r)-o<sup>2</sup>st<sup>2</sup>o<sup>2</sup>-mu<sup>3</sup>s(mu<sup>3</sup>s). From *ἀργυρεός*, silvery, and *στόμα*, the mouth. Fr., *argyrostome*. Ger., *silbermundig*. Having a silvery-white mouth. [L, 41, 116.]

**ARGYROTROPHEMA** (Lat.), n. n. A<sup>3</sup>r-jī<sup>2</sup>(gu<sup>6</sup>r)-o-tro<sup>2</sup>f<sup>2</sup>-e<sup>2</sup>(a<sup>3</sup>)/ma<sup>3</sup>. Gen., *argyrotrophem<sup>2</sup>atos* (-tis). Gr., *ἀργυροτρόφημα* (from *ἀργυρεός*, silvery, and *τροφήμα*, food). An ancient article of food prepared from milk, reputed to be cooling and cleansing. [Galen (L, 53).]

**ARGYRUS** (Lat.), n. m. A<sup>3</sup>r-jī<sup>2</sup>(gu<sup>6</sup>r)-ru<sup>3</sup>s(ru<sup>3</sup>s). See *ARGYROS*.

**ARGYTHAMNEÆ** (Lat.), n. f. pl. A<sup>3</sup>r-jī<sup>2</sup>(gu<sup>6</sup>r)-tha<sup>2</sup>m<sup>2</sup>(tha<sup>2</sup>m<sup>2</sup>)/ne<sup>2</sup>-e<sup>2</sup>(a<sup>3</sup>-e<sup>2</sup>). From *Argythamnia*, the only genus. Of Reichenbach, a section of the *Crotoneæ*. [B, 170.]

**ARHANTZE** (Basque), n. The palm-tree. [B, 121.]

**ARHEUMATISTOS** (Lat.), adj. For this and other words in *Arh-*, see *ARHEUMATISTOS* and the corresponding words in *Arh-*.

**ARHUKA, ARHUKEE**, n's. See *CAJANUS indicus*.

**ARIA** (Lat.), n. f. A<sup>3</sup>a<sup>3</sup>/ri<sup>2</sup>a<sup>3</sup>. Of Persoon, a section of the genus *Sorbus*; referred by De Candolle to *Pyrus*, and by Römer made a distinct genus. [B, 170.]—**A. vulgaris**. See *PYRUS aria*.

**ARIA-BEPOU** (Malay), n. The *Azadirachta indica*. [Rheede (B, 216).]

**ARIAN GURON**, n. A Gaulish name for the *Rhinanthus crista galli*. [B, 121.]

**ARIANO** (It.), n. A<sup>3</sup>-re-a<sup>3</sup>/no. A locality in Italy where there are cold sulphurous and saline springs. [A, 385.]

**ARIA-VEELA** (Malay), n. The *Polanisia felina*. [B, 177.]

**ARIBE** (Sp.), n. A<sup>3</sup>-re<sup>2</sup>/ba. A village in the province of Navarre, Spain, where there is a mineral spring. [A, 385.]

**ARIBINE**, n. A<sup>3</sup>r-i<sup>2</sup>b-en. Fr., *aribine*. A crystallizable alkaloid, C<sub>23</sub>H<sub>29</sub>N, obtained by Rieth from arariba bark. [B, 23.]

**ARICA BARK**, n. A<sup>3</sup>-re<sup>2</sup>/ka<sup>3</sup> ba<sup>3</sup>rk. See under *BARK*.

**ARICÉLOUS** (Fr.), n. A<sup>3</sup>-ri<sup>2</sup>-se<sup>2</sup>l<sup>2</sup>-u. A popular name for the *Boletus edulis*. [Cordier (B, 121).]

**ARICÉROCARDIOTOPIE** [Piorry] (Fr.), n. A<sup>3</sup>-ri<sup>2</sup>-sa-ro-ka<sup>3</sup>-di<sup>2</sup>-o-to-pe. See *ARISTÉROCARDIOTOPIE*.

**ARICIA** (Lat.), n. f. A<sup>3</sup>r(a<sup>3</sup>r)-i<sup>2</sup>s(i<sup>2</sup>k)/i<sup>2</sup>a<sup>3</sup>. See *ARICINE*.

**ARICLE** (Lat.), n. f. pl. A<sup>3</sup>r(a<sup>3</sup>r)-i<sup>2</sup>s(i<sup>2</sup>k)/i<sup>2</sup>e<sup>2</sup>-a<sup>3</sup>(e<sup>2</sup>-e<sup>2</sup>). See *ARICIDÆ*.

**ARICIEA** (Lat.), n. n. pl. A<sup>3</sup>r(a<sup>3</sup>r)-i<sup>2</sup>-si<sup>2</sup>(ke)<sup>2</sup>e<sup>2</sup>-a<sup>3</sup>. See *ARICIDÆ*.

**ARICIDÆ** (Lat.), n. f. pl. A<sup>3</sup>r(a<sup>3</sup>r)-i<sup>2</sup>-si<sup>2</sup>(ke)/i<sup>2</sup>d-e<sup>2</sup>(a<sup>3</sup>-e<sup>2</sup>). Fr., *ariciens*. A family of the *Annelida rapacia*, having two elongated tentacles or none, the proboscis short or wanting, without jaws. [L, 209.]

**ARICINE**, n. A<sup>3</sup>r-i<sup>2</sup>s-en. Lat., *aricina*, *aricinum*, *aricia*. Fr., *aricine*. Ger., *Aricin*. It., Sp., *aricina*. Syn.: *cinchonine*. An alkaloid, C<sub>23</sub>H<sub>29</sub>N<sub>2</sub>O<sub>4</sub>, isomeric with cusconine, discovered by Pelletier and Coriol, in 1829, in the bark of an unknown tree growing near Arica, Peru, and since found by Hesse in cusco and cuprea bark. [B, 5, 23.]—**A. sulphate**. A compound of a. and sulphuric acid. The acid sulphate is crystalline; the neutral sulphate non-crystalline.

**ARICOMA** (Sp.), n. A<sup>3</sup>-ri<sup>2</sup>-ko<sup>2</sup>ma<sup>3</sup>. A Peruvian name for the *Polymnia edulis*. [B, 121.]

**ARICYMON** (Lat.), adj. A<sup>3</sup>r(a<sup>3</sup>r)-i<sup>2</sup>s(i<sup>2</sup>k)/i<sup>2</sup>u<sup>3</sup>-mo<sup>2</sup>n. Gr., *ἀρικύμων* (from *ἀρι*, denoting excellence, goodness, and *κύνειν*, to conceive). Prolific (saying of women). [Hippocrates (L, 53).]

**ARID**, adj. A<sup>3</sup>r-i<sup>2</sup>d. Gr., *καρφαλέος*. Lat., *aridus*. Fr., *aride*. Ger., *dürr*. It., Sp., *arido*. Dry, especially dry and harsh to the touch. [A, 385.]

**ARIDÆ** (Lat.), n. f. pl. of *aridus* (*uvæ* understood). A<sup>3</sup>r(a<sup>3</sup>r)-i<sup>2</sup>d-e<sup>2</sup>(a<sup>3</sup>-e<sup>2</sup>). Raisins. [B, 180.]—**A. majores**. Ordinary raisins; *uvæ passæ majores*. [B, 180.]—**A. minores**. The Zante or Corinthian raisins. [B, 180.]

**ARIDEÆ** (Lat.), n. f. pl. A<sup>3</sup>r(a<sup>3</sup>r)-i<sup>2</sup>d<sup>2</sup>e<sup>2</sup>-e<sup>2</sup>(a<sup>3</sup>-e<sup>2</sup>). Of Dumortier, a family of plants belonging to the *Glumacia* and divided into the tribes *Orontiacæ* and *Arisareæ*; afterward referred to *Ararieæ* and divided into the tribes *Arææ* and *Orontieæ*. [B, 170.]

**ARIDIFOLIÆ** (Lat.), n. f. pl. A<sup>3</sup>r(a<sup>3</sup>r)-i<sup>2</sup>d<sup>2</sup>-i<sup>2</sup>fo<sup>2</sup>/li<sup>2</sup>e<sup>2</sup>-a<sup>3</sup>(e<sup>2</sup>-e<sup>2</sup>). From *aridus*, dry, and *folium*, a leaf. Fr., *aridifoliées*. Of Agardh, a class of the *Phanerocotyledones completæ perigamæ*, comprising the orders *Ericaceæ*, *Ericææ*, *Tremandraceæ*, *Pittosporaceæ*, *Myrsinaceæ*, *Sapotaceæ*, *Ebenaceæ*, *Olacinæ*, *Ternstroemiaceæ*, and *Aurantaceæ*. [B, 170.]

**ARIDIFOLIUS** (Lat.), adj. A<sup>3</sup>r(a<sup>3</sup>r)-i<sup>2</sup>d<sup>2</sup>-i<sup>2</sup>fo<sup>2</sup>/li<sup>2</sup>-u<sup>3</sup>s(u<sup>3</sup>s). Fr., *aridifolié*. Having leaves that feel dry to the touch. [L, 41, 116.]

**ARIDITAS** (Lat.), n. f.  $A^2r(a^3r) \cdot i^2d \cdot i^2t \cdot a^2s(a^2s)$ . Gen., *ariditas*. Gr., *ἄρεια*. Fr., *aridité*. Ger., *Aridität*. *Austrocknung*. Dürtheit. It., *aridezza*, *aridità*. Sp., *aridez*. 1. Dryness. 2. Leanness, emaciation. [L. 46, 50, 53.]

**ARIDO-SILIQUATUS** (Lat.), adj.  $A^2r(a^3r) \cdot i^2d \cdot o \cdot si^2l \cdot i^2kwa$  ( $kwa^3y(tu^3s)(tu^3s)$ ). Fr., *arido-siliquæux*. Dry and affecting the capsule (said of cataract). See CATARACTA *arido-siliquata*.

**ARIDURA** (Lat.), n. f.  $A^2r(a^3r) \cdot i^2d \cdot u^2(n^3ra^3)$ . Fr., *aridure*. Ger., *Arider*, *Darrsucht*. It., Sp., *aridura*. 1. Dryness. [A. 385.] 2. Emaciation, especially a withering of a particular part. [A. 332; Ettmüller (L. 132).] 3. Hectic fever. [Dolans (L. 53).]—**A. bulbi**. Fr., *aridure du globe de l'œil*. Ger., *Darrsucht des Augapfels*. It., *a. del bulbo dell'occhio*. Sp., *a. del bulbo del ojo*. An old term for atrophy of the eyeball. [F.]—**A. hydropica**. Wasting of the upper parts of the body while the lower portion is oedematous. [L. 132.]—**A. paralytica**. A. consequent on paralysis. [L. 132.]—**A. rhachialgia**. Atrophy of one of the limbs, generally an arm, preceded by spinal pain, and formation, paralysis, etc., of the affected part. [Ettmüller (L. 132).]—**A. traumatica**. A. (2d def.) due to wounds, ulcers, fistulae, caries, unredacted luxations, etc. [Ettmüller (L. 132).]

**ARIDUS** (Lat.), adj.  $A^2r(a^3r) \cdot i^2d \cdot u^2s(u^3s)$ . See ARID.

**ARIENA** (Lat.), n. f.  $A^2r(a^3r) \cdot i^2e \cdot (a^3)na^3$ . The *Musa paradisiaca*. [Pliny (B. 121).]

**ARIES** (Lat.), n. m.  $A(a^3r) \cdot i^2ez(e^2s)$ . Gen., *ari'etis*. A ram. [B.]—**A. guineensis** [Jonst.]. See OVIS a.

**ARIETARIA** (Lat.), n. f.  $A^2r(a^3r) \cdot i^2e \cdot t \cdot a(a^3)ri^2a^3$ . Of Sternberg, the genus *Saxifraga*; of Jaub. and Spach, a section of the genus *Cicer*. [B. 121.]

**ARIGOS** (Lat.), adj. See ARRIGOS.

**ARIKA**, n. A spirituous beverage obtained by the fermentation of milk. [B. 7.]

**ARIKELU**, n. A Telogoo name for the *Paspalum scrobiculatum*. [L. 63.]

**ARIL**, n.  $A^2r \cdot i^2l$ . Lat., *arillus*. Fr., *arille*. Ger., *Samenmantel*. It., *arillo*. Sp., *arilo*. 1. In botany, a name formerly restricted to a formation developed from the placenta of the embryo, acting as an additional covering for the seed. Mace is the a. of the nutmeg. The term is now used in a more general sense to denote such an accessory investment from whatever part developed, and includes, besides the true a. (*arillus funicularis*) as above defined, a's springing from the umbilical depression about the insertion of the funiculus (*arillus umbilicalis*), or from a thickening of the seed-membrane in the vicinity of the micropyle (*caruncle*, *arillus micropylaris*, *arillode*), or from the rhaphe (*stropholus*), or from other points. [B. 121.] 2. In the *Rhizocarpeæ*, a special investment inclosing the spore. [B. 198.]

**ARILLA** (Lat.), n. f.  $A^2r(a^3r) \cdot i^2l \cdot la^2$ . See GIGARTON.

**ARILARY**, adj.  $A^2r \cdot i^2l \cdot la \cdot ri^2$ . Fr., *arillaire*. Pertaining to or shaped like an aril. [L. 41.]

**ARILLATE**, **ARILLATED**, adj's.  $A^2r \cdot i^2l \cdot lat$ ,  $lat \cdot e^2d$ . Lat., *arillatus*. Fr., *arillé*. Provided with an aril; of the spores of the *Rhizocarpeæ*, provided with a special investment. [B. 198.]

**ARILLE** (Fr.), n.  $A^3re \cdot y$ . See ARIL.—**A. du micropyle**. See ARILLODE.—**A. faux**. See ARILLODE.—**A. funicularis**. See ARILLUS *funicularis*.—**A. micropylaris**. See ARILLODE.—**A. ombilical**. See ARILLUS *umbilicalis*.—**A. vrai**. An aril (q. v.) in the more restricted sense. [Planchon (B. 121).]

**ARILED**, adj.  $A^2r \cdot i^2l \cdot d$ . See ARILLATE.

**ARILIFORM**, adj.  $A^2r \cdot i^2l \cdot i^2fo^2rm$ . From *arillus* (q. v.) and *forma*, form. Resembling an arillus. [A. 316.]

**ARILLODE**, n.  $A^2r \cdot i^2l \cdot lod$ . Fr., *arillode*. An investment of a seed resembling an aril, but springing from the surface of the seed itself and not from the placenta; now regarded as a variety of aril (q. v.). [B. 19, 121.]

**ARILLUS** (Lat.), n. m.  $A^2r(a^3r) \cdot i^2l \cdot lu^3s(lu^3s)$ . See ARIL.—**A. funicularis**. Fr., *arille funiculaire*. An aril in the more restricted sense. [B. 121.] See ARIL.—**A. micropylaris**. Fr., *arille micropylaire*. See ARILLODE.—**A. myristica**. Mace (the aril of the nutmeg). [B. 5.]—**A. sporarum**. See ARIL (2d def.).—**A. umbilicalis**. Fr., *arille ombilical*. See ARIL.—False a. See ARILLODE.

**ARIMATHEA**, n. A place near Jerusalem where there is a mineral spring the water of which is used as a vermifuge. [L. 63.]

**ARINÆ** (Lat.), n. f. pl.  $A^2r(a^3r) \cdot i^2e \cdot ne(na^3e^2)$ . Fr., *arinées*. Of Schott, a subtribe of the *Araceæ* belonging to the *Dracunculeæ*, comprising *Arum*, *Typhonium*, and three other genera. [B. 170.]

**ARINCA** (Lat.), n. f.  $A^2r(a^3r) \cdot i^2n^2ka^2$ . An ancient name for a species of rye or wheat. [Pliny (A. 312).]

**ARINDRANTO**, n. A Madagascan tree producing the gum arendrante. [B. 121.]

**ARINÆÆ** (Lat.), n. f. pl.  $A^2r(a^3r) \cdot i^2n^2e^2e(a^3e^2)$ . Fr., *arinées*. In Benthams and Hooker's classification, a tribe of araceous plants belonging to the series with monocious aperiathous flowers. It includes acaulescent herbs with a spadix usually appendiculate, the upper flowers upon which are male, with free stamens and with the loculi of the anthers larger than the connective, and the lower flowers female, having a unilocular ovary with orthotropical ovules. It comprises the subtribes *Alleluicheæ*, *Pisticeæ*, *Arisareæ*, and *Euarineæ*. [B. 42.]

**ARIÑO** (Sp.), n.  $A^3ren \cdot yo$ . A place in Spain where there is a sulphurous spring. [A. 385.]

**ARIOBARZANTOS**, **ARIOBARZANIUS** (Lat.), n's m.  $A^2r(a^3r) \cdot i^2o \cdot ba^3r \cdot za(zu^3) \cdot ni^2o^2s, -u^2s(u^3s)$ . Gr., *ἄριωβαρζάντιος*. An an-

cient plaster used for induration of the parotid glands. [P. Ægineta (L. 53).]

**ARION** (Lat.), n. m.  $A^2r(a^3r) \cdot i^2e \cdot y^2o^2n$ . Gen., *ari'onis*. From *ἀρίων* (comparative of *ἀγαθός* or *ἀριστος*), better, more excellent. Fr., *arion*. 1. The *Gladiolus communis*. [Dioscorides (L. 105).] 2. A genus of snails belonging to the family *Limacina*, established by Ferrussac. [B. 180.]—**A. empiricorum** [Ferrussac]. Ger., *Erd-schnecke*. Syn.: *Limax ater* (Sturm) (seu *rufus* [Linnaeus], seu *succinea* [Müller], seu *marginellus* [Schrank]). A species common in Europe, which was formerly used in broths and jellies as a remedy for tuberculous, scrofulous, leprosy, and syphilitic diseases. The slimy excretion which it gives off was used as an external application. [B. 180.]

**ARIONA** (Lat.), n. f.  $A^2r(a^3r) \cdot i^2o \cdot na^3$ . Of Römer, the botanical genus *Arjona*. [B. 121.]

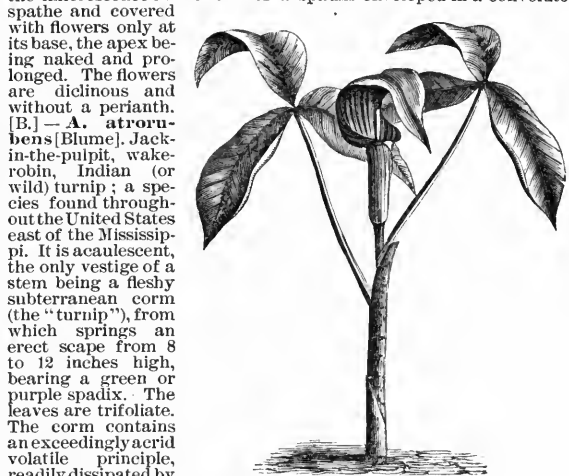

**ARIOPSIDEÆ** (Lat.), n. f. pl.  $A^2r(a^3r) \cdot i^2o \cdot p \cdot si^2d \cdot e^2e(a^3e^2)$ . A tribe of araceous plants of the sub-family *Aroidæ*, comprising the single genus *Ariopsis*. [Engler (B. 216).]

**ARIOPSIS** (Lat.), n. f.  $A^2r(a^3r) \cdot i^2o \cdot p \cdot si^2s$ . A genus of araceous plants established by Graham. [B. 216.]

**ARIPOUNCHOU**, n. A Languedoc name for the *Campanula rapunculus*, the *Campanula patula*, and the *Trachelium*. [B. 121.]

**ARIS** (Lat.), n. f.  $A(a^3r) \cdot ri^2s$ . Gen., *ari'idis* (-dis). Gr., *ἀρίς*. 1. An ancient instrument, conjectured to have been a drill or a rasp. [Hippocrates (A. 311, 325).] 2. The *Arisarum vulgare*. [Pliny (B. 121).]

**ARISEMA** (Lat.), n. n.  $A^2r(a^3r) \cdot i^2s \cdot e^2(a^3e^2) \cdot ma^3$ . Gen., *arisem'atos* (-tis). From *ἀρον*, *arum*, and *σημα*, a sign. Fr., *arisme*. A genus of araceous herbs established by Martius, having the inflorescence in the form of a spadix enveloped in a convolute spathe and covered with flowers only at its base, the apex being naked and prolonged. The flowers are diclinous and without a perianth. [B.]—**A. atrorubens** [Blume]. Jack-in-the-pulpit, wake-robin, Indian (or wild) turnip; a species found throughout the United States east of the Mississippi. It is acaulescent, the only vestige of a stem being a fleshy subterranean corm (the "turnip"), from which springs an erect scape from 8 to 12 inches high, bearing a green or purple spadix. The leaves are trifoliate. The corm contains an exceedingly acrid volatile principle, readily dissipated by heat or prolonged drying, soluble in ether; it also contains from 10 to 17 per cent. of pure starch, which may be used as a substitute for arrowroot, mucilage, sugar, and fatty matters. The corm, either fresh or partially dried, is sometimes used as a stimulant to the secretions, especially as an expectorant, and as an emetic. [A. 327; B. 33, 34, 216; L. 49, 75.] One variety, the *A. atrorubens*, var. *β viride*, is distinguished by the greenish lamina of the spathe. [B. 216.]—**A. Boschi** [Blume]. See *A. dracontium*.—**A. brasilianum** [Blume]. See *A. atrorubens*.—**A. cochinchinense** [Blume]. Perhaps the *Pinellia Waveræ*. [B. 216.]—**A. costatum** [Martius]. Syn.: *Arum costatum* [Wallich]. A Himalaya and Nepal species. [B. 216.]—**A. dracontium** [Schott]. Syn.: *Arum dracontium* [Linnaeus]. Green-dragon; an acaulescent species with a fleshy corm and a short, green spathe, growing along the banks of streams in North America. [B. 34, 216.]—**A. hastatum** [Blume]. See *A. atrorubens*.—**A. heterophyllum** [Blume]. A variety of *A. Thunbergii*. [B. 216.]—**A. japonicum** [Blume]. Syn.: *Arum dracontium* [Thunberg]. A Japanese species, the root of which is acrid, purgative, and emmenagogue. [B. 210, 216.]—**A. latisectum** [Blume]. See *A. japonicum*.—**A. Loureiri** [Blume]. Probably the *Pinellia tuberifera*. [B. 216.]—**A. macrorrhizum** [Bunge]. The *Pinellia tuberifera*. [B. 216.]—**A. pentaphyllum** [Schott]. Syn.: *Arum pentaphyllum* [Linnaeus]. A species of very uncertain botanical characters, indigenous to the East Indies and to China, where it is used like *Arum maculatum*. [B. 180, 216, 266; L. 75.]—**A. Pickenetii** [Blume]. See *A. dracontium*.—**A. precox** [De Vries]. A variety of *A. ringens*. [B. 216.]—**A. ringens**. Syn.: *Arum ringens* [Thunberg], *Arum triphyllum* [Thunberg]. A Japanese species. Loureiro referred to Thunberg's *Arum triphyllum* (which is this plant) his own *Arum triphyllum*, which, however, is probably the *Pinellia tuberifera*. [B. 216, 266.]—**A. serratum**. A variety of *A. japonicum*. [B. 216.]—**A. Sieboldii** [De Vries]. A variety of *A. ringens*. [B. 216.]—**A. Thunbergii** [Blume]. Syn.: *Arum dracontium* [Thunberg]. A Japanese species, the root of which is acrid, purgative, and emmenagogue. [B. 210, 216.]—**A. triphyllum** [Torrey]. See *A. atrorubens*.

THE ARISEMA ATRORUBENS. [A. 327.]

cient plaster used for induration of the parotid glands. [P. Ægineta (L. 53).]

**ARISAREÆ** (Lat.), n. f. pl.  $A^2r(a^3r) \cdot i^2s \cdot a(a^3)re^2e(a^3e^2)$ . Of Schott (1832), a subtribe of araceous plants belonging to the *Dra-*

*cunculeæ*, comprising the genera *Arisarum* and *Arisæma*; by Benth and Hooker made a subtribe of the Arineæ. [B, 42, 121, 170.]

**ARISARINÆ** (Lat.), n. f. pl.  $A^2r(a^3r)\text{-}i^2s\text{-}a^3r\text{-}i(e)'ne(na^3e^2)$ . Of Schott (1856), a subtribe of araceous plants belonging to the *Alleluicheæ*, including the genus *Arisarum*. [B, 170, 216.]

**ARISARUM** (Lat.), n. n.  $A^2r(a^3r)\text{-}i^2s\text{-}a^3r\text{-}ru^m(ru^m)$ . From *ἀρισάριον*, an ancient name for some araceous plant. (Dioscorides (A. 31p).) A genus of araceous plants closely related to *Arisæma*, established by Tournefort. It is distinguished from *Arum* by the absence of glands on the spadix and by the distinctly marked filaments and style. [B, 19, 180.]—*A. amboinense* [Rumphius]. The *Typhonium divaricatum*, var. *robustum*. [B, 216.]—*A. australe* [Richard]. See *A. vulgare*.—*A. azoricum* [Schott]. A variety of *A. vulgare*. [B, 216.]—*A. balansanum* [Schott]. The *A. vulgare*, var. *typicum*. [B, 216.]—*A. Clusii* [Schott]. The *A. vulgare*, var. *typicum*. [B, 216.]—*A. crassifolium* [Schott]. *A. Forbesii* [Schott]. *A. Jacquinii* [Schott]. The *A. vulgare*, var. *typicum*. [B, 216.]—*A. Libani* [Schott]. The *A. vulgare*, var. *typicum* and var. *Veslingii*. [B, 216.]—*A. Sibthorpii* [Schott]. *A. subalpinum* [Kotschy]. The *A. vulgare*, var. *typicum*. [B, 216.]—*A. subexsertum* [Webb]. *A. tingitanum* [Schott]. The *A. vulgare*, var. *subexsertum*. [B, 216.]—*A. Veslingii* [Schott]. The *A. vulgare*, var. *Veslingii*. [B, 216.]—*A. vulgare* [Targioni-Tozz]. Syn.: *Arum a.* [Linnaeus]. A species indigenous to southern Europe and northern Africa. Its tuberous root was formerly official as *radix arisari* and used for the same purposes as that of the *Arum maculatum*. Four varieties are distinguished: 1. Var. *a typicum*, in which the appendix of the spadix is slender and somewhat thickened toward its apex; found in Italy, Spain, Portugal, southern France, Corsica, Cyprus, Greece, and Asia Minor. 2. Var. *β Veslingii*, in which the lamina of the spathe about equals the tube in length, and is rather long-acuminate, the appendix being very slender and scarcely thickened at the apex; found in Morea, Cyprus, Egypt, Syria, and Palestine. 3. Var. *γ Clusii*, having the appendix of the spadix exerted a short distance beyond the spathe, and the apex decidedly thickened; found in Spain and Portugal. 4. Var. *δ subexsertum*, having the lamina of the spathe a little shorter than the tube, and the apex of the spadix dilated into a club-shape; found in Algeria, the Azores, and Teneriffe. [B, 188, 216.]—*Radix arisari*. The rhizome of *A. vulgare*. [B, 180.]

**ARISCEMA** (Lat.), n. n.  $A^2r(a^3r)\text{-}i^2s\text{-}se(ka)'ma^3$ . Gen., *ariscen'atos(-tis)*. See ARISÆMA.

**ARISÉE** (Fr.), n.  $A^3\text{-}re\text{-}sa$ . See ORYZA.

**ARISÈME** (Fr.), n.  $A^3\text{-}re\text{-}se'm$ . See ARISÆMA.

**ARISHTA** (Hind.), n. The *Sapindus emarginatus*. [B, 172.]

**ARISHTO** (Bengal.), n. The *Asadrachta indica*. [B, 172.]

**ARISI, ARISSE** (Tamil), n's. See ORYZA.

**ARISTA** (Lat.), n. f.  $A^2r(a^3r)\text{-}i^2s\text{-}ta^3$ . Perhaps from *acris*, sharp, or allied to *arare*, to plow. Cf. Ger., *Achre*, ear, *Ernte*, harvest [B, 114]. Fr., *arête*, *barbe d'épi*. Ger., *Granne*. It., *resta*. Sp., *arista*. 1. An awn or beard upon a flower; particularly the pointed filiform process tipping the pales of graminaceous plants, as in barley. [B, 1.] 2. In classical Latin, also an ear of grain. [B, 134.]

ARISTÆ. (AFTER THOMÉ.)

**ARISTALOOKHEEA** (Ar.), n. The *Aristolochia longa*. [L.]

**ARISTALTHÆA** (Lat.), n. f.  $A^2r(a^3r)\text{-}i^2s\text{-}ta^3\text{-}l\text{-}the'(tha^3e^2)$ . Gr., *ἀρισθαλθαία*. Althæa. [Pliny (B, 134).]

**ARISTATE**, adj.  $A^2r\text{-}i^2s\text{-}tat$ . Lat., *aristatus*. Fr., *aristé*. Ger., *begrant*. Sp., *aristado*. Furnished with an arista or awn. [B, 34.]

**ARISTE** (Lat.), n. f.  $A^2r(a^3r)\text{-}i^2s\text{-}te(ta)$ . A sort of precious stone. [Pliny (B, 114).]

**ARISTEREON** (Lat.), n. n.  $A^2r(a^3r)\text{-}i^2st\text{-}e(a)'re^2\text{-}o^2n$ . From *ἀρίστος*, intens., and *στερεόν*, to make firm. The vervain (*Verbena*). [B, 121.]

**ARISTÉROCARDIOTROPIE** (Fr.), n.  $A^3r\text{-}i^2s\text{-}te^2r\text{-}o\text{-}ka^3r\text{-}di^2\text{-}ot\text{-}rop\text{-}e$ . From *ἀριστερός*, left, *καρδία*, the heart, and *τρόπος*, a turning. A deviation of the heart to the left. [B, 38.]

**ARISTIDA** (Lat.), n. f.  $A^2r(a^3r)\text{-}i^2s\text{-}ti^2d\text{-}a^3$ . From *arista* (q. v.). 1. A name given by the ancients to the *Hordeum murinum* [Linnaeus]. 2. Of Linnaeus, beard-grass, poverty-grass; a genus of graminaceous plants belonging to the tribe *Stipacæ*. It is closely related to *Stipa*, from which it differs in having a triple awn. There are nine species known in the United States. [B, 34, 134.]—*A. cereulascens*. A species growing in Sicily and Spain. [B, 19.]—*A. hygrometrica*. A species growing in Queensland, where it occasions the death of sheep by its awns penetrating the skin and working their way into the different viscera. [B, 19.]

**ARISTIFORM**, adj.  $A^2r\text{-}i^2s\text{-}ti^2f\text{-}e^2r\text{-}u^3s$ . Lat., *aristifer* (from *arista* [q. v.], and *ferre*, to bear). Fr., *aristifère*. 1. In classical Latin, bearing or producing ears of corn. 2. In botany, aristate. [B, 114; L.]

**ARISTIFORM**, adj.  $A^2r\text{-}i^2s\text{-}ti^2f\text{-}o^3rm$ . Lat., *aristiformis* (from *arista* [q. v.], and *forma*, form). Fr., *aristiforme*. Shaped like an awn or beard of grain. [B, 1.]

**ARISTIGER** (Lat.), adj.  $A^2r(a^3r)\text{-}i^2s\text{-}ti^2j\text{-}u^3r\text{-}ge^2r$ . From *arista* (q. v.), and *gerere*, to carry. Bearing awns or ears of corn. [B, 114.]

**ARISTOBULIA** (Lat.), n. f.  $A^2r(a^3r)\text{-}i^2s\text{-}to\text{-}bu^3(tu)'li^2a^3$ . A section of the genus *Andira* (q. v.), made by Benth and Hooker. [B, 121.]

**ARISTOFFE** (Fr. slang), n.  $A^2r\text{-}i^2s\text{-}to^2f$ . The venereal disease. [L, 41.]

**ARISTOLARIEÆ** (Lat.), n. f. pl.  $A^2r(a^3r)\text{-}i^2st''o\text{-}la^3r\text{-}i(e)^2e\text{-}(a^3e^2)$ . Of Dumortier, an order of gynosepalous plants comprising the families *Asarineæ* and *Aristolochiæ*. [B, 170.]

**ARISTOLOCHE** (Fr.), n.  $A^3r\text{-}i^2s\text{-}to\text{-}losh$ . The *Aristolochia*; in the pl. a's, the *Aristolochiaceæ*. [B.]—*A. à racine longue*. See *ARISTOLOCHIA longa*.—*A. à racine ronde*. See *ARISTOLOCHIA rotunda*.—*A. à trois lobes*. See *ARISTOLOCHIA trilobata*.—*A. clématite*. See *ARISTOLOCHIA clematidis*.—*A. crénelée*. See *ARISTOLOCHIA pistolochia*.—*A. des vignes*. See *ARISTOLOCHIA clematidis*.—*A. de Virginie en arbre*. The *Aristolochia siphon*. [B, 173.]—*A. longue*. See *ARISTOLOCHIA longa*.—*A. menue*. See *ARISTOLOCHIA pistolochia*.—*A. ronde*.—*A. rotunde*. See *ARISTOLOCHIA rotunda*.—*A. sarrasine*. See *ARISTOLOCHIA clematidis*.—*A. serpenteaire* [Fr. Cod.]. See *ARISTOLOCHIA serpentaria*.—*A. siphon*. See *ARISTOLOCHIA siphon*.—*A. trilobée*. See *ARISTOLOCHIA trilobata*.—*A. vulgaire*. See *ARISTOLOCHIA clematidis*.—*Extrait d'a.* See *Extractum ARISTOLOCHIE*.—*Graude a.* The *Aristolochia grandiflora* [Swartz]. [B, 173.]—*Pétite a.* See *ARISTOLOCHIA pistolochia*.—*Racine d'a.*, *Racine d'a clématite*, etc. See *Radix ARISTOLOCHIE*, *Radix ARISTOLOCHIE clematidis*, etc.

**ARISTOLOCHIA** (Lat.), n. f.  $A^2r(a^3r)\text{-}i^2s\text{-}to(to^2)\text{-}lok(lo^2ch^2)'i^2a^3$ . Gr., *ἀριστολόχεια* or *ἀριστολόχια*, from *ἀριστος*, best, and *λοχεία*, the lochia, because believed to be useful in assisting parturition. Fr., *aristolochie*. Ger., *Osterluzei*. It., *aristolochia*. Sp., *aristolóquia*. Birthwort, heartwort; a genus of herbs and shrubs belonging to the natural order *Aristolochiaceæ*, having an irregularly tubular, corolliform, deciduous calyx, inflated below and adherent by its base to the ovary; 5 or 6 sub-sessile anthers adherent to the single style, which bears a 3- or 6-lobed stigma; and a septicidal 6-celled capsule containing many seeds. The structure of the stalk frequently

THE FLOWER OF AN ARISTOLOCHIA. (AFTER CAU-  
VET.)

A, ovary; B, style; C, anthers, adherent to the style; D, six-lobed stigma. The perianth has been removed, to show the consolidation of the stamens with the pith.

OF AN ARISTOLOCHIA. (AFTER CAU-  
VET.)

CS, cork; LB, liber; B, woody laminae; RM, medullary rays; M, pith.

differs from that of other exogenous plants in that it presents no concentric rings, but a series of radiating woody laminae surrounding a flattened pith and separated by large medullary rays. [B, 19, 34, 104, 180.]—*A. abbreviata* [Martius]. A variety of the *A. cymbifera*. [Ducharte (B, 214).]—*A. adulterina*. The *Corydalis cava*. [B, 200.]—*A. anguicida* [Linnaeus]. Snake-killing birthwort; a shrub of Mexico and South America. The juice of the root placed in the mouth of snakes is said to stupefy them, and, if swallowed, to kill them; and it is also reputed to be an antidote to snake-bites. It is probably the *quaco* of the Colombians. [B, 180; Jacquin (B, 197); L, 84.]—*A. antihysterica* [Martius]. A perennial herbaceous species growing in Brazil, having a recumbent slender stem, petiolate, subcoriaceous, deltoid, auriculate leaves, and flowers with a short bent calyx-tube narrow at the base and ending broad above in an infundibuliform limb which is truncate anteriorly, emarginate posteriorly. It is used for the same purposes as *A. clematidis*. [B, 106; Ducharte (B, 214).]—*A. appendiculata* [Velloz]. The *A. macroura*. [B, 214.]—*A. arborescens*. 1. Of Linnaeus, an American species with an erect fruticose stem and cordate-lanceolate leaves. Subsequent botanists have failed to identify this species, which by some is referred to the *A. grandiflora* of Swartz. 2. The *A. siphon*. [B, 173, 214.]—*A. baetica* [Linnaeus]. A climbing shrub of Spain and Crete resembling in properties and uses *A. rotunda*. It is probably the *ἀριστολόχια κληματίτις* of Dioscorides. [B, 180, 197.]—*A. barbata* [Jacquin]. A Venezuela species, having a stalk 6 feet in height, and bearing solitary axillary flowers having a dirty-white calyx-tube with ferruginous spots and the upper part of the lip barbate with long subulate processes. [Ducharte (B, 214).]—*A. biflora* [Willdenow]. The *A. maxima*, var. *gemmiflora*. [B, 214.]—*A. bilobata* [Linnaeus]. Fr., *fer à cavale*. A West Indian species. A decoction of the leaves is used as a remedy for the itch, and the root is considered emmenagogue and heclic. [B, 173.]—*A. bracteata* [Retzius]. An East Indian species, the root of which, termed *adatinapalé*, is much used as a vermifuge

and is reputed a powerful antidote to the venom of snakes [A, 321]. According to others, it is an infusion of the dried leaves which is used as a vermifuge and, mixed with castor-oil, as a remedy in scabies. The plant is bitter and nauseous and has stimulant and diaphoretic properties. [B, 180, 197].—*A. brasiliensis* [Martius]. A large Brazilian shrub, identified by Martius with the *ambuya-embo* of the natives. It has cordate-ovate leaves and solitary flowers with a yellowish, reticulately spotted, purple-veined calyx, consisting of a saccate bent tube dividing above into two lips, the upper lanceolate, concave, and entire, the lower very broad and bilobed. The root has the same uses as that of *A. cymbifera* (q. v.). [B, 180].—*A. caudata*. 1. Of Booth, the *A. macroura*. 2. Of Jacquin, the *A. bilobata*. 3. Of Linnaeus, a species growing in San Domingo. [B, 173, 214].—*A. cava*. See *CORYDALIS cava*.—*A. clematidis* [Linnaeus]. Fr., *poirier, sarrasine, rateline*. Ger., *gemeine Osterluzei, Waldrebenhochleurz*. It., *a. clematite*. Common birth-wort; a low European shrub, with erect green stems, cordate leaves, and yellow, trumpet-shaped, axillary flowers. The plant has a strong, unpleasant, camphoraceous odor, a bitter, acrid, and balsamic taste, and contains a yellow acid, a volatile oil, sugar, *aristolochic acid*, and yellow bitter principles (a. yellow, *aristolochin*, and *clematidin*). The root—*radix aristolochie clematidis* (seu *cretica*, seu *tenuis*, seu *vulgaris*), *radix saracenicæ*—as it occurs in commerce, is very long, of about the thickness of a goose-quill, cylindrical, covered with the remains of the radicles, grayish-brown exteriorly and yellowish within. It, as well as the less bitter and more feebly acting herb, was formerly much employed as a tonic, stimulant, and diaphoretic in atony of the abdominal viscera and of the nervous system, and in gout, hæmoptysis, and pulmonary phthisis. The leaves were also used externally as a vulnerary. *A. clematidis*, although identified by many with the *ἀριστολόχια κληματίτις* of Dioscorides, is probably not the latter, which is described as a climbing plant and is perhaps the *A. latifolia*. [B, 5, 33, 180; L.]—*A. clematidis batetica* [Clusius]. *A. non vulgaris* [J. Bauhin]. *A. batetica*. [B, 214].—*A. clematidis recta* [C. Bauhin]. *A. clematidis vulgaris* [Clusius]. The *A. clematidis*. See *Apocyn. moschatellina*.—*A. contorta* [Bunge]. A species growing in northern China and along the Amoor River, the root of which is used by the Chinese as a purgative and vermifuge, and also as a remedy in scabies, and the fruit as a remedy in pulmonary affections. [B, 214; L. 75].—*A. cordata*. An erroneous spelling for *A. cordiflora*. [B, 197].—*A. cordiflora* [Mutis]. Sp., *contracacipitana* (6 flor de alcantaras de Monsor). A species growing in New Granada, near the Magdalena River, distinguished by its purple flowers, some of which are 4 feet in circumference and are used by boys as caps. The root is used as a remedy for snake-bites. [B, 173, 197, 214, 218].—*A. cordifolia*. An erroneous spelling of *A. cordiflora*. [B, 173].—*A. cretica*. 1. A plant mentioned by Celsus as an ingredient in the malagma of Andreas, a remedy used for hastening suppuration and as an anodyne. It was probably the *A. cretica* of Linnaeus. 2. Of Linnaeus, Cretan birth-wort; a plant growing in Crete, probably the *ἀριστολόχια μακρά* of Dioscorides. Its root is about 6 inches long, 1 inch thick, reddish-brown externally, and yellowish within, and has a nauseous camphoraceous odor and a very bitter taste. It has been used as an emmenagogue and to promote the flow of the lochia. [B, 45, 180].—*A. cretica sempervirens* [Morison]. The *A. sempervirens*. [B, 214].—*A. cymbifera* [Martius]. Ger., *kahnförmige Osterluzei*. A Brazilian shrub with cordate reniform leaves and solitary flowers having a greenish-yellow, inflated, ovoid calyx with 2 lips, the upper lanceolate, acute, and sickle-shaped, the lower 2 to 3 times as long as the upper, hollowed out like a boat at its base, and terminating in a broad plate. The root, which is known in Brazil as *raiz de mil-homens* ("thousand-men's root") or *raiz jarinha*, and in Europe as *radix aristolochie cymbifera*, *radix mil-homens*, occurs in commerce under the form of dark-gray or brownish, rounded or flattened, often twisted or angular fragments, of peculiar odor compared to that of cats' urine or that of buchu, and of an aromatic and bitter camphoraceous taste. It is much used in Brazil both internally and locally as a remedy for snake-bites, and constitutes probably a large part of the *guaco* of commerce. It is also used in dyspepsia, dysentery, rheumatism, malignant fevers, paralysis, and impotence, and as an application to atonic ulcers. [Guibourt (B, 5), B, 180, 197; L. 49].—*A. fabacea*. The *Corydalis solida*. [L, 84].—*A. fetida* [Kunth]. Sp., *yerbera del indio* [Mex. Ph.]. A Mexican shrub, with a fruticose stem, reniform-cordate leaves, and flowers having a reddish reflexed calyx-tube, broad at the apex, where it is greenish-yellow, and terminating in a dark violaceous limb with an elongated lip. A decoction made from it, especially from the root, is used as a detergent and stimulant application to ulcers. [H. Trimble and S. S. Jones, "Am. Jour. of Pharm." Mar., 1886, p. 113; J. M. Maisch, *ibid.*, p. 115; B, 92, 180, 214; L. 49].—*A. fragrantissima* [Ruiz and Pavón]. Sp., *guaco* [Mex. Ph.], *contrayerba de bejuco*, *bejuco de la estrella*. A shrub growing in the woods upon the Andes of Peru and in Mexico. It has a very tall or procumbent stalk; broad ovate-cordate, long-acuminate, very pointed leaves on long petioles; and very fragrant dark rose-colored flowers, growing in axillary pairs, rarely in threes or singly, provided with a broad calyx-tube and a lanceolate recurved lip obtuse at the apex. The root, the bark, and the stalks, especially the latter, are used in intermittent fevers and all diseases dependent upon atony of the abdominal viscera, also for poisoned wounds and as an application

in purulent ophthalmia, chronic ulcers, and erythrits. [J. M. Maisch, "Am. Jour. of Pharm.," Dec., 1885, p. 601; B, 180, 197, 214, 224].—*A. frutescens* [Marsh]. The *A. siphon*. [B, 173].—*A. galeata*. 1. Of Martius, a Brazilian species with a stalk and leaves like those of *A. cymbifera*, and flowers with an obovate globose tube and deflexed cylindrical limb, the upper lip of which is acute lanceolate and recurved-galeate, and the lower lip, springing from a linear base, is prolonged into an obovate emarginate lamina. It has properties and uses similar to those of *A. cymbifera* and furnishes with the latter a part of the *raiz de jarinha* of commerce. 2. Of Moritz, the *A. cymbifera*. [B, 180, 197, 214, 218].—*A. geminiflora* [Kunth]. The *A. maxima*, var. *geminiflora*. [B, 214].—*A. gigas* [Lindley]. The *A. grandiflora* of Swartz. [B, 214].—*A. grandiflora*. 1. Of Swartz, the "poisoned-hogs'-meat"; a climbing shrub found in the mountainous parts of Jamaica, Porto Rico, and Guatemala, having long-petiolate, broad-cordate leaves, acute at the apex, auriculate at the base, and very large axillary solitary flowers having a pilose-hispid calyx, the tube of which is abruptly recurved, is dilated above into a broad throat, and terminates in a cordate limb produced into a very long tail. It is said to be poisonous to hogs and other animals and to emit very foetid stupefying exhalations. The leaves are used in the form of baths and fomentations in gout and rheumatism, and the plant is said to be employed in Brazil in the treatment of dyspepsia, paralysis, and dropsy. 2. Of Gomez, the *A. cymbifera*. [B, 92, 180, 197, 214, 218].—*A. guaco*. A name given by some to the variety of *A. furnishing guaco*. [B, 138]. See *A. cymbifera*, *A. anguicida*, and *A. maxima*.—*A. hastata* [Nuttall]. The *A. serpentaria*, var. *hastata*. [B, 34].—*A. hirsuta* [Muhlenberg]. A small Virginian species with rounded-cordate pubescent leaves and solitary flowers, the peduncles, bracts, and perianth of which are all hairy. The root is like that of *A. serpentaria* and probably constitutes part of the *serpentaria* of commerce. [B, 5].—*A. hyperborea* [Paxton]. The *A. cymbifera*. [B, 214].—*A. indica* [Linnaeus]. A shrub growing in India and New Holland, having short-petiolate obovate leaves, truncate or sub-cordate at

THE ARISTOLOCHIA CLEMATIDIS. (AFTER THOMÉ.)

the base and obtuse at the apex, and flowers borne in cymose-racemose clusters of 2 or 3, surrounded by ovate-lanceolate bracts and with an oblong-ovate lip longer than the calyx-tube. The *A. indica*, var.  $\beta$  *oxyphylla*, has obovate sub-pandurate, abruptly acuminate leaves and a shorter ovate-oblong lip; and the *A. indica*, var.  $\gamma$  *lanceolata*, has oblong-lanceolate leaves. The root, which has a strong aromatic odor and a very bitter, acrid taste, is used as an antidote to snake-bites, and by snake-charmers as a means of stupefying snakes, and is also used in intermittent fever, gout, suppression of the menses, and torpor of the abdominal viscera. [B, 19, 172, 180, 214].—*A. Kämpferi* [Willdenow]. A climbing shrub with flowers yellowish externally, dark-purple within, growing in Japan, where it is called *san sakso*. The fruit is used by the Chinese in pulmonary disorders. [B, 214; L. 75].—*A. labiosa*. 1. Of Ker, the *A. cymbifera*, var. *labiosa*. 2. Of Sims, the *A. cymbifera*. [B, 214].—*A. lanceolata* [R. Wight]. The *A. indica*, var. *lanceolata*. [B, 214].—*A. longa* [Linnaeus]. Fr., *aristolochie longue* (ou à racine longue). Ger., *lange* (oder *langknollige*) *Osterluzei*. It., *a. lunga*. Sp., *aristolochia larga* [Mex. Ph.]. A small herb growing in southern Europe, with prostrate stems, alternate reniform-cordate or ovate leaves, and pale-yellow purple-veined flowers inflated at the base and with a reflexed border covering in the throat. The rhizome, *radix aristolochie longe* (seu *majoris*), is cylindrical or spindle-shaped, a foot in length and 3 inches in breadth, brown externally and yellowish-white within, has a feeble rather unpleasant odor and a taste sweetish at first, afterward nauseous, bitter, and acrid. It is said to possess the power of stupefying snakes, and has been used in atony of the abdominal viscera and nervous system, in suppression of the menses, in gout, and in other affec-

tions. [B, 180, 197].—*A. longa*, *foliis angustis auriculatis* [Morison]. The *A. Maurorum* [Linnaeus]. [B, 214].—*A. longa vera Sabbati* [Martelli and Bonelli]. The *A. clematidis*. [B, 214].—*A. lutea* [Desfontaines]. A species growing in the valley of Bergamo, distinguished by only slight characters from *A. pallida*, to which it is generally referred. [B, 178, 214].—*A. macrophylla*. 1. Of Lamarck, the *A. siphon*. 2. Of Duchartre, a species growing in French Guiana. [B, 214].—*A. macroura*, *A. macrura* [Gómez]. A Brazilian species with a climbing fruticose stem; 3-parted leaves with oblong obtuse lobes, borne upon longish twisted petioles; and flowers with an infundibuliform calyx-tube and a broad lip terminating in a very long pendulous tail. It resembles in physical and therapeutic properties *A. cymbifera*, and furnishes with the latter a part of the *raiz de jarinha* of commerce. [B, 180, 197].—*A. mascula*. See *A. longa*.—*A. Maurorum*. Ger., *syrische Osterluzei*. 1. Of Linnaeus, a Syrian species having lanceolate leaves with rounded lobes and solitary brownish-yellow axillary flowers. The root, which has a strong odor of dung and a bitter taste, was formerly imported into Europe under the title of *radix aristolochie Maurorum*, and is said still to be employed in its native land for the same uses as that of *A. longa*. 2. Of Klotzsch, the *A. bracteata*. [B, 180, 214].—*A. maxima* [Duchartre]. A Brazilian species having a fruticose stem pubescent with deciduous hairs, variously shaped leaves, and flowers clustered in racemes, with a narrow recurved calyx-tube, broad throat, and very broad, acute or mucronate, ovate lip. The ordinary *A. maxima* (A. maxima of Linnaeus, A. maxima, var. *A. maxima* [Duchartre]) has very large oblong or ovate leaves; the variety *A. maxima*, var. *β geminiflora*, has flowers in simple, frequently 2-flowered, racemes; the *A. maxima*, var. *angustifolia*, has small and narrow leaves. The stalks, according to Guibourt, constitute a part of the guaco of commerce. [B, 5, 93].—*A. mayorensis* [Fisch.]. The *A. indica*, var. *lanceolata*. [B, 214].—*A. mexicana* [Flor. mex. ined.]. Sp., *tacopatlé* [Mex. Ph.]. A species found in Guerrero and other hot districts of Mexico; used as an antispasmodic. [J. M. Maisch, "Am. Jour. of Pharm.," March, 1886, p. 122; A, 44].—*A. mexicana flore acutiore* [Morison]. The *A. anguicida*. [B, 214].—*A. mil-homens*. See *A. grandiflora*.—*A. moschata* [Weddell], *A. odoratissima* [Linnaeus]. A shrub growing in the woods of Mexico and West Indies, all the parts of which have a strong agreeable odor and a bitter taste. The herb and root have been employed as a bitter tonic and stimulant and as a sudorific. [B, 180].—*A. officinalis* [Nees von Esenbeck]. The *A. serpentaria*, var. *oblongata*. [B, 180].—*A. orbiculata* [Vell.]. The *A. cymbifera*. [B, 214].—*A. orientalis foliis lanceolatis* [Tournefort]. The *A. Maurorum* of Linnaeus. [B, 214].—*A. ottonis* [Klotzsch]. The *A. pandurata* of Jacquin. [B, 214].—*A. pallida* [Waldstein and Kitabel]. Syn.: *A. rotunda*, var. *β* [Linnaeus]. A species growing in southern Europe, with ovate, almost triangular leaves borne on petioles which are fully as long as the flower-stalks, and with solitary greenish-yellow, purplish-striped flowers, the limb of which is ovate-lanceolate, cuspidate, and half as long as the tube. The root resembles greatly in appearance and medicinal properties that of *A. rotunda*, for which it is sometimes substituted. The *A. pallida* is probably the *ἀριστολόχια στρογγύλη* of Dioscorides. [B, 178, 180].—*A. pandurata*. 1. Of Jacquin, a species growing in Venezuela, with pandurate-hastate lower leaves and violet-colored flowers. 2. Of Wallich, the *A. indica*, var. *oxyphylla*. [B, 214].—*A. panduriformis* [Willdenow]. The *A. pandurata* of Jacquin. [B, 214].—*A. pentandra* [Linnaeus]. Sp., *guaco de San Cristóbal*. A Yucatan species. [B, 214].—*A. peregrina foliis auriculatis* [Morison], *A. peregrina itawolli* [Clusius]. The *A. Maurorum* of Linnaeus. [B, 214].—*A. pictata* [Karsten]. The *A. pandurata* of Jacquin. [B, 214].—*A. pistolochia*. Fr., *aristolochie crénée*. Ger., *spanische Osterluzei*. 1. Of Linnaeus, a species growing in southern Europe, with a stalk only 6 to 9 inches in length, cordate, obtuse, pubescent leaves, with a bristle-like apex, and erect solitary, yellowish flowers having 2 lips, the upper short and reflected, the lower oblong, straight, and obtuse. The root, *radix aristolochie minoris* (seu *levis polyrrhiza*), *radix pistolochie*, consists of long, tufted, yellowish-gray rootlets springing from a short slender rhizome, and has a pleasant aromatic odor and bitter acrid taste. It is used like that of *A. rotunda*. 2. Of Fuchs, the *Corydalis solida*. [B, 109, 180].—*A. polyrrhizis auricularibus foliis*. See *A. serpentaria*.—*A. hastata*.—*A. punctata* [Lamarck]. A San Domingo species with short-petiole, hastate-cordate, auriculate leaves, and very long, solitary axillary flowers with a narrow base and an acute, long-lanceolate lip. [B, 214].—*A. recurvilabra* [Hance]. The green putchuk (Chinese, *ch'ing muh hsing*); a trailing shrub with small, fragrant, yellow roots, used in the treatment of burns and indigestion. The drug has been erroneously referred to *A. contorta* [Bunge]. ["Pharm. Jour. and Trans.," Mar. 15, 1873, p. 725 (B).]—*A. reticulata* [Nuttall]. 1. Of Nuttall, a species growing in Texas, Arkansas, and Louisiana, having an erect, bristly, very flexuous stem, about 1 foot in height, sessile, amplexicaul, oval-cordate leaves, 3 to 4 inches long, with finely reticulated prominent venules, and small, purplish, very woolly flowers, sigmoid in shape. The rhizome, Red River or Texas snake-root, closely resembles that of *A. serpentaria*, but is somewhat thicker and coarser, and the rootlets are longer, thicker, and less interlaced. Its constitution and medicinal properties are similar to those of *A. serpentaria*, and it constitutes with the latter the *serpentaria* of the U. S. Ph. 2. Of J. P. Holton, the *A. maxima*, var. *geminiflora*. [B, 5, 34, 81, 214].—*A. ringens* [Vahl]. Ger., *rachenförmige Osterluzei*. A Brazilian climbing shrub, with cordate-rounded leaves and solitary flowers, the inflated reticulate calyx of which divides into a spatulate upper lip and a lanceolate lower lip. The root resembles in physical properties and therapeutic uses that of *A. cymbifera*, and likewise constitutes part of the *raiz de jarinha* of commerce. [B, 180, 197].—*A. rotunda* [Linnaeus]. Fr., *aristolochie rotunde* (ou *à racine ronde*). Ger., *rundknollige Osterluzei*. It., *a. rotunda*. Sp., *aristologia redonda* [Mex. Ph.]. A species growing throughout southern Europe, with almost sessile, amplexicaul, ovate-cordate leaves and solitary axillary flowers, the perianth of

which is inflated at the base and of a pale-yellow color streaked with dark-purple reticulate veins, and terminates in a dark-purple or yellowish-brown oblong-rounded lip, as long as the calyx-tube and reflected so as to cover in the throat of the calyx. The rhizome, *radix aristolochie rotundæ veræ* (seu *femineæ*), is tuberous, almost spherical, 2 to 3 inches in diameter, and beset with delicate rootlets, brownish exteriorly, yellowish-white within, and has a strong repulsive odor and bitter nauseous taste. It contains starch, resin, and a bitter principle, and was formerly employed in congestions of the abdominal organs, suppressed menstruation, gout, and asthma. It was also reputed to have the power of stupefying snakes. [B, 178, 180, 197].—*A. rotunda concava*. The *Adoxa moschatellina*. [B, 59].—*A. Rumphii* [Kostel]. A lofty shrub growing in the island of Banda. The root and stalk, which have a strong aromatic odor and bitter, penetrating, somewhat terebinthaceous taste, are used in the form of decoction in intermittent fevers and torpor of the abdominal viscera. [B, 180].—*A. sagittata* [Muhlenberg]. The *A. serpentaria*, var. *hastata*. [B, 81].—*A. saure* (Ger.). Aristolochic acid. [B, 207].—*A. sempervirens* [Linnaeus]. A subfruticose or herbaceous species with a prostrate or subscandent stem, small subcoriaceous leaves, and yellowish solitary flowers, growing in Arabia and Crete. The leaves are used both internally and externally in the treatment of snake-bites. [Forskal (B, 5); B, 180, 214].—*A. serpentaria* [Linnaeus]. Fr., *aristolochie serpentaire* [Fr.

THE ARISTOLOCHIA ROTUNDA.  
(AFTER CAUVET.)

THE ARISTOLOCHIA SERPENTARIA.  
[B, 138.]

Cod.). Ger., *Schlange-Osterluzei*, *virginische Schlangenwurzel*. Virginia snake-root; an herbaceous plant 8 to 12 inches in height growing through the middle and southern United States. It has an erect, flexuous, jointed stalk; oblong or ovate, cordate, acuminate leaves, 2 to 4 inches in length, supported on short petioles; and long radical peduncles bearing dull-purplish, leathery flowers,  $\frac{3}{4}$  to 1 inch in length, of a sigmoid shape, with the calyx-tube inflated at each end and the limb terminating in 3 short obtuse lobes. The fruit is a 6-angled, 6-celled obovate capsule. The *A. serpentaria*, var. *hastata* (A. hastata [Nuttall], A. serpentaria, var.  $\gamma$  auriculata [Hayne]), is distinguished by its oblong-linear or oblong-lanceolate leaves, auriculate at the base. The *A. serpentaria*, var. *α oblongata* [Hayne] (A. officinalis [Nees v. Esenbeck]) has oblong-cordate, long-cuspidate leaves with a slender, slightly villous stem; and the *A. serpentaria*, var. *β ovata* [Hayne] (A. serpentaria [Nees v. Esenbeck]), has ovate-cordate short-cuspidate leaves with a low villous stem. The rhizome, *serpentaria* [U. S. Ph.], *serpentariae rhizoma* [Br. Ph. (1885)] (seu *radix* [Br. Ph. (1867)], *radix serpentariae aristolochie serpentariae*, seu *aristolochie virginianæ*, seu *viperinæ*, seu *colubrinæ*), is about 1 inch in length,  $\frac{1}{4}$  inch broad, bent, covered with the remnants of the stems and with thin branching rootlets about 4 inches long; is of a yellowish-brown exteriorly, whitish within; and has an aromatic, camphoraceous odor, and a bitter camphoraceous taste. It contains a fragrant volatile oil, a volatile resin, gum, sugar, and a bitter principle (*aristolochin* [Chevallier], *serpentagin*). It acts as an aromatic stimulant, diuretic, and diaphoretic, and is administered in typhoid conditions, in exanthematous fevers to develop the eruption, and in intermittent fevers, especially in connection with cinchona. [B, 5, 34, 92, 180].—*A. siphon* [L'Héritier]. Ger., *Pfeifenstrauch*. Dutchman's pipe; a large climbing shrub growing in the middle and southern United States, and cultivated in Europe, with broad, rounded-cordate, glabrous, petiole leaves, 6 to 12 inches in diameter, and with solitary bracteate flowers having the dull-brown calyx-tube bent upon itself in the form of a tobacco-pipe. The leaves have been used as a diaphoretic in catarrhal disorders. [B, 34, 180].—*A. solida*. The *Corydalis solida*. [L, 63].—*A. surinamensis* [Willdenow]. A shrub of Surinam with trilobate leaves and solitary flowers with the bent calyx-tube ending in a cordate flat lip. All parts of the plant possess a penetrating and sharp taste, and have been used in malignant fevers and other diseases. [B, 180].—*A. tapetotricha* [Ch. Lem.]. The *A. macroura*. [B, 214].—*A. tenera* [Pohl]. A species called *matos* in New Granada, where it is used as a remedy for snake-bites. ["Pharm. Jour. and Trans.," Mar. 13, 1873, p. 725 (B).]—*A. tenuis*. See *A. clematidis*.—*A. tomentosa* [Sims]. A tall climbing shrub growing along the Mississippi River and in the

Gulf States. The rounded-cordate, petiolate leaves, 4 to 6 inches in length, are downy or hairy on their inferior surface, and the solitary bractless flowers have a greenish-yellow, downy, strongly reflexed calyx-tube and a dark-purple, reflexed, 3-lobed limb. The plant has a thick creeping root resembling in odor that of *A. serpentaria*. This species has been confounded with *A. hirsuta*, from which, however, it greatly differs. [B. 5, 34.]—*A. trilobata* [Lamarck]. The *A. trilobata* of Linnaeus. [B. 180.]—*A. trilobata*. Fr., *aristolochia trilobata*. 1. Of Linnaeus, a climbing shrub of the West Indies with obtuse trilobate leaves and solitary inflated flowers with a cordiform, cuspidate, and caudate lip. All parts of the plant have a strong camphoraceous odor. The stalks, occurring in long, angular, cane-like pieces, formerly official as *stipites aristolochiae trilobatae*, and the root have a physiological action resembling that of *A. serpentaria*, and have been employed for the same purposes as the latter, and also as an antidote to snake-bites. 2. Of Jacquin, the *A. surinamensis*. 3. Of Lindley, the *A. macrocarpa*. [B. 180, 197, 214; L. 85.]—*A. tripteris*. Fr., *aristolochia de la Louisiane*. A species said to occur in Louisiana, the botanical description of which is too imperfect for identification. [Duchartre (B. 214).]—*A. turbacensis* [Bonpland]. Sp., *capitana de corazon*. A climbing plant with ovate-cordate entire leaves, reticulate veined inferiorly, and flowers borne on bracteate peduncles, growing near Turbaco, in Mexico. A decoction of the root has been used as an antidote for snake-bites. [B. 173, 214; L. 105.]—*A. undata* [Mönch]. The *A. sempervivens*. [B. 214.]—*A. vulgaris*. See *A. clematidis*.—*A. vulgaris* rotunda. See *CORYDALIS SOLIDA*.—*A. yellow*. Ger., *Aristolochiengelb*. A yellow crystalline substance obtained from the root of *A. clematidis*. Probably identical with aristolochin and clematidin. [B. 1, 196.]—*Extractum aristolochiae*. Fr., *extrait d'aristolochie*. An extract made by digesting 1 part of the root of *A. clematidis* with 5 or 6 parts of alcohol, filtering with expression, boiling the residue with 3 parts of water, clarifying the decoction with white of egg, mixing the alcoholic and aqueous liquors, and evaporating. [Brunsw. Disp. (1777), Würt. Ph. (1798) (L. 85).]—*Radix aristolochiae bulbosae*. The root of *Corydalis solida*. [B. 180.]—*Radix aristolochiae cavae*. The root of *Corydalis cava*. [B. 180.]—*Radix aristolochiae clematidis* (seu *clematidis*). *Radix aristolochiae ereticæ*. The root of *A. clematidis*. [B. 180.]—*Radix aristolochiae cymbiferæ*. The root of *A. cymbifera*. [B. 180.]—*Radix aristolochiae fabacæ*. The root of *Corydalis solida*. [B. 180.]—*Radix aristolochiae fœminæ*. The root of *A. rotunda*.—*Radix aristolochiae longæ* (seu *longe veræ*). *Radix aristolochiae majoris*. The root of *A. longa*. [B. 180; L. 85.]—*Radix aristolochiae Maurorum*. The root of *A. Maurorum*. [B. 180.]—*Radix aristolochiae minoris*. The root of *A. pistolochia*. [B. 180.]—*Radix aristolochiae non cavae*. The root of *Corydalis solida*. [B. 180.]—*Radix aristolochiae polyrrhizæ*. The root of *A. pistolochia*. [L. 85.]—*Radix aristolochiae rotundæ veræ*. The root of *A. rotunda*. [L. 85.]—*Radix aristolochiae rotundæ vulgaris*. The root of *Corydalis cava*. [B. 180.]—*Radix aristolochiae serpentariae*. The rhizome of *A. serpentaria*, the *serpentaria* of the U. S. Ph. [B. 180.]—*Radix aristolochiae tenuis*. The root of *A. clematidis*. [B. 180.]—*Radix aristolochiae tenuis polyrrhizæ*. The root of *A. pistolochia*. [B. 180.]—*Radix aristolochiae virginianæ*. The rhizome of *A. serpentaria*. [B. 180.]—*Radix aristolochiae vulgaris*. The root of *A. clematidis*. [B. 85.]—*Stipites aristolochiae trilobatae*. The stalks of *A. trilobata*. [L. 85.]

**ARISTOLOCHACEÆ** (Lat.), n. f. pl.  $A^2r(a^3r)-i^2s$ -to- $lo^2k$ -( $lo^2ch^2$ )- $i^2a$ -( $a^3$ )- $se^2$ -( $ke^2$ )- $e$ -( $a^3$ - $e^2$ ). Fr., *aristolochiacées*. Ger., *Aristolochiaceen*, *Osterluzeigewächse*. It., *aristolochiacee*. Sp., *aristolochiáceas*. Syn.: *Asaricæ* [Kuntz], *Asaricæ* [Bartling], *Pistolochiæ* [Link]. Birthworts. An order of apetalous, dicotyledonous herbs and shrubs belonging to the asaral alliance of Lindley, the cohort *Asarales* of Bentham and Hooker, and the order *Serpentariae*, series *Monochlamydeæ*, of Eichler. It comprises plants with alternate, exstipulate, simple leaves; perfect flowers, with an irregularly tubular perianth, usually of a brownish or yellowish hue, valvate in aestivation; 6 to 12 (rarely 18 or 36) epigynous stamens, a simple style tipped with a 6-parted stigma, and a 6-celled (rarely 3- or 4-celled) ovary; and a capsular fruit containing numerous albuminous seeds. By Duchartre it is divided into three suborders: 1. The *Asaracæ*, herbaceous plants with the lower leaves squamiform, the upper reniform; with solitary terminal flowers having a persistent trilobed calyx, 12 free stamens, 6 of which are exterior and placed opposite the styles, and have very short filaments, and short 6-celled ovary; and with a capsule opening by an irregular dehiscence. This suborder has for its type the genus *Asarum*. 2. The *Bragantiæ*, shrubs with reniform, oblong, or ovate-lanceolate leaves; with flowers disposed in spikes or racemes, having a caducous calyx dividing into 3 irregular lobes, 6 to 36 stamens, and an elongated, tetragonal, and 4-celled ovary with uniseriate ovules; and with a siliquiform capsule dehiscing by 4 valves. This suborder has for its type the genus *Bragantia*. 3. The *Aristolochiæ*, shrubs with an irregularly tubular caducous calyx, 6 (sometimes 5) stamens with extrorse anthers sessile upon the style, an elongated hexagonal 6-celled (rarely 5-celled) ovary, and a globular or oblong hexagonal capsule, dehiscing from top to bottom by 6 valves. It includes the genus *Aristolochia*. [B. 34, 104.]

**ARISTOLOCHACEOUS**, adj.  $A^2r-i^2s$ 'to- $lo^2k$ - $i^2a$ 'shu's. Lat., *aristolochiaceus*. Fr., *aristolochiaceen*. It., *aristolochiaceo*. Sp., *aristolochiáceo*. Resembling *Aristolochia*; of or pertaining to the *Aristolochiaceæ*. [B.]

**ARISTOLOCHIE** (Lat.), n. f. pl.  $A^2r(a^3r)-i^2s$ -to- $lo^2k$ -( $lo^2ch^2$ )- $i^2a$ - $e$ -( $a^3$ - $e^2$ ). Fr., *aristolochées*. Ger., *Aristolochien*. 1. Of Adanson, an order of plants corresponding in part to the *Aristolochiaceæ*, but including also *Nymphaea*, *Nelumbo*, *Hydrocharis*, and other genera now placed in distinct orders. 2. Of Jussieu and others, the same as the *Aristolochiaceæ* with the addition of the genus *Cytinus*. [B. 104, 170, 197, 214.]

**ARISTOLOCHIAL**, adj.  $A^2r-i^2s$ 'to- $lo^2k$ ' $i^2a$ - $l$ . Lat., *aristolochialis*. Of, pertaining to, or resembling the genus *Aristolochia*. [B.]—**A. alliance**. See **ARISTOLOCHIALES**.

**ARISTOLOCHIALES** (Lat.), n. f. pl.  $A^2r(a^3r)-i^2s$ -to-( $to^2$ )- $lo^2k$ -( $lo^2ch^2$ )- $i^2a$ -( $a^3$ )- $lez$ -( $le^2$ s). Of Lindley, an alliance of plants belonging to the *Columniferae*, including the single order *Aristolochiæ* (*Aristolochiaceæ*). [B. 170.]

**ARISTOLOCHIC**, adj.  $A^2r-i^2s$ 'to- $lo^2k$ ' $i^2k$ . For deriv., see **ARISTOLOCHIA**. Lat., *aristolochicus*. Fr., *aristolochique*. Ger., *aristolochisch*. It., *aristolochico*. Sp., *aristolochico*. 1. Having power to expel the placenta and excite the lochia. 2. Of or pertaining to the genus *Aristolochia*. [B.; L. 41, 50.]—**A. acid**. Fr., *acide aristolochique*. Ger., *Aristolochiasäure*, *Aristolochinsäure*. It., *acido aristolochico*. Sp., *ácido aristolochico*. A volatile acid,  $C_8H_{12}O_{11}$ , obtained from the root of the *Aristolochia clematidis*. It has not been obtained in a chemically pure state, and its existence as an independent chemical compound has been denied. [B. 2, 196, 207.]

**ARISTOLOCHICA** (Lat.), n. n. pl. of adj. *aristolochicus* (remedia understood).  $A^2r(a^3r)-i^2s$ -to-( $to^2$ )- $lo^2k$ -( $lo^2ch^2$ )- $i^2k$ - $a^3$ . Remedies for expelling the placenta and bringing on the lochia. [L. 50.]

**ARISTOLOCHIEÆ** (Lat.), n. f. pl.  $A^2r(a^3r)-i^2s$ -to- $lo^2k$ -( $lo^2ch^2$ )- $i^2a$ - $e$ -( $a^3$ - $e^2$ ). Fr., *aristolochiées*. Ger., *Aristolochiëen*. Sp., *aristolochiáceas*. 1. Of Jussieu and others, the *Aristolochiaceæ*. 2. Of Bartling, a class of *Chlamydoblasti*, including the orders *Balanophoræ*, *Cytinæ*, *Asarinæ*, and *Myristicæ*. 3. Of Duchartre, a suborder of the *Aristolochiaceæ* (q. v.). [B. 35, 170, 214.]

**ARISTOLOCHINGELB** (Ger.).  $A^2r-i^2s$ -to- $lo^2k$ ' $en$ - $ge^2$ lb. See **ARISTOLOCHIA yellow**.

**ARISTOLOCHIN**, n.  $A^2r$ ' $i^2s$ -to- $lo^2k$ '- $i^2n$ . Lat., *aristolochinum*. Fr., *aristolochine*. Ger., *Aristolochin*. It., *aristolochina*. A golden-yellow, bitter substance, obtained by Chevallier and Walz from the root of *Aristolochia serpentaria* and *Aristolochia clematidis*, and believed to constitute the active principle of those plants. It is identical in physical properties, and probably in chemical composition, with aristolochia yellow and clematidin. It has not yet been satisfactorily isolated. [B. 2, 196, 207.]—**A. säure** (Ger.). Aristolochic acid. [B. 196.]

**ARISTOLOCHINÆ** [Link] (Lat.), n. f. pl.  $A^2r(a^3r)-i^2s$ 'to- $lo^2k$ -( $lo^2ch^2$ )- $i^2e$ -( $e$ 'ne)- $na^3$ - $e^2$ ). A suborder of the *Pistolochinæ*, comprising the single genus *Aristolochia*. [B. 170.]

**ARISTOLOCHIOUS**, adj.  $A^2r-i^2s$ 'to- $lo^2k$ ' $i^2u^3$ s. See **ARISTOLOCHICEOUS**.

**ARISTOLOCHON** (Lat.), n. n.  $A^2r(a^3r)-i^2s$ -to- $lo^2$ -( $o^2$ )- $ko^2n$ -( $ch^2$ on). Gr., ἀριστολόχων. An ancient name for some plant of the genus *Aristolochia*. [Hippocrates (B. 115).]

**ARISTON** (Lat.), n. n.  $A^2r(a^3r)-i^2s$ 'to- $o^2n$ . Gr., ἀριστον. 1. In early Greek writings, breakfast; in later Greek, the noon-day meal. 2. Anything excellent (neut. of ἀριστος, the best), such as a remedy. [B.]—**A. magnum**, **A. parvum**. Ancient names for certain compounds used in the treatment of phthisis, abdominal pains, and fevers. [L. 53.]

**ARISTOPHANEION** (Lat.), n. n.  $A^2r(a^3r)-i^2s$ -to- $fa^2n$ -( $fa^2n$ )- $i^2$ -( $a^3$ )- $o^2n$ . From Aristophanes, its inventor. The name of an emollient plaster composed of pitch 4 lbs., apocyma 2 lbs., wax 1 lb., opoponax 1 oz., and vinegar  $\frac{1}{2}$  pint. [Gorræus (L. 50).]

**ARISTOSUS** (Lat.), adj.  $A^2r(a^3r)-i^2s$ -to- $su^2$ -( $su^2$ s). For deriv., see **ARISTA**. Sp., *aristoso*. Containing many awns or aristæ. [B. 114.]

**ARISTOTELIA** (Lat.), n. f.  $A^2r(a^3r)-i^2s$ -to- $te$ -( $ta$ )- $li^2a$ - $a^3$ . From Aristotle, the Greek philosopher. Fr., *aristotélie*. A genus of tillaceous plants, belonging to the tribe *Elaocarpeæ*. [B. 104.]—**A. glandulosa** [Ruiz and Pavón]. **A. macqui** [L'Héritier]. Syn.: *Cornus chilensis* [Molin.]. A shrub growing in Chili. The tough astringent bark contains a large amount of tannin and furnishes a fibre used in making the strings of musical instruments; the leaves are used to make a detergent wash for ulcers, especially in the mouth; and from the acid edible berries a sort of wine is made. The whole plant is said to have a febrifuge action. [B. 19, 180; H. Baillon (L. 87).]—**A. racemosa**. Mako-mako; a New Zealand species with edible fruit. [B. 19.]

**ARISTOTELIACEÆ** [Endlicher], **ARISTOTELIÆ** [Reichenbach] (Lat.), n's f. pl.  $A^2r(a^3r)-i^2s$ -to- $te^2$ - $i^2a$ -( $a^3$ )- $se^2$ -( $ke^2$ )- $e$ -( $a^3$ - $e^2$ ). Fr., *aristotéliacées*. Ger., *Aristoteliaceen*. The same as the *Tiliacæ*. [B. 197.]

**ARISTOUS**, adj.  $A^2r-i^2s$ 'tu^2s. See **ARISTATE**.

**ARISTROCARDIE** (Ger.). n.  $A^3r-i^2s$ -tro- $ka^3r$ - $de'$ . From ἀριστρος, left, and καρδία, heart. Deviation of the heart to the left. [M. 1.]

**ARISTULATE**, adj.  $A^2r-i^2s$ 'tu^2lat. Lat., *aristulatus*. Fr., *aristulé*. Having a small awn or arista. [B. 36.]

**ARISTUM** (Lat.), n. n.  $A^2r(a^3r)-i^2s$ 'tu^2m

See **ARISTON**.  
**ARITHENOÏDIEN** (Fr.). n.  $A^2r-i^2t$ -an-o- $i^2d$ - $i^2a$ - $n^2$ . See **ARITHENOIDEUS**.—**A. oblique**. See **ARITHENOIDEUS obliquus**.—**A. transversal**. See **ARITHENOIDEUS transversus**.

**ARITHMANTIA** (Lat.), n. f.  $A^2r(a^3r)-i^2th$ -ma^2n-(ma^2n)- $ti$ -( $te$ )- $a^3$ . See **ARITHMOMANCY**.

**ARITHMOMANCY**, n.  $A^2r-i^2th$ 'mo-ma^2n-si^2. From ἀριθμός, a number, and μαντεία, divination. Lat., *arithmomanthia*, *arithmantia*. Fr., *arithmomancie*. Ger., *Arithmonancie*. Divination by means of numbers. [B. 38, 78.]

**ARITQUI**, n. The fruit of the *Terminalia citrina*. [B. 121.]

**ARITHILLIS** (Lat.), n. f.  $A^2r(a^3r)-i^2t$ - $ri^2$ ' $li^2s$ . The *Mercurialis*. [Dioscorides (L. 87).]

**ARITTEE** (Telogoo), n. The *Musa paradisiaca*. [L.]

**ARIZONA**, n.  $A^2r\text{-}i^2z\text{-}o^{\prime}na^3$ . One of the territories of the United States. It has been recommended as a health-resort. [B. G. McPhail, "Virg. Med. Month.," 1874, 1, p. 543 (B, 137).]

**ARJALAS, ARJELAS, ARJELO**, n's. Languedoc names for the *Genista scorpius*. [B, 121.]

**ARJONA** (Lat.), n. f.  $A^3r\text{-}ho^{\prime}na^3$ . Named after D. F. Arjona. A genus of plants, variously referred to the *Santalaceae* or the *Oleaceae*, established by Cavanilles. [B, 121, 197.]

**ARJOON** (Hind.), n. The *Terminalia arjuna*. [B, 172.]

**ARK** (Ar.), n. The *Salvadora persica*. [L, 105.]

**ARK, ARKA** (Hind.), n's. The *Calotropis gigantea*. [B, 172; L, 78.]

**ARKAI**, n. The *Oxytenanthera abyssinica*. [B, 19.]

**ARKANSAS**, n.  $A^3r\text{-}ka^2n^{\prime}za^3s$ ,  $a^3r^{\prime}ka^2n\text{-}sa^4$ . One of the southwestern United States.—**A. hot springs**. Mineral springs in Garland County, A., having a temperature ranging from 93° to 150° F. They contain in the pint 1069 grains of solid constituents distributed as follows:

Magnesium carbonate.....	0.016	Iodine.....	trace
Calcium ".....	0.496	Bromine.....	trace
Sodium chloride.....	0.001	Calcium silicate.....	0.053
Sodium sulphate.....	0.047	Silica.....	0.233
Potassium ".....	0.029	Alumina.....	0.056
Calcium ".....	0.014	Organic matter.....	0.088
Iron sesquioxide.....	0.013	Water.....	0.018

The springs are much used in rheumatism, gout, syphilis, cutaneous affections, chronic poisoning by lead or mercury, functional uterine disease, neuralgia, and paralysis. [B, 15; G. W. Galvin, "N. Y. Med. Jour.," June 11, 1887, p. 656.]

**ARKBEIN**, n.  $A^3r\text{-}k^{\prime}ben$ . A name given in Scotland to the os pubis. [L, 45.]

**ARKEION** (Lat.), n. n.  $A^3r\text{-}ki^{\prime}(ka^{\prime}i^2)\text{-}o^2n$ . Gr.,  $\acute{\alpha}\rho\kappa\epsilon\iota\omicron\nu$ . The *Lappa major*. [L, 47.]

**ARKENAS**, n. A Youance name for the *Juniperus communis*. [L, 63.]

**ARKEUTIS** (Lat.), n.  $A^3r\text{-}ku^2\text{'ti}^3s$ . See ARCEUTHOS.

**ARKI**, n. See ARSA.

**ARKUS** (Lat.), n. m. See ARCUS.

**ARLADA, ARLADAR** (Ar.), n's. Calcined realgar. [Paracelsus (L, 53).]

**ARLANC** (Fr.), **ARLANT** (Fr.), n's.  $A^3r\text{-}la^3n^2$ . A cold mineral spring in the department of Puy-de-Domes, France, containing sodium bicarbonate, calcium, and a small amount of iron. [L, 49.]

**ARLEMASATA** (Pers.), n. The *Artemisia indica*. [L, 87.]

**ARLEQUIN** (Fr.), adj.  $A^3r\text{-}le^2\text{-}ka^2n^2$ . See HARLEQUIN.

**ARLES-LES-BAINS** (Fr.), **ARLES-SUR-TECH** (Fr.), n's.  $A^2r\text{-}la\text{-}ba^2n^2$ ,  $A^2r\text{-}lu\text{-}su^2\text{-}te^2sh$ . See AMÉLIE-LES-BAINS.

**ARLESBEERE** (Ger.), n.  $A^3r\text{-}le^2s\text{-}bar\text{-}e^2$ . See ELSEBEERE.

**ARLES CRUDUM** (Lat.), n. n.  $A^3r\text{-}lez(le^2s) kru^2(kru)/du^2m$  (du<sup>4</sup>m). Drops (perhaps of dew) falling in June, extolled by Paracelsus as a remedy for ulcers. [L, 53.]

**ARLSBEERE** (Ger.), n.  $A^3r\text{-}ls\text{'bar}\text{-}e^2$ . See ELSEBEERE.

**ARLU** (Hind.), n. See ARALU.

**ARM**, n.  $A^3rm$ . A-S. *arm*, earm. Gr.,  $\beta\rho\alpha\chi\iota\omega\nu$ . Lat., *brachium*. Fr., *bras*, *arme*. Ger., *Arm*, It., *braccio*. Sp., *brazo*. 1. In mechanics, that part of a lever which extends in either direction from the point that coincides with the centre of motion; also any arm-like part of an implement (e. g., the blade of an obstetric forceps). [B, 1.] 2. In zoology, the ray of a radiate animal, also a prehensile appendage; in the *Brachiopoda*, a process provided with dense ciliated cirri or tentacles and capable of reaching beyond the edge of the gaping shell—corresponding to the lophophore of the *Polysphaera* and supposed to subserve respiration; in the *Cephalopoda*, a long muscular process, generally provided with rows of suckers, really formed by an extension of the part corresponding to the foot in the other *Mollusca*. [A, 359; L, 204, 206.] 3. In man and the higher animals, the upper, or anterior, limb, from the shoulder to the wrist; more strictly, that portion of it which is included between the shoulder and the elbow. [C, 1.] 4. An instrument that serves to reach to a deep-seated part, as for the removal of foreign bodies, tumors, etc. [A, 385.]—**Ablösung des A'es** (Ger.). See LIBERATION of the a's and BRACHIOTOMY.—**A'ader** (Ger.). The brachial vein or artery. [L, 46.]—**A'arterie** (Ger.). The brachial artery. [L, 46.]—**A'bäder** (Ger.). Bathings or immersions of the a. in water, oil, etc. [L, 30.]—**A'band** (Ger.). 1. See ARMILLA. 2. A bracelet, worn as a charm against disease. [L, 80.]—**A'band des fünften Gehirnnerven** (Ger.). See GUSSETIAN GANGLION.—**A'bein** (Ger.). See OS BRACHII.—**A'bein-Ellbogen-muskeln** (Ger.). See HUMERO-OLECRANUS externus, internus, and minor, and ANCONÆUS.—**A'beinkopf**. The head of the os brachii. [A, 317.]—**A'beinröhre** (Ger.). See FOCILE.—**A'benge** (Ger.). **A'bengung** (Ger.). See FLEXURA cubitalis.—**A'binde** (Ger.). A bandage or sling for the a. **ARM** (Ger.), adj.  $A^3rm$ . Poor.—**A'blätterig**. Having few leaves; paucifolius. [B, 198.]—**A'blüthig**. Having few flowers; pauciflorus. [B, 198.]—**A'kernig**. Oligopyrenus. [B, 198.]—**A'samig**. Having few seeds. [B, 198.]—**A'strahlig**. Pauciradiatus. [B, 198.]—**A'striemig**. Paucivittatus. [B, 198.]

**ARMA** (Lat.), n. n. pl.  $A^3r\text{-}ma^3$ . Gen., *armo'rum*, *ar'mum*. From *arēre* (a radical form of *ἀπαρκεῖν*), to join, to fit together, to furnish with. Those appendages of an organism which serve a special purpose, especially organs of defense.—**A. ventris**. The male genitals.

**ARMADILLIDIUM** (Lat.), n. n.  $A^3r\text{-}ma^3\text{-}di^2\text{-}li^2\text{-}u^2m(u^4m)$ . Fr., *armadillidie*. Ger., *Rollassel*. A genus of crustacean animals of the order Isopoda, family Oniscidae, established by Brandt. It differs from the related genus *Armadillo* in the presence of a semilunar process upon the anterior surface of the head, and in other characters. [B, 180.]—**A. commutatum** [Brandt]. Ger., *verwechselte Rollassel*. Syn.: *Armadillo officinarum* [Duméril], *Oniscus variegatus* [Vill.]. A species living in Asia Minor and Syria and formerly introduced into commerce with the *Armadillo* (q. v.) as *millepedes*. [B, 180.]—**A. depressum** [Brandt]. Ger., *niedergedrückte Rollassel*. A species resembling *A. commutatum* in habit, general structure, and medicinal applications. [B, 180.]

**ARMADILLIEN** (Fr.), adj.  $A^3r\text{-}ma^3\text{-}di^2\text{-}li^2\text{-}a^2n^2$ . Resembling an armadillo; as a n., in the pl. a's, a division of Milne-Edwards's tribe *Clopotes terrestres*, characterized by the hinder feet being visible from above between the last two segments of the body, beyond which they are not prolonged. [L, 41, 208.]

**ARMADILLO** (Lat.), n. m.  $A^3r\text{-}ma^3\text{-}di^2\text{-}li^2$ . Of Brandt, a genus of crustacean animals belonging to the order Isopoda, family Oniscidae. [B, 180.]—**A. officinalis**, **A. officinarum**. Fr., *arma-*

dille des boutiques, cloporte préparé. Ger., Kugelassel, Rollassel. Syn.: *Oniscus asellus* [Linnaeus] (1st def.). 1. Of Brandt, a species indigenous to Egypt and northern Asia, having a flat dark-green body from 1 to 2 cm. long, which is capable of rolling up into the form of a ball. It secretes an acrid juice which is irritant and diuretic and has been thought to be poisonous. It was formerly official in several European pharmacopœias, and was used, dried and powdered, in infusion, or in the form of the expressed juice, as a diuretic, antiseptic, and aperitive. [A, 319; L, 43.] 2. Of Duméril, the *Armadillidium commutatum*. [B, 180.]—*A. vulgare*. See *A. officinarum*.—*Voltaic a*. The trade name of an arrangement of metallic plates fastened to a strap, band, or other like device, to be worn on the person for its electrical effect.

**ARMAGNAC** (Fr.), n.  $A^3r\text{-}ma^3n\text{-}ya^3k$ . A variety of French brandy, esteemed next to cognac. [A, 308; L, 40.]

**ARMAJOLO** (It.), n.  $A^3r\text{-}ma^3\text{-}yo^3lo$ . A place in Tuscany, where there are hot sulphurous springs. [L, 49.]

**ARMALA** (Lat.), n. f.  $A^3r\text{-}ma^3\text{-}la^3$ . Gr., ἀρμала. A Syrian name for the wild rue. [Dioscorides (A, 311).]

**ARMALGAL**, **ARMALGOL**, n's. Old names for coral. [L, 84.]

**ARMAMENTARIUM** (Lat.), n. n.  $A^3r\text{-}ma^3\text{-}me^3nt\text{-}a^3(u^3m)$ . Gr., ὀπλισμα. Fr., armement. Ger., Instrumentensammlung. It., armamentario. Lit., an arsenal or armory; a collection of instruments or appliances. [D.]—*A. chirurgicum*. A collection of surgical instruments. [D, 130.]—*A. Lucinae*. A collection of obstetrical appliances; also the title of a book on obstetrics, by Kilian.—*A. portabile*. A portable case of instruments. [D, 90.]

**ARMARINTE** (Fr.), n.  $A^3r\text{-}ma^3\text{-}ra^3nt$ . See CACHRYS.

**ARMARIUM** (Lat.), n. n.  $A^3r\text{-}ma^3(r\text{-}i^2\text{-}u^3m(u^3m))$ . See ARMAMENTARIUM.

**ARMARIUS** (Lat.), adj.  $A^3r\text{-}ma^3(ma^3)r\text{-}i^2\text{-}u^3s(u^3s)$ . Pertaining to weapons.—*Unguentum armarium*. See HOPLOCHRISMA.

**ARMATIUM** (Lat.), n. n.  $A^3r\text{-}ma^3(ma^3)shi^2(t\text{-}i^2)\text{-}u^3m(u^3m)$ . An old eye-water made with *æs usta*, ammoniac, etc. [L, 119.]

**ARMATURA** (Lat.), n. f.  $A^3r\text{-}ma^3\text{-}tu^2(tu^3)ra^3$ . See ARMATURE.—*A. conceptus*. An old name for the amnion. [A, 325.]

**ARMATURE**, n.  $A^3r\text{-}ma^3\text{-}tu^2r$ . Lat., *armatura*. Fr., *armature*. Ger., *Armatur*, *Anker* (3d def.), *Bewaffnung*. It., *armatura*. Sp., *armadura*. 1. Any defensive equipment of a plant or an animal. [B.] 2. A condenser, especially the sheet of tin-foil with which the interior and exterior of a Leyden jar are coated. [L, 41.] 3. The keeper of a magnet; a piece of soft iron placed in contact with the poles of a magnet, to prevent the dissipation of its magnetic force. [B.]—*A. gastrique* (Fr.). See *ARMURE gastrique*.—*A. métallique* (Fr.). The pieces of metal used in metallotherapy. [L, 41.]—*A. stomacale* (Fr.). See *ARMURE gastrique*.—*Gastric a*. An a. guarding the stomach or its analogue, as in the *Isoпода*. [B, 100.]—*Genital a*. An a. guarding the genital orifice, as in the cockroach. [B, 100.]

**ARMATUS** (Lat.), adj.  $A^3r\text{-}ma^3(ma^3)tu^3s(tu^3s)$ . From *armare*, to arm. See ARMED.—*Armata manus*. See MANUS ARMATA.

**ARME** (Lat.), n. f.  $A^3r\text{-}me^3(ma)$ . Gr., ἀρμή (from ἀρμω [a radical form of ἀρᾶσκειν]). 1. Any adaptation or joining of parts together, especially by the form of articulation termed suture. [A, 325; D, 100; L, 94.] 2. The approximation and adjustment of the lips of a wound. [D, 100.]

**ARME** (Fr.), n.  $A^3rm$ . See ARM (4th def.) and ARMATURE.

**ARMED**, adj.  $A^3rmd$ . Lat., *armatus*. Fr., *armé*, *garni* (2d def.). Ger., *armirt*, *bewaffnet* (1st def.). It., *armato*. Sp., *armado*. 1. Provided with means of defense (said of animals and plants). [B.] 2. Provided with an armature (said of magnets). [L, 42.] 3. Furnished with an accessory part suitable for some special purpose (said of instruments). [D, 142.]

**ARNEL**, n. An Oriental name for the *Peganum harmala*. [L, 105.]

**ARMENA** (Lat.), n. n. pl.  $A^3r\text{-}me^3n\text{-}a^3$ . Gr., ἀρμενα. See ARMAMENTARIUM.

**ARMENIACA** (Lat.), n. f. of adj. *armeniacus* (*arbor* understood), because held to be originally derived from Armenia.  $A^3r\text{-}me^3n\text{-}i(e)^3a^3ka^3$ . The apricot (*Prunus a.*); also a genus of amygdalaceous trees, including the apricot, separated from the genus *Prunus*. [B, 19.]—*A. atropurpurea* [Lois.]. See *PRUNUS dasycarpa*.—*A. brigantia* [Persoon]. See *PRUNUS brigantia*.—*A. dasycarpa* [Persoon]. See *PRUNUS dasycarpa*.—*A. epirotica*. *A. malus*. *A. vulgaris* [Lamarck]. See *PRUNUS armeniaca*.—*Gummi armeniaca*. The gum exuding from the stems of the apricot-tree (*Prunus a.*), used for the same purposes as cherry-tree gum. [B, 180.] See *Gummi CERASORUM* (under CERASUS).

**ARMENIACUM** (Lat.), n. n.  $A^3r\text{-}me^3n\text{-}i(e)^3a^3ku^3m(ku^3m)$ . An old name for gum ammoniacum. [B.]

**ARMENIACUS** (Lat.), adj.  $A^3r\text{-}me^3n\text{-}i(e)^3a^3ku^3s(ku^3s)$ . Gr., ἀρμενιακός. 1. Of or pertaining to Armenia. See ARMENIACA, ARMENIACUM, GUMMI ARMENIACUM, and PRUNUS ARMENIACA. 2. Having the color of an apricot. [B, 19.]

**ARMENITE**, n.  $A^3r\text{-}me^3n\text{-}it$ . Lat., *lapis armenius*. Fr., *arménite*. Ger., *armenischer Stein*, *Bergblau*. Native copper carbonate, formerly used as a purgative. [A, 322, 385.]

**ARMERIUM** (Lat.), n. n. of adj. *armenius* (*pigmentum* understood).  $A^3r\text{-}me^3(ma^3)ni^2\text{-}u^3m(u^3m)$ . See ARMENITE.

**ARMERIUS** (Lat.), adj.  $A^3r\text{-}me^3(ma^3)ni^2\text{-}u^3s(u^3s)$ . Armenian.—*Lapis a*. See ARMENITE.

**ARMENTIA** (Sp.), n.  $A^3r\text{-}me^3n\text{-}te\text{-}a^3$ . A place in Spain, where there is a chalybeate spring. [A, 385.]

**ARMENTUM ALBUM** (Lat.), n. n.  $A^3r\text{-}me^3nt\text{-}u^3m(u^3m)$ . White lead; basic lead carbonate. [B, 196.]

**ARMERIA** (Lat.), n. f.  $A^3r\text{-}me^3(ma^3)ri^2\text{-}a^3$ . Ger., *Grasnelke* (2d def.). 1. An ancient name for the *Lychnis flos cuculi*. [L, 105.] 2. A genus of plumbaginaceous plants separated by Willdenow from the genus *Statice*, including species with flowers having a tubular-infundibuliform calyx and a 5-parted corolla, borne in compact heads surrounded by bracts the outer of which are prolonged upon the scape in the form of a sheath. [B, 19, 180.]—*A. elongata* [Hoffmann]. See *A. vulgaris*.—*A. latifolia* [Willdenow]. Broad-leaved sweet-william. A species with very broad leaves and rose-red flowers, indigenous to southern Europe and cultivated in the United States. [B, 34.]—*A. maritima* [Willdenow]. The *A. vulgaris*, var. *maritima*. [B, 180.]—*A. purpurea* [Koch]. The *A. vulgaris*, var. *purpurea*. [B.]—*A. rubra latifolia*. See *A. latifolia*.—*A. scorzonifolia* [Link]. See *A. latifolia*.—*A. vulgaris* [Willdenow]. Ger., *gemeine Grasnelke*. Syn.: *Statice a*. [Linnaeus]. Sea-pink, thrift. A species growing in sandy regions throughout Great Britain and Continental Europe, distinguished by its linear, acute, ciliate, downy leaves, and ovate bracts, the exterior terminating in a bristle-shaped extremity. Three varieties are distinguished: 1. The *A. vulgaris*, var. *elongata*, the *Statice elongata* of Hoffmann, the most common variety. 2. A purple-flowered variety, *A. vulgaris*, var. *purpurea*. 3. *A. vulgaris*, var. *maritima*, the *A. maritima* of Willdenow and the *Statice pubescens* of Hayne, a maritime variety characterized by its obtuse leaves, short scapes covered with fine hairs, truncate bracts, and hairy calyx. The leaves (*folia statice*) have a mild astringent action and were formerly used in diarrhoea, in menorrhagia, and in the preparation of gargles for oral affections; and the flowers (*flores armerie*) were used as a styptic. [B, 180; L, 57.]—*Flores armerie*. The flowers of *A. vulgaris*. [L, 57.]

**ARMERIAEAE** [Dumortier], **ARMERIEAE** [Reichenbach] (Lat.), n's f. pl.  $A^3r\text{-}me^3r\text{-}i^2\text{-}a^3(se^2(ke^2)e^3a^3e^2)$ ,  $-(e)^3e^3a^3e^3$ . Subdivisions of the *Thalamisertia* or *Plumbagineae*, including *Armeria*, or *Statice*. [B, 170.]

**ARMERIASTRUM** (Lat.), n. n.  $A^3r\text{-}me^3r\text{-}i^2\text{-}a^3st(a^3st)ru^3m(ru^3m)$ . See ACANTHOLIMON.

**ARMERIS** (Lat.), n. m.  $A^3r\text{-}me^3(ma^3)ri^2\text{-}u^3s(u^3s)$ . See ARMERIA.

**ARMETSWEIDE** (Ger.), n.  $A^3r\text{-}me^3ts\text{-}vi\text{-}de^2$ . The *Salix viminalis*. [B, 180.]

**ARMIAGRION** (Lat.), n. n.  $A^3r\text{-}mi^2a^3g(a^3g)ri^2\text{-}o^2n$ . An old name for the *Arum dracunculoides*. [Dioscorides (L, 105).]

**ARMICEPS** (Lat.), adj.  $A^3r\text{-}mi^2se^2ps(ke^2ps)$ . From *arma*, defenses, and *caput*, the head. Fr., *armiceps*. Having bony or calcareous defenses for the head; in the neut. pl., as a n., *Armicipita*, a tribe of the *Clupeidae* (herrings) so provided. [Latreille (L, 208).]

**ARMIFER** (Lat.), adj.  $A^3r\text{-}mi^2fu^3r(fe^3r)$ . From *arma*, defenses, and *ferre*, to bear. See ARMIGER.

**ARMIGENUS** (Lat.), adj.  $A^3r\text{-}mi^2j(mi^2g)e^3n\text{-}u^3s(u^3s)$ . From *arma*, defenses, and *gena*, the cheek. Fr., *armigène*. Sp., *armigeno*. Having the cheeks shielded (said of fishes—the *Armigenæ*). [L, 208.]

**ARMIGER** (Lat.), adj.  $A^3r\text{-}mi^2ju^3r(ge^3r)$ . From *arma*, defenses, and *gerere*, to bear. Fr., *armigère*. Ger., *waffentragend*. Sp., *armijero*. See ARMED (1st def.).

**ARMILLA** (Lat.), n. f.  $A^3r\text{-}mi^2la^3$ . Fr., *armille*. Ger., *Armille*, *Armband*. Lit., a bracelet or ring; in ornithology, the colored circle of the distal naked end of the tibia; in mycology, the same as annulus superus. [B, 54; L, 108.]—*A. manus membranosa*. The annular ligament of the wrist. [P. Barbette (L, 53).]—*A. nervi trigemini*. Ger., *Armille des fünften Gehirnnerven*. The Gasserian ganglion. [L, 31.]

**ARMILLARIA** (Lat.), n. f.  $A^3r\text{-}mi^2la(la^3)ri^2\text{-}a^3$ . A subgenus of hymenomycetous *Fungi* belonging to the genus *Agaricus* (q. v.). [B, 69, 74.]

**ARMILLARIS** (Lat.), adj.  $A^3r\text{-}mi^2la(la^3)ri^2\text{-}s$ . Fr., *armillaire*. Ger., *armbandig*. In botany, having the leaves arranged in circles around the stalk. [L, 41.]

**ARMILLATE**, adj.  $A^3r\text{-}mi^2lat$ . Lat., *armillatus*. Fr., *armille*. Sp., *armillado*. 1. In botany, having an armilla, or velum. The Lat., *armillatus*, is used as a species-name. [B, 74.] 2. In zoology, having bracelet-like rings of a different color from that of the rest of the body. [L, 41, 109.]

**ARMINUSQUELE** (Ger.), n.  $A^3r\text{-}mi^2n\text{-}i^2u^3s\text{-}kwe^2l\text{-}le^2$ . The most important of the mineral springs at Lippspringe, near Paderborn, in Westphalia, having a temperature of 20° 3' C. (= 68° 3' F.). One thousand parts of the water contain:

Calcium sulphate.....	0.824	Magnesium carbonate...	0.034
Sodium sulphate.....	0.846	Magnesium bicarbonate...	0.051
Calcium carbonate.....	0.416	Ferrous carbonate.....	0.019
Calcium bicarbonate.....	0.602	Sodium chloride.....	0.033

The gas escaping from the spring consists of:  
Carbonic acid. 149° 0 | Nitrogen..... 824° 4 | Oxygen..... 26° 6  
The waters are drunk and used as baths and their vapor is inhaled, chiefly for pulmonary affections. [A, 319.]

**ARMIPES** (Lat.), adj.  $A^3r\text{-}mi^2pe^2(pe^2s)$ . From *arma*, defenses, and *pes*, the foot. Fr., *armipède*. Sp., *armipedo*. Having the feet provided with claws or spines. [L, 41, 116.]

**ARMLEUCHTER** (Ger.), n.  $A^3rm\text{-}loich\text{-}te^2r$ . The plant water-horsetail. [A, 315.] See CHARA.—*A. gewächse*. See CHARACEAE.—*Gemeiner A*. See CHARA vulgaris.

**ARMOISE** (Fr.), n.  $A^3rm\text{-}wa^3z$ . 1. The genus *Artemisia*. 2. The *Artemisia vulgaris*. [Fr. Cod. (B).]—*A. absinthia*, *A. amère*.

See *ARTEMISIA absinthium*.—**A. à moxas**. See *ARTEMISIA moxa*.—**A. aurore**. See *ARTEMISIA abrotanum*.—**A. bâtarde**. A name given to several composite plants, especially the *Parthenium hysterophorum*. [B, 121.]—**A. blanche**. See *CINERARIA maritima*.—**A. commune**. See *ARTEMISIA vulgaris*.—**A. de Judée**. See *ARTEMISIA judaica*.—**A. de montagne**. See *A. bâtarde*.—**A. des champs**. See *ARTEMISIA campestris*.—**A. en épis**. See *ARTEMISIA spicata*.—**A. estragon**. See *ARTEMISIA dracunculifolia*.—**A. pontique**. See *ARTEMISIA pontica*.—**A. vulgaire**. See *ARTEMISIA vulgaris*.—**Eau d'a**. See *Aqua ARTEMISIAE*.—**Extrait d'a**. (feuille) [Fr. Cod.]. An extract made from the leaves of mugwort by exhausting with boiling water and evaporating to the consistency of a soft extract. [B, 113.]—**Grande a**. See *ARTEMISIA absinthium*.—**Huile essentielle d'a**. See *Oleum ARTEMISIAE cethereum*.—**Hydrolat d'a**. See *Aqua ARTEMISIAE*.—**Oléole d'a**. See *Oleum ARTEMISIAE cethereum*.—**Petite a**. See *ARTEMISIA pontica*.—**Sirop d'a composé**, **Sirop d'a et de sabbine**. See *Syrupus ARTEMISIAE compositus*.—**Sirop d'infusion d'a**. See *Syrupus ARTEMISIAE*.—**Tisane d'a**. [Fr. Cod.]. An infusion of 1 part of *Artemisia vulgaris* in 100 parts of boiling water. [B, 113.]

**ARMOL** (Fr.), n.  $A^3r$ -mol. See *ATRIPLEX hortensis*.

**ARMONIA** (Lat.), n. f.  $A^3r$ -mo-ni<sup>2</sup>-a<sup>3</sup>. See HARMONIA.

**ARMONIACUM** (Lat.), n. n.  $A^3r$ -mo-ni(ne)<sup>2</sup>-a<sup>3</sup>-ku<sup>2</sup>m(ku<sup>4</sup>m). See AMMONIACUM.

**ARMOON**, n. A name given in Languedoc to different species of *Atriplex* and *Potentilla*. [B, 121.]

**ARMORACIA** (Lat.), n. f.  $A^3r$ -mo-ra(a<sup>3</sup>)<sup>2</sup>/si<sup>2</sup>(ki<sup>2</sup>)-a<sup>3</sup>. Anciently written also *armoracia* and *armoracium*. Gr., ἀρροακία. Fr., *raifort*, *radix de cheval*. Ger., *Meerrettig*. It., *rafano*. Sp., *rabano*, *marisco*. The horseradish. A genus of cruciferous herbs separated by Rupp from the genus *Cochlearia* of Linnaeus, from which it is distinguished chiefly by the absence of a middle nerve upon the valves of the silicle. It is usually referred to *Cochlearia*, of which, according to De Candolle, it is a section. [A, 259, 304; B, 42, 180, 214.]—**Acetum armoraciae**. Fr.,  *vinaigre de raifort*. An infusion of 3 parts of horseradish-root in 50 of vinegar. [Swediaur (A, 362).]—**Aqua armoraciae** [Fr. Cod., 1837]. Fr., *hydrolat de raifort*. A preparation made by distilling 4 parts from a mixture

THE ARMORACIA RUSTICANA. [A, 327.]

of 2 parts of horseradish-root and 10 of water. [A, 362.]—**Armoraciae radix** [Br. Ph.]. The root of *A. rusticana*. [A, 247.]—**A. americana** [Arnott]. Syn.: *Nasturtium lacustre* [Gray] (et *natans*, var. *B. americanum* [Gray]). An aquatic species indigenous to America, distinguished by its ovoid silicle scarcely longer than the style. [B, 34.]—**A. macrocarpa** [Baumgarten]. A Hungarian species closely resembling *A. rusticana*, but having a somewhat less biting rhizome. [B, 180.]—**A. rustica** (Gärtner). Fr., *raifort sauvage*, *moutarde des moines* (ou des *Capucines*, ou des *Alémans*), *cran*, *cochlearia de Bretagne*. Ger., *gemeiner Meerrettig*, *Kren*. It., *rafano rustico* (o *selvaggio*). Sp., *rabano*, *marisco*. Syn.: *Cochlearia* (Linnaeus) (seu *rustica* [Lamarck]), *Raphanis magna* (Müschl). Horseradish; a European herb, naturalized in the United States, having a smooth, angular, branching stalk 2 to 3 feet high; large oblong crenate radical leaves and long lanceolate cauline leaves, the lower frequently pinnatisect, the upper dentate or entire; small white flowers; and ellipsoid roundish silicle much longer than the style. The rhizome—a [Br. Ph. (1864)], *armoraciae radix* [Br. Ph. (1867)], *radix armoraciae*, *radix raphani rusticani* (seu *rustici*, seu *marini*, seu *silvestris*)—is large, white, and fleshy, of penetrating irritant odor and very acrid burning taste, and contains a very volatile, exceedingly irritant, corrosive, yellowish oil, believed to be identical with oil of mustard, *myronic acid*, and *myrosin*, with small quantities of resin, sugar, gum, starch, etc. It is used as a condiment, and medicinally as a remedy in scurvy, as a stomachic tonic, and, both externally and internally, in paretic conditions and chronic rheumatism. [B, 5, 34, 180.]—**A. sativa** [Helber]. Fr., *raifort cultivé*, *radix noir*. Cultivated horseradish. [A, 362.] See *A. rusticana*.—**Infusum armoraciae**. Fr., *infusio* (ou *hydrolat*) *de raifort*. An old preparation made by infusing for 2 hours 31 parts each of horseradish-root and mustard in 473 of boil-

ing water, straining, and adding 31 parts of spiritus cochleariae compositus. [U. S. Ph., 1820, Batav. Ph., 1805, Dubl. Ph., 1826 (A, 362).]—**Mel armoraciae**. Fr., *miel de raifort*. A mixture of 1 part of the juice of wild horseradish-root and 4 parts of honey. [Batav. Ph., 1805, Swed. Ph., 1817 (A, 362).]—**Radix armoraciae**. Horseradish-root; the rhizome of *A. rusticana* (q. v.). [B, 180.]—**Radix armoraciae rasa**. Scraped horseradish-root. [L, 57.]—**Spiritus armoraciae compositus** [Br. Ph.]. Fr., *esprit de raifort composé*, *alcoolat antiscorbutique*. Compound spirit of horseradish; made by distilling a gallon from a mixture of 20 oz. (av.) each of horseradish-root and bitter-orange peel,  $\frac{1}{2}$  oz. of nutmeg, 1 gallon of proof spirit, and 2 pints (imp.) of water. [Br. Ph. (B).]—**Syrupus armoraciae**. Fr., *sirop de raifort*. A syrup made by dissolving 2 parts of sugar in 1 part of the juice of horseradish-root. [Swed. Ph., 1817, Würt. Ph., 1798 (A, 362).]—**Syrupus armoraciae compositus**. Fr., *sirop de raifort composé*, *sirop antiscorbutique*. Syn.: *syrupus antiscorbuticus*. A syrup made by macerating for 2 days a mixture of 1 lb. each of horseradish, scurvy-grass, watercress, *Menyanthes trifoliata*, and bitter oranges,  $\frac{1}{2}$  oz. of carumon, and 4 lb. of white wine, distilling 1 lb., adding 2 lb. of sugar, and mixing this syrup with another, clarified with white of egg, made by adding 2 lb. of sugar to the liquor expressed from the residue after the distillation. [Fr. Cod., 1837 (A, 362).] Somewhat different formulae were given in several old pharmacopoeias.—**Vinum armoraciae**. Fr., *vin* (ou *œnole*) *de raifort*. Wine of horseradish; made by infusing 18 parts of the root in 288 of white wine for 4 days, and filtering. [Swed. Ph., 1817 (A, 362).]—**Vinum armoraciae compositum**. Fr., *vin de raifort composé*, *vin antiscorbutique*. Compound wine of horseradish; made by mixing 1 oz. of alcoolé de raifort composé [Fr. Cod., 1837] and 2 lb. of white wine. [Form. pharm. à l'usage d. h. p. milit. de France, 1839 (A, 362).] Several other formulae were given in a number of old formularies.

**ARMORACIÆ** (Lat.), n. f. pl.  $A^3r$ -mo-ra<sup>3</sup>-si(ke)<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). Of Reichenbach, a section of cruciferous plants belonging to the *Alyseeae*, comprising *Armoracia*, *Cochlearia*, and 2 other genera. [B, 170.]

**ARMORARIA, ARMORATIA** (Lat.), n's f.  $A^3r$ -mo-ra(ra<sup>3</sup>)-ri<sup>2</sup>-a<sup>3</sup>, -shi<sup>2</sup>(ti<sup>2</sup>)-a<sup>3</sup>. See ARMORACIA.

**ARMOREIRA**, n. A Persian name for the mulberry-tree (*Morus nigra*). [A, 259.]

**ARMOSELLE** (Fr.), n.  $A^3r$ -mo-se<sup>2</sup>l. The genus *Seriphium*. [B, 121.]

**ARMPIT**, n.  $A^3r$ m-pi<sup>2</sup>t. See AXILLA.

**ARMUNGIA** (It.), n.  $A^3r$ -mun<sup>2</sup>-ji<sup>2</sup>-a<sup>3</sup>. A place in Sardinia, where there is a cold saline spring. [A, 385.]

**ARMURE** (Fr.), n.  $A^3r$ m-u<sup>2</sup>r. See ARMA and ARMATURE.—**A. buccale**. The hard tissues or parts at the oral opening of the alimentary canal, including the teeth, etc., serving to protect the soft parts, to comminute the food, and to prevent its escape. [L, 158.]—**A. copulatrice**. Certain appendages of the penis in some animals, serving to protect it when flaccid or to retain it in the vagina during copulation. In many insects they consist of a circle of spines at the base of the organ. [L, 158.]—**A. des jambes**. See HIPPOCAMPUS major.—**A. gastrique**. The "gastric mill"; a collection of hard, bone-like papillae found in the stomach in many of the lower animals, serving to triturate the food. [L, 158; Mocquard, "Ann. des sci. nat.," xvi, p. 1 (L).]—**A. génitale**. See *A. copulatrice*.—**A. pharyngienne**. Hard papillae of the pharynx found in many insects, serving the same purpose as the *a. gastrique*. [L, 158.]

**ARMUS** (Lat.), n. m.  $A^3r$ -mu<sup>2</sup>s(mu<sup>4</sup>s). Gr., ἀρμός (see ARMA). 1. The shoulder, the fore quarter, or the whole side of an animal. [A, 312.] 2. The upper arm. [L, 50.] 3. See HARMONIA.—**Armi summus**. See ACROMION.

**ARMUTHEUS** (Lat.), adj.  $A^3r$ -mu<sup>2</sup>(mu)<sup>2</sup>/the<sup>2</sup>-u<sup>2</sup>s(u<sup>4</sup>s). See ARMENIUS.

**ARN**, n.  $A^3r$ n. Fr., *aune*. See ALNUS glutinosa.

**ARNABO**, n. 1. Zedoary. [L, 84.] 2. Lead. [Quincy (L, 116).]

**ARNALDIA** (Lat.), n. f.  $A^3r$ -na-a<sup>2</sup>(a<sup>3</sup>)<sup>2</sup>/di<sup>2</sup>-a<sup>3</sup>. Fr., *arnaldie*. A word of uncertain origin (perhaps a corruption of *analdia* (q. v.), used in the middle ages to designate a disease prevalent in England, described as malignant and chronic and characterized by falling out of the hair; or, simply baldness. [A, 325, 385; L, 50.]

**ARNATTA, ARNATTO**, n's.  $A^3r$ -na-a<sup>2</sup>/ta<sup>2</sup>, -to. See ANOTTO.

**ARNEBIA** (Lat.), n. f.  $A^3r$ -ne(na)<sup>2</sup>/bi<sup>2</sup>-a<sup>3</sup>. From Ar., *arānēl*, *al-arnet*. Fr., *arnébie*. A species of boraginaceous plants established by Forskål, allied to *Lithospermum*, but distinguished by the bifid style and the frequently 4-lobed stigma. [B, 19.]—**A. perennis** [De Candolle]. A species growing in the mountains of Siberia, having a red root, which contains a coloring matter allied to alkapna and similarly employed. [B, 121, 214.]—**A. tinctoria** [Forskål]. A species growing in Egypt, Arabia, and Syria, the root of which is used like that of *A. perennis*. [B, 214.]—**A. tingens** [De Candolle]. A species growing in Asia Minor, having a red root used like that of *A. perennis*. [B, 121, 214.]

**ARNEDILLO** (Sp.), n.  $A^3r$ -na-del<sup>2</sup>yo. A place in Spain, where there are hot springs containing sodium chloride, the waters of which are used in the treatment of syphilis. [A, 385; L, 49.]

**ARNICA** (Lat.), n. f.  $A^3r$ -ni<sup>2</sup>-ka<sup>3</sup>. Supposed to be a corruption of *plarnica* (from *παρμύκη*), a plant that causes sneezing. Fr., *arnica*, *arnique*. Ger., *Arnica*, *Arnika*, *Wohlverleih*. It., *arnica*. Sp., *arnica*. A genus of composite herbs, established by Linnaeus, belonging to the tribe *Senecionideae*. It is distinguished by its entire opposite leaves and by its yellow flowers borne on a flat receptacle, surrounded by a single or double row of equal lanceolate bracts. The florets of the rays are ligulate and female only, those of the disc are tubular and perfect; the corolla tube and the branched style are hairy. The fruit is ribbed, hairy, and sur-

mounted by a single-rowed, rigid, serrulate pappus. [B, 19, 34.]—**Alecolature d'a.** [Fr. Cod.] (Fr.). A preparation made by macerating a. tops for 10 days in their own weight of alcohol, and filtering. [B.]—**A. angustifolia** [Vahl]. A species with lanceolate radical leaves growing in Lapland and about the Gulf of St. Lawrence. [B, 214.]—**A. Clusii** [All.]. **A. doronicum** [Jacquin]. See **DORONICUM hirsutum**.—**A. de Suède** (Fr.). The *Inula dysenterica*, sometimes substituted for *A. montana*. [A, 301; L, 32.]—**Arnicae flores** [U. S. Ph.]. **A. flowers.** Fr., *fleurs d'a.* [Fr. Cod.]. Ger., *Arnikablüthen*. It., *fiore di arnica*. Sp., *flores de arnica*. The flower-heads of *A. montana*. [B.]—**Arnicae radix** [U. S. Ph.]. Br. Ph., 1867. **Arnicae rhizoma** [Br. Ph., 1885]. See *A. root*.—**A. glacialis** [Wulf]. A variety of the *DORONICUM grandiflorum*. [B, 42, 214.]—**A. leaves.** Lat., *folia arnicae*. Fr., *feuilles d'a.* [Fr. Cod.]. Ger., *Arnikablätter*. It., *foglie di arnica*. Sp., *hojas de arnica*. The leaves of *A. montana*. [B.]—**A. mollis** [Hooker]. A species growing in the White Mountains and Rocky Mountains of the United States, distinguished by the numerous sessile leaves upon its stem and the petiolate radical leaves and by the hairy achenia. [B, 34.]—**A. montana** [Linnaeus]. Fr., *a. (ou arnique, ou betoine, ou tabac) des montagnes, betoine des Savoyards, plantain des Alpes (ou des Vosges), quinquina des pauvres* [Stahl], *panacée des chutes, herbe aux précheurs, tabac des Vosges (ou des Savoyards), doronic d'Allemagne*. Ger., *Bergwohlverleih, Falkkraut, Stiechkraut, Engelkraut, Laugenkraut, Mönchswurz, Mutterwurz, Luzianskraut*. Sp., *arnica de las montañas*. Mountain a., ordinary a., leopard's-bane, panacea lapsorum, accident-plant [Stillé and Maisch]; indigenous to Siberia and northern Europe. A perennial herb with striated hairy stem, about a foot in height, bearing a couple of pairs of opposite lanceolate bright-green leaves and a few heads of orange-yellow flowers, about 14 lines in breadth. The radical leaves are bright-green, oblong-obovate and almost entire. The rhizome is 2 inches long, about 2 lines in breadth, brown and scarred externally, white within, with a layer of resin-cells underlying the thickish bark. All parts of the plant have a feeble aromatic odor and a pungent, bitter, acrid taste, and contain an alkaloid *arnicine* [Bastick], a bitter substance *arnicin* [Walz], *inulin*, isobutyric and other organic acids, and a volatile oil, of sp. gr. 0.999, consisting principally of *dimethylthymohydroquinone*. The flowers are official in the U. S. Ph., the Ger. Ph., and the Fr. Cod.; the root or rhizome is official in the U. S. Ph., the Br. Ph., and the Fr. Cod.; and the leaves are official in the Fr. Cod. The plant is considered a cerebro-spinal stimulant and an irritant to the intestinal tract. As a domestic remedy, a tincture of the flowers is extensively used as an application to bruises and other injuries; thus used, it sometimes gives rise to severe cutaneous irritation, said to be due to the fact that some specimens of the flowers are infested with an animal parasite of an irritating nature (*Musca arnica*). [A, 304, 362; B; L; a, 12.]—**A. nudicaulis** [Elliot]. A species growing in the southern United States, distinguished by its sessile leaves, those of the stem being small and few, and by its glabrous achenia. [B, 34.]—**A. opodeldoc.** A liniment made by heating together 4 parts of white soap, 10 of rectified spirit, 5 of tincture of a., and 1 part of camphor, and straining. [Squire (L, 63).]—**A. planensis.** See *A. montana*.—**A. plaster.** See *Emplastrum arnicae*.—**A. root.** Lat., *arnicae radix* [U. S. Ph.]; Br. Ph., 1867. Fr., *rhizome d'a.* [Fr. Cod.]. Ger., *Arnikawurzel*. It., *radice di a.* Sp., *raíz de arnica*. The rhizome of *A. montana*. [B.]—**A. scorpioides** [Linnaeus]. See *DORONICUM grandiflorum*.—**A. spuria.** See *PULICARIA dysenterica*.—**A. styriaca** [Vill.]. See *DORONICUM hirsutum*.—**A. suedensis.** See *PULICARIA dysenterica*.—**A. tinctur** [Ger. Ph.] (Ger.). See *Tinctura arnicae*.—**Emplastrum arnicae** [U. S. Ph.]. Fr., *emplâtre d'arnique*. Ger., *Arnikapflaster*. A plaster made by mixing 1 part of extract of a. root with 2 parts of resin plaster, over a water-bath. [B.]—**Essentia arnicae.** See *Tinctura arnicae*.—**Extract of a. root.** See *Extractum arnicae radicis*.—**Extractum arnicae alcoholicum.** Fr., *extrait alcoolique d'a.* An extract of a. flowers, official in several old pharmacopœias, different proportions of the ingredients being used. The Würzb. Ph. of 1796 directed 1 part of the flowers, 8 parts of water, and 1 part of alcohol to be digested at a gentle heat for 3 days, the expressed liquor then to be freed from the alcohol by distillation, and the residue evaporated. [L, 85.]—**Extractum arnicae aquosum.** Fr., *extrait aqueux d'a.* An aqueous solid extract of a. flowers, official in several old pharmacopœias, made with cold or boiling water, by infusion or decoction,

ARNICA MONTANA. (AFTER B. FRANCE  
[A, 304].)

followed by clarification, expression or straining, and evaporation. [L, 85.]—**Extractum arnicae radicis** [U. S. Ph.]. Fr., *extrait de racine d'arnique*. Ger., *Arnikaeextract*. Extract of a. root; made by exhausting the root of *A. montana* with dilute alcohol, evaporating the liquid to the pilular consistence, and adding 5 per cent. of glycerin. [B.]—**Extractum arnicae radicis fluidum** [U. S. Ph.]. Fluid extract of a. root; made by exhausting 100 parts (by weight) of powdered a. root with dilute alcohol, reserving the first 90 parts (by volume) of the percolate, evaporating the rest to the consistence of a soft extract, mixing this with the reserved portion, and adding enough dilute alcohol to bring the whole up to 100 parts by volume. [B.]—**Extrait alcoolique d'a.** (Fr.). See *Extractum arnicae alcoholicum*.—**Extrait aqueux d'a.** (Fr.). See *Extractum arnicae aquosum*.—**Feuilles d'a.** (Fr.). The leaves of *A. montana*. [B.]—**Fleurs d'a.** (Fr.). **Flores arnicae** [Ger. Ph.]. See *Arnicae flores*.—**Flores arnicae cum pappis.** The entire flower-heads of *A. montana* with the involucre. [B, 180.]—**Flores arnicae montanae, Flores arnicae paenais.** The flowers of *A. montana*. [B, 180.]—**Flores arnicae sine pappis.** The single florets of *A. montana*. [B, 180.]—**Fluid extract of a. root.** See *Extractum arnicae radicis fluidum*.—**Folia arnicae, Folia arnicae montanae, Folia arnicae paenais.** The leaves of *A. montana*. [B, 180.]—**Herba arnicae spuria, Herba arnicae suedensis.** The herb of *Pulicaria dysenterica*. [B, 180.]—**Hydrolé de fleurs d'a.** (Fr.). See *Infusum arnicae florum*.—**Infusum arnicae florum.** Fr., *infusion (ou hydrolé) de fleurs d'a.* An aqueous infusion of a. flowers in boiling water, official in a number of old pharmacopœias, different proportions being used. [L, 85.]—**Mountain a.** See *A. montana*.—**Oil of a.** There are two volatile oils contained in *A. montana*, one in the root, the other in the flower, both of a slightly acid reaction. [B, 2.]—**Racine d'a.** (Fr.). **Radix arnicae planensis, Rhizome d'a.** [Fr. Cod.] (Fr.). See *Arnicae radix*.—**Radix arnicae, Radix arnicae montanae, Radix arnicae paenais.** The rhizome of *A. montana*. [B, 180.]—**Radix arnicae spuria, Radix arnicae suedensis.** The root of *Pulicaria dysenterica*. [B, 180.]—**Teinture alcoolique d'a.** (Fr.). See *Tinctura arnicae*.—**Teinture aromatique de fleurs d'a.** (Fr.). A tincture of the flowers of *A. montana* containing cinnamon and anise. [A, 301.]—**Teinture d'a.** [Fr. Cod.] (Fr.). See *Tinctura arnicae florum*.—**Teinture éthérée d'a.** (Fr.). See *Tinctura arnicae aetherea*.—**Tinctura arnicae** [U. S. Ph., 1870, Br. Ph., Ger. Ph.]. Fr., *teinture alcoolique d'a.* Ger., *Arnikatinctur*. Tincture of a. That of the Br. Ph. is the same as the *tinctura arnicae radicis*, and that of the U. S. Ph. of 1870 and the Ger. Ph. is the same as the *tinctura arnicae florum*. [B.]—**Tinctura arnicae aetherea.** Fr., *teinture éthérée d'a.* An ethereal tincture of a.; made by macerating 1 part of the flowers in 4 parts of sulphuric ether, and decanting. [Fr. Cod., 1837 (L, 85).]—**Tinctura arnicae florum** [U. S. Ph.]. Fr., *teinture d'a.* [Fr. Cod.]. Ger., *Arnikatinctur* [Ger. Ph.]. *Wohlverleihblumentinctur*. Syn.: *tinctura arnicae* [Ger. Ph.]. A tincture made by macerating a. flowers in dilute alcohol and filtering. The U. S. and Fr. preparations represent 20 parts of the flowers in 100, and the Ger. preparation represents 10 parts in 100. [B.]—**Tinctura arnicae plantae totius.** Ger., *Arnikatinctur aus der ganzen Pflanze*. An old preparation made by infusing for 3 days 6 oz. of the entire plant of *A. montana* in 1 lb. of alcohol, expressing, and filtering. [L, 129.]—**Tinctura arnicae radicis** [U. S. Ph.]. Syn.: *tinctura arnicae* [Br. Ph.]. Tincture of a. root; made by macerating in dilute alcohol and filtering; 100 parts represent 10 of the root in the U. S. preparation, and about 6 in the Br. [B.]—**Tincture of a.** See *Tinctura arnicae*.—**Tincture of a. flowers.** See *Tinctura arnicae florum*.—**Tincture of a. root.** See *Tinctura arnicae radicis*.—**Tisane d'a.** [Fr. Cod.] (Fr.). A-tea; made by infusing 5 parts of a. in 1,000 of water.

**ARNICIN**, n. A<sup>3r</sup>ni<sup>2</sup>-si<sup>2</sup>n. Fr., *arnicine*. Ger., *Arnicin*. 1. Of Walz, an amorphous yellow substance, C<sub>20</sub>H<sub>30</sub>O<sub>4</sub>, or C<sub>25</sub>H<sub>44</sub>O<sub>7</sub>, probably a glucoside, of an acrid taste, obtained by him from the leaves and flowers of *Arnica montana*. [B, 5.] 2. Of Pavet, a dark-yellow, sticky resin of a disagreeable bitter taste. [A, 247.]

**ARNICINE**, n. A<sup>3r</sup>ni<sup>2</sup>-sen. Fr., *arnicine*. Ger., *Arnicin*. An alkaloid extracted by Bastick from the flowers of *Arnica montana*. [B, 5.]

**ARNIKA** (Ger.), n. A<sup>3r</sup>ni<sup>2</sup>-ka<sup>3</sup>. See **ARNICA**.

**ARNIQUE** (Fr.), n. A<sup>3r</sup>-nek. See **ARNICA**.

**ARNOGLOSSUM** (Lat.), n. A<sup>3r</sup>-no-glo<sup>2</sup>s/su<sup>3</sup>m(su<sup>4</sup>m). Gr., ἀρνόγλωσσον (from ἀρνός, a lamb, and γλῶσσα, the tongue). Fr., *arnoglosse*. Ger., *Wegebreit*. See **PLANTAGO**.

**ARNOPHYLLUM** (Lat.), n. A<sup>3r</sup>-no-phi<sup>2</sup>l(fu<sup>6</sup>l)/lu<sup>3</sup>m(lu<sup>4</sup>m). From ἀρνός, a lamb, and φύλλον, a leaf. An old name for the *Cytisus alpinus* (from lambs being fond of its leaves). [A, 387.]

**ARNOPOGON** (Lat.), n. A<sup>3r</sup>-no-po<sup>2</sup>go<sup>2</sup>n. Gen., *arnopogonos* (-nis). From ἀρνός, a lamb, and πώγων, a beard. See **UROSPERMUM**.

**ARNOT**, n. A<sup>3r</sup>-no<sup>2</sup>t. The tuber of the *Bunium bulbocastanum*. [L, 56.] Cf. **ARNOTTS**.

**ARNOTTO**, n. A<sup>3r</sup>-no<sup>2</sup>t/to. See **ANNOTTO**.

**ARNOTTS**, n. pl. A<sup>3r</sup>-no<sup>2</sup>t/z. Perhaps a corruption of *earthnuts*. Certain farinaceous roots resembling chestnuts when roasted; apparently, the roots of a species of *Bunium*. [L, 97.]

**ARNSHALLER WASSER** (Ger.), n. A<sup>3r</sup>ns/ha<sup>3</sup>l-le<sup>3</sup>r va<sup>3</sup>s'-se<sup>2</sup>r. See under **ARNSTADT**.

**ARNSTADT** (Ger.), n. A<sup>3r</sup>n/sta<sup>3</sup>t. A health resort in the Thuringian Forest, where the climate is very equable, and said to be beneficial in cases of impoverishment of the blood, debility, nervous affections. It has a salt spring (*die A'er Soole*), the water of which is added to baths in the proportion of 8 per cent.; 1,000 parts of the water contain 237.3 of solid constituents, including 224.0 of sodium chloride, 6.450 of calcium chloride, 5.110 of magnesium chloride, 0.001 of magnesium iodide, 0.054 of magnesium

bromide, and 1700 of calcium sulphate. The mother-liquor is noted for its richness in iodine and bromine. Diluted with carbonic-acid water, both the water of the spring and the mother-liquor are taken internally under the names of *Salzquelle*, *Arnshaller Wasser*, and *Jodbitterwasser*. There is another salt spring, the *Riedquelle*, in the neighborhood, the water of which, clear or mixed with milk or whey, is given to children with scrofula, catarrh, etc. There are two large bathing establishments at A. [A, 319.]

**ARNUT**, n. A<sup>3</sup>r-nu<sup>3</sup>t. See ARNOT and ARNOTTS.

**AROE** (Telooogo), n. See BAUHINIA *parviflora*.

**ARCEIRA**, n. See SCHINUS *aveira*.

**AROERYTHRIN**, n. A<sup>3</sup>r-o-e<sup>2</sup>r-i<sup>2</sup>th-ri<sup>2</sup>n. West Indian archill. [L, 52.]

**AROHOT**, n. An alchemical name for mercury. [B, 50.]

**AROIDÆ** (Lat.), n. f. pl. A<sup>2</sup>r(a<sup>3</sup>r)-o-(e)<sup>2</sup>d(e)(da<sup>3</sup>-e<sup>2</sup>). Fr., *aroides*. Jussieu's name for the *Araceæ*. [B, 170.]

**AROIDÆ** (Lat.), n. f. pl. A<sup>2</sup>r(a<sup>3</sup>r)-o-i<sup>2</sup>d'e<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). From *ἄρον* (see *Arum*), and *είδος*, an appearance. Fr., *aroidées*, *aroides*. 1. Of many authors, the *Araceæ*. 2. Of others, a division, tribe, or section of the *Araceæ*, including *Arum* and one or two related genera. 3. Of Engler, a suborder of araceous plants, corresponding to the tribes *Stilochitonaceæ*, *Zamiaceæ*, *Spathaceæ*, and *Araceæ* (except the genus *Pistia*), and in part to the *Pythoniaceæ*, *Colocasieæ*, and *Dieffenbachieæ*, of Bentham and Hooker's classification. It is divided by Engler into the tribes *Stilochitonaceæ*, *Zamiaceæ*, *Ariopsisaceæ*, *Spathaceæ*, *Araceæ*, *Ambrosiniaceæ*, and *Cryptocoryneæ*. 4. Of Schott, a class of plants comprising the orders *Cyclanthæa*, *Pandaneæ*, *Araceæ*, and *Acoroideæ*. 5. Of Brongniart, a class of plants comprising the families *Araceæ* and *Typhaceæ*. 6. Of Bartling, a class of plants comprising the orders *Callaceæ*, *Orontieaceæ*, *Pandaneæ*, and *Typhaceæ*. [B, 1, 170, 216.] —A. *dielins* [Schott]. The dielinous *Araceæ*. [B, 170.] —A. *genuine* [Reichenbach]. A section of araceous plants of the *Dracunculineæ*, comprising *Arum*, *Biarum*, *Dracunculus*, *Sauromatum*, *Typhonium*, and two other genera. [B, 170.] —A. *monoclinous* [Schott]. The monoclinous *Araceæ*. [B, 170.] —A. *verre*. 1. Of R. Brown, a division of the A. (*Araceæ*) including *Arum* and *Caladium*. 2. Of Kunth, a suborder of the A. (*Araceæ*) including the tribes *Lemnaceæ*, *Pistieaceæ*, *Cryptocoryneæ*, *Dracunculineæ*, *Caladieæ*, *Anaporeæ*, and *Callææ* (i. e., all the *Araceæ* except the *Orontieaceæ*). 3. Of Richard, a tribe of the A. (*Araceæ*), including the genera not comprised under the *Orontieaceæ* and *Pistieaceæ*. [B, 170.]

**ARODEOUS**, adj. A<sup>2</sup>r-o-i<sup>2</sup>d'e<sup>2</sup>-u<sup>3</sup>s. Lat., *arodeus*. Fr., *arode*. Resembling the *Arum*. [L, 116.]

**AROIDEES** (Fr.), n. pl. A<sup>3</sup>-ro-id. See AROIDEÆ.

**AROIDS**, n. pl. A<sup>3</sup>-roidz. See AROIDEÆ.

**AROLE**, n. An alpine name for the *Pinus australis*. [B, 121.]

**AROMA** (Lat.), n. n. A<sup>2</sup>r(a<sup>3</sup>r)-o-ma<sup>3</sup>. Gen., *aromatos* (-tis). Gr., *ἄρωμα*, *arome*. Ger., *Gewürz*, *Geruchstoff*. It., *Sp. aroma*. 1. A spice, or any medicine of an agreeable odor and taste, especially myrrh. [L, 53.] 2. As now generally used, the characteristic odor of a substance, especially one of an agreeable character; also the odoriferous constituent of the substance. [A, 385; L, 53.] —A. *germanicum*. The genus *Inula*. [L, 97.] —A. *philosophorum*. See IRON and ammonium chloride.

**AROMADENDRON** (Lat.), n. n. A<sup>2</sup>r(a<sup>3</sup>r)-o-ma<sup>3</sup>-de<sup>2</sup>n-dro<sup>2</sup>n. From *ἄρωμα*, a spice, and *δένδρον*, a tree. Of Blume, a genus of magnoliaceous plants, referred by Bentham and Hooker to *Talauma*. [B, 42.] —A. *elegans* [Blume]. A Java species, a decoction of the leaves of which is used by the natives for hysteria, also as a stomachic tonic. [B, 121; L, 105.]

**AROMAMETRICUS** (Lat.), adj. A<sup>2</sup>r(a<sup>3</sup>r)-o-ma<sup>3</sup>-me<sup>2</sup>t-i<sup>2</sup>k-u<sup>3</sup>s(u<sup>3</sup>s). See AROMATOMETRICUS.

**AROMATE** (Fr.), n. A<sup>3</sup>-ro-ma<sup>3</sup>t. An aromatic part of a plant, used as a perfume or as a condiment. [B, 121.] —A. *germanique*, The *Inula helenium*. [B, 93.]

**AROMATIC**, adj. A<sup>2</sup>r-o-ma<sup>3</sup>-t-i<sup>2</sup>k. Gr., *ἀρωματικός*. Lat., *aromaticus*. Fr., *aromatique*. Ger., *aromatisch*, *würzig*. It., *aromatico*. Sp., *aromático*. Possessed of an agreeable odor; in chemistry, derived from benzene. See A. ACIDS, A. ALCOHOLS, A. ALDEHYDES, and A. COMPOUNDS.

**AROMATICITÉ** (Fr.), n. A<sup>3</sup>-ro-ma<sup>3</sup>-ti<sup>2</sup>s-i<sup>2</sup>-ta. An aromatic quality. [L, 41.]

**AROMATICUS** (Lat.), n., n. of adj. *aromaticus*. A<sup>2</sup>r(a<sup>3</sup>r)-o-ma<sup>3</sup>-t-i<sup>2</sup>k-u<sup>3</sup>s(u<sup>3</sup>m). Fr., *aromate*. Ger., *Gewürz*. An aromatic substance or preparation. —A. *rosatum*. An old aromatic powder consisting largely of roses. [L, 97.]

**AROMATIQUE** (Fr.), adj. A<sup>3</sup>-ro-ma<sup>3</sup>-tek. Aromatic; as a n., an aromatic substance or preparation. —A's *amers*. Substances containing both an aromatic and a bitter principle. [Fonssagrives (L, 87).] —A's *camphrés*. The camphors, natural and artificial. [Fonssagrives (L, 87).] —A's *éleopténiques*. Substances of which the aromatic principle is an essential oil. [Fonssagrives (L, 87).] —A's *cinnamiques*. See A's *résineux*. —A's *musqués*. A group of substances including musk, castor, amber, *Adora moschatellina*, *Malva moschata*, *Hibiscus abelmoschus*, and *Chenopodium ambrosioides*. [Fonssagrives (L, 87).] —A's *pyrogénés*. Substances produced by the action of heat or dry distillation, such as creasote, the tars, and the empyreumatic oils. [Fonssagrives (L, 87).] —A's *résineux*. Benzoin, myrrh, various solid resins obtained by the distillation of balsams, etc. [Fonssagrives (L, 87).]

**AROMATISATUS** (Lat.), adj. A<sup>2</sup>r(a<sup>3</sup>r)-o-ma<sup>3</sup>-t-i<sup>2</sup>-za(sa<sup>3</sup>-tu<sup>3</sup>s(u<sup>3</sup>s)). Fr., *aromatisé*. Ger., *aromatisirt*. Aromatized, rendered aromatic.

**AROMATITES** (Lat.), adj. A<sup>2</sup>r(a<sup>3</sup>r)-o-ma<sup>3</sup>-ti<sup>2</sup>(te)<sup>2</sup>(te<sup>2</sup>s). Gr., *ἀρωματιστής*. Aromatic; as a n. (*vinum* [= *olivos*] understood; Ger., *Würzwein*, *Glukwein*), an ancient aromatic or spiced wine; also, according to Pliny (*saxum* [= *λίθος*] understood), a bituminous gem found in Arabia and Egypt, resembling myrrh in color and odor, in the fem., *aromatitēs* (*potio* [= *πόσις*] understood; Ger., *Würztrank*, *aromatischer Thee*), an aromatic tea. [Dioscorides (A, 311); A, 322; Gortæus (A, 325).]

**AROMATIZE**, v. tr. A<sup>2</sup>r-o-ma<sup>3</sup>-t-iz. Gr., *ἀρωματίζω*. Lat., *aromatizare*. Fr., *aromatiser*. Ger., *aromatisiren*. To spice, to render aromatic.

**AROMATIZED**, adj. A<sup>2</sup>r-o-ma<sup>3</sup>-t-izd. Lat., *aromatizatus*. Fr., *aromatisé*. Ger., *aromatisirt*. Rendered aromatic. —A. *fatty acids*. See AROMATIC ACIDS.

**AROMATIZER**, n. A<sup>2</sup>r-o-ma<sup>3</sup>-t-i-zu<sup>3</sup>r. An agent or principle that renders a substance aromatic. [L, 56.]

**AROMATOMETRICUS** (Lat.), adj. A<sup>2</sup>r(a<sup>3</sup>r)-o-ma<sup>3</sup>-to-me<sup>2</sup>t-i<sup>2</sup>k-u<sup>3</sup>s(u<sup>3</sup>s). From *ἄρωμα* (see AROMA), and *μέτρον*, a measure. Ger., *würzmessend*. Pertaining to the determination of the proportion of an aromatic present in a mixture. [E. Ader (A, 322).]

**AROMATOUS**, adj. A<sup>2</sup>r-o-ma<sup>3</sup>-tu<sup>3</sup>s. See AROMATIC.

**AROME** (Fr.), n. A<sup>3</sup>-rom. See AROMA.

**AROMINE**, n. —A<sup>2</sup>r-o-men. An alkaloid of urine, found in the mother-liquor from which creatinine and parareducine have been precipitated; so called from the odor developed when it is heated on platinum foil. [B, 220.]

**AROMITES** (Fr.), n. pl. A<sup>3</sup>-ro-met. A general term for neutral, non-nitrogenous aromatic liquids, except those containing a camphor. [L, 105.]

**ARON** (Lat.), n. n. A(a<sup>3</sup>)/ro-n. Gen., *a'ri*, *aro'nis*. Gr., *ἄρον*. See ARUM. —*Barbæaronis*, *Radix aronis*, *Tubera aronis*. The rhizome of *Arum maculatum*. [B, 180.]

**ARON** (Ger.), n. A<sup>3</sup>-ron. See ARUM. —*Aegyptischer A*. See *Colocasia antiquorum*. —A' *gewächse*. See AROIDEÆ. —A' *sbaum*. The *Montrichardia arborescens*. [B, 180.] —A' *stab*. See ARUM *maculatum*. —A' *stärke*. Arum starch. [L, 30.] See ARUM *ARROW-ROOT*. —A' *swurz*. See ARUM. —A' *swurzel*. The corm of *Arum maculatum*. [B, 180.] —*Drachena*. See ARUM *dracunculifolium*. —*Dreiblättriger A*. See ARUM *triphylloides*. —*Dreilappiger A*. See *Typhonium trilobatum*. —*Essbarer A*. The *Colocasia antiquorum*, var. *esculentum*. [B, 180.] —*Französische A* *swurzel*. The root of *Arum italicum*. [B, 180.] —*Radix ari gallici*. —*Fünfblättriger A*. See *Arisema pentaphyllum*. —*Gefleckter A*, *Gemeiner A*. See ARUM *maculatum*. —*Gewöhnlicher A*. See ARUM *officinale*. —*Giftiger A*. See *Caladium seguinum*. —*Grosser A*. See ARUM *dracunculifolium*. —*Grosswurzeliger A*. See ARUM *macrorrhizum*. —*Italienischer A*. See ARUM *italicum*. —*Kappenförmiger A*. See *Arisarum vulgare*. —*Punktirter A*. See ARUM *dracunculifolium*. —*Schildförmiger A*. See *Colocasia antiquorum*. —*Vielblättriger A*. See ARUM *dracunculifolium*. —*Virginischer A*. See ARUM *virginicum*.

**ARONINACÉES** (Fr.), n. pl. A<sup>3</sup>-ro-n<sup>2</sup>-di<sup>2</sup>n-a<sup>3</sup>-sa. See ARUNDINACEÆ.

**ARONINÉ** (Fr.), adj. A<sup>3</sup>-ro-n<sup>2</sup>-di<sup>2</sup>n-a. Shaped like a swallow's tail; narrower at the point of attachment than at the opposite end. [A, 385.]

**ARONIA** (Lat.), n. f. A<sup>2</sup>r(a<sup>3</sup>r)-o-ni<sup>2</sup>-a<sup>3</sup>. A genus of rosaceous plants of the suborder *Pomaceæ* made by Persoon. [B, 178.] —A. *rotundifolia*. See AMELANCHIER *vulgaris*.

**ARONICUM** (Lat.), n. n. A<sup>2</sup>r(a<sup>3</sup>r)-o-ni<sup>2</sup>-k-u<sup>3</sup>m(u<sup>3</sup>m). A genus of the *Compositæ* of the tribe *Senecionideæ*, made by Necker, differing from *Doronicum* in that all the achenes have a pilose pappus, and from *Arnica* in that the cauline leaves are sessile and alternate. [B, 19.] —A. *Cusli* [Koch]. A. *doronicum* [De Candolle]. See *Doronicum hirsutum*. —A. *glaciale* [Reichenbach]. Syn.: *Arnica glaciale* [Wulfenden]. A variety of *A. scorpioides* (*Doronicum grandiflorum*). [B, 42, 214.] —A. *latifolium* [Reichenbach]. A. *scorpioides* [Koch]. Syn.: *Arnica scorpioides* [Linn.]. See *Doronicum grandiflorum*.

**ARONINE**, n. A<sup>2</sup>r-o<sup>2</sup>n. An alkaloid said to be present in *Arum maculatum*. [B, 270.]

**ARONWA**, n. See ARUM.

**AROO** (Pers.), n. The *Amygdalus persica*. [L, 63.]

**AROODA**, n. An Indian name for rue. [L, 77.]

**AROONA** (Hind.), n. See RUBIA *cordifolia*.

**AROONA-CHITRACA** (Sancr.), n. The *Plumbago rosea*. [L, 63.]

**AROOS**, n. An Egyptian name for the *Oryza sativa*. [L, 63.]

**AROOSUKPUS-PURDAH**, n. A Fars name for the *Puneeria coagulans*. [L, 63.]

**AROPH**, n. An alchemical name for: (1) saffron or extract of saffron; (2) the *aroma philosophorum*, of which term it has been thought to be an abbreviation; (3) mandragora; (4) an ancient antihelmic preparation. [L, 50; Dornæus, Ruland, Johnson (L, 53).] —A. *Helmontii*. A tincture of crocus made with Canary wine. [L, 50.] —A. *Paracelsi*. A preparation made by subliming equal parts of hæmatite and ammonium chloride. [L, 53.] Cf. IRON and ammonium chloride.

**AROREIRA**, n. See SCHINUS *aveira*.

**ARORNAS** (Ar.), n. The *Juniperus communis*. [L, 105.]

**ARORO**, n. A Tahiti name for the *Cucurbita multiflora*. [B, 121.]

**AROSSE** (Fr.), n. A<sup>3</sup>-ros. A variety of the pomegranate fruit. [L, 105.]

**AROAROU**, n. A Galibi name for the *Icica heptaphylla*. [B, 88, 121.]

**AROLE** (Fr.), n. A<sup>3</sup>-rul. See ARROUSSE.

**ARP**, n. A place in Switzerland, in the Valley of the Rhone, where there is a sulphur spring the waters of which are used in skin diseases. [L, 63.]

**ARPAD**, n. A Hungarian spring containing sodium and magnesium sulphates. [a, 13.]

**ARPAS KALESSE**, n. A place in Asia Minor, where there are sulphurous springs. [A, 385.]

**ARPE** (Fr.), n. A<sup>3</sup>-rp. See ARPION.

**ARPEYS**, n. An old name for a sort of resin made of tallow and tar. [B, 222.]

**ARPIAN**, **ARPION** (Fr.), n's. A<sup>3</sup>-rp-e-a<sup>3</sup>n<sup>2</sup>, -o<sup>2</sup>n<sup>2</sup>. A silk-worm affected with the disease termed *gattine*. [A, 385.]

**ARPULLI**, n. An Indian name for the *Cassia sophora*. [L, 105.]

**ARQUA** (It.), n. A<sup>3</sup>-r'kwa<sup>3</sup>. A cold sulphurous spring in Venetia. [A, 385; L, 49.]—**A. Petrarca**. An Italian spring containing sulphur and chlorides. [A, 385.]

**ARQUATUS** (Lat.), adj. A<sup>3</sup>-r'kwa/kwa<sup>3</sup>/tu<sup>3</sup>s(tu<sup>3</sup>s). From *arcus* (= arcus), a rainbow. Displaying various shades of color (e. g., *morbis a. [q. v., under MORBUS]*).

**ARQUÉ** (Fr.), adj. A<sup>3</sup>-r'ka. Affected with the infirmity of flexing the knees when in a state of rest (said of horses). [A, 301.] See also ARCAUTE.

**ARQUEBUSADE**, n. A<sup>3</sup>-r'kwe<sup>2</sup>-bu<sup>3</sup>s-ad'. Fr., *arquebusade*. Ger., *Arquebusade*, *Schusswasser*. It., *archibugiata*. Sp., *arcabuzado*. An old term for a lotion for gunshot wounds. [A, 385.] See *Aqua vulneraria*.—**Weisse A.** (Ger.). See *Aqua vulneraria spirituosa*.

**ARQUIFOUX** (Fr.), n. A<sup>3</sup>-r'ke-fu. See ALQUIFUZ.

**ARQUIRE** (Fr.), n. A<sup>3</sup>-r'ku<sup>3</sup>r. See ARCATURA.

**ARR** (Scot.), n. A scar. [L, 45.]

**ARRABAL**, **ARRABAL DE LA ENCOMIENDA** (Sp.), n's. A<sup>3</sup>-r-ra<sup>3</sup>-ba<sup>3</sup>l' da la<sup>3</sup> e<sup>2</sup>n-ko-mi<sup>2</sup>-e<sup>2</sup>n'da<sup>3</sup>. A place in Spain, where there are sulphurous springs. [A, 385.]

**ARRABIDEA** (Lat.), n. f. A<sup>3</sup>-r-ra<sup>3</sup>-bi<sup>2</sup>-d-e<sup>2</sup>(a<sup>3</sup>/c<sup>2</sup>)-a<sup>3</sup>. From *Arrabida*, a Spanish family name, a genus of bignoniaceous plants of the tribe *Bignoniae*, established by De Candolle. [B, 42, 214.]—**A. rosea** [De Candolle]. Syn.: *Tenocodia carajura* [Martius]. The *carajura* of the Brazilians; a Brazilian species with rose-red flowers, which furnishes a red dye which is exported. By Bentham and Hooper the species is referred to *Bignonia*. [B, 42, 214.]

**ARRAC**, n. A<sup>3</sup>-r-ra<sup>3</sup>k. See ARRACK.

**ARRACACIA** (Lat.), n. f. A<sup>3</sup>-r(a<sup>3</sup>)-ra<sup>3</sup>-ka(k<sup>3</sup>a<sup>3</sup>/si<sup>2</sup>(ki<sup>2</sup>))-a<sup>3</sup>. From *arracacha*, a South American name for several plants possessing tuberous roots or tubers. Fr., *arracache*. Syn.: *Pentacrypta* [Lehmann], *Velaea* [De Candolle], *Deveya* [Torrey and Gray]. A genus of umbelliferous plants made by Jussieu closely allied to the *Conium* of Linnæus. [B, 42, 180.]—**A. esculenta** [Decaisne]. Sp., *arracacha de Santa Fé de Bogotá*. Syn.: *Conium a.* [Hooper]. A species having a tuberous, starchy root, which is eaten like the potato. On fermentation, it furnishes an alcoholic beverage. [B, 264.]—**A. moschata** [De Candolle]. Syn.: *Conium moschatum* [Humboldt, Bonpland, Kunth]. The *sacharachaca*, a South American perennial herb having the odor of musk. [B, 214.]—**A. xanthorrhiza** [Bancr]. Syn.: *Conium arracacia* [Hooker]. A species growing in the West Indies and on the northern coast of South America. The rhizome is thick and tuberous, from 8 to 9 inches in diameter, and gives origin to a number of tubers. When boiled, the rhizomes resemble the carrot somewhat in taste, and are the staple article of diet for the inhabitants. [B, 180, 264.]

**ARRACH**, n. A<sup>3</sup>-r-ra<sup>3</sup>k. 1. See ARRACK. 2. Orace (*Atriplex*). [B, 200.]

**ARRACHEMENT** (Fr.), n. A<sup>3</sup>-r-ra<sup>3</sup>sh-ma<sup>3</sup>n<sup>2</sup>. 1. The violent tearing away of a part. [D, 96.] See AVULSION. 2. Eradication, extirpation, extraction (as of a tooth). [A, 385.]—**Castration par a.** See under CASTRATION.

**ARRA CHITTA**, n. An Indian plant the juice of which is used by the natives in acute dysentery. [Waring (L, 63).]

**ARRACHO**, n. The oat (*Avena sativa*). [L, 105.]

**ARRACK**, n. A<sup>3</sup>-r-ra<sup>3</sup>k. From Ar., *araq*, or *araqî*, sweat and milk (afterward applied to a fermented drink made from dates). Lat., *spiritus oryzae* (1st def.). Fr., *arrack*. Ger., *Arrak*, *Rak*, *Reisbranntwein* (1st def.). It., *aracca*. Sp., *arac*, *erraca*. Syn.: *toddy*, *saki*, *tsin*, *sam-shu*. 1. A liquor distilled from the yeasty liquid in which boiled rice has fermented for many days, and to which cocoa-nut juice is sometimes added. There are several varieties, differing in color, taste, alcoholic strength, etc., made from fermented date-juice, rice, cocoa-nut milk, the sap of the cocoa-nut tree, or sugar-cane juice. An official analysis of the a. sold to Chinamen in New York has shown the following constitution:

Alcohol, 45-70 per cent. by volume; 38-81 per cent. by weight.	
Saccharose.....	5-39 " " "
Glucose.....	1-19 " " "
Other organic solids.....	2-80 " " "
Mineral constituents.....	0-06 " " "

[C. E. Munsell, "Jour. of the Am. Chem. Soc.," 1885, p. 243; "Am. Jour. of Pharm.," Feb., 1886, p. 94; B, 48, 52.] 2. Of the Tongrooses, a brandy made from milk. [B, 3.] 3. Of the Tartars, a brandy made from plums. [B, 4.] An Oriental name for distilled liquors in general. [L, 86.]—**A. tuba**. An East Indian spirit made from palm wine. [L, 105.]—**Artificial a.** See *Factitious a.*—**Ba-**

**tavian a.** The most esteemed variety, made without cocoa-nut juice. [B, 48; L, 120.]—**British a.** See *Factitious a.*—**Colombo a.** See *Triple a.*—**Double a.** A. that has been twice distilled; the variety imported into Europe. [B, 48.]—**Factitious a.** **Mock a.** An imitation of a., made by digesting for a fortnight a mixture of Jamaica rum and water each 2 pints, and  $\frac{1}{2}$  oz. of sliced pineapple or  $\frac{1}{2}$  teaspoonful of pineapple essence, adding a wineglassful of skimmed milk, shaking, and, after a few days, decanting the clear portion. [L, 120.] It has also been made by distilling benzoin with rum. [L, 73.]—**Pariah a.** 1. A name given to a. by the Brahmans, to express their detestation of it. [L, 105.] 2. An inferior variety of a., made more intoxicating by the addition of Indian hemp. [L, 120.]—**Parrino a.** **Quitone a.** See *Triple a.*—**Single a.** A. that has been distilled only once; used by the Chinese. [B, 48.]—**Triple a.** A. that has been distilled three times, of a bright-yellow color and agreeable taste, containing from 52 to 54 per cent. of alcohol. [B, 48.]

**ARRADIABO**, n. A Brazilian name for the *Cnidoscopus neglectus*. ["Proc. of the Am. Pharm. Assoc.," xxxiii, p. 102 (B).]

**ARRAGONE**, n. The *Hesperis matronalis*. [L, 105.]

**ARRAGONITE**, n. A<sup>3</sup>-r-ra<sup>3</sup>-gon-it. See ARAGONITE.

**ARRAK**, n. A<sup>3</sup>-r-ra<sup>3</sup>k. See ARRACK.

**ARRAKATSCHA**, n. See ARRACACHA.

**ARRAPHON**, **ARRAPHUM** (Lat.), n's n. A<sup>3</sup>-r(a<sup>3</sup>)/ra<sup>3</sup>-fo<sup>2</sup>n, -fu<sup>3</sup>m(fu<sup>3</sup>m). See ARRAPHON.

**ARRAR**, n. The *Callitris articulata*. [A, 385.]

**ARRAYAN**, n. See ARAYAN.

**ARRECTED**, adj. A<sup>3</sup>-r-re<sup>2</sup>k/te<sup>2</sup>d. See ARRECTUS.

**ARRECTIO** (Lat.), n. f. A<sup>3</sup>-r(a<sup>3</sup>)-re<sup>2</sup>k/shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., *arrectio'nis*. From *arrigere*, to erect. An erection. [L, 45.]

**ARRECTOR** (Lat.), n. m. A<sup>3</sup>-r(a<sup>3</sup>)-re<sup>2</sup>k/to<sup>2</sup>r. Gen., *arrecto'ris*. See *ERECTOR*.—**A-es pilorum**. Fr., *muscles pileux*. Ger., *Haarbalgmuskeln*. A name given by Euland to the minute single or multiple bundles of unstripped muscular fibres which extend obliquely from the surface of the corium, to be inserted into the hair follicles on the side toward which the hair slopes. Each muscle embraces the sebaceous gland of the follicle to some extent. By their contraction they cause the hairs to stand erect or give rise to the appearance of the skin known as *cutis anserina*. [J, L.]

**ARRECTUS** (Lat.), adj. A<sup>3</sup>-r(a<sup>3</sup>)-re<sup>2</sup>k/tu<sup>3</sup>s(tu<sup>3</sup>s). From *arrigere* (= *adrigere*), to make erect. Fr., *dressé*. Ger., *aufstehend*. In botany, sometimes used in the sense of erect, but the latter means perpendicular to the horizon, while a. has reference to the part from which the structure to which it is applied springs, and with which it forms an angle of from 10° to 20°. [B, 198.]

**ARRENOTOCIA** (Lat.), n. f. A<sup>3</sup>-r(a<sup>3</sup>)-re<sup>2</sup>n-o-to<sup>2</sup>/si<sup>2</sup>(ki<sup>2</sup>)-a<sup>3</sup>. See ARRHENOTOCIA.

**ARRENOTOCOUS**, adj. A<sup>3</sup>-r-re<sup>2</sup>n-o<sup>2</sup>t'o<sup>2</sup>-ku<sup>3</sup>s. See ARRHENOTOCOUS.

**ARREST**, n. A<sup>3</sup>-r-re<sup>2</sup>st'. From *arrestare*, to check, stop. Fr., *arrêt*. Ger., *Arrest*, *Hemmung*, *Gräte* (2d def.). 1. The cessation of an action, process, or function. [A, 385.] 2. A disease of horses, of a many character, between the hain and the pastern of the hind leg. [A, 315.]—**Action of a.** See INHIBITION.

**ARRESTA BOVIS** (Lat.), n. f. A<sup>3</sup>-r(a<sup>3</sup>)-re<sup>2</sup>st'a<sup>3</sup> bo<sup>3</sup>/vi<sup>2</sup>s(wi<sup>2</sup>s). Fr., *arrête-bœuf*. Ger., *Hanfhecht*. It., *ononide*, *bonagra*. The plant rest-harrow, camcock, or petty-whin (*Ononis procurrens*). [A, 315, 385; B.]

**ARRESTATIF** (Fr.), adj. A<sup>3</sup>-r-re<sup>2</sup>st-a<sup>3</sup>-tef. Producing an arrest; inhibitory. [A, 385.]

**ARRESTERON**, **ARRESTEROU**, n's. Names given in the Pyrenees to the *Hydnum sinuatum*. [B, 121.]

**ARRÊT** (Fr.), n. A<sup>3</sup>-r-re<sup>2</sup>. 1. See ARREST. 2. A surgical instrument for holding or fastening certain parts. [A, 385.] See REMORA.

**ARRÊTE-BŒUF** (Fr.), n. A<sup>3</sup>-r-re<sup>2</sup>t-bu<sup>3</sup>f. See ARRESTA BOVIS.

**ARRAPHON**, **ARRAPHUM** (Lat.), n's n. A<sup>3</sup>-r(a<sup>3</sup>)/ra<sup>3</sup>-fo<sup>2</sup>n, -fu<sup>3</sup>m(fu<sup>3</sup>m). From *ἀρραφος* (from *a priv.*, and *ἄρρω*, to sew). A cranium deficient in sutures, formerly thought to be the cause of incurable headaches. [D. Melchior Sebizi, Johannes de Muralto (L, 53).]

**ARRHEN** (Lat.), adj. A<sup>3</sup>-r(a<sup>3</sup>)/re<sup>2</sup>n. Gr., *ἄρρην* (= *ἀρρην*). Male, masculine, manly, strong. [A, 322.]

**ARRHENATHERUM** (Lat.), n. n. A<sup>3</sup>-r(a<sup>3</sup>)-re<sup>2</sup>n-a<sup>3</sup>-the(th<sup>3</sup>a)/ru<sup>3</sup>m(ru<sup>3</sup>m). From *ἄρρην*, masculine, and *ἄθηρ*, a beard. A genus of gramineous plants of the tribe *Avenaceae*, established by Palisot de Beauvois; differing from the genus *Avena* by its spikelets having three flowers—the lower male, the middle hermaphrodite, and the upper rudimentary. [B, 121.]—**A. avenaceum** [Beauvois]. Fr., *avenat*, *faux seigle*. Syn.: *A. elatius* [Mertens and Koch]. The oat-grass, Andes-grass, or French rug-grass; a tall, perennial species indigenous to Europe and found in California, having stoloniferous roots; a useful fodder plant. There are two varieties: one (the *Avena elatior* of Linnæus, the *Holcus avenaceus* of Scopoli) having glabrous nodes, and the other (the *Avena elatior* of Schreber, the *Holcus bulbosus* of Schrader, the *Avena precatoria* of Thuillier, the *Avena bulbosa* of Willdenow, the *A. bulbosus* of Schlechtendahl, the *A. precatoria* of Diet.) having villos nodes. [B, 138, 173, 188; "Proc. of the Am. Pharm. Assoc.," xxvii, p. 604 (B).]—**A. bulbosus**, **A. elatius**. See *A. avenaceum*.

**ARRHENICUM** (Lat.), n. n. A<sup>3</sup>-r(a<sup>3</sup>)-re<sup>2</sup>n/'ik-u<sup>3</sup>m(u<sup>3</sup>m). Gr., *ἄρρηνικόν*. Arsenic. [Pliny (A, 318).]

**ARRHENOCITIA**, **ARRHENOCOETIA** (Lat.), n's f. A<sup>3</sup>-r(a<sup>3</sup>)-re<sup>2</sup>n-o-si<sup>2</sup>(ki<sup>2</sup>)/shi<sup>2</sup>(ti<sup>2</sup>)-a<sup>3</sup>, -ko-ea/shi<sup>2</sup>(ti<sup>2</sup>)-a<sup>3</sup>. From *ἄρρην*, male, and *coitus* (q. v.). See PÆDERASTY.

**ARRHENOGENON** (Lat.), n. n.  $A^2r(a^3r)-re^2n-o^2g'o^2n-o^2n$ . Gr., ἀρρηγόγον. An ancient name for the ragwort. [Pliny (A, 318).] See **SENECIO**.

**ARRHENOTOCIA** (Lat.), n. f.  $A^2r(a^3r)-re^2n-o-to^2/si^2(ki^2)-a^3$ . From ἀρρη, male, and τώω, a bringing forth. Fr., *arrhenotocie*, *arrhenotokie*. Arrhenotoky; that form of parthenogenesis in which, as among bees, the female lays eggs which produce only males. [A, 385; D, 10.]

**ARRHENOTOCOUS**, **ARRHENOTOKOUS**, adj's.  $A^2r-re^2n-o^2t'o-ku^3$ . Having the faculty of, or pertaining to, arrhenotocia (q. v.). [B, 100.]

**ARRHENOTOKY**, n.  $A^2r-re^2n-o^2t'o-ki^2$ . See **ARRHENOTOCIA**.

**ARRHEPIS** (Lat.), n. f.  $A^2r(a^3r)-re^2p-i^3s$ . From ἀρρηψής, not inclining to either side, motionless. An old name for the eleventh dorsal vertebra. [L, 50.]

**ARRHEUMATIC**, adj.  $A^2r-ru^2-ma^2t'i^2k$ . More commonly, but less properly, written *arheumatic*. From a priv., and ῥεῦμα, a flux or rheumatism. Free from rheumatism or from a discharge. [A, 316.]

**ARRHEUMATISTUS** (Lat.), adj.  $A^2r(a^3r)-ru^2-ma^2-ti^2st'u^3s-(u^4s)$ . Gr., ἀρρηματιστος. Styptic, astringent. [Galen (A, 311).]

**ARRHIGOS** (Lat.), adj.  $A^2r(a^3r)-ri(re)^2go^3s$ . Gr., ἀρρηγος. Without chill or shivering. [Aretæus (A, 311).]

**ARRHINENCEPHALIA** (Lat.), n. f.  $A^2r(a^3r)-ri^2n-e^2n-se^2f-(ke^2f)-a^2l(i^2)/i^2-a^3$ . From a priv., ῥίς, the nose, and ἐγκεφαλος, the brain. A monstrosity characterized by absence or lack of development of the nose and brain. [C. Schultze, "Ctbl. f. d. med. Wissensch.," 1884, p. 855 (B).]—**A. unilateralis**. One-sided a. [B.]

**ARRHINUS** (Lat.), adj.  $A^2r(a^3r)-ri^2n-u^3s-(u^4s)$ . From a priv., and ῥίς, the nose. Without a nose (or nose-like projection); a descriptive term applied to certain flowers. [B, 121.]

**ARRHIZA** (Lat.), n. f.  $A^2r(a^3r)-ri(re)^2za^3$ . From ἀρρίζος (from a priv., and ῥίζα, a root). Fr., *arrhize*. A plant that has no root (applied to parasitic plants like the mistletoe). [B, 121.]

**ARRHIZÆ** (Lat.), n. f. pl.  $A^2r(a^3r)-ri^2z-e-(a^3-e^2)$ . Fr., *arrhizes*. Richard's term for the cryptogams. [B, 1, 121.]

**ARRHIZÆA** (Lat.), n. n. pl.  $A^2r(a^3r)-ri^2z-e-(a^3-e^2)-a^3$ . See **ARRHIZA**.

**ARRHIZOBLASTÆ** (Lat.), n. f. pl.  $A^2r(a^3r)-ri^2z-o-bla^2st-(bla^2st)^2e-(a^3-e^2)$ . From a priv., ῥίζα, a root, and βλαστός, a sprout. Fr., *arrhizoblastes*. Ger., *Unwurzkeimer*. Of Willdenow, a division of plants of the *Geoblastæ*, distinguished by the absence of roots and by their embryos remaining concealed in the ground during germination. [B, 121, 170.]

**ARRHIZOBLASTOUS**, adj.  $A^2r-ri^2z-o-bla^2st'u^3s$ . Fr., *arrhizoblasté*. Ger., *unwurzkeimig*. Belonging to or resembling the *Arrhizoblastæ*. [B, 1.]

**ARRHIZOUS**, adj.  $A^2r-ri^2zu^3s$ . Gr., ἀρρίζος. Lat., *arrhizos*, *arrhizus*. Fr., *arrhize*. Ger., *wurzellos* It., *arizzo*. In botany, having no root or radicle. [A, 385; L, 50.]

**ARRHŒA** (Lat.), n. f.  $A^2r(a^3r)-re-(ro^2e^2)-a^3$ . Gr., ἀρρηία (from a priv., and ῥέω, to flow). Fr., *arrhée*. Ger., *Ausflussmangel*. Syn.: *defectus profuvii*. The suppression of any habitual discharge, normal or pathological. [Hippocrates (A, 311, 325); A, 322.]

**ARRHOICUS** (Lat.), adj.  $A^2r(a^3r)-ro^2i^2k-u^3s-(u^4s)$ . Pertaining to, caused by, or affected with, arrhœa. [A, 322.]

**ARRHOSTEMA**, **ARRHOSTIA** (Lat.), n's n. and f.  $A^2r(a^3r)-ro^2s-te(ta)/ma^3$ ,  $-ro^2s-ti^2-a^3$ . Gen., *arrhostenatos (-tis)*, *-rhostia*. Gr., ἀρρhostημα, ἀρρhostia. Sickness, sickness, weakness, imbecility. [Hippocrates (A, 311); A, 322, 325; L, 97.]

**ARRHOSTOS** (Lat.), adj.  $A^2r(a^3r)-ro^2st'o^3s$ . Gr., ἀρρhostos (from a priv., and ῥώνυθαι, to be strong). Weak, sickly. [M, 13.]

**ARRHYNCHIA** (Lat.), n. n. pl.  $A^2r(a^3r)-ri^2n^2(ru^2n^2)/ki^2(ch^2)i^2)-a^3$ . From a priv., and ῥύγχος, a snout or beak. A term applied to the lowest forms of the *Protucha*, on account of their having no frontal proboscis. [L, 11.]

**ARRHYNCHOTENIADÆ** (Lat.), n. f. pl.  $A^2r(a^3r)-ri^2n^2(ru^2n^2)/ko(ch^2)o^2t^2e-n^2(ta^3-e^2n)-i(i^2)/a^3-de(da^3-e^2)$ . For deriv., see **ARRHYNCHA** and **TENIA**. Tape-worms having no rostellum. [L, 24.]

**ARRHYTHMIA** (Lat.), n. f.  $A^2r(a^3r)-ri^2th^2(ru^2th^2)/mi^2-a^3$ . Gr., ἀρρυθμία (from a priv., and ῥυθμός, rhythm). Fr., *arrhythmie*. Ger., *Arrhythmie*. Lack of rhythm. [M, 2.]—**A. cordis**. Irregularity of the heart's action. [M, 1.]

**ARRHYTHMIC**, **ARRYTHMOUS**, adj's.  $A^2r-ri^2th^2(mi^2)k$ ,  $-mu^3s$ . Gr., ἀρρυθμος. Lat., *arrhythmus*, *arrhythmicus*. Fr., *arrhythme*, *arrhythmique*. Ger., *arrhythmisch*. Lacking in rhythm or regularity. [L, 50.]

**ARRIÈRE** (Fr.), adj.  $A^3r-ri^2-a-ra$ . Stunted; backward in growth or development, physical or mental. [A, 385.]

**ARRIÈRE-BOUCHE** (Fr.), n.  $A^3r-ri^2-e^2r-bush$ . See **ARRIÈRE-GORGE**.

**ARRIÈRE-CAVITÉ** (Fr.), n.  $A^3r-ri^2-e^2r-ka^3-ve-ta$ . A posterior cavity.—**A.-c. des épiploons**. See *A.-c. péritonéale*.—**A.-c. des fosses nasales**. The superior maxillary, sphenoidal, frontal, and ethmoidal sinuses. [A, 385.]—**A.-c. péritonéale**. A fold of the peritoneum at the level of the bile-ducts, between the portal vein in front and the vena cava behind. [A, 385.]

**ARRIÈRE-CERVEAU** (Fr.), n.  $A^3r-ri^2-e^2r-se^2r-vo$ . See **MET-ENCEPHALON**.

**ARRIÈRE-CHAMBRE** (Fr.), n.  $A^3r-ri^2-e^2r-sha^3m-br$ . See **HINTERHOF**.

**ARRIÈRE-DENT** (Fr.), n.  $A^3r-ri^2-e^2r-da^3n^2$ . The last molar tooth. [L, 43.]

**ARRIÈRE-ÉCUSSON** (Fr.), n.  $A^3r-ri^2-e^2r-a-ku^6s-so^2n^2$ . See **POSTSCUTUM**.

**ARRIÈRE-FAIX** (Fr.), n.  $A^3r-ri^2-e^2r-fe^2$ . The after-burden; an old term for the placenta and the fetal membranes. [A, 44.]

**ARRIÈRE-FLEUR** (Fr.), n.  $A^3r-ri^2-e^2r-flu^2r$ . In botany, a second flowering. [L, 41.]

**ARRIÈRE-GORGE** (Fr.), n.  $A^3r-ri^2-e^2r-gorzh$ . The posterior wall of the pharynx. [A, 885.]

**ARRIÈRE-GOUT** (Fr.), n.  $A^3r-ri^2-e^2r-gu$ . An after-taste. [A, 300.]

**ARRIÈRE-IMAGE** (Fr.), n.  $A^3r-ri^2-e^2r-e-ma^3zh$ . See **AFTER-IMAGE**.—**A.-i's colorées**. See *Colored after-images*.—**A.-i's négatives**. See *Negative after-images*.—**A.-i's positives**. See *Positive after-images*.—**A.-i. positif complémentaire**. See *Positive complementary after-image*.

**ARRIÈRE-MAIN** (Fr.), n.  $A^3r-ri^2-e^2r-ma^3n^2$ . The back of the hand. [A, 300.]

**ARRIÈRE-MÉSÉNTÉRIQUE** (Fr.), adj.  $A^3r-ri^2-e^2r-ma^3n^2-ta-rek$ . Post-mesenteric (said of the nerves which connect the aortic and hypogastric plexuses). [L, 41.]

**ARRIÈRE-MOLAIRE** (Fr.), n.  $A^3r-ri^2-e^2r-mo-la^2r$ . See **ARRIÈRE-DENT**.

**ARRIÈRE-NARINES** (Fr.), n. pl.  $A^3r-ri^2-e^2r-na^3-ren$ . See **POSTERIOR NARES**.

**ARRIÈRE-NEZ** (Fr.), n.  $A^3r-ri^2-e^2r-na$ . That part of an insect that is contiguous to the antennæ. [L, 41.]

**ARRIÈRE-NOYAU** (Fr.), n.  $A^3r-ri^2-e^2r-nwa^3-yo$ . The posterior nucleus. [K.]

**ARRIÈRE-POITRINE** (Fr.), n.  $A^3r-ri^2-e^2r-pwa^3-tren$ . The posterior thoracic segment of an insect. [L, 41.]

**ARRIÈRE-STERNUM** (Fr.), n.  $A^3r-ri^2-e^2r-ste^2rn-u^3n^2$ . Latreille's term for the median inferior portion of the third thoracic segment in insects. [L, 180.]

**ARRIÈRE-TERGUM** (Fr.), n.  $A^3r-ri^2-e^2r-te^2rg-u^3n^2$ . Audouin's term for the union of the terga of the mesothorax and metathorax in certain of the *Arthropoda*. [L, 180.]

**ARRIÈRE-VIELLESSE** (Fr.), n.  $A^3r-ri^2-e^2r-ve-a-ye^2s$ . Extreme old age. [A, 300.]

**ARRIGOS** (Lat.), adj.  $A^2r(a^3r)-ri(re)^2go^3s$ . See **ARRHIGOS**.

**ARRIVOU-TAOU-VELOU**, n. A Madagascar name for an undetermined species of *Eracum*. [L, 105.]

**ARROCHE** (Eng., Fr.), n.  $A^2r'o^2k$ ,  $a^3r-rosh$ . See **ATRIPLEX**.—**A. belle-dame** (Fr.), **A. blanche** (Fr.), **A. bonne-dame** (Fr.), **A. des jardins** (Fr.), **A. épinard** (Fr.), **A. follette** (Fr.). See **ATRIPLEX hortense**.—**A. fraise** (Fr.). See **BLITUM capitatum**.—**A. pourpier** (Fr.). See **ATRIPLEX portulacoides**.—**A. puante** (Fr.). See **CHENOPODIUM vulvaria**.

**ARROCHES** (Fr.), n. pl.  $A^3r-rosh$ . See **ATRIPLEXÆ**.

**ARRODE** (Fr.), n.  $A^3r-rod$ . The *Atriplex hortense*. [B, 121.]

**ARROMANCHES** (Sp.), n.  $A^3r-ro-ma^3n^2-che^3s$ . A sea-bathing resort in Calvados, Spain. [A, 385; L, 49.]

**ARROMEHL** (Ger.), n.  $A^3r-ro-mal$ . See **ARROW-ROOT**.

**ARRONDI** (Fr.), adj.  $A^3r-ro^2n^2-de$ . In botany, rounded, subrotund. [B.]

**ARROPE** (Sp.), n.  $A^3r-ro^2pa$ . Must be boiled down to the consistence of a syrup. [A, 334; a, 5.] See **ROB**.

**ARROSEMENT** (Fr.), n.  $A^3r-roz-ma^3n^2$ . Sprinkling; a method of applying either powders or liquids to a part. [Gosselin, Héret, "Progr. méd.," Sept. 19, 1885, p. 216.]

**ARROSIO**, n.  $A^3r-ro^2zhu^3n$ . Lat., *arrosio* (from *arrodero*, to gnaw). Ger., *Arrosion*. Erosion, especially of blood-vessels by an ulcerative process. [D, 84; L, 54.]

**ARROUFLE** (Fr.), n.  $A^3r-ruff$ . See **ERVUM hirsutum**.

**ARROUSSE** (Fr.), n.  $A^3r-rus$ . An Auvergne name for the lentil. [L, 105.] See **ERVUM hirsutum**.

**ARROUY**, n. A Madagascar name for the *Mimosa sensitiva*. [L, 105.]

**ARROW-GRASS**, n.  $A^2r-ro-gra^3s$ . A species of *Triglochin*. [L, 50.]

**ARROWHEAD**, n.  $A^2r-ro-he^2d$ . The name of certain hot springs in San Bernardino, California, where the winter climate is said to be beneficial to phthisical subjects. [A, 363.]

**ARROW-HEAD**, **ARROW-LEAF**, n's.  $A^2r-ro-he^2d$ ,  $-lef$ . See **SAGITTARIA sagittifolia**.

**ARROW-ROOT** [Austr. Ph., Gr. Ph.], n.  $A^2r-ro-ru^4t$ . Said to be so called because it was used by the West Indian aborigines as a cure for the wounds inflicted with poisoned arrows; but, according to recent authorities, from the native name, *araruta*, meaning mealy root. [B, 15.] Lat., *amylum* (seu *fecula*), *sagittaria* (seu *maranta*). Fr., *arrowroot de la Jamaïque* [Fr. Cod.], *racine fécilière*, *pivot*. Ger., *Pfeilwurzel*, *Pfeilwurzmehl*. Syn.: *amylum arrow* [Dan. Ph., Norw. Ph., Swed. Ph.]. A form of starch obtained from the tubers of the *Maranta arundinacea*, *Maranta nobilis*, and *Maranta indica*. It occurs under the form of a light powder, or of pulverulent masses of a white color, and when pure is devoid of taste or smell. It is made up of oblong-ovate granules, from  $\frac{1}{16}$  to  $\frac{1}{12}$  of an inch long, having very fine striations. It has the chemical properties of starch, and is distinguished by its bland quality as an article of food. [B, 2, 5; L, 65.]—**African a.-r.** Ger., *afrikanisches Arrowroot*. Ordinary a.-r. brought from Sierra

Leone, Natal, and the Cape of Good Hope. [B, 270.]—**American a.-r.**, **Antilles a.-r.** See *West Indian a.-r.*—**A.-r. de la Jamaïque** [Fr. Cod.] (Fr.). See *A.-r. de l'Inde* (Fr.). See *East Indian a.-r.*—**A. des Antilles** (Fr.). See *West Indian a.-r.*—**A. de Tolomane**. See *CANNA starch.*—**Arum a.-r.** A starchy substance prepared at the Isle of Portland from the *Arum maculatum*. [B.]—**Bahia a.-r.** Manihot. [B, 270.]—**Bermuda a.-r.** The variety most highly esteemed. The term is commonly applied to various West Indian varieties. [A, 377.]—**Bombay a.-r.** See

istry in its relations to medicine; therapeutics founded on chemistry. [A, 322.]—**A. clysmatica nova**. Syn.: *chirurgia infusoria*. The transfusion of blood, also the infusion of a remedy into the circulation. [A, 322.] See *TRANSFUSION* and *Intravenous injection*.—**A. cosmetica**. Fr., *art cosmétique*. Ger., *Verschönerungskunst, Kosmetik*. See *COSMETIS*.—**A. empirica**. Gr., *ῥέγγη ἐμπειρική*. See *EMPIRICISM*.—**A. formulas medicinae concinnandi**. Fr., *art de formuler*. The art of writing prescriptions. [A, 316, 385.]—**A. hermetica**. Fr., *art sacré*. Alchemy. [A, 385.]—**A. hydratrica**. See *HYDRO-THERAPEUTICS*.—**A. infusoria**. See *A. clysmatica nova*.—**A. machaonica**. Ger., *machaonische Kunst*. The healing art; so called from Machaon, a son of Æsculapius. [A, 322.]—**A. maenica**, **A. maientica**. Gr., *ῥέγγη μαεντική*. Obstetrics. [A, 88.]—**A. medendi** [Pliny], **A. medica** [Sydenham]. The healing art; medicine. [B, 90, 134.]—**A. obstetricandi**, **A. obstetricans**, **A. obstetricaria**, **A. obstetricia**. Obstetrics. [A, 88.]—**A. philosophica**. Fr., *art sacré*. Alchemy. [A, 385.]—**A. sanandi**. See *A. medica*.—**A. signata**. Literally, the signed or sealed art; the art of understanding the signs which show the qualities of bodies. [Paracelsus (H.)]. See *SIGNATURE*.—**A. spagyrica**. Ger., *spagyrische Kunst*. See *A. chemiatrix*.—**A. sphymica**. Ger., *Pulsuntersuchungskunst*. Syn.: *sphygmotechné*. The art of examining and interpreting the condition of the pulse. [A, 322.]

WEST INDIAN ARROW-ROOT. (AFTER ROSCOE AND SCHORLEMMER.)

*Curcuma a.-r.*—**Brazilian a.-r.** Ger., *brasiliensisches Arrowroot*. 1. Ordinary a.-r. from Para and southern Brazil. 2. Cassava, manihot, or manioc; the *amylum brasiliense* (see *cassava*) of the Netherl. Ph. [B, 270.]—**British a.-r.** See *AMYLUM solani*.—**Calcutta a.-r.** See *East Indian a.-r.*—**Canna a.-r.** See *CANNA starch.*—**Cassava a.-r.** See *Tapioca meal*.—**Chili a.-r.** A sort of starch derived from a species of *Bomarea*. [B, 270.]—**Chocolate of a.-r.** A French preparation containing 3 parts of a.-r. to 100 of chocolate. [B, 10.]—**Common a.-r.** See *AMYLUM solani*.—**Curcuma a.-r.** Lat., *amylum indicum*. Ger., *Curcumastärke*, *Tikmehl*. Syn.: *Bombay a.-r.* [Netherl. Ph.]. A variety brought from Tikor, Madras, and Benares, derived from *Curcuma angustifolia*. That brought from Travancore (Travancore a.-r.) is from *Curcuma rubescens*. [B, 270.]—**East Indian a.-r.** Ger., *ostindisches Arrowroot*. 1. Ordinary a.-r. imported from Madras and Ceylon. 2. See *Curcuma a.-r.* 3. A name applied to various starchy substances found in the East Indies (e. g., *canna starch*, *cassava*, etc.). [B, 270.]—**English a.-r.** See *AMYLUM solani*.—**Florida a.-r.** See *Zamia a.-r.*—**Gniana a.-r.** 1. A starch obtained from the banana (*Musa paradisiaca*). See *BANANA starch*. 2. A starch obtained from the yam. [B, 270.]—**Maize a.-r.** See *CORN starch*.—**Malabar a.-r.** See *Curcuma a.-r.*—**Manihot a.-r.** See *Tapioca meal*.—**Maranta a.-r.** True a.-r. [B.]—**Morgenländisches Arrowroot** (Ger.). See *East Indian a.-r.*—**Natal a.-r.** A variety made in Natal from the *Maranta indica*. [L.]—**Otaheiti a.-r.** See *Tacca a.-r.*—**Para a.-r.** Manihot. [B, 270.]—**Portland a.-r.** See *Arum a.-r.*—**Potato a.-r.** See *AMYLUM solani*.—**Queensland a.-r.** See *CANNA starch*.—**Rice a.-r.** Rice flour, made from the *Oryza sativa*. [L, 63.]—**Rio a.-r.** Manihot. [B, 270.]—**Sierra Leone a.-r.** See *African a.-r.*—**Tellichery a.-r.** See *Curcuma a.-r.*—**St. Thomas a.-r.**, **St. Vincent a.-r.** See *West Indian a.-r.*—**Tacca a.-r.**, **Tahiti a.-r.** A variety made from the *Tacca oceanica*, having granules of about the same size as those of tapioca meal, but flattened and angular; rarely met with in commerce. [B, 2; L, 65.]—**Talcabana a.-r.** A form of starch resembling ordinary a.-r., derived from the root of the *Alstroemeria ligula*, a Chilean plant. [B, 5.]—**Tavoulou a.-r.** See *Tacca a.-r.*—**Travancore a.-r.** See *Curcuma a.-r.*—**West Indian a.-r.** Fr., *tous-les-mois*. Ger., *westindisches Arrowroot*. Ordinary a.-r. [B, 270.]—**Williams's a.-r.** See *Tahiti a.-r.*—**Zamia a.-r.** Florida a.-r.; a form of starch obtained from the root of the *Zamia integrifolia*, a native of Florida. It differs from true a.-r. in microscopic appearance. [B, 5.]

**ARROW-WEED**, n.  $A^2r'$ ro-wed. See *SAGITTARIA sagittifolia*.

**ARROW-WOOD**, n.  $A^2r'$ ro-wu'd. A name applied to some species of *Viburnum*. [B, 19.]

**ARRUDEA** (Lat.), n. f.  $A^3r$ -ru'de-a<sup>3</sup>. From the Brazilian botanist, *Arruda de Camara*. A genus of clusiaceae plants made by A. Saint-Hilaire, now referred to *Clusia*. [B, 42, 121.]—**A. clusioides** [Cambess.]. See *CLUSIA a.*—**A. rosea**. See *CLUSIA rosea*.

**ARRUK**, n. See *ARRACK*.

**ARRYTHMIA** (Lat.), n. f. See *ARRHYTHMIA*.

**ARRYTHMIC**, **ARRYTHMOUS**, adj's. See *ARRHYTHMIC* and *ARRHYTHMOUS*.

**ARS** (Lat.), n. f.  $A^3r$ z(a'rs). Gen., *ar'tis*. Gr., *ῥέγγη*. Fr., *art*. Ger., *Kunst*. It, Sp., *arte*. 1. Skill, ability, or cunning in working; art, artfulness. 2. That at which one works; a science, profession, occupation, or pursuit. [B, 134.]—**A. angelica**. Magic. [B, 49.]—**A. atracia**. Magic; so called from Atrox, a city in Thessaly, the latter being regarded as the country of enchanters. [B, 49.]—**A. auxillatrix in partu**. Obstetrics. [A, 88.]—**A. cabalistica**. See *A. signata*.—**A. chemiatrix**, **A. chymiatrica**. Chem

—**A. spirituosa**, **A. spirituum**. Magic. [B, 48, 49.]—**A. veterinaria**, **A. zoiatica**. Fr., *art vétérinaire*. Veterinary medicine. [A, 385.]—**Medicinals a.** Medicine. [Celsus (B, 45).]

**ARS** (Fr.), n.  $A^3r$ (a'rs). In veterinary parlance, the fold which marks the junction of a horse's fore leg with the chest. [A, 300, 385.]—**A. antérieure**. See *A.*—**A. postérieure**. The fold running from the body to the hind leg. [L, 180.]

**ARSA**, n. Also written *arki*. A rectified spirituous liquor prepared by the Tartars from kumys (*q. v.*). In a weak state, before rectification, it is called *araca*. [A, 1.]

**ARSACE** (Lat.), n. f.  $A^3r$ sa<sup>2</sup>d-se(ka). From Ἀρσάκης, the founder of the Parthian dominion. A section of the botanical genus *Erica*, made by Salisbury. [B, 121.]

**ARSACUM**, n. A sort of satyriasis or morbid sexual excitement; the same as *acrai*. [B, 200.]

**ARSADINE**, n.  $A^3r$ sa<sup>2</sup>d-i<sup>2</sup>n. An obsolete term for arsenic or one of its compounds, especially orpiment. [B, 221.]

**ARSAG**, n. Arsenic. [B, 144.]

**ARSALTOS**, n. Asphalt. [B, 200.]

**ARSAMMONIC**, adj.  $A^3rs$ 'a<sup>2</sup>m-mo<sup>2</sup>n'i<sup>2</sup>sk. Containing or pertaining to arsammonium. [B, 4.]

**ARSAMMONIUM** (Lat.), n. n.  $A^3rs$ a<sup>2</sup>m(a<sup>2</sup>m)-mo<sup>2</sup>n'i<sup>2</sup>sk-m(u'm). From *arsenic* and *ammonium*. A compound radicle made up of a substituted arsonium united with a substituted ammonium. Such compounds have the general constitution —RAS—NR', where R and R' are trivalent radicles or assemblages of radicles having a total quantivalence of three. [B, 4.]

**ARSANECK**, n. An alchemical term for sublimed arsenic. [Johnson (B, 200).]

**ARSATUM**, n. See *ARSACUM*.

**ARSCHE** (Ger.), n.  $A^3r$ sch. The arse, or fundament. [B.]—**A'm-made**. The *Oxyuris vermicularis*. [L, 17.]

**ARSEDINE**, n.  $A^3r$ se<sup>2</sup>d-i<sup>2</sup>n. See *ARSADINE*.

**ARSELIN** (Fr.), n.  $A^3r$ -se<sup>2</sup>l-a<sup>2</sup>n<sup>2</sup>. See *TROCHIMUS vipera*.

**ARSELLA** (It.), n.  $A^3r$ -se<sup>2</sup>l'a<sup>3</sup>. From It., *arse*, fire, on account of the acrimony of the juice when instilled into the eye. The *Argemone*. [B, 121.]

**ARSEN** (Ger.), n.  $A^3r$ -se<sup>2</sup>n'. Arsenic. [B.]—**A. äthyl**. Arsenethyl. [B, 196.]—**A. äthylsäure**. Ethylarsenic acid. [B, 4.]—**A. base**. See *ARSENIC base*.—**A. blende**. A native sulphide of arsenic. [B, 49.] See *Gelbe A'blende* and *Roth A'blende*.

—**A. bromid**, **A. bromür**. Arsenic tribromide. [B, 48, 196.]—**A. butter**. Butter of arsenic; arsenic trichloride. [B, 48.]—**A. chlordinhydrat**. See *ARSENIC chlordinhydrate*.—**A. chlörür**, **A. chlörür**. Arsenic trichloride. [B.]—**A. diäthyl**. See *ARSEN-DIETHYL* and *DIARSENTETRYL*.—**A. diäthylsäure**. Diethylarsenic acid. [B, 4.]—**A. dichlörür**. Arsenic dichloride. [B.]—**A. dihydrat**. Arsenic dihydrate; pyroarsenic acid. [B.]—**A. dimethyl**. Arsendimethyl; cacodyl. [B.]—**A. dimethylbromür**. See *CACODYL bromide*.—**A. dimethylchlordinhydrat**. See *CACODYL chlordinhydrate*.—**A. dimethylchlörür**. See *CACODYL chlörür*.—**A. dimethylcyanür**. See *CACODYL cyanide*.—**A. dimethyljodür**. See *CACODYL iodide*.—**A. dimethylsulfid**. See *CACODYL persulphide*.—**A. dimethylsäure**. Dimethylarsenic acid. [B, 4.]—**A. dimethylsulfür**. See *CACODYL sulphide*.—**A. dimethyltrichlörür**. See *CACODYL trichloride*.—**A. diphenyl**. See *ARSENDIPHENYL*.—**A. diphenylchlörür**. See *ARSENDIPHENYL trichloride*.—**A. disulfid**. Ar-

senic disulphide. [B. 196.]—**A'eisen.** A native arsenide of iron; löllingite. [B. 49.]—**A'fluorid, A'fluorür.** Arsenic fluoride. [B.]—**A'fluorwasserstoffsäure.** A substance having the properties of an acid, produced by the decomposition of arsenic trifluoride. [B. 196.]—**A'glas.** See *Gelbes A'glas*, *Roths A'glas*, and *Weisses A'glas*. [B. 49.]—**A'haltig.** Containing arsenic. [B. 49.]—**A'hydrat.** See *ARSENIC hydrate*.—**A'hydrür.** See *HYDROGEN arsenide*.—**A'jodid, A'jodür.** Arsenic triiodide. [B. 48, 196.]—**A'kies.** Mispickel. [B. 49.]—**A'kupfer.** A native compound of arsenic and copper. [B. 49.]—**A'methyl.** Arsenmethyl. [B. 196.]—**A'methylchlorür.** Arsenmethyl chloride. [B.]—**A'methyl-oxyl.** Arsenmethyl oxide. [B.]—**A'methylsäure.** Methylarsinic acid. [B. 4.]—**A'methylsulfid.** Arsenmethyl sulphide. [B.]—**A'molybdänsäure.** Arseniomolybdic acid. [B.]—**A'mon-äthyl.** Arsenethyl. [B. 196.]—**A'monithylsäure.** See *ETHYL-ARSENIC ACID*.—**A'monomethyl.** Arsenmethyl. [B. 196.]—**A'monomethylsäure.** See *METHYLARSINIC ACID*.—**A'nickel.** *A'nickelglanz.* Compounds of arsenic and nickel occurring in nature. [B. 49.]—**A'oxybromür.** Arsenic oxybromide. [B.]—**A'oxychlorür.** Arsenic oxychloride. [B.]—**A'oxyd.** Arsenic trioxide. [B.]—**A'oxyjodür.** Arsenic oxyiodide. [B.]—**A'oxysulfür.** Arsenic oxysulphide. [B.]—**A'pentafluorid.** Arsenic pentafluoride. [B.]—**A'pentasulfid.** Arsenic pentasulphide. [B.]—**A'phenyl.** Arsenphenyl. [B.]—**A'phenylchlorür.** Arsenphenyl chloride. [B.]—**A'phenyloxyd.** Arsenphenyl oxide. [B.]—**A'radical.** See *ARSENIC radical*.—**A'rubin.** Ruby of arsenic; arsenic disulphide. [B. 49.]—**A'sauer.** Of or pertaining to arsenic acid, arsenic; with the name of a base, the arsenate of that base. [B.]—**A'säure.** Arsenic acid. [B.]—**A'säureanhydrid.** Arsenic anhydride; arsenic pentoxide. [B. 49.]—**A'säurehydrat.** Arsenic acid. [B. 196.]—**A'säuresalze.** The arsenates. [B. 49.]—**A'sesquichlorür.** Arsenic trichloride. [B.]—**A'spiegel.** The arsenic mirror; the film of metallic arsenic deposited in applying Marsh's test. [B. 49.]—**A'suboxyd.** Arsenic suboxide. [B. 48.]—**A'sulfid, A'sulfür.** Arsenic disulphide. [B. 48, 49.]—**A'superoxidür.** Arsenic fluoride. [B. 48.]—**A'supersulfid.** Arsenic pentasulphide. [B. 48.]—**A'supersulfür.** Arsenic trisulphide. [B. 48.]—**A'thier.** An animal poisoned with arsenic. [Steinauer, "Oribl. f. d. med. Wissensch." Jan. 21, 1882, p. 64 (B).]—**A'triäthyl.** Triethylarsine. [B. 196.]—**A'triäthylsäure.** Triethylarsinic acid. [B. 4.]—**A'tribromür.** Arsenic tribromide. [B.]—**A'trichlorür.** Arsenic trichloride. [B.]—**A'trifluorür.** Arsenic trifluoride. [B.]—**A'trihydrat.** Arsenic acid. [B.]—**A'trijodür.** Arsenic triiodide. [B.]—**A'trioxyl.** Arsenic trioxide. [B.]—**A'trisulfid.** Arsenic trisulphide. [B. 108.]—**A'vergiftung.** Poisoning by arsenic. [B. 18.]—**A'wasserstoff.** Arsenic hydride. [B.] See *HYDROGEN arsenide*.—**A'wolfbramsäure.** Arseniotungstic acid. [B.]—**A'broma.** Arsenic tribromide. [B. 48.]—**A'chlora.** Arsenic trichloride. [B. 49.]—**A'farbiges A'glas.** Artificially prepared arsenic trisulphide. [B.]—**A'Fester A'wasserstoff.** Solid hydrogen arsenide. [B. 196.]—**A'Gelbe A'blende.** *Gelber A.* *Gelbes A'glas.* Arsenic trisulphide. [B. 49.]—**A'Grauer A. Arsenic obtained under the form of a gray powder. [B. 49.]—**A'Joda.** Arsenic triiodide. [B. 48.]—**A'Kotho A'blende.** *Rother Schwefel.* *Roths A'glas.* Arsenic disulphide. [B. 49.]—**A'Wasserfreie A'säure.** Anhydrous arsenic acid; arsenic pentoxide. [B.]—**A'Weisser A.** *Weisses A'glas.* Arsenic trioxide. [B. 49.]**

**ARSENAL**, n.  $A^3r\text{-}se^2n\text{-}a^2l$ . Through It. and Sp., *arsenal*, from *Ar*, *dār al-ḥindāḥ*, an arsenal (literally, a house of works, from *dār*, a house, and *ḥindāḥ*, an art, a trade). [B. 52, 223.] Fr., *arsenal*. Ger., *Zeughaus*. It., *arsenale*. Sp., *arsenal*. See *ARMAMENTARIUM chirurgicum*.

**ARSENALLYLIUM** (Lat.), n. n.  $A^3r\text{-}se^2n\text{-}a^2l(a^2l)\text{-}li^2l(lu^2l)/i^2u^2m(u^2m)$ . See *TETRALLYLARSONIUM*.—**A. iodide.** Fr., *iodure d'a. Ger.*, *arsenallyumjodür*. See *TETRALLYLARSONIUM iodide*.

**ARSENAMINE**, n.  $A^3r\text{-}se^2n\text{-}a^2m\text{-}en$ . Hydrogen arsenide. [B. 9.]

**ARSENATE**, n.  $A^3r\text{-}se^2n\text{-}at$ . Written also *arseniate*. Lat., *arsenas, arsenias*. Fr., *arséniate*. Ger., *arsensaures Salz*, *Arsenat*. It., Sp., *arseniato*. A salt of arsenic (orthoarsenic) acid. The normal *a's* or *triarsenates* have the formula  $R(AsO_4)_3$  where R is a trivalent radicle, or  $R_2(AsO_4)_3$  where R is a radicle of the quantivalence of n. The acid, or *hydric*, *a's* include (1) the *metallallic* or *monohydric a's*, of the general formula  $R'HAsO_4$  or  $R_2(HAsO_4)_3$ , and (2) the *monometallic* or *dihydric a's*, or *binarsenates*, of the general formula  $R'H_2AsO_4$ , where R' is a bivalent radicle and R a radicle of the quantivalence of n. *Basic a's*, composed of arsenic acid combined with the oxide or hydrate of a base, are also known. The term *basic a.* was formerly applied to the normal *a's*. [B.] See also *METARSENATE* and *PYROARSENATE*, and for the individual *a's* see under the names of the bases.—**Acid a.** Fr., *arséniate acide*. Ger., *säures Arseniat*. It., *arseniato acido*. Sp., *arseniato acido*. A monohydric or dihydric *a.*; in the older chemical works more especially restricted to the latter. [B. 142.]—**Basic a.** Fr., *arséniate basique*. Ger., *basisches Arseniat*. It., *arseniato basico*. Sp., *arseniato básico*. See under *A.*—**Dihydric a.** 1. An acid containing 2 atoms of hydrogen. See *supra*. 2. Pyroarsenic acid. [B. 158.]—**Monohydric a.** 1. An acid containing 1 atom of hydrogen. See *supra*. 2. Metarsenic acid. [B. 158.]—**Neutral a.** Fr., *arséniate neutre*. Ger., *neutrales Arseniat*. It., *arseniato neutro*. 1. A normal *a.* 2. In the older chemical works, a pyroarsenate. [B. 142.]—**Trihydric a.** Arsenic (orthoarsenic) acid. [B. 158.]

**ARSENIETHYL**, n.  $A^3r\text{-}se^2n\text{-}bi\text{-}e^2th/i^2l$ . From *arsenic* and *ethyl* (see also *Bi-*). See *ARSENIETHYL*.

**ARSENCHLORODIMETHIDE**, n.  $A^3r\text{-}se^2n\text{-}klo^3r\text{-}o\text{-}di\text{-}me^2th/i^2d(i)$ . Diarsentetramethyl chloride. [B. 158.]

**ARSENDIETHYL**, n.  $A^3r\text{-}se^2n\text{-}di\text{-}e^2th/i^2l$ . From *arsenic* and *ethyl* (see also *Di-*). Fr., *arsén-diéthyle*. Ger., *Arsendiäthyl*. A univalent radicle,  $As(C_2H_5)_2$ . It occurs in the free state with doubled molecule, constituting  $As_2(C_2H_5)_4$ , or *diarsentetretethyl* (q. v.). [B. 4.]

—**A. iodide.** Fr., *iodure d'arsén-diéthyle*. Ger., *Arsendiäthyljodür*. A yellowish oily liquid,  $As(C_2H_5)_2I$ , insoluble in water. [B. 4.]

**ARSENDIETHYLIC**, adj.  $A^3r\text{-}se^2n\text{-}di\text{-}e^2th/i^2l$ . Fr., *arsén-diéthylque*. Of, pertaining to, or derived from, arsendiethyl. [B.]—**A. acid.** Fr., *acide arsen-diéthylque*. Ger., *Arsendiäthylsäure*. See *DIETHYLARSINIC ACID*.

**ARSENDIMETHYL**, n.  $A^3r\text{-}se^2n\text{-}di\text{-}me^2th/i^2l$ . From *arsenic* and *methyl* (see also *Di-*). Fr., *arsén-diméthyle*. Ger., *Arsendi-methyl*. See *CACODYL*.

**ARSENDIMETHYLIC**, adj.  $A^3r\text{-}se^2n\text{-}di\text{-}me^2th/i^2l$ . Fr., *arsén-diméthylque*. Of, pertaining to, or derived from, arsendimethyl; cacodylic. [B.]—**A. acid.** Fr., *acide arsen-diméthylque*. Ger., *Arsendimethylsäure*. See *DIETHYLARSINIC ACID*.

**ARSENDIPHENYL**, n.  $A^3r\text{-}se^2n\text{-}di\text{-}fe^2n/i^2l$ . Fr., *arsén-diphényle*. Ger., *Arsendiphenyl*. Syn.: *diphenylarsen*. A univalent or trivalent radicle,  $As(C_6H_5)_2$  or  $As(C_6H_5)_3$ . [B.]—**A. chloride.** Fr., *chlorure d'arsén-diphényle*. Ger., *Arsendiphenylchlorür*. An oily liquid of the composition  $As(C_6H_5)_2Cl$ . [B. 4.]—**A. trichloride.** Fr., *trichlorure d'arsén-diphényle*. Ger., *Arsendiphenyltrichlorür*. A solid substance,  $As(C_6H_5)_3Cl_3$ , decomposed by water into diphenylarsinic acid. [B. 4.]

**ARSENDIPHENYLIC**, adj.  $A^3r\text{-}se^2n\text{-}di\text{-}fe^2n/i^2l$ . Fr., *arsén-diphénylique*. Of, pertaining to, or derived from, arsendiphenyl. [B.]

**ARSENETHYL**, n.  $A^3r\text{-}se^2n\text{-}e^2th/i^2l$ . Fr., *arsén-éthyle*. Ger., *Arsenäthyl*. A bivalent or quadrivalent radicle,  $As(C_2H_5)_2$  or  $As(C_2H_5)_4$ . [B.]—**A. diiodide.** Fr., *biiodure d'arsén-éthyle*. Ger., *Arsenäthyljodür*. A substance,  $As(C_2H_5)_2I_2$ , formed by the action of iodine upon arsendiethyl iodide. [B. 2.]

**ARSENETHYLIC**, adj.  $A^3r\text{-}se^2n\text{-}e^2th/i^2l$ . Fr., *arsénéthylque*. Of, pertaining to, or derived from, arsenethyl. [B.]

**ARSENETHYLUM** (Lat.), n. n.  $A^3r\text{-}se^2n\text{-}e^2th/i^2l(u^2l)/i^2u^2m(u^2m)$ . Fr., *arsén-éthylum*. Ger., *Arsenäthylum*. See *ETHYL-ARSONIUM* and *TETRETHYLARSONIUM*.

**ARSENETED**, adj.  $A^3rs\text{-}e^2n\text{-}e^2t\text{-}e^2d$ . See *ARSENIURETED*.

**ARSENIA** (Lat.), n. f.  $A^3r\text{-}se^2n/i^2a^2$ . Hydrogen arsenide. [B. 9.]

**ARSENIAC**, adj.  $A^3r\text{-}se^2n/i^2a^2k$ . Of or pertaining to arsenic. [B.]—**A. acid.** Arsenic acid. [B. 91.]

**ARSENIAS** (Lat.), n. m.  $A^3r\text{-}se^2n/i^2a^2s(a^2s)$ . Gen., *arsenia'tis*. An arsenate. [B.]—**A. ammoniac.** See *AMMONIUM ARSENATE*.—**A. ammoniac solutus.** See *LIQUOR AMMONII ARSENICI*.—**A. bihydric-o-kalicens.** Dihydric potassium arsenate. [A. 316.] See *POTASSIUM ARSENATE*.—**A. ferricus.** Ferric arsenate. [A. 316.] See *IRON ARSENATE*.—**A. ferrosus** [Fr. Cod.]. Ferrous arsenate. [B. 113.] See *IRON ARSENATE*.—**A. hydrico-binatriens.** Disodic arsenate. [A. 316.] See *SODIUM ARSENATE*.—**A. natriens.** Sodium arsenate. [B.]—**A. potassicus.** Potassium arsenate. [A. 316.]—**A. sodicus** [Fr. Cod.]. Disodic arsenate. [B. 113.] See *SODIUM ARSENATE*.—**A. sodicus aqua solutus** [Fr. Cod.]. See *LIQUOR SODII ARSENIATIS*.

**ARSENIASIS** (Lat.), n. f.  $A^3r\text{-}se^2n\text{-}i^2a(a^2s)/si^2s$ . Gen., *arsenia'seos (-sis)*. Fr., *arséniasie*. Poisoning by arsenic; arsenicalism. [B. 38.] See under *ARSENIC trioxide*.

**ARSENIATE**, n.  $A^3r\text{-}se^2n/i^2a^2$ . Fr., *arséniate*. Ger., *Arseniat*. It., Sp., *arseniato*. See *ARSENATE*.

**ARSENIATE** (Fr.), n.  $A^3r\text{-}san\text{-}i^2a^2t$ . An arsenate. [B.]—**A. ferreux** [Fr. Cod.]. Ferrous arsenate. [B. 113.] See *IRON ARSENATE*.

**ARSENIATED**, adj.  $A^3r\text{-}se^2n/i^2a^2\text{-}e^2d$ . Lat., *arsenicatus*. Fr., *arséniaté, arsénié, arséniqué*. It., *arseniato*. Sp., *arseniado*. Arseniureted. [B.]

**ARSENIC**, n.  $A^3r\text{-}se^2n\text{-}i^2k$ . From *ἀρσενικόν*, *ἀρρηνικόν*, orpiment, so called from *ἀρρηνικός*, masculine, on account of its strength. Lat., *arsenicum, arsenum, arsenium* [U. S. Ph.]. Fr., *arsenic*. Ger., *Arsen*, *Arsenik*. It., *arsenico*. Sp., *arsénico*. 1. An element frequently ranked among the metals, but now usually regarded as non-metallic. It was known under the form of its sulphur compounds to the ancients, but was first isolated by the later alchemists (Schröder, 1694; Brandt, 1773). It occurs in nature in combination with iron as löllingite, with iron and sulphur as arsenical pyrites or mispickel, with sulphur as realgar and orpiment, and with nickel, cobalt, and other elements; and it is also found in the free state. A. is procured chiefly by subliming arsenical pyrites when it is obtained under the form of a steel-gray, brittle, crystalline mass of metallic lustre. On resublimation, this is converted into lustrous rhombohedral crystals, isomorphous with those of tellurium and antimony of a sp. gr. of 5.727. *Amorphous a.*, under the form of either a shining black mass or a grayish powder, and having a sp. gr. of 4.710, is obtained by subliming crystalline a. in a current of hydrogen and condensing in the colder portion of the sublimation-tube. On heating, this is converted into crystalline a. A. usually volatilizes directly, without fusion, giving off a lemon-colored vapor of garlicky odor, but under increased pressure can be melted, and then solidifies into a crystalline mass of a sp. gr. of 5.709. On exposure to moist air, a. readily oxidizes and becomes covered with a grayish film. In composition a. acts sometimes as a triad, sometimes as a pentad, forming compounds analogous to those of nitrogen, with which it is usually associated in systematic chemical treatises. It unites directly with hydrogen, forming arsine, which is the starting-point for the different a. bases (arsines, arsoniums, and their derivatives the arsinic and arsonic acids). It also forms compounds with the halogens and with phosphorus; and with oxygen and sulphur it unites to form oxides and sulphides, which in turn give rise to various oxyacids and sulphur acids, and to their salts, the arsenates, metarsenates, arsenates, pyroarsenates, metarsenates, thioarsenates, and thioarsenates. Atomic weight, 74.9; vapor density, 149.8 (the molecule containing 4 atoms of a, instead of 2 as in the case of most elements); symbol, As (occasion-

ally Ar). [B. 3, 158, 159, 196.] 2. In common parlance, a. is used for a. trioxide, and formerly designated also a. trisulphide. [B.]—**A. ammonio-chloride**. Fr., *ammonio chlorure d'a.* A white solid substance.  $\text{As}_2\text{H}_3\text{N}_7\text{Cl}_6 = 2\text{AsCl}_3 + 7\text{NH}_3$  (Rose), or  $2(\text{NH}_4\text{AsCl}_4) \cdot 4\text{NH}_4\text{Cl} \cdot \text{NH}_3$  (Pasteur), or  $\text{AsCl}_3 + 3\text{NH}_3$  (Roscoe and Schorlemmer), or  $\text{AsCl}_3 + 2\text{NH}_3$  (Frankland and Japp), soluble in water and in alcohol, formed by the action of dry ammonia upon a. trichloride. [B. 2, 3, 159.]—**A. and calcium sulphide**. See **CALCIUM THIOARSENITE** and **Sulphuretum ARSENICI et calcis**.—**A. and selenium sulphide**. See **A. seleno-sulphide** and **A. thio-selenide**.—**A. base**. Fr., *base arsenicale*. Ger., *Arsenbase*. It., *base arsenicale*. Sp., *base arsenical*. A bases containing a. as arsenic and its substitution compounds and the arsoniums; a base having the same relation to a. that the ammonium bases have to nitrogen. [B.]—**A. bichloride**. Fr., *bichlorure d'a.* See **A. dichloride**.—**A. bisulphide**. **A. bisulphuret**. See **A. disulphide**.—**A. blanc** (Fr.). White a. [B.] See **A. trioxide**.—**A. bloom**. Ger., *Arsenikblüthe*. See **ARSENOLITE**.—**A. bromide**. Fr., *bromure d'a.* Ger., *Bromarsen*, *Arsenbromür*. It., *bromuro di arsenico*. Sp., *bromuro de arsenico*. A compound of a. and bromine. [B.] See **A. tribromide**.—**A. chloridhydrate**. Fr., *chloridhydrate d'a.* Ger., *Arsenchloridhydrat*. See under **A. oxychloride**.—**A. chloride**. Lat., *arsenici chloridum*. Fr., *chlorure d'a.* Ger., *Arsenchlorür*, *Arsenchlorid*, *Chlorarsen*. It., *cloruro di arsenico*. Sp., *cloruro de arsenico*. A compound of a. and chlorine. [B.] See **A. trichloride**.—**A. chlorophosphide**. A compound of a. with chlorine and phosphorus, prepared by heating together on a water-bath arsenic acid 1 part, phosphorus 2 parts, dilute hydrochloric acid 180 parts, and water up to 270 parts. ["*Drugg. Circ. and Chem. Gaz.*," Nov., 1881, p. 171, and Jan., 1884, p. 9 (B).]—**A. des philosophes** (Fr.). An alchemical term for mercury or the substance from which mercury or sulphur is obtained. [B. 38.]—**A. dichloride**. Fr., *bichlorure d'a.* Ger., *Arsendichlorid*. A substance,  $\text{AsCl}_2$ , obtained, according to Gmelin and Dumas, by distilling a. trioxide and sulphuric acid and adding common salt during the operation. [B. 142.]—**A. dihydrate**. Fr., *bihydrate d'a.* Ger., *Arsendihydrat*. It., *diidrato di arsenico*. Pyroarsenic acid. [B. 2.]—**A. dihydride**. Fr., *bihydure d'a.* Ger., *Arsendihydür*. Solid hydrogen arsenide. See **HYDROGEN ARSENIDE**.—**A. disulphide**. Fr., *sulfure d'a.* Ger., *Arsensulfid*, *Arsensulfur*, *Arsensulfid*, *Zweifach-Schwefelarsen*, *rothes Rauschgelb*. It., *bisolfuro di arsenico*. Sp., *bisulfuro de arsenico*, *arsenico rojo* [Sp. Ph.], *rejalgar* [Sp. Ph.]. Syn.: *realgar*, *red orpiment*. A substance,  $\text{As}_2\text{S}_3$ , occurring native as resinous-looking translucent prismatic crystals, orange-yellow in color, streaked with yellow or red. A substance of similar, although somewhat variable, composition, called *ruby sulphur* or *red a. glass*, *arsenicum rubrum facitium*, is prepared by heating arsenical pyrites with iron pyrites or other sulphurous ore. It is a red vitreous mass translucent at the edges, containing from 66 to 75 per cent. of a. A disulphide combines with basic sulphides to form compounds known as *hypothioarsenites* (q. v.), and is hence improperly called *hyposulpharsenious acid*. It is used in tanning and in pyrotechnics, and has been occasionally used in medicine as a remedy for intermittent fevers. [B. 3, 119.]—**A. flour**. Ger., *Giftmehl*. See under **A. trioxide**.—**A. fluo-ride**. Fr., *fluorure d'a.* Ger., *Arsenfluorür*. It., *fluoruro di arsenico*. A compound of a. and fluorine. [B.] See **A. trifluoride** and **A. pentafluoride**.—**A. glass**. Fr., *verre d'a.* Ger., *Arsenglas*. See **A. disulphide** and **A. trioxide**.—**A. hydrate**. Fr., *hydrate d'a.* Ger., *Arsenhydrat*. It., *idrato di arsenico*. Sp., *hidrato de arsenico*. See **A. monohydrate**, **A. dihydrate**, and **A. trihydrate**.—**A. hydride**. Fr., *hydure d'a.* Ger., *Arsenwasserstoff*. It., *idruo di arsenico*. Sp., *hidruo de arsenico*. See **HYDROGEN ARSENIDE**.—**A. hydriodate**. See **A. triiodide**.—**A. hypersulphuret**. Ger., *Arsenikübersulfid* [Berzelius]. A persulphide. [B. 142.]—**A. iodide**, **A. ioduret**. Lat., *arsenicum iodatum* (seu *ioduretum* [Gr. Ph.], *arsenii iodium* [U. S. Ph., Br. Ph.]). Fr., *iodure d'a.* Ger., *Jodarsen*, *Arsenjodür*. It., *ioduro di arsenico*. Sp., *ioduro de arsenico*. A compound of a. and iodine. [B.] See **A. triiodide**.—**A. monohydrate**. Fr., *monohydrate d'a.* Ger., *Arsenmonhydrat*. It., *monoidrato di arsenico*. See **METARSENIC ACID**.—**A. noir** (Fr.). Metallic a. [A. 301.]—**A. normal** (Fr.). The a. which, according to some, is invariably present in all dead bodies and which is always to be found on making the appropriate tests. [Raspail (B. 38).]—**A. octadeca-sulphide**. A persulphide. [B. 140.]—**A. oxide**. Lat., *arsenicum oxydatum*, *arsenici oxidum*. Fr., *oxyde d'a.* Ger., *Arsenoxid*. It., *ossido di arsenico*. Sp., *óxido de arsenico*. A compound of a. and oxygen. [B.] See **A. trioxide**, **A. pentoxide**, and **A. suboxide**.—**A. oxybromide**. Fr., *oxybromure d'a.* Ger., *Arsenoxibromür*. It., *ossibromuro di arsenico*. A soft dark-colored mass of the composition  $\text{AsBrO}$ , forming the lower of two layers into which a solution of a. trioxide in a fused a. tribromide separates after distillation and cooling. A hydrated oxybromide,  $2\text{AsBrO} \cdot 3\text{H}_2\text{O}$ , consisting of thin, white, pearly crystals, is formed by evaporating in the cold over sulphuric acid a solution of a. tribromide in water containing hydrobromic acid. [A. 1.]—**A. oxychloride**. Fr., *oxychlorure d'a.* Ger., *Arsenoxychlorür*. It., *ossicloruro di arsenico*. A viscid, translucent brownish mass of the composition  $\text{AsClO}$  ( $= \text{AsCl}_2 \cdot \text{As}_2\text{O}_3$ ), obtained by distilling a solution of a. trioxide in a. trichloride, also by treating a. trichloride with a quantity of water insufficient to dissolve it. Combined with water this body constitutes **A. chloridhydrate**,  $\text{AsCl}(\text{OH})_2 = \text{AsOCl} + \text{H}_2\text{O}$ , a substance deposited as acicular crystals when a. trichloride is decomposed with water. [A. 1; B. 159.]—**A. oxyd** (Fr.). A. oxide. [B. 132.]—**A. oxyiodide**. Fr., *oxyiodure d'a.* Ger., *Arsenoxijodür*. It., *ossioduro di arsenico*. A substance forming thin pearly laminar crystals of the composition  $\text{As}_2\text{I}_2\text{O}_7 (= 2\text{AsIO} \cdot 3\text{As}_2\text{O}_3) + 6\text{H}_2\text{O}$ , deposited from a slowly cooled aqueous solution of a. triiodide. [A. 1.]—**A. oxysulphide**. Fr., *oxysulfure d'a.* Ger., *Arsenoxysulfür*. It., *ossisolfuro di ar-*

*senico*. Sp., *óxisulfuro de arsenico*. A substance,  $\text{As}_2\text{O}_3\text{S}_2$ , improperly called *sulphoarsenic acid*, known only in solution and through its compounds with basic oxides, called sulphoarsenates. [B. 140.]—**A. pentafluoride**. Fr., *pentafluorure d'a.* Ger., *Arsenpentafluorid*. A substance,  $\text{AsF}_5$ , known only in composition with other fluorides. [B. 3.]—**A. pentamethylide**. See **PENTAMETHYLARSINE**.—**A. pentasulphide**. Fr., *pentasulfure d'a.*, *quintisulfure d'a.* Ger., *Arsenpentasulfid*, *Arsensupersulfid*. It., *pentasolfuro di arsenico*. Sp., *pentasulfuro de arsenico*. Syn.: *arsenic sulphide*, *sulpharsenic anhydride*. A substance,  $\text{As}_2\text{S}_5$ , obtained as a yellow precipitate by decomposing a thioarsenate with hydrochloric acid, and also prepared by fusing together a. trisulphide and sulphur. In combination with basic sulphides it forms the class of salts called thioarsenates, and is hence frequently (although improperly) called *sulpharsenic acid*. [B. 2, 3, 159.]—**A. pentoxide**. Fr., *pentoxyde d'a.* Ger., *Arsenpentoxyd*. It., *pentossido di arsenico*. Sp., *pentóxido de arsenico*. Syn.: *arsenic oxide* (or *anhydride*), *anhydrous arsenic acid*. A substance,  $\text{As}_2\text{O}_5$ , occurring as a white porous mass when arsenic acid is heated to just below a red heat. It is soluble in water, deliquesces in moist air, forming arsenic acid, and by reducing agents is converted into metallic a. By combining with water in various proportions it forms arsenic, metarsenic, and pyroarsenic acids, and is itself often erroneously designated as arsenic acid. [B. 3.]—**A. persulphide**. Fr., *persulfure d'a.* Ger., *Arsenpersulfid*. It., *persolfuro di arsenico*. Sp., *persulfuro de arsenico*. A substance having, according to Berzelius, the composition  $\text{As}_2\text{S}_{10}$ , obtained as yellow crystalline scales by mixing a solution of dipotassic or disodic thioarsenate with alcohol and evaporating to about two thirds. The name a. persulphide is also applied to a sulphide of a. containing a higher proportion of sulphur, made by fusing a. trioxide with sulphur. [B. 2, 140.]—**A. phosphide**. Fr., *phosphure d'a.* Ger., *Phosphorarsen*. It., *fosfuro di arsenico*. A brownish-red substance,  $\text{AsP}$ , compounded of a. and phosphorus. [B. 3.]—**A. radicle**. A radicle containing a., especially one compounded of a. and a hydrocarbon. [B.] See **ARSINE** and **ARSONIUM**.—**A. seleno-sulphide**. Fr., *sélenio-sulfure d'a.* A reddish-colored translucent substance of the composition  $\text{AsSeS}_2$ . [B. 3.] Cf. **A. thio-selenide**.—**A. sesquichloride**. Fr., *sesquichlorure d'a.* Ger., *Arsensesquichlorür*. A. trichloride. [B. 142.]—**A. suboxide**. Fr., *sous-oxide d'a.* Ger., *Arsensuboxyd*. It., *sotto-ossido di arsenico*. Sp., *subóxido de arsenico*. The blackish-gray oxide of a. deposited upon metallic a. when exposed to moist air. It is probably a mixture of a. and a trioxide. According to some, the garlicky odor of metallic a. is due to a suboxide of a. [B. 140, 196.]—**A. subsulphide**. Fr., *sous-sulfure d'a.* Ger., *Arsensubulfür*. It., *sotto-solfuro di arsenico*. Sp., *subulfuro de arsenico*. A brown powder,  $\text{As}_2\text{S}_3$ , which remains when a. disulphide is digested with caustic alkalies. [A. 1.]—**A. sulfuré** (Fr.). A. sulphide. [B.]—**A. sulfuré jaune** (Fr.). A. trisulphide. [B. 119.]—**A. sulfuré rouge** (Fr.). A. disulphide. [B. 119.]—**A. sulphate**. Fr., *sulfate d'a.* Ger., *schwefelsaures Arsenoxyd*. It., *solfato di arsenico*. Sp., *sulfato de arsenico*. A compound supposed to be obtained when a. is heated with sulphuric acid. [B. 140.]—**A. sulphide**. Lat., *arsenicum sulfuratum*, *arsenici sulphidum*. Fr., *sulfure d'a.*, *a. sulfuré*. Ger., *Schwefelarsen*, *Arsensulfid*. It., *solfuro di arsenico*. Sp., *sulfuro de arsenico*. A compound of a. and sulphur. [B.] See **A. subsulphide**, **A. disulphide**, **A. trisulphide**, **A. pentasulphide**, and **A. persulphide**.—**A. superiodide**. Lat., *arsenici superioduretum*. An iodide of a. (apparently the triiodide) occurring in the liquor arsenici superiodureti. [B. 98.]—**A. terbromide**, **A. terchloride**, **A. terfluoride**, **A. teriodide**, **A. teroxide**, **A. tersulphide** (or *tersulphuret*). See **A. tribromide**, **A. trichloride**, **A. trifluoride**, **A. triiodide**, **A. trioxide**, and **A. trisulphide**.—**A. thio-selenide**. Fr., *thioséleniure d'a.* Ger., *Arsenthio-seleniur*. A crystalline substance of the composition  $\text{AsSeS}_2$ . [B. 3.] Cf. **A. seleno-sulphide**.—**A. tribromide**. Lat., *arsenici terbromidum*. Fr., *tribromure d'a.*, *bromure arsenieux*. Ger., *Arsenbromür*, *Arsentribromür*. It., *tribromuro di arsenico*. Sp., *tribromuro de arsenico*. Syn.: *arsenious bromide*, *bromide of a.* A substance,  $\text{AsBr}_3$ , occurring as colorless deliquescent prismatic crystals of strong arsenical odor, formed by the action of pulverized a. upon a solution of bromine in carbon disulphide. [B. 3, 159.]—**A. trichloride**. Lat., *arsenici* (seu *arsenii*) *chloridum*, *arsenicum chloratum*. Fr., *trichlorure d'a.*, *chlorure arsenieux*. Ger., *Chlorarsen*, *Arsenchlorid*, *Arsenchlorür*, *Arsentrichlorür*. It., *trichloruro di arsenico*, *cloruro arsenioso*. Sp., *triclóro de arsenico*. Syn.: *butter of a.*, *caustic oil of a.*, *arsenious chloride*. A very heavy, colorless, oily liquid,  $\text{AsCl}_3$ , obtained by the action of dry chlorine upon a., by distilling a. with corrosive sublimate or a. trioxide with sodium chloride and sulphuric acid, or by boiling a solution of a. trioxide in hydrochloric acid. It gives off white fumes of a. trioxide on exposure to the air and on contact with a small quantity of water, decomposes with the formation of a. chloridhydrate, while by an excess of water it is decomposed into a. trioxide and hydrochloric acid. Contact with dry ammonia converts it into a. ammonio-chloride. It is very poisonous. [B. 2, 3, 159.]—**A. trifluoride**. Fr., *trifluorure d'a.* Ger., *Arsentrifluorür*. A transparent, colorless liquid,  $\text{AsF}_3$ , very volatile and fuming on exposure to the air. A drop of it applied to the skin produces a painful ulcer which suppurates a long time like a burn. [A. 1; B. 3.]—**A. trihydrate**. Fr., *trihydrate d'a.* Ger., *Arsentrihydrat*. It., *trihidrato di arsenico*. Sp., *trihidrato de arsenico*. A. arsenic acid. [B. 2.]—**A. trihydride**. Fr., *trihydure d'a.* Ger., *Arsentrihydür*. It., *trihidruo di arsenico*. Sp., *trihidruo de arsenico*. Arseniureted hydrogen gas. [B.] See **HYDROGEN ARSENIDE**.—**A. triiodide**. Lat., *arsenici iodium* (seu *triiodidum*), *arsenii iodium* [U. S. Ph., Br. Ph.], *arsenicum iodatum* (seu *ioduretum* [Greek Ph.]). Fr., *triiodure d'a.*, *iodure arsenieux*. Ger., *Jodarsen*, *Arsenjodür*, *Arsentrijodür*. It., *triioduro di arsenico*, *ioduro arsenioso*. Sp., *triioduro de arsenico*. Syn.: *iodide of a.*, *arsenious iodide*. An unstable compound,  $\text{AsI}_3$ , formed by melting together a mixture of a. and iodine. It occurs as orange-red crystalline masses of iodine-

like odor and taste, soluble in water, in alcohol, and in ether. From the alcoholic solution it crystallizes in brick-red laminae. It has been used as an application in ulcerating tubercular skin diseases and internally in impetigo, lepra, and affections resembling cancer. It is also used in the preparation of the liquor arseni et hydrargyri iodidi. [B, 2, 5.] Cf. *Liquor superioduret* ARSENICI.—**A. trioxide.** Lat., *acidum arsenicum* [U. S. Ph., Br. Ph., Belg. Ph., Swiss Ph.], *acidum arsenicosum* [Ger. Ph., Aust. Ph., Hung. Ph., Russ. Ph., Norweg. Ph., Swed. Ph., Dan. Ph., Fenn. Ph.], *arsenicum album* [Greek Ph.], Fr., *acide arsénieux* [Fr. Cod.], *trioxyde d'a., oxyde blanc d'a., a. blanc.* Ger., *arsenige Säure, Arsenoxyd, Arsenitrioxyd, weisses Arsen.* It., *acido arsenioso, arsenico bianco, triossido di arsenico.* Sp., *arsénico blanco* [Sp. Ph.], *trioxido de arsénico, ácido arsenioso.* Syn.: arsenious acid, white a., white oxide of a., common a. A substance,  $As_2O_3$ , obtained by volatilizing a. in the presence of oxygen. It is commonly prepared by subliming arsenical pyrites, the product of the sublimation being called *poison-flour* or *flowers of a.* On resublimation this latter product furnishes amorphous a. trioxide (a. glass, *vitreous arsenious acid*), a colorless translucent, vitreous mass of sp. gr. of 3.738, soluble in 25 parts of cold water and 94 of absolute alcohol. This amorphous form on standing is gradually converted into an opaque porcelain-like mass of crystalline structure (*opaque* or *enamel-like arsenious acid*). Crystalline a. trioxide, under the form of octahedral crystals (*octahedral arsenious acid*) of sp. gr. of 3.689 soluble in 80 parts of cold water and 400 of absolute alcohol, occurs native as arsenolite, and may be obtained artificially by crystallization of either vitreous or opaque arsenious acid from a solution in hydrochloric acid; and, under the form of rhombic crystals (*right rhombic arsenious acid*), it occurs as claudette, and is also found among the products of sublimation of arsenical pyrites. A. trioxide is odorless, has a faint sweetish metallic taste, and is volatile, emitting a colorless and odorless vapor. Chemically it is an acid-forming oxide, uniting with water to form true arsenious acid, and also metarsenious acid. It is much used in the preparation of other arsenical compounds, in the manufacture of pigments, and in glass-making. In doses of  $\frac{1}{100}$ – $\frac{1}{20}$  grain, it appears to act as a digestive tonic and cardiac and respiratory stimulant, and is much employed as a nerve-tonic in chorea and other nervous affections, as a remedy in chronic skin-disease, and as an adjunct to or substitute for quinine in the treatment of malarial poisoning, and especially of its non-febrile manifestations. By the a. eaters of Styria, a. trioxide is used habitually in much larger doses without apparent ill-effects. In ordinary cases in doses of 1 grain or upward it is an acrid poison, producing violent gastro-enteritis with ulceration of the stomach and intestines, and fatty or parenchymatous degeneration of the liver, heart, and kidneys. The symptoms of acute arsenical poisoning are burning pain in the epigastrium, marked gastric irritability, vomiting, and purging; the vomited matters being brownish or bloody and the stools black and fetid, great thirst, suppression of urine, and extreme prostration. If the patient survives this inflammatory stage, nervous symptoms (paresthesia, convulsions, tetanus, mania, etc.) frequently ensue. This acute form of arsenical poisoning is usually fatal unless the poison is evacuated or rendered inert by combination with some substance which renders it insoluble in the liquids of the stomach. The former is effected by the use of warm water, the sulphates of zinc and copper, and the use of the stomach-pump; the latter is accomplished by the use of the hydrated oxide of iron, magnesia, and sulphureted hydrogen, the first being by far the most efficacious. In addition, demulcents are to be given to reduce the inflammation, stimulants to combat the depression, and narcotics to relieve the pain. Besides this acute form of poisoning by a. trioxide or its salts, a chronic form is observed in those who work with arsenical compounds, or who in other ways take into the system small repeated doses of a soluble a. compound. The symptoms of this chronic arsenical poisoning are gastric disturbance, cutaneous irritation, conjunctival redness and itching, and oedema of the eyelids. In its topical action, a. trioxide is an escharotic and is frequently applied, especially by irregular practitioners, to cancerous and other malignant ulcers. A. trioxide enters into the composition of the liquor potassii arsenitis, liquor acidi arseniosi, and other official and unofficial solutions and pastes. [B, 3, 5, 159.] —**A. trisulphide.** Gr., *ἀρσενικον* (Dioscorides), *ἀρσενικον* (Theophrastus). Lat., *sulphuretum arsenici flavum* [Belg. Ph.], *arsenicum sulfuraturn citrinum, arsenici tersulphuretum, arsenicum* (Pliny), *auripigmentum* (Vitruius). Fr., *sulfure jaune d'a.* [Fr. Cod.], *trisulfure d'a.* Ger., *Arsensupersulfür, Arsenitrisulfid, gelbes Rauschgelb.* It., *trisolfuro di arsenico, orpimento.* Sp., *arsénico amarillo* [Sp. Ph.], *orpimente* [Sp. Ph.], *trisulfuro de arsénico.* Syn.: arsenious sulphide, yellow sulphide of a., sulpharsenious anhydride. A substance,  $As_2S_3$ , occurring native, under the form of lemon-yellow rhombic prismatic crystals, as the mineral *orpiment*, and obtainable artificially as an orange-yellow powder by precipitating an acidulated solution of a. trioxide or of an arsenite with hydrogen sulphide. It is ordinarily insoluble in water, but may be obtained in solution by passing hydrogen sulphide into a pure aqueous solution of a. trioxide and separating the unaltered a. trioxide by dialysis. This variety of a. trisulphide, called *colloidal arsenious sulphide*, forms a yellowish solution with reddish fluorescence, which on evaporation yields a yellowish or reddish, amorphous, translucent substance. Commercial a. trisulphide is prepared by heating together a. trioxide and sulphur, and is really a mixture of the trioxide and trisulphide. It is highly poisonous, while the pure trisulphide is comparatively inert. In composition with basic sulphides, a. trisulphide forms sulphur salts (thioarsenites), analogous to the arsenites, and is hence often improperly called sulpharsenious acid. A. trisulphide is used as a pigment (*king's yellow*) in the printing of indigo-colors, and in the manufacture of fire-works; and it has been employed in medicine chiefly as a depilatory, but also formerly by way of fumigation in the treatment of asthma and venereal ulcers. See MIXTURE cathérétique. The Fr. Codex distinguishes native orpiment (*sulfure jaune d'a. naturel*)

from the trisulphide artificially prepared by precipitation (*sulfure jaune d'a. officinal*). [B, 3, 5, 59, 113, 159.] —**Ammonio-chlorure d'a.** (Fr.). **ARSENIC**, adj. A<sup>3</sup>-se<sup>n</sup>l<sup>2</sup>k. Lat., *arsenicus, arsenicus.* Fr., *arsénique.* It., *arsenico.* Sp., *arsénico.* Of, pertaining to, or containing, arsenic; in chemical nomenclature, containing arsenic as a quivalent radicle. [B.] —**Anhydrous a. acid.** Fr., *acide arsénique anhydre.* Ger., *wasserfreie Arsensäure.* It., *acido arsenico anidro.* Sp., *ácido arsénico.* Arsenic pentoxide. [B.] —**A. acid.** Lat., *acidum arsenicum* [Fr. Cod.] (see *arsenicum* [Swiss Ph.]). Fr., *acide arsénique* [Fr. Cod.]. Ger., *Arsensäure.* It., *acido arsenico.* Sp., *ácido arsénico.* A name often given improperly to arsenic pentoxide, but properly applied to the hydrate of this substance,  $H_3AsO_4(As_2O_5 + 3H_2O = 2H_3AsO_4)$ , which acts as a tribasic acid forming salts called arsenates. A. acid usually occurs in the

form of a very concentrated aqueous solution of syrupy consistence, metallic taste, strongly acid reaction, and corrosive properties. From this solution the pure acid (the a. acid of the Fr. Cod. and Swiss Ph.) separates in the form of acicular crystals having the constitution  $2\text{H}_3\text{AsO}_3 + \text{H}_2\text{O}$ . At  $100^\circ\text{C}$ . these crystals melt, lose their water of crystallization, and are reduced to a white pulverulent mass. At  $140^\circ\text{--}160^\circ\text{C}$ . a. acid is converted into pyroarsenic acid, and at  $260^\circ\text{C}$ . into metaarsenic acid. A. acid and the arsenates are poisonous, but not as much so as arsenic trioxide and the arsenites. [B, 2, 3.] See also METARSENIC ACID and PYROARSENIC ACID. —**A. anhydride**. Fr., *anhydride arsenique*. Ger., *Arsensäureanhydrid*. It., *anidride arsenica*. See ARSENIC pentoxide. —**A. oxide**. Fr., *oxyde arsenique*. It., *ossido arsenico*. Sp., *óxido arsenico*. See ARSENIC pentoxide. —**A. sulphide**. Fr., *sulfure arsenique*. It., *solfuro arsenico*. Sp., *sulfuro arsenico*. See ARSENIC pentasulphide. —**Monobasic a. acid**. See METARSENIC ACID. —**Tetrabasic a. acid**. See PYROARSENIC ACID. —**Tribasic a. acid**. See A. acid.

**ARSENICAL**, adj.  $\text{A}^3\text{r-se}^2\text{n}^1\text{i}^2\text{k-a}^2\text{l}$ . Lat., *arsenicalis*. Fr., *arsénical*. Ger., *arsenikalisch*. It., *arsenicale*. Sp., *arsenical*. Of, pertaining to, or containing arsenic; derived from arsenic. [B.] See A. CAUSTIC, A. CEDEMA, A. PASTE, A. PYRITES, A. INTOXICATION, A. POISONING, A. RASH, A. SALT, and A. SOLUTION.

**ARSENICALIS** (Lat.), adj.  $\text{A}^3\text{r-se}^2\text{n}^1\text{i}^2\text{k-a}^2\text{l}^2\text{s}$ . Arsenical. [B.] For special uses of the word see under CEDEMA, SOLUTIO, and ULCUS.

**ARSENICALISM**, n.  $\text{A}^3\text{r-se}^2\text{n}^1\text{i}^2\text{k-a}^2\text{l}^2\text{zm}$ . Fr., *arsenicisme*. Chronic arsenical poisoning. [A, 301.] See ARSENIC trioxide.

**ARSENICATE**, v. tr.  $\text{A}^3\text{r-se}^2\text{n}^1\text{i}^2\text{k-at}$ . Lat., *arsenicare*. To impregnate with arsenic. [A, 316.]

**ARSENICATUS** (Lat.), adj.  $\text{A}^3\text{r-se}^2\text{n}^1\text{i}^2\text{k-a}^2\text{l}^2\text{s}(\text{tu}^4\text{s})$ . Fr., *arséniqué*. Arsenicated; combined with or containing arsenic. [B, 119.]

**ARSENICHT** (Ger.), adj.  $\text{A}^3\text{r-se}^2\text{n}^1\text{i}^2\text{ch}^2\text{t}$ . Arsenious. —**A'e Säure**. Arsenious acid.

**ARSENICIASIS** (Lat.), n. f.  $\text{A}^3\text{r-se}^2\text{n}^1\text{i}^2\text{-si}^2(\text{ki}^2)\text{-a}^2\text{l}^2\text{s}$ . Gen., *arsenicic/seos (-is)*. Fr., *arsenicicase*. Ger., *Arsenikdarre*. See ARSENICALISM.

**ARSENICUS** (Lat.), adj.  $\text{A}^3\text{r-se}^2\text{n}^1\text{i}^2\text{s}(\text{i}^2\text{k})^2\text{-u}^3\text{s}(\text{u}^4\text{s})$ . Fr., *arsénique*. Arsenical; agreeing with the name of a base, the arsenate of that base. [B.] See ACIDUM arsenicum, FERRUM arsenicum, etc.

**ARSENICISM**, n.  $\text{A}^3\text{r-se}^2\text{n}^1\text{i}^2\text{s-i}^2\text{zm}$ . Fr., *arsenicisme*. See ARSENICALISM. [D, 34.]

**ARSENICK**, n.  $\text{A}^3\text{r-se}^2\text{n}^1\text{i}^2\text{k}$ . 1. An archaic spelling of arsenic. 2. The *Polygonum hydropiper*. [B, 222.]

**ARSENICO-FERRIFÈRE** (Fr.), adj.  $\text{A}^3\text{r-san-i}^2\text{k-o-fe}^2\text{r-ri}^2\text{-fe}^2\text{r}$ . Containing or producing arsenic and iron. [B, 132.]

**ARSENICOPHAGUS** (Lat.), n.  $\text{A}^3\text{r-se}^2\text{n}^1\text{i}^2\text{k-o}^2\text{f-a}^3\text{-gu}^3\text{s}(\text{gu}^4\text{s})$ . From *ἀρσενικόν*, arsenic, and *φαγέειν*, to eat. Fr., *arsenicophage*. Ger., *Arsenikesser*. An arsenic-eater. [L, 46.]

**ARSENICOPHAGY**, n.  $\text{A}^3\text{r-se}^2\text{n}^1\text{i}^2\text{k-o}^2\text{f-a}^3\text{-ji}^2$ . Fr., *arsenicophagie*. Ger., *Arsenikessen*. The practice of eating arsenic. [A, 385.]

**ARSENICO-SULFURATUS** (Lat.), adj.  $\text{A}^3\text{r-se}^2\text{n}^1\text{i}^2\text{k-o-su}^3\text{l}^2\text{-su}^4\text{l}^2\text{-fu}^2\text{-ra}^3\text{-tu}^3\text{s}(\text{tu}^4\text{s})$ . From *arsenicum*, arsenic, and *sulfur*, sulphur. Combined with or containing both arsenic and sulphur. [B, 78.] See HYDRARGYRUM arsenico-sulfuratum.

**ARSENICO-SULFURIDE** (Fr.), n.  $\text{A}^3\text{r-san-i}^2\text{k-o-su}^3\text{l}^2\text{-fu}^2\text{-ed}$ . A compound containing both sulphur and arsenic; a thioarsenite or thioarsenate. [B, 132.]

**ARSENICOSUS** (Lat.), adj.  $\text{A}^3\text{r-se}^2\text{n}^1\text{i}^2\text{k-o}^2\text{-su}^3\text{s}(\text{su}^4\text{s})$ . Arsenious; with the name of a base, the arsenite of that base. [B.] See ACIDUM arsenicosum.

**ARSENICUM** (Lat.), n. n.  $\text{A}^3\text{r-se}^2\text{n}^1\text{i}^2\text{k-u}^3\text{m}(\text{u}^4\text{m})$ . From Gr., *ἀρσενικόν*. See ARSENIC. 1. Orpiment or native arsenic trisulphide (Pliny). 2. Common arsenic; arsenic trioxide. 3. Metallic arsenic. In this sense now superseded by arsenium in the U. S. Ph. and Br. Ph. [B, 2, 5.] —**Antidotum arsenici** [Ger. Ph.]. See FERRI oxidi hydratum cum magnesia. —**Aqua arsenici**. See LIQUOR POTASSII arsenitis and LIQUOR arsenici albi. —**Arsenici bisulphuretum**. Arsenic disulphide. [B, 98.] —**Arsenici chloridum**. Arsenic trichloride. [B.] —**Arsenici hydriodas**. Arsenic iodide. [U. S. Ph., 1870.] —**Arsenici ioduretum**. Arsenic triiodide. [B.] —**Arsenici oxydum album** [Dub. Ph., 1826]. Arsenic trioxide. [B, 5.] —**Arsenici oxydum album sublimatum** [Dub. Ph., 1826]. Arsenic oxydum preparatum, Arsenic oxydum sublimatum. Sublimed white oxide of arsenic; arsenic trioxide purified by sublimation. [B, 5, 59.] —**Arsenici superiodidum**. Arsenic superiodide. [B, 98.] —**Arsenici terbromidum**. Arsenic tribromide. [B.] —**Arsenici terchloridum**. Arsenic trichloride. [B.] —**Arsenici teriodidum**. Arsenic triiodide. [B, 98.] —**Arsenici tersulphuretum**. Arsenic trisulphide. [B, 98.] —**A. album** [Greek Ph.]. Arsenic trioxide. [B, 95.] —**A. album calcinatum Bergmanni**. A. album pulveratum. Arsenic trioxide. [B.] —**A. album sublimatum**. Sublimed arsenic trioxide. [A, 316.] —**A. album venale pulveratum**. An impure trioxide of arsenic, used as a poison for rats and other vermin. [B, 270.] —**A. antimoniatum**. See CAUSTICUM arsenicale. —**A. bromatum**. Arsenic tribromide. [A, 316.] —**A. chloratum**. Arsenic trichloride. [B, 48.] —**A. citrinum**. Arsenic trisulphide. [B.] —**A. citrinum factitium**. Artificially prepared arsenic trisulphide. [A, 316.] —**A. citrinum nativum**. Native arsenic trisulphide (orpiment). [B, 180.] —**A. croceum**. Arsenic trisulphide. [B, 50.] —**A. crudum**. Arsenic trioxide. [B, 119.] —**A. crystallinum** [Schroder]. Arsenic trioxide. [B, 200.] —**A. cum antimonio**. See CAUSTICUM antimoniace. —**A. factitium album** [Aldrov.]. Arsenic trioxide.

[B, 200.] —**A. factitium favum** [Aldrov.]. Artificially prepared arsenic trisulphide. [B, 200.] —**A. flavum**. Yellow sulphide of arsenic; arsenic trisulphide. [B, 119.] —**A. Grenii**. Arsenic trioxide. [A, 316.] —**A. griseum**. Ger., *grauer Arsen*. Arsenic obtained under the form of a gray powder. [B, 180.] —**A. iodatum**. A. ioduretum [Greek Ph.]. Arsenic triiodide. [B, 108, 180.] —**A. luteum**. It., *arsenico giallo*. Golden sulphide of arsenic. [A, 314.] See ARSENIC trisulphide. —**A. mineralisatum risgallum**. Arsenic trisulphide. [B, 180.] —**A. nativum porosum**. Native metallic arsenic. [B, 180.] —**A. nigrum**. Metallic arsenic. [A, 314.] —**A. oxydatum**. A. oxydatum album. Arsenic trioxide. [B, 98.] —**A. persulphuratum**. Arsenic trisulphide. [B, 180.] See, however, ARSENIC persulphide. —**A. potassicum**. Potassium arsenite. [A, 316.] —**A. pulverisatum**. See A. album venale pulveratum. —**A. rex**. An alchemical name for metallic arsenic. [B, 3.] —**A. rubrum**. Red arsenic; arsenic disulphide. [B, 119.] —**A. rubrum crudum**. Realgar; native arsenic disulphide. [B, 180.] —**A. rubrum factitium**. Artificially prepared arsenic disulphide. [B, 200.] —**A. rubrum nativum**. Realgar; native arsenic disulphide. [B, 180.] —**A. sandaracha**. Sandaracha; arsenic disulphide. [A, 316.] —**A. sulfuratum**. Arsenic sulphide. [B.] —**A. sulfuratum citrinum**. Arsenic trisulphide, especially the native trisulphide or orpiment. [B, 95.] —**A. sulfuratum citrinum purum**. Purified arsenic trisulphide; arsenic trisulphide prepared by precipitation, the *sulfure jaune d'arsenic officinal* of the Fr. Cod. [B, 95.] —**A. sulfuratum flavum**. See A. sulfuratum citrinum. —**A. sulfuratum rubrum**. Red sulphide of arsenic; arsenic disulphide. [B, 95.] —**A. testaceum**. A commercial name for one of the varieties of arsenic ore. [B, 180.] —**A. veterum**. Arsenic trioxide. [A, 316.] —**Butyrum arsenici**. Butter of arsenic; arsenic trisulphide. [B, 48.] —**Calx arsenici alba**. Arsenic trioxide. [B, 119.] —**Ceratum arsenici** [U. S. Ph., 1820, 1830]. Fr., *cérat d'arsenic* (ou *arsénical*). Ger., *Arseniksälbe*. It., *cerato di arsenico*. Cerate of arsenic; a preparation, used as an application to cancerous ulcers, consisting of arsenic trioxide, 20 grains, mixed with simple cerate, 1 oz. Various preparations of similar composition are mentioned in several of the older pharmacopœias and dispensatories. [B, 5 (4th ed.), 119.] —**Chloruretum arsenici**. Arsenic trichloride. [B, 119.] —**Deutosulphuretum citrinum arsenici nativum**. Native arsenic trisulphide; orpiment. [B, 180.] —**Ioduretum arsenici**. Arsenic triiodide. [B, 119.] —**Liquor arsenici albi**. A liquid obtained by the deflagration of 2 parts each of nitre and arsenic (arsenic trioxide) with, in some cases, 1 part of sulphur. [B, 59.] This preparation, as well as that known as *aqua arsenici*, seems to be mainly impure arsenic acid produced by the deliquescence of the a. pentoxide produced by the oxidation of the arsenic. [B.] —**Liquor arsenici chloridi** [U. S. Ph., 1870]. See LIQUOR ACIDI ARSENIOSI. —**Liquor arsenici et hydrargyri iodati**. **Liquor arsenici et hydrargyri iodidi** [U. S. Ph., 1870]. See LIQUOR ARSENI ET HYDRARGYRI IODIDI. —**Liquor arsenici hydrochlorici** [Br. Ph.]. Hydrochloric solution of arsenic. [B.] See LIQUOR ACIDI ARSENIOSI. —**Liquor superiodureti arsenici**. Arsenic triiodide in aqueous solution, used as an external application in cancer. [B, 48.] —**Oleum arsenici**. Caustic oil of arsenic; arsenic trichloride. [B, 48.] —**Oxydum arsenici** [Ed. Ph., 1817]. **Oxydum arsenici album**. Arsenic trioxide. [B, 5 (4th ed.), 119.] —**Oxydum arsenici album cum sulphureto stibii**. See CAUSTICUM arsenicale. —**Oxydum citrinum arsenici nativum**. Native arsenic trisulphide. [B, 180.] —**Protosulphuretum arsenici**. Arsenic disulphide. [B, 180.] —**Regulus arsenici**. Metallic arsenic. [B, 196.] —**Rubinus arsenici**. Arsenic disulphide. [B, 180.] —**Solutio arsenici**. See LIQUOR ACIDI ARSENIOSI. —**Sulphuretum arsenici flavum** [Belg. Ph.]. Arsenic trisulphide. [B, 95.] —**Sulphuretum arsenici nativum**. Native trisulphide of arsenic. [B, 180.] —**Sulphuretum arsenici rubrum** [Belg. Ph.]. Arsenic disulphide. [B, 95.] —**Sulphuretum citrinum arsenici nativum**. Native trisulphide of arsenic. [B, 180.] —**Unguentum arsenici**. See Ceratum arsenici.

**ARSENICUS** (Lat.), adj.  $\text{A}^3\text{r-se}^2\text{n}^1\text{i}^2\text{k-u}^3\text{s}(\text{u}^4\text{s})$ . Arsenical, arsenic; with the name of a base, the arsenate of that base. [B.] See ACIDUM ARSENICUM.

**ARSENIDE**, n.  $\text{A}^3\text{r-se}^2\text{n}^1\text{i}^2\text{d}(\text{id})$ . Lat., *arsenidum*, *arsenitum*. Fr., *arsénure* (1st def.), *arsénide*. Ger., *Arsenitür* (1st def.). It., *Sp. arseniuro* (1st def.). 1. A compound made up of arsenic united directly with another element or a radicle. 2. In mineralogy, a mineral composed of arsenic or of an arsenical compound. [B, 2, 132.]

**ARSÉNIÉ** (Fr.), adj.  $\text{A}^3\text{r-sa-ni}^2\text{-a}$ . Arseniated, arseniureted. [B, 132.]

**ARSENIET**, n.  $\text{A}^3\text{r-se}^2\text{n}^1\text{i}^2\text{-e}^2\text{t}$ . An arsenide. [B, 142.]

**ARSÉNIEUX** (Fr.), adj.  $\text{A}^3\text{r-sa-ni}^2\text{-u}^3$ . Arsenious. [B.]

**ARSENIFEROUS**, adj.  $\text{A}^3\text{r-se}^2\text{n}^1\text{i}^2\text{-fe}^2\text{r-u}^3\text{s}$ . Lat., *arseniferus* (from *arsenicum*, arsenic, and *ferre*, to bear). Fr., *arsénifère*. Ger., *Arsenhaltig*. It., *arsenifero*. Sp., *arsenifero*. Producing or containing arsenic, as a compounds. [B, 3, 98.]

**ARSENIG** (Ger.), adj.  $\text{A}^3\text{r-se}^2\text{n}^1\text{i}^2\text{g}$ . Arsenious. —**A'e säure**, **A'säure**. Arsenious acid. [B.] —**Wasserfreie A'säure**. Anhydrous arsenious acid; arsenic trioxide. [B.]

**ARSENİK** (Ger.), n.  $\text{A}^3\text{r-san-i}^2\text{k}$ . Arsenic, or arsenic trioxide. —**Aetzendes A'söl**. Caustic oil of arsenic; arsenic trichloride. [B, 196.] —**A'bauer**. A peasant addicted to arsenic-eating. [A, 301.] —**A'blinnen**. Flowers of arsenic. [L.] See ARSENIC trioxide. —**A'blüte**. Arsenic bloom; native octahedral arsenic trioxide. [B.] —**A'bromür**. See ARSENIC tribromide. —**A'butter**. Butter of arsenic; arsenic trichloride. [B, 196.] —**A'chlorür**. See ARSENIC trichloride. —**A'darre**. See ARSENICALISM. —**A'essen**. Arsenic-eating. [B, 49.] —**A'esser**. An arsenic-eater. [B.] See under ARSENIC trioxide. —**A'jodür**. See ARSENIC triiodide. —**A'kies**. See ARSENIES. —**A'kobaltkies**. A native arsenide of cobalt. [B,

49.]—A'kupfer. See ARSENKUPFER.—A'lähmung. Arsenical paralysis.—A'leber. See LIVER OF ARSENIC.—A'mohr. See ETHIOPS AURIPIGMENTALIS.—A'salbe. See CERATUM ARSENICI.—A'salz. An arsenate. [A, 301.]—A'säure. Arsenic acid. [B, 196.]—A'seife. See ARSENICAL SOAP.—A'stein. Metallic arsenic. [B, 180.]—A'supercchlorür. Arsenic trichloride. [B, 142.]—A'übersulfid. Arsenic persulphide. [B, 142.]—A'vergiftung. Arsenical poisoning. See under ARSENIC TRIOXIDE.—A'wasserstoff. A'wasserstoffgas. Hydrogen arsenide. [B, 142.]—Fowler's A'auflösung. See LIQUOR POTASSII ARSENITIS.—Gelbe A'blende. Native arsenic trisulphide. [B, 49.]—Gelber natürlicher A. Native arsenic trisulphide. [B, 49.]—Gemeiner A. Arsenic trioxide. [B, 48.]—Geschwefelter A. Arsenic sulphide. [B, 124.]—Grauer A. See GRAUES ARSEN.—Rothe A'blende. Native arsenic disulphide. [B, 49.]—Rother A. Red arsenic; arsenic disulphide. [B, 49.]—Schwefel A'. Arsenic sulphide. [B, 180.]—Weisser A. White arsenic; arsenic trioxide. [B.]

ARSENİKALIEN (Ger.), n. pl. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>k-a<sup>3</sup>l/en. Arsenical preparations; preparations of arsenic and its compounds. [B, 49.]

ARSENİKALISCH (Ger.), adj. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>k-a<sup>3</sup>l/i'sh. Arsenical. [B.]

ARSENİKALKIES (Ger.), n. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>k-a<sup>3</sup>l/kes. Löllingite. [B, 49.]

ARSENİKANTON (Lat.), n. n. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>k-a<sup>2</sup>n(a<sup>2</sup>n)/to<sup>2</sup>n. The Mentha pulegium. (Dioscorides [B, 121].)

ARSÉNIO-ANTIMONIAL (Fr.), adj. A<sup>3</sup>r-sa-ni<sup>2</sup>-o-a<sup>3</sup>n-ti<sup>2</sup>-mo-ni<sup>2</sup>-a<sup>3</sup>l. Containing both arsenic and antimony. [B, 137.]

ARSÉNIO-BIÉTHYLE (Fr.), n. A<sup>3</sup>r-sa-ni<sup>2</sup>-o-bi<sup>2</sup>-at-i<sup>2</sup>l. Arsenoethyle. [B, 38.]

ARSÉNIO-BIMÉTHYLE (Fr.), n. A<sup>3</sup>r-sa-ni<sup>2</sup>-o-bi<sup>2</sup>-mat-i<sup>2</sup>l. Arsenodimethyl. [B.]

ARSÉNIO-CHLORURE (Fr.), n. A<sup>3</sup>r-sa-ni<sup>2</sup>-o-klo-rü<sup>2</sup>r. See ARSENOCHLORIDE.

ARSÉNIODIETHYL, ARSENODIMETHYL, ARSENIODIPHENYL, n's. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>-o-di<sup>2</sup>-e<sup>2</sup>th/i<sup>2</sup>l, -me<sup>2</sup>th/i<sup>2</sup>l, -fe<sup>2</sup>n-i<sup>2</sup>l. Fr., arsénio-diéthyle, arsénio-diméthyle, arsénio-diphényle. See ARSENODIETHYL, ARSENODIMETHYL, and ARSENIODIPHENYL.

ARSÉNIO-FLUORURE (Fr.), n. A<sup>3</sup>r-sa-ni<sup>2</sup>-o-flu<sup>2</sup>-o-rü<sup>2</sup>r. See ARSENOFLUORIDE.

ARSÉNIO-MÉTHYLATE (Fr.), n. A<sup>3</sup>r-sa-ni<sup>2</sup>-o-mat-i<sup>2</sup>-a<sup>3</sup>l. See ARSENMETHYLATE.

ARSÉNIO-MOLYBDATE, n. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>-o-mo<sup>2</sup>-i<sup>2</sup>b/dat. Fr., arsénio-molybdate. It., arsénio-molibdato. A salt of arsenio-molybdic acid. [B.]

ARSÉNIO-MOLYBDIC ACID, n. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>-o-mo<sup>2</sup>-i<sup>2</sup>b/di<sup>2</sup>k. From arsenic and molybdi. Fr., acide arsénio-molybdique. Ger., Arsenmolybdänsäure. It., acido arsénio-molibdico. An acid substance prepared under the form of orange-red acicular crystals by dissolving a metallic molybdate in an aqueous solution of arsenic acid and decomposing the double salt thus produced with sulphuric acid. [O. Pufahl, "Ber. d. dtsh. chem. Gesellsch.", 1884, 213; "Jour. of the Am. Chem. Soc.", Nov., 1884, p. 286 (B).]

ARSÉNIOPHENYL, n. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>-o-fe<sup>2</sup>n-i<sup>2</sup>l. Fr., arsénio-phényle. See ARSENIOPHENYL.

ARSÉNIO-PHOSPHATE, n. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>-o-fö<sup>2</sup>s/fat. From arsenic and phosphate. Fr., arsénio-phosphate. It., Sp., arsénio-fosfato. A compound of a base with both arsenic and phosphoric acids. [B, 142.]

ARSÉNIO-PHTHISIS (Lat.), n. f. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>-o-ti<sup>2</sup>(te)/si<sup>2</sup>s. Gen., arsénio-phthisis/eos (-sis). For deriv. see ARSENIC and PHTHISIS. Fr., arsénio-phthisie. See ARSENICALISM.

ARSÉNIO-SULFURE (Fr.), n. A<sup>3</sup>r-sa-ni<sup>2</sup>-o-su<sup>2</sup>-i<sup>2</sup>-fu<sup>2</sup>r. A mineral containing arsenic and sulphur. [B, 38.]

ARSÉNIO-SULPHATE, n. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>-o-su<sup>2</sup>-i<sup>2</sup>/fat. From arsenic and sulphate. Fr., arsénio-sulfate. It., arsénio-solfato. Sp., arsénio-sulfato. A compound of a base with both arsenic and sulphuric acids. [B, 140.]

ARSENIOUS (Lat.), adj. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>-o-su<sup>2</sup>s(su<sup>2</sup>s). Arsenious; in agreement with the name of a base, the arsenite of that base. [B.] See ACIDUM ARSENOSUM.

ARSENOTRIETHYL, ARSENOTRIMETHYL, n's. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>-o-tri<sup>2</sup>-e<sup>2</sup>th/i<sup>2</sup>l, -me<sup>2</sup>th/i<sup>2</sup>l. Fr., arsénio-triéthyle, arsénio-triméthyle. See TRIETHYLARSINE and TRIMETHYLARSINE.

ARSENOTUNGSTATE, n. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>-o-tu<sup>2</sup>-n<sup>2</sup>g/stat. Fr., arsénio-tungstate. Ger., arsenwolframsaures Salz. It., arsenio-tungstato. A salt of arseniotungstic acid. [B.]

ARSENOTUNGSTIC ACID, n. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>-o-tu<sup>2</sup>-n<sup>2</sup>g/sti<sup>2</sup>k. Fr., acide arsénio-tungstique. Ger., Arsenwolframsäure. It., acido arsénio-tungstico. An acid formed by dissolving a metallic tungstate in an aqueous solution of arsenic acid and decomposing the double salt so produced with sulphuric acid. [M. Fremery, "Ber. d. dtsh. chem. Gesellsch.", 1884, p. 296; "Jour. of the Am. Chem. Soc.", Dec., 1884, p. 306 (B).]

ARSENIOUS, adj. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>-u<sup>2</sup>s. Lat., arseniosus, arsenicosus. Fr., arsénieux. Ger., arsenig. It., Sp., arsenioso. Containing arsenic; in chemistry, containing arsenic as a trivalent radicle. [B.]—A. acid. See the major list.—A. anhydride. Fr., anhydride arsénieux. Ger., Arsenigsäureanhydrid. It., anidride arsenioso. See ARSENIC TRIOXIDE.—A. bromide, A. chloride, A. fluoride, A. iodide, A. oxide, A. sulphide. See ARSENIC TRIHYDRIDE, ARSENIC TRICHLORIDE, ARSENIC TRIFLUORIDE, ARSENIC TRIIODIDE, ARSENIC TRIOXIDE, ARSENIC TRISULPHIDE.

ARSENIOUS ACID, n. Lat., acidum arseniosum (seu arsenicosum). Fr., acide arsénieux, arsenic blanc, mort-aux-rats. Ger., Arsenigsäure, arsenige Säure. It., acido arsenioso. Sp., acido arsenioso. A name often given to arsenic trioxide (q. v.), but properly applied to the hydrate of this substance, H<sub>3</sub>AsO<sub>3</sub>(=As<sub>2</sub>O<sub>3</sub> + 3H<sub>2</sub>O), a body known only in aqueous solution and prepared by dissolving the trioxide in water. It acts as a tribasic acid forming salts called arsenites. [B, 3.] Cf. METARSENIOUS ACID and PYROARSENIOUS ACID.—Amorphous a. a. The amorphous variety of arsenic trioxide. [B, 98.]—Anhydrous a. a. Fr., acide arsénieux anhydre. Ger., wasserfreie Arsenigsäure. It., acido arsenioso anidro. Arsenic trioxide. [B.]—A. a. hydriodate. See A. a. terhydriodate.—A. a. sulphate. See ARSENIC SULPHATE.—A. a. terhydriodate. The hydrated oxyiodide of arsenic. [B, 98.]—A. a. terhydriodate. The chlorhydrate (or hydrated oxychloride) of arsenic. [B, 98.]—Crystallized a. a. The crystalline variety of arsenic trioxide. [B, 98.]—Enamel-like a. a. Fr., acide arsénieux porcelanique. See under ARSENIC TRIOXIDE.—Glacial a. a. See Vitreous a. a.—Octahedral a. a. The variety of arsenic trioxide crystallizing in octahedra. [B, 98.]—Opaque a. a. See Enamel-like a. a.—Right-rhombic a. a. The variety of arsenic trioxide crystallizing in rhombic prisms. [B, 98.]—Rough a. a. (more properly crude or raw a. a.). Crude arsenic trioxide obtained by sublimation of arsenical ore; flowers of arsenic. [B, 98.]—Solution of a. a. See LIQUOR ACIDI ARSENOSI, and Cf. LIQUOR ARSENICI ALBI.—Vitreous a. a. Fr., acide arsénieux vitreux. Ger., weisses Arsenglas. See under ARSENIC TRIOXIDE.

ARSENIOVINIC ACID, n. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>-o-vi<sup>2</sup>-ni<sup>2</sup>k. Fr., acide arsénio-vinique. An acid, said to have the composition of dihydric ethyl arsenate, H<sub>2</sub>As(C<sub>2</sub>H<sub>5</sub>)<sub>2</sub>O<sub>4</sub>, obtained, according to F. d'Arcet, by the action of alcohol upon arsenic acid. [B, 118, 140.] See ETHYL ARSENATE.

ARSENIOXYDE (Fr.), n. A<sup>3</sup>r-sa-ni<sup>2</sup>-o-x-ed. A mineral composed of arsenic and oxygen. [B, 132.]

ARSÉNIQUE (Fr.), adj. A<sup>3</sup>r-sa-nek. Arsenic. [B.]

ARSÉNIQUÉ (Fr.), adj. A<sup>3</sup>r-sa-ni<sup>2</sup>-ka. Arseniated. [B, 132.]

ARSENIS (Lat.), n. m. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>s. Gen., arseni/tis. An arsenite. [B.]—A. potassicus aqua solutus [Fr. Cod.]. See LIQUOR POTASSII ARSENITIS.

ARSENITE, n. A<sup>3</sup>r-se<sup>2</sup>n-it. Lat., arsenis. Fr., arsénite. Ger., Arsenit. It., Sp., arsenito. A salt of arsenious acid. The true a's (orthoarsenites), or salts of ordinary arsenious acid, are divided into: 1. Neutral or normal a's, of the composition R''AsO<sub>3</sub> or M<sub>2</sub>(AsO<sub>3</sub>)<sub>2</sub>. 2. Acid a's, including monohydric a's or dimetallic a's, of the composition HR'AsO<sub>3</sub> or M<sub>2</sub>(HAsO<sub>3</sub>)<sub>2</sub>, and dihydric a's or monometallic a's, of the composition M(H<sub>2</sub>AsO<sub>3</sub>)<sub>2</sub>, where R' and R'' are bivalent and trivalent radicles and M is a radicle of the quantitative of n. [B.] See also METARSENITE and PYROARSENITE.

ARSENIUM (Lat.), n. n. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). Arsenic; the name adopted in the present U. S. Ph. [B.]—Arsenii chloridum. See ARSENIC TRICHLORIDE.—Arsenii iodidum [U. S. Ph.]. See ARSENIC TRIIODIDE.—Liquor arsenii et hydrargyri iodidi [U. S. Ph.]. Fr., soluté d'iodo-arsénite de mercure de Donovan. Ger., Jodquecksilberarseniklösung, Donovanische Tropfen. Syn.: liquor arsenii et hydrargyri iodidi [U. S. Ph., 1870]. Solution of iodide of arsenic and mercury; Donovan's solution. A solution containing 1 part of arsenic triiodide and 1 part of mercury biiodide (mercuric iodide) in 100 parts of distilled water [U. S. Ph.]. The solution made by Donovan was supposed by him to contain the so-called hydriodates of arsenious oxide and of mercuric oxide (the oxyiodides of arsenic and mercury). [A; B, 5.]

ARSÉNIURE (Fr.), n. A<sup>3</sup>r-sa-ni<sup>2</sup>-u<sup>2</sup>r. An arsenide. [B, 132.]

ARSENIURET, n. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>-u<sup>2</sup>-re<sup>2</sup>t. Lat., arseniuretum. Fr., arseniure. Ger., Arseniür. It., Sp., arseniuro. See ARSENIDE.

ARSENIURETED, adj. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>-u<sup>2</sup>-re<sup>2</sup>-e<sup>2</sup>d. Lat., arseniat. Fr., arsénie, arsénuré. It., arseniato. Compounded with or containing arsenic. [B.] See A. HYDROGEN.

ARSENIZATION, n. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>-za'-shu<sup>2</sup>n. It., arsenizzazione. Medication with arsenic. [B.]

ARSENOMETHYL, n. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>-me<sup>2</sup>th/i<sup>2</sup>l. Fr., arsén-méthyle. Ger., Arsenmethyl. It., arsénio-metile. Syn.: methylarsen, arsenomonomethyl. A bivalent or quadrivalent radicle As(CH<sub>3</sub>)<sup>2</sup> or As(CH<sub>3</sub>)<sup>4</sup>. It is not known in the free state. [B, 2.]—A. chloride. Fr., chlorure d'arsén-méthyle. Ger., Arsenmethylchlorür. See A. dichloride and A. tetrachloride.—A. chlorobromide. Fr., chloro-bromure d'arsén-méthyle. Ger., Arsenmethylchlorbromür. A substance, As(CH<sub>3</sub>)<sub>2</sub>ClBr, apparently produced by the spontaneous decomposition of the chlorodibromide of cacodyl. [B, 2.]—A. dichloride. Fr., bichlorure d'arsén-méthyle. Ger., Arsenmethylidichlorür. A colorless, heavy, highly refractive liquid, As(CH<sub>3</sub>)<sub>2</sub>Cl<sub>2</sub>, the vapor of which is a powerful irritant to the mucous membranes. [B, 2.]—A. diiodide. Fr., biiodure d'arsén-méthyle. Ger., Arsenmethyljodür. A substance, As(CH<sub>3</sub>)<sub>2</sub>I<sub>2</sub>, forming yellow acicular crystals melting at 20°-25° C. [B, 3.]—A. iodide. See A. diiodide.—A. oxide. Fr., oxyde d'arsén-méthyle. Ger., Arsenmethyloxyd. A substance, As(CH<sub>3</sub>)<sub>2</sub>O, occurring as crystals having the odor of asafetida and melting at 95° C. [B, 3.]—A. sulphide. Fr., sulfure d'arsén-méthyle. Ger., Arsenmethylsulfid. A crystalline substance, As(CH<sub>3</sub>)<sub>2</sub>S, melting at 110° C. and having a faint odor of asafetida. [B.]—A. tetrachloride. Fr., tétrachlorure d'arsén-méthyle. Ger., Arsenmethyltetrachlorür. A crystalline compound, As(CH<sub>3</sub>)<sub>2</sub>Cl<sub>4</sub>. [B, 2.]

ARSENOMETHYLATE, n. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>-me<sup>2</sup>th/i<sup>2</sup>l-at. Fr., arsénio-méthylate. Ger., Arsenmethylat. A salt of arsenomethyllic (methylarsinic) acid; a methylarsinate. [B.]

ARSENOMETHYLIC, adj. A<sup>3</sup>r-se<sup>2</sup>n-i<sup>2</sup>-me<sup>2</sup>th/i<sup>2</sup>l/i<sup>2</sup>k. Fr., arsén-méthylque. Of or pertaining to arsenomethyl. [B.]—A. acid. Fr.,

acide arsénio-monométhylrique. Ger., *Arsenmethylsäure*. See METHYLARSINIC acid.

**ARSEN METHYLUM** (Lat.), n. n.  $A^{3r}/se^{2n}-me^{2th}-i^{2l}(u^6)/i^{2n}-u^{3m}(u^4m)$ . Fr., *arsen-méthylum*. Ger., *Arsenmethylum*. See TETRAMETHYLARSINUM.

**ARSEN METHYL TRIETHYLUM** (Lat.), n. n.  $A^{3r}/se^{2n}-me^{2th}-i^{2l}(u^6)/i^{2n}-u^{3m}(u^4m)$ . Fr., *arsen-méthyl-tri-éthylum*. Ger., *Arsenmethyltriäthylum*. See METHYL TRIETHYLARSINUM.

**ARSEN MONETHYL**, n.  $A^{3r}/se^{2n}-mo^{2n}-e^{2th}/i^{2l}$ . Fr., *arsén-monéthyle*. Ger., *Arsenmonäthyl*. See ARSENETHYL.

**ARSEN MONETHYLIC**, adj.  $A^{3r}/se^{2n}-mo^{2n}-e^{2th}-i^{2l}/i^{2k}$ . Fr., *arsén-monéthylrique*. Of or pertaining to arsenmonethyl. [B.]—**A. acid**. Fr., *acide arsén-monéthylrique*. Ger., *Arsenmonäthylsäure*. See ETHYLARSINIC acid.

**ARSENOMONOMETHYL**, n.  $A^{3r}/se^{2n}-mo^{2n}-o-me^{2th}/i^{2l}$ . Fr., *arsén-monométhyle*. Ger., *Arsenmonomethyl*. See ARSENETHYL.

**ARSENOMONOMETHYLIC**, adj.  $A^{3r}/se^{2n}-mo^{2n}-o-me^{2th}-i^{2l}/i^{2k}$ . Fr., *arsén-monométhylrique*. Of or pertaining to arsenmonomethyl. [B.]—**A. acid**. Fr., *acide arsén-monométhylrique*. Ger., *Arsenmonomethylsäure*. See METHYLARSINIC acid.

**ARSENIO-CHLORIDE**, n.  $A^{3r}/se^{2n}-o-klo/r^{2d}(rid)$ . Fr., *arsénio-chlorure*. Ger., *Arseniochlorür*. It., Sp., *arsenio-fluoruro*. A compound of chlorine with arsenic and another element or radicle. [B.]

**ARSENIO-FLUORIDE**, n.  $A^{3r}/se^{2n}-o-flu^{2o}/r^{2d}(id)$ . Fr., *arsénio-fluorure*. Ger., *Arseniofluorür*. It., Sp., *arsenio-fluoruro*. A compound of fluorine with arsenic and another element or radicle. [B.]

**ARSEN OGONON** (Lat.), n. n.  $A^{3r}-se^{2n}-o^2g/o^{2n}-o^{2n}$ . See ARRHENOGONON.

**ARSENOLITE**, n.  $A^{3r}-se^{2n}-o-lit$ . Ger., *Arsenit*. *Arsenikblüthe*. Syn.: *arsenite*, *arsenic bloom*. A native trioxide of arsenic occurring under the form of octahedral crystals. [B, 159.]

**ARSENOMOLYBDATE**, **ARSENOMOLYBDIC ACID**, n's.  $A^{3r}/se^{2n}-o-mo^{2l}-i^{2b}/dat, -i^{2b}/di^{2k}$ . See ARSENOMOLYBDATE and ARSENOMOLYBDIC ACID.

**ARSENOPHOSPHATE**, n.  $A^{3r}/se^{2n}-o-fo^{2s}/fat$ . See ARSENIOPHOSPHATE.

**ARSENOPTERIS** (Lat.), n. f.  $A^{3r}-se^{2n}-o^2p/te^{2r}-i^{2s}$ . A subgenus of *Aspidium*, made by Webb and Berthelot, including species with a reniform indusium. It corresponds to the genus *Nephrodium* of others, and includes the subsections *Lastrea* and *Nephrodium*. [B, 121.]

**ARSENOPYRIT** (Ger.), n.  $A^{3r}-se^{2n}-o-pu^6-ret'$ . Arsenical pyrites; mispickel. [B, 49.]

**ARSENOSULPHATE**, n.  $A^{3r}/se^{2n}-o-sul'/fat$ . See ARSENIO-SULPHATE.

**ARSENOTA** (Lat.), n. f.  $A^{3r}-se^{2n}-o-ta^3$ . A name for *Staphisagria* in Dioscorides. [Bory (B, 121).]

**ARSENOTUNGSTATE**, **ARSENOTUNGSTIC ACID**, n's.  $A^{3r}/se^{2n}-o-tu^{2ng}/stat, -sti^{2k}$ . See ARSENOTUNGSTATE and ARSENOTUNGSTIC ACID.

**ARSENIPHENYL**, n.  $A^{3r}/se^{2n}-fe^{2n}/i^{2l}$ . From *arsenic* and *phenyl*. Fr., *arsén-phényle*. Ger., *Arsenphenyl*. A bivalent or quadrivalent radicle,  $As(C_6H_5)'$  or  $As(C_6H_5)''''$ . [B, 4.]—**A. chloride**. Fr., *chlorure d'arsén-phényle*. Ger., *Arsenphenylchlorür*. See *A. di-chloride*, *A. tetrachloride*, and *A. oxychloride*.—**A. dichloride**. Fr., *bichlorure d'arsén-phényle*. Ger., *Arsenphenyldichlorür*. A colorless liquid,  $As(C_6H_5)_2Cl_2$ . [B, 4.]—**A. oxide**. Fr., *oxyde d'arsén-phényle*. Ger., *Arsenphenyloxid*. A solid substance,  $As(C_6H_5)_2O$ , having an odor resembling that of anise. [B, 4.]—**A. oxychloride**. Fr., *oxychlorure d'arsén-phényle*. Ger., *Arsenphenyloxchlorür*. A substance,  $As(C_6H_5)_2OCl_2$ , readily soluble in water, melting at 100° C. [B, 4.]—**A. tetrachloride**. Fr., *tétrachlorure d'arsén-phényle*. Ger., *Arsenphenyltetrachlorür*. A yellow liquid,  $As(C_6H_5)_4Cl_4$ . [B, 4.]

**ARSENTRIETHYL**, n.  $A^{3r}/se^{2n}-tri-e^{2th}/i^{2l}$ . From *arsenic* and *ethyl* (see also *Tri-\**). Fr., *arsén-triéthyle*. Ger., *Arsentriäthyl*. See TRIETHYLARSINE.

**ARSENTRIETHYLIC**, adj.  $A^{3r}/se^{2n}-tri-e^{2th}-i^{2l}/i^{2k}$ . Fr., *arsén-triéthylrique*. Of or pertaining to arsentriethyl. [B.]—**A. acid**. Fr., *acide arsén-triéthylrique*. Ger., *Arsentriäthylsäure*. See TRIETHYLARSINIC acid.

**ARSENTRIMETHYL**, n.  $A^{3r}/se^{2n}-tri-me^{2th}/i^{2l}$ . From *arsenic* and *methyl* (see also *Tri-\**). Fr., *arsén-triméthyle*. Ger., *Arsentrimethyl*. See TRIMETHYLARSINE.

**ARSENTRIMETHYLIC**, adj.  $A^{3r}/se^{2n}-tri-me^{2th}-i^{2l}/i^{2k}$ . Fr., *arsén-triméthylrique*. Of or pertaining to arsentrimethyl. [B.]

**ARSENUM** (Lat.), n. n.  $A^{3r}/se^{2n}-u^{3m}(u^4m)$ . Arsenic. [B.] See ARSENIUM and ARSENICUM.

**ARSICCIA** (It.), n.  $A^{3r}-si^{2t}/chi^{2d}-a^3$ . See *Black-tongue*.

**ARSID**, n.  $A^{3r}/si^{2d}(id)$ . Ger., *Arsid*. *Arsidogen*. [B, 140, 196.] Cf. AMIDE and AMIDOGEN.

**ARSIDOGEN**, n.  $A^{3r}-si^{2d}/o^2j-e^{2n}$ . From *arsenic* and *γεννᾶν*, to beget. Cf. AMIDOGEN. The name given by Gmelin to a hypothetical compound,  $AsH_3$ , of arsenic and hydrogen, formerly supposed to exist in cacodyl and its derivatives. The symbol An was sometimes given to it. [B, 140, 196.]

**ARSIN** (Ger.), n.  $A^{3r}-sen'$ . See ARSINE.—**A'säuren**. See ARSINIC ACIDS.

**ARSINA** (Lat.), n. f.  $A^{3r}-si(ce)/na^3$ . The botanical genus *Curcuma*. [B, 121.]

**ARSINE**, n.  $A^{3r}/sen$ . Fr., *arsine*. Ger., *Arsin*. Arseniureted hydrogen,  $AsH_3$ . Also, generically, any substitution compound of this substance in which 1, 2, or 3 atoms of hydrogen are replaced by elements or radicles. The a's in this sense are analogous in structure to the amines and are similarly classed as primary, secondary, and tertiary a's. The primary a's, of the general formula  $AsR'H_2$ , exist only in combination; the secondary a's,  $AsR''H$ , exist by themselves with a doubled molecular formula,  $As_2R''_2H_2$ , constituting the class of compounds known as *cacodyls*; and the tertiary a's,  $AsR'''$ , are known in the free state. [B.] See also TRIETHYLARSINE, TRIMETHYLARSINE, and CACODYL.

**ARSINIC**, adj.  $A^{3r}-si^{2n}/i^{2k}$ . Fr., *arsinique*. Of, pertaining to, or derived from, an arsine. [B.] See A. ACIDS.

**ARSIORA**, n. Cerussa. [Johnson (B, 200).]

**ARSIS** (Lat.), n. f.  $A^{3r}/si^2s$ . Gen., *ar'seos* (-sis). Gr., *ἀρσις*, a raising, from *αἶψα*, to lift up, because of the berry being elevated from the receptacle. A name given by Loureiro to the genus *Grewia*. [B, 121.]

**ARSMART**, n.  $A^{3r}/ma^3rt$ . A name given to several species of *Polygonum*. [B.]—**Biting a**. The *Polygonum hydropiper*. [B, 59.]—**Dead a**, **Spotted a**. The *Polygonum persicaria*. [B, 59.]

**ARSONIC**, adj.  $A^{3r}-so^{2n}/i^{2k}$ . Fr., *arsonique*. Of, pertaining to, or derived from, arsonium. [B.] See A. ACIDS.

**ARSONIUM** (Lat.), n. n.  $A^{3r}-so^{2n}-u^{3m}(u^4m)$ . Fr., *arsonium*. Ger., *Arsonium*. A univalent radicle,  $AsH_2$ , bearing the same relation to arsenic that ammonium does to nitrogen; also, generically, any substitution compound of this body. [B, 4.] See TETRETHYLARSONIUM, etc.

**ARSURE** (Fr.), n.  $A^{3r}-su^6r$ . 1. A disease of plants produced by dryness of the soil. 2. An old name for gonorrhoea. [B, 38.]

**ART**, n.  $A^{3r}rt$ . See ARS.—**A. de formuler** (Fr.). See *Ars formulas medicinæ concinnandi*.—**A. sacré** (Fr.). Alchemy. [A, 385.]

**ART** (Ger.), n.  $A^{3r}rt$ . A species. [B.]—**Aba'**. A subspecies or variety. [B, 49.]—**A' name**. A specific name. [B.]—**Spiele'a**. See ABART.

**ARTA** (It.), n.  $A^{3r}/ta^3$ . A place in Venetia where there is a spring containing hydrogen sulphide. [A, 385.]

**ARTABA** (Lat.), n. f.  $A^{3r}/ta^3-ba^3$ . Gr., *ἀρτάβη*. An ancient Egyptian measure. [B, 200.]

**ARTABOTRYS** (Lat.), n. f.  $A^{3r}-ta^3-bo^{2t}/ri^{2s}(ru^6s)$ . Gen., *artabot'ryos* (-ryis). From *ἀρτᾶν*, to hang, and *βότρυς*, a cluster of grapes. A genus of anacaeous shrubs, established by R. Brown. [B, 93.]—**A. intermedia** [Husskarl]. A species furnishing a fragrant oil used as a perfume in Java, under the name of *minjack-kenangan*. [B, 121.]—**A. suaveolens** [Blume]. A species the aromatic leaves of which have been used in infusion as a remedy for cholera. [B, 121.]

**ARTANECH**, **ARTANECK**, n's. Arsenic. [Ruland (B, 200).]

**ARTANEMA** [Don] (Lat.), n. n.  $A^{3r}-ta^3-ne(na)/ma^3$ . Gen., *artanem'atos* (-tis). From *ἀρτᾶν*, to hang, and *νῆμα*, a thread. The genus *Achmenes*. [B, 121.]

**ARTANITA** (Lat.), n. f.  $A^{3r}-ta^3-ni(ne)/ta^3$ . From Sp., *a.*, the *Cyclamen europæum*. Of Mésné, the genus *Cyclamen*. [Adanson (B, 121).]

**ARTANITIN**, n.  $A^{3r}-ta^{2n}/i^{2t}-i^{2n}$ . See ARTHANITIN.

**ARTANTHE** (Lat.), n. f.  $A^{3r}-ta^{2n}(ta^3n)/the(tha)$ . A genus of piperaceous plants, established by Miquel, with a woody, jointed stem, and bearing spikes of perfect flowers with an involucre of peltate or cuneolate bracts. [B, 19.]—**A. adunca**. A species growing in the West Indies, Brazil, and various parts of South America, possessed of aromatic properties and a pungent taste, used as a substitute for pepper and employed in gonorrhoea like cubeb. The leaves, which are distinguished from those of *A. elongata* by not being tessellate, rough, or hairy, and the spikes and branches, constitute, according to Bentley, a variety of matico imported from Central America, and identical in medicinal properties with the matico derived from *A. elongata*. [B, 5, 33, 197.]—**A. crocata**. Syn.: *Piper crocatum* (Ruiz and Pavón). A Peruvian shrub, the leaves and spikes of which are employed as a substitute for pepper and the mature spikes as the source of a yellow dye. [B, 180, 197.]—**A. elongata** [Miquel]. Syn.: *Piper elongatum* [Vahl] (see *angustifolium* [Ruiz and Pavón]). A shrub, 12 feet in height, growing in the forests of Peru. The leaves are sessile or short-petiole, oval-lanceolate, acuminate at the apex, cordate at the base, from 2 to 6 inches long and about 1 inch broad, bright-green and tessellate on the upper surface, paler on the lower surface, which is roughly reticulate and downy, of an agreeable spicy odor, and a pungent aromatic taste. They contain a dark-green resin, coloring matters, a light-green volatile oil, and, according to Hodges, a bitter principle called *maticin*, which, according to Wiegand, is the potassium salt of an acid. Marcotte found in it a crystalline acid, *artanthic acid*. The leaves constitute the *matico* of the U. S. Ph., and are used as a styptic and hæmorrhagic. The matico of commerce always contains the spikes and stalks of the plant intermixed with the leaves. A decoction of the plant is used as a remedy for syphilitic affections in Peru. [B, 5, 180.]—**A. eucalyptifolia**. A Brazilian species, employed as a carminative in colic and flatulence, and as a remedy for arthritic pains. [B, 197.]—**A. lanceatifolia** [Miquel]. Syn.: *Piper lanceatifolium*. A New Granada species furnishing one of the varieties of matico. ["Proc. of the Am. Pharm. Assoc.," xxiii, p. 646 (L).]—**A. mollicoma** [Miquel]. A Brazilian species the leaves of which are used for the same purposes as *lavorandi*. ["Proc. of the Am. Pharm. Assoc.," xxiv, p. 162 (L).]—**A. trichostachya**. A species employed as a substitute for pepper. [B, 197.]

**ARTANTHIC**, adj.  $A^{3r}-ta^{2n}/thi^{2k}$ . Of or derived from the genus *Artanthe*. [B.]—**A. acid**. Fr., *acide artanthique*. A crys-

talline acid found by Marcotte in matico (the leaves of *Artanthe elongata*. [B. 5.]

**ARTAR ROOT**, n. A root, of unknown origin, which contains 3 per cent. of a resin capable of exerting an effect like that of aconitine. [B. 270.]

**ARTATE**, adj. A<sup>2</sup>r'tat. Written also *arctate*. Lat., *arctatus* (from *artare*, to compress). Fr., *rétréci*. Ger., *verengert*. Compressed, constricted. [A. 316.]

**ARTEZIA** (Lat.), n. f. A<sup>2</sup>r'ta'di<sup>2</sup>a<sup>3</sup>. From *Artezi*, a Swedish botanist. A genus of umbelliferous plants established by Linnaeus. [B. 48.]—**A. squamata** [Linnaeus]. A species growing in Greece, Asia Minor, and Lebanon. [B. 48.]

**ARTEFACT**, n. A<sup>2</sup>r'te<sup>2</sup>-fa<sup>2</sup>kt. From *ars*, art, and *facere*, to make. Ger., *Artefact*, *Kunstproduct*. A term used in histology to designate an apparent structure produced by the chemical or the mechanical means employed in investigation; an apparent, but not a real, structure. [Kollmann, "Ztschr. d. wissen. Zool.," 1873; Elsberg, "Ann. of the N. Y. Acad. of Sci.," 1879 (J).]

**ARTEFI**, n. The *Tragopogon porrifolius*. [B. 121.]

**ARTEJO** (Sp.), n. A<sup>2</sup>r'ta'ho. A village in the province of Co-runna, Spain, where there is a spring containing hydrogen sulphide and sodium and magnesium chlorides. The water, drank and used as baths, is considered laxative, aperitive, resolvent, diuretic, antiseptic, and detergent, and is advised in scrofula, gout, erysipelas, and catarrh. [A. 255.]

**ARTEMIA** (Lat.), n. f. A<sup>2</sup>r'te<sup>2</sup>m'i<sup>2</sup>a<sup>3</sup>. Gr., ἀρτεμία, from ἀρτεμής, safe. Health, soundness. [M. 13.]

**ARTEMIDION, ARTEMIDIUM** (Lat.), n's n. A<sup>2</sup>r'te<sup>2</sup>m-i<sup>2</sup>d-i<sup>2</sup>-i<sup>2</sup>-o<sup>2</sup>n, -u<sup>2</sup>m(u<sup>2</sup>m). The *Origanum dictamnus*. [Bory (B. 121).]

**ARTEMISIA** (Lat.), n. f. A<sup>2</sup>r'te<sup>2</sup>m-i<sup>2</sup>s'i<sup>2</sup>a<sup>3</sup>. Gr., ἀρτεμισία (from Ἀρτεμīs, the goddess Diana). Fr., *artémise*, *armoise*. Ger., *Beifuss*, *Abbrandkraut*. It., *artemisia*. Sp., *artemisa*. Wormwood. A genus of erect leafy herbs or shrubs belonging to the order *Compositae*, tribe *Senecionideae* (or, according to more recent classifications, the *Anthemideae*), established by Tournefort, with alternate, often much-divided, grayish leaves; panicles of yellowish, greenish, or purplish flowers, surrounded by an ovoid or hemispherical involucre of imbricate bracts, and placed upon a receptacle devoid of pales or bristles; and an obovate fruit without pappus. It is divided into 4 subgenera: 1. *Absinthium*, with the outer florets female, the central florets hermaphrodite, and the receptacle hairy; 2. *Abrotanum*, like No. 1, but with a naked receptacle; 3. *Seriphida* (*Seriphidium*), with all the florets hermaphrodite and the receptacle naked; 4. *Oligosporus* (*Dracunculus*), with the outer florets female, the rest hermaphrodite and with abortive fruit, and with a naked receptacle. [B. 19, 34, 180.]—**A. aqua artemisia**. Fr., *eau d'armoise*. A preparation made by distilling the leaves of *A. vulgaris* 1 part and water 3 parts until 1 part of distillate is obtained. [Palat. Disp., 1764; Sat. Ph., 1773; Port. Cod., 1836; Fr. Cod., 1837 (L. 85).]—**A. abrotanum** [Linnaeus]. Gr., ἀβρότανος ἄρτεμης (Dioscorides). Lat., *abrotanum*. Fr., *arvone nule*. [Fr. Cod., citromelle. Ger., *Stabwurz*, *Eberwurz*. It., *abrotano maschio*. Sp., *abrotano*.] Southernwood. A perennial shrubby plant, belonging to the subgenus *Abrotanum*, indigenous to southern Europe, Asia Minor, and China, and frequently cultivated in gardens in Europe and America. It stands about 3 feet in height and bears grayish-green much-divided leaves and axillary racemes of nodding yellowish flowers. The leaves and flowering tops, *herba et summitates abrotani* (seu *abrotani maris*, seu *abrotani hortensis*, seu *artemisiae abrotani*), have a penetrating aromatic odor and a somewhat bitter, spicy taste. They have been official in various pharmacopœias and are used for the same purposes as those of *A. absinthium*, from which they differ in being more stimulant and less tonic. [B. 34, 180.]—**A. absinthium** [Linnaeus]. Lat., *absinthium*. Fr., *grande absinthe* [Fr. Cod.], *alune*, *absinthe commune*, *armoise amère*. Ger., *Wermut*. It., *assenzio maggiore*. Sp., *ajenjo*. Syn.: *Absinthium vulgare* [Lamarck] (seu *officinale* [Richard]). Wormwood. A perennial herb, belonging to the subgenus *Absinthium*, growing in Europe, New England, and Canada. It bears multifid leaves with lanceolate segments pubescent on both sides, and nodding yellow flowers disposed in erect racemes. (See illustration under *ABSINTHIUM*.) The whole plant has a strong, disagreeable aromatic odor, and a penetrating, very bitter taste, and contains a volatile oil, and, according to Braconnot, an insipid and a very bitter nitrogenous principle, a bitter resin, and several organic acids, including an *absinthic acid*, which is probably identical with succinic acid. Caven-  
tous found in wormwood a bitter crystalline principle, *absinthin*, which, according to Kromayer, is an aldehyde of the composition C<sub>10</sub>H<sub>16</sub>O<sub>8</sub> + H<sub>2</sub>O. The volatile oil (*oleum essentielle absinthii*) is dark-green, sometimes yellow or brownish, has the peculiar odor of the plant, an acid taste, and a sp. gr. of 0.972, and consists chiefly of *absinthol* (q. v.). The flowering tops, the *ἀψιθιον* of Hippocrates, the *absinthium* of the U. S. Ph., the *herba et summitates absinthii* (seu *absinthii*, seu *absinthii majoris*, seu *absinthii rusticani*, seu *absinthii vulgaris*), are used as a tonic and aromatic stimulant, especially in atony of the digestive organs, in diarrhœa, muscular debility, and remittent fevers, as an anthelmintic, and in the preparation of the liqueur called *absinthe*. [B. 5, 34, 180.]—**A. abyssinica** [Olivier]. An African species supposed to be the source of an Abyssinian drug called *tschinking* or *zerechit*, which, mixed with soap, is applied to the calves of the legs to relieve cramps in the later stages of a malarial disease called the "kolla" sickness. The infusion is mildly antispasmodic, tonic, and diaphoretic. [B. 81; "Proc. of the Am. Pharm. Assoc.," xxvii, p. 176 (L).]—**A. acetica**. A Persian species having a strong odor of vinegar. [B. 197.]—**A. afra**. 1. Of Jacquin, the *A. pontica*. [B. 49.] 2. Of Linnaeus, a species used at the Cape of Good Hope as a vermifuge and in the treatment of jaundice. [B. 93.]—**A. alba** [Tabernaemontanus]. A variety of the *A. vulgaris* with a whitish stem. It is said to be used by the Calmucks and Kirghese as a forage plant. [B. 180, 197.]—**A. annua**

[Linnaeus]. A species, belonging to the subgenus *Abrotanum*, growing throughout Central Asia and China, and used in the latter country as a remedy for wasting fever, dysenteries, and putrid ulcers. [B. 180.]—**A. arborescens** [Linnaeus]. Syn.: *Absinthium arborescens* [Mönch]. An herbaceous plant, 4 to 6 feet high, belonging to the subgenus *Absinthium*, growing along the coast of the Mediterranean. It is probably one of the varieties of the *ἀρτεμισία* of Dioscorides. It is a tonic, stomachic, and emmenagogue, and is used for similar purposes as the *A. absinthium*. [B. 173, 180.]—**A. arbuscula** [Nuttall]. A dwarf species growing on the high mountains and elevated plains of the western United States. It has similar properties to those of *A. tridentata*. [B. 81, 215.]—**A. argentea** [Aiton]. A species with silvery-white leaves, cultivated as an ornament in gardens. [B. 49.]—**A. argonensis**. An Algerian plant, called by the natives *el chikh*, and used by them as a tonic, aperient, and vermifuge. [A. 316.]—**A. austriaca** [Jacquin]. See *A. alba*.—**A. balsamita**. See *A. pontica*.—**A. biennis** [Willdenow]. An Asiatic and North American species having bipinnatifid leaves with pinnatifid or toothed segments, and suberect sessile heads of flowers borne in leafy panicles or racemes and surrounded by an involucre of green pubescent bracts. [B. 34, 212.]—**A. boccone** [Allioni]. See *A. spicata*.—**A. botrys**. See *CHENOPodium ambrosioides*.—**A. cærulescens** [Linnaeus]. A shrubby plant, of the subgenus *Seriphida*, growing on the sea-shore in southern and western Europe, distinguished by its gray, lanceolate, entire leaves and its oblong flower-heads. The latter, called *semen seriphii*, have been used as a febrifuge and anthelmintic. [B. 93, 178, 180.]—**A. californica**. A species, 4 to 5 feet high, indigenous to the western United States, bearing singly or doubly pinnately-parted leaves and many-flowered heads in leafy panicles surrounded by a hemispherical involucre. [B. 212.]—**A. campestris** [Linnaeus]. Fr., *arvone des champs* (ou *savage*), *armoise bâtarde*. A species, belonging to the subgenus *Oligosporus*, growing on old ruins and in dry places in Europe and North America. It is perhaps the *ἀρτεμισία λευκόφθαλλος* of Dioscorides. The leaves and flowering tops, *herba artemisiae rubrae*, were formerly employed in medicine as a stimulant, tonic, and antispasmodic, and the flowering tops to adulterate worm-seed, and the root was sometimes collected instead of that of *A. vulgaris*, but the plant appears to be medicinally inert, and is now rarely employed. [B. 173, 180.]—**A. camphorata** [Vill.]. A species growing in rocky, uncultivated places in central Europe, used as an anthelmintic under the name of *sanguinelle*. [B. 93, 178.]—**A. canadensis** [Michaux]. See wormwood. A perennial species having pinnatifid leaves with linear segments and subglobose flowers in sessile heads borne in racemose panicles, growing along the shores of lakes and rivers in the northern United States, Canada, and northwestern Asia. [B. 34, 215.]—**A. caudata** [Michaux]. A biennial species growing in the Atlantic United States, glabrous, with pinnately, bipinnately, or tripinnately divided leaves, having filiform or setaceous segments, and with ovoid-globose, pedicellate heads of flowers borne in dense panicles. [B. 34, 215.]—**A. chamaemelifolia** [Vill.]. A south European species, cultivated on account of the pleasant odor of its leaves. [B. 49.]—**A. chenopodium**. See *CHENOPodium botrys*.—**A. chiapeana** [Kunze]. An Oriental species the botanical characters of which are imperfectly known. The flower-heads have been used according to Della Chiaje, to adulterate the Levant worm-seed (*semen contra*), which they resemble in odor and taste. [B. 180.]—**A. chinensis** [Linnaeus]. China mugwort. An Asiatic species, belonging to the subgenus *Abrotanum*, the down upon the leaves of which is used by the Chinese in the preparation of moxa (q. v.), and the plant itself is employed as a stomachic, tonic, antispasmodic, and emmenagogue. [B. 180.]—**A. cina** [Bergmann]. See *A. maritima*, var. *stachmanniana*.—**A. contra**. 1. Of Linnaeus, a species closely resembling, if not identical with, *A. glomerata*. 2. Of Vahl, the *A. vahliana*. [B. 180.]—**A. dracuncululus** [Linnaeus]. Fr., *estragon*, *armoise estragon*. Ger., *Estragon*, *Drugunbeifuss*. It., *dracuncello*. Syn.: *Oligosporus condimentarius* [Cassini]. Tarragon. An herbaceous species, belonging to the subgenus *Oligosporus*, growing in Siberia, Tartary, and southern Europe, and frequently cultivated as a condiment. The leaves are glabrous, shining, lanceolate, and entire; the flowers are borne in ovoid-globose heads on short peduncles. The plant has an aromatic odor and a pungent taste. The flowering-tops, *herba seu summitates dracunculi* (seu *dracunculi esculenti*, seu *dracunculi hortensis*, seu *acetiariae*), have been official, and are employed as an antiscorbutic, but more particularly as a condiment. [B. 19, 180.]—**A. eriantha**. See *A. spicata*.—**A. filifolia** [Torrey]. A North American species with slender, filiform, revolute, tomentose leaves and small heads of flowers borne in elongated leafy panicles. [B. 81, 215.]—**A. frigida** [Willdenow]. A species, belonging to the subgenus *Absinthium*, growing in the rocky hills of the northwestern United States. The stems, 6 to 12 inches in height, are simple or branched from the base; the leaves are silky-canescens, pinnately divided or parted, with linear segments; the nodding globose flower-heads, borne in racemose panicles, have an involucre of canescent rounded or oblong scales and glabrous corollas. The plant is said to be used as a substitute for quinine, also as an anthelmintic, under the name of *sierra salvia*. [Evans, quoted in "Nouv. remèdes," Feb. 1, 1886, p. 72; B. 34, 215; Tschisch (B. 270).]—**A. gallica** [Willdenow]. See *A. maritima*, var. *gallica*.—**A. glacialis**. Fr., *génépi vrai*. Ger., *Gletscher-Beifuss*. 1. Of Jacquin and Wulfenden, the *A. mutellina*. 2. Of Linnaeus, a species, belonging to the subgenus *Absinthium*, growing upon the highest points of the Alps. The flower-bearing stalk is simple, the leaves are palmately parted and covered with snow-white silky hairs; the globose flower-heads are erect and terminal. It is one of the herbs used in the preparation of the liqueur *absinthe* and of the *vulnéraire suisse*. [B. 93, 178, 180.]—**A. glomerata** [Siebold]. Ger., *gekäueller Beifuss*. A shrubby species, belonging to the subgenus *Abrotanum*, growing in Palestine. The stalk is erect, 1 to 2 feet high, and lanuginous; the leaves are very small, palmately divided, hairy or tomentose; the flowers are disposed in panicles made up of clusters of 2 or 3 closely set, almost sessile,

ovoid, tomentose heads. The immature unopened heads constitute the Barbary wormseed, *semen cinæ barbaricum* (seu *indicum*, seu *africanum*), *semen santonici*, *semen contra*, etc. They contain an acrid volatile oil, a bitter principle, tannin, and santonin, have the odor and taste of Levant wormseed (*santonica*), and are a powerful stomachic, tonic, stimulant, and anthelmintic. They have the same medicinal uses as Levant wormseed, but, although more powerful than the latter, are more rarely employed. [B, 5, 180].—*A. grandiflora*. See *A. rupestris*.—*A. helvetica* [Schleich.]. See *A. nana*.—*A. inculta*. A small Egyptian shrub with tomentose branches, grayish bipinnatifid leaves, and glabrous flower-heads. The latter constitute, according to some, the Indian wormseed, which, however, is probably identical with the Barbary wormseed derived from *A. glomerata* and other species. [B, 180].—*A. indica* [Willdenow]. An herbaceous species, belonging to the subgenus *Abrotanum*, indigenous to the East Indies, China, and Japan. It differs but little in botanical characters from *A. vulgaris*, to which it is referred by Thunberg and others. It is used as a bitter stomachic tonic, antispasmodic, and emmenagogue, and the downy covering upon the leaves is said to be employed in the preparation of moxa. [B, 5, 180; Dymock, "Phar. Jour. and Trans.," Aug. 10, 1879 (L.).]—*A. judaica* [Linnaeus]. Fr. *barbotine*, *armoise de Judée*. A shrubby species, belonging to the subgenus *Abrotanum*, growing in Egypt, Arabia, Palestine, China, and Cochinchina. The leaves are very small, obovate, pinnatifid, and tomentose; the hemispherical flower-heads are borne in terminal racemes. These flower-heads have a strong aromatic odor and have powerful anthelmintic properties resembling those of Levant wormseed, but are said not to occur in commerce. Some, however, assert that a variety of Barbary wormseed is furnished by them. The variety of *A. judaica* observed by Loureiro in China and Cochinchina is, according to Kosteletzky, a distinct species, the *A. Loureiri*. [B, 5, 180].—*A. lanata* [Linnaeus]. A species belonging to the subgenus *Absinthium*, growing in Africa and the Tyrol. The down upon it is used for the preparation of moxa. [B, 173, 178].—*A. latifolia vulgaris major*. The *A. vulgaris*. [B, 300].—*A. leptophylla*. See *A. prescottiana*. The *ἀρtemisia λεπτοφύλλος* of Dioscorides was probably the *A. campestris*. [B, 180; L.].—*A. lereheana* [Stechmann]. A species growing along the Volga, the flower-heads of which are used in Russia as a substitute for santonica. It is now believed to be identical with the *A. maritima*, var. *stechmanniana*. [B, 81, 180].—*A. Loureiri* [Kosteletzky]. The variety of *A. judaica* occurring in China and Cochinchina; regarded by Kosteletzky as a distinct species. [B, 180].—*A. ludoviciana* [Nuttall]. A perennial herb, belonging to the subgenus *Abrotanum*, growing in the Mississippi valley and on the shores of the Great Lakes. It has a stem 3 to 5 feet high, lanceolate leaves, the lower serrate or subpinnatifid, the upper entire. The whole plant is canescently tomentose. An infusion of it is used as a hair-tonic. [B, 5, 34].—*A. maderaspata*. [Roxburgh]. See *GRANGEA maderaspata*.—*A. maritima* [Linnaeus]. Ger. *Meerstrand-Beifuss*. A perennial herb or shrub, belonging to the subgenus *Seriphida*, growing along the entire sea-coast of Europe and of western Asia. The non-flowering stems are caespitose, bearing numerous bipinnatifid or multipinnatifid canescently tomentose leaves about 1 inch in length, with linear segments; the flowering stems are erect and bear very small leaves, the upper ones entire; the flower-heads are small, oblong, and sessile. The common European variety, *A. maritima*, var. *A. maritima* [Willdenow], has erect heads borne on nodding branches. This variety has a strong aromatic, somewhat camphoraceous odor and a bitter taste, and the herb (*herba*, seu *summitates absinthii maritimi*) has been employed like that of *A. absinthium*, although it is less energetic in action than the latter. It was known to the ancients as *ἀψιθιον θαλάσσιον* (Dioscorides). The *A. maritima*, var. *β gallica* (*A. gallica* [Willdenow]), distinguished by its erect heads and rigid branches, occurs commonly in France, where it is employed as an anthelmintic under the name of *sanguinétie*, and in England. This variety was analyzed by Heckel and Schlagdenhauffen and found to contain santonin, an essential oil, a yellow coloring matter, glucose, and tannin. The *A. maritima*, var. *γ salina* (*A. salina* [Willdenow]), distinguished by its dependent heads, occurs in England. It is sometimes collected for the ordinary variety, but appears to be of little medicinal value. The *A. maritima*, var. *δ vallesiaca* (*A. vallesiaca* [Allioni]), having erect heads and branches, and covered all over with white hairs, occurs in dry sunny spots in southern Europe. It is highly aromatic and the herb is used, under the name of *genippi nigri herba*, in the preparation of *absinthe* and the *vulnéraire suisse*. The *A. maritima*, var. *stechmanniana* [Besser], or *A. maritima*, var. *pauciflora* [Ledebour], with which the *A. cinæ* of Berg and Schmidt and the *A. pauciflora* of Weber are probably identical, is an Oriental variety, the unexpanded flower-heads of which, according to the U. S. Ph., constitute the Levant wormseed, or santonica. This drug is also said to be produced by the *A. vahliana* (q. v.). See SANTO-

THE ARTEMISIA MARITIMA.  
[A, 327.]

NICA. [B, 5, 178, 180; "Ann. di chim. medico-farm. e di farmacol.," June, 1885, p. 368 (B).]—*A. mater herbarum*. The *A. vulgaris*. [B, 200].—*A. mexicana* [Willdenow]. A species, 2 to 4 feet high, growing in portions of the United States and Mexico. The narrow, lanceolate or linear leaves are said to have stimulant, emmenagogue, and anthelmintic properties. [B, 215; "Proc. of the Am. Pharm. Assoc.," xxiv, p. 774 (L.).]—*A. minima*. A species growing in Asia, resembling *A. sternutatoria*, from which it is distinguished by the leaves not being sessile or downy, and by the fewer florets in each flower-head. [W. Dymock, "Proc. of the Am. Pharm. Assoc.," xxviii, p. 144 (L.).]—*A. monogyna* [Linnaeus]. A species indigenous to Hungary, distinguished by there being no more than a single female floret in each flower-head. [B, 71.]—*A. moxa* [Bessey]. An Asiatic species said to be the source of the moxa of the Chinese and Japanese. [B, 5].—*A. mutellina* [Vill.]. Ger. *Alpen-Beifuss*. Syn.: *Absinthium lapsum* [Lamarck] (seu *mutellinum* [Rochleder], seu *petroselinum* [Baumgarten]). A perennial herb, belonging to the subgenus *Absinthium*, growing in meadows upon the Alps. It has palmate multifid leaves, and oblong erect axillary flower-heads, the lower pedunculate, the upper sessile. Its herb has an aromatic taste, pleasanter than that of *A. absinthium*, which it frequently replaces in the preparation of *absinthe* and of the *vulnéraire suisse*. It is a very powerful aromatic tonic. [B, 173, 180].—*A. nana* [Gaudin]. A perennial species belonging to the subgenus *Abrotanum*, growing in central Europe and the East. It has properties resembling those of *A. mutellina*. [B, 173, 178].—*A. orientalis vulgaris facie*. The *A. chinensis*. [B, 200].—*A. palmata* [Lamarck]. A shrubby species growing in southern France and in Spain. It is probably the *ἀρtemisia παντόνιον* of Dioscorides. It has an aromatic odor like that of santonica, and, according to some, furnishes a variety of the latter. [B, 180].—*A. paniculata* [Lamarck]. A species said to be used as a substitute for *A. abrotanum*. [A, 316].—*A. pauciflora* [Weber]. An Oriental species said to furnish Levant wormseed: probably identical with *A. maritima*, var. *stechmanniana*. [B, 5, 49].—*A. pedemontana* [Bab.]. See *A. lanata*.—*A. pontica* [Linnaeus]. Fr. *petite absinthe*, *armoise pontique*. Ger. *römischer Beifuss* (oder *Wermuth*). It., *assenzio romano*, *piccolo assenzio*. Sp., *ajeno pónico* (ó romano). Roman wormwood. A perennial herbaceous species belonging to the subgenus *Abrotanum*, growing in central and southern Europe and in the East. The leaves are covered with hairs, gray on the upper surface, whitish on the lower surface, the lower ones doubly pinnatifid and petiolate, the upper ones singly pinnatifid or entire, and sessile. The flower-heads are grayish, globose, and nodding, and borne in erect, leafy, paniculate racemes. The flowering tops, *herba vel summitates absinthii pontici* (seu *hortensis*, seu *incanæ*, seu *nuboris*, seu *nobilis*, seu *romani*, seu *tenuifolia*), have a pleasant aromatic odor and a bitter taste, and are used as a tonic and stimulant like *A. absinthium*. In the East they are employed as a cosmetic and in Egypt are burned to avert contagion during the plague. [B, 173, 178, 180].—*A. prescottiana* [Bess.]. A North American species. [B, 215].—*A. procera*. A species said to be used as a substitute for *A. abrotanum*. [A, 316].—*A. pyramachia* [Viviani]. A species employed by the Arabs in the manufacture of a sort of amadou. [B, 173].—*A. ramosa* [Smith]. A species found in northern Africa, the unexpanded flower-heads of which are said to furnish a part of the Barbary wormseed. [B, 81.] Cf. *A. glomerata*.—*A. rubra* [Tabernaemontanus]. A variety of *A. vulgaris* with a purplish stem. [B, 180]. See also *A. campestris*.—*A. rupestris* [Linnaeus]. A perennial species, belonging to the subgenus *Absinthium*, growing in rocky and waste ground in the Alps. It has glabrous bipinnate leaves, the upper leaves and those upon the flower-stalks being entire and pectiniform-pinnate. The flower-heads are globose and nodding. The herb, *herba genippi albi* (seu *absinthii alpini*), has medicinal properties and uses similar to those of the herb of *A. mutellina* and *A. dracunculis*. By Allioni the *A. mutellina*, and by Vill. the *A. spicata* were referred to *A. rupestris*. [B, 97, 180].—*A. salina* [Willdenow]. See *A. maritima*, var. *salina*.—*A. santonica* [Linnaeus]. Ger. *tartarischer Beifuss*. A shrubby species, belonging to the subgenus *Abrotanum*, growing in Persia and Tartary. It has grayish leaves, the lower bipinnately incised, the upper pinnately incised, the uppermost linear in shape. The cylindrical flower-heads are borne in racemes. The unexpanded flower-heads constitute a variety of wormseed occasionally imported from Russia, and were at one time thought to be the source of the Levant wormseed, or santonica. [B, 81, 180].—*A. saxatilis* [Willdenow]. A variety of *A. campestris*. [B, 178].—*A. scoparia* [Waldstein and Kitaibel]. A species belonging to the subgenus *Abrotanum*, growing in sandy places in central Europe. The stalks are used for making brooms. [B, 173, 178].—*A. Sieberi*. See *A. glomerata*.—*A. sinensis*. See *A. chinensis*.—*A. spicata* [Jacquin]. Fr. *armoise en épis*. Ger. *ähriger Beifuss*. A small perennial herb, belonging to the subgenus *Abrotanum*, growing upon the tops of the Alps. It has strong aromatic qualities, and is used for the same purposes as *A. mutellina* and *A. glacialis*. It is believed to be the *ἀρtemisia μονόκλωνος* of Dioscorides. [B, 180].—*A. stelleriana* [Bess.]. A species with grayish-white leaves cultivated as an ornamental plant. [B, 49].—*A. sternutatoria*. An Asiatic species, the *wakh-chiknee* of the Hindoos, having numerous sessile wedge-shaped, deeply dentate villous leaves, and subglobose, sessile axillary flower-heads with 10 to 12 central florets. The seeds and powdered herb are used as a sternutatory. [W. Dymock, "Phar. Jour. and Trans.," Aug. 16, 1879 (L.).]—*A. tenuifolia*. The *A. campestris*. [B, 200]. See also *A. pontica*.—*A. tridentata* [Nuttall]. The sage-brush; a shrub 5 to 6 feet high growing through the elevated regions of western North America, with canescent obovate and truncate 3-toothed leaves and spicate clusters of obovate or oblong flower-heads disposed in narrow panicles. It contains a pungent volatile oil. An infusion of the plant is used by the Indians as a remedy for colds and headaches and as a vermifuge. [B, 81; "Am. Jour. of Pharm.," Feb., 1880, p. 69 (L.).]—*A. trifida* [Nuttall]. A variety of sage-brush growing in the plains and valleys of Wyoming and Utah. A plant 1 to 2 feet high with 3-cleft or 3-parted leaves, and numerous flower-

heads in contracted leafy panicles or spikes. It has properties similar to those of *A. tridentata*. [B, 81; "Am. Jour. of Pharm.," Feb., 1880, p. 69 (L).]—*A. umbelliformis* [Lamarck]. A species possessed of tonic and stimulant properties. [B, 173.]—*A. vahlana* [Kostel]. A shrub belonging to the subgenus *Abrotanum*, indigenous to Persia. The leaves are very small, palmately pinnate, and almost glabrous; the flower-heads are very small, sessile, agglomerated in tufts, and oblong-ovoid. The unexpanded flower-heads were formerly believed to constitute the Levant wormseed, which is now referred to *A. maritima*, var. *stechmanniana* (q. v.). [B, 180.] See also *SANTONICA*.—*A. vallesiaca* [Allioni]. See *A. maritima*, var. *vallesiaca*.—*A. vulgaris* [Linnaeus]. Fr., *armoise commune*. Ger., *gemeiner Beifuss*, *Mutterkraut*. It., *assenzio selvatico*. Mugwort. A perennial herb belonging to the subgenus *Abrotanum*, growing wild in waste spots in Europe, northern Asia, and North America. It is 2 to 3 feet high, bears simply or doubly pinnatifid leaves with lanceolate segments, canescently tomentose inferiorly, green superiorly, and oblong-ovoid, sessile, purplish flower-heads disposed in a series of short, leafy, racemose spikes forming long panicles. Two varieties, *A. alba* and *A. rubra*, having respectively a white and a purplish stem, are described. It has a feeble, rather pleasant, aromatic odor and a bitter taste, and contains a volatile oil, a bitter principle, and tannic acid. The leaves and flowering tops, *herba et summitates artemisiae albae* (seu *rubrae*, seu *vulgaris*), *herba regia*, are used in infusion especially in uterine diseases. The root (derived especially from the variety *A. rubra*), *radix artemisiae albae* (seu *rubrae*, seu *vulgaris*), *radix partheni*, *radix regia*, is woody, about 8 inches long and 1 inch thick, and is beset with numerous rootlets. The latter (*fibrae radices artemisiae vulgaris*) have been highly recommended in all convulsive affections, especially epilepsy, chorea, and infantile eclampsia, and in other morbid nervous states. The black coal-like rhizome of the dead plant was sometimes collected under the name of *carbones artemisiae rubrae*, but is inert. The down of the leaves is sometimes employed as a source of moha. [B, 33, 34, 180.]—*A. vulgaris* major [Bauhin]. See *A. vulgaris*.—*A. Wulfenii* [Schleich]. The *A. mutellina*. [B, 180.]—*Carbones artemisiae rubrae*. See under *A. vulgaris*.—*Extractum artemisiae absinthii aquosum*. An aqueous extract of the herb of wormwood (*A. absinthium*), formerly official in several pharmacopoeias. [B, 97.] Cf. *Extractum absinthii* and *Extrait d'absinthe*.—*Extractum foliorum artemisiae*. An aqueous extract of the leaves of *A. campestris* and *A. vulgaris*, the *extrait d'armoise* of the Fr. Cod. [B, 108.]—*Essentia artemisiae absinthii*. See *Tinctura artemisiae absinthii*.—*Fibrae radices artemisiae vulgaris*. See under *A. vulgaris*.—*Herba artemisiae abrotani*. The herb of *A. abrotanum*. [B, 180.]—*Herba artemisiae albae*, *Herba artemisiae florida*, *Herba artemisiae rubrae*, *Herba artemisiae vulgaris*, *Herba cum floribus artemisiae*. The leaves and flowering tops of *A. vulgaris*. [B, 180, 270.]—*Oleum artemisiae aetherium*. The volatile oil of *A. vulgaris*. [L, 85.]—*Radix artemisiae*, *Radix artemisiae albae*. The root of *A. vulgaris*. [B, 108, 180.]—*Radix artemisiae rubrae*. The root of *A. vulgaris* and *A. campestris*. [B, 180.]—*Radix artemisiae vulgaris*. The root of *A. vulgaris*. [B, 180.]—*Summitates artemisiae abrotani*. The flowering tops of *A. abrotanum*. [B, 180.]—*Summitates artemisiae albae* (seu *rubrae*, seu *vulgaris*). The flowering tops of *A. vulgaris*. [B, 180.]—*Syrupus artemisiae*. Syrup of mugwort; made by infusing the dry leaves of *A. vulgaris* in an equal quantity of boiling water for six hours, straining, adding to the liquid twice its weight of white sugar, and straining again; official in several old pharmacopoeias. [A, 353.]—*Syrupus artemisiae compositus*. Compound syrup of mugwort, official in several old formularies. The Fr. Cod. directed 6 oz. of the flowering tops of *A. vulgaris*,  $\frac{1}{2}$  oz. each of elecampane, lovage, and fennel roots, 6 oz. each of pennyroyal, catmint, and flowers of savin,  $\frac{3}{4}$  oz. each of marjoram, hyssop, feverfew, rue, and sweet basil flowers, and 9 drachms each of aniseed and cinnamon to be bruised and macerated for three days in 18 lbs. of hydromel,  $\frac{1}{2}$  lb. of liquid to be distilled off over a water-bath, and 1 lb. of white sugar added; the residuum to be strained with slight expression, boiled with 4 lbs. of sugar, and added to the syrup first prepared, when it had become half-cold. [A, 353.]—*Tinctura artemisiae absinthii*. A preparation made by infusing *A. absinthium* in alcohol. [B, 97.]

**ARTEMISIAE** (Lat.), n. f. pl.  $A^3r\text{-}te^2m\text{-}i^2s\text{-}i^2e(a^3\text{-}e^2)$ . A division of the *Compositae* made by Ritting. [B, 170.]

**ARTEMISIAEFOLIUS** (Lat.), adj.  $A^3r\text{-}te^2m\text{-}i^2s\text{-}i^2e(a^3\text{-}e^2)\text{-}fo\text{-}l\text{-}i^2u^3s(u^4s)$ . See *ARTEMISIFOLIUS*.

**ARTEMISIAE** (Lat.), n. f. pl.  $A^3r\text{-}te^2m\text{-}i^2s\text{-}i^2e(e^1)\text{-}e^2\text{-}e(a^3\text{-}e^2)$ . Fr., *artémisiées*. Ger., *Artemiseen*. A division or subtribe of composite plants belonging to the tribe *Senecionideae* and including *Artemisia*, *Tanacetum*, and 1 or 2 other genera. As made by De Candolle, it comprised genera with discoid heterogamous or homogamous heads, the ray florets of which are usually female and are either uniserial or multiserial, and the disc florets hermaphrodite with a cylindroid corolla and a bifid style. The achenia are non-alate and are rarely or never (?) flat ob-compressed, and the receptacle is devoid of pales. The *A.* of Lessing was a much larger division of plants and comprised the sections *Santolineae*, *Cotuleae*, *Athanasiaeae*, *Artemisiae* (= nearly the *A.* of De Candolle), *Hippiceae*, and *Erioccephaleae*. [B, 170, 197, 214.]

**ARTEMISIFOLIUS**, **ARTEMISIFOLIUS** (Lat.), adj.  $A^3r\text{-}te^2m\text{-}i^2s\text{-}i^2e\text{-}fo\text{-}l\text{-}i^2u^3s(u^4s)$ ,  $-(i^1e)\text{-}i^2fo\text{-}l\text{-}i^2u^3s(u^4s)$ . From *Artemisia*, and *folium*, a leaf. Having leaves like those of the *Artemisia*; a botanical species-name. [B.]

**ARTEMONIUM** (Lat.), n. n.  $A^3r\text{-}te^2m\text{-}o\text{-}n\text{-}i^2u^3m(u^4m)$ . Gr., ἀρτεμόνιον (from ἄρτεμος, its inventor). A collyrium described by Galen. [A, 325; B, 59.]

**ARTEN** (Ger.), n.  $A^3r\text{-}te^2n$ . A common name for *herba marubii* (horhound). [B, 270.]

**ARTÈRE** (Fr.), n.  $A^3r\text{-}te^2r$ . See **ARTERY**.—**A. abdominale**. See *Deep circumflex iliac ARTERY*.—**A. abdominale sous-cutanée**. See *Superficial epigastric ARTERY*.—**A. adipeuse**. See *Capsular ARTERY*.—**A. alvéolaire**. See *Superior dental ARTERY*.—**A. alvéolaire inférieure**. See *Inferior dental ARTERY*.—**A. alvéolaire supérieure**. See *Superior dental ARTERY*.—**A. anale**. See *Anal ARTERY*.—**A. anonyme**. See *Innominate ARTERY*.—**A. aorte**. See *AORTA*.—**A. antérieure communicante**. See *Anterior communicating ARTERY of the brain*.—**A. antérieure des tubercules quadrijumeaux**. See *Anterior ARTERY of the corpora quadrigemina*.—**A. aorte cervicale**. A term applied to the single trunk which, in many of the lower animals, arises from the arch of the aorta and gives origin to the arteries of the head and the cephalic extremities. [L, 158.]—**A. aorte postérieure**. See *Posterior AORTA*.—**A. articulaire de la tête du péroné**. See *ARTERIA articularis capiti fibulae*.—**A. articulaire inférieure externe du genou**. See *Inferior external articular ARTERY of the knee*.—**A. articulaire inférieure interne du genou**. See *Inferior internal articular ARTERY of the knee*.—**A. articulaire moyenne du genou**. See *Middle articular ARTERY of the knee*.—**A. articulaire moyenne inférieure du genou**. See *ARTERIA articularis genu media inferior*.—**A. articulaire superficielle du genou**. See *Anastomotica magna ARTERY of the thigh*.—**A. articulaire supérieure externe du genou**. See *Superior external articular ARTERY of the knee*.—**A. articulaire supérieure interne du genou**. See *Superior internal articular ARTERY of the knee*.—**A. asternale**. See *Asternal ARTERY*.—**A. auditive externe**. See *External auditory ARTERY*.—**A. auditive interne**. See *Internal auditory ARTERY*.—**A's auriculaires antérieures**. See *Anterior auricular ARTERIES*.—**A's auriculaires antéro-inférieures**. See *Anterior inferior auricular ARTERIES*.—**A. auriculaire antéro-supérieure**. See *Anterior superior auricular ARTERY*.—**A. auriculaire postérieure**. See *Posterior auricular ARTERY*.—**A. auriculaire profonde**. See *Deep auricular ARTERY*.—**A. auriculaire supérieure**. See *ARTERIA articularis superior*.—**A. brachiale profonde**. See *Superior profunda ARTERY of the arm*.—**A. brachio-céphalique**. See *Innominate ARTERY*.—**A. brachio-cervicale**. A branch of the right aortic arch of many reptiles, distributed to the lateral cervical region.—**A's bronchiales** (ou *bronchiques*). See *Bronchial ARTERIES*.—**A's bronchiques supérieures**. See *Superior bronchial ARTERIES*.—**A. bulbeuse**. See *ARTERY of the bulb of the urethra*.—**A. bulbo-urétrale**. See *ARTERIA bulbo-urethralis*.—**A. calcéale** [Chaussier]. See *Ileo-colic ARTERY* and *ARTERIA caecalis*.—**A. calcanéenne inférieure**. See *Inferior calcaneal ARTERY*.—**A. capsulaire supérieure**. See *Superior suprarenal ARTERY*.—**A's capsulaires inférieures**. See *Inferior suprarenal ARTERIES*.—**A. capsulaire moyenne**. See *Capsular ARTERY*.—**A. cardiaque antérieure**. See *Left coronary ARTERY of the heart*.—**A. cardiaque droite**. See *Right coronary ARTERY of the heart*.—**A. cardiaque gauche**. See *Left coronary ARTERY of the heart*.—**A. cardiaque postérieure**. See *Right coronary ARTERY of the heart*.—**A. carotide commune**. See *Common carotid ARTERY* and *A. carotide interne postérieure*.—**A. carotide faciale** [Chaussier]. See *External carotid ARTERY*.—**A. carotide interne postérieure**. An artery in fishes analogous to the vertebral artery of man. [L, 158.]—**A. carotide primitive**. See *Common carotid ARTERY*.—**A. carotide superficielle**. See *External carotid ARTERY*.—**A. caudale**. An artery which arises, in some of the *Arachnida*, from the posterior extremity of the heart, and lies upon the intestinal canal. [L, 158.]—**A. caverneuse**. See *ARTERY of the corpus cavernosum* and *Cavernous ARTERY of the clitoris*.—**A. caverneuse du clitoris**. See *Cavernous ARTERY of the clitoris*.—**A. centrale de la rétine**. See *Central retinal ARTERY*.—**A. céphalique accessoire**. A forward continuation of the dorsal aorta, in fishes, which, after giving off lateral branches to the parts it traverses, anastomoses with the anterior portion of the aortic circle. [L, 158.]—**A. cérébelleuse inférieure antérieure**. See *Anterior inferior cerebellar ARTERY*.—**A. cérébelleuse inférieure postérieure**. See *Posterior inferior cerebellar ARTERY*.—**A. cérébelleuse supérieure**. See *Superior cerebellar ARTERY*.—**A. cérébrale antérieure**. See *Anterior cerebral ARTERY*.—**A. cérébrale moyenne**. See *Middle cerebral ARTERY*.—**A. cérébrale postérieure**. See *Posterior cerebral ARTERY*.—**A. cervicale ascendante**. See *Ascending cervical ARTERY*.—**A. cervicale postérieure**. See *Posterior cervical ARTERY*.—**A. cervicale profonde**. See *Deep cervical ARTERY*.—**A. cervicale superficielle**. See *Superficial cervical ARTERY*.—**A. cervicale supérieure profonde**. See *Superficial cervical ARTERY*.—**A. cervico-scapulaire**. See *Transverse cervical ARTERY*.—**A. cervico-scapulaire**. See *Posterior scapular ARTERY*.—**A's choroïdiennes antérieures**. See *Anterior chorioid ARTERIES*.—**A's choroïdiennes postérieures**. See *Posterior chorioid ARTERIES*.—**A's choroïdiennes supérieures antérieures**. See *ARTERIE choroïdeae superiores anteriores*.—**A. choroïdienne supérieure postérieure**. See *ARTERIA chorioidea posterior superior*.—**A's ciliaires antérieures**. See *Anterior ciliary ARTERIES*.—**A's ciliaires courtes**. See *Short ciliary ARTERIES*.—**A's ciliaires longues**, **A's ciliaires moyennes**. See *Long ciliary ARTERIES*.—**A. circonflexe antérieure**. See *Anterior circumflex ARTERY of the arm* and *External circumflex ARTERY of the thigh*.—**A. circonflexe de l'omoplate**. See *Circumflex ARTERY of the scapula*.—**A. circonflexe du cœur**. See *ARTERIA circumflexa cordis*.—**A. circonflexe externe de la cuisse**. See *External circumflex ARTERY of the thigh*.—**A. circonflexe iliaque**. **A. circonflexe iliaque externe**. See *External circumflex iliac ARTERY*.—**A. circonflexe interne de la cuisse**. See *Internal circumflex ARTERY of the thigh*.—**A. circonflexe postérieure de la cuisse**. See *Posterior circumflex ARTERY of the thigh*.—**A. circonflexe postérieure de l'humérus**. See *Posterior circumflex ARTERY of the arm*.—**A. cléido-sus-scapulaire**. See *Suprascapular ARTERY*.—**A. clitoridienne**. **A. clitorienne**. See *ARTERIA clitoridis*.—**A. colique droite**. See *Right colic ARTERY*.—**A. co-**

lique gauche. See *Left colic ARTERY*.—A. colique gauche inférieure. See *ARTERIA colica sinistra inferior*.—A. colique gauche moyenne. See *ARTERIA colica sinistra media*.—A. colique gauche supérieure. See *ARTERIA colica sinistra superior*.—A. colique moyenne. See *Middle colic ARTERY*.—A. colique postérieure. See *Posterior colic ARTERY*.—A's collatérales dorsales des orteils. See *Dorsal digital ARTERIES of the foot*.—A. collatérale du coude. See *Anastomatic ARTERY of the arm*.—A. collatérale externe. See *Superior profunda ARTERY of the arm*.—A. collatérale externe de l'annulaire. The external collateral artery of the ring finger. [L.]—A. collatérale externe de l'index. See *ARTERIA volaris radialis indicis*.—A. collatérale externe du médius. See *ARTERIA volaris radialis digiti medii*.—A. collatérale externe du petit doigt. See *ARTERIA volaris radialis digiti minimi*.—A. collatérale inférieure. See *Anastomatic ARTERY of the arm*.—A. collatérale interne de l'annulaire. See *ARTERIA volaris ulnaris digiti tertii*.—A. collatérale interne de l'index. See *ARTERIA volaris ulnaris indicis*.—A. collatérale interne du médius. See *ARTERIA volaris ulnaris digiti medii*.—A. collatérale interne du petit doigt. See *ARTERIA volaris ulnaris digiti minimi*.—A. collatérale interne du ponce. See *ARTERIA volaris ulnaris pollicis*.—A's collatérales médianes. See *ARTERIA collateralis media*.—A's collatérales des doigts. See *Collateral digital ARTERIES*.—A's collatérales plantaires des orteils. See *Plantar digital ARTERIES*.—A. collatérale radiale externe. See *Profunda radial ARTERY*.—A. collatérale supérieure. See *Inferior profunda ARTERY of the arm*.—A. communicante antérieure. See *Anterior communicating ARTERY of the brain*.—A. communicante de Willis. A. communicante postérieure. See *Posterior communicating ARTERY of the brain*.—A. communicante profonde. See *ARTERIA metacarpea volaris radialis profunda*.—A. coronaire de la lèvre inférieure. See *Coronary ARTERY of the lower lip*.—A. coronaire de la lèvre supérieure. See *Coronary ARTERY of the upper lip*.—A. coronaire droite du cœur. See *Right coronary ARTERY of the heart*.—A. coronaire gauche du cœur. See *Left coronary ARTERY of the heart*.—A. coronaire stomacique. See *Coronary ARTERY of the stomach*.—A. coronaire stomacique droite. See *Pyloric ARTERY*.—A. coronaire stomacique droite inférieure. See *Right gastro-epiploic ARTERY*.—A. coronaire stomacique gauche. See *Coronary ARTERY of the stomach*.—A. coronaire stomacique gauche inférieure. See *Left gastro-epiploic ARTERY*.—A's corticales. See *Cortical system of ARTERIES*.—A. crico-thyroïdienne. See *Cricothyroid ARTERY*.—A. crurale. See *Femoral ARTERY*.—A. cubitale. See *Ulnar ARTERY*.—A. cubito-dorsale du ponce. See *ARTERIA pollicis ulnaris dorsalis*.—A. cubito-palmaire du ponce. See *ARTERIA pollicis ulnaris volaris*.—A. différencielle. See *ARTERY of the vas deferens*.—A. de la caisse du tympan. See *ARTERIA tympanica superior*.—A. de la cloison. 1. A branch of the left coronary artery of the heart distributed to the interventricular septum. [L. 35.] 2. See *ARTERY of the septum narium*.—A's de la grande lèvre. See *ARTERIE labiales posteriores*. [L. 35.]—A. de l'aile du nez. See *Lateral nasal ARTERY*.—A. de l'appendice caecale. See *Appendicular ARTERY*.—A. de la scissure de Sylvius. See *Middle cerebral ARTERY*.—A. de la sous-cloison. See *A. de la cloison*.—A. de la vessie natatoire. A branch of the abdominal artery which, in fishes, runs along the inferior surface of the swimming-bladder. [L. 158.]—A's de l'hexagone de Willis. See *CIRCLE of Willis*.—A. de l'ovaire. See *Ovarian ARTERY*.—A. deltoïdienne. See *ARTERIA deltoidea*.—A. dentaire inférieure. See *Inferior dental ARTERY*.—A. dentaire supérieure. See *Superior dental ARTERY*.—A. deuxième des thoraciques. See *External thoracic ARTERY*.—A's diaphragmatiques. See *Diaphragmatic ARTERIES*.—A's diaphragmatiques inférieures. See *Inferior phrenic ARTERIES*.—A. diaphragmatique supérieure. See *Superior phrenic ARTERY*.—A's digitales dorsales de la main. See *Dorsal digital ARTERIES of the hand*.—A's digitales palmaires de la main. See *Palmar digital ARTERIES*.—A's digitales plantaires. See *Plantar digital ARTERIES*.—A. dorsale. See *AORTA*.—A. dorsale de la langue. See *Dorsal ARTERY of the tongue*.—A. dorsale de la verge. See *Dorsal ARTERY of the penis*.—A. dorsale de l'épaule. See *Posterior scapular ARTERY*.—A's dorsales des orteils. See *Dorsal digital ARTERIES of the foot*.—A's dorsales du carpe. See *Dorsal carpal ARTERIES*.—A. dorsale du clitoris. See *Dorsal ARTERY of the clitoris*.—A. dorsale du gros orteil. See *Dorsal ARTERY of the great toe*.—A. dorsale du métatarse. See *Metatarsal ARTERY*.—A. dorsale du nez. See *Dorsal ARTERY of the nose*.—A. dorsale du ponce. See *Dorsal ARTERY of the thumb*.—A. dorsale du tarse. See *Tarsal ARTERY*.—A's dorsales interosseuses du pied. See *Dorsal interosseous ARTERIES of the foot*.—A. dorsale pédieuse. See *Dorsal ARTERY of the foot*.—A. dorso-spinale. See *ARTERIA dorso-spinalis*.—A. du bulbe. See *ARTERY of the bulb of the urethra*.—A. du canal déférent. See *ARTERY of the vas deferens*.—A. du corps calleux. See *Anterior cerebral ARTERY and ARTERY of the corpus callosum*.—A. du flet. That portion of the lingual artery which lies at the side of the frenum of the tongue. [L. 35.]—A. du muscle triceps-fémoral. A branch either of the superficial or of the deep femoral artery distributed to the triceps femoris muscle and adjacent parts. [L. 35.]—A. du nerf médian. See *Median ARTERY*.—A. émulgente. See *Renal ARTERY*.—A. encéphalo-oculaire. A branch of the a. encéphalo-palatine, which, with its fellow of the opposite side, forms the anterior portion of the arterial circle and a single median trunk which gives off branches to the eyes and the brain. [L. 158.]—A. encéphalo-palatine. A branch of the carotid artery which, in certain fishes, divides into the a. orbito-palatine and the a. encéphalo-oculaire. [L. 158.]—A. épiddymaire. A branch of the spermatic artery distributed to the epididymis. [L. 35.]—A. épigastrique inférieure. See *Deep epigastric ARTERY*.—A. épigastrique inférieure externe. See *External circumflex iliac ARTERY*.—A. épigastrique

inférieure interne. A. épigastrique profonde. See *Deep epigastric ARTERY*.—A. épigastrique superficielle. See *Superficial epigastric ARTERY*.—A. épigastrique supérieure. See *Superior epigastric ARTERY*.—A's épiglotiques. Branches of the dorsal artery of the tongue and of the superior thyroid artery distributed to the epiglottis. [L. 35.]—A. épineuse. See *Middle meningeal ARTERY*.—A. épiploïque droite. See *Right gastro-epiploic ARTERY*.—A. épiploïque gauche. See *ARTERIA epiploica sinistra*.—A. ethmoïdale antérieure. See *Anterior ethmoidal ARTERY*.—A. ethmoïdale postérieure. See *Posterior ethmoidal ARTERY*.—A. fémorale profonde. See *Deep femoral ARTERY*.—A. fémorale propre. See *Common femoral ARTERY*.—A. fessière. See *Gluteal ARTERY*.—A. fessière inférieure. See *Inferior gluteal ARTERY and Ischiadic ARTERY*.—A. frontale externe. See *Supra-orbital ARTERY*.—A. frontale externe et inférieure. See *External and inferior frontal ARTERY*.—A. frontale interne. See *Frontal ARTERY*.—A's frontales internes et antérieures. See *Anterior and internal frontal ARTERIES*.—A's frontales moyennes et internes. See *Middle and internal frontal ARTERIES*.—A's frontales postérieures et internes. See *Posterior and internal frontal ARTERIES*.—A. gastrique antérieure. See *Coronary ARTERY of the stomach*.—A's gastriques courtes. See *ARTERIE gastrice breves*.—A. gastrique droite petite. See *Pyloric ARTERY*.—A. gastrique gauche. See *ARTERIA epiploica sinistra*.—A. gastrique supérieure. See *Coronary ARTERY of the stomach*.—A. gastrique supérieure droite. See *Pyloric ARTERY*.—A. gastrique supérieure gauche. See *Coronary ARTERY of the stomach*.—A. gastro-épiploïque droite. See *Right gastro-epiploic ARTERY*.—A. gastro-épiploïque gauche. See *Left gastro-epiploic ARTERY*.—A. gastro-hépatique gauche. See *ARTERIA gastro-hepatica sinistra*.—A. gastro-splénique. A branch of the abdominal aorta which, in fishes, runs along the greater curvature of the stomach and terminates in the spleen. [L. 158.]—A's graisseuses. See *Adipose ARTERIES*.—A. grande anastomotique de la cuisse. See *Anastomatic magna ARTERY of the thigh*.—A. grande colique gauche [Chaussier]. The uppermost of the branches of the left colic artery, which ascends to anastomose with the middle colic. [L. 35.]—A's grandes iliaques. See *Longiliary ARTERIES*.—A. grande musculaire de la cuisse [Chaussier]. See *Deep femoral ARTERY*.—A. grande musculaire superficielle de la cuisse. See *Superficial muscular ARTERY of the thigh*.—A's gutturo-maxillaires [Chaussier]. See *Internal maxillary ARTERIES*.—A's hémorrhoidales inférieures. See *External hæmorrhoidal ARTERIES*.—A. hémorrhoidale interne supérieure. See *Superior hæmorrhoidal ARTERY*.—A. hémorrhoidale moyenne. See *Middle hæmorrhoidal ARTERY*.—A's honteuses externes. See *External pudic ARTERIES*.—A. honteuse externe inférieure. See *Inferior external pudic ARTERY*.—A. honteuse externe sous-aponévrotique. See *Inferior external pudic ARTERY*.—A. honteuse externe sous-cutanée. See *Superior external pudic ARTERY*.—A. honteuse externe supérieure. See *Superior external pudic ARTERY*.—A. honteuse interne. See *Internal pudic ARTERY*.—A. honteuse sous-cutanée. See *Superior external pudic ARTERY*.—A. humérale. See *Brachial ARTERY*.—A. humérale profonde. See *Superior profunda ARTERY of the arm*.—A. hyoïdienne. See *Hyoid ARTERY*.—A. hypogastrique. See *Internal iliac ARTERY*.—A. iliaque antérieure. See *Circumflex iliac ARTERY*.—A. iliaque commune. See *Common iliac ARTERY*.—A. iliaque externe. See *External iliac ARTERY*.—A. iliaque interne. See *Internal iliac ARTERY*.—A. iliaque postérieure. See *Gluteal ARTERY*.—A. iliaque primitive. See *Common iliac ARTERY*.—A. impaire du genou. See *Middle articular ARTERY of the knee*.—A. incisive. See *ARTERIA incisiva*.—A's inguinales. See *ARTERIE inguinales*.—A. innommée. See *Innominate ARTERY*.—A's intercostales antérieures. See *Anterior intercostal ARTERIES*.—A's intercostales aortiques. See *Aortic intercostal ARTERIES*.—A's intercostales inférieures. See *Aortic intercostal ARTERIES*.—A. intercostales supérieures. See *Superior intercostal ARTERY*.—A. interosseuse antérieure. See *Anterior interosseous ARTERY of the forearm*.—A. interosseuse brachiale. See *Common interosseous ARTERY of the forearm*.—A. interosseuse externe. See *Posterior interosseous ARTERY of the forearm*.—A. interosseuse interne. See *Anterior interosseous ARTERY of the forearm*.—A's interosseuses plantaires. See *Plantar interosseous ARTERIES*.—A. interosseuse recurrenente. See *ARTERIA interossea recurrens*.—A's interpédunculaires. See *Interpeduncular ARTERIES*.—A's iriennes. See *Long ciliary ARTERIES*.—A. ischiatique. See *Ischiadic ARTERY*.—A. ischio-pénienne. See *Internal pudic ARTERY*.—A's jumelles. See *Sural ARTERIES*.—A's jumelles internes. The sural arteries given off from the inner side of the popliteal artery. [L. 114.]—A. labiale. See *Facial ARTERY*.—A. labiale antérieure. See *ARTERIA labialis anterior*.—A. labiale inférieure. See *Inferior labial ARTERY*.—A. labiale supérieure. See *Coronary ARTERY of the upper lip*.—A. lacrymale. See *Lacrymal ARTERY*.—A. laryngée inférieure. See *Cricothyroid ARTERY*.—A. laryngée supérieure. See *Superior laryngeal ARTERY*.—A's lenticulo-striées. See *Lenticulo-striate ARTERIES*.—A. lombaire inférieure. See *ARTERIA lumbaris ima*.—A. malaire sous-cutanée. See *ARTERIA subcutanea mala*.—A. malléolaire externe. See *External malleolar ARTERY*.—A. malléolaire interne. See *Internal malleolar ARTERY*.—A. malléolaire interne postérieure. See *ARTERIA malleolaris interna posterior*.—A. mammaire externe. See *Internal mammary ARTERY*.—A. mammaire interne. See *Internal mammary ARTERY*.—A. masséterine. See *Masseteric ARTERY*.—A's masséterines postérieures. See *ARTERIE masseterica posteriores*.—A. mastoïdienne. See *Mastoid ARTERY*.—A. mastoïdienne postérieure. A branch of the occipital artery distributed to the dura mater. [L. 35.]—A. maxillaire externe. See *Facial ARTERY*.—A. maxillaire interne. See *Internal maxillary ARTERY*.—A. médiane antérieure du rachis. See

*Anterior median ARTERY of the spinal cord.*—**A. médiane postérieure du rachis.** See *Posterior spinal ARTERY.*—**A's médiastines antérieures.** See *Anterior mediastinal ARTERIES.*—**A's médiastines postérieures.** See *Posterior mediastinal ARTERIES.*—**A's médio-protuberantielles.** Branches of the basilar artery which penetrate the median fissure of the pons Varolii. [H. Duret, l. c. (L).]—**A's médullaires.** See *Medullary ARTERIES.*—**A's méningées antérieures.** See *Anterior meningeal ARTERIES.*—**A. méningée moyenne.** See *Middle meningeal ARTERY.*—**A. méningée petite.** See *Small meningeal ARTERY.*—**A. méningée postérieure.** See *Posterior meningeal ARTERY.*—**A. mentale.** See *Mental ARTERY.*—**A. mésentérique inférieure.** See *Inferior mesenteric ARTERY.*—**A. mésentérique supérieure.** See *Superior mesenteric ARTERY.*—**A. mésentérique inférieure.** See *Inferior mesenteric ARTERY.*—**A. mésentérique supérieure.** See *Superior mesenteric ARTERY.*—**A. méso-céphalique.** See *Basilar ARTERY.*—**A. méso-collique.** See *Middle colic ARTERY.*—**A's métacarpiennes.** See *Metatarsal ARTERIES.*—**A's métatarsiennes.** See *Metatarsal ARTERIES.*—**A. moyenne des tubercules quadrijumeaux.** See *Middle ARTERY of the corpora quadrigemina.*—**A. musculaire grande de la cuisse.** See *Deep femoral ARTERY.*—**A. musculaire grande du bras.** See *Deep humeral ARTERY.*—**A. musculaire profonde.** See *Deep femoral ARTERY.*—**A. musculo-phrénique.** See *Musculo-phrenic ARTERY.*—**A. mylo-hydoïenne.** See *Mylo-hyoid ARTERY.*—**A. nasale externe.** See *Lateral nasal ARTERY.*—**A. nasale moyenne.** See *Middle nasal ARTERY.*—**A. nasale postérieure.** See *Sphenopalatine ARTERY.*—**A's nasales supérieures.** Branches of the posterior ethmoidal artery which pass through the ethmoidal cells to the upper part of the nose. [L. 1, 35.]—**A. nourricière de l'humérus.** See *Nutrient ARTERY of the os brachii.*—**A. nourricière du cubitus.** See *Nutrient ARTERY of the ulna.*—**A. nourricière du fémur.** See *Nutrient ARTERY of the femur.*—**A. nourricière du radius.** See *Nutrient ARTERY of the radius.*—**A. nourricière du tibia.** See *Nutrient ARTERY of the tibia.*—**A. obturatrice.** See *Obturator ARTERY.*—**A's œsophagiennes.** See *Esophageal ARTERIES.*—**A's œsophagiennes inférieures.** See *Inferior esophageal ARTERIES.*—**A's operculaires.** See *Hyoid ARTERIES.*—**A. opisthogastrique.** See *Opisthogastric ARTERY.*—**A. opisto-gastrique.** See *Celiac ARTERY.*—**A. optique externe postérieure.** See *External posterior optic ARTERY.*—**A. optique interne et antérieure.** See *Internal and anterior optic ARTERY.*—**A. optique interne postérieure.** See *Internal posterior optic ARTERY.*—**A. optique postérieure interne.** See *Posterior internal optic ARTERY.*—**A. orbitaire.** See *Orbital ARTERY.*—**A. orbito-palatine.** A branch of the encephalo-palatine, which, after passing through the orbit, enters the nasal fossa, furnishing branches to the contents of both those cavities. [L. 158.]—**A's ovariennes.** See *Ovarian ARTERIES.*—**A. palatine antérieure.** See *Anterior palatine ARTERY.*—**A. palatine ascendente.** See *Inferior palatine ARTERY.*—**A. palatine descendente.** See *Superior palatine ARTERY.*—**A. palatine inférieure.** See *Inferior palatine ARTERY.*—**A. palatine supérieure.** See *Superior palatine ARTERY.*—**A. palato-labiale.** See *Facial ARTERY.*—**A's palléales postérieures.** Branches of the posterior aorta which, in many molluscs, are distributed to the posterior portion of the mantle. [L. 158.]—**A. palpébrale inférieure.** See *Inferior palpebral ARTERY.*—**A. palpébrale supérieure.** See *Superior palpebral ARTERY.*—**A. pancréatico-duodénale.** See *Superior pancreaticoduodenal ARTERY.*—**A. pancréatico-duodénale inférieure.** See *Inferior pancreaticoduodenal ARTERY.*—**A. pancréatico-duodénale supérieure.** See *Superior pancreaticoduodenal ARTERY.*—**A. pariétale antérieure.** See *Anterior parietal ARTERY.*—**A. pariétale moyenne.** See *Middle parietal ARTERY.*—**A. pariétale postérieure.** See *Posterior parietal ARTERY.*—**A. parotidiennes.** See *Arteria parotidæ.*—**A. pédieuse.** See *Pedal ARTERY.*—**A. pédieuse interne.** See *Dorsal ARTERY of the foot.*—**A's pédonculaires antérieures et internes.** See *Anterior and internal peduncular ARTERIES.*—**A's pédonculaires externes.** See *External peduncular ARTERIES.*—**A. pelvienne.** See *Common iliac ARTERY.*—**A. pelvienne.** See *Deep iliac ARTERY.*—**A. pénienne.** See *Artery of the penis.*—**A's perforantes de la cuisse.** See *Perforating ARTERIES of the thigh.*—**A. périnéale inférieure.** See *Superficial perineal ARTERY.*—**A. péronière.** See *Peroneal ARTERY.*—**A. péronière antérieure.** See *Anterior peroneal ARTERY.*—**A's péronières postérieures.** See *External calcaneal ARTERIES.*—**A. petite gastrique droite.** See *Pyloric ARTERY.*—**A's petites irlennes.** See *Anterior ciliary ARTERIES.*—**A. petite méningée.** See *Small meningeal ARTERY.*—**A. petite musculaire superficielle.** A branch of the superficial femoral artery arising just below the origin of the inferior external pudic, with which it sometimes arises by a common trunk; distributed to the sartorius, iliacus, psoas, and tensor vaginæ femoris muscles and to the anterior surface of the thigh. [L. 35.]—**A. pétreuse.** See *Arteria petrosa.*—**A. pharyngienne ascendante.** See *Ascending pharyngeal ARTERY.*—**A. pharyngienne descendante.** See *Pterygo-palatine ARTERY.*—**A. pharyngienne inférieure.** See *Ascending pharyngeal ARTERY.*—**A. pharyngienne supérieure.** See *Pterygo-palatine ARTERY.*—**A. pharyngo-méningée.** See *Ascending pharyngeal ARTERY.*—**A's phréniques inférieures.** See *Inferior phrenic ARTERIES.*—**A. plantaire externe.** See *External plantar ARTERY.*—**A. plantaire interne.** See *Internal plantar ARTERY.*—**A. poplitée.** See *Popliteal ARTERY.*—**A. postérieure de la cloison des fosses nasales.** See *Arteria septi nasi posterior.*—**A. postérieure des thoraciques.** See *Superior intercostal ARTERY.*—**A. prévertébrale.** See *Prevertebral ARTERY.*—**A. principale.** See *Aorta.*—**A. profonde auriculaire.** See *Deep auricular ARTERY.*—**A. profonde de la langue.** See *Ranine ARTERY.*—**A. profonde de la verge.** See *Artery of the corpus cavernosum.*—**A. profonde du clitoris.** See *Arteria profunda clitoridis.*—**A. ptérygoïdienne.** See *Vidian ARTERY.*—**A's ptérygoïdiennes.** See *Arteria pterygoideæ.*—**A. ptéry-**

**go-méningée.** See *Small meningeal ARTERY.*—**A. ptérygo-palatine.** See *Pterygo-palatine ARTERY.*—**A. pubienne.** See *Arteria pubica.*—**A's pyloriques inférieures.** Branches of the right gastro-epiploic artery distributed to the pylorus. [L. 35.]—**A's radiculaires.** Branches of the vertebral artery distributed to the roots of the nerves emerging from the medulla oblongata. [H. Duret, l. c. (L).]—**A. radio-carpienne transversale palmaire.** See *Anterior radial carpal ARTERY.*—**A. radio-dorsale de l'index.** See *Arteria indicis radialis dorsalis.*—**A. radio-dorsale du pouce.** See *Arteria pollicis radialis dorsalis.*—**A. radio-palmaire de l'index.** See *Arteria indicis radialis volaris.*—**A. radio-palmaire du pouce.** See *Arteria pollicis radialis volaris.*—**A. récurrente cubitale antérieure.** See *Anterior ulnar recurrent ARTERY.*—**A. récurrente cubitale postérieure.** See *Posterior ulnar recurrent ARTERY.*—**A. récurrente radiale antérieure.** See *Anterior radial recurrent ARTERY.*—**A. récurrente radiale postérieure.** See *Posterior radial recurrent ARTERY.*—**A. sacrée antérieure.** See *Middle sacral ARTERY.*—**A's sacrées latérales.** See *Lateral sacral ARTERIES.*—**A. sacrée moyenne.** See *Middle sacral ARTERY.*—**A. scapulaire commune.** See *Subscapular ARTERY.*—**A. scapulaire inférieure.** See *Subscapular ARTERY.*—**A. scapulaire postérieure.** See *Posterior scapular ARTERY.*—**A. scapulaire supérieure.** See *Suprascapular ARTERY.*—**A's scrotales antérieures.** See *Anterior scrotal ARTERIES.*—**A's scrotales postérieures.** See *Posterior scrotal ARTERIES.*—**A. seconde articulaire supérieure interne.** See *Superior internal articular ARTERY of the knee.*—**A's segmentaires.** Arteries which are distributed to the parts in which they are situated. See *Dorsal carpal ARTERIES*.—*Arterie carpeæ dorsales ulnares*. Branches of the ulnar artery to the posterior surface of the carpus, which assist in forming the rete carpeum dorsale. [L. 31.]—*A. carpea dorsalis radialis*. See *Posterior radio-carpal ARTERY*.—*Arterie carpeæ ulnares volares*. Branches of the ulnar artery to the anterior surface of the carpus, which assist in forming the rete carpeum volare. [L. 31.]—*A. carpea volaris anterior* (seu *radialis*).—*A. carpi transversa anterior*. See *Anterior radio-carpal ARTERY*.—*A. cavernosa*. See *ARTERY of the corpus cavernosum*.—*A. cavernosa urethrae*. See *ARTERY of the bulb of the urethra*.—*A. cavi tympani*. See *External auditory ARTERY*.—*A. centralis modiolii*. The artery which is situated in the tubulus centralis modiolii. [L. 172.]—*A. centralis retinae*. See *Central retinal ARTERY*.—*A. cerebelli inferior*.—*A. cerebelli inferior anterior*. See *Anterior inferior cerebellar ARTERY*.—*A. cerebelli inferior posterior*.—*A. cerebelli magna*. See *Posterior inferior cerebellar ARTERY*.—*A.*

**cerebelli superior.** See *Superior cerebellar artery*.—**A. cerebelli superior anterior.** A branch of the vertebral artery distributed to the anterior portion of the cerebellum. [Weber (L, 31).]—**A. cerebelli superior posterior.** A branch of the vertebral artery distributed to the posterior portion of the cerebellum. [Weber (L, 31).]—**A. cerebialis.** See *Internal carotid artery*.—**A. cerebialis anterior.** See *Anterior cerebral artery*.—**A. cerebialis media.** See *Middle cerebral artery*.—**A. cerebialis posterior.** See *Posterior cerebral artery*.—**A. cerebri anterior.** See *Anterior cerebral artery*.—**A. cerebri anterior communis.** An artery formed by the union of the internal carotids; the analogue of the two anterior cerebrals. [Barkow (L, 31).]—**A. cerebri media.** See *Middle cerebral artery*.—**A. cerebri posterior (seu profunda).** See *Posterior cerebral artery*.—**A. cerebri transversa.** See *Middle cerebral artery*.—**Arteriæ cervicales descendentes profundæ.** Branches of the occipital artery to the deep cervical muscles. [Arnold (L, 31).]—**Arteriæ cervicales descendentes superficiales.** Branches of the occipital artery (1st def.) to the superficial cervical muscles. [Arnold (L, 31).]—**Arteriæ cervicales descendentes profundæ.** Branches of the occipital artery (1st def.) to the deep muscles of the neck. [L, 31].—**A. cervicalis.** See *Basilar artery*.—**A. cervicalis ascendens.** See *Ascending cervical artery*.—**A. cervicalis descendens.** See *Descending cervical artery*.—**A. cervicalis posterior.** See *Posterior cervical artery*.—**A. cervicalis princeps.** See *Descending cervical artery*.—**A. cervicalis profunda.** See *Deep cervical artery*.—**A. cervicalis suprema.** One of the terminal branches of the posterior scapular artery [L, 175].—**A. cervicalis superficialis.** See *Superficial cervical artery*.—**A. cervicalis transversa.** See *Transverse cervical artery*.—**Arteriæ chorioideæ anteriores.** See *Anterior choroid arteries*.—**Arteriæ chorioideæ posteriores.** See *Posterior choroid arteries*.—**A. chorioidea posterior superior.** Fr., *artère chorioïdienne supérieure postérieure*. Ger., *hintere obere Adernetzpulsader*. A branch of the superior cerebellar artery distributed to the valve of Vieussens, the pineal gland, and the corpora quadrigemina, and anastomosing with the anterior choroid arteries. [L, 7].—**Arteriæ chorioideæ superiores anteriores.** Fr., *arteres chorioïdiennes antérieures*. Ger., *vordere Adernetzpulsader*. Branches of the posterior cerebral artery to the choroid plexus. [L, 7].—**Arteriæ ciliares anteriores (seu anticae).** See *Anterior ciliary arteries*.—**Arteriæ ciliares mediae.** See *Long ciliary arteries*.—**Arteriæ ciliares posteriores breves.** See *Short ciliary arteries*.—**Arteriæ ciliares posteriores longae.** See *Long ciliary arteries*.—**Arteriæ ciliares posticae.** See *Posterior ciliary arteries*.—**A. circumflexa abdominis.** See *Deep circumflex iliac artery*.—**A. circumflexa cordis.** Fr., *artère circumflexe du cœur*. The posterior branch of the left coronary artery of the heart, distributed to its posterior surface. [L, 7].—**A. circumflexa femoris anterior (seu externa).** See *External circumflex artery of the thigh*.—**A. circumflexa femoris interna.** See *Internal circumflex artery of the thigh*.—**A. circumflexa femoris lateralis.** See *External circumflex artery of the thigh*.—**A. circumflexa femoris medialis (seu posterior).** See *Internal circumflex artery of the thigh*.—**Arteriæ circumflexæ genu.** See *Articular arteries of the knee*.—**A. circumflexa genu inferior interna.** See *Internal inferior articular artery of the knee*.—**A. circumflexa humeri anterior.** See *Anterior circumflex artery of the arm*.—**A. circumflexa humeri major.** See *Posterior circumflex artery of the arm*.—**A. circumflexa humeri minor.** See *Anterior circumflex artery of the arm*.—**A. circumflexa humeri posterior.** See *Posterior circumflex artery of the arm*.—**A. circumflexa ili.** A term applied to the deep and external circumflex iliac arteries, but more properly to the latter. [L, 7].—**A. circumflexa ili externa.** See *External circumflex iliac artery*.—**A. circumflexa ili interna.** See *Deep circumflex iliac artery*.—**A. circumflexa ili superficialis.** See *External circumflex iliac artery*.—**A. circumflexa musculi sterno-cleido-mastoidei inferior.** A branch of the external carotid artery, distributed to the lower portion of the sterno-cleido-mastoid muscle. [L, 31].—**A. circumflexa musculi sterno-cleido-mastoidei superior.** A branch of the external carotid artery, distributed to the upper portion of the sterno-cleido-mastoid muscle. [L, 31].—**A. circumflexa scapulae.** See *Circumflex artery of the scapula*.—**A. clitoridea.** **A. clitoridis.** Fr., *artère clitoridienne*. The artery of the clitoris; the analogue in the female of the artery of the penis of the male. [L, 7].—**A. coccygea.** See *Coccygeal artery*.—**A. cochleæ.** See *Cochlear artery*.—**A. colliæa.** See *Collic artery*.—**A. colica dextra.** See *Right colic artery*.—**A. colica dextra inferior.** See *Ileo-colic artery*.—**A. colica media.** See *Middle colic artery*.—**A. colica sinistra.** See *Left colic artery*.—**A. colica sinistra inferior.** Fr., *artère colique gauche inférieure*. Ger., *untere linke Grimmdarmpulsader*. A branch of the inferior mesenteric artery to the mesocolon of the sigmoid flexure of the colon. [L, 31].—**A. colica sinistra media.** Fr., *artère colique moyenne gauche*. Ger., *mittlere linke Grimmdarmpulsader*. A branch of the inferior mesenteric artery uniting the a. colica sinistra and the a. colica superior. [L, 31].—**A. colica sinistra superior.** Fr., *artère colique gauche supérieure*. Ger., *obere linke Grimmdarmpulsader*. A branch of the inferior mesenteric artery supplying the left portion of the colon as far as the sigmoid flexure. [L, 31].—**Arteriæ collaterales colli.** Rathke's term for the vertebral arteries of birds. [L, 63].—**Arteriæ collaterales genu.** See *Articular arteries of the knee*.—**A. collateralis brachii externa.** See *Superior profunda radial artery*.—**A. collateralis genu superior externa.** See *External superior articular artery of the knee*.—**A. collateralis interna.** See *Inferior profunda artery of the arm*.—**A. collateralis magna.** See *Superior profunda artery of the arm*.—**A. collateralis media.** Fr., *artère collatérale médiane*. Ger., *mittlere Nebenpulsader*. A branch of the superior profunda artery of

the arm distributed to the triceps muscle. [L, 117].—**A. collateralis profunda.** See *A. collateralis radialis superior posterior*.—**A. collateralis radialis anterior** [Weber]. A branch of the profunda radial artery which accompanies the upper portion of the radial nerve for a short distance and is distributed to the back part of the arm. [L, 31].—**A. collateralis radialis inferior.** See *Profunda radial artery*.—**A. collateralis radialis posterior (seu primaria, seu superior).** A branch of the superior profunda artery of the arm, or of one of its branches, distributed to the outer and back part of the olecranon. [L, 31].—**A. collateralis ulnaris anterior (seu inferior).** See *Anastomotic artery of the arm*.—**A. collateralis ulnaris posterior.** See *Inferior profunda artery of the arm*.—**A. collateralis ulnaris prima.** See *Superior profunda artery of the arm*.—**A. collateralis ulnaris secunda.** See *Anastomotic artery of the arm*.—**A. collateralis ulnaris superior.** See *Superior profunda artery of the arm*.—**A. colli transversa.** See *Transverse cervical artery*.—**A. comes nervi ischiadici.** A branch of the inferior gluteal artery which accompanies the sciatic nerve to the middle of the thigh. [L, 117].—**A. comes nervi mediani.** See *Median artery*.—**A. comes nervi phrenici.** See *Superior phrenic artery*.—**A. communicans anterior.** **A. communicans cerebri anterior.** See *Anterior communicating artery of the brain*.—**A. communicans cerebri posterior.** See *Posterior communicating artery of the brain*.—**A. communicans cerebri superior.** See *Anterior communicating artery of the brain*.—**A. communicans Willisii.** See *Posterior communicating artery of the brain*.—**A. conchlearum nasi.** See *Spheno-palatine artery*.—**A. coronaria cordis anterior (seu interna).** See *Right coronary artery of the heart*.—**Arteriæ conjunctivales anteriores.** Branches of the nasofrontal artery distributed to the conjunctiva. [L, 31].—**Arteriæ conjunctivales posteriores.** Branches of the palpebral or lacrymal arteries distributed to the conjunctiva. [L, 31].—**A. coronaria cordis dextra.** See *Right coronary artery of the heart*.—**A. coronaria cordis externa.** See *Left coronary artery of the heart*.—**A. coronaria cordis media.** A branch of the left coronary artery of the heart which supplies the apex of the organ. [L, 175].—**A. coronaria cordis posterior (seu sinistra).** See *Left coronary artery of the heart*.—**A. coronaria labii inferioris.** See *Coronary artery of the lower lip*.—**A. coronaria labii superioris.** See *Coronary artery of the upper lip*.—**A. coronaria malleolaris.** See *Anastomotic transversa*.—**A. coronaria ventriculi dextra.** See *Pyloric artery*.—**A. coronaria ventriculi dextra inferior.** See *Right gastro-epiploic artery*.—**A. coronaria ventriculi dextra superior.** See *Pyloric artery*.—**A. coronaria ventriculi major.** See *Coronary artery of the stomach*.—**A. coronaria ventriculi minor.** See *Pyloric artery*.—**A. coronaria ventriculi sinistra.** See *Coronary artery of the stomach*.—**A. coronaria ventriculi sinistra inferior.** See *Left gastro-epiploic artery*.—**A. coronaria ventriculi sinistra superior.** See *Coronary artery of the stomach*.—**A. coronaria ventriculi superior dextra.** See *Pyloric artery*.—**A. coronaria ventriculi superior sinistra.** See *Coronary artery of the stomach*.—**A. carpea dorsalis ulnaris.** See *Posterior ulno-carpal artery*.—**A. corporis callosi.** See *Anterior cerebral artery*.—**A. corporis cavernosi urethrae.** See *Artery of the bulb of the urethra*.—**Arteriæ costales posteriores.** See *Aortic intercostal arteries*.—**A. costalis anterior.** An intercostal branch of the internal mammary a. [L, 63].—**A. costalis inferior.** The anterior branch of an aortic intercostal a. [L, 31].—**A. costalis prima.** See *Superior intercostal artery*.—**A. costalis superior.** **A. costalis suprema.** See *Superior intercostal a.*—**A. costo-cervicalis.** See *Costo-cervical artery*.—**A. costo-lumbaris.** According to some authorities, the lowest of the intercostal arteries, and according to others, the uppermost of the lumbar arteries. [L, 31].—**A. crassa.** See *Aorta*.—**A. cremasterica.** See *External spermatic artery*.—**A. crico-thyroidea.** See *Crico-thyroid artery*.—**A. cristæ pubis.** See *A. pubica*.—**A. cruralis.** See *Femoral artery*.—**A. cruralis communis.** See *Common femoral artery*.—**A. cruralis externa.** See *External femoral artery*.—**A. cruralis iliaca.** See *External iliac artery*.—**A. cruralis interna.** See *Internal iliac artery*.—**A. cruralis profunda.** See *Deep femoral artery*.—**A. cruralis superficialis.** See *Superficial femoral artery*.—**A. cruris et pedis.** See *Popliteal artery*.—**A. cubitalis.** See *Ulnar artery*.—**A. cubitalis recurrens anterior.** See *Anterior ulnar recurrent artery*.—**A. cubitalis recurrens posterior.** See *Posterior ulnar recurrent artery*.—**A. cubitalis volaris profunda.** See *A. metacarpea volaris profunda ulnaris*.—**A. cubiti externa.** See *Radial a.*—**A. cutanea abdominis.** See *Superficial epigastric artery*.—**A. cystica.** See *Cystic artery*.—**A. deferentialis.** See *Artery of the vas deferens*.—**A. deltoidea.** Fr., *artère deltoïdienne*. A branch of the acromio-thoracic artery running in the groove between the pectoralis major and deltoid muscles and distributed to the latter. [L, 7].—**A. dentalis inferior.** See *Inferior dental artery*.—**A. dentalis posterior.** See *Posterior dental artery*.—**A. dentalis superior.** See *Superior dental artery*.—**A. diaphragmatica superior.** **A. diaphragmatica superior anterior.** See *Superior phrenic artery*.—**Arteriæ diaphragmaticæ.** See *Inferior phrenic arteries*.—**Arteriæ digitales communes.** The interosseous arteries of the foot and hand. [L, 7].—**Arteriæ digitales communes plantares.** See *Plantar interosseous arteries*.—**Arteriæ digitales communes volares.** See *Palmar interosseous arteries*.—**Arteriæ digitales dorsales manus.** See *Dorsal digital arteries of the hand*.—**Arteriæ digitales dorsales pedis.** See *Dorsal digital arteries of the foot*.—**Arteriæ digitales manus dorsales.** See *Dorsal digital arteries of the hand*.—**Arteriæ digitales manus volares.** See *Palmar digital arteries*.—**Arteriæ digitales pedis dorsales.** See *Dorsal digital arteries of the foot*.—**Arteriæ digitales pedis plantares.** See *Plantar digital arteries*.—**Arteriæ digitales volares communes.** See *Palmar interosseous arteries*.—**Arteriæ digitales volares**

**radiales.** The palmar digital arteries on the radial side of the fingers. [L. 117.]—**Arteriæ digitales volares ulnares.** The palmar digital arteries on the ulnar side of the fingers. [L. 117.]—**A. digitalis communis prima.** **A. digitalis communis volaris prima.** See *A. princeps pollicis et indicis*.—**A. digitalis dorsalis hallucis interna.** The dorsal digital artery of the tibial side of the great toe. [L. 175.]—**A. digitalis medialis hallucis.** The continuation of the external plantar artery on the plantar and external surfaces of the great toe. [L. 117.]—**A. digitalis volaris prima.** Ger., *erste Fingerarterie der Hohlhand*. The first palmar digital artery. [L. 31.]—**A. digitalis volaris quarta.** Ger., *vierte Fingerarterie der Hohlhand*. The fourth palmar digital artery. [L. 31.]—**A. digitalis plantaris propria lateralis digiti quinti.** The plantar digital artery to the fibular side of the little toe. [L. 31.]—**A. digitalis volaris secunda.** Ger., *zweite Fingerarterie der Hohlhand*. The second palmar digital artery. [L. 174.]—**A. digitalis volaris tertia.** Ger., *dritte Fingerarterie der Hohlhand*. The third palmar digital artery. [L. 174.]—**A. digiti minimi plantaris externa.** See *A. plantaris lateralis digiti quinti*.—**Arteriæ dorsales carpi.** See *Dorsal carpal arteries*.—**Arteriæ dorsales digitales (seu digitorum).** See *Dorsal digital arteries of the hand*.—**A. dorsalis clitoridis.** See *Dorsal artery of the clitoris*.—**A. dorsalis digitalis minima.** See *A. dorsalis digiti minimi externa*.—**A. dorsalis digiti medii externa.** Ger., *äußere Rückenpulsader der zweiten Zehe*. The dorsal digital artery on the fibular side of the second toe. [L. 174.]—**A. dorsalis digiti minimi.** The dorsal artery of the little toe. [L.]—**A. dorsalis digiti minimi externa.** Ger., *äußere Rückenpulsader der kleinen Zehe*. The dorsal digital artery on the fibular side of the little toe. [L. 174.]—**A. dorsalis digiti quarti externa.** Ger., *äußere Rückenpulsader der vierten Zehe*. The dorsal digital artery on the fibular side of the fourth toe. [L. 174.]—**A. dorsalis digiti quarti interna.** Ger., *innere Rückenpulsader der vierten Zehe*. The dorsal digital artery on the tibial side of the fourth toe. [L. 174.]—**A. dorsalis digiti quinti externa.** Ger., *äußere Rückenpulsader der fünften Zehe*. The dorsal digital artery on the fibular side of the fifth toe. [L. 174.]—**A. dorsalis digiti quinti interna.** Ger., *innere Rückenpulsader der fünften Zehe*. The dorsal digital artery on the tibial side of the fifth toe. [L. 174.]—**A. dorsalis digiti secundi externa.** Ger., *äußere Rückenpulsader der zweiten Zehe*. The dorsal digital artery on the fibular side of the second toe. [L. 174.]—**A. dorsalis digiti secundi interna.** Ger., *innere Rückenpulsader der zweiten Zehe*. The dorsal digital artery on the tibial side of the second toe. [L. 174.]—**A. dorsalis digiti tertii externa.** Ger., *äußere Rückenpulsader der dritten Zehe*. The dorsal digital artery on the fibular side of the third toe. [L. 174.]—**A. dorsalis digiti tertii interna.** Ger., *innere Rückenpulsader der dritten Zehe*. The dorsal digital artery on the tibial side of the third toe. [L. 174.]—**A. dorsalis hallucis.** The first dorsal interosseous artery of the foot. [L.]—**A. dorsalis hallucis externa.** Ger., *äußere Rückenpulsader der grossen Zehe*. The dorsal digital artery on the fibular side of the great toe. [L. 174.]—**A. dorsalis hallucis interna.** Ger., *innere Rückenpulsader der grossen Zehe*. The dorsal digital artery on the tibial side of the great toe. [L. 174.]—**A. dorsalis indicis radialis.** See *Dorsal artery of the index finger*.—**A. dorsalis linguae.** See *Dorsal artery of the tongue*.—**A. dorsalis metacarpi.** See *Posterior radio-carpal artery*.—**A. dorsalis nasi.** The nasal branch of the ophthalmic artery. [L. 31.]—**A. dorsalis pedis.** See *Dorsal artery of the foot*.—**A. dorsalis penis.** See *Dorsal artery of the penis*.—**A. dorsalis pollicis.** See *Dorsal artery of the thumb*.—**A. dorsalis radialis digiti medii.** The dorsal digital artery on the radial side of the middle finger. [L. 174.]—**A. dorsalis radialis digiti minimi.** The dorsal digital artery on the radial side of the little finger. [L. 174.]—**A. dorsalis radialis digiti quarti.** The dorsal digital artery on the radial side of the ring finger. [L. 174.]—**A. dorsalis radialis indicis.** The dorsal digital artery on the radial side of the index finger. [L. 174.]—**A. dorsalis radialis pollicis.** A branch of the dorsal carpal branch of the radial artery to the radial side of the thumb. [L. 174.]—**A. dorsalis scapulae.** See *Posterior scapular artery*.—**A. dorsalis scapulae inferior.** The inferior branch of the posterior scapular artery. [L. 31.]—**A. dorso-spinalis.** Fr., *artère dorso-spinale*. A branch of the superior intercostal artery to the posterior cervical muscles. [L. 7.]—**A. dorsalis suprema.** See *Ascending cervical artery*.—**A. dorsalis ulnaris.** See *A. carpea dorsalis ulnaris*.—**A. dorsalis ulnaris indicis.** The dorsal digital artery on the ulnar side of the index finger. [L. 174.]—**A. dorsalis ulnaris pollicis.** A branch of the dorsal metacarpal branch of the radial artery on the ulnar side of the thumb. [L. 174.]—**A. duodenalis inferior.** See *Inferior pancreaticoduodenal artery*.—**A. duræ matris media maxima.** See *Middle meningeal artery*.—**A. emulgens.** See *Renal artery*.—**A. encephalica.** See *Internal carotid artery*.—**A. epigastrica.** See *Epigastric artery*.—**A. epigastrica abdominalis.** **A. epigastrica externa.** See *Superficial epigastric artery*.—**A. epigastrica inferior.** See *Deep epigastric artery*.—**A. epigastrica inferior externa.** See *Superficial epigastric artery and External circumflex iliac artery*.—**A. epigastrica inferior interna (seu profunda).** See *Deep epigastric artery*.—**A. epigastrica inferior superficialis.** See *Superficial epigastric artery*.—**A. epigastrica interna.** See *Deep epigastric artery*.—**A. epigastrica subcutanea.** **A. epigastrica superficialis.** See *Superficial epigastric artery*.—**A. epigastrica superior.** See *Superior epigastric artery*.—**A. epiploica sinistra.** Fr., *artère épiploïque gauche*. The largest of the branches of the left gastro-epiploic artery, which is distributed to the mesentery. [L. 7.]—**A. ethmoidalis anterior.** See *Anterior ethmoidal artery*.—**A. ethmoidalis posterior.** See *Posterior ethmoidal artery*.—**A. facialis.** See *Facial artery*.—**A. facialis anterior.** See *Angular artery*.—**A. facialis posterior.** See *Transverse facial artery*.—**A.**

**facialis profunda.** See *Internal maxillary artery*.—**A. facialis (seu faciei) transversa (seu transversa posterior).** See *Transverse facial artery*.—**A. femoralis.** See *Femoral artery*.—**A. femoralis communis.** See *Common femoral artery*.—**A. femoralis profunda.** See *Deep femoral artery*.—**A. femoralis superficialis.** See *Superficial femoral artery*.—**A. femoris profunda.** See *Deep femoral artery*.—**A. fibularis.** **A. fibularis communis.** See *Peroneal artery*.—**A. fibularis superior.** See *A. articularis capiti fibulae*.—**A. fossæ Sylvii.** See *Middle cerebral artery*.—**A. frontalis.** See *Frontal artery*.—**A. frontalis externa.** See *Supra-orbital artery*.—**A. frontalis interna.** See *A. naso-frontalis*.—**A. funicularis.** **A. funiculi spermatici.** See *External spermatic artery*.—**Arteriæ gastricae breves.** Fr., *artères gastriques courtes*. The short branches to the walls of the stomach from the coronary, splenic, pyloric, and right and left gastro-epiploic arteries. [L. 115.]—**A. gastrica coronaria ventriculi inferior dextra.** See *Right gastro-epiploic artery*.—**A. gastrica coronaria ventriculi inferior sinistra.** See *Left gastro-epiploic artery*.—**A. gastrica dextra inferior.** See *Right gastro-epiploic artery*.—**A. gastrica dextra superior.** See *Pyloric artery*.—**A. gastrica inferior sinistra.** See *Left gastro-epiploic artery*.—**A. gastrica major.** See *Coronary artery of the stomach*.—**A. gastrica sinistra inferior.** See *Left gastro-epiploic artery*.—**A. gastrica (sinistra) superior.** See *Coronary artery of the stomach*.—**A. gastrica superior dextra.** See *Pyloric artery*.—**A. gastrica sinistra.** See *Coronary artery of the stomach*.—**Arteriæ gastrocnemicae.** See *Deep sural arteries*.—**A. gastro-duodenalis.** See *Gastro-duodenal artery*.—**A. gastro-epiploica dextra.** See *Right gastro-epiploic artery*.—**A. gastro-epiploica sinistra.** See *Left gastro-epiploic artery*.—**A. gastro-hepatica sinistra.** Fr., *artère gastro-hépatique gauche*. An occasional branch of the coronary artery of the stomach distributed to the left lobe of the liver. [L. 7.]—**Arteriæ gemellæ.** See *Sural arteries*.—**Arteriæ gemellæ cutaneæ.** See *Superficial sural arteries*.—**Arteriæ gemellæ musculares.** **Arteriæ gemellæ profundæ.** See *Deep sural arteries*.—**Arteriæ gemellæ superficiales.** See *Superficial sural arteries*.—**Arteriæ gemellæ suræ.** See *Sural arteries*.—**A. glandulosa axillaris.** A branch of the axillary artery distributed to the axillary glands. [L. 31.]—**Arteriæ glomeruli.** The arteries of a glomerulus of the kidney. [L. 117.]—**A. glutæa.** See *Gluteal artery*.—**A. glutæa inferior.** See *Inferior gluteal artery*.—**A. glutæa superior.** See *Superior gluteal artery*.—**Arteriæ hæmorrhoidales externæ.** See *External hæmorrhoidal arteries*.—**A. hæmorrhoidalis interna.** See *Internal hæmorrhoidal artery*.—**A. hæmorrhoidalis media.** See *Middle hæmorrhoidal artery*.—**A. hæmorrhoidalis superior.** See *Superior hæmorrhoidal artery*.—**Arteriæ helicinae.** See *Helicine arteries*.—**A. hepatica.** See *Hepatic artery*.—**A. hepatica communis.** See *Common hepatic artery*.—**A. hepatica dextra.** See *Right hepatic artery*.—**A. hepatica propria.** See *Hepatic artery*.—**A. hepatica sinistra.** See *Left hepatic artery*.—**A. humeraria.** See *Brachial artery*.—**A. humeri profunda.** See *Superior profunda artery of the arm*.—**A. hyaloidea.** See *Hyaloid artery*.—**A. hyoidea.** See *Hypoid artery*.—**A. hypogastrica.** See *Internal iliac artery*.—**A. ileo-cæcalis.** See *Ileo-cæcal artery*.—**A. ileo-colica.** See *Ileo-colic artery*.—**A. ileo-colica dextra media.** See *Right colic artery*.—**Arteriæ iliaca.** See *Iliac arteries*.—**A. iliaca anterior.** See *Internal iliac artery*.—**A. iliaca communis.** See *Common iliac artery*.—**A. iliaca cruralis.** See *External iliac artery*.—**A. iliaca femoris.** See *Superficial femoral artery*.—**A. iliaca hypogastrica (seu interna).** See *Internal iliac artery*.—**A. iliaca parva.** See *Ilio-lumbar artery*.—**A. iliaca posterior.** See *Gluteal artery*.—**A. iliaca primitiva.** See *Common iliac artery*.—**A. ilio-lumbaris.** See *Ilio-lumbar artery*.—**A. ilii profundissima.** A branch of the gluteal artery to the hip joint. [L. 7.]—**A. incisiva.** Fr., *artère incisive*. One of the terminal branches of the inferior dental artery, which supplies the lower incisor teeth. [L. 31.]—**A. indicis radialis dorsalis.** See *A. dorsalis radialis indicis*.—**A. indicis radialis volaris.** See *A. volaris radialis indicis*.—**A. inferior lingue.** See *Ranine artery*.—**A. infra-orbitalis.** See *Infra-orbital artery*.—**A. infrascapularis.** See *Infrascapular artery*.—**Arteriæ inguinales.** Fr., *artères inguinales*. Branches of the common femoral artery to the inguinal region. [L. 7.]—**A. innominata.** See *Innominate artery*.—**Arteriæ intercostales anteriores.** See *Anterior intercostal arteries*.—**Arteriæ intercostales aorticae (seu inferiores, seu posteriores).** See *Aortic intercostal arteries*.—**A. intercostalis prima.** See *Superior intercostal artery*.—**A. intercostalis secunda.** The second intercostal artery. [L. 115.]—**A. intercostalis superior (seu suprema).** See *Superior intercostal artery*.—**Arteriæ intermetacarpæe dorsales.** See *Dorsal interosseous arteries of the hand*.—**Arteriæ intermetacarpæe volares.** See *Palmar interosseous arteries*.—**Arteriæ intermetatarsæe dorsales.** See *Dorsal interosseous arteries of the foot*.—**A. interossea accessoria.** An adomalous branch of the interosseous artery of the forearm which descends into the palm of the hand, gives off branches to the index-finger and the thumb, and assists in forming the superficial palmar arch. [L. 31.]—**A. interossea anterior.** See *Anterior interosseous artery of the forearm*.—**A. interossea anterior dorsalis.** A branch of the anterior interosseous artery of the forearm which pierces the interosseous membrane and assists in forming the rete carpeum dorsale. [L. 31.]—**A. interossea anterior volaris.** A branch of the anterior interosseous artery of the arm which descends to assist in forming the rete carpeum volare. [L. 31.]—**A. interossea antibrachii communis.** See *Common interosseous artery of the forearm*.—**A. interossea antibrachii externa.** See *Posterior interosseous artery of the forearm*.—**A. interossea antibrachii interna.** See *Anterior interosseous artery of the forearm*.—**A. interossea antibrachii posterior.** See *Posterior interosseous artery of the forearm*.—**A. interossea antibrachii**

nasal ARTERY.—*A. nasalis externa*. See *A. nasalis lateralis posterior* and *Lateral nasal ARTERY*.—*A. nasalis lateralis*. See *Lateral nasal ARTERY*.—*A. nasalis lateralis posterior*. A branch of the sphenopalatine artery to the mucous membrane of the upper part of the nose. [L. 117.]—*A. nasalis media*. See *Middle nasal ARTERY*.—*A. nasalis posterior*. See *Sphenopalatine artery*.—*A. nasalis posterior externa*. See *Sphenopalatine ARTERY*.—*A. naso-frontalis*. A name applied to the ophthalmic artery beyond the point at which it gives off the supra-orbital artery. [L. 31.]—*A. naso-palatina*. See *Naso-palatine ARTERY*.—*A. nervi acustici*. See *Internal auditory ARTERY*.—*A. nervi mediani*. See *Median ARTERY*.—*A. nutritia brachii (magna)*. See *Nutrient ARTERY of the os brachii*.—*Arterie nutritia pelvis*. Small branches of the renal artery to the pelvis of the kidney. [Hyrtl (L. 31).]—*A. nutritia femoris*. See *Nutrient ARTERY of the femur*.—*A. nutritia femoris inferior (seu magna)*. See *First perforating ARTERY of the thigh*.—*A. nutritia femoris superior*. See *Superior nutrient ARTERY of the femur*.—*A. nutritia fibulae (seu fibularis)*. See *Nutrient ARTERY of the fibula*.—*A. nutritia humeri*. See *Nutrient ARTERY of the os brachii*.—*A. nutritia ili*. A branch of the gluteal artery to the ilium. [L. 31.]—*A. nutritia magna humeri*. See *Nutrient ARTERY of the os brachii*.—*A. nutritia radii*. See *Nutrient ARTERY of the radius*.—*A. nutritia magna tibiae*. A. nutritia tibiae inferior. See *Nutrient ARTERY of the tibia*.—*A. nutritia tibiae inferior*. A branch of the posterior tibial artery entering the tibia through the nutrient foramen. [L. 174.]—*A. nutritia tibiae magna*. See *Nutrient ARTERY of the tibia*.—*A. nutritia tibiae posterior*. See *Posterior tibial recurrent ARTERY*.—*A. nutritia tibiae superior*. A branch of the posterior tibial artery to the tibia. [L. 175.]—*A. nutritia ulnae*. See *Nutrient ARTERY of the ulna*.—*A. nutritius radii*. See *Nutrient ARTERY of the radius*.—*A. obturatoria*. See *Obturator ARTERY*.—*A. occipitalis*. See *Occipital ARTERY*.—*Arterie oesophageae*. See *Oesophageal ARTERIES*.—*Arterie oesophageae inferiores*. Branches of the coronary artery of the stomach to the oesophagus. [L. 31.]—*Arterie omphalo-mesentericae*. See *Omphalo-mesenteric ARTERIES*.—*A. ophthalmica*. See *Ophthalmic ARTERY*.—*A. ovarii*. See *Ovarian ARTERY*.—*A. palatina anterior*. See *Anterior palatine ARTERY*.—*A. palatina ascendens*. See *Inferior palatine ARTERY*.—*A. palatina descendens*. See *Descending palatine ARTERY*.—*A. palatina inferior*. See *Inferior palatine ARTERY*.—*A. palatina major*. See *Anterior palatine ARTERY*.—*Arterie palatine minores*. See *Arterie velli palati*.—*A. palatina superior*. See *Superior palatine ARTERY*.—*A. palmaris*. See *Palmar ARTERY*.—*Arterie palpebrales externae*. See *External palpebral ARTERIES*.—*Arterie palpebrales internae*. See *Internal palpebral ARTERIES*.—*A. palpebralis inferior*. See *Inferior palpebral ARTERY*.—*A. palpebralis lateralis inferior*. See *Inferior palpebral ARTERY*.—*A. palpebralis superior*. See *Superior palpebral ARTERY*.—*A. palpebralis medialis inferior*. The branch of the naso-frontal artery to the lower lid. [L. 31.]—*A. palpebralis medialis superior*. The branch of the naso-frontal artery to the upper lid. [L. 31.]—*A. palpebralis superior*. See *Superior palpebral ARTERY*.—*Arterie pancreatica mediae*. Branches of the hepatic artery to the pancreas. [L. 31.]—*Arterie pancreatica parvae*. Small branches of the splenic artery distributed to the pancreas. [L. 172.]—*A. pancreatica magna (seu suprema)*. Fr., *artère pancréatique supérieure*. A branch of the splenic artery which runs along the posterior surface of the pancreas following the course of the pancreatic duct. [L. 35, 172.]—*A. pancreatico-duodenalis inferior*. See *Inferior pancreaticoduodenal ARTERY*.—*A. pancreatico-duodenalis superior*. See *Superior pancreaticoduodenal ARTERY*.—*Arterie parotidæae*. Fr., *artères parotidiennes*. Branches of the external carotid artery to the parotid gland. [L. 31.]—*A. pediacæ*. *A. pediacæ interna*. See *Dorsal ARTERY of the foot*.—*A. pelvica*. See *Internal iliac ARTERY*.—*A. penis profunda*. See *ARTERY of the corpus cavernosum*.—*A. perforans antibrachii inferior*. See *A. perforans femoris prima*. See *First perforating ARTERY of the thigh*.—*A. perforans femoris secunda*. See *Second perforating ARTERY of the thigh*.—*A. perforans femoris tertia (seu ultima)*. See *Third perforating ARTERY of the thigh*.—*A. perforans pedis posterior prima*. See *Deep plantar ARTERY*.—*Arterie perforantes arcus plantaris*. See *Anterior and Posterior perforating ARTERIES of the foot*.—*Arterie perforantes pedis anteriores*. See *Anterior perforating ARTERIES of the foot*.—*Arterie perforantes pedis posteriores*. See *Posterior perforating ARTERIES of the foot*.—*A. pericardiaca ascendens*. *A. pericardiaca descendens (seu inferior)*. See *Superior phrenic ARTERY*.—*Arterie pericardiaca posteriores*. Branches of the thoracic aorta to the posterior surface of the pericardium. [L. 31.]—*A. pericardiaca phrenica (seu superior)*. See *Superior phrenic ARTERY*.—*A. perinaealis inferior*. See *Superficial perineal ARTERY*.—*A. perinae superficialis*. See *Superficial perineal ARTERY*.—*A. perinae transversa*. See *Transverse perineal ARTERY*.—*A. peronea*. See *Peroneal ARTERY*.—*A. peronea communis (seu descendens)*. See *Peroneal ARTERY*.—*A. peronea perforans*. See *Anterior peroneal ARTERY*.—*A. peronea posterior*. See *Posterior peroneal ARTERY*.—*A. petrosa*. Fr., *artère pétreuse*. Ger., *Felsenbeinpulsader*. A branch of the internal maxillary artery to the tensor tympani muscle, which anastomoses with the stylo-mastoid artery. [L. 7.]—*A. pharyngea ascendens*. See *Ascending pharyngeal ARTERY*.—*A. pharyngea inferior*. See *Ascending pharyngeal ARTERY*.—*A. pharyngea suprema*. See *Pterygo-palatine ARTERY*.—*A. pharyngo-basilaris*. *A. pharyngo-meningea*. See *Ascending pharyngeal ARTERY*.—*A. pharyngo-palatina*. See *Inferior palatine ARTERY*.—*Arterie phrenice in-*

*feriores (seu magne)*. See *Inferior phrenic ARTERIES*.—*Arterie phrenice posteriores*. See *Posterior phrenic ARTERIES*.—*Arterie phrenice principes*. See *Inferior phrenic ARTERIES*.—*A. phrenico-costalis*. See *Musculo-phrenic ARTERY*.—*A. phrenico-pericardiaca*. See *Superior phrenic ARTERY*.—*Arterie pinnules*. Branches of the coronary artery of the upper lip to the ala of the nose. [L. 175.]—*A. plantaris*. See *Plantar ARTERY*.—*A. plantaris externa*. See *External plantar ARTERY*.—*A. plantaris externa digiti medii*. Ger., *äussere Fusssohlenpulsader der dritten Zehe*. The plantar digital artery on the fibular side of the third toe. [L. 174.]—*A. plantaris externa digiti minimi*. Ger., *äussere Fusssohlenpulsader der kleinen Zehe*. See *A. plantaris lateralis digiti quinti*.—*A. plantaris externa digiti quarti*. Ger., *äussere Fusssohlenpulsader der vierten Zehe*. The plantar digital artery on the fibular side of the fourth toe. [L. 174.]—*A. plantaris externa digiti secundi*. Ger., *äussere Fusssohlenpulsader der zweiten Zehe*. The plantar digital artery on the fibular side of the second toe. [L. 175.]—*A. plantaris externa hallucis*. Ger., *äussere Fusssohlenpulsader der grossen Zehe*. The plantar digital artery on the fibular side of the great toe. [L. 174.]—*A. plantaris externa parva*. See *A. plantaris medialis*.—*A. plantaris interna*. See *Internal plantar ARTERY*.—*A. plantaris interna digiti medii*. Ger., *innere Fusssohlenpulsader der dritten Zehe*. The plantar digital artery on the tibial side of the third toe. [L. 174.]—*A. plantaris interna digiti quarti*. Ger., *innere Fusssohlenpulsader der vierten Zehe*. The plantar digital artery on the tibial side of the fourth toe. [L. 174.]—*A. plantaris interna digiti quinti*. Ger., *innere Fusssohlenpulsader der kleinen Zehe*. The plantar digital artery on the tibial side of the little toe. [L. 174.]—*A. plantaris interna digiti secundi*. Ger., *innere Fusssohlenpulsader der zweiten Zehe*. The plantar digital artery on the tibial side of the second toe. [L. 174.]—*A. plantaris interna digiti tertii*. Ger., *innere Fusssohlenpulsader der dritten Zehe*. The plantar digital artery on the tibial side of the third toe. [L. 174.]—*A. plantaris interna hallucis*. See *A. digitalis medialis hallucis*.—*A. plantaris lateralis*. See *External plantar ARTERY*.—*A. plantaris lateralis digiti quinti*. A branch of the external plantar artery to the outer side of the little toe. [L. 117.]—*A. plantaris medialis*. See *Internal plantar ARTERY*.—*A. plantaris profunda*. See *A. anastomotica pedis*.—*A. plicæ cubiti superficialis*. Ger., *oberflächliche Ellenbogenpulsader*. A branch of the radial artery running beneath the bicipital aponeurosis and distributed to the pronator radii teres, the palmaris longus, and the flexor muscles of the forearm. [L. 115.]—*A. pollicis magna (seu princeps)*. See *Large ARTERY of the thumb*.—*A. pollicis radialis dorsalis*. See *Inner dorsal ARTERY of the thumb*.—*A. pollicis radialis volaris*. Fr., *artère radio-palmaire du pouce*. Ger., *Speichenhohlpulsader des Daumens*. The branch of the large artery of the thumb running on the radial side of its palmar surface. [L. 7.]—*A. pollicis ulnaris dorsalis*. See *Outer dorsal ARTERY of the thumb*.—*A. pollicis ulnaris volaris*. Fr., *artère cubito-palmaire du pouce*. Ger., *Ellenbogenhohlpulsader des Daumens*. The branch of the large artery of the thumb running on the ulnar side of its palmar surface. [L. 7.]—*A. poplitea (seu poplitea)*. See *Popliteal ARTERY*.—*A. postcerebellaris (Wilder)*. See *Anterior inferior cerebellar ARTERY*.—*A. postcerebellaris (Wilder)*. See *Posterior cerebellar ARTERY*.—*A. postcommunicans (Wilder)*. See *Posterior communicating ARTERY*.—*A. posterior cerebri*. See *Posterior cerebellar ARTERY*.—*A. præcerebellaris (Wilder)*. See *Superior cerebellar ARTERY*.—*A. præcerebellaris (Wilder)*. See *Anterior cerebellar ARTERY*.—*Arterie præchorioidæ (Wilder)*. See *Anterior chorioid ARTERIES*.—*A. præcommunicans (Wilder)*. See *Anterior communicating ARTERY*.—*Arterie præparantes*. See *Internal spermatic ARTERIES*.—*A. princeps pollicis*. See *Large ARTERY of the thumb*.—*A. processus appendicis (seu vermiformis)*. See *Appendicular ARTERY*.—*A. processus xiphoidei*. A branch of the internal mammary artery which, with its fellow of the opposite side, forms a plexus behind the lower part of the sternum. [L. 31.]—*A. profunda brachii inferior*. See *Inferior profunda ARTERY of the arm*.—*A. profunda brachii superior*. See *Superior profunda ARTERY of the arm*.—*A. profunda cerebri*. See *Posterior cerebellar ARTERY*.—*A. profunda cervicis*. 1. A branch of the superior intercostal artery to the deep cervical muscles. [L. 173.] 2. See *Posterior cervical ARTERY*.—*A. profunda clitoridis*. See *Cavernous ARTERY of the clitoris*.—*A. profunda femoris*. See *Deep femoral ARTERY*.—*A. profunda humeri*. See *Superior profunda ARTERY of the arm*.—*A. profunda linguae*. See *Ranine ARTERY*.—*A. profunda penis*. See *ARTERY of the corpus cavernosum*.—*A. profunda volæ*. The termination of the radial artery in the palm of the hand. [L. 31.]—*A. profundissima ili*. A branch of the lateral sacral artery to the peristæum of the acetabulum. [L. 31.]—*Arterie propriæ renales*. Branches of the renal artery which enter the kidney in the columns of Bertin. Two run on each side of each pyramid of Malpighi for its whole length, and divide at its base into the interlobular arteries and the true arterie rectæ. [L. 172.]—*A. pro stapedio*. See *A. stapediti*.—*A. prostatica*. See *Vesico-prostatic ARTERY*.—*Arterie pterygoideæ*. Fr., *artères pterygoïdiennes*. Ger., *Flügelmuskelpulsadern*. Branches of the internal maxillary artery to the pterygoid muscles. [L. 31.]—*A. pterygo-meningea*. See *Small meningial ARTERY*.—*A. pterygo-palatina*. See *Pterygo-palatine ARTERY*.—*A. pubica*. Fr., *artère pubienne*. Ger., *Schambeinpulsader*. A branch of the deep epigastric artery which anastomoses behind the pubes with its fellow of the opposite side. [L. 31.]—*A. pudenda accessoria*. See *Accessory pudic ARTERY*.—*A. pudenda communis*. See *Internal pudic ARTERY*.—*A. pudenda externa prima*. See *Superior external pudic ARTERY*.—*A. pudenda externa secunda*. See *Inferior external pudic ARTERY*.—*A. pudenda externa subaponeurotica*. See *Superior external pudic ARTERY*.—*A. pudenda externa subcutanea*. See *Deep external pudic ARTERY*.—*A. pudenda externa tertia*. Ger., *dritte äussere Schampulsader*. An occasional branch of the

superficial femoral artery distributed to the lower part of the abdomen and to the genital organs. [L, 174.]—*A. pudenda interna*. See *Internal pudic artery*.—*A. pulmonalis*. See *Pulmonary artery*.—*A. pylorica*.—*A. pylorica superior*. See *Pyloric artery* (1st def.).—*A. radialis*. See *Radial artery*.—*A. radialis indicis*. See *Radialis indicis artery*.—*A. radialis recurrentis*. See *Radial recurrent artery*.—*A. radialis volaris indicis*. See *A. indicis radialis volaris*.—*A. radica*. See *Radial artery*.—*Arteriæ radicales*. Lateral branches of the vertebral artery to the medulla spinalis. [L, 31.]—*A. radio-palmaris*. See *Radio-palmar artery*.—*A. ramulus ductus pterygoidei*. See *Pterygoid artery*.—*A. ranina*. See *Ranine artery*.—*A. receptaculi anterior*. See *Anterior artery of the receptacle*.—*A. receptaculi posterior*. See *Posterior artery of the receptacle*.—*Arteriæ rectæ*. The straight arteries of the kidney. The true *arteriæ rectæ* are branches of the *arteriæ propriæ renales* which enter at the bases of the medullary pyramids, and terminate at their apices in venous plexuses. The false *arteriæ rectæ* are straight branches of the efferent vessels of the lowermost glomeruli which pass into the medulla and supply the downward continuations of the medullary rays into the pyramids. [L, 142, 172.]—*A. recurrens radialis*. See *Recurrent radial artery*.—*A. recurrens tibialis*. See *Tibial recurrent artery*.—*A. recurrens tibialis anterior*. See *Anterior tibial recurrent artery*.—*A. recurrens tibialis posterior*. See *Posterior tibial recurrent artery*.—*A. recurrens ulnaris anterior*. See *Anterior ulnar recurrent artery*.—*A. recurrens ulnaris inferior* (seu posterior). See *Posterior ulnar recurrent artery*.—*A. recurrens ulnaris superior*. See *Anterior ulnar recurrent artery*.—*A. renalis*. See *Renal artery*.—*A. renocapsularis*. See *Capsular artery*.—*A. retine centralis*. See *Central retinal artery*.—*A. retrocostalis*. See *A. mammaria interna lateralis*.—*Arteriarum omnium mater*. See *Aorta*.—*Arteriæ sacrales laterales*. See *Lateral sacral arteries*.—*A. sacralis media*. See *Middle sacral artery*.—*A. saphena magna*. An occasional branch of the deep femoral artery which passes down between the adductor magnus and the vastus medius to the ankle, in company with the vena saphena magna. [L, 31.]—*A. saphena parva*. An occasional branch of the popliteal artery which passes to the middle of the calf of the leg, in company with the small saphenous nerve. [L, 31.]—*A. scapulae dorsalis*. See *Posterior scapular artery*.—*A. scapulae transversa*. See *Suprascapular artery*.—*A. scapularis communis*. See *Subscapular artery*.—*A. scapularis externa*. See *Acromial artery*.—*A. scapularis inferior*. See *Subscapular artery*.—*A. scapularis posterior*. See *Posterior scapular artery*.—*A. scapularis propria*. See *Circumflex artery of the scapula*.—*A. scapularis superior*. See *Suprascapular artery*.—*A. scrotalis anterior*. See *Anterior scrotal artery*.—*Arteriæ scrotales posteriores*. See *Posterior scrotal arteries*.—*Arteriæ scrotales posteriores majores*. Branches of the internal pudic artery to the scrotum. [L, 31.]—*Arteriæ scrotales posteriores minores*. Branches of the transverse perineal artery to the scrotum. [L, 31.]—*A. scrotalis anterior secunda*. See *Inferior external pudic artery*.—*Arteriæ seminales*. See *External and Internal spermatic arteries*.—*Arteriæ septales scroti*. Branches of the transverse perineal artery to the septum of the scrotum. [L, 31.]—*A. septi mobili*.—*A. septi narium*. See *Artery of the septum narium*. [L, 115.]—*A. septi narium posterior*. See *Naso-palatine artery*.—*A. septi scroti*. A branch of the internal pudic artery to the septum of the scrotum. [L, 175.]—*A. sigmoidæ*. See *Sigmoid artery*.—*Arteriæ sinus cavernosi*. Branches of the vidian artery to the cavernous sinus. [L, 31.] Cf. *Anterior and Posterior arteries of the receptacle*.—*Arteriæ somniferæ* (seu soporariæ, seu soporariæ). The carotid arteries. [L, 35.]—*A. spermatica deferentialis*. See *Artery of the vas deferens*.—*A. spermatica externa*. See *External spermatic artery*.—*A. spermatica interna*. 1. See *Internal spermatic artery*. 2. A branch of the umbilical artery observed by F. Faesbeck in a double monster. [A, 45.]—*A. spheno-palatina*. See *Spheno-palatine artery*.—*A. spheno-spinosa*. See *Middle meningeal artery*.—*Arteriæ spinales posteriores*. See *Posterior spinal arteries*.—*Arteriæ spinales*. The arteries of the spinal cord. [L, 31.]—*A. spinalis anterior*. See *Anterior spinal artery*.—*A. spinosa*. See *Middle meningeal artery*.—*Arteriæ spirales*. See *Utero-placental arteries*.—*A. splenica*. See *Splenic artery*.—*A. stapedi*. Fr., *artère stapédienne*. Ger., *Steigbügelarterie*. It., *arteria stapediiana*. Sp., *arteria estapedia*. A branch of the stylo-mastoid artery which enters the tympanum just above the fenestra ovalis. [F.]—*Arteriæ sternales anteriores*. The terminations of the perforating branches of the internal mammary artery which are distributed to the anterior surface of the sternum. [L, 31.]—*Arteriæ sternales posteriores*. Branches of the internal mammary artery distributed to the posterior surface of the sternum. [L, 32.]—*A. sternalis*. See *Internal mammary artery*.—*A. sterno-cleido-mastoidea*. A branch of the external carotid artery to the sterno-cleido-mastoid muscle. [L, 31.]—*A. stylo-mastoidea*. See *Stylo-mastoid artery*.—*A. subclavia*. See *Subclavian artery*.—*A. subcostalis*. See *A. mammaria interna lateralis*.—*A. subcutanea malæ*. Fr., *artère malaire*. A branch of the deep anterior temporal or internal maxillary artery, which accompanies the malar cutaneous nerve and is distributed to the upper portion of the face. [L, 7.]—*A. sublingualis*. See *Sublingual artery*.—*A. submental*. See *Submental artery*.—*A. subscapularis*. See *Subscapular artery*.—*A. superciliaris*. Fr., *artère sourcilière*. A branch of the frontal artery distributed to the superciliary region. [L, 7.]—*A. superficialis pedis interna*. A branch of the internal plantar artery which anastomoses with the internal tarsal artery and is distributed to the tibial side of the great toe. [L, 175.]—*A. superficialis pedis medialis*. A branch of the internal plantar artery distributed to the fibular side of the great toe. [L, 31.]—*A.*

*superficialis volæ*. See *Superficial volar artery*.—*A. supra-costalis*. See *Collateral intercostal artery*.—*A. supramaxillaris*. See *Superior dental artery*.—*A. suprametatarsæ*. See *Metatarsal artery*.—*A. supra-orbitalis*. See *Supra-orbital artery*.—*A. supra-orbitalis externa*. Fr., *artère sus-orbitaire externe*. A branch of the superficial temporal artery distributed to the region of the zygoma. [L, 31.]—*A. suprarenalis aortica*. See *Capsular artery*.—*Arteriæ suprarenales inferiores*. See *Inferior suprarenal arteries*.—*A. suprarenalis media*. See *Capsular artery*.—*A. suprarenalis superior*. See *Superior suprarenal artery*.—*A. suprascapularis*. See *Suprascapular artery*.—*A. supraspinata*. See *Supraspinous artery*.—*A. supratarsæ*. See *Metatarsal artery*.—*A. supratarsæ externa*. See *External tarsal artery*.—*A. supratarsæ interna*. A branch of the dorsal artery of the foot distributed to the tibial side of the great toe. [L, 31.]—*A. supratrochlearis*. A branch of the ophthalmic artery distributed to the upper eyelid. [L, 31.]—*Arteriæ surales*. See *Sural arteries*.—*Arteriæ surales laterales*. See *Superficial sural arteries*.—*Arteriæ surales mediales*. Branches of the popliteal artery to the upper part of the sural muscles. [L, 31.]—*Arteriæ surales profundæ*. See *Deep sural arteries*.—*Arteriæ surales superficiales*. See *Superficial sural arteries*.—*A. sylviana*. See *Middle cerebral artery*.—*A. tarsæ externa*. See *External tarsal artery*.—*A. tarsæ externa anterior*. See *Metatarsal artery*.—*A. tarsæ externa posterior*. See *Tarsal artery*.—*A. tarsæ interna*. See *Internal tarsal artery*.—*A. tarsæ lateralis anterior*. See *Metatarsal artery*.—*A. tarsæ lateralis posterior*. See *External tarsal artery*.—*Arteriæ temporales retinæ inferiores*. The lower retinal arteries on the temporal side of the optic nerve. [L, 31.]—*Arteriæ temporales retinæ superiores*. The upper retinal arteries on the temporal side of the optic nerve. [L, 31.]—*A. temporalis anterior*. See *Anterior temporal artery*.—*A. temporalis externa*. See *Posterior temporal artery*.—*A. temporalis frontalis* (seu interna). See *Anterior temporal artery*.—*A. temporalis media*. See *Middle temporal artery*.—*A. temporalis occipitalis*. See *Posterior temporal artery*.—*A. temporalis profunda anterior*. See *Deep anterior temporal artery*.—*A. temporalis profunda posterior* (seu prima). See *Posterior temporal artery*.—*A. temporalis secunda*. See *Deep anterior temporal artery*.—*A. temporalis superficialis*.—*A. temporalis superficialis anterior* (seu frontalis). See *Anterior temporal artery*.—*A. temporalis superficialis occipitalis* (seu posterior). A branch of the occipital artery distributed to the occipital region. [L, 31.]—*A. temporalis superior*. See *Posterior temporal artery*.—*A. termatica*. See *Termatic artery*.—*A. testicularis*. See *Internal spermatic artery*.—*A. testis externa*. See *External spermatic artery*.—*A. thoracica acromialis*. See *Acromio-thoracic artery*.—*A. thoracica alaris*. See *Alar thoracic artery* and *Subscapular artery*.—*A. thoracica anterior*. Fr., *artère thoracique antérieure*. The external branch of the acromio-thoracic artery. [L, 114.]—*A. thoracica axillaris*. See *Alar thoracic artery* and *Subscapular artery*.—*A. thoracica externa*.—*A. thoracica externa inferior*. See *External mammary artery*.—*A. thoracica externa secunda*. See *Acromio-thoracic artery*.—*A. thoracica externa tertia*. See *External mammary artery*.—*A. thoracica humeralis* (seu humeralia). See *Acromio-thoracic artery*.—*A. thoracica inferior*. See *External mammary artery*.—*A. thoracica interna*.—*A. thoracica interna longa*. See *Internal mammary artery*.—*A. thoracica longa*. See *External mammary artery* and *A. thoracico-dorsalis*.—*A. thoracica major*. See *External mammary artery*.—*A. thoracica mammaria*. See *Internal mammary artery*.—*A. thoracica media*. See *Acromio-thoracic artery*.—*A. thoracica minor*. See *Superior thoracic artery*.—*A. thoracica posterior*. See *A. thoracico-dorsalis*.—*A. thoracica prima*. See *Superficial perineal artery*.—*A. trochanterica*.—*A. trochanterica ante-*

**rior.** Fr., *artère trochanterienne*. A branch of the internal circumflex artery of the thigh distributed to the muscles in the neighborhood of the great trochanter. [L, 7].—**A. tubaria.** Fr., *artère tubaire*. Ger., *Trompetenpulsader*. A branch of the uterine artery to the oviduct. [L, 31].—**A. tunica vaginalis communis.** See *External spermatic ARTERY*.—**A. tympanica.** See *Tympanic ARTERY*.—**A. tympanica inferior.** Fr., *artère tympanique inférieure*. Ger., *untere Trommelfellpulsader*. A branch of the internal maxillary or of the deep auricular artery which enters the tympanum through the Glaserian fissure. [L, 7].—**A. tympanica superior.** Fr., *artère tympanique supérieure*. Ger., *obere Trommelfellpulsader*. A branch of the stylo-mastoid artery which enters the cavity of the ear in company with the chorda tympani and is distributed to the tympanum. [L, 7].—**A. ulnaris.** See *Ulnar ARTERY*.—**A. ulnaris accessoria.** An anomalous artery formed by the bifurcation of the ulnar artery at a high point in the forearm. [L, 31].—**A. ulnaris digiti minimi.** See *A. ulnaris digiti quinti ulnaris*.—**A. ulnaris superficialis.** See *A. ulnaris accessoria*.—**A. ulnaris volaris digiti minimi.** See *A. volaris digiti quinti ulnaris*.—**Arterie umbilicalis.** See *Umbilical ARTERIES*.—**A. umbilicalis accessoria.** A term applied by Krause to a delicate filament observed by Oslander in a case where there was only one umbilical artery, which filament appeared to be an artery running, free from the mesentery, to that part of the peritoneum where the umbilical artery was lacking. [A, 43].—**A. urethralis.** A branch of the artery of the penis distributed to the urethra. [L, 31].—**A. ureterica superior.** A branch of the abdominal aorta to the upper part of the ureter. [L, 31].—**Arterie uterinae.** See *Uterine ARTERIES*.—**A. uterina aortica.** See *Aortic uterine ARTERY*.—**A. uterina hypogastrica.** See *Hypogastric uterine ARTERY*.—**A. utero-ovarica.** See *Utero-ovarian ARTERY*.—**A. vaginalis.** See *Vaginal ARTERY*.—**A. vasis deferentis.**—**A. vasis deferentialis.** See *ARTERY of the vas deferens*.—**A. vasta posterior.**—**A. vasta posterior profunda.** See *Deep femoral ARTERY*.—**Arterie velli palati (seu palatini).** Branches of the pterygo-palatine artery to the upper part of the pharynx and to the palate. [L, 31].—**A. venosa.** A term applied to the pulmonary vein by Harvey. [H, 12].—**Arterie ventriculi breves.** Branches of the splenic artery to the stomach. [L, 175].—**Arterie vertebrales posteriores.** See *Primitive AORTA*.—**A. vertebralis.** See *Vertebral ARTERY*.—**A. vertebralis ascendens.** See *Ascending cervical ARTERY*.—**A. vertebralis impar.** A forward continuation of the subvertebral aorta in certain of the lower *Vertebrata*. [L, 176].—**A. vesicalis media.** See *Middle vesical ARTERY*.—**Arterie vesicales superiores (seu supreme).** See *Superior vesical ARTERIES*.—**A. vesicalis inferior (seu infima).** See *Inferior vesical ARTERY*.—**A. vesicalis superior.** See *Superior vesical ARTERY*.—**A. vesico-prostatica.** See *Vesico-prostatic ARTERY*.—**A. vesico-vaginalis.** See *Vesico-vaginal ARTERY*.—**A. vestibuli.** A branch of the internal auditory artery to the labyrinth. [L, 31].—**A. vidiana.** See *Vidian ARTERY*.—**A. vitrea.** See *Hyaloid ARTERY*.—**A. volae superficialis.** See *Superficial volar ARTERY*.—**Arterie volares carpi.** See *Anterior carpal ARTERIES*.—**A. volaris digiti quinti ulnaris.** A branch of the deep palmar arch or of the ulnar artery to the ulnar side of the palmar surface of the little finger. [L, 117].—**A. volaris indicis.** See *A. radialis indicis*.—**A. volaris manus ulnaris.** See *A. metacarpea volaris ulnaris*.—**A. volaris profunda pollicis ulnaris.** The termination of the large artery of the thumb on the ulnar side. [L, 174].—**A. volaris pollicis radialis.** One of the terminal branches of the large artery of the thumb on the radial side. [L, 175].—**A. volaris profunda radialis.** See *A. metacarpea volaris radialis profunda*.—**A. volaris profunda ulnaris.** See *Ulnar profunda ARTERY of the hand*.—**A. volaris radialis digiti annularis.** The palmar digital artery on the radial side of the ring finger. [L, 174].—**A. volaris radialis digiti medii.** The palmar digital artery on the radial side of the middle finger. [L, 174].—**A. volaris radialis digiti minimi.** The palmar digital artery on the radial side of the little finger. [L, 174].—**A. volaris digiti quarti.** See *A. volaris radialis digiti annularis*.—**A. volaris radialis digiti quinti.** See *A. volaris radialis digiti minimi*.—**A. volaris radialis digiti secundi.** See *A. volaris radialis digiti secundi*.—**A. volaris radialis indicis.** The palmar digital artery on the radial side of the index finger. [L, 174].—**A. volaris superficialis.** See *Superficial volar ARTERY*.—**A. volaris ulnaris digiti medii.** The palmar digital artery on the ulnar side of the middle finger. [L, 174].—**A. volaris ulnaris digiti minimi.** See *A. volaris digiti quinti ulnaris*.—**A. volaris ulnaris digiti quarti.** The palmar digital artery on the ulnar side of the fourth finger. [L, 174].—**A. volaris ulnaris digiti tertii.** The palmar digital artery on the ulnar side of the third finger. [L, 174].—**A. volaris ulnaris indicis.** The palmar digital artery on the ulnar side of the index finger. [L, 174].—**A. volaris ulnaris pollicis.** See *A. volaris pollicis ulnaris*.—**A. Willisii.** See *Posterior communicating ARTERY of the brain*.—**A. zygomatio-orbitalis.** See *A. supra-orbitalis externa*.—**Aspera a.** See *TRACHEA*.

**ARTERIAL**, adj. A<sup>3</sup>r-te-ri<sup>2</sup>a-<sup>2</sup>k. Gr., ἀρτηριακός. Lat., *arteriacus*. Fr., *artériaque*. Relating to or affecting the arteries or the trachea; as a n. pl. remedies which are used in diseases of the arteries or trachea. [L, 43, 50, 105.]

**ARTERIALIA**, **ARTERIALIAE** (Lat.), n's. A<sup>3</sup>r-te-ri<sup>2</sup>-i(e)<sup>2</sup>a<sup>3</sup>ka<sup>3</sup>, -se(ka). See *TRACHEA*.

**ARTERN** (Ger.), n. A<sup>3</sup>r-te-ri<sup>2</sup>n. A village in Prussia, where there is a weak mineral spring. [L, 105.]

**ARTERIALAL**, adj. A<sup>3</sup>r-te-ri<sup>2</sup>-a<sup>3</sup>ka<sup>3</sup>l. See *ARTERIAL*.

**ARTERIALGRA** (Lat.), n. f. A<sup>3</sup>r-te-ri<sup>2</sup>-i(e)<sup>2</sup>a<sup>3</sup>-gra<sup>3</sup>. From ἀρτηρία, an artery, and ἄγχα, a seizure. Fr., *artériagre*. Ger., *Schlagaderschmerz*. 1. Pain in an artery. [M, 13.] 2. Alteration in an artery due to the gouty diathesis. [D, 142.]

**ARTERIAL**, adj. A<sup>3</sup>r-te-ri<sup>2</sup>-a<sup>2</sup>l. Lat., *arterialis*. Fr., *arté-*

*riel*. Ger., *arteriell*, *arteriös*. It., *arterioso*. Sp., *arterial*. 1. Pertaining to the arteries or their contents. 2. Pertaining to blood containing a relatively large amount of oxygen and a relatively small amount of carbon dioxide. [I.]

**ARTÉRIALITÉ** (Fr.), n. A<sup>3</sup>r-te-ri<sup>2</sup>-a<sup>2</sup>l-i<sup>2</sup>-ta. See *ARTERIOSITY*.

**ARTERIALIZATION**, n. A<sup>3</sup>r-te-ri<sup>2</sup>-a<sup>2</sup>l-i<sup>2</sup>-z-a<sup>3</sup>shu<sup>3</sup>n. Lat., *arterialisatio*. Fr., *arterialisation*. Ger., *Arterialisierung*. The transformation of dark-red venous into bright-red arterial blood during its passage through the lungs, gills, or any respiratory apparatus. This transformation consists in the removal of carbon dioxide from the blood and the addition of oxygen. [I.]

**ARTÉRIARCTIE** (Fr.), n. A<sup>3</sup>r-te-ri<sup>2</sup>-a<sup>2</sup>rk-te. The condition of contraction in an artery. [L.]

**ARTERIASIS** (Lat.), n. f. A<sup>3</sup>r-te-ri<sup>2</sup>-a<sup>2</sup>(n)<sup>2</sup>si<sup>2</sup>s. Gen., *arteriasios* (-sis). It., *arteriasi*. A term applied by Zannini to atheromatous and calcareous degeneration of an artery, sometimes falsely termed ossification. [D, 76.]

**ARTERIE** (Ger.), n. A<sup>3</sup>r-te-ri<sup>2</sup>e. See *ARTERY*, and, for subheadings not given here, see *PULSADER* and *SCHLAGADER*.—**Absteigende Gaumen'a.** See *Descending palatine ARTERY*.—**Ach-sela.** See *Arillary ARTERY*.—**Alara's.** See *Alar thoracic ARTERY*.—**Antlitza.** See *Facial ARTERY*.—**Aortaena.** See *AORTA*.—**Aorten-intercostala'n.** **Aortenzwischenrippenna'n.** See *Aortic intercostal ARTERIES*.—**Arma.** See *Brachial ARTERY*.—**A. der Scheidenhaut.** See *External spermatic ARTERY*.—**A. des eirunden Beckenlochs.** See *Obturator ARTERY*.—**A. des Glaskörpers.** See *Hyaloid ARTERY*.—**A. des oberen Augenlids.** See *Superior palpebral ARTERY*.—**A. des unteren Augenlids.** See *Inferior palpebral ARTERY*.—**A. des Zungenrückens.** See *Dorsal ARTERY of the tongue*.—**A'ectasia.** **A'ektasia.** See *ARTERIECTASIS*.—**A'n-blut.** Arterial blood. ARTERIECTASIS (Lat.), n. f. A<sup>3</sup>r-te(ta)-ri<sup>2</sup>e-k'ta<sup>3</sup>-si<sup>2</sup>s. Gen., arteriectas'es (-ec'tasis). From *arteria*, an artery, and *ectasis*, dilatation. Fr., *arteriectasie*. Ger., *Arterienausdehnung*. Dilatation of an artery, as by aneurysm, or of a number of arteries. [A, 322.]

ARTERIECTOPIA (Lat.), n. f. A<sup>3</sup>r-te(ta)-ri<sup>2</sup>e-k'to-pi<sup>2</sup>-a<sup>3</sup>. From *arteria*, an artery, and *ectopios*, out of the way. Fr., *arteriectopie*. 1. An abnormal course of an artery. [L, 50.] 2. The displacement of an artery from its original situation. [L, 50.]

ARTERIECTOPICUS (Lat.), adj. A<sup>3</sup>r-te(ta)-ri<sup>2</sup>e-k'to-pi<sup>2</sup>-i<sup>2</sup>k-u<sup>3</sup>s(u<sup>3</sup>s). Pertaining to arteriectopia. [D, 80.]

ARTERIEURYSMA (Lat.), n. n. A<sup>3</sup>r-te(ta)-ri-u<sup>2</sup>-ri<sup>2</sup>z(ru<sup>3</sup>s)/ma<sup>3</sup>. Gen., *arterieurysmatos* (-tis). From *arteria*, an artery, and *eurysma*, dilatation. Fr., *artérievrysme*. See ANEURYSM.

ARTERIEURYSMATICUS (Lat.), adj. A<sup>3</sup>r-te(ta)-ri<sup>2</sup>u<sup>2</sup>-ri<sup>2</sup>z(ru<sup>3</sup>s)-ma<sup>3</sup>(tu<sup>3</sup>)/i<sup>2</sup>k-u<sup>3</sup>s(u<sup>3</sup>s). See ANEURYSMAL.

ARTERITIS (Lat.), n. f. A<sup>3</sup>r-te(ta)-ri<sup>2</sup>i-(e)/ti<sup>2</sup>s. Gen., *arteri-it'idis*. See ARTERITIS.

ARTERIOARCTIA (Lat.), n. f. A<sup>3</sup>r-te(ta)-ri<sup>2</sup>-o-a<sup>3</sup>rk'shi<sup>2</sup>(ti<sup>2</sup>)-a<sup>3</sup>. From *arteria*, an artery, and *arctare*, to compress. Fr., *artériarctie* [Piorry]. See ARTERIOSTENOSIS.

ARTERIO-CAPILLARY, adj. A<sup>3</sup>r-te'/ri<sup>2</sup>-o-ka<sup>2</sup>p'i<sup>2</sup>l-la-ri<sup>2</sup>. Pertaining to the arterioles and the capillaries. See A.-c. FIBROSIS.

ARTERIOCHALASIS (Lat.), n. f. A<sup>3</sup>r-te(ta)-ri<sup>2</sup>-o-(o<sup>2</sup>)-ka<sup>2</sup>l-(ch'a<sup>3</sup>l)/a<sup>3</sup>-si<sup>2</sup>s. Gen., *arteriochala'seosis* (-sis). From *arteria*, an artery, and *chalasis* (from *χαλᾶν*), relaxation. Fr., *arteriochalasie*. Atony of the arteries. [D, 112.]

ARTERIOCHALASTICUS (Lat.), adj. A<sup>3</sup>r-te(ta)-ri<sup>2</sup>-o-(o<sup>2</sup>)-ka<sup>2</sup>l-(ch'a<sup>3</sup>l)/a<sup>3</sup>-si<sup>2</sup>s(a<sup>3</sup>s)/ti<sup>2</sup>k-u<sup>3</sup>s(u<sup>3</sup>s). Pertaining to arteriochhalasis. [D, 80.]

ARTERIOIDES (Lat.), adj. A<sup>3</sup>r-te(ta)-ri<sup>2</sup>-o-dez(de<sup>2</sup>s). Gr., *ἀρτηριοειδής* (from *ἀρτηρία*, an artery, and *εἶδος*, resemblance). Resembling an artery. [D, 80.]

ARTERIODIALYSIS (Lat.), n. f. A<sup>3</sup>r-te(ta)-ri<sup>2</sup>-o-di(de)-a<sup>3</sup>l-(a<sup>3</sup>l)/i<sup>2</sup>u<sup>3</sup>-si<sup>2</sup>s. Gen., *arteriodialys'es* (-al'ysis). From *arteria*, an artery, and *διαλύσις*, dissolution. Fr., *arteriodialyse*. Attenuation of the walls of an artery, with or without rupture. [A, 322.]

ARTERIODIALYTICUS (Lat.), adj. A<sup>3</sup>r-te(ta)-ri<sup>2</sup>-o-di(de)-a<sup>3</sup>-li<sup>2</sup>(tu<sup>3</sup>)/i<sup>2</sup>k-u<sup>3</sup>s(u<sup>3</sup>s). Pertaining to arteriodialysis. [L, 50.]

ARTERIODIASTASIS (Lat.), n. f. A<sup>3</sup>r-te(ta)-ri<sup>2</sup>-o-di(de)-a<sup>3</sup>st-(a<sup>3</sup>st)/a<sup>3</sup>-si<sup>2</sup>s. Gen., *arteriodiast'a'seos* (-ast'asis). From *ἀρτηρία*, an artery, and *διαστασις*, a separation. Fr., *arteriodiastase*. 1. The retraction of the two ends of a divided artery. [L, 50.] 2. A divergence of two arteries that normally lie near each other. [L, 50.] 3. Arteriectopia. [Ludwig [L, 50].]

ARTERIODIASTATICUS (Lat.), adj. A<sup>3</sup>r-te(ta)-ri<sup>2</sup>-o-di(de)-a<sup>3</sup>s(a<sup>3</sup>s)-ta<sup>2</sup>t(ta<sup>2</sup>t)/i<sup>2</sup>k-u<sup>3</sup>s(u<sup>3</sup>s). Pertaining to arteriodiastasis. [D, 80.]

ARTERIODIPLOPIESMUS (Lat.), n. m. A<sup>3</sup>r-te(ta)-ri<sup>2</sup>-o-di<sup>2</sup>p-lo-pi<sup>2</sup>-e<sup>2</sup>z(e<sup>2</sup>s)/mu<sup>3</sup>s(mu<sup>3</sup>s). From *ἀρτηρία*, an artery, *διπλός*, twofold, and *πνέσιμος* (from *πνέειν*), pressure. Fr., *arteriodiplopiésme*. A procedure recommended by Leroy d'Étiolles for securing rapid coagulation of the blood in a portion of an artery situated between two different points at which pressure is made simultaneously. [D, 80.]

ARTERIODOMUM (Lat.), n. n. A<sup>3</sup>r-te(ta)-ri<sup>2</sup>-o-d'o-mu<sup>3</sup>m-(mu<sup>3</sup>m). From *ἀρτηρία*, an artery, and *δομᾶν*, to subdue. Fr., *artériodôme*. Ger., *Arteriodom*. E. Graefe's name for an artery-forceps devised by him. [A, 322; D, 130.]

ARTERIOGRAM, n. A<sup>3</sup>r-te'/ri<sup>2</sup>-o-gra<sup>3</sup>m. From *ἀρτηρία*, an artery, and *γράμμα* (from *γράφειν*), a drawing. Syn.: *sphygmogram*. A graphic delineation of the variations of the pulse; a pulse-curve. [K.]

ARTERIOGRAPH, n. A<sup>3</sup>r-te'/ri<sup>2</sup>-o-gra<sup>3</sup>f. Fr., *artériographe*. See ANGIOGRAPH.

ARTERIOGRAPHIC, adj. A<sup>3</sup>r-te-ri<sup>2</sup>-o-gra<sup>3</sup>f/i<sup>2</sup>k. Fr., *artériographique*. Pertaining to arteriography or to the arteriograph.

ARTERIOGRAPHY, n. A<sup>3</sup>r-te-ri<sup>2</sup>-o-gra<sup>3</sup>f-i<sup>2</sup>. Lat., *arteriographia* (from *ἀρτηρία*, an artery, and *γράφειν*, to write). Fr., *artériographie*. Ger., *Arteriographie*. It., *arteriografia*. Sp., *arteriografia*. 1. Arteriology (q. v.). 2. The practice of producing graphic representations of the state of the pulse.

ARTERIOD, adj. A<sup>3</sup>r-te'/ri<sup>2</sup>-oid. Lat., *arterioides* (from *ἀρτηρία*, an artery, and *εἶδος*, resemblance). Fr., *artériode*. Ger., *Schlagaderähnlich*. Resembling an artery. [A, 380.]

ARTERIOLE (Lat.), n. f. A<sup>3</sup>r-te-ri<sup>2</sup>-o(e)/a<sup>3</sup>. Dim. of *arteria*. See ARTERIOLE.—A. auricularis cordis dextra. See ARTERIA auricularis cordis dextra.—A. auricularis cordis sinistra. See ARTERIA auricularis cordis sinistra.—A. circumflexa dextra. A branch of the right coronary artery of the heart running to the auriculo-ventricular groove. [L, 117.]—A. circumflexa sinistra. A branch of the left coronary artery of the heart running to the aorta and the pulmonary artery. [L, 117.]—Arteriola interlobulares, Arteriola radiolata. The interlobular arteries of the kidney. [L.] See under ARTERY.—Arteriola lymphaticae. The minute lymphatic vessels. [L, 128.]—Arteriola rectae. The true arteriae rectae of the kidney. [L.] See under ARTERIE rectae.

ARTERIOLE, n. A<sup>3</sup>r-te-ri<sup>2</sup>-ol. Lat., *arteriola*. Fr., *artériole*. Ger., *Schlagaderchen*. It., *arteriola*. Sp., *arteriola*. A minute artery. [A, 385.]

ARTERIOLOGY, n. A<sup>3</sup>r-te-ri<sup>2</sup>-o-l/o-j-i<sup>2</sup>. Lat., *arteriologia* (from *ἀρτηρία*, an artery, and *λόγος*, understanding). Fr., *artériologie*. Ger., *Arteriologie*. It., *arteriologia*. Sp., *arteriologia*. That department of anatomy which relates to the arteries.

ARTERIOMALACIA (Lat.), n. f. A<sup>3</sup>r-te(ta)-ri<sup>2</sup>-o-ma<sup>3</sup>l-(ma<sup>3</sup>l)/a<sup>3</sup>(a<sup>3</sup>)/si<sup>2</sup>(ki<sup>2</sup>)-a<sup>3</sup>. From *ἀρτηρία*, an artery, and *μαλακία*, softness. Fr., *arteriomalacie*. Ger., *Arteriomalacie*. Softening of the coats of an artery. [D, 130.]

ARTERIOMALACOSIS (Lat.), n. f. A<sup>3</sup>r-te(ta)-ri<sup>2</sup>-o-ma<sup>3</sup>l-(ma<sup>3</sup>l)-a<sup>3</sup>-ko/si<sup>2</sup>s. Gen., *arteriomalaco'seos* (-sis). See ARTERIOMALACIA.

ARTERIOPALMUS (Lat.), n. m. A<sup>3</sup>r-te(ta)-ri<sup>2</sup>-o-pa<sup>3</sup>l(pa<sup>3</sup>l)/mu<sup>3</sup>s(mu<sup>3</sup>s). From *ἀρτηρία*, an artery, and *παλμός*, a throbbing. Fr., *artériopalme*. Ger., *Schlagaderklopfen*. Syn.: *pulsatio arteriarum vehemens*. Throbbing of the arteries. [M, 13.]

ARTERIOPATHY, n. A<sup>3</sup>r-te-ri<sup>2</sup>-o-pa<sup>3</sup>th-i<sup>2</sup>. From *ἀρτηρία*, an artery, and *πάθος*, disease. Fr., *artériopathie* [Piorry]. Any disease of an artery. [D, 10.]

ARTERIOPERISSIA, ARTERIOPERITITIA (Lat.), n's f. A<sup>3</sup>r-te(ta)-ri<sup>2</sup>-o-pe<sup>2</sup>ri<sup>2</sup>-i<sup>2</sup>s/si<sup>2</sup>-a<sup>3</sup>, -i<sup>2</sup>t/i<sup>2</sup>-a<sup>3</sup>. From *ἀρτηρία*, an artery, and *περισσός*, extraordinary. Fr., *artériopérissie*. Ger., *Schlagaderüberwucherung*. An extraordinary development of arteries (as in morbid erectile tissue). [M, 13.]

ARTERIO-PHLEBOTOMY, n. A<sup>3</sup>r-te'/ri<sup>2</sup>-o-fle<sup>2</sup>b-o<sup>2</sup>t/o-mi<sup>2</sup>. From *ἀρτηρία*, an artery, *φλέψ*, a vein, and *τέμνειν*, to cut. Fr., *artériophlébotomie*. Bloodletting from the capillaries by means of scarification. [D, 10.]

ARTERIOPTHORIE (Fr.), n. A<sup>3</sup>r-ta-ri<sup>2</sup>-o-p<sup>2</sup>-to-re. See ARTERIOCHALASIS.

ARTERIOPIESTER (Lat.), n. m. A<sup>3</sup>r-te(ta)-ri<sup>2</sup>-o-pi<sup>2</sup>-e<sup>2</sup>st/e<sup>2</sup>r. From *ἀρτηρία*, an artery, and *πιεστήρ*, a squeezer. Fr., *artériopiestère*, *presse-artère*. Ger., *Arteriendrucker*. An artery-compressor. [D, 130.]

ARTERIO-PITUITOUS, adj. A<sup>3</sup>r-te'/ri<sup>2</sup>-o-pi<sup>2</sup>-u<sup>2</sup>-i<sup>2</sup>t/u<sup>3</sup>s. From *arteria*, an artery, and *pituita*, mucus. Fr., *artério-pituiteux*. Arterial and pertaining to the nares (said of the blood-vessels of the nasal passages). [L, 41.]

ARTERIOPLANIA (Lat.), n. f. A<sup>3</sup>r-te(ta)-ri<sup>2</sup>-o-pla(pla<sup>3</sup>)/ni<sup>2</sup>-a<sup>3</sup>. From *ἀρτηρία*, an artery, and *πλανᾶσθαι*, to wander. Fr., *artérioplanie*. Ger., *Arterioplanie*. 1. An excessive elongation and tortuosity of an artery. [Maryland Med. Recorder, '1, p. 155 [L, 50].] 2. A deviation of an artery from its usual course. [D, 12.]

ARTERIOPLANICUS (Lat.), adj. A<sup>3</sup>r-te(ta)-ri<sup>2</sup>-o-pla<sup>3</sup>n-(pla<sup>3</sup>n)/i<sup>2</sup>k-u<sup>3</sup>s(u<sup>3</sup>s). Pertaining to or affected with arterioplania. [D, 80.]

**ARTERIOPLEGISMUS, ARTERIOPLOCE** (Lat.), n's m. and f. A<sup>3</sup>r-te(ta)/ri<sup>2</sup>-o-ple<sup>2</sup>g<sup>2</sup>mu<sup>2</sup>s(mu<sup>4</sup>s), -o<sup>2</sup>p<sup>2</sup>lo-se(ka). See ANGIO-  
PLOSIS.

**ARTERIORRHAGIA** (Lat.), n. f. A<sup>3</sup>r-te(ta)/ri<sup>2</sup>-o<sup>2</sup>r-ra(r<sup>3</sup>)/-ji<sup>2</sup>(gi<sup>2</sup>)-a<sup>3</sup>. From *ἀρτηρ* a, an artery, and *ῥήγνυσθαι*, to burst forth. Fr., *artériorrhagie*. Hæmorrhage from rupture of an artery. [D, 10.]

**ARTERIORRHECTICUS** (Lat.), adj. A<sup>3</sup>r-te(ta)/ri<sup>2</sup>-o<sup>2</sup>r-re<sup>2</sup>k<sup>2</sup>-ti<sup>2</sup>k-u<sup>2</sup>s(u<sup>4</sup>s). Pertaining to, caused by, or affected with, arteriorrhexis. [D, 80.]

**ARTERIORRHEXIS** (Lat.), n. f. A<sup>3</sup>r-te(ta)/ri<sup>2</sup>-o<sup>2</sup>r-re<sup>2</sup>x<sup>2</sup>i<sup>2</sup>s. Gen., *arteriorrhexeos* (-is). From *ἀρτηρ* a, an artery, and *ῥήγνυσθαι*, a bursting. Fr., *artériorrhéxie*. Ger., *Arteriorrhexie*, *Schlagaderzerreissung*. Rupture of an artery. [D, 130.]

**ARTERIOSCENOGRAPHIA** (Lat.), n. f. A<sup>3</sup>r-te(ta)/ri<sup>2</sup>-o-se<sup>2</sup>n(ske<sup>2</sup>n)-o-gra<sup>2</sup>f(gra<sup>3</sup>f)/i<sup>2</sup>a<sup>3</sup>. From *ἀρτηρ* a, an artery, and *σκηνογραφία*, scene-painting. Fr., *artérioscénographie*. Ger., *Arterioscénographie*. A portrayal of arteries. [A, 322.]

**ARTERIOSCLEROSIS** (Lat.), n. f. A<sup>3</sup>r-te(ta)/ri<sup>2</sup>-o-skle<sup>2</sup>r-o<sup>2</sup>-si<sup>2</sup>s. Gen., *arterioscleroses* (-is). From *ἀρτηρ* a, an artery, and *σκληρύνειν*, to harden. Fr., *artériosclérose*. Ger., *Arteriosclerose*, *Schlagaderverhärtung*. Induration of the walls of an artery, or of the arteries, especially in the musculo-elastic coat. [A, 385; J. B. Duplaix, "Arch. gén. de méd.," Feb., March, 1885; "Rev. des sci. méd.," April, 1886, p. 449.] See also *ENDARTERITIS deformans*.

**ARTERIOSITY**, n. A<sup>3</sup>r-te-ri<sup>2</sup>-o<sup>2</sup>s<sup>2</sup>i<sup>2</sup>t<sup>2</sup>-i<sup>2</sup>. Lat., *arteriositas*. Fr., *arteriosité*. Ger., *Arteriosität*. A condition in which the blood in the systemic veins possesses the characters of arterial blood; the opposite of venosity. It may be induced artificially by superæration of the blood. [J, 16; K.]

**ARTERIOSTENOSIS** (Lat.), n. f. A<sup>3</sup>r-te(ta)/ri<sup>2</sup>-o-ste<sup>2</sup>n-o<sup>2</sup>-si<sup>2</sup>s. Gen., *arteriostenoses* (-is). From *ἀρτηρ* a, an artery, and *στενώνω*, a narrowing. Fr., *artériosténose*. Ger., *Arteriosienose*, *Schlagaderverengung*. A narrowing of the lumen of an artery. [D, 130.]

**ARTERIOSTEOGENESIS, ARTERIOSTEOSIS, ARTERIOSTOSIS** (Lat.), n's f. A<sup>3</sup>r-te(ta)/ri<sup>2</sup>-o<sup>2</sup>s<sup>2</sup>-te<sup>2</sup>-o<sup>2</sup>-je<sup>2</sup>n(ge<sup>2</sup>n)e<sup>2</sup>s<sup>2</sup>-i<sup>2</sup>s, -o<sup>2</sup>s-te<sup>2</sup>-o<sup>2</sup>-si<sup>2</sup>s, -o<sup>2</sup>s-to<sup>2</sup>-si<sup>2</sup>s. Gen., *arteriosteo-gen'es* (-en'es), -te'o<sup>2</sup>-seos (-is), -to<sup>2</sup>-seos (-is). From *ἀρτηρ* a, an artery, *ὀστέον*, a bone, and *γένεσις*, production, or *ὀστέωσις*, a formation of bone. Fr., *artériostéose*. Ger., *Arteriosteose*, *Schlagaderverknöcherung*. Calcification of an artery or of the arteries. [D, 130, 142.]

**ARTERIOSTREPSIS** (Lat.), n. f. A<sup>3</sup>r-te(ta)/ri<sup>2</sup>-o-stre<sup>2</sup>p<sup>2</sup>-si<sup>2</sup>s. Gen., *arteriostrep'es* (-is). From *ἀρτηρ* a, an artery, and *στρέφω*, a twisting. Fr., *torsion d'une artère*. Ger., *Schlagaderdrehung*. The operation of twisting an artery to obliterate its lumen. [Amusat (A, 322).] See *TORSION*.

**ARTERIOSUS** (Lat.), adj. A<sup>3</sup>r-te(ta)/ri<sup>2</sup>-o-su<sup>2</sup>s(su<sup>4</sup>s). Fr., *artériel*. Ger., *arteriös*. Arterial; conveying arterial blood.

**ARTERIOTHLIMMA, ARTERIOTHLIPSIS** (Lat.), n's n. and f. A<sup>3</sup>r-te(ta)/ri<sup>2</sup>-o-thli<sup>2</sup>m<sup>2</sup>/ma<sup>2</sup>, thli<sup>2</sup>p<sup>2</sup>/si<sup>2</sup>s. Gen., *arteriothlim-ma'tos* (-tis), -thlip<sup>2</sup>/seos (-is). From *ἀρτηρ* a, an artery, and *θλίψις* (from *θλίβειν*, to gall). Injury to an artery by pressure. [A, 322.]

**ARTERIOTHLIPITICUS** (Lat.), adj. A<sup>3</sup>r-te(ta)/ri<sup>2</sup>-o-thli<sup>2</sup>p<sup>2</sup>-ti<sup>2</sup>k-u<sup>2</sup>s(u<sup>4</sup>s). Pertaining to arteriothlipsis. [A, 322.]

**ARTERIOTOME**, n. A<sup>3</sup>r-te-ri<sup>2</sup>-o-tom. From *ἀρτηρ* a, an artery, and *τέμνω*, to cut. Fr., *artériotome*. Ger., *Arteriotom*, *Schlagaderöffner*. A knife for performing arteriotomy. [D, 12.]

**ARTERIOTOMICUS, ARTERIOTOMUS** (Lat.), adj's. A<sup>3</sup>r-te(ta)/ri<sup>2</sup>-o-to<sup>2</sup>m<sup>2</sup>i<sup>2</sup>k-u<sup>2</sup>s(u<sup>4</sup>s), -o<sup>2</sup>t<sup>2</sup>-o-mu<sup>2</sup>s(mu<sup>4</sup>s). Fr., *artériotomique*. Pertaining to arteriotomy. [A, 50.]

**ARTERIOTOMY**, n. A<sup>3</sup>r-te-ri<sup>2</sup>-o<sup>2</sup>-mi<sup>2</sup>. Lat., *arteriotomia*. Fr., *artériotomie*. Ger., *Schlagaderzerlegung* (1st def.), *Schlagaderöffnung* (2d def.). It., *arteriotomia*. Sp., *arteriotomia*. 1. The dissection of arteries. [C.] 2. The operation of opening an artery for the purpose of depletion. [D, 100.]

**ARTERIOTREPSIS** (Lat.), n. f. A<sup>3</sup>r-te(ta)/ri<sup>2</sup>-o-tre<sup>2</sup>p<sup>2</sup>-si<sup>2</sup>s. Gen., *arteriotrep'es* (-is). From *ἀρτηρ* a, an artery, and *τρέφω*, torsion. Fr., *artériotrepse*. See *ARTERIOSTREPSIS*.

**ARTERIO-VEINOSUS**, adj. A<sup>3</sup>r-te-ri<sup>2</sup>-o-ve<sup>2</sup>-nu<sup>2</sup>s. Lat., *arterio-venosus* (from *arteria*, an artery, and *vena*, a vein). Fr., *arterio-veineux*, *artérioso-veineux*. Ger., *arterio-venös*. Pertaining to both an artery and a vein. [A, 385.] **A.-v. aneurysm**. See *Varicose ANEURYSM* and *Aneurysmal VARIX*.

**ARTÉRITÉ** (Fr.), n. A<sup>3</sup>r-te-ret. See *ARTERITIS*.—**A. dothi-énaire**. See *A. typhoïdique*.—**A. obturante**. See *ENDARTERITIS obliterans*.—**A. ossifiante**. An arteritis in which there is calcification of the artery. [Siredey (D, 87).]—**A. rhumatismale**. A rare form of arteritis involving the inner tunic, occurring in the course of an attack of rheumatism. [D, 72.]—**A. typhoïdique**. A form of arteritis occurring in the course of typhoid fever. [L. Landouzy, A. Siredey, "Rev. de méd.," Oct., 1885, p. 843.]

**ARTERITIS** (Lat.), n. f. A<sup>3</sup>r-te-ri<sup>2</sup>-i(e)<sup>2</sup>/ti<sup>2</sup>s. Gen., *arterit'idis*. Written also (more correctly but less euphoniously) *arteriitis*. From *ἀρτηρ* a, an artery (see also *-itis*). Fr., *artérite*. Ger., *Schlagaderentzündung*, *It.*, *arterite*, *arteritide*. Sp., *arteritis*. Inflammation of an artery. See *ENDARTERITIS*, *MESARTERITIS*, and *PERIARTERITIS*. According to some authors, the term should be limited to inflammation of the external coat. [A, 385.]—**A. deformans**. See *ENDARTERITIS deformans*.—**A. obliterans**, **A. obliterativa**. See *ENDARTERITIS obliterans*.—**A. syphilitica**. *Endarteritis deformans* due to syphilis. [Marchand (A, 319).]—**A. umbilicalis**. Inflammation and thrombosis of the umbilical arteries in the newborn. [C. Hennig (A, 416).]—**Cerebral a.** Inflammation of the cerebral arteries. [J. M. Da Costa (D, 87).]—**Obliterating a.** See *ENDARTERITIS obliterans*.

**ARTERIVERSION**, n. A<sup>3</sup>r-te-ri<sup>2</sup>-vu<sup>2</sup>-i<sup>2</sup>/zhu<sup>2</sup>n. Lat., *arteri-*

*versio* (from *arteria*, an artery, and *vertere*, to turn). The correct spelling of *aerteriversion* (q. v.).

**ARTERIVERTER**, n. A<sup>3</sup>r-te-ri<sup>2</sup>-vu<sup>2</sup>-rt<sup>2</sup>/u<sup>2</sup>r. See *AERTERIVERTER*.

**ARTERIYPERECTASIS** (Lat.), n. f. A<sup>3</sup>r-te(ta)/ri<sup>2</sup>-i(u<sup>6</sup>)-pe<sup>2</sup>r-e<sup>2</sup>k<sup>2</sup>/ta<sup>2</sup>-si<sup>2</sup>s. Gen., *arteriyperecta<sup>2</sup>seos* (-e<sup>2</sup>t<sup>2</sup>asis). From *ἀρτηρ* a, an artery, *ὑπέρ*, to excess, and *έκτασις*, distension. Extreme dilatation of an artery. [D, 80.]

**ARTERY**, n. A<sup>3</sup>r-te-ri<sup>2</sup>-i<sup>2</sup>. Gr., *ἀρτηρία*. Lat., *arteria*. Fr., *artère*. Ger., *Arterie*, *Pulsader*, *Schlagader*. It., *Sp.*, *arteria*. A vessel which conveys blood from the heart.—**Abdominal a.** Lat., *arteria abdominalis*. Fr., *artère abdominale*. 1. See *Deep circumflex iliac a.*, *deep epigastric a.*, *superficial epigastric a.*, *superior abdominal a.*, and *superior external pudic a.* 2. In osseous fishes, a branch of the dorsal aorta which pierces the anterior portion of the kidneys, runs along above the œsophagus, and is distributed to the abdominal organs. [L, 158.]—**Aberrant a.** See *Vas aberrans*.—**Accessory pudic a.** Lat., *arteria pudenda accessoria*. An occasional branch of the internal iliac a. distributed to the same parts as the internal pudic a. [L, 142.]—**Accessory thyreoid a.** A name applied, in the domesticated animals, to the analogue of the middle thyreoid a. of man. [L, 13.]—**Acromial a.** Lat., *arteria acromialis*. Fr., *artère acromiale*. Ger., *Schulterhöhenarterie*. Sp., *arteria acromial*. The external branch of the acromio-thoracic a.; in the pl., the branches of the acromio-thoracic a. distributed to the deltoid muscle and to the structures above the acromion. [L, 114, 142.]—**Acromial thoracic a.**, **Acromio-thoracic a.** Lat., *arteria thoracica acromialis*. Fr., *artère acromio-thoracique*. Ger., *Brustschulterpulsader*. Sp., *arteria acromio-thorácica*. A branch of the axillary a. given off at the upper border of the pectoralis minor muscle, giving origin to the acromial arteries, the arteria deltoidea, and branches to the side of the thorax, the subclavius muscle, and the internal surface of the arm. [L, 31, 142.]—**Adipose arteries.** Lat., *arteriæ adiposæ*. Fr., *artères adipieuses*. The capsular arteries, and also the small branches of the thoracic aorta distributed to the adipose tissue of the heart. [L, 32.]—**Afferent arteries of the kidney.** The branches of the interlobular arteries of the kidneys, which pass into the glomeruli. [L, 142.]—**Alar a.** See *Alar thoracic a.* and *Axillary a.*—**Alar thoracic a.** Ger., *Alararterie*. An inconstant branch of the axillary a. distributed to the glands and adipose tissue of the axilla. [L, 142.]—**Allantoic arteries** [Balfour]. See *Umbilical arteries*.—**Alveolar a.** Lat., *arteria alveolaris*. Fr., *artère alvéolaire*. See *Posterior dental a.*—**Anal a.** Fr., *artère anale*. A branch of the posterior aorta in many molluscs, which descends on the inferior surface of the intestinal canal to the anus. [L, 158.]—**Anastomotic arteries.** Fr., *artères anastomotiques*. Arteries which unite those more or less remote from each other. [Nunn (L, 31).]—**Anastomotic a. of the arm.** Lat., *arteria collateralis unaris inferior*. Fr., *artère collatérale interne inférieure*. Ger., *untere Ellenbogenvenen-pulsader*. Sp., *arteria colateral interna*. A branch of the brachial a., arising about two inches above the elbow, which runs backward and inward on the brachialis anticus muscle above the inner condyle of the os brachii, and, after perforating the inter-muscular septum, turns outward behind the os brachii and forms an arch with the superior profunda a. just above the olecranon fossa. [L, 142.]—**Anastomotic a. of the sciatic a.** A branch of the sciatic a. distributed to the external rotator muscles of the thigh and the hip joint and anastomosing with branches of the gluteal a. [L, 142.]—**Anastomotic a. of the thigh.** See *Anastomotica magna a. of the thigh*.—**Anastomotica magna a. of the thigh.** Lat., *arteria anastomotica magna femoris*. Fr., *artère grande anastomotique de la cuisse*. Ger., *oberste Kniegelenkschlagader*. A branch of the femoral a. arising close to the opening in the adductor magnus muscle (Hunter's canal), which divides into two branches, the superficial and deep. The superficial branch accompanies the internal saphenous nerve to the inner side of the knee, and ends by supplying the upper part of the inner side of the leg; the deep branch descends to the inner condyle of the femur, where it anastomoses with the internal articular arteries of the knee. [L, 142.]—**Angular a.** Lat., *arteria angularis*. Fr., *artère angulaire*. Ger., *Winkelpulsader*. 1. The termination of the facial a., which inosculates at the inner side of the orbit with the nasal branch of the ophthalmic. [L, 142.] 2. See *Facial a.*—**Antennary arteries.** Fr., *artères antennaires*. In certain crustaceans, branches from the anterior surface of the heart distributed to the antennæ. [L, 158.]—**Anterior abdominal a.** A branch, in many of the lower animals, of the internal mammary a., distributed to the rectus abdominis muscle and in its neighborhood. [L, 13.]—**Anterior and internal frontal arteries.** Fr., *artères frontales internes et antérieures*. Branches of the anterior cerebral a. distributed to the inferior frontal convolutions. [L, 189.]—**Anterior and internal peduncular arteries.** Fr., *artères pédunculaires antérieures et internes*. Branches of the posterior cerebral a. distributed to the interna surface of the peduncle. [H. Duret, "Arch. de physiol. norm. et pathol.," 1874, p. 72 (L).]—**Anterior a. of the corpora quadrigemina.** Fr., *artère antérieure des tubercules quadrigeminaux*. A branch of the posterior cerebral a., or of one of its branches, distributed to the anterior portion of the tubercula quadrigemina. [H. Duret, l. c. (L).]—**Anterior a. of the receptacle.** A branch of the internal carotid a. to the dura mater of the cavernous sinus and adjacent parts. [L, 179.]—**Anterior auricular arteries.** Lat., *arteriæ auriculares anteriores*. Fr., *artères auriculaires antérieures*. Branches of the temporal a. varying in number, distributed to the anterior portion of the auricle, the lobule, and part of the external meatus, anastomosing with branches of the posterior auricular. [F.]—**Anterior cæcal a.** A branch of the inferior mesenteric a. distributed to the anterior surface of the cæcum. [L, 179.]—**Anterior cardiac a.** See *Left coronary a. of the heart*.—**Anterior carpal arteries.** Lat., *arteriæ volares carpi*. See *Anterior radio-*

*carpal a.* and *Anterior ulno-carpal a.*—**Anterior cerebral a.** Lat., *arteria cerebralis anterior*. Fr., *artère cérébrale antérieure*. Ger., *vordere Gehirnpulsader*. One of the ultimate branches of the internal carotid a., arising at the inner end of the fissure of Sylvius, which runs forward and inward between the cerebral hemispheres to the anterior border of the corpus callosum, where it breaks up into branches mainly distributed to the frontal lobe of the brain. At the point where it enters the longitudinal fissure it is connected with its fellow of the opposite side by the anterior communicating a. of the brain. [L., 142.]—**Anterior cervical a.** See *Anterior thyroïd a.*—**Anterior chorioid arteries.** Lat., *arterie chorioideae anteriores*. Fr., *artères choroïdiennes antérieures*. Ger., *vordere Adernetzpulsader*. Branches of the internal carotid a., or of the middle cerebral a., which pass through the fissure between the temporo-sphenoidal lobe and the crus cerebri to the descending cornu of the lateral ventricle, in which they are distributed to the chorioid plexus. [L., 142.]—**Anterior ciliary arteries.** Lat., *arterie ciliares anteriores*. Fr., *artères ciliaires antérieures*. Ger., *vordere Blutungspulsader*. Sp., *arterias ciliares anteriores*. Branches of the lacrimal or of the muscular branches of the ophthalmic artery which pierce the sclerotic, and are distributed to the ciliary processes, and form a vascular ring beneath the conjunctiva close to the cornea. [L., 142.]—**Anterior circumflex a. of the arm.** Lat., *arteria circumflexa humeri anterior*. Fr., *artère circonflexe antérieure de l'humérus*. Ger., *vordere Kranzarterie des Armes*. Sp., *arteria circumflexa anterior*. A branch of the axillary a., arising just below the subscapular a., which passes outward beneath the inner head of the biceps and coraco-brachialis muscles until it reaches the bicipital groove, where it divides into two branches, one of which ascends with the tendon of the long head of the biceps to the head of the os brachii and the capsule of the joint, and the other runs backward to anastomose with the posterior circumflex a. of the arm. [L., 142, 172.]—**Anterior communicating a. of the brain.** Lat., *arteria anterior communicans*. Fr., *artère antérieure communicante*. Ger., *vordere Verbindungspulsader*. Sp., *arteria comunicante anterior*. An a., which unites the anterior cerebral arteries as they enter the longitudinal fissure of the brain. [L., 142.]—**Anterior cubital recurrent a.** See *Anterior ulnar recurrent a.*—**Anterior dental a.** A branch of the infra-orbital a., which descends in the anterior dental canal, and is distributed to the mucous membrane of the maxillary antrum and to the upper front teeth. [L., 142.]—**Anterior dorsal a. of the penis.** The analogue of the dorsal a. of the penis of man in some of the lower animals. [L., 13.]—**Anterior ethmoidal a.** Lat., *arteria ethmoidalis anterior*. Fr., *artère ethmoïdale antérieure*. Ger., *vordere Riechheinpulsader*. Sp., *arteria ethmoidal anterior*. A branch of the ophthalmic a., which accompanies the nasal nerve through the anterior ethmoidal foramen, and is distributed to the adjacent dura mater and to the upper portion of the nasal cavities. [L., 172.]—**Anterior inferior auricular arteries.** Lat., *arterie auriculaires inferiores anteriores*. Fr., *artères auriculaires inférieures antérieures*. Ger., *vordere untere Arterien des äusseren Ohres*. It., *arterie auriculari anteriori inferiori*. Sp., *arterias auriculares anteriores inferiores*. Branches of the superficial temporal a., which supply the anterior surface of the auricle and the external portion of the meatus auditorius. [L., 31.]—**Anterior inferior cerebellar a.** Lat., *arteria cerebelli inferior anterior*. Fr., *artère cérébelleuse inférieure antérieure*. Ger., *vordere untere Hirnpulsader*. Sp., *arteria cerebrosa inferior y anterior*. A branch of the basilar a., which supplies the anterior portion of the lower surface of the cerebellum and anastomoses with the cerebellar branches of the vertebral arteries. [L., 142.]—**Anterior intercostal arteries.** Lat., *arterie intercostales anteriores*. Fr., *artères intercostales antérieures*. Ger., *vordere Zwischenrippenpulsader*. Branches of the internal mammary a., two in each of the six upper intercostal spaces, which arise separately or from a common trunk in each space and pass outward between the pleura and the internal intercostal muscles, and afterward between the two layers of the intercostal muscles. They lie at the margins of the ribs, and are distributed to the intercostal and pectoral muscles and inosculate with corresponding branches of the aortic intercostal arteries. [L., 142.]—**Anterior interosseous a. of the fore-arm.** Lat., *arteria interossea anterior*. Fr., *artère interosseuse antérieure*. Ger., *vordere Zwischenknochenpulsader*. Sp., *arteria interossea anterior*. A branch of the common interosseous a. of the forearm which arises at the upper border of the interosseous membrane, upon the front of which it descends, accompanied by the interosseous branch of the median nerve, to the upper border of the pronator quadratus muscle, where it divides into the median a., muscular branches to the pronator quadratus, flexor profundus, and flexor longus pollicis, the nutrient arteries of the radius and ulna, and a communicating branch which anastomoses with the anterior carpal arteries. [L., 142.]—**Anterior laminal arteries.** Branches of the plantar arch in the horse, which ascend into the laminal tissue. [L., 13.]—**Anterior median a. of the spinal cord.** An a., formed by the union of the anterior spinal arteries, which runs in the anterior median fissure of the spinal cord, receiving branches from the cervical and intercostal arteries, and terminating at the cauda equina. [L., 142.]—**Anterior mediastinal arteries.** Lat., *arterie mediastinales anteriores*. Fr., *artères médiastinales antérieures*. Ger., *vordere Mittelfeltpulsader*. Branches of the internal mammary a. to the connective tissue of the mediastinum and the thymus gland. [L., 35.]—**Anterior meningeal arteries.** Lat., *arterie meningeeae anteriores*. Fr., *artères meningées antérieures*. Ger., *vordere Hirnhautpulsader*. Branches of the anterior ethmoidal a. to the dura mater of the anterior fossa of the skull. [L., 142.]—**Anterior metacarpal interosseous arteries.** Two branches of the radio-palmar artery, in many of the lower animals, supplying the structures lying in front of the metacarpus. [L., 13.]—**Anterior nasal a.** Lat., *arteria nasalis anterior*. Fr., *artère nasale antérieure*. Ger., *vordere Nasenarterie*. Sp., *arteria nasal anterior*. The termination of

the anterior ethmoidal a. in the nose. [L., 35.]—**Anterior palatine a.** Lat., *arteria palatina anterior*. Fr., *artère palatine antérieure*. Ger., *vordere Gaumenpulsader*. The continuation of the pterygo-palatine a., distributed to the anterior pillars of the fauces and the adjacent gums. [L., 7.]—**Anterior parietal a.** Fr., *artère pariétale antérieure*. A branch of the middle cerebral a. distributed to the second frontal convolution as far as the perpendicular frontal sulcus and the anterior convolution of the fissure of Rolando. [H. Duret, l. c. (L.).]—**Anterior perforating arteries of the foot.** Lat., *arterie perforantes pedis anteriores*. Inconstant branches of communication between the dorsal digital arteries of the foot and the plantar arch. [L., 142.]—**Anterior peroneal a.** Lat., *arteria peronea antica*. Fr., *artère péronière antérieure*. Ger., *vordere Mädenbeinpulsader*. Sp., *arteria peronea anterior*. A branch of the peroneal a., arising about an inch and a half above the ankle joint, which descends in front of the articulation between the fibula and tibia to the outer side of the tarsus; it supplies the peroneus tertius muscle and the ankle joint in part, and anastomoses with the posterior peroneal and tarsal arteries. [L., 142.]—**Anterior radial recurrent a.** Lat., *arteria radialis recurrens anterior*. Fr., *artère récurrente radiale antérieure*. Ger., *vordere zurücklaufende Speichenpulsader*. Sp., *arteria recurrens anterior*. A branch from the posterior surface of the radial a., just below its origin, which arches upward between the branches of the musculo-spiral nerve, lying upon the supinator brevis and brachialis anticus muscles and beneath the supinator longus. It gives off branches to the adjacent muscles and anastomoses with the superior profunda and posterior interosseous recurrent arteries. [L., 35, 142.]—**Anterior radial carpal (or radio-carpal) a.** Lat., *arteria carpea volaris radialis*. Fr., *artère transverse antérieure du carpe*. Ger., *vordere Handwurzelpulsader*. Sp., *arteria transversal del carpo*. A branch of the radial a., which arises near the inferior border of the pronator quadratus muscle and runs inward to unite with the anterior ulno-carpal a. to form the anterior rete carpeum. [L., 7.]—**Anterior sacral a.** See *Middle sacral a.*—**Anterior scrotal a.** Lat., *arteria scrotalis anterior*. Fr., *artère scrotale antérieure*. Ger., *vordere Hodensackpulsader*. 1. See *Inferior external pudic a.* 2. The termination of the inferior external pudic a. on the anterior portion of the scrotum. [L., 7.]—**Anterior spinal a.** Lat., *arteria spinalis anterior*. Fr., *artère spinale antérieure*. Ger., *vordere Rückenmarkspulsader*. Sp., *arteria spinal anterior*. A branch of the vertebral a., near its termination, which descends obliquely in front of the medulla and unites with its fellow to form the anterior median a. of the spinal cord. [L., 142.]—**Anterior superior auricular a.** Lat., *arteria auricularis superior anterior*. Fr., *artère auriculaire antérieure supérieure*. Ger., *vordere obere Arterie des äusseren Ohres*. It., *arteria auriculare anteriore superiore*. Sp., *arteria auricular anterior superior*. A branch of the superficial temporal a., which, with the anterior inferior auricular a., supplies the anterior portion of the auricle and the external auditory meatus. [L., 140.]—**Anterior temporal a.** Lat., *arteria temporalis anterior*. Fr., *artère temporale antérieure*. Ger., *vordere Schläfenpulsader*. Sp., *arteria temporal anterior*. 1. The anterior terminal branch of the superficial temporal a., which runs upward and forward upon the fore part of the head and supplies the orbicular and occipito-frontal muscles, the pericranium, and the integument of the forehead, and inosculates with branches of the ophthalmic and posterior temporal arteries. It is often selected for the operation of arteriotomy. [L., 142.] 2. A branch of the posterior cerebral a. distributed to the gyrus uncinatus as far as the second temporal sulcus. [H. Duret, l. c. (L.).]—**Anterior tibial a.** Lat., *arteria tibialis antica*. Fr., *artère tibiale antérieure*. Ger., *vordere Schienbeinarterie*. Sp., *arteria tibial anterior*. The smaller of the two divisions of the popliteal a., extending from the lower border of the popliteus muscle to the bend of the ankle, beyond which point it is termed the dorsal a. of the foot. It passes forward between the heads of the tibialis posticus muscle, through the aperture in the interosseous membrane, to the inner side of the neck of the fibula, and descends upon the anterior surface of the interosseous membrane to the lower part of the leg, where it lies in front of the tibia. A line drawn from a point midway between the head of the fibula and the external tuberosity of the tibia to the centre of the front of the ankle joint will indicate the position of this vessel. Before perforating the interosseous membrane it gives off the posterior tibial recurrent a. and unnamed branches to the fibular region, and on the front of the leg the anterior tibial recurrent a., branches to the muscles of the front of the leg, and the external and internal malleolar arteries. [L., 142.]—**Anterior tibial recurrent a.** Lat., *arteria tibialis recurrens anterior*. Fr., *artère tibiale récurrente antérieure*. Ger., *vordere zurücklaufende Schienbeinpulsader*. Sp., *arteria recurrens tibial anterior*. A branch of the anterior tibial a., immediately after its passage through the interosseous membrane, which ascends through the upper end of the tibialis anticus muscle to the outer tuberosity of the tibia. It furnishes branches to the tibialis anticus muscle and anastomoses with the articular arteries of the knee. [L., 142.]—**Anterior tympanic a.** See *External auditory a.*—**Anterior ulnar recurrent a.** Lat., *arteria recurrens ulnaris anterior*. Fr., *artère récurrente ulnaire*. Ger., *vordere zurücklaufende Ellenbogenpulsader*. Sp., *arteria recurrens cubital anterior*. A branch of the ulnar a., running upward and inward from the upper part of the ulnar a., in front of the inner condyle, lying upon the brachialis anticus and covered by the pronator radii teres muscles, which muscles it supplies in part, anastomosing with the anastomotic a. of the arm. [L., 142.]—**Anterior ulno-carpal a.** Lat., *arteria ulnaris volaris*. Fr., *artère transverse antérieure du carpe*. Sp., *arteria transversal anterior del carpo*. A branch of the ulnar a., running beneath the tendons of the fingers at the level of the lower border of the pronator quadratus muscle and uniting with the anterior radio-carpal a. [L., 142.]—**Aortic intercostal arteries.** Fr., *artères intercostales aortiques*. Ger., *Aortenzwischenrippenarterien*. Branches from the back portion of the thoracic aorta, usually

ten on each side, the upper two spaces being supplied by branches of the superior intercostal a. They pass outward across the bodies of the vertebrae to the intercostal spaces, where they divide into an anterior and posterior branch. The anterior branch passes outward, lying at first upon the external intercostal muscle, but farther along placed between the two layers, to the lower border of the rib above, where it divides into two branches. The larger of these lies in the groove in the lower border of the rib above, and the smaller on the upper border of the rib below. They are distributed to the intercostal muscles and anastomose with the anterior intercostal arteries and branches of the thoracic branches of the axillary a. The posterior branch passes backward to the inner side of the anterior costo-transverse ligament, and divides into branches distributed to the vertebrae and to the muscles and integument of the back. [L. 142, 172.]—**Aortic oesophageal arteries.** Branches of the thoracic aorta distributed to the oesophagus, pericardium, and pleura. [L. 7.]—**Aortic suprarenal a.** See *Capsular a.*—**Aortic uterine a.** Lat., Sp., *arteria uterine aortica*. The internal spermatic a. of the female. It is distributed to the ovary, the oviduct, and the side of the uterus, and anastomoses with the hypogastric uterine a. [L.] Cf. *Internal spermatic a.*—**Appendicular a.** Lat., *arteria appendicularis*. Fr., *artère de l'appendice caecale*. Ger., *Wurmfortsatzpulsader*. A branch of the ileo-colic a. distributed to the mesentery of the vermiform appendix. [L. 31.]—**A. of Broca's convolution.** See *External and inferior frontal a.*—

**A. of Neubauer.** See *Deep thyroid a.*—**A. of the bulb of the penis (or of the urethra).** Lat., *arteria bulbina*. Fr., *artère du bulbe*. Ger., *Harurohrenzwiebelpulsader*. A branch of the internal pudic, or of one of the perineal arteries, distributed to the erectile tissue of the corpus spongiosum, Cowper's gland, and the membranous portion of the urethra. [L. 142.]—**A. of the corpus callosum.** Fr., *artère du corps calleux*. 1. See *Anterior cerebral a.* 2. A branch of the anterior cerebral a. distributed to the corpus callosum. [H. Duret, l. c. (L).]—**A. of the corpus cavernosum.** Lat., *arteria profunda penis*. Fr., *artère profonde de la verge*. Ger., *tiefe Ruthenpulsader*. A branch of the internal pudic, or of the a. of the penis, which runs forward in the centre of the corpus cavernosum, to which it is distributed. [L. 172.]—**A. of the penis.** Fr., *artère pénienne*. Ger., *Ruthenschlagader*. The superior of the two terminal branches of the internal pudic a., which, after giving off the a. of the bulb of the urethra, divides into the dorsal a. of the penis and the a. of the corpus cavernosum. [L. 31.]—**A. of the septum narium.** Fr., *artère de la cloison*. A term applied to the naso-palatine a. or to a branch of the coronary a. of the upper lip distributed to the nasal septum. [L. 135, 172.]—**A. of the vas deferens.** Lat., *arteria deferentialis*. Fr., *artère déférentielle*. Ger., *Samenangpulsader*. Sp., *arteria del conducto deferente*. A branch of the superior or inferior vesical a., which sends twigs to the vas deferens and the seminal vesicles and continues along the spermatic cord to the testicle, where it anastomoses with the internal spermatic a. [L. 142.]—**Articular arteries of the arm.** See *Anterior and Posterior circumflex arteries of the arm.*—**Articular arteries of the knee.** See *Inferior external articular, Inferior internal articular, Middle articular, Superior external articular, and Superior internal articular a. of the knee.*—**Articular a. of the maxilla.** A branch of the superficial temporal a., which sends a twig to the temporo-maxillary articulation and others which enter the ear with the portio dura. [L. 179.]—**Ascending cervical a.** Fr., *artère cervicale ascendante*. Ger., *aufsteigende Nackenpulsader*. Sp., *arteria cervical ascendente*. A branch of the inferior thyroid a., occasionally of the subclavian, which runs upward in the groove between the scalenus anticus and rectus anticus major muscles, to which it furnishes branches. It sends branches through the intervertebral foramina to the spinal cord, and terminates by anastomosing with

the vertebral a. [L. 142.]—**Ascending frontal a.** A branch of the middle cerebral a. distributed mainly to the second frontal convolution. [L. 189.]—**Ascending palatine a.** Lat., *arteria palatina ascendens*. Fr., *artère palatine ascendente*. See *Inferior palatine a.*—**Ascending parietal a.** A branch of the middle cerebral a. distributed to the ascending parietal convolution and the superior parietal lobule. [L. 189.]—**Ascending pharyngeal a.** Lat., *arteria pharyngea ascendens*. Fr., *artère pharyngienne ascendante*. Ger., *aufsteigende Schlundkopfarterie*. Sp., *arteria faringea inferior*. A branch of the external carotid a., arising about an inch above its origin, which runs upward to the base of the skull between the internal carotid a. and the pharynx. It furnishes branches to the pharynx, the Eustachian tube, and the structures in front of the spine, and twigs which enter the skull

THE ARTICULAR ARTERIES OF THE KNEE. (AFTER HENLE.)

SUL, SUM, the sural arteries; SUL', one of the superficial sural arteries; ASM, the superior internal articular; ASI, the superior external articular; AIM, the inferior internal articular; AIL, the inferior external articular; AGM, the middle articular; AGS, the anastomosis magna; RTP, the posterior tibial recurrent; RTA, the anterior tibial recurrent; FS, the superior fibular.

through the foramen lacerum posterius and the anterior condyloid and jugular foramina. [L. 142.]—**Ascending thyroïd a.** See *Inferior thyroïd a.*—**Asternal a.** Fr., *artère a sternale*. 1. One of the terminal branches, in some of the domesticated animals, of the internal mammary a., at the level of the xiphoid cartilage, to the muscles, etc., as far as the thirteenth intercostal space. [L. 13.] 2. A branch of the internal mammary a. of man, which is distributed to the inner surface of the costal cartilages. [L. 41.]—**Atlido-muscular a.** An inconstant branch of the occipital a., in many of the domesticated animals, given off beneath the transverse process of the atlas and distributed to the adjacent parts. [L. 13.]—**Atrial-biliary a.** See *Capsular a.*—**Auditory a.** A term applied to the internal and external auditory arteries, but more commonly to the former. [L.]—**Auricular arteries.** Lat., *artères auriculaires*. Fr., *artères auriculaires*. Ger., *Arterien des äusseren Ohres*. It., *arterie auricolari*. Sp., *arterias auriculares*. See *Anterior inferior auricular arteries, Anterior superior auricular arteries, Deep auricular a., and Posterior auricular a.*—**Axillary a.** Lat., *arteria axillaris*. Fr., *artère axillaire*. Ger., *Achselarterie*.

through the foramen lacerum posterius and the anterior condyloid and jugular foramina. [L. 142.]—**Ascending thyroïd a.** See *Inferior thyroïd a.*—**Asternal a.** Fr., *artère a sternale*. 1. One of the terminal branches, in some of the domesticated animals, of the internal mammary a., at the level of the xiphoid cartilage, to the muscles, etc., as far as the thirteenth intercostal space. [L. 13.] 2. A branch of the internal mammary a. of man, which is distributed to the inner surface of the costal cartilages. [L. 41.]—**Atlido-muscular a.** An inconstant branch of the occipital a., in many of the domesticated animals, given off beneath the transverse process of the atlas and distributed to the adjacent parts. [L. 13.]—**Atrial-biliary a.** See *Capsular a.*—**Auditory a.** A term applied to the internal and external auditory arteries, but more commonly to the former. [L.]—**Auricular arteries.** Lat., *artères auriculaires*. Fr., *artères auriculaires*. Ger., *Arterien des äusseren Ohres*. It., *arterie auricolari*. Sp., *arterias auriculares*. See *Anterior inferior auricular arteries, Anterior superior auricular arteries, Deep auricular a., and Posterior auricular a.*—**Axillary a.** Lat., *arteria axillaris*. Fr., *artère axillaire*. Ger., *Achselarterie*.

Sp., *arteria axilar.* 1. The continuation of the subclavian a. It extends from the outer border of the first rib to the lower margin of the *teres major* muscle, lying upon the inner side of the shoulder joint and the upper part of the *os brachii*. With the arm raised to the level of the shoulder, its position will be indicated by a line drawn from the most prominent part of the clavicle to the inner side of the elevation formed by the biceps and

THE AXILLARY ARTERY AND ITS BRANCHES. (AFTER HENLE.)

Ax, the axillary; B, the brachial; THS, the superior thoracic; THL, the acromio-thoracic; THL, the external mammary; CHA, the anterior circumflex; CHP, the posterior circumflex; SS, the subscapular; S, the serratus magnus; L, the latissimus dorsi; T, the *teres major*; P, the pectoralis minor; S, the serratus magnus; D, the deltoid; S, the subscapularis; G, the bicipital groove.

coraco-brachialis muscles. By the pectoralis minor muscle it is divided into three parts, the first lying between the upper border of that muscle and the first rib, the second behind it, and the third between the lower border of the muscle and the lower margin of the *teres major*. In the first part of its course it is placed deep beneath the pectoralis major muscle, a prolongation of the costo-coracoid membrane, and a considerable quantity of fat and connective tissue, and rests upon the first intercostal space and the first digitations of the serratus magnus muscle; in the second part it is covered by the pectoralis major and minor muscles; in the third part it is at first covered by the pectoralis major muscle, but in the lower half is placed immediately beneath the deep fascia of the arm, resting upon the subscapularis muscle and the tendons of the latissimus dorsi and *teres major* muscles. From the first part are given off the superior thoracic and acromio-thoracic, from the second the external mammary and alar thoracic, and from the third the anterior and posterior circumflex arteries, besides a number of unnamed branches to the adjacent parts. [L. 142, 172.] Cf. *Brachial plexus* and *Axillary vein*. 2. See *Clavicular a.* (2d def.).—**Azygos articular a.** See *Middle articular a.* of the knee.—**Basilar a.** Lat., *arteria basilaris*. Fr., *artère basilaire*. Ger., *Zapfenarterie*. Sp., *arteria basilar*. An a. formed by the union of the vertebral arteries of the two sides, extending from the posterior to the anterior border of the pons Varolii, where it divides into two terminal branches, the posterior cerebral arteries. It gives off the anterior inferior cerebellar, the superior cerebellar, and the internal auditory arteries, and numerous transverse branches to the pons and adjacent parts. [L. 172.]—**Biliary hepatic a.** See *Right hepatic a.*—**Brachial a.** Lat., *arteria brachialis*. Fr., *artère brachiale*. Ger., *Arm pulsader*. Sp., *arteria braquial*. The continuation of the axillary a., extending from the lower margin of the *teres major* muscle to about a finger's breadth below the bend of the elbow, where it divides into the radial and ulnar arteries. It runs along the inner side and forepart of the arm, in the depression on the inner border of the biceps and coraco-brachialis muscles, lying beneath the integument and fascia of the arm, as far as the bend of the elbow, where it sinks into the space between the supinator longus and pronator radii *teres* muscles. The median nerve lies on the outer side in the upper part, in front in the lower portion of the a., and on the inner side at the elbow joint. From it are given off the superior and inferior profunda, and anastomotic arteries of the arm, the nutrient a. of the *os brachii*, and a number of unnamed branches to the muscles and integument. [L. 142, 172.]—**Branchial arteries.** Lat., *arterie branchiales*. Fr., *artères branchiales*. The arteries which, in the *Branchiata*, run in the grooves on the convex side of the branchial arches, and ramify upon the leaflets of the branchiae. [L. 158.] See also *Common branchial a.* and *Nutri-*

ent branchial arteries.—**Bronchial arteries.** Lat., *arterie bronchiales*. Fr., *artères bronchiales*. See *Inferior, Superior, Left, and Right bronchial a.*—**Brachio-cephalic a.** Lat., *arteria brachio-cephalica*. Fr., *artère brachio-céphalique*. See *Innominate a.*—**Broncho-oesophageal a.** A branch of the posterior aorta in some of the quadrupeds, given off to the right of the first intercostal arteries, which runs forward between the aorta and the oesophagus to the bifurcation of the trachea, where it divides into two branches, the bronchial arteries. It also gives off branches to the oesophagus, the trachea, and adjacent parts. [L. 13.]—**Buccal a.** Lat., *arteria buccalis*. Fr., *artère buccale*. Ger., *Backenpulsader*. Sp., *arteria bucal*. A branch of the second part of the internal maxillary a., which runs obliquely downward and forward, in company with the buccal nerve, upon the buccinator muscle, and is distributed to the muscles and integument of the cheek. [L. 142.]—**Bulb a.** See *A. of the bulb of the urethra.*—**Caval arteries.** Lat., *arteria cavales*. Branches of the great mesenteric a. distributed to the walls of the cæcum. [L. 13.]—**Calcaneal arteries.** See *External, Internal, and Middle calcaneal arteries*, and *Inferior calcaneal a.*—**Capsular a.** Lat., *arteria capsularis*. Fr., *artère capsulaire*. Ger., *mittlere Nebenpulsader*. Sp., *arteria capsular media*. A branch of the abdominal aorta, arising at the level of the superior mesenteric a., which passes obliquely outward upon the crus of the diaphragm to the suprarenal capsule, anastomosing with the inferior and superior suprarenal arteries. [L. 142.]—**Cardiac arteries.** See *Right and Left coronary a. of the heart.*—**Carotid a.** See *Common, External, and Internal carotid a.* Used without qualification, the term is most commonly understood to apply to the former.—**Cavernous a. of the clitoris.** Lat., *arteria profunda clitoridis*. Fr., *artère cavernuse (ou clitoridienne)*. One of the terminal branches of the internal pudic a. of the female, distributed to the corpus cavernosum of the clitoris. [L. 142.]—**Central system of arteries.** A term applied by Heubner and Duret to the primary or secondary branches of the circle of Willis, distributed to the central ganglia of the brain. [L. 142.]—**Central a. of the retina.** Lat., *arteria centralis retinae*. Fr., *artère centrale de la rétine*. Ger., *centrale Netzhautarterie*. It., *arteria centrale della retina*. Sp., *arteria central de la retina*. A branch of the ophthalmic a., given off in the orbital cavity near the optic foramen, which pierces the optic nerve obliquely and runs forward in or near the central axis of the nerve to the porus opticus, where it divides into from two to five branches, which run forward in the nerve-fibre or ganglion-cell layers of the retina as far as the ora serrata, forming a dense capillary network. [L.]—**Cerebellar arteries.** See *Anterior in-*

THE ARTERIES OF THE BASE OF THE BRAIN. (AFTER HENLE.)

CA, the anterior cerebral; COA, the anterior communicating; CM, the middle cerebral; CI, the internal carotid; COP, the posterior communicating; CPO, the posterior cerebral; CBS, the superior cerebellar; CBI, the anterior inferior cerebellar; AUD, the internal auditory; BA, the basilar; V, the vertebral; CHIP, the posterior inferior cerebellar; SPA, the anterior spinal; SPP, the posterior spinal.

ferior, Posterior, and Superior cerebellar a.—**Cerebral a.** See *Internal carotid a.*—**Cerebral arteries.** See *Anterior, Middle, and Posterior cerebral a.*—**Cerebro-spinal a.** One of the terminal branches of the occipital a. of the horse, which enters the spinal canal by the anterior foramen of the atlas, where it divides into

two branches. The anterior of these unites with its fellow of the opposite side to form the basilar a., and the other, uniting in a similar manner, forms the anterior median spinal a. [L, 13.]—**Cervical arteries.** See *Ascending, Descending, Superficial, Deep, Inferior, Posterior, and Transverse cervical a.*, *Superficial descending a. of the neck*, *Anterior thyroid a.*, and *Cervico-muscular a.*—**Cervico-muscular a.** A branch of the axillary a., in many of the domesticated animals, which supplies the first intercostal space and the lower cervical muscles. [L, 13.]—**Cervico-pulmonary a.** Fr., *artère pulmo-cervicale*. A vessel of certain batrachians, which divides into the pulmonary and the occipito-dorsal arteries. [L, 158.]—**Cervico-scapular a.** Fr., *artère cervico-scapulaire*. See *Transverse cervical a.*—**Choroid arteries.** See *Anterior and Posterior choroid arteries.*—**Ciliary arteries.** See *Anterior, Posterior, Long, and Short ciliary arteries.*—**Circular a. of the uterus.** A circular loop situated at the junction of the cervix with the body of the uterus, formed by an anastomosis of two vessels (on each side a special branch of the hypogastric uterine a.), so as to encircle the organ. [A, 225.]—**Circumflex a. of the coronary cushion.** A superficial vascular arch around the coronet of the hoof of the horse, formed by the anterior branches of the coronary circle. [L, 13.]—**Circumflex a. of the scapula.** Lat., *arteria circumflexa scapulae*. Fr., *artère circonflexe de l'omoplate*. A branch of the subscapular a., which passes through between the subscapularis and teres muscles to the infraspinous fossa of the scapula. [L, 7.]—**Circumflex iliac a.** Lat., *arteria circumflexa iliaca*. Fr., *artère circonflexe iliaque*. A term applied to the deep circumflex and superficial circumflex iliac arteries, but more properly restricted to the former. [L.]—**Clavicular a.** Fr., *artère claviculaire*. 1. A branch of the acromio-thoracic a. distributed to the subclavian muscle. 2. In the pl., the arteries distributed to the pectoral fins in fishes. [L, 142, 158.]—**Coccygeal a.** Lat., *arteria coccygea*. A branch of the sciatic a. supplying the gluteus maximus muscle and the integument and other structures behind the coccyx. [L, 172.]—**Coccygeal arteries.** See *Coccygeal a.*, *Lateral coccygeal a.*, and *Middle coccygeal a.*—**Cochlear a.** Lat., *arteria cochlear*. One of the terminal branches of the internal auditory a. distributed to the cochlea. [L, 172.]—**Celiac a.** Lat., *arteria celiaca*. Fr., *artère cœliaque*. Ger., *Eingeweidepulsader*. Sp., *arteria celiaca*. Syn.: *coronary axis*. A short vessel arising from the front of the abdominal aorta, close to the margin of the opening in the diaphragm for the passage of the aorta. It lies behind the lesser omentum and to the left side of the Spigelian lobe of the liver, and divides into the coronary a. of the stomach and

THE BRACHIAL ARTERY AND ITS BRANCHES. (AFTER HENLE.)

B, the brachial; R, the radial; U, the ulnar; CLS, the arteria clavicula; CM, the profunda radial; PB, the superior profunda; CM, the arteria collateralis media; CU, the anastomotic a. of the arm; RR, the anterior radial recurrent; RU, the anterior ulnar recurrent; IC, the common interosseous; IA, the anterior interosseous; IT, the posterior interosseous; IR, the posterior interosseous recurrent; IAV, the arteria interossea anterior volaris; IAD, the arteria interossea anterior dorsalis; M, the median; CVP, the anterior radio-carpal; CVU, the anterior ulno-carpal; CDR, the posterior radio-carpal; CDU, the posterior ulno-carpal; MDU, the posterior ulno-carpal; MVS, the superficial volar; MVP, the ulnar portion of the deep palmar arch; DC, the first palmar digital.

the hepatic and splenic arteries. [L, 142.]—**Colic arteries.** See *Right, Left, Middle, Posterior, Transverse, Direct, and Retrograde colic a.*—**Collateral a. of the cannon.** See *Metatarso-pedal a.*—**Collateral digital arteries.** Fr., *artères collatérales des doigts*. A term applied to the arteries running along the margins of the fingers and toes. They are four in number for each digit and anastomose freely with each other. [L.] See *Dorsal digital arteries of the hand and foot*, *Palmar digital*, and *Plantar digital arteries.*—**Collateral intercostal arteries.** Lat., *arteriæ supra-costales*. The branches of the aortic intercostal arteries which lie on the upper margins of the ribs. [L, 31.]—**Comes nervi ischiadici a.** Lat., *arteria comes nervi ischiadici*. A branch of the ischiadic a. which enters the sciatic nerve and anastomoses with the perforating arteries of the thigh. [L, 142.]—**Common brachial a.** Fr., *artère brachiale commune*. The single trunk from which, in certain of the Branchiata, the brachial arteries arise. [L, 158.]—**Common carotid a.** Lat., *arteria carotis communis*. Fr., *artère carotide commune*. Ger., *gemeinschafter Stamm für beide Carotiden*. Sp., *arteria carótida primitiva*. The large a. of the neck which extends from the sterno-clavicular articulation to the level of the upper border of the thyroid cartilage, where it divides into the external and internal carotid arteries. On the right side it arises from the innominate a., on the left from the middle part of the arch of the aorta, lying behind the remains of the thymus gland and the left innominate vein and upon the trachea, the oesophagus, and the thoracic duct. It is enclosed within a common sheath with the internal jugular vein and the pneumogastric nerve, which is continuous with the deep cervical fascia. It is covered, as far up as the lower margin of the crico-thyroid cartilage, by the sterno-mastoid, sterno-hyoid, sterno-thyroid, and platysma muscles; above that point, where it is crossed by the omo-hyoid muscle, it is covered only by the integument and the sterno-mastoid and platysma muscles. Its position is indicated by a line drawn between the sterno-clavicular articulation and a point midway between the angle of the jaw and the mastoid portion of the temporal bone. As a rule it gives off no branches, but occasionally the middle thyroid. [L, 142.]—**Common femoral a.** Lat., *arteria femoralis communis*. Fr., *artère fémorale commune*. Ger., *Oberschenkelpulsader*. The continuation of the external iliac a.; that portion of the femoral a. which extends from its origin to the point at which it gives off the deep femoral a. [L, 142.]—**Common hepatic a.** Lat., *arteria hepatica communis*. Fr., *artère hépatique commune*. The term applied to the hepatic a. before it gives off the gastro-duodenal a. [L, 31.]—**Common iliac a.** Lat., *arteria iliaca communis*. Fr., *artère iliaque commune*. Ger., *gemeinschafter Hüftpulsader*. Sp., *arteria iliaca comune*. An a. on each side of the body, the two arising from the bifurcation of the abdominal aorta. They diverge from each other at an angle which is slightly greater in the female than in the male, and divide opposite the lumbo-sacral articulation into the external and internal iliac arteries. The left a. lies close to the border of the psoas muscle, resting upon the bodies of the fourth and fifth lumbar vertebrae and behind the superior hæmorrhoidal vessels. The right is separated from the bones by the two common iliac veins, and touches the psoas muscle only at its lower end. Both vessels measure about two inches in length and are covered by the peritonæum and small intestine. [L, 142.]—**Common interosseous a. of the forearm.** Lat., *arteria interossea communis antibrachii*. Fr., *artère interosseuse commune de l'avant-bras*. Ger., *gemeinschafter Zwischenpulsader des Vorderarmes*. A branch of the ulnar a. which arises about an inch from its commencement and runs backward to the upper border of the interosseous membrane of the forearm, where it divides into the anterior and posterior interosseous arteries of the forearm. [L, 142.]—**Common scapular a.** See *Subscapular a.*—**Communicating arteries.** Those which establish a direct communication between two arteries. [L.]—**Coraco-radial a.** A branch of the humeral a. to the biceps muscle of many quadrupeds. [L, 13.]—**Coronary arteries of the heart.** See *Right and Left coronary a. of the heart.*—**Coronary a. of the lower lip.** Lat., *arteria coronaria labii inferioris*. Fr., *artère coronaire de la lèvre inférieure*. Ger., *Kranzarterie der Unterlippe*. Sp., *arteria labial inferior*. A branch of the facial a., arising at the outer border of the depressor anguli oris muscle, which runs beneath that muscle and between the orbicularis oris and the mucous membrane on the free margin of the upper lip and

THE RETE CUBITALE. (AFTER HENLE.)

anastomoses with its fellow of the opposite side. It furnishes branches to the structures of the lower lip, and others which anastomose with the vessels distributed to the chin. [L. 142.]—**Coronary a. of the stomach.** Lat., *arteria coronaria ventriculi*. Fr., *artère coronaire stomacale*. Ger., *Kranzarterie des Magens*. Sp., *arteria coronaria estomacica*. The smallest of the branches

THE COELIAC ARTERY AND ITS BRANCHES. (AFTER HENLE.)

A, the aorta; PHR, the inferior phrenic; C, the coeliac; COD, the pyloric; COS, the coronary; H, the hepatic; CY, the cystic; GD, the gastro-duodenal; PDS, the superior pancreaticoduodenal; GED, the right gastro-epiploic; LI, the splenic.

of the coeliac a. It runs at first upward and to the left side to the cardiac orifice of the stomach, where it turns forward and downward and is continued along the lesser curvature of the stomach. It gives off branches to the oesophagus and to both surfaces of the stomach and anastomoses with the pyloric a. [L. 142.]—**Coronary a. of the upper lip.** Lat., *arteria coronaria labii superioris*. Fr., *artère coronaire de la lèvre supérieure*. Ger., *Kranzarterie der Oberlippe*. Sp., *arteria labialis superior*. A branch of the facial a. which arises beneath the zygomaticus major muscle, between which and the mucous membrane of the cheek it runs across to the upper lip, where it anastomoses with its fellow of the opposite side. It supplies the tissue of the upper lip and gives off the a. of the nasal septum and certain unnamed branches to the nose. [L. 142.]—**Cortical system of arteries.** Fr., *artères corticales*. A term applied by Heubner and Duret to the arteries distributed to the cortical substance of the brain and the parts immediately beneath it. [L. 142.]—**Costo-cervical a.** Lat., *arteria costo-cervicalis*. Fr., *artère costo-cervicale*. Ger., *Rippennackenpulsader*. A term applied to the superior intercostal a. between its origin and the point at which it gives off the deep cervical a. [L. 7.]—**Cremasteric a.** Lat., *arteria cremasterica*. Fr., *artère crémastérique*. See *External spermatic a.*—**Crico-thyroid a.** Lat., *arteria crico-thyroidea*. Fr., *artère crico-thyroïdienne*. Ger., *untere Kehlkopfarterie*. Sp., *arteria crico-tiroidea*. A branch of the superior thyroid a. which runs across the crico-thyroid membrane, anastomosing with its fellow of the opposite side. When of large size it may be the source of considerable hæmorrhage in the performance of laryngotomy. [L. 142.]—**Crotaphite a.** See *Temporal a.*—**Crural a.** Lat., *arteria cruralis*. Fr., *artère crurale*. See *Femoral a.*—**Cubital a.** See *Ulnar a.*—**Curling arteries of the placenta.** Twisted branches of the umbilical arteries distributed to the substance of the placenta. [J. Hunter (L. 171).]—**Cystic a.** Lat., *arteria cystica*. Fr., *artère cystique*. Ger., *Gallenblasenpulsader*. Sp., *arteria cística*. A branch of the right hepatic a. which turns forward upon the neck of the gall-bladder and divides into two branches, one of which goes to the coats of the gall-bladder on the inferior surface, and the other to the tissues between the liver and the gall-bladder. [L. 142.]—**Deep anterior temporal a.** Lat., *arteria temporalis profunda anterior*. Fr., *artère temporale profonde antérieure*. Ger., *vordere tiefe Schläfenpulsader*. Sp., *arteria temporal profunda anterior*. A branch of the pterygoid portion of the internal maxillary a. which ascends between the temporal muscle and the cranium, is distributed to the structures in the anterior portion of the temporal fossa, and anastomoses with the middle temporal a. and small branches of the lacrymal arteries. [L. 142.]—**Deep auricular a.** Lat., *arteria auricularis profunda*. Fr., *artère auriculaire profonde*. Ger., *tiefe Arterie des äusseren Ohres*. It., *arteria profunda auricolare*. Sp., *arteria profunda auricular*. A branch of the first portion of the internal maxillary

a. which perforates the walls of the external auditory meatus, to which and to the outer part of the tympanum it is distributed. [L. 142.]—**Deep cervical a.** Lat., *arteria cervicalis profunda*. Fr., *artère cervicale profonde*. Ger., *tiefe Nackenarterie*. Sp., *arteria cervical profunda*. 1. A branch of the costo-cervical a., sometimes of the subclavian, which passes backward between the transverse process of the last cervical vertebra and the first rib to the posterior aspect of the neck, where it ascends beneath the complexus muscle and resting upon the semispinalis colli to the level of the axis. It gives off branches to the posterior and deep muscles of the neck, and others which anastomose with branches of the vertebral, occipital, and ascending cervical arteries. [L. 142.] 2. See *Posterior scapular a.*—**Deep circumflex iliac a.** Lat., *arteria circumflexa ilii interna*. Fr., *artère circouflexe iliaque profonde*. Ger., *tiefe umgeschlagene Hüftpulsader*. A branch of the external iliac a. arising at about the level of Poupart's ligament, behind which it runs upward and outward, resting upon the iliacus muscle, as far as the anterior superior spine of the ilium, where it turns backward along the inner margin of the iliac crest and ends by anastomosing with the iliac branch of the ilio-lumbar a. It gives off branches to the upper part of the sartorius, the tensor vaginæ femoris, the iliacus, and the lateral abdominal muscles. [L. 142.]—**Deep epigastric a.** Lat., *arteria epigastrica profunda*. Fr., *artère épigastrique profonde*. Ger., *Bauchdeckenpulsader*. Sp., *arteria epigastrica ascendente*. A branch arising from the inner and fore part of the external iliac a., usually a little above Poupart's ligament. It runs inward for a short distance between Poupart's ligament and the internal abdominal ring, and then ascends along the inner side of the ring beneath the vas deferens and the spermatic vessels, and about at the umbilicus anastomoses with a branch of the internal mammary a. It gives off the external spermatic a., the arteria pubica, and branches to the muscles and integument of the abdomen. [L. 142.]—**Deep external pudic a.** See *Inferior external pudic a.*—**Deep external temporal a.** See *Deep anterior temporal a.*—**Deep femoral a.** Lat., *arteria profunda femoris*. Fr., *artère fémorale profonde*. Ger., *tiefe Oberschenkelpulsader*. Sp., *arteria femoral profunda*. An a. arising from the outer and back part of the femoral a., about  $\frac{1}{2}$  inch below Poupart's ligament. It is directed outward in front of the iliacus muscle and then inward and backward behind the superficial femoral a. and between the adductor longus and magnus muscles. It terminates at the junction of the middle and lower thirds of the thigh as the fourth perforating a. of the thigh. It gives off the external and internal circumflex arteries and the four perforating arteries of the thigh. [L. 142.]—**Deep gluteal a.** Ger., *tiefe Gesässpulsader*. A branch of the gluteal a. distributed to the deep muscles of the posterior gluteal region. [L. 142.]—**Deep humeral a.** Fr., *artère musculaire grande du bras*. A branch of the brachial a. of many quadrupeds, supplying the extensor muscles of the arm and the parts around the olecranon. [L. 13.]—**Deep internal temporal a.** See *Deep posterior temporal a.*—**Deep muscular a.** See *Deep femoral a.*—**Deep perineal a.** See *Artery of the penis.*—**Deep plantar a.** Lat., *arteria plantaris profunda*. Ger., *tiefe Sollenarterie*. A branch of the metatarsal a. running between the heads of the first dorsal interosseous muscle of the foot; distributed in the first interosseous space and assisting in the formation of the plantar arch.

THE CORONARY ARTERIES OF THE HEART. (AFTER HENLE.)

CRD, the right coronary; CRS, the left coronary.

[L. 117.]—**Deep posterior temporal a.** Lat., *arteria temporalis profunda posterior*. Fr., *artère temporale profonde postérieure*. Ger., *hintere tiefe Schläfenpulsader*. Sp., *arteria temporal profunda posterior*. A branch of the pterygoid portion of the internal maxillary a. which ascends between the temporal muscle and the cranium and is distributed to the temporal fossa. [L. 142.]—**Deep external pudic a.** Lat., *arteria pudenda externa*. See *Inferior*

*external pudic a.*—**Deep sural arteries.** Lat., *arteriæ surales profundæ*. Ger., *tiefe Wadenpulsadern*. Branches of the popliteal a. to the upper part of the muscles of the calf of the leg. [L. 31, 75.]—**Deep thyroid a.** Lat., *arteria thyreoida ima*. Fr., *artère thyroïdienne de Neubauer*. Ger., *unterste Schilddrüsenarterie*. An occasional branch of the arch of the aorta, or of the innominate a., distributed to the same parts as the inferior thyroid a. and often taking its place. [L. 7.]—**Deferent a. of the testis.** See *A. of the vas deferens*.—**Dental arteries.** See *Anterior, Posterior, Superior, and Inferior dental a.*—**Descending cervical a.** Lat., *arteria cervicis descendens*. A descending branch of the deep cervical a. (1st def.). [L. 31.]—**Descending palatine a.** Lat., *arteria palatina descendens*. Fr., *artère palatine descendente*. See *Superior palatine a.*—**Descending thyroid a.** See *Superior thyroid a.*—**Diaphragmatic arteries.** Fr., *artères diaphragmatiques*. Branches of the aorta distributed to the diaphragm. [L. 142.]—**Digital arteries.** See *Palmar, Plantar, Ulnar, and Collateral digital arteries, Dorsal digital arteries of the hand, and Dorsal digital arteries of the foot.*—**Digito-fibular arteries.** The digital arteries on the fibular side of the toes. [L. 179.]—**Digito-radial arteries.** The digital arteries on the radial side of

the dorsum of the great toe and an occasional branch to the tibial side of the second toe. [L. 117.]—**Dorsal a. of the index finger.** Lat., *arteria dorsalis indicis radialis*. Fr., *artère radio-dorsale de l'index*. Ger., *Speichenrückenpulsader des Zeigefingers*. The dorsal digital a. on the radial side of the index finger. It is a branch of the radial a. given off just below the base of the metacarpal bone, and furnishes a small branch to the abductor indicis muscle. [L. 31.]—**Dorsal a. of the little toe.** Lat., *arteria dorsalis digiti minimi*. Ger., *Rückenarterie der kleinen Zehe*. A branch of the dorsala. of the foot, or of the metatarsal a., to the fibular side of the

THE DORSAL ARTERIES OF THE HAND. (AFTER HENLE.)

*CDR*, the posterior radio-carpal; *CDU*, one of the arteriæ carpeæ dorsales ulnares; *MDR*, the arteria metacarpæ dorsales radiales; *MDU*, the posterior ulno-carpal; *IMV*, *IMD1*, *IMD2*, *IMD3*, the dorsal interosseous arteries; *IMV*\*, one of the posterior perforating arteries; *DD*, the dorsal digital arteries.

the fingers. [L. 179.]—**Digito-tibial arteries.** The digital arteries on the tibial side of the toes. [L. 179.]—**Digito-ulnar arteries.** The digital arteries on the ulnar side of the fingers. [L. 179.]—**Direct colic a.** A branch of the superior mesenteric a. in some quadrupeds, running along the colon in the same direction as the food and uniting with the retrograde colic a. to form an arterial arch. [L. 13.]—**Dorsal a. of the clitoris.** Lat., *arteria dorsalis clitoridis*. Fr., *artère dorsale du clitoris*. Ger., *Rückenpulsader des Kitzlers*. Sp., *arteria dorsal del clitoris*. One of the terminal branches of the internal pudic a. of the female, distributed to the glans and prepuce of the clitoris. [L. 142.]—**Dorsal a. of the foot.** Lat., *arteria dorsalis pedis*. Fr., *artère dorsale pédieuse*. Sp., *arteria pedis*. The continuation of the anterior tibial a. in the foot. It extends from the bend of the ankle to the posterior end of the first intermetatarsal space, where it turns downward and passes between the heads of the first dorsal interosseous muscle to the sole of the foot and aids in forming the plantar arch. It gives off the tarsal, metatarsal, and first dorsal interosseous arteries and a plantar digital branch distributed to the adjacent sides of the first and second toes. [L. 142.]—**Dorsal a. of the great toe.** Lat., *arteria dorsalis hallucis*. Fr., *artère dorsale du gros orteil*. Ger., *Rückenarterie der grossen Zehe*. The first dorsal interosseous a. of the foot, which furnishes branches to

THE DORSAL ARTERIES OF THE FOOT. (AFTER HENLE.)

*TA*, the anterior tibial; *DPD*, the dorsal; *PPF*, the anterior peroneal; *MAM*, the arteria malleolaris anterior medialis; *MAL*, the internal malleolar; *TSM*, the arteria supratarsus interna; *TLP*, the external tarsal; *TLA*, the metatarsal; *PFP*, the deep plantar; *IMD1*, *IMD2*, *IMD3*, *IMD4*, the dorsal interosseous arteries; *PPF*, one of the posterior perforating arteries; *PFA*, the anterior perforating a.; *SPM*, the arteria superficialis pedis medialis.

dorsal aspect of the little toe. [L. 117.]—**Dorsal a. of the nose.** Lat., *arteria dorsalis nasi*. Fr., *artère dorsale du nez*. Ger., *Nasenrückenarterie*. A branch of the internal maxillary or of the ophthalmic a. which runs down from the internal angle of the eye on the dorsum of the nose. [L. 7.]—**Dorsal a. of the penis.** Lat., *arteria dorsalis penis*. Fr., *artère dorsale de la verge*. Ger., *Rückenarterie der Euthe*. Sp., *arteria dorsal del pene*. A branch of the a. of the penis which ascends to the dorsum between the crus and the pubic symphysis and terminates at the neck of the organ in small branches to the glans and prepuce. It also sends branches to the integument and the corpus cavernosum. [L. 142.]—**Dorsal a. of the thumb.** Lat., *arteria dorsalis pollicis*. A term applied indifferently to the inner and outer dorsal arteries of the thumb. [L.]—**Dorsal a. of the tongue.** Lat., *arteria dorsalis linguae*. Fr., *artère dorsale de la langue*. Ger., *Arterie des Zungenrückens*. Sp., *arteria dorsal de la lengua*. A branch of the lingual a., arising beneath the hyo-glossus muscle, which is distributed to the mucous membrane of the dorsum of the tongue and to its substance, the tonsils, and the epiglottis. [L. 142.]—**Dorsal carpal arteries.** Lat., *arteriæ dorsales carpi*. See *Posterior radio-carpal and Posterior ulno-carpal a.*—**Dorsal digital arteries of the foot.** Lat., *arteriæ digitales dorsales pedis*. Fr., *artères dorsales des orteils*. Ger., *Zehenrückenpulsadern*. Branches of the dorsal

after the latter has passed around the crus cerebri, which ascends through the substance of the crus, and is distributed to the contiguous posterior portion of the optic thalamus. [L, 189.]—**External pudic arteries.**—**External scapular a.** See *Acromial a.*—**External spermatic a.** Lat., *arteria spermatica externa*. Fr., *artère spermatique externe*. Sp., *arteria funicular*. A branch of the deep epigastric a. which descends upon the spermatic cord and supplies the cremaster muscle and other structures of the spermatic cord and anastomoses with the internal spermatic and external pudic arteries. [L, 142.]—**External tarsal a.** Lat., *arteria tarsae externa*. Fr., *artère tarsienne externe*. Ger., *hintere äussere Fusswurzelarterie*. A branch of the dorsal a. of the foot, given off at the head of the astragalus, which runs obliquely across the foot to the tuberosity of the fifth metatarsal bone. [L, 31.]—**External thoracic a.** Lat., *arteria thoracica externa*. Fr., *artère thoracique externe*. See *External mammary a.*—**Facial a.** Lat., *arteria facialis*. Fr., *artère faciale*. Ger., *Antlitzarterie*. Sp., *arteria facial*. A branch of the external carotid a. which arises a little above the great cornu of the hyoid bone and runs at first outward beneath the digastric and stylo-hyoid muscles to the hinder part of the submaxillary triangle, where it takes a horizontal course beneath the base of the lower jaw, resting upon the mylo-hyoid muscle and lying in a groove on the deep surface of the submaxillary gland. After leaving the gland, it runs upward, crossing the jaw in front of the masseter muscle, covered only by the integument and

THE FACIAL AND TEMPORAL ARTERIES. (AFTER HENLE.)

CE, the external carotid; TSU, the superior thyroid; LS, the superior laryngeal; CT, the crico-thyroid; HY, the hyoid branch of the lingual; DL, the dorsal a. of the tongue; S, the sublingual; ME, the facial; SMT, the submental; A, the angular; LBI, the inferior labial; LBS, the coronary of the upper lip; SV, the a. of the septum narium; SC, the sterno-mastoid; AP, the posterior auricular; ST, the stylo-mastoid; PAA, the ascending pharyngeal; MI, the internal maxillary; TPS, the superficial temporal; TF, the transverse facial; TM, the middle temporal; Z', the arteria supra-orbitalis externa; F, the frontal; SO, the supra-orbital; LA, the lacrimal; N, the nasal; \*, the parotid branches of the external carotid; 1, the submaxillary gland.

the platysma muscle. On the side of the face it runs obliquely near the angle of the mouth and the side of the nose to the inner canthus of the eye, where it ends in an anastomosis with the nasal branches of the ophthalmic a. It gives off the inferior palatine, tonsillar, submental, and inferior labial arteries, the coronary arteries of the lower and upper lip, the lateral nasal and angular arteries, and numerous small branches to the structures in its neighborhood. [L, 142.] See also *Transverse facial a.*—**Femoral a.** Lat., *arteria femoralis*. Fr., *artère fémorale*. Sp., *arteria femoral*. See *Deep and Superficial femoral a.* (the former of which is commonly meant when the other is not specified), also *Common femoral a.*, *Internal circumflex a. of the thigh*, and *Superficial muscular a. of the thigh*.—**Femoro-popliteal a.** Fr., *artère femoro-poplitée*. A branch of the popliteal a. of some of the quadrupeds, given off at the level of the opening in the adductor magnus muscle for the passage of the popliteal a. and distributed to the back of the leg and thigh. [L, 13.]—**Fibular arteries.** See *Superior fibular a.*, *Peroneal a.*, *Anterior peroneal a.*, and *External calcaneal arteries*.—**First dorsal interosseous a. of the foot.** Lat., *arteria intermetatarsalis prima*. See *Dorsal a. of the great toe*.—**First intercostal a.** Lat., *arteria intercostalis prima*. See *Superior intercostal a.*—**First perforating a. of the profunda femo-**

**ris a.**, **First perforating a. of the thigh.** Lat., *arteria perforans femoris prima*. Fr., *artère perforante première de la cuisse*. A branch of the deep femoral a. given off at the lower border of the pectineus muscle, which runs backward through the adductor brevis and magnus muscles, to which it furnishes branches, and is distributed to the hamstring and gluteus maximus muscles. [L, 142.]—**Fourth perforating a. of the thigh.** A branch of the deep femoral a. distributed to the short head of the biceps femoris muscle. [L, 142.]—**Frontal a.** Lat., *arteria frontalis*.

THE FEMORAL ARTERY. (AFTER HENLE.)

CFI, the common femoral; ESF, the superficial epigastric; CIS, the superficial circumflex iliac; PUE, the external pudic; PPF, the deep femoral; CFM, the internal circumflex of the thigh; CFM, the internal circumflex of the thigh; PF1, the first perforating a. of the thigh; PF2, the second perforating a.; PF3, the third perforating a.; AGS, the arteria anastomotica magna; SF, the superficial femoral.

Fr., *artère frontale*. Ger., *Stirnschlagader*. Sp., *arteria frontal*. A branch of the ophthalmic a. which runs upward around the inner end of the orbital arch and is distributed to the integument, muscles, and periosteum of the mesial portion of the forehead. [L, 142.]—**Funicular a.** See *A. of the vas deferens* and *External spermatic a.*—**Gastric a.** Lat., *arteria gastrica*. Fr., *artère gastrique*. See *Coronary a. of the stomach*, *Right gastro-epiploic a.*, and *Left gastro-epiploic a.*—**Gastro-duodenal a.** Lat., *arteria gastro-duodenalis*. Fr., *artère gastro-duodénale*. Ger., *Magenzwölfingerpulsader*. A branch of the hepatic a., given off near the pyloric orifice of the stomach, which divides shortly after its

origin into the superior pancreaticoduodenal and right gastro-epiploic arteries. [L, 142].—**Gastro-epiploic arteries.** See *Right gastro-epiploic a.* and *Left gastro-epiploic a.*—**Gastro-hepatic a.** Lat., *arteria gastro-hepatica*. Fr., *artère gastro-hépatique*. A term applied to the coronary a. of the stomach when, as is sometimes the case, it gives off the hepatic a. [L, 35].—**Gastro-omental arteries.** See *Right gastro-epiploic a.* and *Left gastro-epiploic a.*—**Genital a.** See *Internal pudic a.*—**Gill-arch arteries.** See *Aortic ARCHES*.—**Glandular arteries.** Branches

THE ARTERIES OF THE GLUTEAL REGION. (AFTER HENLE.)

G, the gluteal; ISC, the ischial; PUI, the internal pudic; HE, the external hemorrhoidal; G', the superficial gluteal; G'', the deep gluteal; ISC1, ISC2, ISC3, unnamed branches.

of the facial a. to the submaxillary gland. [L, 142].—**Glossio-facial a.** See *Facial a.*—**Gluteal a.** Lat., *arteria glutea*. Fr., *artère fessière*. Ger., *Gesässpulsader*. Sp., *arteria glutea*. A branch of the internal iliac a. which runs backward between the lumbo-sacral cord and the first sacral nerve, turns round the upper margin of the great sacro-sciatic foramen, and divides, opposite the interval between the gluteus medius and pyriformis muscles, into the deep and superficial gluteal arteries. [L, 142]. See also *Deep, Superficial, Superior, and Inferior gluteal a.*—**Great anterior muscular a. of the thigh.** See *Superficial a. of the thigh*.—**Great left gastric a.** See *Coronary a. of the stomach*.—**Great meningeal a.** Lat., *arteria meningea magna*. See *Middle meningeal a.*—**Great mesenteric a.** The analogue, in some of the quadrupeds, of the superior mesenteric a. of man. [L, 13].—**Great nutritious a. of the femur.** See *Superior nutrient a. of the femur*.—**Great posterior muscular a. of the thigh.** See *Deep femoral a.*—**Great saphenous a.** An a., normal in rabbits and many other mammals, which is occasionally found in man. It arises from the femoral a., close to the point at which the deep femoral is given off, and runs down the leg in company with the internal saphenous vein. [L, 142].—**Great testicular a.** See *Internal spermatic a.*—**Guturo-maxillary a.** Fr., *artère gutturo-maxillaire*. See *Internal maxillary a.*—**Hæmorrhoidal arteries.** See *Middle hæmorrhoidal a.*, *Superior hæmorrhoidal a.*, and *External hæmorrhoidal arteries*.—**Heliene arteries.** Fr., *artères hélicines*. A term applied to the highly convoluted and tendril-like arteries found in cavernous tissue, in the body of the uterus, and in the hilum of the ovary. [L, 142].—**Hepatic a.** Lat., *arteria hepatica*. Fr., *artère hépatique*. Ger., *Leberpulsader*. Sp., *arteria hepática*. A branch of the coeliac a. which at first runs forward and to the right, over the upper border of the pancreas and below the foramen of Winslow to the upper margin of the stomach, where it turns upward between the layers of the lesser omentum toward the transverse fissure of the liver, lying upon the portal vein and to the left of the common bile-duct. Near the liver it divides into the left and right hepatic arteries. It gives off, besides its terminal branches, the gastro-duodenal and pyloric arteries. [L, 142]. See also *Right, Left, and Common hepatic a.*—**Humeral a.** See *Brachial a.*, *Deep humeral a.*, and *Suprascapular a.*—**Humeral thoracic a.** See *Acromio-thoracic a.*—**Hyaloid a.** Lat., *arteria hyaloidea*. Fr.,

*artère hyaloïde*. Ger., *Arterie des Glaskörpers*. It., *arteria vitrea*. Sp., *arteria vitrea*. A branch of the central retinal a., existing as a rule only in the fetus, which runs forward in the hyaloid canal, near the centre of the vitreous humor, to the posterior surface of the crystalline lens, on which it forms a fine network. During fetal life it supplies the vitreous and lens. Occasionally it is seen ophthalmoscopically in the adult as a solid cord running from the optic disc toward the lens, but only in a few instances has it been observed to be pervious. [F].—**Hyoid a.** Lat., *arteria hyoidea*. Fr., *artère hyoïdienne*. Ger., *Zungenbeinpulsader*. 1. A term applied to a branch of either the external carotid or the superior thyroid a., distributed to the parts in the neighborhood of the hyoid bone, also to a branch of the lingual a. of similar distribution. 2. In the pl. branches of the anterior epibranchial a. in certain crustaceans, distributed to the lower portion of the head. [L, 158].—**Hypogastric a.** Lat., *arteria hypogastrica*. Fr., *artère hypogastrique*. Sp., *arteria hipogástrica*. See *Internal iliac a.*—**Hypogastric uterine a.** Lat., *arteria hypogastrica uterina*. Sp., *arteria hipogástrica uterina*. A branch of the internal iliac a. distributed to the uterus and the upper part of the vagina.—**Ileo-colic a.** Lat., *arteria ileo-colica*. Fr., *artère ileo-colique*. Sp., *arteria ileo-cólica*. The lowermost of the branches of the superior mesenteric a. distributed to the lower portion of the colon. [L, 142].—**Iliac arteries.** See *Common iliac a.*, *External iliac a.*, *Internal iliac a.*, *Deep circumflex iliac a.*, and *Superficial circumflex iliac a.*—**Iliaco-femoral a.** A branch, in some quadrupeds, of the internal iliac a., distributed to the muscles of the posterior portion of the thigh; in the pl. a term applied to some unimportant branches of the obturator a. of man. [L, 13].—**Ilio-lumbar a.** Lat., *arteria ilio-lumbalis*. Fr., *artère ilio-lombaire*. Ger., *Hüftlendenpulsader*. Sp., *arteria ilio-lumbar*. A branch of the internal iliac a. which passes outward between the obturator nerve and the lumbo-sacral cord to the upper margin of the ilio-pectineal line, where it divides into branches distributed to the lumbar region and to the iliac fossa. [L, 142].—**Ilio-muscular a.** See *Ilio-lumbar a.*—**Inferior abdominal a.** Fr., *artère abdominale inférieure*. In certain crustaceans, a branch of the sternal a. distributed to the lower part of the abdomen. [L, 158].—**Inferior articular arteries of the knee.** See *Internal and External articular arteries of the knee*.—**Inferior bronchial a.** The lower of the bronchial arteries on the left side. [L, 172].—**Inferior calcaneal a.** Fr., *artère calcanéenne inférieure*. A branch of the external plantar a. arising in front of the tuberosity of the calcaneum and distributed to the external plantar muscles. [L, 35].—**Inferior cerebellar a.** See *Anterior inferior cerebellar a.*—**Inferior cervical a.** A branch of the axillary a. of some quadrupeds, which gives off two branches, the one analogous to the ascending cervical a. and the other to the acromio-thoracic a. of man. [L, 13].—**Inferior circumflex a. of the foot.** A curved vessel following the contour of the inferior face of the os pedis of the horse and united at its extremities to the preplantar a., which sends off from its concavity numerous small branches to the villous tissue of the foot. [L, 13].—**Inferior communicating arteries of the foot.** Branches of the plantar arch of the horse, which assist in forming the arterial network of the laminal tissue. [L, 13].—**Inferior coronary a.** See *Coronary a. of the lower lip* and *Right gastro-epiploic a.*—**Inferior coronary a. of the stomach.** See *Right gastro-epiploic a.*—**Inferior dental a.** Lat., *arteria dentalis inferior*. Fr., *artère dentaire inférieure*. Ger., *untere Zahn-pulsader*. Sp., *arteria dentaria inferior*. A branch of the internal maxillary a. which passes into the dental canal with the inferior dental nerve and escapes on to the face through the mental foramen. It gives off the mylo-hyoid a. and branches to the teeth, and terminates on the face as the mental a. [L, 142].—**Inferior epigastric a.** Lat., *arteria epigastrica inferior*. Fr., *artère épigastrique inférieure*. See *Deep epigastric a.*—**Inferior external articular a. of the knee.** Lat., *arteria articularis genu inferior externa*. Fr., *artère articulaire inférieure externe du genou*. Ger., *äussere untere Kniegelenkpulsader*. Sp., *arteria articular inferior externa*. A branch of the popliteal a. which runs outward beneath the outer head of the gastrocnemius muscle and afterward beneath the external lateral ligament of the knee and the tendon of the biceps femoris muscle, resting upon the external semilunar cartilage, to the forepart of the joint, where it anastomoses with the other articular arteries. [L, 142].—**Inferior external pudic a.** Lat., *arteria pudenda externa subcutanea*. Fr., *artère honteuse externe inférieure*. Sp., *arteria pudenda externa inferior*. An a. arising, separately or in common with the superior external pudic a., from the common femoral a., which runs inward upon the pectineus and adductor longus muscles, to which it gives off branches, to be distributed to the scrotum in the male and the labia in the female. [L, 142].—**Inferior gluteal a.** Lat., *arteria glutea inferior*. Fr., *artère fessière inférieure*. Ger., *Sitzbeinpulsader*. A branch of the gluteal a. distributed to the structures in the neighborhood of the hip joint. [L, 115].—**Inferior guttural a.** See *Inferior thyroid a.*—**Inferior hæmorrhoidal a.** Lat., *arteria hæmorrhoidalis inferior*. Fr., *artère hæmorrhoidale inférieure*. See *External hæmorrhoidal a.*—**Inferior intercostal arteries.** See *Aortic intercostal arteries*.—**Inferior internal articular a. of the knee.** Lat., *arteria articularis genu inferior interna*. Fr., *artère articulaire inférieure interne du genou*. Ger., *innere untere Kniegelenkpulsader*. Sp., *arteria articular inferior interna*. A branch of the popliteal a. which runs downward and inward along the upper margin of the popliteus muscle and then forward below the outer tuberosity of the tibia, and is distributed to the outer and forepart of the joint, anastomosing with the other articular arteries of the knee. [L, 142].—**Inferior labial a.** Lat., *arteria labialis inferior*. Fr., *artère labiale inférieure*. A branch of the facial a., given off at about the inferior border of the maxilla, which runs forward beneath the depressor anguli oris muscle, and is distributed to the muscles and skin of the lower lip, anastomosing with the coronary a. of the lower lip and the mental and submental arteries. [L, 142].—**Inferior laryngeal a.** Lat., ar-

*terea laryngea inferior.* Fr., *artère laryngée inférieure.* See *Crico-thyroid a.*—**Inferior maxillary a.** Lat., *arteria maxillaris inferior.* See *Inferior dental a.*—**Inferior meningeal arteries.** Branches of the occipital a. distributed to the dura mater of the posterior fossa of the skull. [L. 179.]—**Inferior mesenteric a.** Lat., *arteria mesenterica inferior.* Fr., *artère mésentérique inférieure.* Ger., *untere Gekröspulsader.* Sp., *arteria mesentérica inferior.* A branch of the abdominal aorta arising from one to two inches above its bifurcation. It inclines slightly to the left, passes downward close to the aorta, and, after giving off the left colic and sigmoid arteries, terminates as the superior hæmorrhoidal artery. [L. 142.]—**Inferior mesenterico-duodenal a.** See *Inferior pancreatico-duodenal a.*—**Inferior nutrient a. of the femur.** Lat., *arteria nutritia femoris inferior.* Fr., *artère nourricière inférieure du fémur.* Ger., *untere Ernährungs-pulsader des Oberschenkels.* A branch of the third perforating a. of the thigh which enters the femur just above its middle.

THE ABDOMINAL AORTA. (AFTER HENLE.)

AI, the common iliac artery; I, the external iliac; H, the internal iliac; SM, the middle sacral; PHR, the inferior phrenic arteries; LB, one of the lumbar arteries; C, the celiac; MES, the superior mesenteric; MEI, the inferior mesenteric; SR, the scapular; R, the renal; SPI, the internal spermatic; HI, the internal hæmorrhoidal.

[L. 177.]—**Inferior œsophageal arteries.** Lat., *arteriæ œsophageæ inferiores.* Fr., *artères œsophagiennes inférieures.* Ger., *untere Speiseröhrepulsader.* The œsophageal branches of the coronary a. of the stomach. [L. 7.]—**Inferior palatine a.** Lat., *arteria palatina inferior.* Fr., *artère palatine inférieure.* Ger., *aufsteigende Gaumenschlagader.* Sp., *arteria palatina inferior.* A branch of the facial a. which ascends between the stylo-glossus and stylo-pharyngeus muscles and then between the internal pterygoid muscle and the wall of the pharynx to the base of the skull. It is distributed to the muscles in its neighborhood, the tonsil, the Eustachian tube, and the soft palate. [L. 142.]—**Inferior palpebral a.** Lat., *arteria palpebralis inferior.* Fr., *artère palpébrale inférieure.* Ger., *Arterie des unteren Augenlids.* Sp., *arteria palpebral inferior.* A branch of the ophthalmic a. which arises near the front of the orbit and, lying below the internal tarsal ligament, gives off small branches to the conjunctiva, the lacrymal sac, and the caruncle, and, after passing outward between the

orbicularis muscle and the tarsus, forms an arterial arch on the free margin of the lower lid with a branch of the lacrymal a. [L. 142.]—**Inferior pancreatico-duodenal a.** Lat., *arteria pancreatico-duodenalis inferior.* Fr., *artère pancréatico-duodénale inférieure.* Ger., *untere Bauchspeicheldrüsenzwölffingerpulsader.* A branch of the superior mesenteric a. distributed to the concavity of the duodenum and anastomosing with the superior pancreatico-duodenal a. [L. 17.]—**Inferior perforating arteries of the hand.** Branches of the dorsal interosseous arteries of the hand which unite them with the palmar digital arteries. [L. 179.]—**Inferior perforating a.** See *Third perforating a. of the thigh.*—**Inferior pharyngeal a.** See *Ascending pharyngeal a.*—**Inferior phrenic arteries.** Lat., *arteriæ phrenicæ inferiores.* Fr., *artères phréniques inférieures.* Ger., *untere Zwerchfellpulsader.* Sp., *arterias diafragmáticas inferiores.* A term applied to branches of the celiac a., or of the abdominal aorta, distributed to the inferior surface of the diaphragm and anastomosing with the superior phrenic, the musculo-phrenic, and the arteries of the lower intercostal spaces. [L. 7.]—**Inferior profunda a. of the arm.** Lat., *arteria profunda brachii inferior.* Fr., *artère collatérale supérieure du bras.* Ger., *untere tiefe Armpulsader.* A branch of the brachial a. which arises about the middle of the arm and runs downward in company with the ulnar nerve to the back part of the inner condyle of the os brachii, where it anastomoses with the posterior ulnar recurrent a. and anastomotic arteries of the arm. It supplies branches to the inner head of the triceps muscle and to the parts it traverses. [L. 142.]—**Inferior scapular a.** See *Subscapular a.*—**Inferior suprarenal arteries.** Lat., *arteriæ suprarenales inferiores.* Fr., *artères surrénales inférieures.* Ger., *untere Nebennierenpulsader.* One or two small branches of the renal a. distributed to the suprarenal capsules. [L. 142.]—**Inferior thoracic a.** Fr., *artère thoracique inférieure.* See *External thoracic a.*—**Inferior thyroid a.** Lat., *arteria thyroidea inferior.* Fr., *artère thyroïdienne inférieure.* Ger., *untere Schilddrüsenarterie.* A branch of the thyroid axis which runs directly forward in front of the vertebral a., a short distance beyond which it bends inward and downward behind the large cervical vessels and the sympathetic nerve, and then curves in the opposite direction and terminates in branches to the thyroid gland. It gives off the ascending cervical and crico-thyroid arteries and numerous branches to the trachea, the œsophagus, and the cervical muscles. [L. 142.]—**Inferior ureteric a.** A branch of the superior vesical or uterine artery, distributed to the lower part of the ureter and the adjacent part of the bladder. [L. 179.]—**Inferior vertebral arteries.** The aortic arches of the embryo. [L. 171.]—**Inferior vesical a.** Lat., *arteria vesicalis inferior.* Fr., *artère vésicale inférieure.* Ger., *untere Blasenpulsader.* Sp., *arteria vesical inferior.* A branch, usually of the anterior division of the internal iliac a., which runs directly toward the base of the bladder. It is distributed to the lower part of the bladder, the prostate gland, and the vesiculæ seminales. [L. 142.]—**Inferior volar perforant arteries.** See *Inferior perforating arteries of the hand.*—**Infra-orbital a.** Lat., *arteria infra-orbitalis.* Fr., *artère sous-orbitaire.* Ger., *untere Augenhöhlenpulsader.* Sp., *arteria suborbitaria.* A branch of the internal carotid a., which passes out upon the face through the infra-orbital foramen in company with the superior maxillary nerve. It gives off the posterior dental a. and branches to the orbital muscles, the lacrymal sac, and the structures around the inner angle of the eye. [L. 142.]—**Infrascapular a.** See *Subscapular a.*—**Inner dorsal a. of the thumb.** Lat., *arteria pollicis radialis dorsalis.* Fr., *artère radio-dorsale du pouce.* Ger., *Speichenrückenpulsader des Daumens.* A branch of the radial a. arising opposite the base of the metacarpal bone of the thumb, and distributed to the radial side of the dorsal aspect of the thumb. [L. 142.]—**Innominate a.** Lat., *arteria innominata* (seu *anonyma*). Fr., *artère anonyme.* Ger., *ungenannte Pulsader.* Sp., *arteria inominada.* 1. An a. arising from the upper surface of the transverse portion of the arch of the aorta. It ascends obliquely toward the right sterno-clavicular articulation, opposite which it divides into the right subclavian and common carotid arteries. It lies in front of the trachea and pleura and behind the sternum, from which it is separated by the sterno-hyoid and sterno-thyroid muscles, the remains of the thymus gland, and the right innominate vein. It occasionally gives off the deep thyroid a. [L. 142.] 2. See *Clavicular a.*—**Intercostal arteries.** See *Anterior intercostal arteries, Aortic intercostal arteries, and Superior intercostal a.*—**Interlobular arteries of the kidney.** Lat., *arteriæ interlobulares.* Branches of the arterial arches formed at the bases of the pyramids, which run outward through the cortical substance, and are finally distributed to the Malpighian corpuscles and to a capillary network around the uriniferous tubules. [L. 142, 172.]—**Internal and anterior optic a.** Fr., *artère optique interne et antérieure.* A branch of the posterior communicating a. of the brain which ramifies on the anterior portion of the third ventricle, on the walls of the infundibulum, and is distributed to the optic thalamus. [H. Duret, l. c. (L).]—**Internal auditory a.** Lat., *arteria auditiva interna.* Fr., *artère auditive interne.* Ger., *innere Arterie des Ohres.* Sp., *arteria auditiva interna.* A branch either of one of the transverse branches of the basilar a. or of the superior cerebellar a., which accompanies the auditory nerve into the inner ear, and is distributed to the labyrinth. [L. 142.]—**Internal calcaneal arteries.** Fr., *artères calcanéennes internes.* A term applied to branches of the posterior tibial and peroneal arteries distributed to the parts on the inner side of the heel and sole of the foot. [L. 142, 172.]—**Internal carotid a.** Lat., *arteria carotidis interna.* Fr., *artère carotide interne.* Ger., *innere Kopfschlagader.* Sp., *arteria carótida interna.* One of the two terminal branches of the common carotid a. given off at the level of the upper border of the thyroid cartilage. It runs directly upward to the carotid canal in the temporal bone, which it traverses to enter the cranium by the foramen lacerum anticum; it then runs in the carotid groove of the sphenoid bone, at the end of which it bends upward on the inner side of the anterior clinoid process to the inner side of the fissure of Sylvius,

where it divides into the anterior and middle cerebral arteries. In the neck it lies at first behind the external carotid a., covered by the platysma myoides muscle and fascia; higher up it passes beneath the digastric and stylo-hyoid muscles, lying to the inner side of the external carotid a.; above these muscles it lies under the parotid gland, the styloid process of the temporal bone, and the stylo-pharyngeus muscle. Within the head it lies upon the floor of the cavernous sinus, which it perforates on the inner side of the anterior clinoid process. From the point at which it perforates the sinus to its termination it lies between the second and third cranial nerves. The internal jugular vein and the pneumogastric nerve are included with it in a prolongation of the carotid sheath during its passage through the neck. In addition to its terminal branches, it gives off the ophthalmic a. and numerous small branches to its vicinity. [L, 142.] See *ARTÈRE encéphalo-palatine*.—**Internal circumflex a. of the thigh.** Lat., *arteria circumflexa femoris interna*. Fr., *artère circonflexe interne de la cuisse*. Ger., *innere Kranzpulsader des Oberschenkels*. Sp., *arteria circumflexa interna*. An a. which arises from the inner and posterior part of the deep femoral a. just below its origin, and passes backward between the psoas and pectineus muscles toward the lesser trochanter of the femur, near which it divides into branches distributed to the hip joint and the muscles in that region. [L, 142.]—**Internal collateral elbow a.** See *Ulnar a.*—**Internal hæmorrhoidal a.** Lat., *arteria hæmorrhoidalis interna*. Fr., *artère hæmorrhoidale interne*. Ger., *innere Mastdarpulsader*. See *Superior hæmorrhoidal a.*—**Internal iliac a.** Lat., *arteria iliaca interna*. Fr.,

from the border of the sternum, to the interval between the sixth and seventh cartilages, where it divides into its terminal branches, the musculo-phrenic and superior epigastric arteries. In the upper part of its course it lies upon the pleura, but at its lower end it is separated from it by the triangularis sterni muscle. At its origin it is covered by the subclavian vein and is crossed from within outward by the phrenic nerve. Besides its terminal branches, it gives off the anterior intercostal arteries. [L, 142.]—**Internal maxillary a.** Lat., *arteria maxillaris interna*. Fr., *artère maxillaire interne*. Ger., *innere Kieferschlagader*. Sp., *arteria maxi-*

THE INTERNAL ILIAC ARTERY. (AFTER HENLE.)

AI, the common iliac; IL, the internal iliac; J, the external iliac; VS, the superior vesical; IL, the ilio-lumbar; O, the obturator; SL, a lateral sacral; G, the gluteal; ISC, the ischiadic; D, the a. of the vas deferens; VI, the inferior vesical; HM, the middle hæmorrhoidal.

*artère iliaque interne*. Ger., *innere Hüftpulsader*. Sp., *arteria iliaca interna*. A branch of the common iliac a. which extends from its bifurcation to the upper border of the great sacro-sciatic notch, where it divides into two branches, the anterior and posterior. At its origin it lies near the border of the psoas muscle, but lower down it rests against the sacrum and the lumbo-sacral cord, and is in its whole course covered by the peritoneum. From its anterior division it gives off the superior vesical, inferior vesical (vaginal in the female), middle hæmorrhoidal, obturator, internal pudic, sciatic, and in the female the uterine, arteries. From the posterior division are given off the ilio-lumbar and lateral sacral and gluteal arteries. [L, 142.]—**Internal laryngeal a.** Lat., *arteria laryngea interna*. Ger., *innere Kehlkopfarterie*. See *Superior laryngeal a.*—**Internal malleolar a.** Lat., *arteria malleolaris interna*. Fr., *artère malleolaire interne*. Ger., *innere Knöchelpulsader*. Sp., *arteria malleolar interna*. A branch of the anterior tibial a. which runs inward beneath the tendon of the tibialis anticus muscle to the inner malleolus, in the vicinity of which it is distributed. [L, 142.]—**Internal mammary a.** Lat., *arteria mammaria interna*. Fr., *artère mammaire interne*. Ger., *innere Brustpulsader*. Sp., *arteria mammaria interna*. A branch of the subclavian a. arising opposite the thyroid axis. It runs downward and forward to the posterior surface of the cartilage of the first rib, from which point it descends vertically behind the costal cartilages, about an inch

THE INTERNAL MAXILLARY ARTERY AND ITS BRANCHES. (AFTER HENLE.)

MI, the internal maxillary; CE, the external carotid; TPS, the superficial temporal; APR, the anterior auricular; T, the anterior tympanic; MM, the middle meningeal; AI, the anterior dental; MH, the mylo-hyoid; MT, the mental; TPR, the deep anterior temporal; PT, the pterygoid branch; MA, the masseteric; B, the buccinator; ASP, the posterior branch of the superior alveolar; IO, the infra-orbital; ASA, the anterior branch of the superior alveolar; VD, the vidian; SP, the sphenopalatine; PP, the pterygo-palatine; NPO, the nasopalatine; TPR, the deep posterior temporal; 1, the temporal muscle; 2, the external pterygoid muscle.

*lar interna*. One of the terminal branches of the external carotid a., which runs horizontally forward between the jaw and the internal lateral ligament of the temporo-maxillary articulation, and then passes obliquely forward and upward on either the inner or outer surface of the external pterygoid muscle to the sphenomaxillary fossa, where it breaks up into a number of branches. It is divided into the maxillary portion, or that part between the jaw and the internal lateral ligament; the pterygoid, or that portion lying upon the pterygoid muscle; and the sphenomaxillary, or that portion just outside of and within the sphenomaxillary fossa. From the first part are given off the deep auricular, anterior tympanic, middle and small meningeal, and inferior dental arteries; from the second the anterior and posterior temporal, buccal, and masseteric arteries, and branches to the pterygoid muscles; and from the third the posterior dental, infra-orbital, superior palatine, vidian, pterygo-palatine, and sphenopalatine arteries. [L, 142.]—**Internal obturator a.** Lat., *arteria obturatoria interna*. Fr., *artère obturatrice interne*. Ger., *innere Hüftbeinpulsader*. A branch of the obturator a. given off just external to the pelvis, which curves around the inner side of the obturator foramen, furnishes branches to the adjoining muscles, and anastomoses with the external obturator and internal circumflex arteries. [L, 172.]—**Internal ophthalmic a.** Fr., *artère ophthalmique interne*. A branch of the common carotid, in birds, distributed to the masseter muscle, the maxillary articulation, the lower eyelid, and the eye. [L, 158.]—**Internal palpebral arteries.** Lat., *arterie palpebrales inferiores*. The palpebral branches of the ophthalmic a. [L, 175.]—**Internal plantar a.** Lat., *arteria plantaris interna*. Fr., *artère plantaire interne*. Ger., *innere Fusssohlenpulsader*. Sp., *arteria plantar interna*. One of the terminal branches of the posterior tibial a., which runs outward in the groove between the abductor hallucis and flexor brevis muscles to the head of the first metatarsal bone, where it terminates by joining the plantar digital a. on the tibial side of the first toe. It furnishes branches to the structures through which it passes. [L, 142.]—**Internal posterior optic a.** See *Posterior internal optic a.*—**Internal pudic a.** Lat., *arteria pudenda interna*. Fr., *artère honteuse interne*. Ger., *innere Schampulsader*. Sp., *arteria pudenda interna*. The

terminal branch of the anterior division of the internal iliac a., distributed to the perineum and the external organs of generation. It arises in front of the pyriformis muscle, leaves the pelvis by the lower part of the great sacro-sciatic foramen, then curves forward over the spine of the ischium, enters the posterior portion of the perineal space by the lesser sacro-sciatic foramen, and runs along the outer wall of the ischio-rectal fossa about an inch above the tuberosity of the ischium. Running forward it pierces the base of the triangular ligament, passes forward in its folds to about the apex of the pubic arch, and terminates under the crus penis in the arteries of the bulb and of the penis. It gives off the external hemorrhoidal and superficial and transverse perineal arteries and the arteries of the bulb of the urethra and of the penis. [L. 31, 142.]—**Internal scapular a.** See *Subscapular a.*—**Internal spermatic a.** Lat., *arteria spermatica interna*. Fr., *artère spermatique interne*. A branch of the abdominal aorta which arises a little below the renal a., and runs down upon the psoas muscle to reach the internal abdominal ring, where it enters the inguinal canal. It passes down the canal with the other constituents of the spermatic cord and is distributed to the testicle. [L. 142.]—**Internal tarsal a.** Fr., *artère tarsienne interne*. A branch of the dorsal a. of the foot running forward and inward to the level of the bases of the metatarsal bones, and anastomosing with the internal plantar, continued on to the great toe. [L. 35.]—**Internal thoracic a.** Lat., *arteria thoracica interna*. Fr., *artère thoracique interne*. See *Internal mammary a.*—**Interpeduncular arteries.** Fr., *artères interpedunculaires*. Branches of the posterior cerebral a. distributed to the posterior perforated space and the lower portion of the peduncles. [H. Duret, l. c. (L).]—**Intestinal arteries.** Lat., *arterie intestinales*. Ger., *Dünndarm-pulsader*. A term applied to the small branches of the mesenteric arteries distributed to the intestines. [L. 175.]—**Ischiadic a.** Lat., *arteria ischiadica*. Fr., *artère ischiatique*. 1. See *Inferior gluteal a.* 2. A branch, in some quadrupeds, of the lateral sacral a. which passes under the upper portion of the vastus longus muscle and is distributed to the ischio-tibial muscles.—**Ischio-clitorian a.** See *ARTERIA CLITORIDIS*.—**Lacrimal a.** Lat., *arteria lacrimalis*. Fr., *artère lacrymale*. Ger., *Thränschlagader*. It., *arteria lagrimala*. Sp., *arteria lagrimal*. A branch of the ophthalmic a. which arises close to the optic foramen and runs along the upper border of the external rectus muscle to the lacrimal gland, to which it is principally distributed. It also gives off branches which pierce the malar bone and others distributed to the upper eyelid and the conjunctiva. [L. 142.]—**Large anastomotic a. of the arm.** See *Anastomotic a. of the arm.*—**Large a. of the thumb.** Lat., *arteria princeps pollicis*. Fr., *grande artère du pouce*. Ger., *grosse Daumenpulsader*. A branch of the radial a. which passes down between the metacarpal bone of the thumb and the muscles covering it to the space between the heads of the flexor brevis pollicis muscle, where it divides into the palmar collateral arteries. [L. 142.]—**Large collateral a. of the arm.** See *Profunda a. of the arm.*—**Large communicating radial a.** See *Profunda radial a.*—**Large lateral nasal a.** See *Sphenopalatine a.*—**Laryngeal arteries.** See *Superior laryngeal a.* and *Crico-thyroid a.*—**Lateral arteries of the sacrum.** See *Lateral sacral arteries.*—**Lateral coccygeal a.** The continuation of the lateral sacral a. of some quadrupeds, which runs along on each side of the sacrum. [L. 13.]—**Lateral nasal a.** Lat., *arteria nasalis lateralis*. Fr., *artère de l'aile du nez*. Ger., *seitliche Nasenarterie*. A branch of the facial a. which runs inward to the side of the nose, over which it ramifies, sending branches to the ala and dorsum. [L. 142.]—**Lateral sacral arteries.** Lat., *arterie sacrales laterales*. Fr., *artères sacrées latérales*. Ger., *seitliche Heiligbeinpulsader*. Branches of the internal iliac a. which run down on the anterior surface of the sacrum. They are distributed to the sacrum and its neighborhood. In man sometimes, in quadrupeds as a rule, they are united into one trunk. [L. 13, 142.]—**Lateral spinal arteries.** Lat., *arterie spiniales laterales*. Ger., *vordere Rückenmarkspulsader*. Branches of the vertebral arteries which enter the spinal canal through the intervertebral foramina. [L. 172.]—**Left bronchial arteries.** Lat., *arterie bronchiales sinistrae*. Fr., *artères bronchiales gauches*. Ger., *linke Luftröhrenpulsader*. Branches from the left side of the thoracic aorta, distributed to the posterior surface of the corresponding bronchus and the tissue of the left lung. The lower of the two is sometimes termed the inferior bronchial a. [L. 142.]—**Left cardiac a.** See *Left coronary a. of the heart.*—**Left colic a.** Lat., *arteria colica sinistra*. Fr., *artère colique gauche*. Ger., *linke Grimmdarmpulsader*. A branch of the inferior mesenteric a. which runs across the left kidney behind the peritonæum to the descending colon, where it divides into an ascending and a descending portion, which run upward and downward along the colon. This term is sometimes applied to the inferior mesenteric a. itself. [L. 142.]—**Left coronary a. of the heart.** Lat., *arteria coronaria cordis sinistra*. Fr., *artère coronaire gauche du cœur*. Ger., *linke Kranzpulsader des Herzens*. An a. arising from the left posterior sinus of Valsalva, which runs behind and to the left side of the pulmonary a. and divides into two branches, one of which runs in the groove between the left auricle and ventricle, and the other along the line of the interventricular septum, and is distributed to the tissue of the heart. [L. 142.]—**Left gastric a.** See *Left gastro-epiploic a.* Lat., *arteria gastro-epiploica sinistra*. Fr., *artère gastro-épiploïque gauche*. Ger., *linke Magenetzpulsader*. Sp., *arteria gastro-epiploica izquierda*. A branch of the splenic a. which runs along the greater curvature of the stomach from left to right, supplying branches to the stomach and the omentum on the left side and anastomosing with the right gastro-epiploic a. [L. 31, 142.]—**Left gastro-hepatic a.** See *Coronary a. of the stomach.*—**Left gastro-omental a.** See *Left gastro-epiploic a.*—**Left hepatic a.** Lat., *arteria hepatica sinistra*. Fr., *artère hépatique gauche*. Ger., *linke Leberpulsader*. An a. arising at a right angle from the hepatic a., which enters the liver at the left end of the

transverse fissure. It also furnishes branches to the Spigelian lobe. [L. 142.]—**Lenticulo-optic arteries.** Basal branches of the middle cerebral, distributed to the posterior portion of the internal capsule and the anterior part of the optic thalamus. [L. 189.]—**Lenticulo-striate arteries.** Branches of the middle cerebral a. distributed to the lenticular and caudate nuclei. [L. 189.]—**Lesser profunda a. of the arm.** See *Inferior profunda a. of the arm.*—**Lingual a.** Lat., *arteria lingualis*. Fr., *artère linguale*. Ger., *Zungenpulsader*. Sp., *arteria lingual*. A branch of the external carotid a. which is given off between the superior thyroid and facial arteries, usually opposite the great cornu of the hyoid bone. It ascends for a short distance and then curves downward, forming a loop crossed by the hypoglossal nerve, after which it runs beneath the digastric and stylo-hyoid muscles and passes forward along the upper border of the great cornu of the hyo d to the anterior border of the hyo-glossus muscle, whence it ascends to the lower surface of the tongue, along which it is continued as the ranine a. It gives off the hyoid, sublingual, and ranine arteries, and the dorsal a. of the tongue. [L. 142.]—**Long ciliary arteries.** Lat., *arterie ciliares longae*. Fr., *artères ciliaires longues*. Ger., *vordere Blendungspulsader*. Sp., *arterias ciliares largas*. Two branches of the posterior ciliary arteries, one on each side, which are distributed to the ciliary muscle and the iris. [L. 142.]—**Long thoracic a.** Lat., *arteria thoracica longa*. Fr., *artère thoracique longue*. See *External mammary a.*—**Lumbar arteries.** Lat., *arterie lumbales*. Ger., *Lendenpulsader*. Branches, usually five in number, of the abdominal aorta, which pass backward to the interval between the transverse processes of the vertebrae and divide into abdominal and dorsal branches. The abdominal branches are distributed to the lateral wall of the abdomen and the dorsal to the muscles and integument of the back, also sending branches through the intervertebral foramina to the spinal canal. [L. 142.]—**Malar arteries.** Branches of the lacrymal a. which pierce the malar bone to reach the temporal fossa, to which they are distributed. [L. 172.]—**Malleolar arteries.** See *External and Internal malleolar a.*—**Mammary arteries.** See *External and Internal mammary a.*—**Masseteric a.** Lat., *arteria masseterica*. Fr., *artère masséterine*. Ger., *Kaummuskelpulsader*. A branch of the pterygoid portion of the internal maxillary a. which passes outward through the sigmoid notch of the inferior maxilla to the deep surface of the masseter muscle, to which it is distributed. [L. 142.]—**Mastoid a.** Lat., *arteria mastoidea*. Fr., *artère mastoïdienne*. 1. A branch of the occipital a. which enters the skull through the mastoid foramen and is distributed to the dura mater and the diploe. 2. A branch of the posterior auricular a. running over the insertion of the sterno-cleido-mastoid muscle to the occipitalis muscle and the overlying integument, and anastomosing with the occipital a. [L. 142.]—**Maxillo-muscular a.** A branch, in some quadrupeds, of the external carotid a. distributed to the internal pterygoid and masseter muscles. [L. 13.]—**Median a.** Lat., *arteria media*. Fr., *artère du nerf médian*. Sp., *arteria del nervio medio*. A branch of the anterior interosseous a. of the arm which accompanies the median nerve and is distributed to its substance and to the flexor sublimis digitorum muscle. [L. 142.]—**Median sacral a.** See *Middle sacral a.*—**Medicerebellar a.** [Wilder]. See *Anterior inferior cerebellar a.*—**Medicerebral a.** [Wilder]. See *Middle cerebral a.*—**Medio-colic a.** See *Middle colic a.*—**Medullary arteries.** Fr., *artères médullaires*. 1. See *Nutrient arteries*. 2. The arteries of the medullary substance of the brain. [L.]—**Meningeal arteries.** See *Anterior meningeal arteries*, *Posterior meningeal a.*, *Inferior meningeal arteries*, *Middle meningeal a.*, and *Small meningeal a.*—**Mental a.** Lat., *arteria mentalis*. Fr., *artère mentale*. Ger., *Kinnpulsader*. The terminal branch of the inferior dental a., which passes out on to the face through the mental foramen and is distributed to the side of the chin and face. [L. 142.]—**Mesenteric arteries.** See *Great, Small, Superior, Inferior, and Middle mesenteric a.*—**Meso-lobar a.** Lat., *arteria meso-lobaris*. See *Anterior cerebral a.*—**Metacarpal a.** Lat., *arteria metacarpea*. The first dorsal interosseous a. of the hand. It arises from the radial a. beneath the extensor tendons of the thumb, frequently in common with the posterior radio-carpal a., and descends upon the second dorsal interosseous muscle to the level of the metacarpophalangeal articulation, where it divides into the dorsal digital arteries to the adjacent sides of the index and middle fingers. It communicates with the deep palmar arch. In the pl., the dorsal and palmar interosseous arteries. [L. 7, 142, 172.]—**Metatarsal a.** Lat., *arteria metatarsa*. Fr., *artère métatarsienne*. Ger., *erste Mittelfussrückenpulsader*. A branch of the dorsal a. of the foot, which arises near the bases of the metatarsal bones and runs outward beneath the extensor brevis muscle to anastomose with branches of the tarsal and external plantar arteries, forming the plantar arch. In the pl., the dorsal and plantar interosseous arteries. [L. 7, 142, 172.]—**Metatarso-pedal a.** One of the two terminal branches of the pedal a. of the horse and some other solipeds, which runs down the side of the metatarsus and divides into the collateral arteries of the digits. [L. 13.]—**Middle and internal frontal arteries.** Fr., *artères frontales moyenne et interne*. Branches of the anterior cerebral a. distributed to the convolution of the corpus callosum, the corpus callosum itself, the first and second frontal convolutions, and the upper part of the ascending frontal convolution. [L. 189.]—**Middle a. of the corpora quadrigemina.** Fr., *artère moyenne des tubercules quadrijumeaux*. A branch of the posterior cerebral a. which terminates in fine ramifications in the space between the corpora quadrigemina. [H. Duret, l. c. (L).]—**Middle articular a. of the knee.** Lat., *arteria articularis genu media*. Fr., *artère articulaire moyenne du genou*. Ger., *mittlere Kniegelenkpulsader*. Sp., *arteria articular media*. A branch of the popliteal a. which arises opposite the flexure of the knee joint, pierces the posterior ligament, and is distributed to the crucial ligaments and the structures within the joint. [L. 142.]—**Middle calcaneal arteries.** Lat., *arteria calcaneae mediae*. Several small branches of the posterior tibial a. distributed to the

outer and back surface of the os calcis. [L. 31.]—**Middle cerebral a.** Lat., *arteria cerebialis media*. Fr., *artère cérébrale moyenne*. Ger., *mittlere Gehirnpulsader*. Sp., *arteria cerebrial media*. One of the two terminal branches of the internal carotid a. which runs obliquely outward and upward in the fissure of Sylvius to the surface of the island of Reil, where it divides into branches distributed to the pia mater covering the outer surface of the cerebrum. It also gives off the anterior chorioid and lenticulo-nuclear arteries. [L. 31, 142.]—**Middle coccygeal a.** A branch of one of the sacral arteries of some of the lower animals, which runs down on the inferior surface of the caudal vertebrae, between the two depressor muscles of the tail, to its extremity. [L. 13.]—**Middle colic a.** Lat., *arteria colica media*. Fr., *artère colique moyenne*. Ger., *mittlere Dickdarmpulsader*. A branch of the superior mesenteric a. which runs forward between the layers of the transverse mesocolon toward the transverse colon, where it divides into two branches, one of which anastomoses with the right colic a. and the other with the left colic a. and a number of small branches distributed to the coats of the colon. [L. 142.]—**Middle external pudic a.** An occasional branch of the superficial epigastric a. distributed to the parts supplied by the inferior and superior external pudic arteries. [L. 179.]—**Middle hemorrhoidal a.** Lat., *arteria hemorrhoidalis media*. Fr., *artère hémorrhoidale moyenne*. Ger., *mittlere Mastdarmpulsader*. Sp., *arteria hemorrhoidal media*. An a. arising most commonly from the internal iliac, but occasionally from the inferior vesical or the internal pudic, which is distributed to the lower part of the rectum and anastomoses with the superior and inferior hemorrhoidal and inferior vesical arteries. [L. 142.]—**Middle meningeal a.** Lat., *arteria meningealis media*. Fr., *artère méningée moyenne*. Ger., *mittlere Hirnhautpulsader*. A branch of the internal maxillary a. which enters the cranium by the foramen spinosum and is distributed to the dura mater from the frontal bone in front to the occipital behind and as high as the vertex. [L. 142.]—**Middle mesenteric a.** Lat., *arteria mesenterica media*. An occasional branch of the common iliac a., furnishing branches to the transverse and descending colon. [L. 142.]—**Middle nasal a.** Lat., *arteria nasalis media*. Fr., *artère nasale moyenne*. See *Anterior nasal a.*—**Middle parietal a.** Fr., *artère pariétale moyenne*. A branch of the middle cerebral a. which ascends in the fissure of Rolando and is distributed to its convolutions and often to the anterior portion of the first parietal convolution. [H. Duret, l. c. (L).]—**Middle perforating a. of the thigh.** See *Second perforating a. of the thigh.*—**Middle sacral a.** Lat., *arteria sacralis media*. Fr., *artère sacrée moyenne*. Ger., *mittlere Heiligbeinpulsader*. A single a., arising from the abdominal aorta just above its bifurcation into the common iliac arteries, which runs downward upon the last lumbar vertebra and along the middle of the sacrum to the front of the coccyx, where it anastomoses with branches of the lateral sacral arteries and is continued onward through the median aponeurosis of the levator ani muscles to the coccygeal gland. It sends small branches to the sacrum and the parts between it and the rectum and to the rectum itself. [L. 142.]—**Middle suprarenal a.** See *Capsular a.*—**Middle temporal a.** Lat., *arteria temporalis media*. Fr., *artère temporale moyenne*. Ger., *mittlere Schläfenbeinpulsader*. Sp., *arteria temporal media*. A branch of the superficial temporal a. which arises close above the zygoma, ascends in a groove upon the squamous portion of the temporal bone, and is distributed to the temporal fossa. [L. 142.]—**Middle thyroid a.** Fr., *artère thyroïdienne moyenne*. An occasional branch of the common carotid a. distributed to the thyroid body. [L. 35.]—**Middle ureteric arteries.** Small branches of the aorta, or of the common iliac or internal spermatic a., distributed to the middle portion of the ureter. [L. 179.]—**Middle vesical (or vesicular) arteries.** Lat., *arterie vesicales mediae*. The posterior branches of the superior vesical. [C; L. 142.]—**Musculo-phrenic a.** Lat., *arteria musculo-phrenica*. Fr., *artère musculo-phrénique*. Ger., *Muskelzwerchfelpulsader*. The outer of the two terminal branches of the internal mammary a., which runs downward and outward behind the cartilages of the floating ribs. It gives off branches to the diaphragm, the lower intercostal spaces, and the abdominal muscles. [L. 142.]—**Mylo-hyoid a.** Lat., *arteria mylo-hyoidea*. Fr., *artère mylo-hyoïdienne*. Ger., *Kieferzungenbeinpulsader*. A branch of the inferior dental a. which runs downward in the mylo-hyoid groove and is distributed to the mylo-hyoid muscle. [L. 172.]—**Nasal a.** Lat., *arteria nasalis*. Fr., *artère nasale*. Ger., *Nasenarterie*. Sp., *arteria nasal*. A term applied to the anterior nasal and to the sphenopalatine arteries, but more properly to the latter. [L.] See also *Lateral nasal a.*—**Naso-palatine a.** Lat., *arteria naso-palatina*. Fr., *artère naso-palatine*. A branch of the sphenopalatine a. which runs down in the groove in the vomer and connects with the descending palatine through the incisive foramen. [L. 142.]—**Navel arteries.** See *Umbilical arteries.*—**Nutrient a. of the fibula.** Lat., *arteria nutiens fibulae*. A small branch of the peroneal a. which supplies the fibula. [L. 172.]—**Nutrient a. of the humerus.** See *Nutrient a. of the os brachii.*—**Nutrient a. of the ilium.** Lat., *arteria nutiens ilii*. A branch of the gluteal a., which enters the lower part of the ilium. [L. 7.]—**Nutrient a. of the os brachii.** Lat., *arteria nutiens ossis brachii*. Fr., *artère nourricière de l'humérus*. Ger., *Ernährungspulsader des Oberarmes*. A branch of the brachial a. which arises about the middle of the arm and enters the os brachii near the insertion of the coraco-brachialis muscle. [L. 172.]—**Nutrient a. of the radius.** Lat., *arteria nutiens radii*. Fr., *artère nourricière du radius*. Ger., *Ernährungspulsader der Speiche*. A branch of the anterior interosseous a. of the forearm, which supplies the radius. [L. 172.]—**Nutrient a. of the tibia.** Lat., *arteria nutiens tibiae*. Fr., *artère nourricière du tibia*. Ger., *Ernährungspulsader des Schienbeins*. A branch of the posterior tibial a. which descends upon the external and posterior surface of the tibia, which it enters through the nutrient foramen. It gives off branches to the adjacent muscles in its course. [L. 7.]—**Nutrient a. of the ulna.** Lat., *arteria nutiens ulnae*. Fr., *artère nourricière du cubitus*. Ger.,

*Ernährungspulsader der Ellenbogenröhre*. A branch of the anterior interosseous a. of the forearm supplying the ulna. [L. 7.]—**Nutrient branchial arteries.** Fr., *artères nourricières des branchies*. Branches of the efferent arterioles of the branchial capillary network of the *Branchiata*, distributed to the substance of the gills. [L. 158.]—**Obturator a.** Lat., *arteria obturatoria*. Fr., *artère obturatrice*. Ger., *Hüftbeinlochpulsader*. A branch of the internal iliac a., most commonly of its anterior division, resting upon the obturator portion of the pelvic fascia, which passes out of the pelvis through the upper part of the thyroide foramen, and upon the surface of the obturator membrane divides into an external and internal branch. The internal branch curves around the inner margin of the foramen and is distributed to the obturator, pectineus, gracilis, and adductor muscles, and anastomoses with the internal circumflex a. The external branch passes around the outer margin of the foramen to the space between the gemellus inferior and quadratus femoris muscles, where it anastomoses with the sciatic a. It supplies the obturator muscles and sends a branch to the hip joint. This vessel occasionally arises from the internal epigastric a., in which case it may curve along the free margin of Gimbernat's ligament and be wounded in the operation for femoral hernia. [L. 142, 172.]—**Occipital a.** Lat., *arteria occipitalis*. Fr., *artère occipitale*. Ger., *Hinterhauptspulsader*. Sp., *arteria occipital*. 1. A branch of the external carotid a. which arises from its posterior surface near the lower border of the digastric muscle. It runs upward to the interval between the transverse process of the atlas and the mastoid process of the temporal bone, whence it runs horizontally to the occipital bone, upon which it turns upward to divide near the occiput into branches. It gives off the mastoid a., the arteria princeps cervicis, and branches to the occiput and the muscles of the neck. [L. 7, 142, 172.] 2. A branch of the posterior cerebral a. distributed to the occipital convolutions and adjacent parts. [H. Duret, l. c. (L).]—**Occipito-dorsal a.** Fr., *artère occipito-dorsale*. A branch of the cervico-pulmonary a., distributed to the dorsal pectoral and the lateral cranial regions in the toad. [L. 158.]—**Occipito-meningeal a.** A branch of the vertebral a. distributed to the dura mater. [L. 115.]—**Occipito-muscular a.** One of the terminal branches of the occipital a. of many of the lower animals, distributed to the occiput. [L. 13.]—**Esophageal arteries.** Lat., *arterie œsophageæ*. Fr., *artères œsophagiennes*. Ger., *Speiseröhrenpulsadern*. See *Aortic and Inferior esophageal arteries.*—**Omphalo-mesenteric arteries.** Lat., *arterie omphalo-mesentericæ*. Fr., *artères omphalo-mésentériques*. Ger., *Nabelgekröspulsadern*. Sp., *arterias omphalo-mesentericas*. The larger of the branches into which the primitive aortæ of the embryo divide, subsequently developed into the umbilical arteries (the others becoming the iliacs). [A. Thomson (A. 5).]—**Ophthalmic a.** Lat., *arteria*

THE OPHTHALMIC ARTERY AND ITS BRANCHES. (AFTER HENLE.)

CI, the internal carotid; OP, the ophthalmic; LA, the lacrimal; SO, the supra-orbital; NF, the nasal; EA, the anterior ethmoidal; EP, the posterior ethmoidal; F, the frontal; N, the nasal; PELS, the arteria palpebralis lateralis superior; PBLI, the arteria palpebralis lateralis inferior; PBMI, the arteria palpebralis medialis superior; PBMS, the arteria palpebralis medialis inferior; C'', the long ciliary arteries; CR, the central retinal.

**ophthalmica.** Fr., *artère ophthalmique*. Ger., *Augenarterie*. Sp., *arteria oftálmica*. A branch from the internal carotid a. on the inner side of the anterior clinoid process, which enters the orbit through the optic foramen, below and on the outer side of the optic nerve. It passes across the optic nerve and then forward, beneath the lower border of the superior oblique muscle, to the inner angle of the eye, where it divides into the frontal and the nasal arteries. Its branches are divided into those distributed to the orbit and surrounding parts and those which supply the muscles and globe of the eye. Its orbital branches are the lacrymal, supra-orbital, anterior

and posterior ethmoidal, inferior and superior palpebral, frontal, and nasal arteries. The ocular branches are the anterior short and long ciliary arteries, the central retinal a., and branches to the ocular muscles. [L, 142, 172.]—**Orbital a.** A small a. arising from either the superficial or middle temporal a., which runs forward across the zygoma to supply the outer portion of the orbicularis palpebrarum muscle and the integument. [L, 142.]—**Outer dorsal a. of the thumb.** Lat., *arteria pollicis ulnaris dorsalis*. Fr., *artère cubito-dorsale du pouce*. A branch of the radial a. running on the radial side of the dorsal aspect of the thumb. [L, 7, 142.]—**Ovarian a.** Lat., *arteria ovarii*. Fr., *artère ovarienne*. A branch of the abdominal aorta of the female which corresponds to the internal spermatic a. of the male. It runs downward upon the psoas muscle as far as the margin of the pelvis, where it inclines inward between the layers of the broad ligament to the attached margin of the ovary, which it supplies. It sends off a branch which accompanies the round ligament into the inguinal canal, a second along the oviduct, and a third which anastomoses with the uterine a. [L, 142.]—**Palatine arteries.** See *Anterior, Superior, and Inferior palatine a.*—**Palato-labial a.** See *Facial a.* and *Superior palatine a.*—**Palato-maxillary a.** See *Superior palatine a.*—**Palmar digital arteries.** Lat., *arteriae digitales volares*.

THE PALMAR ARCHES. (AFTER HENLE.)

R, the radial artery; U, the ulnar; MV, the superficial volar; MVS, the arteria metacarpa volaris ulnaris sublimis; MUP, the arteria metacarpa volaris ulnaris profunda; DC, DC2, DC3, the palmar digital arteries; IMV1, IMV2, IMV3, the palmar interosseous arteries; IMV4, one of the posterior perforating arteries; DV, the collateral digital arteries.

Fr., *artères digitales palmaires*. Ger., *Hohlhandfingerpulsadern*. Branches, usually four in number, from the convex surface of the superficial palmar arch, which are distributed to both sides of the three inner fingers and the ulnar side of the index finger. The first is distributed to the ulnar side of the little finger; the three others run down in the intermetacarpal spaces to the roots of the fingers, where they divide into the collateral digital arteries. [L, 142.]—**Palmar interosseous arteries.** Lat., *arteriae interossee volares*. Fr., *artères métacarpiennes palmaires*. Ger., *Hohlhandmittelhåndpulsadern*. Branches, usually three in number, which arise from the deep palmar arch, run down upon the interosseous muscles, and at the roots of the fingers inosculate with the palmar digital arteries. They also supply branches to the deep structures of the palm of the hand. [L, 142.]—**Palpebral arteries.** See *Superior and Inferior palpebral a.* and *External and Internal palpebral arteries*.—**Pancreatico-duodenal a.** Lat., *arteria duodenalis inferior*. A branch of the hepatic a., distributed to the adjacent margins of the pancreas and the duodenum. [L, 172.] See also *Superior pancreatico-duodenal a.*—**Parietal a.** A branch of the occipital a. (1st def.) which pierces the parietal bone and ramifies over the superior longitudinal sinus. [L, 45.]—**Parieto-sphenoidal a.** A branch of the middle cerebral a. distributed to the inferior parietal lobule, the angular gyrus, and the upper part of the cortex of the sphenoidal lobe. [L, 189.]—**Pedal a.** Lat., *arteria pedica*. Fr., *artère pédieuse*. See *Dorsal a. of the foot*.—**Perforating arteries of the hand.** Branches of the deep palmar arch which pass backward between the heads of the last three dorsal interosseous mus-

cles to inosculate with the dorsal interosseous arteries. [L, 172.]—**Pericephalic a.** See *External carotid a.*—**Perineal a.** Lat., *arteria perinaealis*. A term used by some anatomists for the superficial perineal a. or for the trunk from which the superficial and transverse perineal arteries arise. [L.] See also *A. of the penis*.

THE PERINEAL ARTERIES. (AFTER HENLE.)

PUI, the internal pudic; HE, the external hemorrhoidal; PE, the perineal; SPO, the posterior scrotal; PN, the a. of the penis; BB, the a. of the bulb of the urethra; UR, the arteria urethralis; DP, the dorsal a. of the penis; PRP, the a. of the corpus cavernosum.

—**Peroneal a.** Lat., *arteria peronea*. Fr., *artère péronière*. Ger., *Madenbeinpulsader*. Sp., *arteria peronéa*. A branch of the posterior tibial a., which arises about an inch below the lower border of the popliteus muscle and descends along the inner border of the fibula to the lower end of the interosseous space, where it divides into the anterior and posterior peroneal arteries. It gives off branches to the muscles of the calf, the nutrient a. of the fibula, and a branch of communication with the posterior tibial a. [L, 142.] See also *Anterior peroneal a.* and *External calcaneal arteries*.—**Perpendicular a.** A vessel which arises at right angles from the digital a. of the hind leg of the horse and some other animals, and is distributed to the neighborhood of the fetlock. [L, 13.]—**Pharyngeal a.** A branch of the facial a. in some quadrupeds, analogous to the superior pharyngeal a. of man. [L, 13.] See also *Ascending pharyngeal a.* and *Pterygo-palatine a.*—**Phrenic arteries.** See *Superior phrenic a.* and *Inferior phrenic arteries*.—**Placental a.** A name suggested by B. Ridge for the umbilical vein. [A, 79.]—**Plantar a.** Lat., *arteria plantaris*. Ger., *Fusssohlenpulsader*. A term applied to the posterior tibial a. on the sole of the foot, before it divides into the external and internal plantar arteries. [L, 174.] See also *Deep plantar a.*—**Plantar digital arteries.** Lat., *arteriae digitales plantares*. Fr., *artères digitales plantaires*. Ger., *Sohlenzehenpulsadern*. The branches of the plantar interosseous arteries which are distributed to the sides of the plantar aspect of the toes. They pass down to the distal phalanx, where they form an arch from the convexity of which small branches pass to the extremity of the toe and to the matrix of the nail. [L, 142, 172.]—**Plantar interosseous arteries, Plantar metatarsal arteries.** Lat., *arteriae interossee plantares*. Fr., *artères interosseuses plantaires*. Ger., *Sohlenmittelfusspulsadern*. Sp., *arterias interossee plantares*. Branches from the convexity of the plantar arch, which run downward in the interosseous spaces to the bases of the second phalanges, where they divide into the plantar digital arteries. They also give off the anterior and posterior perforating arteries of the foot. [L, 142.]—**Plantar-pollicar a.** A branch of either the anterior tibial or the external plantar a., which runs downward in the first interosseous space and divides into the dorsal digital arteries of the great toe. [L, 179.]—**Pollicar a.** See *Large a. of the thumb*.—**Popliteal a.** Lat., *arteria poplitea*. Fr., *artère poplitée*. Ger., *Kniekehlpulsader*. Sp., *arteria poplitea*. The

continuation of the femoral a. which extends from the opening in the adductor magnus muscle to the lower border of the popliteus muscle, where it divides into the anterior and posterior tibial arteries. It lies deep in the popliteal space, being covered at its upper end by the semimembranosus muscle, and lower

THE PLANTAR ARTERIES. (AFTER HENLE.)

TP, the posterior tibial; PLM, the internal plantar; PLL, the external plantar; PLP, the deep plantar; SPM, the arteria superficialis pedis medialis; DC1, DC2, DC3, DC4, the plantar interosseous arteries; DV5, the arteria digitalis plantaris propria lateralis quinti digiti; PFP, one of the posterior perforating arteries; PFA, one of the anterior perforating arteries.

down by the gastrocnemius, the plantaris, and the upper part of the soleus. It furnishes muscular branches to the lower part of the muscles of the thigh, the superior and inferior, internal and external, and middle articular arteries of the knee, and the sural arteries. [L. 142.]—**Popliteal articular arteries.** See *Articular arteries of the knee.*—**Postcerebellar a.** [Wilder]. See *Posterior inferior cerebellar a.*—**Postcerebral a.** [Wilder]. See *Posterior cerebral a.*—**Postchorioid arteries** [Wilder]. See *Posterior chorioid arteries.*—**Postcommunicant a.** [Wilder]. See *Posterior communicating a. of the brain.*—**Posterior abdominal a.** Fr., *artère abdominale postérieure.* See *Deep epigastric a.*—**Posterior and internal frontal arteries.** Fr., *artères frontales postérieures et internes.* Branches of the anterior cerebral a. distributed over the quadrate lobe. [L. 189.]—**Posterior a. of the cavernous sinus (or of the receptacle).** A branch given off from the internal carotid a. in the carotid canal, distributed to the posterior clinoid process, the fourth, fifth, and sixth cranial nerves, and the dura mater in its vicinity. [L. 179.]—**Posterior auricular a.** Lat., *arteria auricularis posterior.* Fr., *artère auriculaire postérieure.* Ger., *hintere Ohrarterie.* Sp., *arteria auricular posterior.* A branch of the external carotid a. which runs upward under the parotid gland to the groove between the cartilage of the ear and the mastoid process of the temporal bone, where it divides into the auricular and mastoid branches. It also gives off the stylo-mastoid a. [L. 142.]—**Posterior cecal a.** A branch of the superior mesenteric distributed to the posterior surface of the cecum. [L. 179.]—**Posterior cerebral a.** Lat., *arteria cerebri posterior.* Fr., *artère cérébrale postérieure.* Ger., *hintere Gehirnpulsader.* Sp., *arteria cerebral posterior.* One of the two terminal branches of the basilar a., which passes upward from the upper border of the pons Varolii to the lower surface of the posterior part of the cerebrum. It gives off the posterior communicating and posterior chorioid arteries and branches to the occipital lobe and to the inner and lower parts of the temporo-sphenoidal lobe. [L. 142.] See also *Vertebral a.*—**Posterior cervical a.** Lat., *arteria cervicalis posterior.* Fr., *artère cervicale.* Ger., *hintere Nackenpulsader.* 1. A branch of the trans-

verse cervical a. which runs upward between the levator anguli scapulae and splenius colli muscles, to which it is principally distributed, and ends by anastomosing with the superficial cervical a. 2. See *Deep cervical a.*—**Posterior chorioid arteries.** Lat., *arteriae chorioideae posteriores.* Ger., *hintere Adernzuspulsader.* Branches of the posterior cerebral a. distributed to the upper portion of the chorioid plexus. [L. 142.]—**Posterior ciliary arteries.** Lat., *arteriae ciliares posteriores.* Fr., *artères ciliaires postérieures.* Ger., *hintere Blendungspulsader.* Sp., *arterias ciliares posteriores.* Branches of the ophthalmic a. which pass forward, surrounding the optic nerve, to the sclerotic, which they pierce near the optic nerve, and divide in the chorioid coat into the long and short ciliary arteries. [L. 142.]—**Posterior circumflex a. of the arm.** Lat., *arteria circumflexa humeri posterior.* Fr., *artère circouflexe postérieure de l'humérus.* Ger., *hintere Kranzarterie des Armes.* A branch of the axillary a. which arises just below the lower border of the subscapularis muscle and runs backward in company with the circumflex nerve through the space formed by the teres major muscle, the tendon of the long head of the triceps, and the os brachii. It winds around the bone and terminates in the substance of the deltoid muscle, giving off branches to the structures in its neighborhood. [L. 142.]

—**Posterior circumflex a. of the shoulder.** See *Prehumeral a.*—**Posterior circumflex a. of the thigh.** See *Internal circumflex a. of the thigh.*—**Posterior colic a.** Fr., *artère colique postérieure.* An a. which runs along the free margin of the colon in the horse. [L. 158.]—**Posterior communicating a. of the brain.** Lat., *arteria communicans posterior.* Fr., *artère communicante postérieure.* Ger., *hintere Verbindungspulsader.* A short vessel connecting the posterior cerebral and internal carotid arteries on each side. [L.] Cf. *CIRCLE of Willis.*—**Posterior cubital recurrent a.** See *Posterior ulnar recurrent a.*—**Posterior dental a.** Lat., *arteria dentalis posterior.* Fr., *artère dentaire postérieure.* Ger., *hintere Zahnpulsader.* A branch of the sphenomaxillary portion of the internal maxillary a., distributed to the molar and bicuspid teeth and the mucous membrane of the maxillary sinus. [L. 142.]—**Posterior dorsal a. of the penis.** An analogue of the dorsal a. of the penis of man, in some quadrupeds. [L. 13.]—**Posterior dorso-interosseous a. of the arm.** See *Posterior interosseous a. of the arm.*—**Posterior ethmoidal a.** Lat., *arteria ethmoidalis posterior.* Fr., *artère ethmoïdale postérieure.* Ger., *hintere Riechbeinpulsader.* Sp., *arteria ethmoid posterior.* A branch of the ophthalmic a., which passes through the internal orbital canal and is distributed to the mucous membrane of the posterior ethmoidal cells and of the upper part of the nose. [L. 142.]—**Posterior iliac a.** See *Gluteal a.*—**Posterior inferior cerebellar a.** Lat., *arteria cerebelli inferior posterior.* Fr., *artère cérébelleuse inférieure postérieure.* Ger., *hintere und untere Hirnpulsader.* A branch either of the vertebral or of the basilar artery, which arises near the pons Varolii and runs backward and outward to the forepart of the vallicula, where it divides into two branches, which are distributed to the lower and back portion of the cerebellum. [L. 142.]—**Posterior internal optic a.** Fr., *artère optique interne postérieure.* A branch of the posterior communicating a. of the brain, or of the posterior cerebral a., which is distributed to the optic thalamus. [H. Duret, l. c. (L).]—**Posterior interosseous a. of the forearm.** Lat., *arteria interossea antibrachii posterior.* Fr., *artère interosseuse postérieure de l'avant-bras.* Ger., *hintere Zwischenknochenpulsader.* A branch of the common interosseous a. of the forearm, which passes to the posterior surface of the forearm through the interval between the oblique ligament and the upper border of the interosseous membrane. It runs downward between the superficial and deep extensor muscles and ends near the wrist by anastomosing with the rete carpeum dorsale. It gives off the posterior interosseous recurrent a. and numerous branches to the muscles of the back of the forearm.—**Posterior interosseous recurrent a. of the arm.** See *Posterior radial recurrent a.*—**Posterior mediastinal arteries.** Lat., *arteriae mediastinae posteriores.* Fr., *artères médiastinales postérieures.* Ger., *hintere Mittelfellpulsader.* Branches of the thoracic aorta distributed to the glands and areolar tissue of the posterior mediastinum. [L. 172.]—**Posterior meningeal a.** Lat., *arteria meningea posterior.* Fr., *artère méningée postérieure.* Ger., *hintere Hirnhautpulsader.* Sp., *arteria meningea posterior.* 1. A branch of the vertebral a. given off opposite the foramen magnum, distributed to the dura mater of the lower occipital fossa and to the falx cerebelli. [L. 142.] 2. A branch of the inferior pharyngeal a. distributed to the dura mater. [L.]—**Posterior metacarpal interosseous arteries.** Two branches, in some quadrupeds, of the radio-palmar a., distributed to the lateral and anterior portions of the metacarpus. [L. 13.]—**Posterior palatine a.** See *Superior palatine a.*—**Posterior parietal a.** Fr., *artère pariétale postérieure.* A branch of the middle cerebral a. distributed to the inferior parietal and the first temporal convolutions. [H. Duret, l. c. (L).]—**Posterior perforating arteries of the foot.** Lat., *arteriae perforantes posteriores.* Three branches of the plantar arch which pass backward through the back part of the three outer interosseous spaces to innosculate with the dorsal interosseous arteries of the foot. [L. 142.]—**Posterior peroneal arteries.** Fr., *artères péronières postérieures.* Sp., *arterias peróneas posteriores.* See *External calcaneal arteries.*—**Posterior radial carpal a.** See *Posterior radio-carpal a.*—**Posterior radial recurrent a.** Lat., *arteria radialis recurrens posterior.* Fr., *artère récurrente radiale postérieure.* Sp., *arteria recurrente radial posterior.* A branch of the posterior interosseous a. of the forearm, which passes up beneath the anconeus muscle to the interval between the olecranon and the external condyle, and terminates by anastomosing with the superior profunda and posterior ulnar recurrent arteries. [L. 142.]—**Posterior radio-carpal a.** Lat., *arteria carpea dorsalis radiatis.* Fr., *artère dorsale du carpe.* A branch of the radial a., which runs transversely across the back of the carpus and, uniting with a similar branch of the ulnar a., assists

in forming the rete carpeum dorsale. [L. 7.]

—**Posterior scapular a.** Lat., *arteria dorsalis scapulae*. Fr., *artère scapulaire postérieure*. Ger., *Rückenschlagader des Schulterblatts*. Sp., *arteria escapular posterior*. A branch of either the transverse cervical or the subclavian a., which runs backward to the upper angle of the scapula, where it turns and passes downward to the inferior angle of the bone. Close to the upper angle of the scapula it gives off the supra-spinous a., and during its course numerous branches to the adjoining muscles. [L. 142.]

—**Posterior scrotal arteries.** Lat., *arteriae scrotales posteriores*. Fr., *artères scrotales postérieures*. Branches of the internal pudic a. distributed to the posterior portion of the scrotum. [L. 31.] —**Posterior spinal a.** Lat., *arteria spinalis posterior*. Fr., *artère spinale postérieure*. Ger., *hintere Rückenmarkspulsader*. Sp., *arteria spinal posterior*. A branch of the vertebral a., given off at the side of the medulla oblongata, which descends behind the posterior roots of the spinal nerves as far as the cauda equina. It is distributed to the contents of the spinal canal and receives branches through the intervertebral foramina from the intercostal and lumbar arteries. [L. 172.] —**Posterior temporal a.** Lat., *arteria temporalis posterior*. Fr., *artère temporale postérieure*. 1. A branch of the superficial temporal a., which runs upward upon the temporal fascia and is distributed to the side of the head and to the vertex. [L. 142.] 2. A branch of the posterior cerebral a. distributed to the hippocampal convolution, the third temporal convolution, and the lobulus fusiformis, terminating at the inferior occipitotemporal sulcus. [H. Duret, l. c. (L); L., 189.]

—**Posterior tibial a.** Lat., *arteria tibialis posterior*. Fr., *artère tibiale postérieure*. Ger., *hintere Schienbeinpulsader*. Sp., *arteria tibial posterior*. The larger of the two terminal branches of the popliteal a., which extends from the lower border of the popliteus muscle to the lower border of the internal annular ligament of the ankle, where it divides into the external and internal plantar arteries. It gives off numerous unnamed branches to the integument and muscles of the posterior portion of the calf, the nutrient a. of the tibia, and the peroneal and internal malleolar

POSTERIOR TIBIAL ARTERY. (AFTER HENLE.)

PO, the popliteal; TA, the anterior tibial; TP, the posterior tibial; PC, the peroneal; RTA, the anterior tibial recurrent; RTP, the posterior tibial recurrent; FS, the superior fibular; NUT, the nutrient a. of the fibula; NUF, the nutrient a. of the tibia; PPF, the anterior peroneal; COM, the arteria anastomotica transversa; MAM, the arteria malleolaris anterior medialis; MPM, the internal malleolar; MPM, the arteria malleolaris posterior medialis; CAM, the middle calcaneal; PLM, the internal plantar; PLL, the external plantar.

arteries. [L. 142.] —**Posterior tibial recurrent a.** Lat., *arteria tibialis recurrens posterior*. Fr., *artère tibiale récurrente postérieure*. Ger., *hintere zurücklaufende Schienbeinpulsader*. A branch of the anterior tibial a., which runs up beneath the popliteus muscle to the back of the knee joint where it anastomoses with the inferior articular arteries of the knee. [L. 13, 142.] —**Posterior ulnar carpal a.** See *Posterior ulno-carpal a.* —**Posterior ulnar recurrent a.** Lat., *arteria recurrens ulnaris posterior*. Fr., *artère récurrente cubitale postérieure*. Ger., *hintere zurücklaufende Ellenbogenpulsader*. A branch of the upper part of the ulnar a., sometimes arising with the anterior recurrent from a common trunk, which runs upward and backward beneath the flexor sublimis muscle to the inner condyle of the os brachii. It gives off branches to the ulnar nerve, the elbow joint, and the muscles in its vicinity, and anastomoses with the inferior profunda, anastomotic, and posterior radial recurrent arteries. [L. 142.] —**Posterior ulno-carpal a.** Lat., *arteria carpea dorsalis ulnaris*. Fr., *artère dorsale du carpe*. A branch of the ulnar a., which passes across the dorsal surface of the carpus and, uniting with a similar branch of the radial a., assists in forming the rete carpeum dorsale. [L. A.] —**Posterior vertebral arteries.** See *Primitive aorta*. —**Præcippa mesentericum accedens a.** See *Superior mesenteric a.* —**Præcerebellar a.** [Wilder]. See *Superior cerebellar a.* —**Præchordoid arteries** [Wilder]. See *Anterior chortoid arteries*. —**Præcommunicant a.** [Wilder]. See *Anterior communicating a. of the brain*. —**Prehumeral a.** A branch of the brachial a. of some quadrupeds, which passes down between the two heads of the coraco-humeral muscle and terminates in the substance of the mastoidohumeral muscle. It supplies the shoulder joint and the adjacent muscles. [L. 13.] —**Preplantar a.** See *Preplantar ungual a.* One of the terminal branches of the digital a. of the horse and some other animals, which passes down through the preplantar fissure and is distributed to the bulb of the heel and to the villous and laminal tissues of the foot. [L. 13.] —**Prepubic a.** A branch, in the solipeds, of the external iliac or femoral a., which passes through the crural ring and divides into two branches, which are the analogues of the superficial epigastric, the epigastric, and the external pudic arteries of man. [L. 13.] —**Prevertebral a.** Fr., *artère prévertébrale*. A branch, in some quadrupeds, of the occipital a., which is distributed to the meninges and to the rotator muscles of the head. [L. 13.] See also *Posterior meningeal a.* —**Primary iliac a.** See *Common iliac a.* —**Primitive a.** See *Primitive aorta*. —**Primitive carotid a.** See *Common carotid a.* —**Primitive iliac a.** See *Common iliac a.* —**Profunda a. of the clitoris.** See *Cavernous a. of the clitoris*. —**Profunda a. of the thigh.** See *Deep femoral a.* —**Profunda femoris a.** See *Deep femoral a.* —**Profunda penis a.** See *A. of the corpus cavernosum*. —**Profunda radial a.** Lat., *arteria collateralis radialis inferior*. Fr., *artère collatérale externe*. The termination of the superior profunda a. of the arm at the back of the elbow. [L. 1796.] —**Profunda tibial a. of the foot.** The innermost branch of the internal plantar a., which runs down on the border of the abductor pollicis muscle and unites with the plantar pollicar a. [L. 179.] —**Pterygo-palatine a.** Lat., *arteria pterygo-palatina*. Fr., *artère pterygo-palatine*. Ger., *Flügelpulsader*. A branch of the sphenomaxillary a., which passes through the pterygo-palatine canal, and is distributed to the Eustachian tube and the upper part of the pharynx. [L. 172.] —**Pudic arteries.** See *Accessory pudic*, *Inferior external pudic*, *Internal pudic*, *Middle external pudic*, and *Superior external pudic a.* —**Pulmonary a.** Lat., *arteria pulmonalis*. Fr., *artère pulmonaire*. Ger., *Lungenarterie*. Sp., *arteria pulmonal*. The vessel which arises from the left side of the base of the right ventricle of the heart and terminates by dividing into the right and left pulmonary arteries close to the lower side of the arch of the aorta. The right a. runs outward behind the ascending aorta and the superior vena cava to the root of the lung, where it divides into two branches. The left a. passes in front of the descending aorta and the left bronchus, where it also divides into two branches. They divide into branches which accompany the bronchial tubes and terminate in the pulmonary capillaries. [L. 172.] —**Pyloric a.** Lat., *arteria pylorica*. Fr., *artère pylorique*. Sp., *arteria pilórica*. 1. A branch of the hepatic a., which reaches the stomach at the pylorus and runs from right to left, along the smaller curvature, to anastomose with the coronary a. of the stomach. 2. A branch of the gastro-duodenal a. distributed to the pylorus. [L. 172.] —**Radial a.** Lat., *arteria radialis*. Fr., *artère radiale*. Ger., *Speichenpulsader*. Sp., *arteria radial*. The smaller of the two terminal branches of the brachial a. It commences at a point opposite the neck of the radius, and runs along the outer part of the forearm to the styloid process of the radius, where it turns around the outer border of the wrist to the upper border of the space between the metacarpal bones of the thumb and index finger, and passes into the palm of the hand, terminating in the deep palmar arch. Its position in the forearm is indicated by a line extending between the middle of the bend of the elbow and the space between the scaphoid bone and the extensor tendons of the thumb. It gives off the anterior radial recurrent, anterior radio-carpal, superficial volar, posterior radio-carpal, and first dorsal interosseous arteries, the dorsal arteries of the thumb and index finger, the large a. of the thumb, and the arteria radialis indicis. [L. 142, 172.] —**Radial recurrent a.** Lat., *arteria radialis recurrens*. Fr., *artère radiale récurrente*. A term applied to the anterior and posterior radial recurrent arteries, but more properly restricted to the former. [L.] —**Radialis indicis a.** Lat., *arteria radialis indicis*. Fr., *artère radio-dorsale de l'index*. A branch of the radial a., which descends between the abductor indicis and the adductor pollicis muscles, and runs along the radial side of the index finger to its extremity. [L. 172.] —**Radio-carpal transverse palmar a.** See *Anterior radio-carpal a.* —**Radio-palmar a.** Lat., *arteria radio-palmaris*. Fr., *artère radio-palmar*. See *Superficial volar a.* —**Ranine a.** Lat., *arteria ranina*. Fr., *artère ranine*. Ger., *Seitenzungenerterie*. The continuation

of the lingual a., which passes forward from the lower surface of the tongue to its tip, where it anastomoses with its fellow, forming a small loop. In the last part of its course it lies close to the frænum and may be wounded in the operation for tongue-tie. It is distributed to the substance of the tongue. [L, 172.]—**Renal a.** Lat., *arteria renalis*. Fr., *artère rénale*. Ger., *Nierenpulsader*. A branch of the abdominal aorta, which arises a little below the superior mesenteric a., that of the left side being usually a little the lower. It runs at nearly a right angle to the hilum of the kidney, where it divides into several branches distributed to the substance of that organ. It also gives off the inferior suprarenal and the superior ureteric arteries. [L, 31, 142.]—**Retinal arteries.** See *Central retinal a.*, *ARTERIE nasales retine superiores et inferiores*, *ARTERIE temporales retine superiores et inferiores*, *ARTERIE maculares retine superiores et inferiores*, and *ARTERIE mediana retine*.—**Retrograde colic a.** A term applied, in some quadrupeds, to a branch of the superior mesenteric a., which runs along the colon in a direction opposite to that taken by the food, and anastomoses with the direct colic a. [L, 12.]—**Retrograde occipital a.** See *Atloido-muscular a.*—**Rhachidian arteries.** See *ARTERIE spinales*.—**Right bronchial a.** Lat., *arteria bronchialis dextra*. Fr., *artère bronchique droite*. The vessel which is distributed to the tissue of the right lung. It arises from the first aortic intercostal a. or, by a common trunk with the upper left bronchial, from the thoracic aorta. [L, 142.]—**Right cardiac a.** See *Right coronary a. of the heart*.—**Right colic a.** Lat., *arteria colica dextra*. Fr., *artère colique droite*. Ger., *rechte Dickdarm-pulsader*. A branch of the superior mesenteric a., which runs transversely across to the right side, lying beneath the peritonæum, to the middle of the ascending colon, where it divides into two branches, one of which communicates with the ileo-colic and the other with the middle colic a. [L, 142.] See also *Direct colic a.*—**Right coronary a. of the heart.** Lat., *arteria coronaria cordis dextra*. Fr., *artère coronaire droite du cœur*. An a. arising from the anterior sinus of Valsalva, which runs forward between the pulmonary a. and the right auricular appendix to the right auriculo-ventricular groove, which it follows for a certain distance and then divides into two branches, one of which runs in the left auriculo-ventricular groove and the other in the posterior interventricular groove. [L, 142.]—**Right coronary a. of the stomach.** See *Pyloric a.*—**Right gastric a.** **Right gastro-epiploic a.** Lat., *arteria gastro-epiploica dextra*. Fr., *artère gastro-épiploïque droite*. Ger., *rechte Magenetzpulsader*. Sp., *arteria gastro-epiploica derecha*. The continuation of the gastro-duodenal a., which runs from right to left along the great curvature of the stomach, between the layers of the great omentum, and anastomoses with the left gastro-epiploic a. [L, 31.]—**Right hepatic a.** Lat., *arteria hepatica dextra*. Fr., *artère hépatique droite*. Ger., *rechte Leberarterie*. A branch of the hepatic a., which runs outward to the transverse fissure, where it divides into several small branches distributed to the substance of the liver. It also gives off the cystic a. [L, 142.]—**Right subclavian a.** A term sometimes applied to the innominate a. [L.]—**Right superior duodenal a.** See *Superior pancreatico-duodenal a.*—**Sacral arteries.** See *Middle sacral a.* and *Lateral sacral arteries*.—**Sacra media a.** See *Middle sacral a.*—**Sacro-lateral arteries.** See *Lateral sacral arteries*.—**Sacro-median a.** See *Middle sacral a.*—**Saphena a.** An a. arising at an acute angle from the femoral a. of the horse and some other quadrupeds, which runs down the leg in company with the saphenous vein, and is distributed to the hollow of the hock and the anterior surface of the lower third of the leg. [L, 13.]—**Scapular arteries.** See *Clavicular a.*, *Subscapular a.*, *Acromial a.*, *Posterior scapular a.*, *Circumflex a. of the scapula*, and *Suprascapular a.*—**Scapular circumflex a.** See *Circumflex a. of the scapula*.—**Scapulo-humeral a.** See *Posterior circumflex a. of the arm*.—**Sclatic a.** Lat., *arteria ischiadica*. The larger of the two terminal branches of the internal iliac a., which descends upon the anterior surface of the pyriformis muscle and the sacral plexus to the lower part of the great sacro-sciatic foramen, where it passes out of the pelvis in company with the internal pudic a. and the sciatic nerve. It then turns downward beneath the gluteus maximus muscle and ends in a small branch distributed to the integument of the back of the thigh. It gives off the comes nervi ischiadici a. and branches to the coccyx and to the parts it traverses.—**Scrotal arteries.** See *Anterior scrotal a.* and *Posterior scrotal arteries*.—**Second perforating a. of the thigh.** Lat., *arteria perforans secunda*. Fr., *artère perforante seconde de la cuisse*. Ger., *zweite durchbohrende Pulsader*. A branch of the deep femoral a., given off a little below the lower border of the pectineus muscle, sometimes in common with the first perforating a., which pierces the adductor magnus and longus muscles, and is distributed to the muscles of the posterior aspect of the thigh. [L, 142.]—**Short ciliary arteries.** Lat., *artérie ciliares breves*. Fr., *artères ciliaires courtes*. Ger., *kurze Blendungspulsadern*. Sp., *arterias ciliares cortas*. Branches of the posterior ciliary arteries distributed to the choroid coat of the eye. [L, 31.]—**Short thoracic a.** See *Superior thoracic a.*—**Sigmoid a.** Lat., *arteria sigmoidea*. Fr., *artère colique gauche inférieure*. A branch of the inferior mesenteric a., which runs down to the sigmoid flexure of the colon, where it divides into branches which are distributed to the colon, and anastomoses with the left colic and superior hemorrhoidal arteries. [L, 142.]—**Small external iliac a.** See *External circumflex iliac a.*—**Small meningeal a.** Lat., *arteria meningea parva*. Fr., *artère méningée petite*. Ger., *kleine Hirnhautpulsader*. A branch of either the middle meningeal or the internal maxillary a., which enters the cranium through the foramen ovale and is distributed to the Gasserian ganglion and the dura mater of the middle fossa of the skull. [L, 7.]—**Small mesenteric a.** A term applied, in some quadrupeds, to a branch of the abdominal aorta distributed to the lower portion of the colon and the rectum. [L, 13.]—**Small saphenous a.** An occasional branch of the popliteal a., which runs down to the external malleolus, to the neighborhood of which it is distributed. [L, 142.]—**Small**

**testicular a.** See *External spermatic a.*—**Spermatic a.** Fr., *artère spermatique*. A term applied to the external and internal spermatic arteries, but more properly restricted to the latter. [L.]—**Sphenoidal a.** A branch of the middle cerebral a. distributed to the lower portion of the cortex of the sphenoidal lobe. [L, 189.]—**Spheno-palatine a.** Lat., *arteria spheno-palatina*. Fr., *artère sphéno-palatine*. Ger., *Keilbeingaugenpulsader*. A small branch of the internal maxillary a., which passes through the spheno-palatine foramen and is distributed to the ethmoidal cells, the antrum, and the frontal sinus. [L, 142.]—**Spheno-spinous a.** Lat., *arteria spheno-spinosa*. Fr., *artère sphéno-épineuse*. See *Middle meningeal a.*—**Spinal arteries.** See *ARTERIE spinales*.—**Spiral arteries.** See *Utero-placental arteries*.—**Splenic a.** Lat., *arteria splénica*. Fr., *artère splénique*. Ger., *Milzpulsader*. Sp., *arteria esplénica*. The largest branch of the coeliac a., which runs along the upper border of the pancreas and divides into branches distributed to the stomach and the spleen. It gives off the *arteria pancreatica magna* and the left gastro-epiploic a. [L, 31, 172.]—**Splenico-pancreatic arteries.** Branches of the splenic a. distributed to the spleen. [L, 179.]—**Staphyline a.** See *Posterior palatine a.*—**Sternal a.** Fr., *artère sternale*. 1. An a., in certain of the crustaceans, which passes down at right angles to the heart to the sternum, where it divides into two branches, which run beneath and parallel to the nervous cord. [L, 158.] 2. In the pl., the branches of the internal mammary a. distributed to the sternum and the triangularis sterni muscle. [L, 7.]—**Sterno-mastoid arteries.** Lat., *arteria sterno-mastoidea*. Fr., *artères sterno-mastoïdiennes*. A term applied to branches of the external carotid, occipital, and superior thyroid arteries distributed to the

THE SUBCLAVIAN ARTERY. (AFTER HENLE.)

AB, the innominate; CC, the common carotid; SA, the subclavian; V, the vertebral; BA, the basilar; MM, the internal mammary; ES, the superior epigastric; MP, the musculophrenic; IS, the superior intercostal; CVP, the deep cervical; TI, the inferior thyroid; CVA, the ascending cervical; CFS, the superficial cervical; TS, the suprascapular; TC, the posterior scapular.

sterno-cleido-mastoid muscle. [L, 7, 142.]—**Straight arteries of the kidney.** See *ARTERIE recte*.—**Stylo-mastoid a.** Lat., *arteria stylo-mastoidea*. Fr., *artère stylo-mastoïdienne*. Ger., *Griffelzitzenarterie*. A branch of the posterior auricular a., which enters the ear through the aqueduct of Fallopius. It gives off branches to the mastoid cells, also the anterior tympanic a. [L, 115, 142.]—**Subaponeurotic external pudic a.** See *Inferior external pudic a.*—**Subcerebellar a.** Lat., *arteria cerebelli inferior anterior*. A branch of the basilar a., distributed to the inferior and anterior portion of the cerebellum. [Weber (L, 31).]—**Subclavian a.** Lat., *arteria subclavia*. Fr., *artère sous-clavière*. Ger., *Schlüsselbeinarterie*. Sp., *arteria subclavia*. An a. which on the right side of the body arises from the innominate a. and on the left from the upper aspect of the arch of the aorta. Each a. is divided into three parts, the first extending from its commencement to the inner border of the scalenus anticus muscle, the second being that portion lying behind the muscle, and the third that part between the outer margin of the muscle and the external border of the first rib, where it becomes the axillary a. Both vessels are deeply situated in the upper part of the neck, the thorax, and the lower cervical region, the a. on the right side, however, rising a little above the clavicle. From the first portion of the a. are given off the vertebral and internal mammary arteries and the thyroide axis, and from the second the superior intercostal a. [L, 142, 172.]—**Subcostal a.** See *Superior intercostal a.*—**Sub-**

**cutaneous abdominal a.** See *Superior external pudic a.* and *Superficial epigastric a.*—**Subcutaneous external pudic a.** See *Superior external pudic a.*—**Sublingual a.** Lat., *arteria sublingualis*. Fr., *artère sous-linguale*. Ger., *Unterzungenspußader*. Sp., *arteria sublingual*. A branch of the lingual a., which arises at the anterior margin of the hyo-glossus muscle and runs forward and outward to the sublingual gland, to which and the structures in its neighborhood it is distributed. [L, 172.]—**Submaxillary arteries.** Lat., *arterie submaxillares*. Branches of the facial a. distributed to the submaxillary glands. [L, 172.]—**Submental a.** Lat., *arteria submentalis*. Fr., *artère sous-mentale*. Ger., *Unterkinntarterie*. A branch of the facial a., given off close to the submaxillary gland, which runs forward beneath the body of the jaw to the symphysis, where it divides into two branches. It is distributed to the muscles and integument of the lower and front parts of the lower jaw. [L, 172.]—**Suborbital a.** Lat., *arteria suborbitalis*. Fr., *artère sous-orbitaire*. See *Infra-orbital a.*—**Subsacral arteries.** See *Lateral sacral arteries*.—**Subscapular a.** Lat., *arteria subscapularis*. Fr., *artère sous-scapulaire*. Ger., *Unterschulterblattspsüßader*. Sp., *arteria subscapular*. A branch of the axillary a., which arises near the lower border of the subscapularis muscle, along which it runs toward the inferior angle of the scapula. It gives off the dorsal scapular a. and terminates in branches to the scapular muscles. [L, 142, 172.]—**Subzygomatic a.** A branch of the external carotid a. of the horse and some other quadrupeds, distributed to the masseter muscle. [L, 13.]—**Superficial a. of the abdomen.** See *Superior external pudic a.*—**Superficial carotid a.** See *External carotid a.*—**Superficial cervical a.** Lat., *arteria cervicalis superficialis*. Fr., *artère cervicale superficielle*. Ger., *oberflächliche Nackenspußader*. Sp., *arteria cervical superficial*. A branch of the transverse cervical a., which ascends beneath the trapezius muscle, to which it furnishes branches. It also sends branches to the levator anguli scapulae and splenius colli muscles, the cervical glands, and the integument. [L, 142.]—**Superficial circumflex iliac a.** Lat., *arteria circumflexa ili superficialis*. Fr., *artère circonflexe iliaque superficielle*. A branch of the superficial femoral a., or of the superficial epigastric, which runs upward toward the anterior superior spine of the ilium and is distributed to the iliacus and sartorius muscles and the structures of the lower part of the abdomen. [L, 7.]—**Superficial descending a. of the neck.** That one of the sterno-mastoid arteries which arises from the external carotid a. [L, 7.]—**Superficial epigastric a.** Lat., *arteria epigastrica externa*. Fr., *artère epigastrique superficielle*. Ger., *oberflächliche Bauchdeckenspußader*. An a. which arises from the anterior surface of the superficial femoral a., about an inch below Poupart's ligament, runs upward to be distributed to the lower part of the abdomen, and anastomoses with branches of the deep epigastric a. [L, 7.]—**Superficial external pudic a.** See *Superior external pudic a.*—**Superficial femoral a.** Lat., *arteria femoralis superficialis*. Fr., *artère fémorale superficielle*. Ger., *oberflächliche Oberschenkelspüßader*. The continuation of the trunk of the common femoral a. upon the thigh. Its course is indicated by a line drawn from a point midway between the anterior iliac spine and the symphysis pubis to the prominent tuberosity on the inner condyle of the femur, the thigh being somewhat flexed and rotated outward. In the first part of its course it lies in the middle of Scarpa's triangle, and is covered by the sartorius muscle, except in the upper two or three inches of its course; below Scarpa's triangle it lies in Hunter's canal, and its lower boundary is the opening in the adductor magnus muscle for the passage of the fourth perforating a. of the thigh. Its principal branches are the deep and inferior external pudic, superficial iliac, and circumflex iliac arteries, and an anastomotic branch given off close to the opening in the adductor magnus muscle. [L, 142, 172.]—**Superficial gluteal a.** A superficial branch of the gluteal a., which is distributed to the gluteus maximus muscle and the integument on the posterior aspect of the sacrum. [L, 172.]—**Superficial muscular a. of the thigh.** Fr., *artère grande musculaire superficielle de la cuisse*. A branch of the femoral a., distributed to the muscles of the back of the thigh. [L, 13.]—**Superficial perineal a.** Lat., *arteria perinealis superficialis*. Fr., *artère superficielle du périnée*. Ger., *oberflächliche Dammarterie*. A branch of the internal pudic a., which arises at the forepart of the ischio-rectal fossa and runs forward beneath the superficial perineal fascia to the posterior part of the scrotum, where it divides into the posterior scrotal arteries. It also gives off branches to the structures situated in the perineum. By some anatomists, particularly when it arises by a common trunk with the transverse perineal a., this a. is termed the perineal a. [L, 31, 142.]—**Superficial plantar a.** See *Metatarsal-pedal a.*—**Superficial pudic a.** See *Superior external pudic a.*—**Superficial scapular a.** [Sümmerring]. See *Suprascapular a.*—**Superficial sural arteries.** Lat., *arterie surales superficiales*. Fr., *artères surales superficielles*. Branches of the sural arteries, distributed to the integument of the calf of the leg. [L, 142.]—**Superficial temporal a.** Lat., *arteria temporalis superficialis*. Fr., *artère temporale superficielle*. Ger., *oberflächliche Schläfenarterie*. One of the two terminal branches of the external carotid a., which runs upward from a little below the condyle of the lower jaw over the posterior root of the zygoma, above which it divides into the anterior and posterior temporal arteries. It gives off unnamed branches to the parts in its vicinity, also the transverse facial, inferior and superior auricular, and orbital arteries. [L, 31, 142.]—**Superficial volar a.** Lat., *arteria superficialis volæ*. Fr., *artère radio-palmarie*. Ger., *oberflächliche Hohlhandspüßader*. A branch of the radial a., which arises a little below the styloid process of the radius and is distributed to the muscles of the thumb. When it is of considerable size it anastomoses with the superficial palmar arch. [L, 31, 142.]—**Superior abdominal a.** An a. which arises from the posterior part of the heart, in some of the crustaceans, and runs along the middle line of the abdomen above the intestines, to which it gives off branches. [L, 158, 168.]—

**Superior articular arteries of the knee.** See *Superior external* and *Superior internal articular arteries of the knee*.—**Superior bronchial arteries.** Lat., *arterie bronchiales superiores*. Fr., *artères bronchiques supérieures*. Branches of the arch of the aorta running to the bronchi. [L, 7.]—**Superior cerebellar a.** Lat., *arteria cerebelli superior*. Fr., *artère cérébelleuse supérieure*. Ger., *obere Pulsader des Hirnleins*. Sp., *arteria cerebello superior*. A branch of the basilar a., which passes outward to the groove between the crus cerebri and the pons Varolii, through which it runs to the upper surface of the cerebellum. It gives off branches distributed to the cerebellum, the vermiform process, the valve of Vieussens, and the velum interpositum. [L, 152.]—**Superior cervical a.** See *Cervico-muscular a.*—**Superior colic a.** See *Middle colic a.*—**Superior coronary a.** See *Coronary a. of the upper lip*.—**Superior dental a.** Lat., *arteria dentalis superior*. Fr., *artère dentaire supérieure*. 1. A branch of the posterior dental a., which supplies the molar and bicuspid teeth of the superior maxilla. [L, 172.] 2. See *Posterior dental a.*—**Superior epigastric a.** Lat., *arteria epigastrica superior*. Fr., *artère epigastrique supérieure*. Ger., *obere Bauchdeckenspußader*. One of the terminal branches of the internal mammary a., which descends between the costal and sternal portions of the diaphragm to the substance of the rectus abdominis muscle and anastomoses with the superficial epigastric a. It gives off branches to the diaphragm and the muscles and integument of the anterior abdominal wall. [L, 172.]—**Superior external articular a. of the knee.** Lat., *arteria articularis genu superior externa*. Fr., *artère articulaire supérieure externe du genou*. Ger., *obere äussere Kniegelenkspüßader*. A branch of the popliteal a., which runs outward above the outer head of the gastrocnemius muscle to the lower part of the cræurus. It gives off a number of branches, which anastomose with the other articular arteries of the knee. [L, 142.]—**Superior external pudic a.** Lat., *arteria pudenda externa superior*. Fr., *artère honteuse externe supérieure*. A branch of the external pudic, or of the femoral a., which runs upward and is distributed to the integument of the lower part of the abdomen and to the external genitals. [L, 142.]—**Superior externo-articular a. of the knee.** See *Superior external articular a. of the knee*.—**Superior fibular a.** An a. which may arise from the anterior or posterior tibial or the popliteal a., which runs across the neck of the fibula and is distributed to the soleus and peroneus tertius muscles and to the integument. [L, 142.]—**Superior gastro-hepatic a.** See *Coronary a. of the stomach*.—**Superior gluteal a.** Lat., *arteria glutea superior*. Fr., *artère fessière supérieure*. Ger., *obere Gesäßspüßader*. A branch of the deep gluteal a., which runs across toward the anterior superior spine of the ilium and, after furnishing branches to the muscles through which it runs, anastomoses with the deep and external circumflex iliac arteries. [L, 31.] The term is also applied to the gluteal a. itself. [L.]—**Superior guttural a.** See *Superior thyreoid a.*—**Superior hæmorrhoidal a.** Lat., *arteria hæmorrhoidalis superior*. Fr., *artère hæmorrhoidale supérieure*. Ger., *obere Mastdarmspußader*. Sp., *arteria hemoroidal superior*. A continuation of the inferior mesenteric a., which passes down into the pelvis behind the rectum, where it divides into two branches, which lie one upon each side of the gut. It gives off branches which are distributed to the coats of the intestine and anastomose with the inferior and middle hæmorrhoidal arteries. [L, 142.]—**Superior intercostal a.** Lat., *arteria intercostalis superior*. Fr., *artère intercostale supérieure*. Ger., *obere Rippenarterie*. Sp., *arteria intercostal superior*. A branch from the second portion of the subclavian a., which runs at first backward and a little upward and then turns downward in front of the neck of the first rib. It gives off the deep cervical a. and branches to the first and second intercostal spaces, which are distributed in the same manner as the aortic intercostal arteries. [L, 142.]—**Superior internal articular (or interno-articular) a. of the knee.** Lat., *arteria articularis genu superior interna*. Fr., *artère articulaire supérieure interne du genou*. Ger., *innere obere Kniegelenkspüßader*. Sp., *arteria articular superior interna*. A branch of the popliteal a., which runs inward under the inner head of the gastrocnemius muscle to the inner side of the femur, around which it winds and divides beneath the vastus internus into branches which anastomose with the other articular arteries of the knee. [L, 31, 142.]—**Superior labial a.** Lat., *arteria labialis superior*. Fr., *artère labiale supérieure*. See *Coronary a. of the upper lip*.—**Superior laryngeal a.** Lat., *arteria laryngea superior*. Fr., *artère laryngée supérieure*. Ger., *obere Kehlkopfspüßader*. 1. A branch of the superior thyreoid a., which pierces the thyreo-hyoid membrane and is distributed to the mucous membrane, glands, and intrinsic muscles of the larynx. [L, 172.] 2. See *Superior thyreoid a.*—**Superior mesenteric a.** Lat., *arteria mesenterica superior*. Fr., *artère mésentérique supérieure*. Ger., *obere Gekröspüßader*. A branch from the forepart of the abdominal aorta, a little below the celiac a., which supplies the larger part of the small intestine and half of the colon. It runs between the layers of the mesentery and gives off the inferior pancreatico-duodenal, ileo-colic, and right and middle colic arteries, and numerous unnamed branches to the walls of the intestines. [L, 142.]—**Superior nutrient a. of the femur.** Lat., *arteria nutiens femoris superior*. Fr., *artère nourricière supérieure du fémur*. Ger., *obere Ernährungspüßader des Oberschenkels*. A branch of the first perforating a. of the thigh, which enters the femur a little above its middle. [L, 7.]—**Superior palatine a.** Lat., *arteria palatina superior*. Fr., *artère palatine supérieure*. Ger., *obere Gaumenspußader*. A branch of the pheno-maxillary portion of the internal maxillary a., which passes through the posterior palatine canal, runs along the inner side of the alveolar border of the hard palate, and is distributed to the palatine glands, the gums, and the mucous membrane of the hard palate. [L, 142.]—**Superior palpebral a.** Lat., *arteria palpebralis superior*. Fr., *artère palpébrale supérieure*. Ger., *Arterie des oberen Augenlids*. Sp., *arteria palpebralis superior*. A branch of the ophthalmic a., sometimes arising from a common trunk with the inferior palpebral a. which

is distributed to the upper eyelid above the internal tarsal ligaments. [L, 142].—**Superior pancreatico-duodenal a.** Lat., *arteria pancreatico-duodenalis superior*. Fr., *artère pancréatico-duodénale supérieure*. Ger., *obere Bauchspeicheldrüsenarterie*. A branch of the gastro-duodenal a., which runs along the inner margin of the duodenum. It gives off branches to the pancreas and to the duodenum, and anastomoses with the inferior

capsule. [L, 31].—**Superior thoracic a.** Lat., *arteria thoracica superior*. Fr., *artère thoracique supérieure*. Ger., *oberste Brustpulsader*. Sp., *arteria torácica superior*. A branch of the axillary a., which arises near the lower border of the subclavian muscle, runs downward and inward across the first intercostal space, and terminates in branches distributed to the pectoralis major and minor, serratus magnus, and intercostal muscles. [L, 31].—**Superior thyroid a.** Lat., *arteria thyroidea superior*. Fr., *artère thyroïdienne supérieure*. Ger., *obere Schilddrüsenpulsader*. Sp., *arteria tiroidea superior*. The lowermost of the branches of the external carotid a., which arises a little below the great cornu of the hyoid bone and runs forward and upward to the upper margin of the thyroid cartilage, where it turns downward and divides, at the upper border of the thyroid gland, into a number of small branches. It gives off the hyoid, superior laryngeal, sterno-mastoid, and crico-thyroid arteries, and branches to the thyroid gland and to the structures in its vicinity. [L, 31, 172].—**Superior ureteric a.** Lat., *arteria ureterica superior*. A small branch of the renal a., distributed to the upper part of the ureter. [L].—**Superior vesical (or vesicular) arteries.** Lat., *arteriae vesicales superiores*. Fr., *artères vésicales supérieures*. Ger., *obere Blasenpulsader*. Branches, two to four in number, of the internal iliac a., or umbilical arteries, which are distributed to the bladder as far as the urachus. By some anatomists the middle vesical arteries are included under this term. [L, 71].—**Superior volar a.** See *Superficial volar a.*—**Supermaxillo-dental a.** See *Superior dental a.*—**Suprascapular a.** See *Suprascapular a.*—**Supra-acromial a.** A branch of the suprascapular a., distributed to the neighborhood of the acromion. [L, 173].—**Supramaxillary a.** Fr., *artère sus-maxillaire*. See *Superior dental a.*—**Supra-orbital a.** Lat., *arteria supra-orbitalis*. Fr., *artère sus-orbitaire*. Ger., *Oberaugenhöhlenpulsader*. Sp., *arteria supra-orbitaria*. A branch of the ophthalmic a., given off at the point where it crosses the optic nerve, which passes out of the orbit through the supra-orbital notch and is distributed to the eyelids and the forehead. [L, 142].—**Suprarenal arteries.** See *Capsular a.*, *Superior suprarenal a.*, and *Inferior suprarenal arteries*.—**Suprascapular a.** Lat., *arteria suprascapularis*. Fr., *artère sus-scapulaire*. Ger., *obere Schulterblattsarterie*. Sp., *arteria supra-escapular*. A branch of the thyroid axis, which runs across the subclavian and behind the clavicle to the upper border of the scapula in the neighborhood of the suprascapular notch, where it passes down into the supraspinous fossa. It gives off the supra-acromial and suprasternal arteries and numerous branches to the lower cervical muscles and those of the scapula. [L, 142].—**Supraspinous a.** Lat., *arteria supraspinata*. A branch of the transverse cervical a., distributed to the supraspinatus muscle and the integument covering it. [L, 142].—**Suprasternal a.** A branch of the suprascapular a., which passes over the inner end of the clavicle and is distributed to the anterior pectoral region. [L, 142].—**Sural arteries.** Lat., *arteriae gemellae*. See *Deep and Superficial sural arteries*.—**Tarsal arteries.** Lat., *arteriae tarsae*. Fr., *artères tarsiennes*. See *External and Internal tarsal a.*—**Temporal a.** Lat., *arteria temporalis*. Fr., *artère temporale*. A term usually applied to the superficial temporal a. (q. v.). [L] See also *Anterior temporal a.*, *Deep anterior temporal a.*, *Posterior temporal a.*, *Deep posterior temporal a.*, and *Middle temporal a.*—**Temporo-frontal a.** See *Anterior temporal a.*—**Temporo-occipital a.** See *Posterior temporal a.*—**Termatic a.** [Wilder]. Lat., *arteria termatica*. Fr., *artère termatique*. An a. which arises at the junction of the anterior cerebral arteries, or (when that exists) from the anterior communicating a., and is distributed to the lamina terminalis (the *terma* of Wilder), the adjacent cerebral cortex, and the genu. [B. G. Wilder, "N. Y. Med. Jour.," March 21, 1885, p. 325, "Jour. of Nerv. and Ment. Dis.," July, 1885].—**Testicular arteries.** See *Internal and External spermatic a.*—**Third perforating a.** Lat., *arteria perforans femoris tertia*. A branch of the deep femoral a., distributed to the adductor magnus muscle. [L, 142].—**Thoracic arteries.** Fr., *artères thoraciques*. Branches of the subclavian a. distributed, in birds, to the pectoral region. [L, 158]. See also *Internal and Superior thoracic a.* and *External mammary a.*—**Thymic arteries.** Fr., *artères thymiques*. See *Anterior mediastinal arteries*.—**Thyroid arteries.** See *Accessory, Superior, Middle, Inferior, and Deep thyroid a.*—**Thyreo-laryngeal a.** See *Superior thyroid a.*—**Tibial arteries.** See *Anterior and Posterior tibial a.*, *Anterior and Posterior tibial recurrent a.*, and *Profunda tibial a. of the foot*.—**Tonsillar a.** Lat., *arteria tonsillaris*. Fr., *artère tonsillaire*. Ger., *Mandelpulsader*. A branch of the facial a., distributed to the tonsil and the side of the tongue. [L, 31].—**Trachelo-muscular a.** See *Inferior cervical a.*—**Transversalis colli a.** See *Transverse cervical a.*—**Transverse arteries.** A term applied to the lateral branches of the basilar a., distributed to the pons Varolii. [L, 172].—**Transverse cervical a.** Lat., *arteria cervicalis transversa*. Fr., *artère cervicale transverse*. Ger., *quere Nackenarterie*. Sp., *arteria cervical transversa*. A branch of the thyroid axis, which runs outward to a point near the lower border of the levator anguli scapulae muscle, where it divides into the posterior and superficial cervical arteries. [L, 172].—**Transverse colic a.** A branch of the middle colic a., distributed to the concave side of the transverse colon. [L, 179].—**Transverse facial a.** Lat., *arteria transversa facialis*. Fr., *artère transverse faciale*. Ger., *quere Antlitzarterie*. A branch of the superficial temporal a., which arises within the parotid gland and runs across the face, lying above the parotid duct and upon the masseter muscle. It gives off branches to the parotid gland, the masseter muscle, and the side of the face. [L, 142].—**Transverse humeral a.** See *Suprascapular a.*—**Transverse perineal a.** Lat., *arteria transversa perinei*. Fr., *artère transverse du périnée*. Ger., *quere Dammpulsader*. Sp., *arteria transversal del periné*. A branch of the perineal or internal pudic a., which passes inward to the central point of the perineum and is distributed to the parts between the anus and the urethra. By some anatomists this term is applied to what is more commonly described as the superficial perineal a.

THE MESENTERIC ARTERIES AND THEIR BRANCHES. (AFTER HENLE.)

A, the aorta; AI, the common iliac; MEI, the inferior mesenteric; MES, the superior mesenteric; I, the intestinal arteries; CD, CD, CD, the right colic arteries (which usually arise by a common trunk termed the right colic); CSI, the left colic; PDI, the inferior pancreatico-duodenal; APP, the appendicular.

pancreatico-duodenal a. [L, 142].—**Superior perforating arteries of the hand.** Three branches of the deep palmar arch, which pass through the upper extremities of the three inner interosseous spaces of the hand to anastomose with the dorsal interosseous arteries of the hand. [L, 142].—**Superior perforating a. of the thigh.** See *First perforating a. of the thigh*.—**Superior pharyngeal a.** Lat., *arteria pharyngea superior*. Fr., *artère pharyngienne supérieure*. Ger., *obere Zwerchfellpulsader*. A branch of the internal mammary a., which runs down through the thorax with the phrenic nerve and is distributed to the diaphragm. [L, 31].—**Superior profunda a. of the arm.** Lat., *arteria humeri profunda superior*. Fr., *artère humérale supérieure profonde*. A branch of the brachial a., given off just below the border of the teres major muscle, which accompanies the musculospiral nerve in the groove in the os brachii to the outer side of the bone, where it divides into two branches, one of which passes through the external intermuscular septum to the interval between the supinator longus and brachialis anticus muscles to anastomose with the anterior radial recurrent a., and the other descends along the back of the external intermuscular septum to the lower and back part of the os brachii, where it anastomoses with the posterior interosseous recurrent, inferior profunda, and anastomotic arteries. It gives off a number of small branches distributed to the muscles and integument of the arm. [L, 31, 142].—**Superior right colic a.** See *Right colic a.*—**Superior pudic a.** See *Superior external pudic a.*—**Superior suprarenal a.** See *Suprascapular a.*—**Superior suprarenal a.** Lat., *arteria suprarenalis superior*. Fr., *artère surrénale supérieure*. Ger., *obere Nebennierenpulsader*. A branch of the inferior phrenic a., distributed to the suprarenal

[L. 31, 115, 142].—**Transverse scapular a.** Lat., *arteria transversa scapulæ*. See *Suprascapular a.* and *Transverse cervical a.*—**Transverse tarsal a.** See *Tarsal a.*—**Tympanic a.** Lat., *arteria tympanica*. Fr., *artère tympanique*. Ger., *Paukenfellsarterie*. The anterior tympanic a., or the *arteria tympanica inferior*, or the external auditory a., especially the former. [L.]—**Ulnar a.** Lat., *arteria ulnaris*. Fr., *artère cubitale*. Ger., *Ellenbogenpulsader*. Sp., *arteria cubital*. The larger of the two terminal branches of the brachial a., which runs along the inner side of the forearm to the palm of the hand, where it terminates as the superficial palmar arch. It begins a little below the bend of the elbow and runs downward and inward to about the middle of the inner border of the forearm, along which it runs to the wrist and crosses the annular ligament on the radial side of the pisiform bone to reach the palm of the hand, where it is termed the superficial palmar arch. In the forearm it gives off the anterior and posterior ulnar recurrent and the common interosseous arteries, and on the wrist the anterior and posterior ulno-carpal arteries. It also furnishes branches to the structures it traverses. [L. 142, 172].—**Ulnar digital arteries.** The palmar and dorsal digital arteries on the ulnar border of the fingers. [L.]—**Ulnar profunda a. of the hand.** Lat., *arteria volaris profunda ulnaris*. The termination of the ulnar a. in the palm of the hand. [L. 179.]

THE UTERINE AND OVARIAN ARTERIES. (AFTER HENLE.)

AI, the common iliac; H, the internal iliac; I, the external iliac; SPI, the aortic uterine; UT, the hypogastric uterine.

—**Ulnar recurrent a.** Lat., *arteria recurrens ulnaris*. Ger., *zurücklaufende Ellenbogenarterie*. A term sometimes applied to the anterior ulnar recurrent a. (q. v.). [L.]—**Umbilical arteries.** **Umbilico-fetal arteries** [B. Ridge]. Lat., *arterie umbilicales*. Fr., *artères ombilicales*. Ger., *Nabelpulsadern*. It., *arterie ombelicali*. Sp., *arterias umbilicales*. The arteries of the fœtus which arise from the hypogastric arteries and proceed to the umbilicus and thence through the umbilical cord to the placenta, where they divide into numerous branches distributed to the chorionic villi, to which they convey venous blood to be aerated.—**Ureteric arteries.** See *Superior and Inferior ureteric a.* and *Middle ureteric arteries*.—**Urethral a.** See *A. of the bulb of the urethra*.—**Urethro-bulbar a.** See *A. of the bulb of the urethra* and *Transverse perineal a.*—**Uterine arteries.** Lat., *arterie uterinae*. Fr., *artères utérines*. See *Aortic and Hypogastric uterine a.* and *Circular a. of the uterus*.—**Utero-ovarian a.** Lat., *arteria utero-ovarica*. Fr., *artère utéro-ovarienne*. Sp., *arteria utero-ovárica*.

See *Aortic uterine a.*—**Utero-placental arteries.** Fr., *artères utéro-placentaires* (ou *spiraes*). Numerous small spiral arteries of the gravid uterus, formerly imagined to open directly into the placental lacunæ, but now known to lose their distinctive character when they penetrate into the placenta. [Köl liker (A, 127).]—**Uveal arteries.** See *Posterior and Short ciliary arteries*.—**Vaginal a.** Lat., *arteria vaginalis*. Fr., *artère vaginale*. Ger., *Scheidenpulsader*. A branch of the internal iliac a. of the female, corresponding to the inferior vesical a. of the male, which is distributed to the vagina, the bulb of the vestibule, the lower part of the bladder, and the contiguous part of the rectum. [L. 142, 172].—**Vertebral a.** Lat., *arteria vertebralis*. Fr., *artère vertébrale*. Ger., *Wirbelpulsader*. Sp., *arteria vertebral*. A branch of the first part of the subclavian a., which passes backward and enters the foramen in the transverse process of the sixth cervical vertebra, ascends in the corresponding foramina of the other cervical vertebrae, and enters the cranium through the foramen magnum; passing upward and forward to the front of the medulla, it unites with its fellow to form the basilar a. It gives off branches, some of which are distributed to the muscles of the neck and others of which enter the spinal canal through the intervertebral foramina. [L. 142, 172.] See also *Inferior vertebral arteries* and *Primitive aortæ*.—**Vesical (or Vesicular) arteries.** See *Superior and Inferior vesical a.* and *Middle vesical arteries*.—**Vesico-vaginal a.** Lat., *arteria vesico-vaginalis*. 1. See *Vaginal a.* 2. The analogue in the female of the vesico-prostatic arteries of the male. [L.]—**Vesico-prostatic arteries.** Lat., *arterie vesico-prostaticæ*. Branches of the middle hæmorrhoidal a., distributed to the prostate gland and the vesiculae seminales. [L. 81].—**Vestibular arteries.** Branches of the internal auditory a., distributed to the membranous labyrinth. [L. 172].—**Vidian a.** Lat., *arteria vidiana*. Fr., *artère vidienne*. Ger., *vidische Pulsader*. A branch of the internal maxillary a., which passes through the vidian canal to be distributed to the Eustachian tube and the upper part of the pharynx. [L. 115].—**Vitelline arteries.** Lat., *arterie vitelline*. Fr., *artères vitellines*. Sp., *arterias vitelinas*. See *Omphalo-mesenteric arteries*.—**Volar a. of the little finger.** See *Arteria volaris digiti minimi*.—**Volar digital arteries.** See *Palmar digital arteries*.—**Volar interosseal arteries.** See *Palmar interosseous arteries*.—**Volar radial arteries.** The digital arteries on the radial side of the palmar aspect of the fingers. [L. 179].—**Volar ulnar a. of the little finger.** See *Arteria volaris digiti minimi*.

**ARTETISCOS, ARTETISCUS** (Lat.), n. s. m. A<sup>3</sup>r-e<sup>2</sup>t-i<sup>2</sup>sk'o<sup>2</sup>s, -u<sup>3</sup>s(u<sup>4</sup>s). Fr., *artétique*. One who has lost a limb. [Dornæus, Ruland, Johnson (L. 53).]

**ARTETIKES**, n. A<sup>3</sup>r-te-tix. Probably related to *Arthritis*. An obsolete term for a sort of gout or other arthritic trouble. [B. 222.]

**ARTHANITA** (Lat.), n. f. A<sup>3</sup>r-tha<sup>2</sup>-ni(ne)'ta<sup>3</sup>. Fr., *arthanite*. 1. The *Cyclamen europæum*. [L. 105.] 2. An ointment made from the same. [A. 385.]

**ARTHANITIC ACID, ARTHANITIN**, n. s. A<sup>3</sup>r-tha<sup>2</sup>-ni<sup>2</sup>-i<sup>2</sup>t'-i<sup>2</sup>k'-tha<sup>2</sup>n'i<sup>2</sup>t-p<sup>2</sup>n. Fr., *acide arthanitique, arthanitine*. Ger., *Arthanitinsäure, Arthanitin*. See *CYCLAMIN*.

**ARTHEMISIA** (Lat.), n. f. A<sup>3</sup>r-the<sup>2</sup>m-i<sup>2</sup>s-i<sup>2</sup>2-a<sup>3</sup>. See *ARTEMISIA*.

**ARTHERETICUS** (Lat.), adj. A<sup>3</sup>r-the<sup>2</sup>r-e<sup>2</sup>t'i<sup>2</sup>2k-u<sup>3</sup>s(u<sup>4</sup>s). See *ARTHRITIC*.

**ARTHETICA** (Lat.), n., f. and n. pl. of adj. *artheticus* (*gutta, planta, or remedia* understood). A<sup>3</sup>r-the<sup>2</sup>t'i<sup>2</sup>2k-a<sup>3</sup>. Fr., *arthétique ou arthétiques*. 1. Arthritis. [A. 322.] 2. The ground-pine (*Ajuga reptans*). [B. 121.] 3. Antiarthritic remedies. [A. 322.]

**ARTHETICUS** (Lat.), adj. A<sup>3</sup>r-the<sup>2</sup>t'i<sup>2</sup>2k-u<sup>3</sup>s(u<sup>4</sup>s). Fr., *arthétique*. See *ARTHRITIC*.

**ARTHO** [Basque], n. Related to *āpros*, bread. Maize. [B. 121.]

**ARTHOICUM** (Lat.), n. n. A<sup>3</sup>r-tho<sup>2</sup>(o<sup>2</sup>)/i<sup>2</sup>2k-u<sup>3</sup>m(u<sup>4</sup>m). See *ARTHOICUM*.

**ARTHONARIÆ** (Lat.), n. f. pl. A<sup>3</sup>r-tho<sup>2</sup>n-a(a<sup>3</sup>)/ri<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). From *Arthonaria* the typical genus. A section of lichens (*Blastopora*), made by Reichenbach. [B. 170.]

**ARTHONIA** (Lat.), n. f. A<sup>3</sup>r-tho<sup>2</sup>(tho<sup>2</sup>)/ni<sup>2</sup>-a<sup>3</sup>. From *ἀρθον* (or *ἀρθεν*), to sprinkle, because the thallus is sprinkled with minute apothecia. A genus of lichens, established by Acharius. [B. 170.]—**A. crocea** [Acharius]. See *PELTIGERA crocea*.—**A. esculenta** [Acharius]. See *URCEOLARIA esculenta*.—**A. marginata** [Duf.]. See *GRAPHIS marginata*.—**A. polymorpha** [Acharius]. See *GRAPHIS polymorpha*.—**A. sinensisgrapha** [Fée]. See *LECANACTIS sinensisgrapha*.

**ARTHONIACEÆ** [Reichenbach] (Lat.), n. f. pl. A<sup>3</sup>r-tho<sup>2</sup>n-i<sup>2</sup>-a(a<sup>3</sup>)/se<sup>2</sup>(ke<sup>2</sup>)-e(a<sup>3</sup>-e<sup>2</sup>). A family of lichens (*Contiosore*), including *Arthonia* and four other genera. [B. 170.]

**ARTHONIEÆ** [Körber], **ARTHONIEI** (Lat.), n. s. f. and m. pl. A<sup>3</sup>r-tho<sup>2</sup>n-i(e)/e<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>), -i(e). A subfamily of lichens (*Graphideæ* or *Graphidiacei*), including *Arthonia* and other genera. [B. 75, 170.]

**ARTHONIOIDES** (Lat.), adj. A<sup>3</sup>r-tho<sup>2</sup>n-i<sup>2</sup>-o-i(e)/dez(das). From *ἀρθον* (see *ARTHONIA*), and *εἶδος*, resemblance. Resembling the *Arthonia*; a species-name applied to lichens. [B. 252.]

**ARTHREMA** (Lat.), n. f. A<sup>3</sup>r-thre<sup>2</sup>(thra<sup>3</sup>)/e<sup>2</sup>-mi<sup>2</sup>-a<sup>3</sup>. From *ἀρθρον*, a joint, and *αἷμα*, blood. Fr., *arthrémie*. Congestion of a joint. [L. 41, 50.]

**ARTHRA** (Lat.), n. f. A<sup>3</sup>r-thra<sup>3</sup>-g-ra<sup>3</sup>. From *ἀρθρον*, a joint, and *ἀγπα*, a seizure. Gout. [M. 13.]

**ARTHRA GROSIS** (Lat.), n. f. A<sup>3</sup>r-thra<sup>3</sup>-gro<sup>3</sup>-si<sup>2</sup>s. Gen., *arthragro<sup>3</sup>-seos* (-sis). Fr., *arthragrose*. Ger., *Gichtkrankheit*. Gout; in the pl., *arthragroses*, gouty affections, especially those of the skin. [G. 5; L. 50.] Cf. *ARTHRITIDES*.

**ARTHRALGIA** (Lat.), n. f. A<sup>3</sup>r-thra<sup>2</sup>l(thra<sup>3</sup>)/ji<sup>2</sup>(gi<sup>2</sup>)-a<sup>3</sup>. From *ἄρθρον*, a joint, and *ἄλγος*, pain. Fr., *arthralgie*. Ger., *Arthralgie*. *Gliedererschmerz*. Articular pain or neuralgia. [A, 301, 385.]—**A. hysterica**. Fr., *arthralgie hystérique*. A. due to hysteria. [M, 2.]—**A. saturnina**. Fr., *arthralgie saturnine*. Ger., *Bleiarthralgie*. One of the manifestations of lead poisoning, characterized by severe pain in the joints, with rigidity and cramps of the neighboring muscles. [M, 2.]

**ARTHRALGIC**, adj. A<sup>3</sup>r-thra<sup>2</sup>l/ji<sup>2</sup>k. Lat., *arthralgicus*. Fr., *arthralgique*. Pertaining to arthralgia. [A, 385.]

**ARTHRAPOBROCHISMUS** (Lat.), n. m. A<sup>3</sup>rth-ra<sup>2</sup>p(r<sup>3</sup>a)p-o-bro-ki<sup>2</sup>z(ch<sup>2</sup>i<sup>2</sup>s)/mu<sup>3</sup>s(mu<sup>3</sup>s). From *ἄρθρον*, a limb, and *ἀποβροχισμός*, strangulation. Syn.: *articuli subligatio*. Firm bandaging of a limb, or strangulation with a bandage. [L, 50.]

**ARTHRAPOSPHINXIS** (Lat.), n. f. A<sup>3</sup>rth-ra<sup>2</sup>p(r<sup>3</sup>a)p-o-sfi<sup>2</sup>n<sup>2</sup>x/i<sup>2</sup>s. Gen., *arthraposphinx'eos* (-is). From *ἄρθρον*, a limb, and *ἀσφίγγειν*, a squeezing tight. See *ARTHRAPOBROCHISMUS*.

**ARTHRAPOSTEMA** (Lat.), n. n. A<sup>3</sup>rth-ra<sup>2</sup>p(r<sup>3</sup>a)p-o-ste(sta)/ma<sup>3</sup>. Gen., *arthrapostem'atos* (-tis). From *ἄρθρον*, a joint, and *ἀπόστημα*, an abscess. Fr., *arthrapostème*. Ger., *Gelenkabscess*. Abscess of a joint. [M, 13.]

**ARTHRECTASIA, ARTHRECTASIS** (Lat.), n's f. A<sup>3</sup>rth-re<sup>2</sup>k-ta(sta)/zi<sup>2</sup>(si<sup>2</sup>)-a<sup>3</sup>, -re<sup>2</sup>k-ta<sup>3</sup>-si<sup>2</sup>s. Gen., *arthrecta'siae*, -ta<sup>3</sup>'seos (-ect'asie). From *ἄρθρον*, a joint, and *ἐκτασις*, dilatation. Fr., *arthrectasie*. Ger., *Arthrectasie*, *Gelenkausdehnung*. Distension of the cavity of a joint. [A, 385.]

**ARTHRECTOMY**, n. A<sup>3</sup>rth-re<sup>2</sup>k/to-mi<sup>2</sup>. From *ἄρθρον*, a joint, and *ἐκτομή* (from *ἐκτείνω*), a cutting away. Fr., *arthrectomie*. Ger., *Arthrectomie*, *Il.*, *artrectomia*. The operation of opening a joint and removing diseased structures by a process of scraping, gouging, or cutting; also excision of a joint. [G. A. Wright, "Med. Chron.," July, 1885, p. 271.]

**ARTHRELCOSIS** (Lat.), n. f. A<sup>3</sup>rth-re<sup>2</sup>l-ko/si<sup>2</sup>s. Gen., *arthrelo'seos* (-sis). From *ἄρθρον*, a joint, and *ἄλκασις*, ulceration. Fr., *arthreloscose*. Ger., *Gelenkverschwörung* (1st def.), *Gichtgeschwür* (2d def.). 1. Ulceration of a joint. [E; L, 50.] 2. Ulceration in the vicinity of gouty joints; the discharge is said to contain chalky matter. [G, 5.]

**ARTHREMBOLA** (Lat.), n, f. sing. or n. pl. of adj. *arthrembolus* (*machina* [= *μηχανή*] or *instrumenta* [= *ὄργανα*] understood). A<sup>3</sup>rth-re<sup>2</sup>m'bo-la<sup>3</sup>. From *ἄρθρον*, a joint or a limb, and *ἐμβάλλω*, to set, put into place. Fr., *arthrembole* (sing.). Ger., *Einrenkungs-maschine* (sing.), *Gliedzieher* (sing.), *Marterwerkzeuge* (pl.). An ancient appliance for reducing fractures or dislocations; in the pl., a set of appliances for the same purpose. [L, 50.]

**ARTHREMBOLESIS** (Lat.), n. f. A<sup>3</sup>rth-re<sup>2</sup>m-bo-le(la)/si<sup>2</sup>s. Gen., *arthrembole'seos* (-sis). Fr., *arthrembo-lé-sis*. The reduction of a broken or dislocated bone. [L, 50.]

**ARTHREMBOLICUS** (Lat.), adj. A<sup>3</sup>rth-re<sup>2</sup>m-bo<sup>2</sup>l'i<sup>2</sup>k-u<sup>3</sup>s(u<sup>3</sup>s). Pertaining to arthremboles. [L, 50.]

**ARTHREMBOLON, ARTHREMBOLUM** (Lat.), n's n. A<sup>3</sup>rth-re<sup>2</sup>m'bo(bo<sup>2</sup>)-lo<sup>2</sup>n, -lu<sup>3</sup>m(lu<sup>3</sup>m). 1. Arthremboles. [Galen (L, 50).] 2. See *ARTHREMBOLA*.

**ARTHREMBOLUS** (Lat.), adj. A<sup>3</sup>rth-re<sup>2</sup>m'bo(bo<sup>2</sup>)-lu<sup>3</sup>s(lu<sup>3</sup>s). Ger., *arthrembolos*. Pertaining to arthremboles; as a n., an arthrembolus, also a person who has had a fracture or dislocation reduced. [L, 50.]

**ARTHREMPYEMA, ARTHREMPYESIS** (Lat.), n's n. and f. A<sup>3</sup>rth-re<sup>2</sup>m-pi(pu<sup>3</sup>)-e(a)/ma<sup>3</sup>, -e(a)/si<sup>2</sup>s. Gen., *arthrempyem'atos* (-tis), -e'seos (-sis). From *ἄρθρον*, a joint, and *ἐμπύημα* or *ἐμπίσησις*, suppuration. Fr., *arthrempyème*, *arthrempyése*. Ger., *Gelenk-eiterung*. Suppuration of a joint. [A, 322, 385.]

**ARTHRENTASIS** (Lat.), n. f. A<sup>3</sup>rth-re<sup>2</sup>m'ta<sup>3</sup>-si<sup>2</sup>s. Gen., *arthrenta'seos* (-ent'asis). From *ἄρθρον*, a limb, and *ἐντασις*, distortion. Fr., *arthrentase*. Gouty distortion of the limbs. [L, 50.]

**ARTHRETICUS** (Lat.), adj. A<sup>3</sup>rth-re<sup>2</sup>t'i<sup>2</sup>k-u<sup>3</sup>s(u<sup>3</sup>s). See *ARTHRITIC*.

**ARTHRIC**, adj. A<sup>3</sup>rth/ri<sup>2</sup>k. Gr., *ἀρθρικός*. Lat., *arthricus*. Fr., *arthrique*. See *ARTICULAR*.

**ARTHRIDIUM** (Lat.), n. n. A<sup>3</sup>rth-ri<sup>2</sup>d/i<sup>2</sup>-u<sup>3</sup>m(u<sup>3</sup>m). Gr., *ἄρθριδιον* (dim. of *ἄρθρον*). Fr., *arthridie*. A little joint. [A, 385; L, 50.]

**ARTHRIE** (Piorry) (Fr.), n. A<sup>3</sup>r-tre. See *ARTHROPATHY*.

**ARTHRIFLUENT** (Fr.), adj. A<sup>3</sup>r-tre-flu<sup>3</sup>-a<sup>3</sup>n<sup>2</sup>. Proceeding from a diseased joint (said of abscesses). [Nicaise, "Rev. de chir.," June, 1885, p. 486.]

**ARTHRIFUGUS** (Lat.), adj. A<sup>3</sup>rth-ri<sup>2</sup>f'u<sup>2</sup>(u<sup>4</sup>)-gu<sup>3</sup>s(gu<sup>3</sup>s). See *ARTHRITIFUGUS*.

**ARTHRION** (Lat.), n. n. A<sup>3</sup>rth/ri<sup>2</sup>-o<sup>3</sup>n. See *ARTHRUM*.

**ARTHRIQUE** (Fr.), adj. A<sup>3</sup>r-trek. See *ARTICULAR*.

**ARTHRITE** (Fr.), n. A<sup>3</sup>r-tret. See *ARTHRITIS*.—**A. aiguë primitive**. Acute synovitis. [L.]—**A. aiguë pseudo-membraneuse**. Acute synovitis with lymph exudation. [L.]—**A. des jeunes animaux**. See *ARTHRITIS AGNICAULORUM*.—**A. gënitale**. See *GONORRHOICAL ARTHRITIS*.—**A. herpétique** [Bazin]. Arthritis attended with herpetic eruptions. [Jaccoud (M).]—**A. noueuse**. See *RHEUMATOID ARTHRITIS*.—**A. par propagation**. An arthritis arising by extension of inflammation from another part. [Ollier (L, 87).]—**A. plastique ankylosante**. A destructive form of arthritis followed by ankylosis. [Guelliot, "Gaz. méd. de Paris," 1882, p. 458 (L).]—**A. rhumatismale** (ou *rhumatisme*) *chronique*. See *RHEUMATOID ARTHRITIS*.—**A. sèche aiguë**, *A. sèche chronique* [Deville]. See *RHEUMATOID ARTHRITIS*.—**A. secondaire**. See *A. par propagation*.—**A. sous-diathroïdale**. A form of fungous arthritis in which the inflamed

medulla gives rise to fleshy granulations between the bone and the articular cartilage. [E, 24.]—**A. suppurée**. Purulent arthritis. [L.]

**ARTHRITES** (Lat.), adj. A<sup>3</sup>rth-ri(re)/tez(tas). Gr., *ἀρθρίτης*. See *ARTHRITIC* and *ARTICULAR*.

**ARTHRITIA** (Lat.), n. f. A<sup>3</sup>rth-ri<sup>2</sup>/shi<sup>2</sup>(ti<sup>2</sup>)-a<sup>3</sup>. Fr., *arthritie*. Gout. [A, 385.]

**ARTHRITIC**, adj. A<sup>3</sup>rth-ri<sup>2</sup>/i<sup>2</sup>k. Gr., *ἀρθρικός*, *ἀρθρίτης* (1st def.). Lat., *arthriticus* (1st def.), *arthriticus* (2d def.). Fr., *arthritique*. Ger., *arthritisch*. It., *artritico*. Sp., *artrítico*. 1. Pertaining to a joint or the joints; articular. [L, 50.] 2. Pertaining to, caused by, or affected with, arthritis or arthritism. [A, 322; B.] 3. Antiarthritic. [A, 301.]

**ARTHRITICA** (Lat.), n., f. of adj. *arthriticus*. A<sup>3</sup>r-thri<sup>2</sup>/i<sup>2</sup>k-a<sup>3</sup>. A section of the genus *Primula*, made by Duby. Also the *Ajuga chamæpitys* [B, 121.] Cf. *ARTHETICA*.

**ARTHRITICUS** (Lat.), adj. A<sup>3</sup>rth-ri<sup>2</sup>/i<sup>2</sup>k-u<sup>3</sup>s(u<sup>3</sup>s). Arthritic; as a n. (*morbus* understood), gout.

**ARTHRITIDE** (Fr.), n. A<sup>3</sup>r-tre-ted. Bazin's term for any cutaneous disease due to arthritism (*q. v.*). According to that author the a's are specially characterized by a multiplicity of the primary lesions; by a deep-red color, due to intense congestion that not infrequently leads to cutaneous hemorrhages (petechiæ, etc.); by the absence of decided itching; and by a scanty discharge from eroded surfaces. They are usually confined to certain limited regions (such as the hands, feet, face, or genitals), or, when more widely distributed, assume the form of isolated, circumscribed, asymmetrical patches, which have little tendency to spread and do not become confluent. Moreover, they show a disposition to develop under the influence of changes of weather or of exposure to cold, and are usually associated with other manifestations of arthritism, either in the individual or in his family. [G, 26.] Cf. *HERPÉTIDE*.—**A's boutonneuses**. A division comprising arthritic prurigo and acne. [Bazin (M, 69).]—**A's bullo-lamel-leuses**. A division comprising arthritic pemphigus. [Bazin (M, 69).]—**A's circonscrites**. See *A's communes*.—**A's communes**. The common, or secondary, a's; including rosacea, intertrigo, acne, scycosis, *eczéma circonscrit*, *herpès successif et chronique*, *hydroa vacciniforme*, and arthritic forms of pityriasis, psoriasis, prurigo, and lichen. [G, 26.]—**A's graves**. See *A's tardives*.—**A's intermédiaires**. See *A's communes*.—**A's primitives**. See *A's pseudo-exanthématiques*.—**A's primitives érythéma-teuses**. A division of the a's *pseudo-exanthématiques* embracing erythema nodosum, papulo-tubercular erythema, urticaria, and pityriasis rubra acuta. [Bazin (L, 87).]—**A's primitives vésicu-leuses**. A division of the a's *pseudo-exanthématiques* embracing herpes circinatus (1st def.) and hydroa vesiculosus. [Bazin (L, 87).]—**A's pseudo-exanthématiques**. Syn.: *pseudo-exanthèmes arthritiques*. The arthritic pseudo-exanthemata; including erythema nodosum, papulo-tubercular erythema (*érythème papulo-tuberculeux*), urticaria hæmorrhagica, herpes circinatus (1st def.), vesicular hydroa (*hydroa vésiculeux*), and *pityriasis rubra aiguë*. [G, 26.]—**A's pseudo-exanthématiques bulleuses**. A division comprising acute pemphigus. [Bazin (M, 69).]—**A's pseudo-exanthématiques érythémateuses**. A division including rheumatic erythema, urticaria, and acute disseminated pityriasis. [Bazin (M, 69).]—**A's pseudo-exanthématiques vésiculeuses**. A division comprising phlyctenular herpes and zoster. [Bazin (M, 69).]—**A's puro-crustacées**. A division comprising arthritic scycosis, ecchyma, and furuncle. [Bazin (M, 69).]—**A's sèches érythémateuses**. A division comprising arthritic intertrigo, papulo-tubercular erythema, and chronic arthritic urticaria. [Bazin (M, 69).]—**A's secondaires**. See *A's communes*.—**A's squameuses**. A division comprising arthritic pityriasis and psoriasis. [Bazin (L, 87).]—**A's sub-aiguës**. See *A's pseudo-exanthématiques*.—**A's tardives et graves**. Late a's of a severe character; including the arthritic form of chronic urticaria (cnidosis), *eczéma nummulaire* (ou *suintant généralisé*), *hydroa bulleux*, chronic pemphigus (the arthritic form), and hidrosadenitis. [G, 26.]—**A's vésico-squameuses**. A division comprising circumscribed dry eczema and vacciniform hydroa. [Bazin (L, 87).]

**ARTHRITIDOLITHUS** (Lat.), n. m. A<sup>3</sup>rth-ri<sup>2</sup>-i<sup>2</sup>d-o<sup>2</sup>/i<sup>2</sup>th-u<sup>3</sup>s(u<sup>3</sup>s). See *ARTHRITOLITH*.

**ARTHRITIE** (Fr.), n. A<sup>3</sup>r-tre-te. Gout. [A, 385.]

**ARTHRITIFUGUS** (Lat.), adj. A<sup>3</sup>rth-ri<sup>2</sup>-i<sup>2</sup>f'u<sup>2</sup>(u<sup>4</sup>)-gu<sup>3</sup>s(gu<sup>3</sup>s). From *arthritus* (= *ἀρθρίτης*), gout, and *fugare*, to put to flight. Fr., *arthrifuge*. Efficacious against gout. [L, 41.]—**Arthritifugum magnum**. Cold water, from its supposed efficacy in gouty disorders. [Heyden (L, 130).]

**ARTHRITIKER** (Ger.), n. A<sup>3</sup>r-tri<sup>2</sup>/i<sup>2</sup>k-e<sup>2</sup>r. A person affected with arthritic disease.

**ARTHRITIQUE** (Fr.), adj. A<sup>3</sup>r-tre-tek. Arthritic; as a n., the *Ajuga chamæpitys*. [L, 105.]

**ARTHRITIS** (Lat.), n. f. A<sup>3</sup>rth-ri(re)/ti<sup>2</sup>s. Gen., *arthrit'idis*. Gr., *ἀρθρίτις* (fem. of adj. *ἀρθρικός* [vóros understood]). Fr., *arthrite*, *goutte* (2d def.). Ger., *Gelenkentzündung* (1st def.), *Gicht* (2d def.). It., *artrite*. Sp., *artritis*. 1. Inflammation of a joint. [E, 2.] Gout. [A, 322.]—**Acute a. Lat.**, *a. acuta*. Fr., *arthrite aiguë*. Ger., *regelmässige acute Gicht*. Any acute inflammation of a joint, but especially one due to gout. [L, 44.]—**Acute rheumatic a.** See *ACUTE ARTICULAR RHEUMATISM*.—**Acute serous a.** Acute synovitis. [L, 44.]—**A. aberrans**. Ger., *herumschweifende Gicht*. Metastatic gout. [L, 84.]—**A. a colica** [Musgrave]. Gouty pains in the back from eating unripe fruit. [L, 132.]—**A. acuta**. See *Acute a.*—**A. restiva**. Fr., *goutte chaude*. A mild form of gout described by Sauvages (who was himself subject to it) as not attended with the formation of swellings and not severe enough to compel the patient to remain indoors. [L, 132.]—**A. alba**. See *A. chlorotica*.—**A. americana**. See *FRAMBESIA*.—**A. anomala**.

Fr., *goute anormale*. Ger., *unregelmässige Gicht*. Gout which pursues an irregular or anomalous course. [A, 305.]—**A. arthrodynia**. See A. (3d def.).—**A. asthenica**. Fr., *goutte asthénique*. Atonic gout. [A, 385.]—**A. asthmatica** [Musgrave]. A form of gout occurring in elderly asthmatic persons, which is mitigated by an attack of asthma. [L, 132.]—**A. atonica**. See *Atonic gout*.—**A. atypica**. See *A. anomala*.—**A. bahamensis**. An affection met with in the Bahamas, characterized by atrocious pains in the joints and terminating in itching; attributed to eating a certain kind of fish. [L, 132.]—**A. blennorrhagica**. Fr., *arthrite blennorrhagique*. See *Gonorrhoeal rheumatism*.—**A. calida**. See *Acute a. A. cheiragra, A. chiragra*. Gout in the hands. [L, 119.]—**A. chlorotica**. A form seen in women who, being gouty by inheritance, are chlorotic or subject to menstrual disorders. [L, 132.]—**A. chronica**. Fr., *goutte chronique*. Ger., *chronische Gicht*. A form of gout in which the joint manifestations are not so prominent as those affecting other parts of the body. [M, 2.]—**A. deformans**. See *Rheumatoid a.*—**A. diaphragmatica**. Angina pectoris. [A, 316.]—**A. erratica**. See *A. aberrans*.—**A. exanthematica**. Gout occurring in persons affected with hæmorrhoids or any form of cutaneous disease. [L, 132.]—**A. febricosa** [Werthof]. A mild form of gout or rheumatic gout, not well marked, with remittent fever. [L, 132.]—**A. febrisca**. A form of gout following fevers. [L, 132.]—**A. fixa**. Gout that remains confined to the joint first attacked. [L, 51.]—**A. frigida**. See *A. chronica*.—**A. genuina**. See *A. regularis*.—**A. gonagra**. Gout in the knees. [L, 119.]—**A. gonorrhoea**. Ger., *Trippergicht*. A severe rheumatoid affection, especially of the knee, which sometimes occurs in connection with gonorrhoea. [A, 305.] Cf. *Gonorrhoeal rheumatism*.—**A. hiemalis**. Winter gout; gout that occurs more frequently at other seasons than in summer. [L, 132.]—**A. hydrarthros**. See *HYDRARTHROSIS*.—**A. irregularis**. See *A. anomala*.—**A. inflammatoria**. See *Acute a.*—**A. interna**. See *A. visceralis*.—**A. ischia**. Gout in the region of the hip. [A, 325.]—**A. larvata** [Stoll]. Fr., *goutte larvée*. Ger., *verlartete Gicht*. Masked gout; gout which does not show itself by the usual symptoms. [L, 136.]—**A. maxillaris**. Rheumatoid a. of the temporomaxillary articulation. [M, 60.]—**A. melancholica** [Musgrave]. A mild form of gout attacking persons debilitated by grief, overstudy, hysteria, hypochondriasis, etc. [L, 132.]—**A. metastatica retrograda**. Retrocedent gout. [D, 1.]—**A. morbis cuticularibus subjuncta**. See *A. exanthematica*.—**A. neuropathica**. Ger., *neurotische a.* An articular inflammation caused by injury or disease of the nervous system; characterized by absence of fever; occurring only in paralyzed limbs, and accompanied by doughy oedema and cutaneous and muscular atrophy, etc. [J, M-Ardle. "Dublin Jour. of Med. Sci." June, 1855, p. 490.]—**A. nodosa**. Fr., *goutte nouée* (ou *noueuse*). Gout attended with the formation of lumps of chalky deposit about the joints. [A, 385.]—**A. pauperum**. See *Rheumatoid a.*—**A. planetica**. See *A. aberrans*.—**A. podagra**. Gout in the feet. [L, 132.]—**A. regularis**. Fr., *goutte régulière*. Well-marked acute or chronic gout. [A, 305.]—**A. retrograda**. Fr., *goutte renouée* (ou *retrocedée*). Ger., *zurückgetretene Gicht*. Suppressed gout. [A, 385.]—**A. rhachialgia**. See *A. colica*.—**A. rhachitica**. A term applied by Sauvages to pains in the bones in cases of rickets. [L, 132.]—**A. rheumatica**. 1. Rheumatoid a. 2. Acute rheumatism. [L, 132.]—**A. rheumatica chronica**. See *Rheumatoid a.*—**A. rheumatismus superveniens** [Musgrave]. See *Rheumatoid a.*—**A. rheumatismus**. Acute rheumatism. [L, 63.]—**A. rheumatoides**. See *Rheumatoid a.*—**A. scarlatinosa**. See *Scarlatinal rheumatism*.—**A. scorbutica** [Musgrave]. Gout occurring in scorbutic persons or accompanied with bleeding gums, as in scurvy. [L, 132.]—**A. scorbutica vaga**. An old term for a disease described as a grave and malignant form of gout, rapidly undermining the vital powers. [L, 53.]—**A. sicca**. Fr., *arthrite sèche*. See *Rheumatoid a.*—**A. spuria**. 1. An old term for vague pains in any part of the body. [L, 128.] 2. A periodical swelling of one or more joints, closely resembling ordinary rheumatism or gout, but depending on an idiopathic or a traumatic affection of the nerves of the part. [Remak (E, 12).]—**A. syphilitica** [Musgrave]. The nocturnal pains of syphilis, also gonorrhoeal rheumatism. [L, 132.]—**A. typica**. See *Acute a.*—**A. uratica**. Gout due to an excessive formation of uric acid. [D, 4.]—**A. urethralis**. See *Gonorrhoeal rheumatism*.—**A. urica**. See *A. uratica*.—**A. vaga**. See *A. aberrans*.—**A. venerea**. See *A. syphilitica*.—**A. vera**. See *Acute a.*—**A. visceratica**. A gouty affection of some internal organ alternating with articular manifestations of gout. [M, 2.]—**Asthenic a.** Lat., *a. asthenica*. Fr., *goutte asthénique*. Atonic gout. [A, 385.]—**Blennorrhagie a.** See *Gonorrhoeal rheumatism*.—**Chronic a.** See *A. chronica*.—**Chronic rheumatic (or rheumatoid) a.** See *Rheumatoid a.*—**Chronic strumous a.** See *Fungous a.*—**Dry a.** Lat., *a. sicca*. Fr., *arthrite sèche*. See *Rheumatoid a.*—**Fungous a.** Fr., *arthrite fungueuse*. Ger., *fungöse Gelenkentzündung* [Volkmann]. White swelling; a chronic strumous inflammation of a joint, characterized by the formation of granulation tissue with subsequent fibrous, fatty, or purulent degeneration. [R, Barwell (A, 277).]—**Gelatinous a.** See *Fungous a.*—**Gonorrhoeal a.** See *Gonorrhoeal rheumatism*.—**Gouty a.** Fr., *arthrite goutteuse*. Articular inflammation due to gout.—**Intervertebral a.** See *SPONDYLARTHROSIS*.—**Osteo-a.** See the major list.—**Proliferating a.** See *Chronic osteo-a.*—**Rheumatic a.**—**Rheumatoid a.** [Garrod]. Fr., *arthrite rhumatismale* (ou *rhumatoïde*), *rhumatisme nouveau* [Trousseau], *usure des cartilages articulaires* [Cruveilhier]. Ger., *rheumatische a.* Syn.: *osteo-a.*, *rheumatic gout*. A form of a, usually chronic, occurring in persons who are out of health, but not necessarily rheumatic or gouty; distinguished by invading the various joints in succession and leading to permanent deformities similar to those of chronic gout (osseous nodes and stiffness of the joints with distortion). Sometimes only the fingers and toes are affected. [A, B. Garrod (A, 438).]—**Strumous a.** See *Fungous a.*—**Subdiarthrodial a.** See *ARTHRITE sous-diarthrodiale*.

**ARTHRITISM**, n. A<sup>3</sup>rth-r'i<sup>2</sup>t-i<sup>2</sup>zm. Fr., *arthritisme*. The gouty or rheumatic diathesis. [A, 385.]

**ARTHRITISME** (Fr.), n. A<sup>3</sup>r-tri<sup>2</sup>t-i<sup>2</sup>zm. See *ARTHRITISM*.—**A. abarticulaire**. An arthritic tendency without involvement of the joints (manifested by such phenomena as localized oedema and cutaneous and subcutaneous nodosities). [Chauvet, "Gaz. hebdom. de méd. et de chir.," Feb. 15, 1884, p. 112 (D).]

**ARTHRITOLITH**, n. A<sup>3</sup>rth-r'i<sup>2</sup>t-o-l'i<sup>2</sup>th. Lat., *arthritolitus* (from *arthros*, arthritic, and *lithos*, a stone). Fr., *arthritolithe*. Ger., *Gichtstein*, *arthritisches Concrement*. Syn.: *tophus arthriticus*. A gouty cretaceous deposit in or near a joint. [A, 301.]

**ARTHRION** (Lat.), n. n. A<sup>3</sup>rth-r'i<sup>2</sup>-u<sup>3</sup>m(u<sup>4</sup>m). From *ἄρθρον*, a joint. Fr., *arthrion*. Lit., a little joint; Kirby's name for a small joint at the base of the last segment of the foot in certain *Coleoptera*. [L, 41, 119.]

**ARTHRO-ARCTIA** (Lat.), n. f. A<sup>3</sup>rth-ro-a<sup>3</sup>rk-shi<sup>2</sup>(ti<sup>2</sup>)-a<sup>3</sup>. Fr., *arthro-arctie* [Piorry]. See *ARTHROSTENOSIS*.

**ARTHROBACTERIACEÆ** (Lat.), n. f. pl. A<sup>3</sup>rth-ro-ba<sup>3</sup>k-(ba<sup>3</sup>k)-te(ta)-ri<sup>2</sup>-a(a<sup>3</sup>/se<sup>2</sup>(ke<sup>2</sup>)-e(a<sup>3</sup>-e<sup>2</sup>)). Fr., *arthrobacteriacées*. Ger., *Arthrobacteriaceen*. Of De Bary and others, a division (genus) of arthroporous *Schizomycetes* (*Arthrosopores*), comprising those forms which occur characteristically as rods, either solitary or united into pseudo-filaments. It includes the subdivisions (subgenera) *Arthrobacterium* and *Spirulina*. [H. M. Ward (B, 77); B, 270.]

**ARTHROBACTERIUM** (Lat.), n. n. A<sup>3</sup>rth-ro-ba<sup>3</sup>k(ba<sup>3</sup>k)-te(ta)-ri<sup>2</sup>-u<sup>3</sup>m(u<sup>4</sup>m). De Bary's name for those members of the genus *Bacterium* in which endogenous spore-formation has not been observed. [B, 54.] See *BACTERIUM*.—**A. aceti** [De Bary]. See *BACTERIUM aceti*.—**A. chlorinum**. See *BACTERIUM chlorinum*.—**A. merisnopedioides**. See *BACTERIUM merisnopedioides*.—**A. pastorianum** [De Bary]. See *BACTERIUM pastorianum*.—**A. viride**. See *BACTERIUM viride*.—**A. Zopfii**. See *BACTERIUM Zopfii*.

**ARTHROBOTRYDEÆ** (Lat.), n. f. pl. A<sup>3</sup>r-thro(thro<sup>2</sup>)-bo<sup>2</sup>-tri<sup>2</sup>(ru<sup>2</sup>d)/e<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). Of Corda, a family of *Fungi* including genera such as *Arthrobotrys*, which have bilocular spores. [B, 121.]

**ARTHROBOTRYS** (Lat.), n. f. A<sup>3</sup>r-thro-bo<sup>2</sup>t-ri<sup>2</sup>(ru<sup>2</sup>s). Gen., *arthrobotrys* (-is). From *ἄρθρον*, a joint, and *βότρυς*, a cluster of grapes. 1. Of Corda, a genus of *Fungi*. 2. Of Wallich a genus of ferns. [B, 170.]

**ARTHROBRANCHIÆ** (Lat.), n. f. pl. A<sup>3</sup>rth-ro-bra<sup>3</sup>n<sup>2</sup>-(bra<sup>3</sup>n<sup>2</sup>/ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)-e(a<sup>3</sup>-e<sup>2</sup>)). From *ἄρθρον*, a joint, and *ῥαχίς*, a gill. Arthrobranchs; the branchiæ which, in many of the *Crustacea*, are attached to the interarticular membranes connecting the basal joints of the limbs and the thorax. [L, 168.]

**ARTHROCACE** (Lat.), n. f. A<sup>3</sup>rth-ro<sup>2</sup>k-a<sup>3</sup>-se(ka). From *ἄρθρον*, a joint, and *κακός*, evil, pernicious. Fr., *arthrocace*. Ger., *Arthrocake*. An old term for various severe inflammatory diseases of joints, especially fungous arthritis. [A, 385.]—**A. agniculorum**. Fr., *arthrite des jeunes animaux*. Ger., *Lämmerlähme, Kälberlähme, Füllenlähme, Fohlenlähme, Gelenksfuss der Säuglinge, ungarische Gelenkscheue*. It., *artrite dei giovani animali*. A disease occurring sporadically or enzootically in colts, calves, lambs, and pigs, soon after birth, supposed to depend on blood poisoning arising from inflammation of the umbilical vein. It may take the form of rhachitis, arthritis, rapidly progressing gout, a simple rheumatic or scorfulous affection, or a general morbid condition. [Bollinger (L, 44).]—**A. coxarum**. See *MORBUS coxarius*.—**A. pullorum equinorum**. See *A. agniculorum*.—**A. senile** (Fr.). A term applied to various senile changes in the joints, either of the synovial membrane or of the articular cartilage. [Gosselin, "Bull. de la soc. de chir.," 1851, p. 611 (L).]—**A. vitulorum**. See *A. agniculorum*.

**ARTHROCACIA** (Lat.), n. f. A<sup>3</sup>rth-ro-ka(ka<sup>3</sup>/si<sup>2</sup>(ki<sup>2</sup>)-a<sup>3</sup>). Fr., *arthrocacie*. Ger., *Arthrokakie*. A chronic joint disease, especially one characterized by dislocation not dependent on violence. [Rust (L, 50).]

**ARTHROCACOLOGIA** (Lat.), n. f. A<sup>3</sup>rth-ro-ka<sup>3</sup>k(ka<sup>3</sup>k)-o-lo(lo<sup>2</sup>)/ji<sup>2</sup>(gi<sup>2</sup>)-a<sup>3</sup>. From *ἄρθρον*, a joint, *κακός*, evil, and *λόγος*, understanding. Fr., *arthrocacologie*. Ger., *Arthrokakologie*. It., *arthrocacologia*. That branch of pathology which deals with diseases of the joints. [Rust (L, 50).]

**ARTHROCARCINOMA** (Lat.), n. n. A<sup>3</sup>rth-ro-ka<sup>3</sup>-si<sup>2</sup>n(ki<sup>2</sup>n)-o-ma<sup>3</sup>. Gen., *arthrocarcinomatos (-tis)*. From *ἄρθρον*, a joint, and *καρκίνωμα*, a cancer. Fr., *arthrocarcinome*. Ger., *Arthrocarcinom, Gelenkkrebs*. Cancerous disease of a joint. [A, 322; E.]

**ARTHROCARPÆA** (Lat.), n. f. A<sup>3</sup>rth-ro-ka<sup>3</sup>-pe<sup>2</sup>(pa<sup>3</sup>/e<sup>2</sup>)-a<sup>3</sup>. From *ἄρθρον*, a joint, and *καρπός*, a fruit. A section of the genus *Glycyrrhiza*, made by C. A. Meyer. [B, 121.]

**ARTHROCELE** (Lat.), n. f. A<sup>3</sup>rth-ro-se(ka)/le(la); as an English word, *a<sup>3</sup>rth-ro-sel*. From *ἄρθρον*, a joint, and *κύλη*, a tumor. Fr., *arthrocele*. Ger., *Gelenkgeschwulst*. A tumor of a joint. [A, 322.]

**ARTHROCENCHRIASIS** (Lat.), n. f. A<sup>3</sup>rth-ro-se<sup>2</sup>n<sup>2</sup>(ke<sup>2</sup>n<sup>2</sup>)-kri(ch<sup>2</sup>re)/a<sup>3</sup>-si<sup>2</sup>s. Gen., *arthrocenchria(-seos (-i)asis)*. From *ἄρθρον*, a joint, and *κενχρίαις*, military. Fr., *arthrocenchriase*. A military eruption over a joint. [A, 322.]

**ARTHROCEPHALUS** (Lat.), adj. A<sup>3</sup>rth-ro-se<sup>2</sup>f(ke<sup>2</sup>f)/a<sup>3</sup>-lu<sup>3</sup>s-(lu<sup>3</sup>s). From *ἄρθρον*, a joint, and *κεφαλή*, the head. Fr., *arthrocephale*. Having the head distinct from the body (said of certain *Crustacea*). [L, 41.]

**ARTHROCERALIS** (Lat.), adj. A<sup>3</sup>rth-ro-se<sup>2</sup>r(ke<sup>2</sup>r)-a(a<sup>3</sup>/li<sup>2</sup>s). From *ἄρθρον*, a joint, and *κέρας*, a horn. Fr., *arthrocérol*. Having two of the vertebral segments developed superiorly into appendages (said of the *Arthropoda*). [L, 41.]

**ARTHROCHONDRITIS** (Lat.), n. f. A<sup>3</sup>rth-ro(ro<sup>2</sup>)-ko<sup>2</sup>n-(ch<sup>2</sup>o<sup>2</sup>n)-dri(dre)/ti<sup>2</sup>s. Gen., *arthrochondrit(-idis)*. From *ἄρθρον*, a

joint, and *χόνδρος*, cartilage. Fr., *arthrochondrite*. Ger., *Gelenknorpelentzündung*. Inflammation of the cartilages of a joint. [L, 30.]

**ARTHROCLADIEÆ** (Lat.), n. f. pl. *A<sup>3</sup>r-thro-kla<sup>2</sup>d(kla<sup>2</sup>d)-i(i<sup>2</sup>)/e<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>)*. A tribe of plants belonging to the *Artheridaceæ*, made by Zanardini. [B, 170.]

**ARTHROCLASIS** (Lat.), n. f. *A<sup>3</sup>rth-ro<sup>2</sup>k<sup>1</sup>la<sup>2</sup>-si<sup>2</sup>s*. Gen., *arthroclas<sup>2</sup>eos* (-thro<sup>2</sup>clasis). From *ἄρθρον*, a joint, and *κλάσις*, a breaking. Fr., *arthroclasis*. Arthroclasis; the operation of breaking up an ankylosed joint. [A, 385.]

**ARTHROCOCCACEÆ** (Lat.), n. f. pl. *A<sup>3</sup>rth<sup>2</sup>/ro<sup>2</sup>-ko<sup>2</sup>k-ka(ka<sup>3</sup>)-se<sup>2</sup>(ke<sup>2</sup>)-e(a<sup>3</sup>-e<sup>2</sup>)*. From *ἄρθρον*, a joint, and *κόκκος* (see *Coccus*). Fr., *arthrococcacées*. Ger., *Arthrococcaceen*. A section (genus) of the *Arthrosporeæ* [De Bary], comprising those forms which occur only as cocci. It includes the sections (subgenera) *Arthrostreptococcus*, *Leuconostoe*, *Merista*, *Sarcina*, *Micrococcus*, and *Ascococcus*. [Weichselbaum (B, 270).]

**ARTHROCOCCUS** (Lat.), n. m. *A<sup>3</sup>rth-ro<sup>2</sup>-ko<sup>2</sup>k<sup>1</sup>ku<sup>3</sup>(ku<sup>4</sup>)*. A micrococcus which, in the lacteous fermentation, has become elongated and assumed the form of jointed staff-like cells. [A, 327.] See *BACILLUS acidilactici*.

**ARTHRODACTYLOUS**, adj. *A<sup>3</sup>rth-ro-da<sup>2</sup>k<sup>1</sup>ti<sup>2</sup>-u<sup>3</sup>s*. From *ἄρθρον*, a joint, and *δάκτυλος*, a finger. Fr., *arthrodactyle*. Having the digits articulated. [A, 385.]

**ARTHRODEM** (Ger.), n. *A<sup>3</sup>rth-ro<sup>2</sup>-d-e<sup>2</sup>m'*. See *ARTHRODEMA*.

**ARTHRODERM**, n. *A<sup>3</sup>rth<sup>2</sup>/ro<sup>2</sup>-du<sup>2</sup>rm*. From *ἄρθρον*, a joint, and *δέρμα*, the skin. The outer crust, or body-wall, of the *Arthropoda*. [L, 196.]

**ARTHRODES** (Lat.), adj. *A<sup>3</sup>rth-ro<sup>2</sup>/dez(das)*. From *ἄρθρον*, a joint, and *είδος*, resemblance. Fr., *arthroïde*. Ger., *gelenkartig, gelenkförmig*. Resembling a joint, of the nature of a joint. [L, 50.]

**ARTHRODHYAL** (Fr.), adj. *A<sup>3</sup>r-thro-d-i<sup>2</sup>-a<sup>3</sup>l*. See *STYLO-HYAL*.

**ARTHRODIA** (Lat.), n. f. *A<sup>3</sup>rth-ro<sup>2</sup>/di<sup>2</sup>-a<sup>3</sup>*. Gr., *ἄρθρῳδία*. Fr., *arthrodie*. O. Fr., *enfoncée, enfonçure*. Ger., *Arthrodie, Kugelgelenk*. It., *artrodia*. Sp., *artrodia*. 1. That variety of diarthrosis in which an articular head plays upon a shallow cavity, as in the temporo-maxillary articulation; differing from enarthrosis in that both the convexity and the concavity of the opposed surfaces are less marked, so as to admit of some gliding motion. [A, 322, 385; C.] 2. A name given by Rafinesque to a vegetable substance found floating upon the surface of fresh waters in Sicily; perhaps a species of *Palmella*. [B, 121.]

**ARTHRODIAL, ARTHRODIC**, adj's. *A<sup>3</sup>rth-ro<sup>2</sup>/di<sup>2</sup>-a<sup>3</sup>l, -ro<sup>2</sup>d<sup>1</sup>i<sup>2</sup>k*. Lat., *arthrodialis*. Fr., *arthrodial*. Ger., *arthrodisch*. It., *artrodiale*. Sp., *artrodial*. Pertaining to a joint of the variety termed arthrodia. [C.]

**ARTHRODIÉ** (Fr.), adj. *A<sup>3</sup>r-thro-di<sup>2</sup>-a*. Articulated by arthrodia. [A, 385.]

**ARTHRODIEÆ** (Lat.), n. f. pl. *A<sup>3</sup>rth-ro-di<sup>2</sup>(de<sup>2</sup>)-e<sup>2</sup>(e<sup>3</sup>-e<sup>2</sup>)*. Fr., *arthrodiées*. Bory de St. Vincent's name for a family of fresh-water *Hydrophyta* (*Algae* and *Protohyta*), including organisms composed of filaments each made up of an outer homogeneous transparent tube inclosing an inner jointed tube filled with coloring matter. These organisms, which were regarded as forming a connecting link between the animal and vegetable kingdom, were divided into the tribes *Frigillaria*, *Oscillariae*, *Conjugatae*, and *Zoocarpae*, and included genera now chiefly referable to the *Zygo-sporeæ*. [B, 1, 121.]

**ARTHRODION, ARTHRODIUM** (Lat.), n's n. *A<sup>3</sup>rth-ro<sup>2</sup>-di<sup>2</sup>-o<sup>2</sup>n, -u<sup>3</sup>m(u<sup>4</sup>m)*. See *ARTHRODION*.

**ARTHRODYNIA** (Lat.), n. f. *A<sup>3</sup>rth-ro-di<sup>2</sup>n(du<sup>2</sup>n)/i<sup>2</sup>-a<sup>3</sup>*. From *ἄρθρον*, a joint, and *δύνη*, pain. Fr., *arthrodynie*. Ger., *Arthrodynie, Gelenkschmerz*. It., *artrodinia*. 1. Pain in a joint. [E.] 2. Chronic rheumatism. [Cullen (L, 32).]—*A. podagrica*. See *PODAGRA*.—*Exanthesis rosalia* is See *DENGUE*.

**ARTHRODYNIC**, adj. *A<sup>3</sup>rth-ro-di<sup>2</sup>n/i<sup>2</sup>k*. Pertaining to, caused by, or affected with, arthrodynia. [L, 73.]

**ARTHRO-ECTASIA** (Lat.), n. f. *A<sup>3</sup>rth-ro-e<sup>2</sup>k-ta(ta<sup>3</sup>)/zi<sup>2</sup>(si<sup>2</sup>)-a<sup>3</sup>*. See *ARTHRECTASIS*.

**ARTHRODEMA** (Lat.), n. n. *A<sup>3</sup>rth-re<sup>2</sup>d(ro-e<sup>2</sup>d)-e(a<sup>3</sup>)/ma<sup>3</sup>*. Gen., *arthredematos* (-tis). From *ἄρθρον*, a joint, and *οἰδῆμα* (see *EDEMA*). Fr., *arthrodème*. Ger., *Arthrodem, Gelenkwassersucht*. *Edema* of a joint. [A, 322.]

**ARTHRO-EMPYESIS** (Lat.), n. f. *A<sup>3</sup>rth-ro-e<sup>2</sup>m-pi(pu<sup>2</sup>)-e(a<sup>3</sup>/si<sup>2</sup>s*. Gen., *arthro-empyes<sup>2</sup>eos* (-sis). See *ARTHREMPYESIS*.

**ARTHROGASTERES** (Lat.), n. m. pl. *A<sup>3</sup>r-thro-ga<sup>2</sup>s(ga<sup>3</sup>s)/te<sup>2</sup>r-ez(e<sup>3</sup>s)*. See *ARTHROGASTRA*.

**ARTHROGASTRA** (Lat.), n. n. pl. *A<sup>3</sup>rth-ro-ga<sup>2</sup>s(ga<sup>3</sup>s)/tra<sup>3</sup>*. From *ἄρθρον*, a joint, and *γαστήρ*, the belly. Fr., *arthrogastres*. Ger., *Giedelleibige*. An order of the *Arachnida*, distinguished by having the abdomen segmented. It includes the *Pedipalpi* and *Adelarthrosomata*. [L, 147.]

**ARTHROGELURE** (Fr.), n. *A<sup>3</sup>r-thro-zhe<sup>2</sup>-u<sup>3</sup>r*. An inflamed state of a joint, especially the first metatarsophalangeal joint, attributed to exposure to cold. [Beau, "Gaz. d. hôp.", xxxi, 1858, p. 369 (L).]

**ARTHROGRAPHY**, n. *A<sup>3</sup>rth-ro<sup>2</sup>g<sup>2</sup>/ra<sup>3</sup>-fi<sup>2</sup>*. Lat., *arthrographia* (from *ἄρθρον*, a joint, and *γράφω*, to write). Fr., *arthrographie*. Ger., *Arthrographie, Gelenklehre*. See *ARTHROLOGY*.

**ARTHROGRYPPOSIS** (Lat.), n. f. *A<sup>3</sup>rth-ro-gri<sup>2</sup>p(gru<sup>2</sup>p)-o<sup>2</sup>si<sup>2</sup>s*. Gen., *arthrogrypo<sup>2</sup>seos* (-sis). From *ἄρθρον*, a joint, and *γρυπῶσις*, a crooking. Fr., *arthrogrypose*. Ger., *Arthrogrypose, Gelenkverkrümmung*. It., *artrogripo<sup>2</sup>si*. Sp., *artrogripósis*. A permanent flexion of a joint. [L, 44.]

**ARTHRO-HÉMIE** (Piorry) (Fr.), n. *A<sup>3</sup>r-tro-a-me*. See *ARTHREMA*.

**ARTHRO-HYAL**, adj. *A<sup>3</sup>rth<sup>2</sup>/ro<sup>2</sup>-hi<sup>2</sup>-a<sup>3</sup>l*. See *STYLO-HYAL*.

**ARTHRO-HYDRIN**, n. *A<sup>3</sup>rth<sup>2</sup>/ro<sup>2</sup>-hi<sup>2</sup>-di<sup>2</sup>n*. From *ἄρθρον*, a joint, and *ὑδρῶν*, water. Fr., *arthro-hydrine*. Syn.: *synovin*. A coagulable substance found in synovia. [L, 49.]

**ARTHROKOKKACEEN** (Ger.), n. pl. *A<sup>3</sup>rth-ro<sup>2</sup>-ko<sup>2</sup>k-ka<sup>3</sup>-tsa<sup>2</sup>-e<sup>2</sup>n*. See *ARTHROCOCCACEÆ*.

**ARTHROLEPIS** (Lat.), n. f. *A<sup>3</sup>rth-ro<sup>2</sup>/e<sup>2</sup>p-i<sup>2</sup>s*. A section of the Linnaean genus *Achillea*, made by Boissier, characterized by having numerous large ligulae and by the scales of the involucre being deciduous. [B, 63.] See *ANACYCLUS*.

**ARTHROLEPROSIS** (Lat.), n. f. *A<sup>3</sup>rth-ro<sup>2</sup>-le<sup>2</sup>p-ro<sup>2</sup>si<sup>2</sup>s*. Gen., *arthrolepro<sup>2</sup>seos* (-sis). From *ἄρθρον*, a limb, and *λέπρωσις*, the process of becoming leprosy. Fr., *arthroléprose*. Ger., *Gelenkleprose*. A form of leprosy observed in India, described as characterized by the gradual ulceration and partial separation of the fingers and toes. [A, 322.] Cf. *AINHUM*.

**ARTHROLITH**, n. *A<sup>3</sup>rth<sup>2</sup>/ro<sup>2</sup>-li<sup>2</sup>th*. See *ARTHROLITH*.

**ARTHROLOBUM** (Lat.), n. n. *A<sup>3</sup>rth-ro<sup>2</sup>/bi<sup>2</sup>-u<sup>3</sup>m(u<sup>4</sup>m)*. A genus of leguminous plants. [L, 87.]—*A. scorpioides* [De Candolle]. A species indigenous to southern Europe and probably one of the drugs included under the *σκορπιουίδης* of Dioscorides, believed, from the resemblance of their pods to a scorpion's tail, to be a cure for the wound inflicted by the latter. The leaves have been used as a vesicant. [B, 180, 197.] Cf. *SCORPIURUS*.

**ARTHROLOGY**, n. *A<sup>3</sup>rth-ro<sup>2</sup>/o<sup>2</sup>-ji<sup>2</sup>*. Lat., *arthrologia* (from *ἄρθρον*, a joint, and *λόγος*, understanding). Fr., *arthrologie*. Ger., *Arthologie, Gelenklehre*. The anatomy of the joints. [L, 31.]

**ARTHROMBOLE** (Lat.), n. f. *A<sup>3</sup>rth-ro<sup>2</sup>m<sup>2</sup>/bo<sup>2</sup>-le(la)*. See *ARTHREMBOLA*.

**ARTHROMÉNINE** (Fr.), n. *A<sup>3</sup>r-thro-ma-na<sup>2</sup>n<sup>2</sup>/h*. From *ἄρθρον*, a joint, and *μηνίγξ*, a membrane. The synovial membrane of a joint. [L, 41.]

**ARTHROMÉNINÉ, ARTHROMÉNINGIEN** (Fr.), adj's. *A<sup>3</sup>r-thro-ma-na<sup>2</sup>n<sup>2</sup>-zha, -zhi<sup>2</sup>-a<sup>3</sup>n<sup>2</sup>*. Pertaining to the synovial membrane of a joint. [L, 41.]

**ARTHROMENINGITIS** (Lat.), n. f. *A<sup>3</sup>rth<sup>2</sup>/ro<sup>2</sup>-me<sup>2</sup>n-i<sup>2</sup>n(i<sup>2</sup>n<sup>2</sup>)-ji<sup>2</sup>(ge)/ti<sup>2</sup>s*. Gen., *arthromeningitidis*. Fr., *arthroménigite*. Ger., *Gelenkhautentzündung*. Synovitis. [D, 18.]—*A. acuta serosa*. Acute synovitis. [L, 44.]—*A. chronica*. Hydrarthrosis. [L, 44.]—*A. crepula*. A rare joint affection described by Bonnet, consisting of synovitis with a membranous exudation. [Busch (M, 1).]—*A. gonorrhoea*. See *GONORRHOEA RHEUMATISM*.—*A. prolifera*. See *FUNGUS ARTHRITIS*.—*A. purulenta*. Synovitis with purulent effusion. [Busch (M, 1).]—*A. serosa*. Synovitis with serous effusion. [Busch (M, 1).]—*A. tuberculosa*. Tubercular synovitis. [Busch (M, 1).]

**ARTHROMERE**, n. *A<sup>3</sup>rth<sup>2</sup>/ro<sup>2</sup>-mer*. From *ἄρθρον*, a joint, and *μέρος*, a part. See *SOMITE*.

**ARTHIROMITUS** (Lat.), n. m. *A<sup>3</sup>r-thro<sup>2</sup>m<sup>2</sup>/i<sup>2</sup>t-u<sup>3</sup>s(u<sup>4</sup>s)*. From *ἄρθρον*, a joint, and *μίτος*, thread. A genus of low vegetable organisms, made by Leidy and related, according to him, to the *Mycodermata*; by Robin, assigned to the *Leptotrichae*. They consist of simple, non-branching, cylindrical, jointed filaments, fixed in the midst of a nuclear body, without well-defined structure. [B, 239.]—*A. cristatus* [Leidy]. A species found upon the mucous membrane of the small intestine and upon the intestinal parasites of the *Tulus marginatus*. It consists of fine filaments crossing each other so as to form moderately thick tufts upon small rounded, fixed, yellowish bodies. The total length of the filaments is from 65 to 540  $\mu$  and the thickness 1  $\mu$ , and each internode is about 2  $\mu$  long. The interior of the filament is structureless. [B, 239.]—*A. nitidus* [Leidy]. A species found in the rectum of the *Tulus marginatus*, consisting of 3 or 4 crossing hyaline filaments 213  $\mu$  long and 5  $\mu$  broad. The articulations are very distinct and the internodes are about 5  $\mu$  in length and contain in their interior oval spores 3  $\mu$  long and 2  $\mu$  broad. [B, 239.]

**ARTHRON** (Lat.), n. n. *A<sup>3</sup>rth<sup>2</sup>/ro<sup>2</sup>n*. Gr., *ἄρθρον*. A joint. [A, 322.]

**ARTHRONALGIA** (Lat.), n. f. *A<sup>3</sup>rth-ro<sup>2</sup>n-a<sup>2</sup>(a<sup>3</sup>l)/ji<sup>2</sup>(gi<sup>2</sup>)-a<sup>3</sup>*. From *ἄρθρον*, a joint, and *ἄλγος*, pain. Fr., *arthronalgie*. See *ARTH-RALGIA*.

**ARTHRONCUS** (Lat.), n. m. *A<sup>3</sup>rth-ro<sup>2</sup>n<sup>2</sup>/ku<sup>3</sup>s(ku<sup>4</sup>s)*. From *ἄρθρον*, a joint, and *δύκος*, a mass. Ger., *Gelenkgeschwulst*. Syn.: *arthrophyma*. Swelling of a joint. [E; L, 128.]

**ARTHRONEMA** (Lat.), n. n. *A<sup>3</sup>rth-ro<sup>2</sup>n-e(a<sup>3</sup>)/ma<sup>3</sup>*. Gen., *arthronematos* (-tis). From *ἄρθρον*, a joint, and *νῆμα*, a thread. Fr., *arthronème*. Ger., *Gliederfaden* (2d def.). 1. A genus of *Annelida*, of the family of leeches. [A, 306.] 2. Wallroth's name for a jointed filament making up part of the thallus of an *Alga*. 3. In the pl., *Arthronemata*, a subdivision of low vegetable organisms belonging to the *Dermatonemata*, made by Wallroth, including the genera *Conferva* and *Bulbochaete*. [B, 121, 198.]

**ARTHRONEMPYESIS** (Lat.), n. f. *A<sup>3</sup>rth<sup>2</sup>/ro<sup>2</sup>n-e<sup>2</sup>m-pi(pu<sup>2</sup>)-e(a<sup>3</sup>/si<sup>2</sup>s*. Gen., *arthronempyes<sup>2</sup>eos* (-sis). See *ARTHREMPYESIS*.

**ARTHRONEURALGIA** (Lat.), n. f. *A<sup>3</sup>rth<sup>2</sup>/ro<sup>2</sup>-nu<sup>2</sup>-ra<sup>2</sup>(ra<sup>3</sup>l)/ji<sup>2</sup>(gi<sup>2</sup>)-a<sup>3</sup>*. From *ἄρθρον*, a joint, *νεῦρον*, a nerve, and *ἄλγος*, pain. Ger., *Arthronuralgie*. See *ARTHRALGIA*.

**ARTHRONIA** (Lat.), n. f. *A<sup>3</sup>r-thro<sup>2</sup>/ni<sup>2</sup>-a<sup>3</sup>*. See *ARTHONIA*.

**ARTHROPARALYSIS** (Lat.), n. f. A<sup>3</sup>rth/ro-pa<sup>2</sup>r(pa<sup>3</sup>r)-a<sup>2</sup>l(a<sup>3</sup>l)/i<sup>2</sup>su<sup>3</sup>s/i<sup>2</sup>s. Gen., *arthroparalys<sup>3</sup>eos* (-a<sup>3</sup>l<sup>3</sup>ysis). From *ἀρθρον*, a limb, and *παράλυσις*, paralysis. Ger., *Gliederlähmung*. Paralysis of a limb. [L, 50.]

**ARTHROPATHIA** (Lat.), n. f. A<sup>3</sup>rth/ro-pa<sup>2</sup>th(pa<sup>3</sup>th)/i<sup>2</sup>a<sup>3</sup>. See **ARTHROPATHY**.—**A. hysterica**. See **HYSTERICAL ARTHROPATHY**.—**A. progressiva**. A symmetrical articular affection of nervous origin, of a slow, progressive course, independent of rheumatism, characterized by puffy swelling of the thumbs, enlargement of the first joint of the fingers, and some impediment to the flexion of the latter. [A. McL. Hamilton, "N. Y. Med. Jour.," Jan. 24, 1885, p. 97.]—**A. tabetica**, **A. tabidorum**. See **TABETIC ARTHROPATHY**.

**ARTHROPATHOLOGY**, n. A<sup>3</sup>rth/ro pa<sup>2</sup>th-o<sup>2</sup>l/o-j<sup>2</sup>i. From *ἀρθρον*, a joint (see also **PATHOLOGY**). That department of pathology which deals with diseases of the joints.

**ARTHROPATHY**, n. A<sup>3</sup>rth-ro-p<sup>2</sup>a<sup>2</sup>th-i<sup>2</sup>. Lat., *arthropathia* (from *ἀρθρον*, a joint, and *πάθος*, disease). Fr., *arthropathie*. Ger., *Arthropathie, Gelenkleiden*. It., *artropatia*. Sp., *artropatia*. A general term for diseases of the joints, usually applied to those which depend on some general disease. [A. 322.]—**Ataxic a.** Fr., *arthropathie ataxique*. See **TABETIC a.**—**Hysterical a.** Lat., *arthropathia hysterica*. Fr., *arthropathie hystérique*. An articular affection occurring as a manifestation of hysteria.—**Tabetic a.** Lat., *arthropathia tabetica* (vel *tabidorum*). Fr., *arthropathie tabétique* (ou des ataxiques) [Charcot]. Ger., *tabetische Arthropathie*. Syn.: *Charcot's joint disease*. A disease of one or more of the joints, occurring as a manifestation of *tabes dorsalis*. "Without any premonitory symptoms or appreciable cause, a particular joint suddenly becomes swollen, always to a considerable and sometimes to an enormous extent. The swelling is not attended with pain, fever, or redness, but the tissues surrounding the joint become oedematous and doughy. In a week or two the swelling disappears, and it is then noticed that serious injury has resulted to the joint, destruction of the cartilages and ligaments having occurred, so that the ends of the bones are in contact with each other. A creaking sound is heard on moving the joint, and luxations may readily take place. The destructive process does not expend itself on the cartilages, but extends to the ends of the bones, which become atrophied and eroded. There is very little tendency to exostosis, but the bones become fragile, and fractures may occur on the slightest injury, which is known as 'spontaneous fracture' being also met with." ["N. Y. Med. Jour.," Feb. 5, 1887, p. 153.]—**Vertebral a.** Fr., *arthropathie vertébrale*. A term applied by a writer in the "Jour. de méd. de Bordeaux" to a case of tabetic a. in which there were depressions and rugosities of the vertebrae, many of which were much flattened, with their upper and lower borders decidedly projecting. ["Lancet," Jan. 23, 1886, p. 167.]

**ARTHROPERISPHINXIS** (Lat.), n. f. A<sup>3</sup>rth/ro-pe<sup>2</sup>r-i<sup>2</sup>-sfi<sup>2</sup>n<sup>2</sup>x/i<sup>2</sup>s. Gen., *arthroperisphinx<sup>3</sup>eos* (-xis). From *ἀρθρον*, a limb, and *περισφινγξις*, a tight constriction. See **ARTHROPOBROCHISMUS**.

**ARTHROPERISSIA** (Lat.), n. f. A<sup>3</sup>rth/ro-pe<sup>2</sup>r-i<sup>2</sup>s-si(se)/a<sup>3</sup>. From *ἀρθρον*, a joint or a limb, and *περισσεια*, an abundance. Fr., *arthroperissie*. Ger., *Ueberzähligkeit der Glieder*. A superfluity of limbs or joints. [A, 322.]

**ARTHROPERISSUS** (Lat.), adj. A<sup>3</sup>rth/ro-pe<sup>2</sup>r-i<sup>2</sup>s-su<sup>3</sup>s(su<sup>4</sup>s). From *ἀρθρον*, a joint, and *περισσός*, extraordinary. Pertaining to or affected with arthroperissia. [A, 322.]

**ARTHROPERITITIA** (Lat.), n. f. A<sup>3</sup>rth/ro-pe<sup>2</sup>r-i<sup>2</sup>t-ti(te)/a<sup>3</sup>. See **ARTHROPERISSIA**.

**ARTHROPERITTUS** (Lat.), adj. A<sup>3</sup>rth/ro-pe<sup>2</sup>r-i<sup>2</sup>t-tu<sup>3</sup>s(tu<sup>4</sup>s). See **ARTHROPERISSUS**.

**ARTHROPHLOGOSIS** (Lat.), n. f. A<sup>3</sup>rth/ro-flo(flo<sup>2</sup>)-go<sup>2</sup>si<sup>2</sup>s. Gen., *arthrophlogo<sup>3</sup>eos* (-sis). From *ἀρθρον*, a joint, and *φλόγος*, inflammatory heat. Fr., *arthrophlogose*. Ger., *Arthroplogose, Gelenkentzündung*. It., *artrologosio*. Sp., *artrologosis*. Inflammation of a joint. [L, 43.]—**A. deformans**. See **CHRONIC OSTEO-ARTHRITIS**.—**A. externa**. Inflammation around but not in a joint. [L, 128.]—**A. fibrosa**. See **FUNGUS ARTHRITIS**.—**A. interna**. Inflammation of the proper structure of a joint. [L, 128.]—**A. synovialis**. See **SYNOVITIS**.

**ARTHROPHLYSIS** (Lat.), n. f. A<sup>3</sup>rth-ro<sup>2</sup>f/li<sup>2</sup>s(lu<sup>3</sup>s)/i<sup>2</sup>s. Gen., *arthrophlys<sup>3</sup>eos* (-throph/lysis). From *ἀρθρον*, a joint, and *φλύσις*, an eruption. Ger., *Gichtausschlag*. A gouty cutaneous eruption. [G, 5.]—**A. cardiaca**. Ger., *Gichtfriesel*. Syn.: *milivaria arthritica*. A milinary eczematous eruption said to occur only in connection with gouty or rheumatic cardiac disease. [G, 5.]—**A. vulgaris**. Syn.: *eczema arthriticum*. A vesicular eczema that is said to occur about gouty joints. [G, 5.]

**ARTHROPHRAGM**, n. A<sup>3</sup>rth/ro-fra<sup>2</sup>m. From *ἀρθρον*, a joint, and *φράγμα*, a screen. The partition between the articular cavities for the limbs in many of the *Arthropoda*. [L, 163.]

**ARTHROPHYMA** (Lat.), n. A<sup>3</sup>rth/ro-fi(fu<sup>3</sup>)/ma<sup>3</sup>. Gen., *arthrophym<sup>3</sup>atos* (-tis). From *ἀρθρον*, a joint, and *φύμα*, a swelling. A tumor or swelling of a joint. [L, 128.]—**A. adenochondrium**. See **FUNGUS ARTHRITIS** AND **ADENOCONDRIUM**.—**A. bursale**. Ger., *Bohnengeschwulst*. An enlargement of a bursa. [L, 128.]—**A. externum**. A swelling in the neighborhood of a joint, but not affecting its proper structure. [L, 128.]—**A. internum**. A swelling or tumor of the proper structure of a joint. [L, 128.]—**A. sacatum**. See **HYDRARTHROSIS**.

**ARTHROPHYTE**, n. A<sup>3</sup>rth/ro-ft. From *ἀρθρον*, a joint, and *φύτον*, a growth. Fr., *arthrophyte*. 1. A free body within a joint, originating in the synovial membrane. [Panax, quoted by Poncet, "Rev. de chir.," Oct., 1882, p. 797.] Cf. **FLOATING CARTILAGE**. 2. Any outgrowth from the proper structure of a joint projecting into its cavity. [A, 385.]

**ARTHROPLASTIC**, adj. A<sup>3</sup>rth-ro-pla<sup>2</sup>st/i<sup>2</sup>k. Lat., *arthroplasticus*. Fr., *arthroplastique*. Ger., *arthroplastisch, gelenkbildend*. Pertaining to arthroplasty. [J. R. Barton (E).]

**ARTHROPLASTY**, n. A<sup>3</sup>rth/ro-pla<sup>2</sup>st-i<sup>2</sup>. Lat., *arthroplastice* (from *ἀρθρον*, a joint, and *πλάσσειν*, to form). Fr., *arthroplastique*. Ger., *Arthroplastik, künstliche Gelenkbildung*. It., *artroplastica*. The formation of an artificial joint for the correction of ankylosis. [J. R. Barton, "N. Am. Med. and Surg. Jour.," April, 1827, p. 279 (L, 50).]

**ARTHROPLEURAL**, adj. A<sup>3</sup>rth-ro-plu<sup>2</sup>/ra<sup>2</sup>l. Pertaining to the arthropleura (*q. v.*). [L, 196.]

**ARTHROPLEURE**, n. A<sup>3</sup>rth/ro-plu<sup>2</sup>r. From *ἀρθρον*, a joint, and *πλευρά*, the side. In the *Arthropoda*, the limb-bearing region of the body (the part between the tergite and the sternite). [L, 196.]

**ARTHROPODS**, n. pl. A<sup>3</sup>rth/ro-po<sup>2</sup>dz. See **ARTHROPODA**.—**Branchiate a.** The crustaceans. [L.]

**ARTHROPODA** (Lat.), n. n. pl. A<sup>3</sup>rth-ro-p<sup>2</sup>o<sup>2</sup>d-a<sup>3</sup>. From *ἀρθρον*, a joint, and *πούς*, a foot. Fr., *arthropodes, arthropodes*. Ger., *Arthropoden, Gliederfüssler*. Syn.: *Articulata* (in part). Articulate animals; one of the two primary divisions of the *Annulosa*, comprising the classes *Crustacea*, *Arachnida*, *Myriapoda*, and *Insecta*. The body is composed of a series of segments arranged along a longitudinal axis, each occasionally, and some always, provided with articulated locomotor appendages. Both the body and the appendages are provided with a chitinous exoskeleton; the appendages are hollow, with muscles prolonged into their interior. The nervous system consists of a double chain of ganglia on the ventral surface of the body, united by longitudinal commissures and traversed anteriorly by the cesophagus. The hæmal system, when differentiated, is dorsal, and consists of a valvular heart communicating with a circumvisceral cavity. Respiration is effected at the surface, by gills, pulmonary sacs, or tracheæ. Typically, the head is composed of six segments, and never has fewer than four. [B; L, 147.]—**A. branchiata**. See **CRUSTACEA**.—**A. hexapoda**. See **INSECTA**.

**ARTHROPODAL**, adj. A<sup>3</sup>rth-ro-p<sup>2</sup>o<sup>2</sup>d-a<sup>2</sup>l. Fr., *arthropodaire*. Pertaining to the *Arthropoda*. [A, 385; B, 100.]

**ARTHROPOMATA** (Lat.), n. n. pl. A<sup>3</sup>rth/ro-po<sup>2</sup>m(pom)/a<sup>3</sup>-ta<sup>3</sup>. From *ἀρθρον*, a joint, and *πῦμα*, a cover. See **CLISTERATA**.

**ARTHIROPYOSIS** (Lat.), n. f. A<sup>3</sup>rth/ro(ro<sup>2</sup>)-pi(pu<sup>3</sup>)/o<sup>2</sup>si<sup>2</sup>s. Gen., *arthropy<sup>3</sup>seos* (-sis). From *ἀρθρον*, a joint, and *πύσις*, suppuration. Fr., *arthropyose*. Ger., *Arthropyose, Gelenkvereiterung*. The formation of pus within a joint. [L, 50.]

**ARTHIORRHAGIA** (Lat.), n. f. A<sup>3</sup>rth/ro<sup>2</sup>r-ra(r<sup>3</sup>a<sup>3</sup>)/ji<sup>2</sup>(gi<sup>2</sup>)-a<sup>3</sup>. From *ἀρθρον*, a joint, and *ῥήγνυσθαι*, to break forth. Fr., *arthrorrhagie*. Ger., *Gelenkblutfluss*. Sudden hæmorrhage into a joint. [L, 50, 116.]

**ARTHIORRHEUMA**, **ARTHROKKEUMATISMUS** (Lat.), n's n. and m. A<sup>3</sup>rth/ro<sup>2</sup>r-ru<sup>2</sup>ma<sup>3</sup>, -ru<sup>2</sup>-ma<sup>3</sup>-ti<sup>2</sup>z(ti<sup>3</sup>s)/mu<sup>3</sup>s(-mu<sup>4</sup>s). Gen., *arthrorheumat<sup>3</sup>os* (-tis), *rheumat<sup>3</sup>is* mi. From *ἀρθρον*, a joint, and *ῥεύμα*, or *ῥευματισμός*, a flux. Old terms for articular rheumatism. [L, 50.]

**ARTHRISIA** (Lat.), n. f. A<sup>3</sup>rth-ro<sup>2</sup>zi<sup>2</sup>(si<sup>2</sup>)-a<sup>3</sup>. Fr., *arthrosie*. A general name for severely painful inflammations mostly confined to the joints, but occasionally extending to adjoining parts. [L, 83.]—**A. acuta**. Acute rheumatism. [L, 83.]—**A. artuum**. Pain chiefly in the joints and muscles of the limbs. [L, 83.]—**A. chronica**. Chronic rheumatism. [L, 83.]—**A. coxendicis**. Sciatica. [L, 83.]—**A. hydarthrus**. White swelling. [L, 83.] See **FUNGUS ARTHRITIS**.—**A. lumborum**. Lumbago. [L, 83.]—**A. podagra**. Gout. [L, 83.]—**A. podagra complicata**. Retrocedent gout. [L, 83.]—**A. podagrica**. See **A. podagra**.—**A. podagra larvata**. Atonic gout. [L, 83.]—**A. podagra regularis**. Typical gout. [L, 83.]—**A. thoracis**. Pleurodynia. [L, 83.]—**Exanthesis a.** See **DENGUE**.

**ARTHRISIS** (Lat.), n. f. A<sup>3</sup>rth-ro<sup>2</sup>si<sup>2</sup>s. Gen., *arthro<sup>3</sup>seos* (-sis). Gr., *ἀρθρωσις* (from *ἀρθρον*, to articulate). Fr., *arthrose*. Ger., *Einkenlung*. See **ARTICULATION**.

**ARTHROSPIROBACTERIACEÆ** (Lat.), n. n. pl. A<sup>3</sup>rth-ro<sup>2</sup>s/pi<sup>2</sup>ri-o-ba<sup>2</sup>k(ba<sup>3</sup>k)-te(ta)-ri<sup>2</sup>-a(a<sup>3</sup>)/se<sup>2</sup>(ke<sup>2</sup>)-e(a<sup>3</sup>-e<sup>2</sup>). From *ἀρθρον*, a joint, *σπείρα*, a coil, and *βακτήριον* (see **BACTERIUM**). Fr., *arthrospirobactériacées*. A subdivision (genus) of the *Arthrosporææ* (arthrosponous *Schizomycetes*), comprising those forms in which the cells are screw-shaped spirals and are united into spiral filaments. It includes the single section *Spirochaete*, and differs from the *Spirobacteriaceæ* only in the fact of its arthrosponous reproduction. [Weichselbaum (B, 270).]

**ARTHROSPONGICUS** (Lat.), adj. A<sup>3</sup>rth/ro-spo<sup>2</sup>n(spo<sup>2</sup>n<sup>2</sup>)/ji<sup>2</sup>(gi<sup>2</sup>)-ku<sup>3</sup>s(ku<sup>4</sup>s). Pertaining to, caused by, or affected with, fungous arthritis. [A, 322.]

**ARTHROSPONGOSIS**, **ARTHROSPONGUS** (Lat.), n's f. and m. A<sup>3</sup>rth/ro-spo<sup>2</sup>n<sup>2</sup>-go<sup>2</sup>si<sup>2</sup>s, -spo<sup>2</sup>n<sup>2</sup>-gu<sup>3</sup>s(gu<sup>4</sup>s). Gen., *arthrospongo<sup>3</sup>seos* (-sis), -spon<sup>3</sup>-gi. From *ἀρθρον*, a joint, and *σπώγος*, a spongy substance. Fr., *arthrospongose*. Ger., *Gliedschwamm*. Old terms for fungous arthritis. [L, 50.]

**ARTHROSPORÆ** (Lat.), n. f. pl. A<sup>3</sup>rth-ro<sup>2</sup>s-po<sup>2</sup>r-e(a<sup>3</sup>-e<sup>2</sup>). For deriv., see **ARTHROSPORÆ**. Of Schulz, an order of cryptogamous plants (*Algae*) comprising the divisions *Batrachospermæ*, *Confervaceæ*, and *Ulvaceæ* (*q. v.*). [B, 121.]

**ARTHROSPORÆ**, n. A<sup>3</sup>rth/ro-spor. From *ἀρθρον*, a joint, and *σπόρος*, a seed. Lat., *arthrospora*. Fr., *arthrospore*. Ger., *Arthros pore*. 1. One of a series of spores united in the form of a chain or rosary. [B, 121.] 2. A spore which is produced by the segmentation of a parent cell (as opposed to one produced by endogenous development within the latter). [B, 238.] 3. In the pl., *a's*. See **ARTHROSPORÆ** AND **ARTHROSPORÆ**.

**ARTHROSPORÆÆ** [De Bary] (Lat.), n. f. pl. A<sup>3</sup>rth-ro-spor-(spo<sup>2</sup>r)/e<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). The arthrosponous *Schizomycetes*; a group comprising all those which reproduce by the formation of arthrospones (*i. e.*, by segmentation only). It includes the subdivisions (genera)

*Arthrococeaceae*, *Arthrobacteriaceae*, *Arthrospirobacteriaceae*, and, according to Hueppe, also the *Leptotrichaceae* and *Cladotrichaceae*. [H. M. Ward (B, 77); Weichselbaum (B, 270).]

**ARTHROSPOREI, ARTHROSPORI** (Lat.), n. s. m. pl. *A<sup>3</sup>r-thro-spor*(sp<sup>o</sup>r)<sup>2</sup>e<sup>2</sup>(-ie), -o<sup>2</sup>s-po<sup>2</sup>r(-ie). Fr., *arthrosporees*. Ger., *Arthrosporen*. Of Lévillé, a division of *Fungi* distinguished by the arrangement of the spores in the form of an articulated chain like the beads of a rosary. Such *Fungi* seem often to be composed wholly of spores, the receptacle which supports the latter being almost indistinguishable. [Lévillé (B, 121).] It includes the divisions *Phragmonemaei* and *Homiscinei*. [B, 170.]

**ARTHROSPOROUS**, adj. *A<sup>3</sup>rth-ro<sup>2</sup>s-po<sup>2</sup>ru<sup>2</sup>s*. Fr., *arthrospore*. Having spores formed out of portions of the cell-body or some of the individual cells of the latter set free from the parent organism; the opposite of *endosporous* (said of *Bacteria* and allied organisms). [De Bary (B, 54).]

**ARTHROSTEITIS** (Lat.), n. f. *A<sup>3</sup>rth''ro<sup>2</sup>s-te<sup>2</sup>i(-e)ti<sup>2</sup>s*. Gen., *arthrosteitidis*. From *ἀρθρον*, a joint, and *στέινω*, a bone (see also *-itis*). Inflammation of the articular end of a bone.

**ARTHROSTENOSIS** (Lat.), n. f. *A<sup>3</sup>rth''ro<sup>2</sup>s-te<sup>2</sup>n-o<sup>2</sup>si<sup>2</sup>s*. Gen., *arthrosteno<sup>2</sup>seos* (-sis). From *ἀρθρον*, a joint, and *στενωσις* (from *στενέω*, to straiten), contraction. Ger., *Gelenkverengerung*. Contraction of a joint. [A, 322.]

**ARTHROSTEOPHYMA** (Lat.), n. n. *A<sup>3</sup>rth''ro<sup>2</sup>s-te<sup>2</sup>-o-fi<sup>2</sup>(u<sup>2</sup>)<sup>2</sup>ma<sup>2</sup>*. Gen., *arthrostephym<sup>2</sup>atos* (-tis). From *ἀρθρον*, a joint, *στέινω*, a bone, and *φύμα*, a tumor. A tumor of the articular end of a bone. [L, 30.]

**ARTHROSTERESIS** (Lat.), n. f. *A<sup>3</sup>rth''ro(ro<sup>2</sup>)-ste<sup>2</sup>r-e(a)si<sup>2</sup>s*. Gen., *arthrostere<sup>2</sup>seos* (-sis). From *ἀρθρον*, a limb, and *στέρνω*, deprivation. Fr., *arthrostérèse*. Ger., *Gliedermangel*. The lack of one or more limbs. [L, 50.]

**ARTHROSTERETOS** (Lat.), adj. *A<sup>3</sup>rth''ro(ro<sup>2</sup>)-ste<sup>2</sup>r-e(a)to<sup>2</sup>s*. Lacking one or more of the limbs. [L, 50.]

**ARTHROSTERIGMA** (Lat.), n. n. *A<sup>3</sup>rth''ro(ro<sup>2</sup>)-ste<sup>2</sup>(sta)-ri<sup>2</sup>g<sup>2</sup>ma<sup>2</sup>*. Gen., *arthrosterigm<sup>2</sup>atos* (-tis). From *ἀρθρον*, a joint, and *στέριγμα*, a support. Fr., *arthrostérigmate*. A sterigma made up of ramifying rows of articulated cells, from each of which spermatia are produced as lateral offshoots. Cf. *STERIGMA*. [Nylander (B, 54).]

**ARTHROSTITIS** (Lat.), n. f. *A<sup>3</sup>rth-ro<sup>2</sup>s-ti(-te)ti<sup>2</sup>s*. See *ARTHROSTEITIS*.

**ARTHROSTRACA** (Lat.), n. n. pl. *A<sup>3</sup>rth-ro<sup>2</sup>s-tra<sup>2</sup>ka<sup>2</sup>*. From *ἀρθρον*, a joint, and *στέρακον*, a shell. See *EDRIOPHTHALMATA*.

**ARTHROSTREPTOCOCCUS** (Lat.), n. m. *A<sup>3</sup>rth-ro(ro<sup>2</sup>)-stre<sup>2</sup>p-to<sup>2</sup>(to<sup>2</sup>)-ko<sup>2</sup>k<sup>2</sup>ku<sup>2</sup>s(ku<sup>2</sup>s)*. From *ἀρθρον*, a joint, *στέρεω*, to twist, and *κόκκος*, a kernel. A subdivision (subgenus) of the *Arthrococeaceae*, comprising those forms in which the cells (cocci) are disposed in chains. [B, 270.] See *STREPTOCOCCUS*.

**ARTHROSTYLEÆ** (Lat.), n. f. pl. *A<sup>3</sup>r-thro(thro<sup>2</sup>)-stil<sup>2</sup>(stu<sup>2</sup>)<sup>2</sup>e<sup>2</sup>-e(a)<sup>2</sup>e<sup>2</sup>*. From *ἀρθρον*, a joint, and *στυλος*, a pillar. A section of composite plants, made by Dumortier, corresponding to the *Cynarea* of Lessing. [B, 121, 170.]

**ARTHROSYMPHYSIS** (Lat.), n. f. *A<sup>3</sup>rth''ro(ro<sup>2</sup>)-si<sup>2</sup>m(su<sup>2</sup>)<sup>2</sup>fi<sup>2</sup>(u<sup>2</sup>)<sup>2</sup>si<sup>2</sup>s*. Gen., *arthrosymphys<sup>2</sup>eos* (-syn<sup>2</sup>physis). From *ἀρθρον*, a joint, and *σύνφυσις*, a growing together. Ger., *Gelenkverwachsung*. See *ANKYLOSIS*.

**ARTHROSYMPHYTICUS** (Lat.) adj. *A<sup>3</sup>rth''ro(ro<sup>2</sup>)-si<sup>2</sup>m(su<sup>2</sup>)<sup>2</sup>fi<sup>2</sup>(u<sup>2</sup>)<sup>2</sup>ti<sup>2</sup>(u<sup>2</sup>)<sup>2</sup>i<sup>2</sup>k-u<sup>2</sup>s(u<sup>2</sup>s)*. Pertaining to, caused by, or affected with, ankylosis. [L, 50.]

**ARTHROSYNDESMITIS** (Lat.), n. f. *A<sup>3</sup>rth''ro(ro<sup>2</sup>)-si<sup>2</sup>n(su<sup>2</sup>)<sup>2</sup>de<sup>2</sup>s-mi<sup>2</sup>(me)ti<sup>2</sup>s*. Gen., *arthrosyndesmitidis*. From *ἀρθρον*, a joint, and *σύνδεσμος*, a bond of connection (see also *-itis*). An old term for fungous arthritis. [F. Busch (M, 1).]

**ARTHROSYRINX** (Lat.), n. f. *A<sup>3</sup>rth-ro(ro<sup>2</sup>)-si<sup>2</sup>r(su<sup>2</sup>)<sup>2</sup>i<sup>2</sup>n<sup>2</sup>x*. Gen., *arthrosyrin<sup>2</sup>gos* (-gis). From *ἀρθρον*, a joint, and *σύνρυξ*, a canal. Ger., *Gelenkfistel*. A fistula communicating with the interior of a joint. [A, 322.]

**ARTHROTILUM** (Lat.), n. n. *A<sup>3</sup>r-thro(thro<sup>2</sup>)-ti(-te)lu<sup>2</sup>m(lu<sup>2</sup>)<sup>2</sup>m*. A genus of rivulariaceae plants, established by Rabenhorst. [B, 121.]—*A. thermalis* (Rabenhorst). Syn.: *Amphithrix thermalis* (Kützinger). A species inhabiting the warm springs of Abano in Nubia. [B, 121.]

**ARTHROTOMIE** (Fr., Ger.), n. *A<sup>3</sup>r-tro<sup>2</sup>t<sup>2</sup>-o-me, -me'*. See *ARTHROTOMY*.—*A. ignée* (Fr.). Arthroctomy by means of the actual cautery. [Vincent, "Rev. de chir.," iv, 1884, p. 30 (L).]

**ARTHROTOMY**, n. *A<sup>3</sup>rth-ro<sup>2</sup>t<sup>2</sup>-o-mi<sup>2</sup>*. From *ἀρθρον*, a joint, and *τέμνω*, to cut. Fr., *arthrotomie*. Ger., *Arthrotomie*. Properly, the operation of cutting into a joint; often used in the sense of arthroctomy (q. v.). [Callouzis, "Rev. de chir.," Jan., 1887, p. 60.]

**ARTHROTOPHUS** (Lat.), n. m. *A<sup>3</sup>rth-ro(ro<sup>2</sup>)-to<sup>2</sup>fu<sup>2</sup>s(fu<sup>2</sup>s)*. From *ἀρθρον*, a joint, and *τοπος* (q. v.). An articular topus. [L, 50.] See *TOPHUS*.

**ARTHROTRAUMA** (Lat.), n. n. *A<sup>3</sup>rth-ro(ro<sup>2</sup>)-tra<sup>2</sup>(tra<sup>2</sup>)<sup>2</sup>u<sup>2</sup>ma<sup>2</sup>*. Gen., *arthrotroa<sup>2</sup>matos* (-tis). From *ἀρθρον*, a joint, and *τραύμα*, an injury. Ger., *Gelenkwunde*. An injury of a joint by violence. [A, 322.]

**ARTHROTROPIA** (Lat.), n. f. *A<sup>3</sup>rth-ro(ro<sup>2</sup>)-trop(tro<sup>2</sup>p)<sup>2</sup>i<sup>2</sup>a<sup>2</sup>*. From *ἀρθρον*, a limb, and *τροπή*, a turning. Fr., *arthrotropie*. Ger., *Arthrotropie*, *Gliedrehen*. Torsion of a limb. [L, 50.]

**ARTHROTROPICUS** (Lat.), adj. *A<sup>3</sup>rth-ro(ro<sup>2</sup>)-tro<sup>2</sup>p<sup>2</sup>i<sup>2</sup>k-u<sup>2</sup>s(-u<sup>2</sup>s)*. Pertaining to arthrotropia. [L, 50.]

**ARTHROXEROSIS** (Lat.), n. f. *A<sup>3</sup>rth''ro(ro<sup>2</sup>)-ze<sup>2</sup>r-o<sup>2</sup>si<sup>2</sup>s*. Gen., *arthroxero<sup>2</sup>seos* (-sis). From *ἀρθρον*, a joint, and *ξήρασις* (= *ξηρανσις* [from *ξηραίνω*]), a drying up. See *CHRONIC OSTEO-ARTHRITIS*.

**ARTHROXESIS** (Lat.), n. f. *A<sup>3</sup>rth-ro<sup>2</sup>x<sup>2</sup>e<sup>2</sup>s-i<sup>2</sup>s*. Gen., *arthrox<sup>2</sup>e<sup>2</sup>seos* (-ox<sup>2</sup>esis). From *ἀρθρον*, a joint, and *ξέρις* (from *ξείνω*, to

scrape), a scraping. The abrasion of fungous growths from an articular surface. [Létiévant, "Compt.-rend. du Congr. périod. internat.," 1879 (L).] See *ARTHRECTOMY*.

**ARTHROZAMIEÆ** (Lat.), n. f. pl. *A<sup>3</sup>r-thro(thro<sup>2</sup>)-za<sup>2</sup>m(za<sup>2</sup>m)-i(-e)<sup>2</sup>e<sup>2</sup>-e(a)<sup>2</sup>e<sup>2</sup>*. From *Arthrozamia*, the only genus. A division of plants belonging to the *Zamiaceae*, made by Reichenbach. [B, 170.]

**ARTHROZOA** (Lat.), n. n. pl. *A<sup>3</sup>rth-ro(ro<sup>2</sup>)-zo<sup>2</sup>a<sup>2</sup>*. From *ἀρθρον*, a joint, and *ζῷον*, an animal. Fr., *arthrozaires*. Ger., *Gliederthiere*. According to Burmeister, the *Arthropoda*; according to Fitzinger, the *Crustacea*, *Arachnida*, and *Insecta*. [A, 322; L, 121, 204.] Cf. *ANNULOSA*.

**ARTHROZOIC**, adj. *A<sup>3</sup>r''thro-zo<sup>2</sup>i<sup>2</sup>k*. Of or pertaining to the *Arthrozoa*; applied by Huxley to a series of invertebrate animals including the *Nematoscolices* (*Nematoidea*), the *Arthropoda*, and probably the *Chaetognatha*. [B, 100.]

**ARTHRYPERTHIA** (Lat.), n. f. *A<sup>3</sup>rth''ri(ru<sup>2</sup>)-pu<sup>2</sup>r(pe<sup>2</sup>r)-pa<sup>2</sup>th(pa<sup>2</sup>th)<sup>2</sup>i<sup>2</sup>a<sup>2</sup>*. From *ἀρθρον*, a joint, *ὑπερ*, exceeding, and *πάθος*, a disease. A general term for severe diseases of the joints. [Piorry (L, 50).]

**ARTHRYPSPHINXIS** (Lat.), n. f. *A<sup>3</sup>rth''ri(ru<sup>2</sup>)-po<sup>2</sup>sf<sup>2</sup>n<sup>2</sup>x(-i<sup>2</sup>s)*. Gen., *arthrypsphin<sup>2</sup>x<sup>2</sup>eos* (-is). From *ἀρθρον*, a limb, and *ὑποσφίγγω*, to tighten. See *ARTHRAPOBROCHISMUS*.

**ARTI**, n. A Malabar name for the *Ipomoea pes tigridis*. [B, 121; L, 105.]

**ARTIA** (Lat.), n. f. *A<sup>3</sup>r'ti<sup>2</sup>a<sup>2</sup>*. Gr., *ἀρτία*, *ἀρτή*. An old name for the trachea. [A, 325.]

**ARTIAD**, n. *A<sup>3</sup>r'ti<sup>2</sup>a<sup>2</sup>d*. From *ἀρτιος*, even. In chemistry, an element having a combining capacity expressed by some even number (e. g., oxygen and carbon). [B.]

**ARTIAS** (Sp.), n. *A<sup>3</sup>r'te-a<sup>2</sup>s*. A village in the province of Lerida, Spain, where there are hot sulphurous springs. [A, 385.]

**ARTICHAUT** (Fr.), n. *A<sup>3</sup>r-te-sho*. See *ARTICHOKE*.—*A. camus*. The *Cynara scolymus*, var. *viride*. [B, 121.]—*A. de Jérusalem*. The *Batatas edulis*, *Helianthus tuberosus*, and the *Cucurbita melopepo*. [B, 121, 173.]—*A. des Indes*. The *Batatas edulis*. [L, 105.]—*A. d'Espagne*. The *Cucurbita melopepo*. [B, 121, 173.]—*A. des toits*. The *Sempervivum tectorum*. [L.]—*A. de terre*, *A. d'hiver*, *A. du Canada*. The *Helianthus tuberosus*. [B, 38, 121.]—*A. sauvage*. The *Sempervivum tectorum*, *Onopordon acanthium*, *Carduus marianus*, and *Carlina vulgaris*. [B, 121, 173.]

**ARTICHOAK**, n. *A<sup>3</sup>r'ti<sup>2</sup>-chok*. See *ARTICHOKE*.

**ARTICHOKE**, n. *A<sup>3</sup>r'ti<sup>2</sup>-chok*. Ar., *'harshaf*, or *'harshuf*. [B, 52.] Lat., *articoa*, *articoalus*. Fr., *artichaut*. Ger., *Artischocke*. It., *articooco*, *alcachoa*. Sp., *alcachofa*. The *Cynara scolymus*, a perennial herb indigenous to southern Europe and cultivated in America. The flower-heads are used as an article of food, and the leaves are occasionally employed in medicine. [B, 5.]—*French a.*, *Garden a.* See *A.—Globe a.* A variety of the gar-

THE GLOBE ARTICHOKE.  
[A, 327.]

THE TUBER OF THE JERUSALEM  
ARTICHOKE. [A, 327.]

den a. preferred for cultivation. [A, 327.]—*Jerusalem a.* Fr., *artichaut de terre*. Ger., *Erdartischocke*. It., *girasole* (of which the English name is said to be a corruption). The tuberous sunflower (*Helianthus tuberosus*), Canada (or Virginia) potato; indigenous to Brazil, but cultivated in Europe and North America. The tubers are used as food for cattle and hogs. [A, 327.]

**ARTICLE**, n. *A<sup>3</sup>r'ti<sup>2</sup>kl*. Lat., *articulus* (dim. of *artus*), *articulum*. Fr., *article*. Ger., *Gelenk*. It., *artico*. Sp., *articulo*. 1. A joint; any movable articulation. [A, 385.] 2. In botany, one of a series of similar superimposed, connected, separable parts constituting an organ or other portion of a plant; especially a portion of a fruit separable from the rest and containing a single seed. Also a vegetable cell which is developed from another cell and is shut off from the latter by a partition. See also *ARTICULUM*. 3. In zoology, any of the separate pieces constituting the antenna, the palpus, the tarsus, or the body of an insect. [L, 43.]—*In the a. of death*. See *IN ARTICULO MORTIS* (under *ARTICULUS*).

**ARTICOCA, ARTICOCALUS** (Lat.), n's f. and m. A<sup>3</sup>rt-i<sup>2</sup>-ko<sup>2</sup>ka<sup>3</sup>, -ko<sup>2</sup>ka<sup>3</sup>-lu<sup>3</sup>s(lu<sup>4</sup>s). See **ARTICHOKE**.

**ARTICULA** (Lat.), n. n. pl. A<sup>3</sup>rt-i<sup>2</sup>k-u<sup>2</sup>(u)-la<sup>3</sup>. See **ARTICULUM**.

**ARTICULAIRE** (Fr.), adj. A<sup>3</sup>rt-i<sup>2</sup>k-u<sup>2</sup>-la<sup>3</sup>r. See **ARTICULAR**.

**ARTICULAMENTUM** (Lat.), n. n. A<sup>3</sup>rt-i<sup>2</sup>k-u<sup>2</sup>(u)-la<sup>3</sup>-me<sup>2</sup>nt-u<sup>3</sup>m(u<sup>4</sup>m). An articulation. [A, 318.]

**ARTICULAR**, adj. A<sup>3</sup>rt-i<sup>2</sup>k-u<sup>2</sup>-la<sup>3</sup>r. Gr., ἀρθρικός, ἀρθρικός, ἀρθρικός. Lat., *articularis*. Fr., *articulaire*. Ger., *articular*. It., *articolare*. Sp., *articular*. Pertaining to an articulation; in botany, springing from a node or from an article (3d def.); as a n. (Ger., *Gelenkstück des Unterkiefers*), the submalleal bone; a bone found in the lower jaw of many fishes. It articulates with the tympanic trochlea, sends up a process to which the ligament from the maxillary bone and the masticatory muscles are attached, and is joined with the angular and dentary pieces. [L, 27.]

**ARTICULARIS** (Lat.), adj. A<sup>3</sup>rt-i<sup>2</sup>k-u<sup>2</sup>(u)-la<sup>3</sup>/ri<sup>2</sup>s. See **ARTICULAR**.—A. *genui*. See **SUBCRUREUS**.

**ARTICULARIUS** (Lat.), adj. A<sup>3</sup>rt-i<sup>2</sup>k-u<sup>2</sup>(u)-la<sup>3</sup>/ri<sup>2</sup>-u<sup>3</sup>s(u<sup>4</sup>s). **Articular**. [A, 318.]

**ARTICULARY**, adj. A<sup>3</sup>rt-i<sup>2</sup>k-u<sup>2</sup>-la<sup>3</sup>-ri<sup>2</sup>. See **ARTICULAR**.

**ARTICULATA** (Lat.), n. n. pl. A<sup>3</sup>rt-i<sup>2</sup>k-u<sup>2</sup>(u)-la<sup>3</sup>/ta<sup>3</sup>. Fr., *articulés*. 1. In Cuvier's and von Baer's classifications, a general term for the *Crustacea*, *Arachnida*, *Annelida*, and *Insecta* (including the *Myriapoda*). 2. Of Blainville, see **ENTOMOZOARIA**. 3. Of Owen, see **HOMOGANGLIATA**. 4. Of Grant, see **DIPLONETRA**. 5. Of Wagner, the *Cirrhopodes*, *Annelida*, *Arachnida*, and *Insecta*. 6. Of Van Beneden, the *Epicotyledones*. 7. Of Ehrenberg, the *Insecta*, *Arachnoidea*, *Crustacea* (including the *Cirrhopodes* and *Epicotyledones*), and *Annelida*. 8. A phylum made by Haeckel in 1866, but now abandoned, which included the *Arthropoda* (in the present meaning), *Infusoria*, intestinal worms, and *Annelida*. 9. An order of the *Crinoida* including the families *Pentacrinidae* and *Comatulidae*. 10. A group of the *Brachiopoda* made by Deshayes to include those having the shells united by teeth. See **CLISTERATERA**. [L, 121, 308, 227.] The term was formerly used in nearly the same sense as *Arthropoda* (q. v.). [B.]

**ARTICULATE, ARTICULATED**, adj's. A<sup>3</sup>rt-i<sup>2</sup>k-u<sup>2</sup>-lat, -lat-e<sup>2</sup>d. Gr., ἀρθρῶδης. Lat., *articulatus*. Fr., *articulé*. Ger., *articuliert*. It., *articolato*. Sp., *articulado*. 1. Jointed, provided with articulations. [B.] 2. Belonging to the *Articulata*. [L.] 3. Having the separate bones properly joined together (said of a prepared skeleton). 4. In botany, composed of articles or of separable connected parts (said of a fruit); also connected to another part by a joint (said of a leaf or a floral peduncle). [B, 121.]

**ARTICULATIO** (Lat.), n. f. A<sup>3</sup>rt-i<sup>2</sup>k-u<sup>2</sup>(u)-la<sup>3</sup>/shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., *articulationis*. See **ARTICULATION**.—A. *acromio-spinalis*. An articulation existing between the acromion and the spine of the scapula when the two do not unite. [Gruber (L, 30).]—*Articulatio* *ary-santorianae*. The joints between the arytenoid cartilages and the cornicula laryngis. [L, 115.]—A. *astragalo-calcanæa propria* [Meckel]. See **Astragalo-calcanæal ARTICULATION**.—A. *atlanto-axialis*, A. *atlanto-epistrophica*. See **Atlanto-axoid ARTICULATION**.—A. *cardinaliformis*. See **GINGLYMUS**.—*Articulatio* *cartilaginum costallum*. See **INTERCHONDRAL ARTICULATIONS**.—A. *Chopardii*. Ger., *Chopard'sches Gelenk*. The articulation between the astragalus and os calcis behind and the cuboid and scaphoid bones anteriorly, being the line followed in Chopart's amputation of the foot. [L, 117.]—A. *costo-spinalis*. See **COSTO-VERTEBRAL ARTICULATION**.—A. *coxae*. The hip joint.—A. *cutibiti*. The elbow joint. [L, 175.]—A. *cuneo-navicularis*. See **Naviculo-cuneiform ARTICULATION**.—*Articulatio* *digitorum*. See **PHALANGAL ARTICULATIONS**.—A. *dubia*. See **AMPHIARTHROSIS**.—A. *femoris*. See **Femoro-tibial ARTICULATION**.—A. *genui*. The knee joint. [L, 175.]—A. *humerali*. The shoulder joint. [L, 175.]—A. *Lisfrancii*. Ger., *Lisfranc'sches Gelenk*. A term applied to the tarso-metatarsal articulations, on account of the line of incision in Lisfranc's amputation of the foot passing through them. [L, 117.]—A. *mandibularis*, A. *maxillæ*, A. *maxillaris*. See **Temporo-maxillary ARTICULATION**.—*Articulatio* *metacarpo-phalangæ*. See **Metacarpo-phalangal ARTICULATIONS**.—A. *mixta*. See **AMPHIARTHROSIS**.—*Articulatio* *musculo-ossaria*. A term used by Weber to describe the attachment of muscles or tendons to bones. [L, 31.]—A. *notha*. See **FALSE ARTICULATION**.—A. *pedis*. The ankle joint. [L, 175.]—A. *peroneo-tibialis inferior*. See **Inferior tibio-fibular ARTICULATION**.—A. *peroneo-tibialis superior*. See **Superior tibio-fibular ARTICULATION**.—A. *petro-basilaris*. The anterior portion of the sphenotemporal suture. [L, 31.]—A. *petro-occipitalis*. The petro-occipital suture. [L, 31.]—*Articulatio* *phalangæ* (seu *phalangum*). See **PHALANGAL ARTICULATIONS**.—A. *plana*. See **ARTHRODIA**.—A. *radio-ulnaris inferior*. See **Inferior radio-ulnar ARTICULATION**.—A. *radio-ulnaris superior*. See **Superior radio-ulnar ARTICULATION**.—A. *scapulo-clavicularis*. See **Acromio-clavicular ARTICULATION**.—A. *sphæroidea*. See **ENARTHROSIS**.—A. *sterno-costalis*. See **COSTO-STERNAL ARTICULATION**.—A. *tali*. The ankle joint. [L, 175.]—A. *talo-calcanæa*. See **Astragalo-calcanæal ARTICULATION**.—A. *talo-calcanæo-navicularis*. See **Astragalo-calcanæo-scaphoid ARTICULATION**.—A. *talo-cruralis*. The ankle joint. [L, 31.]—A. *talo-navicularis*. See **Astragalo-scaphoid ARTICULATION**.—A. *tarso-metatarsæ externa*. The articulation between the cuboid and the third and fourth metatarsal bones. [L, 117.]—A. *tarso-metatarsæ interna*. The articulation between the first cuneiform and the first metatarsal bones. [L, 117.]—A. *tarso-metatarsæ media*. The articulation between the second and third cuneiform and the second and third metatarsal bones. [L, 117.]—A. *trochoides*. See **TROCHOID ARTICULATION**.

**ARTICULATION**, n. A<sup>3</sup>rt-i<sup>2</sup>k-u<sup>2</sup>-la<sup>3</sup>/shu<sup>3</sup>n. Gr., ἀρθρῶν. Lat., *articulatio*. Fr., *articulation*. Ger., *Gelenk* (1st def.). **Articu-**

*tion*, *Knochenfügung* (1st def.), *Knochenverbindung* (1st def.). It., *articolazione*. Sp., *articulación*. 1. A joint, whether movable or not; the union of any two segments of an animal body through the intervention of a structure or structures different from both; most commonly limited to the connection existing between contiguous bones or cartilages. [L, 133, 142.] 2. The act of putting the bones of a skeleton together properly. 3. In zoology, the division of the body of an animal into separate, movable segments; the line of junction of two adjacent segments; occasionally, one of the segments themselves. 4. In botany, the connection of the parts of a plant by joints, particularly of the several parts of a compound leaf; the place or line of such connection; also applied occasionally, but improperly, to the part included between two joints. 5. The act or function of combining vocal sounds in the form of syllables or words (in which sense such of the foreign equivalents as are not derivatives of *articulatio* do not apply).—**Acromio-clavicular a.** Lat., *articulatio acromio-clavicularis*. Fr., *a. acromio-claviculaire*. Ger., *Schulterblattschlüsselbeingelenk*. It., *articolazione acromio-claviculare* (o *cleido-scapolare*). Sp., *articulación acromio-clavicular*. The a. between the outer end of the clavicle and the upper edge of the acromion. [L, 172.]—**Amphiarthrodial a.** See **AMPHIARTHROSIS**.—**Apparent a.** One in which the separation of the parts by a joint is obvious. [B, 240.]—**Arthrodial a.** See **ARTHRODIA**.—A. *accidentelle*, A. *anorme* (Fr.). See *False a.*—A. *bicondylienne* (Fr.). An a. of two condyles separated by a bi-concave fibro-cartilage. [L, 114.]—A. *bitrochléenne* (Fr.). An a. in which the articular surfaces are separated by two fibro-cartilages. [L, 114.]—A. *by mutual reception*. See **SCHINDYLESSIS**.—A. *by suture*. See **Astragalo-scaphoid a.—A. *scaphoïdo-cuboïdienne* (Fr.). See **Naviculo-cuboid a.—A. *sebene* (Ger.). The general plane of contact between the head of a bone and the cavity in which it plays, irrespective of the greater size of the former. [L, 31.]—A. *serrée* (Fr.). Syn.: *diarthrose planiforme*. A movable a. by flat or nearly flat surfaces (like those of the carpal bones). [A, 301.]—A. *sfliche* (Ger.). An articular surface. [L, 31.]—A. *sgrube* (Ger.). An articular fossa or cavity. [L, 80.]—A. *semi-mobile* (Fr.). See **AMPHIARTHROSIS**.—A. *sternale inférieure* (Fr.). The a. between the gladiolus and the body of the sternum. [L, 114.]—A. *sternale supérieure* (Fr.). Of Sappey, the a. between the manubrium and the body of the sternum. [L, 114.]—A. *supplémentaire* (Fr.). A form of a. *surnuméraire* (q. v.) in which the fractured ends become rounded (or one is rounded and the other hollowed out), smooth like cartilage, and covered with a fibrous capsule. [A, 301.]—A. *surnuméraire* (Fr.). A sort of joint formed between the fragments of a broken bone. [A, 301.]—A. *trochléenne* (Fr.). See *Trochoid a.*—A. *unicondylienne* (Fr.). A variety of a. in which there are two elliptical surfaces, one of which is convex and termed a condyle. [L, 114.]—A. *vertébro-iliaque* (Fr.). A term applied to the union established between the last lumbar vertebra and the coccyx by the ilio-lumbar ligaments. [L, 188.]—**Astragalo-calcanæal a.**, **Astragalo-calcanæan a.** Lat., *articulatio astragalo-calcanæa*. Fr., *a. calcanéo-astragalienn*. Ger., *unteres Sprungg-***************************************

*beingelenk*. The a. between the astragalus and the os calcis. [L, 31.]—**Astragalo-calcaneo-scaphoid a.** Lat., *articulatio astragalo-calcaneo-scaphoidea*. Ger., *vorderes Sprunggelenk*. An arthrodial a. formed by the astragalus, the os calcis, and the scaphoid bone; by some anatomists it is divided into the astragalo-calcaneal and the astragalo-scaphoid a's. [L, 31.]—**Astragalo-scaphoid a.** Lat., *articulatio astragalo-scaphoidea*. Fr., *a. scaphoïdo-astragalienne*. The a. between the astragalus and the scaphoid bone. [L, 31.]—**Atlanto-axial a.** Lat., *articulatio atlanto-axialis*. Fr., *a. altoïdo-axoïdienne*. Ger., *Drehwirbelgelenk*. It., *articolazione altoïdo-assoïda*. Sp., *articulación altoïdo-axoïda*. An arthrodial a. between the articular surfaces of the atlas and axis. [L, 31.]—**Atlanto-occipital a.** See *Occipito-atlantal a.*—**Atlanto-odontoid a.** Lat., *articulatio atlanto-odontoida*. Fr., *a. atlanto-odontoidienne*. Ger., *Zahngelenk*. Sp., *articulación altoïdo-odontoida*. A lateral ginglymoid a. between the anterior arch of the atlas and the odontoid process of the axis. [L, 31, 142.]—**Atlo-axoid a.** See *Atlanto-axial a.*—**Ball-and-socket a.** See *ENARTHROSIS*.—**Bewegliche A.** (Ger.). See *DIARTHROSIS*.—**Bewegliche runde A.** (Ger.). See *ENARTHROSIS*.—**Calcanéo-cuboid a.** Lat., *articulatio calcaneo-cuboida*. Fr., *a. calcanéocuboïdienne*. Ger., *Würfelbeinelenk*. Sp., *articulación calcaneo-cuboida*. The a. between the os calcis and the cuboid bone. [L, 31.]—**Calcanéo-scaphoid a.** Fr., *a. calcanéoscaphoïdienne*. A term applied to the connection existing between the os calcis and the scaphoid bone through the calcaneo-scaphoid ligaments. [L, 188.]—**Carpometacarpal a's.** Lat., *articulationes carpometacarpee*. Fr., *a's carpo-métacarpiennes*. Ger., *Carpalmetacarpalgelecke*. It., *articolazioni carpo-metacarpali*. Sp., *articulaciones carpo-metacarpianas*. The a's between the carpal and metacarpal bones. [L, 31.]—**Chondro-costal a's.** Fr., *a's chondro-costales*. Sp., *articulaciones condro-costales*. The a's between the ribs and the costal cartilages. [L, 188.]—**Chondro-sternal a.** See *Costo-sternal a.*—**Chondro-transverse a.** See *Costo-transverse a.*—**Chondro-vertebral a.** See *Costo-vertebral a.*—**Coccygeal a's.** Fr., *a's coccygiennes*. The a's between the coccygeal vertebrae. [L, 114.]—**Coraco-clavicular a.** Lat., *articulatio coraco-clavicularis*. Fr., *a. coraco-claviculaire*. It., *articolazione coraco-clavicolare*. A term applied to the union established between the outer end of the clavicle and the coracoid process of the scapula by the coracoid ligament. [L, 114.]—**Costo-central a.** See *Costo-vertebral a.*—**Costo-clavicular a.** Ger., *Costoclaviculargelenk*, *Rippenschlüsselbeinelenk*. An a. formed by a small facet on the inferior surface of the sternal end of the clavicle and the upper border of the first rib. [L, 31.]—**Costo-sternal a.** Lat., *articulatio costo-sternalis*. Fr., *a. chondro-sternale*. Ger., *Rippenbrustbeinelenk*. It., *articolazione costo-sternale*. Sp., *articulación condro-esternala*. The a. between a costal cartilage and a fossa on the margin of the sternum. [L, 31.]—**Costo-transverse a's.** Lat., *articulationes costo-transversales*. Fr., *a's costo-transversaires*. Ger., *Rippenhöckergelenke*. Sp., *articulaciones costo-transversales*. The a's between the transverse processes of the vertebrae and the neck and tubercles of the ribs. [L, 114.]—**Costo-vertebral a.** Lat., *articulatio costo-vertebralis*. Fr., *a. costo-vertébrale*. Ger., *Rippenköpfigelenk*. It., *articolazione costo-vertebrale*. Sp., *articulación costo-vertebral*. The a. between the head of a rib and the bodies of two adjacent vertebrae; occasionally the rib is attached to one vertebra only. [L, 31.]—**Coxo-femoral a.** Lat., *articulatio coxo-femoralis*. Fr., *a. coxo-femorale*. Sp., *articulación coxo-femoral*. The hip joint. [L, 114.]—**Crico-arytenoid a's.** Lat., *articulationes crico-aryténoides*. The a's between the convex surfaces of the upper border of the cricoid cartilage and the concave depressions on the bases of the arytenoid cartilages. [L, 117.]—**Crico-thyroid a's.** Lat., *articulationes crico-thyroideae*. The a's between the lesser cornua of the thyroid cartilage and the sides of the cricoid cartilage. [L, 117.]—**Cubo-cuneiform a.** Fr., *a. cuneo-cuboïdienne*. The a. between the cuboid and the external cuneiform bones. [L, 142.]—**Cuneiform a's.** Fr., *a's cunéenes*. The a's between the cuneiform bones. [L, 142.]—**Cup-and-ball a.** See *ENARTHROSIS*.—**Diarthrodial a.** See *DIARTHROSIS*.—**False a.** Lat., *articulatio notha*. Fr., *a. fausse* (ou *occidentelle*, ou *contre nature*, ou *anorme*, ou *surnuméraire*). Ger., *falsches Gelenk*. Syn.: *pseudarthrosis*. A sort of joint formed between the fragments of a broken bone or between the end of a dislocated bone and the surrounding parts.—**Femoro-tibial a.** Lat., *articulatio genu*. Fr., *a. femoro-tibiale*. Ger., *Kniegelenk*. It., *articolazione femoro-tibiale*. Sp., *articulación femoro-tibial*. The knee joint. [L, 185.]—**Humero-cubital a.** Lat., *articulatio cubiti*. Fr., *a. huméro-cubitale*. Ger., *Ellenbogengelenk*. Sp., *articulación humero-cubital*. 1. The elbow joint. [L, 115.] 2. See *Humero-ulnar a.*—**Humero-radial a.** Fr., *a. huméro-radiale*. The a. between the lower end of the os brachii and the upper end of the radius. [L, 13.]—**Humero-scapular a.** See *Scapulo-humeral a.*—**Humero-ulnar a.** The a. between the lower end of the os brachii and the upper end of the ulna. [L, 190.]—**Immovable a.** See *SYNARTHROSIS*.—**Inco-orbicular a.** Lat., *articulatio inco-orbicularis*. Fr., *a. inco-orbitaire*. Ger., *Amboss-orbiculargelenk*. It., *articolazione inco-orbicolare*. Sp., *articulación inco-orbicular*. A term applied by the older anatomists to the union between the incus and the so-called os orbiculare. [F.]—**Incudo-stapedial a.** Lat., *articulatio incudo-stapedica*. Fr., *a. incudo-stapédiale*. Ger., *Ambosssteigbügelgelenk*. The a. between the lenticular process of the incus and the head of the stapes. [F.]—**Inferior radio-ulnar a.** Lat., *articulatio radio-ulnaris inferior*. Fr., *a. radio-cubitale inférieure*. Ger., *unteres Radioulnargelenk*. It., *articolazione cubito-radiale inferiore*. A lateral ginglymoid a. between the sigmoid cavity of the radius and the lower end of the ulna. [L, 172.]—**Inferior tibio-fibular a.** Lat., *articulatio peroneo-tibialis inferior*. Fr., *a. péronéo-sous-tibiale*. Ger., *unteres Tibiofibulargelenk*. It., *articolazione tibio-peronea inferiore*. Sp., *articulación peroneo-tibial inferior*. The a. between the articular surfaces of the lower end of the tibia

and that of the fibula. [L, 142.]—**Intercarpal a's.** See *Mediocarpal a's*.—**Interchondral a's.** Lat., *articulationes cartilaginum costalium*. The a's formed by processes on the adjacent margins of the costal cartilages; they usually exist from the sixth to the ninth cartilages. [L, 142.]—**Interhyoideal a's.** A term applied to the a's between the different pieces of the hyoideal apparatus. [L, 13.]—**Intermetacarpal a's.** Lat., *articulationes intermetacarpee*. Fr., *a's intermétacarpiennes*. A term applied to the a's of the metacarpal bones with each other. [L, 142.]—**Intermetatarsal a's.** Lat., *articulationes intermetatarsae*. Fr., *a's intermétatarsiennes*. The a's between the proximal and distal ends of the metatarsal bones. [L, 142.]—**Interphalangeal a's.** See *Phalangeal a's*.—**Intertarsal a's.** The a's of the tarsal bones with each other. [L, 13.]—**Intervertebral a's.** Lat., *articulationes intervertebrales*. Fr., *a's intervertébrales*. A term applied to the a's between the bodies and the transverse and spinous processes of the vertebrae. [L, 13.]—**Ischio-pubic a.** A term applied to the union between the ischium and the pubic bone, which in many young and in some adult animals is a true amphiarthrodial joint. [L, 13.]—**Kugelförmige A.** (Ger.). See *ENARTHROSIS*.—**Lateral ginglymoid a.** Fr., *a. ginglyme latérale*. See *Trochoid a.*—**Lumbo-sacral a.** See *Sacro-vertebral a.*—**Malleo-incudal a.** Fr., *a. malleo-incudale*. Ger., *Hammerambossgelenk*. The a. between the posterior surface of the head of the malleus and the body of the incus. [F, 3.]—**Medio-carpal a.** Fr., *a. médio-carpienne*. The a. between the adjacent surfaces of the two rows of carpal bones. [L, 114.]—**Medio-tarsal a.** Fr., *a. médio-tarsienne*. Sp., *articulación medio-tarsiana*. A term applied to the articulation of the os calcis and the astragalus with the scaphoid and cuboid bones. [L, 114.]—**Metacarpal a's.** See *Intermetacarpal a's*.—**Metacarpophalangeal a's.** Lat., *articulationes metacarpophalangeae*. Fr., *a's métacarpophalangiennes*. Ger., *Metacarpophalangealgelenke*. Sp., *articulaciones metacarpofalángicas*. The a's between the metacarpal bones and their corresponding phalanges. [L, 114.]—**Metatarso-phalangeal a's.** Lat., *articulationes metatarsophalangeales*. Fr., *a's métatarso-phalangiennes*. Ger., *Metatarsophalangealgelenke*. Sp., *articulaciones metatarso-falángicas*. The a's between the heads of the metatarsal bones and the corresponding phalanges. [L, 114.]—**Middle radio-ulnar a.** A term applied to the union between the radius and the ulna formed by the interosseous membrane and the oblique ligament. [L, 172.]—**Middle tibio-fibular a.** Fr., *a. péronéo-tibiale moyenne*. A term applied to the connection between the tibia and the fibula formed by the interosseous membrane. [L, 172.]—**Mixed a.** See *AMPHIARTHROSIS*.—**Movable a.** See *DIARTHROSIS*.—**Naviculo-cuboid a.** Lat., *articulatio naviculo-cuboida*. Fr., *a. scaphoïdo-cuboïdienne*. The a. between the cuboid and scaphoid bones. [L, 142.]—**Naviculo-cuneiform a.** Lat., *articulatio cuneo-navicularis*. Fr., *a. cuneo-scaphoïdienne*. Ger., *Schiffbeinelenk*. The a. between the scaphoid and the cuneiform bones. [L, 142.]—**Obsolete a.** One in which the separation of the parts by a joint is not obvious. [B, 240.]—**Occipito-atlantal, Occipito-atloid a.** Lat., *articulatio atlanto-occipitalis*. Fr., *a. occipito-atloïdienne*. Ger., *Hinterhauptgelenk*. It., *articolazione altoïdo-occipitale*. Sp., *articulación occipito-atloïda*. The a. formed by the condyles of the occipital bone and the articular surfaces of the upper surface of the atlas. [L, 31.]—**Occipito-axoid a.** Lat., *articulatio occipito-axoïda*. Fr., *a. occipito-axoïdienne*. Sp., *articulación occipito-atloïda*. A term applied to the connection between the occipital bone and the axis formed by the odontoid and occipito-axoid ligaments. [L, 172.]—**Orbiculo-stapedial a.** Fr., *a. orbiculo-stapédienne*. See *Incudo-stapedial a.*—**Pedal a.** A term applied to the a. between the second phalanx and the third phalanx and navicular bone of the horse and some other of the solipedes. [L, 13.]—**Phalangeal a's.** Lat., *articulationes phalangum*. Fr., *a's phalangiennes*. Ger., *Fingergelenke*. Sp., *articulaciones falángicas*. The a's between the heads of the phalanges. [L, 114.]—**Posterior calcaneo-astragaloid a.** Lat., *articulatio astragalo-calcanea posterior*. Fr., *a. calcanéoastragaliennae postérieure*. Ger., *hinteres Sprunggelenk*. The a. between the posterior articular surface of the astragalus and the sustentaculum tali. [L, 32.]—**Pubic a.** Lat., *articulatio pubica*. Fr., *a. pubienne*. Sp., *articulación pubiana*. See *SYMPHYSIS PUBIS*.—**Quadrato-mandibular a.** The a. of the mandible with the quadrate bone. [L, 12.]—**Radio-carpal a.** Lat., *articulatio radio-carpalis*. Fr., *a. radio-carpienne*. Ger., *Radio-carpalgelenk*. The a. formed by the lower end of the radius and the cuneiform, scaphoid, and semilunar bones. [L, 142.]—**Rundliche A.** (Ger.). See *ENARTHROSIS*.—**Sacro-coccygeal a.** Lat., *articulatio sacro-coccygea*. Fr., *a. sacro-coccygienne*. Ger., *Kreuzsteissbeinelenk*. Sp., *articulación sacro-coccygea*. The a. between the sacrum and the coccyx. [L, 142.]—**Sacro-iliac a.** Lat., *articulatio sacro-iliaca*. Fr., *a. sacro-iliaque*. Ger., *Hüftkreuzbeinelenk*. Sp., *articulación sacro-iliaca*. The a. between the sacrum and the ilium. [L, 142.]—**Sacro-vertebral a.** Lat., *articulatio sacro-vertebralis*. Fr., *a. sacro-vertébrale*. Ger., *Lendenwirbelkreuzbeinelenk*. Sp., *articulación sacro-vertebral*. The a. between the sacrum and the last lumbar vertebra. [L, 172.]—**Scapulo-clavicular a.** Lat., *articulatio scapulo-clavicularis*. Fr., *a. scapulo-claviculaire*. See *Acromio-clavicular a.*—**Scapulo-humeral a.** Lat., *articulatio scapulo-humeralis*. Fr., *a. scapulo-humérale*. Ger., *Schultergelenk*. Sp., *articulación escapulo-humeral*. The shoulder joint; formed by the head of the os brachii and the glenoid fossa of the scapula. [L, 142.]—**Stapedio-vestibular a.** Fr., *a. de l'étrier avec la fenêtre ovale*. Ger., *Steigbügelvorhofgelenk*. It., *articolazione della staffa colla finestra ovale*. Sp., *articulación del estrio con la ventana oval*. The a. between the stapes and the margin of the fenestra ovalis. [F, 82.]—**Sterno-clavicular a.** Lat., *articulatio sterno-clavicularis*. Fr., *a. sterno-claviculaire*. Ger., *Brustschlüsselbeinelenk*. Sp., *articulación esterno-clavicular*. The a. between the sternum and the clavicle. [L, 114.]—**Superior radio-ulnar a.** Lat., *articulatio radio-ulnaris superior*. Fr., *a. radio-cubitale supérieure*.

Ger., *oberes Radioulnargelenk*. Sp., *articulación cubito-radial superior*. The a. formed by the head of the radius and the sigmoid fossa of the upper end of the ulna. [L, 31.]—**Superior tibiofibular a.** Lat., *articulatio peroneo-tibialis superior*. Fr., *a. péronéo-tibiale supérieure*. Ger., *oberes Tibiofibulargelenk*. The a. formed by the upper end of the tibia and an articular surface on the tibia just below and to the outer side of the knee joint. [L, 142.]—**Synovial a.** An a. which is lubricated by synovial fluid. [C.]—**Tarso-metatarsal a's.** Fr., *a's tarso-métatarsiennes*. Ger., *Tarsometatarsalgelenke*. See **ARTICULATIO TARSO-METATARSEA externa, interna, and media.**—**Temporo-hyoideal a.** The a. between the styloid bone and the styloid process of the temporal bone. [L, 13.]—**Temporo-maxillary a.** Lat., *articulatio maxillaris*. Fr., *a. temporo-maxillaire*. Ger., *Unterkiefergelenk*. Sp., *articulación temporo-maxilar*. The a. formed by the condyle of the lower jaw and the glenoid fossa of the temporal bone. [L, 142.]—**Thyreo-hyoid a.** A term applied to the connection between the thyroid cartilage and the hyoid bone formed by the thyreo-hyoid ligaments and membrane. [L, 190.]—**Tibio-tarsal a.** Lat., *articulatio tibio-tarsalis*. Fr., *a. tibio-tarsienne*. Ger., *Knochengelenk*. Sp., *articulación tibio-tarsiana*. The ankle joint; formed by the inferior extremities of the tibia and fibula and the astragalus. [L, 142.]—**Trochoid a.** Lat., *articulatio trochoides*. Fr., *a. trochléenne*. Ger., *Achsenförmig, Röllgelenk*. A form of a. in which rotation alone is possible (e. g., the superior radio-ulnar a.). [L, 31.]

**ARTICULATIVE**, adj. A<sup>3</sup>rt-i<sup>2</sup>k-u<sup>2</sup>-la-ti<sup>2</sup>v. See **ARTICULAR**.

**ARTICULATOR**, n. A<sup>3</sup>rt-i<sup>2</sup>k-u<sup>2</sup>-la-to<sup>2</sup>r. One who articulates bones. [L.]

**ARTICULATUS** (Lat.), adj. A<sup>3</sup>rt-i<sup>2</sup>k-u<sup>2</sup>(u)-la(la<sup>3</sup>)/tu<sup>2</sup>s(tu<sup>4</sup>s). Articulated. [B.]

**ARTICULÉ** (Fr.), adj. A<sup>3</sup>rt-i<sup>2</sup>k-u<sup>2</sup>-la. 1. Articulated. [B.] 2. Belonging to the *Articulata*. [A, 385.] 3. Articulate (said of speech). [A, 301.] 4. As a n., in the pl., see **ARTICULATA**.—**A's en dedans** (Duméril). Vertebrates. [L, 208.]—**A's en dehors** (Duméril). A general term for insects, crustaceans, and worms. [L, 208.]

**ARTICLEUX** (Fr.), adj. A<sup>3</sup>rt-i<sup>2</sup>k-u<sup>2</sup>-la<sup>2</sup>. See **ARTICULÉ** and **ARTICULOSUS**.

**ARTICULIKT** (Ger.), adj. A<sup>3</sup>rt-i<sup>2</sup>k-u-ler<sup>2</sup>. Articulated. [L, 80.]

**ARTICULO-ANGULAIRE** (Fr.), n. A<sup>3</sup>rt-i<sup>2</sup>k-u<sup>2</sup>-lo-a<sup>2</sup>n<sup>2</sup>-gu<sup>2</sup>-la<sup>2</sup>r. Dugès's term for the articular bone (see under **ARTICULAR**). [L.]

**ARTICULO-ANGULO-OPERCULAIRE** (Fr.), adj. A<sup>3</sup>rt-ik-u<sup>2</sup>-lo-a<sup>2</sup>n<sup>2</sup>-gu<sup>2</sup>-lo-o-pe<sup>2</sup>r-ku<sup>2</sup>-la<sup>2</sup>r. A descriptive zoological term applied to a bone in the head of the *Cæcilie*. [B, 38.]

**ARTICULOSUS** (Lat.), adj. A<sup>3</sup>rt-i<sup>2</sup>k-u<sup>2</sup>(u)-lo-su<sup>2</sup>s(su<sup>4</sup>s). From *articulus*, a joint. Fr., *articuleux*. Many-jointed (applied as a species-name to a crab having many-jointed antennae). [L, 180.] In botany, made up of superimposed articulated segments (articles). [B, 121.]

**ARTICULUM** (Lat.), n. n. A<sup>3</sup>rt-i<sup>2</sup>k-u<sup>2</sup>(u)-lu<sup>3</sup>n(lu<sup>4</sup>m). A faultily formed diminutive of *artus*. A term applied by the older botanists to the spores or conidia of *Fungi*, when arranged in the form of a chain or rosary. [B, 121.]

**ARTICULUS** (Lat.), n. m. A<sup>3</sup>rt-i<sup>2</sup>k-u<sup>2</sup>(u)-lu<sup>3</sup>s(lu<sup>4</sup>s). Dim. of *artus*. 1. A joint. [L, 50.] 2. A segment, as of an animal. [L, 11.] 3. A limb. [L, 50.] 4. A moment of time. See *In articulo mortis*.—**Aqua articulorum**. See **SYNOVIA**.—**Articuli coarctatio**. See **ARTHROSTENOSIS**.—**Articuli dilatatio**. See **ARTHRECTASIS**.—**Articuli duplicati**. Lit., double joints; an old term for rickets. [L, 72.]—**A. notus, A. novus**. See **PSEUDARTHROSIS**.—**Articuli of the lenticular nucleus**. Lat., *articuli nuclei lentiformis*. Ger., *Glieder des Linsenkeims*. The three (sometimes four) divisions of the lenticular nucleus, applied against each other like concavo-convex vertebrae, the outer one being known as the *putamen*, and the two (or three) others together as the *globus pallidus*. [a, 10.]—**A. præternaturalis, A. spurius**. See **PSEUDARTHROSIS**.—**In articulo mortis**. At the moment of death.—**Lenticular articuli**. See *Articuli of the lenticular nucleus*.

**ARTIER**, n. A<sup>3</sup>rt-i<sup>2</sup>-u<sup>2</sup>r. An obsolete form of artery. [B, 232.]

**ARTIFICIAL**, adj. A<sup>3</sup>rt-i<sup>2</sup>-fi<sup>2</sup>sh-a<sup>2</sup>l. Lat., *artificialis* (from *arte*, by art, and *facere*, to make). Fr., *artificiel*. Ger., *künstlich*. It., *artificiale*. Sp., *artificial*. Made by man (opposed to *natural*); in natural history, an a. system is a system of classification and nomenclature founded upon distinctions selected arbitrarily. [B.]

**ARTIODACTYLA** (Lat.), n. n. pl. A<sup>3</sup>rt-i<sup>2</sup>shi<sup>2</sup>(ti<sup>2</sup>)-o-da<sup>2</sup>k(da<sup>3</sup>ky'-ti<sup>2</sup>)(tu<sup>2</sup>)-a<sup>2</sup>. From *ἄρτιος*, even, and *δάκτυλος*, a finger. The artiodactyls; a subdivision of the hoofed quadrupeds, including such as have an even number of toes to each foot; it comprises pigs and all the ruminant hoofed animals. [B, 28.]

**ARTIOMORPHA** (Lat.), n. n. pl. A<sup>3</sup>rt-i<sup>2</sup>shi<sup>2</sup>(ti<sup>2</sup>)-o-mo<sup>2</sup>rf-a<sup>2</sup>. From *ἄρτιος*, even, and *μορφή*, form. Fr., *artiomorphes*. Ger., *Artiomorphen*. In Blainville's classification of animals, a subkingdom comprising those which are symmetrical on the two sides. [L, 121.]

**ARTIOZOA, ARTIOZOARIA** (Lat.), n's n. pl. A<sup>3</sup>rt-i<sup>2</sup>shi<sup>2</sup>(ti<sup>2</sup>)-o-zo-a<sup>2</sup>, -zo-a<sup>2</sup>(a<sup>3</sup>)/ri<sup>2</sup>-a<sup>2</sup>. From *ἄρτιος*, even, and *ζῷον*, an animal. Fr., *artiozoaires*. See **ARTIOMORPHA**.

**ARTIPHYLLUS** (Lat.), adj. A<sup>3</sup>rt-i<sup>2</sup>-fi<sup>2</sup>(fu<sup>2</sup>)/lu<sup>3</sup>s(lu<sup>4</sup>s). From *ἄρτι*, exactly, and *φύλλον*, a leaf. Having buds in the axils of all the leaves. [B, 38.]

**ARTISCHOCKE** (Ger.), n. A<sup>3</sup>rt-i<sup>2</sup>-shok'e<sup>2</sup>. See **ARTICHOKE**.—**A'bart**. The inner, filamentous portion of an artichoke; the "choke." [L, 46.]—**A'n'bogen**. The bottom of the artichoke. [L, 46.]—**A'ndistel**. See **ARTICHOKE**.—**A'nfast**. A mixture of wine and the expressed juice of the artichoke; used in scurvy. [L, 30.]—**A'nkäse**. See **A'n'bogen**.—**A'nsamen**. The fruit of *Cynara scolymus*. [B, 180.]—**A'nstuhl**. See **A'n'bogen**.—**Cardo-**

**nen-A**. The *Cynara cardunculus*. [B, 180.]—**Echte A., Französische A., Garten-A., Glatte A., Grüne A.** See **ARTICHOKE**.—**Kugel-A., Rothe A.** See *Globe ARTICHOKE*.—**Spanische A.** The *Cynara cardunculus*. [B, 49.]—**Wilde A.** The *Carlina acaulis*. [B, 180.]

**ARTISCHOCUS, ARTISCOCCUS** (Lat.), n's m. A<sup>3</sup>rt-i<sup>2</sup>-ko(ch<sup>2</sup>o<sup>2</sup>)/ku<sup>3</sup>s(ku<sup>4</sup>s), ko<sup>2</sup>k'/ku<sup>3</sup>s(ku<sup>4</sup>s). The artichoke. [B, 59.]—**A. lævis**. The common artichoke, *Cynara scolymus*. [B, 59.]—**Semen artischoci**. The fruit of *Cynara scolymus*. [B, 180.]

**ARTISCUS** (Lat.), n. m. A<sup>3</sup>rt-i<sup>2</sup>s(ku<sup>3</sup>s)(ku<sup>4</sup>s). Gr., *ἄρτιος* (dim. of *ἄρτος*), a little loaf, a roll, a cake. An old name for a troche, on account of its shape; especially one made of bread and viper's flesh. [L, 84, 94.]

**ARTISTOMIA** (Lat.), n. f. A<sup>3</sup>rt-i<sup>2</sup>s-tom(to<sup>2</sup>m)/i<sup>2</sup>-a<sup>3</sup>. Gr., *ἀρτιοτομία* (from *ἄρτι*, exactly, and *τομή*, a mouth). 1. A distinct, precise articulation. [L, 50.] 2. That state of an opening (in an instrument and especially in an operation wound) in which its size exactly answers the purpose. [L, 50.]

**ARTISTOMUS** (Lat.), adj. A<sup>3</sup>rt-i<sup>2</sup>st(o<sup>2</sup>o<sup>2</sup>)-mu<sup>2</sup>s(mu<sup>4</sup>s). Gr., *ἀρτιστομος*. Having the quality of artistomia. [L, 50.]

**ARTYLS**, n. pl. A<sup>3</sup>rt-i<sup>2</sup>-i<sup>2</sup>zl. From *ἄρτιος*, even (see also *-yl'*). Ger., *Artyle*. A name given by Löwig to the hydrocarbons of the general formula C<sub>2</sub>H<sub>2n</sub>. [B, 196.]

**ARTYPOCHROS, ARTYPOCHRUS** (Lat.), adj's. A<sup>3</sup>rt-i<sup>2</sup>-i<sup>2</sup>p(u<sup>2</sup>)-o'-kro<sup>2</sup>s(ch<sup>2</sup>ro<sup>2</sup>s), -kru<sup>2</sup>s(ch<sup>2</sup>ru<sup>2</sup>s). Gr., *ἀρτιύποχρος* (from *ἄρτι*, exactly, and *ὑπόχρος*, pale yellow). Of a pale-yellow color. [Hippocrates (L, 50).]

**ARTIZOOS** (Lat.), adj. A<sup>3</sup>rt-i<sup>2</sup>-zo-o<sup>2</sup>s. Gr., *ἀρτιζωος*. 1. Barely alive (said of infants that are born in a state of impaired vitality). [A, 322.] 2. Recently born. [A, 322.]

**ARTOCARPACEÆ** (Lat.), n. f. pl. A<sup>3</sup>rt-i<sup>2</sup>-o-ka<sup>3</sup>rp-a(a<sup>3</sup>)/se<sup>2</sup>(ke<sup>2</sup>)-e(a<sup>3</sup>-e<sup>2</sup>). For deriv., see **ARTOCARPUS**. Fr., *artocarpées, artocarpacees*. Ger., *Artokarpaceen, Brodfruchtbdäume*. The artocarpads. Of Lindley and others, an order of apetalous phanerogams comprising trees and shrubs with milky opalescent juice, usually acrid and poisonous, sometimes nutritious and wholesome; leaves usually alternate, convolute in the bud, and provided with large deciduous stipules which are usually amplexicaul; flowers collected in dense heads or aments; ovaries with a single ovule, which is ascending or, if descending, is nearly or quite orthotropical, the micropyle being always superior; and large fleshy fruit formed by the aggregation of the ovaries. This order, which comprises *Artocarpus*, *Ficus*, *Antiaris*, *Cecropia*, and other genera, is by many regarded as a tribe of the *Ulmaceæ* related to the *Morece*, or is merged with the latter, from which it is chiefly distinguished by the character of its leaves and stipules and by its erect stamens. [B, 34, 121.]

**ARTOCARPACEOUS**, adj. A<sup>3</sup>rt-i<sup>2</sup>-o-ka<sup>3</sup>rp-a'shu<sup>2</sup>s. Fr., *artocarpé*. Belonging to the *Artocarpaceæ*.

**ARTOCARPADS**, n. pl. A<sup>3</sup>rt-i<sup>2</sup>-o-ka<sup>3</sup>rp-a<sup>2</sup>dz. See **ARTOCARPACEÆ**.

**ARTOCARPEÆ** [R. Brown] (Lat.), n. f. pl. A<sup>3</sup>rt-i<sup>2</sup>-o-ka<sup>3</sup>rp-e<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). The *Artocarpaceæ*, especially when regarded as a tribe of the *Ulmaceæ* or the *Moraceæ*, and not as a distinct order. [B.]

**ARTOCARPEOUS**, adj. A<sup>3</sup>rt-i<sup>2</sup>-o-ka<sup>3</sup>rp-e-u<sup>2</sup>s. See **ARTOCARPACEOUS**.

**ARTOCARPIDEÆ** [Dumortier] (Lat.), n. f. pl. A<sup>3</sup>rt-i<sup>2</sup>-o-ka<sup>3</sup>rp-i<sup>2</sup>d'e<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). See **ARTOCARPEÆ**.

**ARTOCARPOUS**, adj. A<sup>3</sup>rt-i<sup>2</sup>-o-ka<sup>3</sup>rp-u<sup>2</sup>s. See **ARTOCARPACEOUS**.

**ARTOCARPUS** (Lat.), n. m. (although treated by botanists as fem.). A<sup>3</sup>rt-i<sup>2</sup>-o-ka<sup>3</sup>rp-u<sup>2</sup>s(u<sup>4</sup>s). From *ἄρτος*, bread, and *καρπός*, a fruit. Fr., *artocarpe, arbre à pain*. Ger., *Brodfruchtbaum, Brod-*

— THE ARTOCARPUS INCISA. [A, 327.]

*baum*. A genus of artocarpaceous trees, made by Forster, bearing separate male and female flowers, the former on long, club-shaped spikes, and the latter in round heads which soon coalesce into a fleshy mass rich in starch—the bread-fruit—which is largely used

as food in the Pacific islands and in India. [B. 19.]—**A. Blumei** [Trécul]. A species growing in Java and Malabar, used like *A. pubescens* and *A. lakoocha*. An ointment of the buds and leaves is applied to buboes and hæmorrhoids. The fruit is edible, contains an oil used in cooking, and is employed in diarrhoea. [H. Baillon (B.).]—**A. brasiliensis** [Gomez]. The *jaca* of Brazil; a species producing an edible fruit. [H. Baillon (B.); L. 105.]—**A. camansi**. The *camangai*, *dalangian*, *dotongian*, or *paec*; a species growing in the Philippines, having edible seeds of a taste like that of chestnuts. [Blanco (B.).]—**A. chaplasha**. A large species found in Chillagone and the forests lying east of Bengal; furnishing timber. [B. 177.]—**A. communis** [Forster]. See *A. incisa*.—**A. echinata**. A large tree found in the Neillgherries, furnishing timber. [B. 172.]—**A. elastica** [Retz]. An East Indian species with edible fruit. [H. Baillon (B.).]—**A. heterophylla** [Lamarck]. A species the root of which is astringent and used in diarrhoea and other affections. [B. 121.]—**A. hirsuta** (seu *hirsutus*) [Lamarck]. The *ansjeli* of the Malays; a species bearing an edible fruit which, eaten in excess, is said to cause diarrhoea, for which the bark and root of the same plant are used as remedies. [L. 87, 105.]—**A. imperialis** [Roxburgh]. An East Indian species having an edible fruit. [H. Baillon (B.).]—**A. incisa** (seu *incisus*) [Linnaeus fil.].

THE LEAVES, FLOWER, AND FRUIT OF THE ARTOCARPUS INCISA. [A. 327.]

Fr., *arbre à pain*, *rimier*. Ger., *Brodfruchtbaum*, *gemeiner Brodbaum*. The bread-fruit tree of the South Sea Islands; a tree of 50 to 60 feet in height, with rough, dark-green, lobate leaves, and a rounded, greenish, edible fruit, of the size of a man's head, which consists internally of a whitish, pulpy mass resembling fresh bread in texture, and forms one of the staple articles of food in the Pacific islands. The fresh flowers are made into an acidulous conserve, and the dried female flowers are used in the manufacture of a sort of amadou. The seeds are eaten. The juice of the tree contains caoutchouc, and the bark can be fashioned into a sort of coarse cloth. The ashes of the leaves mixed with coconut oil are used as an inunction in leprosy skin diseases, a decoction of the wood, together with that of *Mangifera foetida*, is drunk in order to purify the blood and bring on the lochia, and the root is employed as a remedy in dysentery. [B. 33, 121, 180.]—**A. integrifolia** (seu *integrifolius*) [Linnaeus fil.]. Fr., *jaquier*, *jaquier*. Ger., *indischer Brodbaum*. The *iak*, *iack*, *jaq*, *jaques*, or *iaca*; a species found on the islands of the Indian Ocean, differing from *A. incisa* in having the leaves entire. The fruit is ovoid-oblong, sometimes 1½ feet in length. This and the other parts of the tree have properties and uses similar to those of *A. incisa*. A decoction of the root is used in diarrhoea and externally in leprosy skin diseases, and concretions forming spontaneously from the exuded juice of the root are employed in diarrhoeal diseases. [B. 33, 121, 180.]—**A. jaca** [Lamarck]. See *A. integrifolia*.—**A. kertau**. A Java species bearing an edible fruit. [H. Baillon (B.).]—**A. laevis**. An East Indian species bearing an edible fruit. [H. Baillon (B.).]—**A. lakoocha**. A Bengal species. The male spadix is acid and astringent, and is eaten in curry. The roots furnish a yellow dye. [B. 172.]—**A. longifolia** [H. Cels]. An East Indian species bearing an edible fruit. [H. Baillon (B.).]—**A. maxima**. The *uanga*; a species growing in the Philippines, bearing an edible fruit 1½ foot long and 1 foot thick. The ashes of the wood are used as an application to burns. [Blanco (B.).]—**A. ovata**. A species with large, ovate-oblong leaves, indigenous to the Philippines, where it is called *anobing*, or *anobling*. Its wood is very durable. [Blanco (B.).]—**A. parvifolia** [Wight]. An East Indian species bearing an edible fruit. [H. Baillon (B.).]—**A. polyphema** [Persoon]. Syn.: *Polyphema champeden* [Loureiro]. The *tjampeda*, or *cay mit nai*, of Annam; a species with an edible fruit, indigenous to Cochinchina. [H. Baillon (B.).]—**A. pubescens** [Willdenow]. See *A. hirsuta*.—**A. rigida** [Blume]. An East Indian species bearing an edible fruit. [H. Baillon (B.).]—**A. venenosa** [Zoll]. An East Indian species with a very poisonous juice. [H. Baillon (B.).]

**ARTOCREAS** (Lat.), n. n.  $A^3rt-o^2k're^2-a^2s(a^2s)$ . Gen., *artocreatos* (-tis). Gr., *ἀρτοκρεας* (from *ἄρτος*, bread, and *κρέας*, meat). Fr., *artocreas*. Ger., *Artokreas*, *Fleischbrod*. Syn.: *pastetium*. An ancient article of pastry containing meat. [A. 325; L. 50.]

**ARTOGALA** (Lat.), n. n.  $A^3rt-o^2g'a^2-la^2$ . Gen., *artogalac'tos* (-tis). From *ἄρτος*, bread, and *γάλα*, milk. An ancient name for a mixture of bread and milk, used either for food or as a poultice. [L. 119.]

**ARTOICUM** (Lat.), n. n.  $A^3rt-o(o^2)'i^2k-u^2m(u^4m)$ . From *ἄρτος*, bread. An ancient preparation made by boiling bread with a red oil derived from the roots of certain plants. [A. 325.]

**ARTOMELI** (Lat.), n. n.  $A^3rt-o^2m'e^2l-i(e)$ . Gen., *artomel'itos* (-tis). From *ἄρτος*, bread, and *μέλι*, honey. Fr., *artomel*. Ger., *Artomel*, *Honigteig*. An ancient plaster or poultice of bread and honey. [A. 311; L. 43.]

**ARTOPCEOPSORA** (Lat.), n. f.  $A^3rt-o-pe''(po'e^2)-o^2p-so'ra^2$ . From *ἀρτοποιός*, a baker, and *ψώρα*, the itch. Ger., *Bäckerkrätze*. Bakers' itch; a form of eczema of the hands to which bakers are subject in consequence of their occupation. [G; L. 50.]

**ARTOPTA** (Lat.), n. m.  $A^3rt-o^2p'ta^2$ . Gr., *ἀρτοπτης* (from *ἄρτος*, bread, and *πτάνω*, to bake). Ger., *Tortenpfanne*. Lit., a baking pan; applied by H. Deventer to women whose labors are easy and rapid. [A. 322, 325; L. 94.]

**ARTOPTICIUS** (Lat.), adj.  $A^3rt-o^2p-ti^2si^2(ki^2)-u^2s(u^4s)$ . Gr., *ἀρτοπτικίος*. Baked in a pan; as a n., bread so cooked. [A. 311, 312, 325.]

**ARTORRHIZEÆ** (Lat.), n. f. pl.  $A^3rt-o^2r-ri^2z'e^2-e(a^2e^2)$ . From *ἄρτος*, bread, and *ρίζα*, a root. Fr., *artorrhizées*. Ger., *Brodwurzeln*. Of Endlicher, a class of monocotyledonous plants having edible roots or rhizomes, embracing the *Dioscoreaceæ* and the *Taccaceæ*. [B. 121; L. 41.]

**ARTOS** (Lat.), n. m.  $A^3rt-o^2s$ . Gr., *ἄρτος*. Bread. [A. 322.] See PANIS.

**ARTOTROGUS** (Lat.), n. m.  $A^3rt-to-tro'gu^2s(gu^4s)$ . From *ἄρτος*, bread, and *τρώγω*, to chew. A genus of parasitic hyphomycetous *Fiungi*, made by Montagne, but which, according to Tulasne, is only the coniferous form of a species belonging to the *Peronosporaceæ*. [B. 54, 76, 121.]

**ARTURO**, n. A Cretan name for the *Astragalus sesameus* and the *Celsia arcturus*. [B. 121.]

**ARTUS** (Lat.), n. m. (in the sing.) or n. (in the pl.).  $A^3rt'u^2s(u^4s)$ . Gen., *art'us*; pl., *artus* or *art'us*; gen. pl., *art'uum*. A joint or a limb. [A. 312, 322.]

**ARTY**, n. See ARTI.

**ARTYMA** (Lat.), n. n.  $A^3rt-i(u^6)'ma^2$ . Gen., *artym'atos* (-tis). Gr., *ἀρτυμα*. See CONDIMENT.

**ARTZET** (O. Ger.), n.  $A^3rt'ze^2t$ . The medical art. [Paracelsus (H.).]

**ARTZNEY** (Ger.), n.  $A^3rtz'ni$ . See ARZNEI.—**Beider A. Doctor**. A doctor of medicine and surgery. [H.]

**ARU-ARU**, n. A native name for the finest *Manioca* arrow-root. [A. 385.]

**ARUBA** (Lat.), n. f.  $A^2r(a^2r)-u^2(u)'ba^2$ . Of Aublet, a genus of simarubaceous plants corresponding to the genus *Simaba*. By Baillon it is included under the genus *Quassia*. [B. 121.]—**A. cedron**. See *SIMABA cedron*.—**Cortex arubæ**. A bark imported from Brazil, supposed to be derived from a species of *A.* It occurs in rolled fragments smooth on both sides, covered with a greenish-brown or yellowish-brown epidermis, and having an astringent bitterish taste. [B. 180.]

**ARUBAJWAIN**, n. An East Indian name for the *Ptychotis carum*, used in India as a carminative. [H. Baillon (L. 87).]

**ARUBEA** (Lat.), n.  $A^2r(a^2r)-u^2(u)'be^2-a^2$ . Of Nees and Martius, a section of the genus *Galipea*, including species with free stamens. [B. 121.]

**ARUBIA**, n. A Kabyle name for the *Rubia tinctorum*. [B. 121.]

**ARUDA**, n. A Cingalese and Tamil name for the *Ruta graveolens*. [L. 105.]

**ARUEIRA, ARUERA**, n's. The *Pistacia lentiscus* and *Schinus molle*. [B. 121.]

**ARUGAM VAYE**, n. An East Indian name for the *Agrostis linearis*. [L. 105.]

**ARULAY GUDDA**, n. A Telooogo name for the potato. [L. 77.]

**ARUM** (Lat.), n. n.  $A(a^2)'ru^2m(ru^4m)$ . Gr., *ἄρον*. Fr., *arum* [Fr. Cod.], Ger., *Aron*, *Aaron*. It., *aro*. A genus of araceous herbs (subfamily *Aroideæ*, tribe *Arceæ*, subtribe *Arineæ* [Engler]; tribe *Arineæ*, subtribe *Euarineæ* [Bentham and Hooker]), established by Linnaeus. It formerly included many species now referred to distinct genera. It now includes perennial acaulescent herbs, with hastate or sagittate leaves, convolute spathe, and free, appendiculate, club-shaped spadix, flowerless at the top, in the middle densely covered with the male flowers, which are naked and consist of sessile or subsessile anthers, and at its base bearing the female flowers, which are also naked, are devoid of staminalia, and consist of unilocular ovaries containing many orthotropal ovules. The fruit is baccate and many-seeded. [B. 19, 42.]—**Arrow a.** The *Peltandra virginica*. [B. 19.]—**A. abyssinicum** [Richard]. A species probably referable to the *Saurornatum abyssinicum* (q. v.). [B. 216.]—**A. acaule**. See *A. maculatum*.—**A. a cinq. feuilles** (Fr.). See *A. pentaphyllum*.—**A. ægyptiacum** [Döb.]—**A. ægypticum** [Rumphius]. The *Colocasia antiquorum*. [B. 211.]—**A. albi-spathum** [Hort.]. See *A. italicum*.—**A. alpinum** [Schott]. The *A. maculatum*, var. *γ*. [B. 216.]—**A. americanum** *ar. vulgaris facie*. The *Richardia africana*. [B. 211.]—**A. americanum betre foliis**. The *Dracontium foetidum*. [B. 211.]—**A. arbore-sceus** [Plumier]. Fr., *gouet en arbre*. Ger., *Aronsbaum*. See *MONTRICHARDIA arbore-sceus*.—**A. arisarum** [Linnaeus]. Fr., *gouet*

en capuchon. See *ARISARUM vulgare*.—*A. à trois feuilles* (Fr.). See *A. triphyllum*.—*A. atrorubens*. 1. Of Aiton, the *Arisema atrorubens*. 2. Of Sprengel, the *Pinellia tuberifera*. [B. 216.]—*A. auritum* [Vell.]. See *SYNGONIUM auritum*.—*A. besserianum* [Schott]. The *A. maculatum*, var.  $\beta$  *angustatum*. [B. 216.]—*A. bicolor* [Aiton]. See *Caladium bicolor*.—*A. byzantinum* [Schott]. The *A. italicum*, var. *byzantinum*. [B. 216.]—*A. campanulatum* [Roxburgh]. See *AMORPHOPHALLUS campanulatus*.—*A. canariense* [Webb and Berthelot]. The *A. italicum*, var. *canariense*. [B. 216.]—*A. caulescens* [Plumier]. See *DIEFFENBACHIA seguine*.—*A. colocasia* [Linnaeus]. The *Colocasia antiquorum*, var.  $\alpha$  *typica*. [B. 216.]—*A. colocasioides* [Desfontaines]. The *Colocasia antiquorum*, var.  $\gamma$  *Fontanesii*. [B. 216.]—*A. concinnatum* [Schott]. The *A. italicum*, var. *concinatum*. [B. 216.]—*A. cordifolium* [Bory]. A species more properly referred to the genus *Alocasia* (*A. indica*, var.  $\gamma$  *variegata*); highly prized in the Gilbert Islands as an article of food. [A. 327; B. 216.]—*A. costatum* [Wallich]. See *ARISEMA costatum*.—*A. crinitum* [Aiton]. See *HELIODICEROS muscivorus*.—*A. cuspidatum* [Blume]. See *TYPHONIUM cuspidatum*.—*A. cyprinum* [Schott]. The *A. Dioscoridis*, var.  $\alpha$  *Smithii*. [B. 216.]—*A. d'Ethiopie* (Fr.). The *Richardia aethiopica*. [B. 19.]—*A. Dioscoridis* [Sibthorp and Smith]. Gr.,  $\alpha\rho\omega\nu$  [Dioscorides]. Fr., *gout de Dioscoride*. A species indigenous to Greece. The petiole is two or three times as long as the hastate or sagittate leaf, the anterior lobe of which is oblong-triangular and nearly twice the length of the posterior lobe; the tube of the spathe, pale within, is from a fifth to a third the length of the lanceolate-oblong, variously colored lamina; the female inflorescence is of two to three times the length of the male, the appendix of the spadix is elongated, club-shaped or cylindroid, and of a dark-violet color. The *A. Dioscoridis*, var.  $\alpha$  *Smithii*, occurring in Cyprus, has a purple spathe covered with dark-purple, lenticular spots, and yellowish female flowers purplish at their apex. The *A. Dioscoridis*, var.  $\beta$  *spectabile*, found in Rhodes, Cilicia, and Tripoli, has elongate-sagittate leaves with the anterior lobes of nearly three times the length of the posterior, and the spathe with tube greenish within and yellowish-green lamina covered with large spots, and the appendix of the spadix cylindrical and terminating in a club-shaped extremity. The *A. Dioscoridis*, var.  $\gamma$  *Syriacum*, occurring in Syria, Tripoli, and the Grecian Archipelago, has the lamina of the spathe dark-purple below, greenish above, and covered with dark-purple spots, and the appendix of the spadix is cylindroid. The *A. Dioscoridis*, forma *guttata*, occurring in Syria, resembles the last variety, but the lamina of the spathe is yellowish-green and the spots on its surface are larger. The root of *A. Dioscoridis* is edible when cooked. [B. 173, 180, 216.]—*A. divaricatum* [Linnaeus]. See *TYPHONIUM divaricatum* and *TYPHONIUM cuspidatum*.—*A. diversifolium* [Blume]. See *TYPHONIUM divaricatum*.—*A. dracontium*. 1. Of Linnaeus, the *Arisema dracontium*. 2. Of Thunberg, the *Arisema Thunbergii*. 3. Of Loureiro, the *Pinellia Waueri*. 4. Of Loureiro, the *Colocasia indica*. 2. Of Roxburgh, a species more properly referred to the *Alocasia indica* (q. v. in Supplement). [B. 216.]—*A. indicum sativum* [Rumphius]. See *A. macrorrhizon*.—*A. intermedium* [Schur.]. The *A. maculatum*, var.  $\beta$  *angustatum*. [B. 216.]—*A. italicum* [Miller]. Gr.,  $\delta\rho\alpha\kappa\omega\nu\tau\iota\omega\nu$   $\mu\iota\kappa\rho\delta\omega\nu$  [Dioscorides]. Ger., *italienischer Aron*. A species growing throughout southern Europe, with hastate auriculate leaves; spathe with oblong-cylindrical tube, white within, and of a quarter to a third the length of the oblong-acuminate lamina, which is greenish externally, yellowish within; and cylindrical-cuneate spadix, shorter than the spathe, yellow-colored at its upper naked portion, and at its base bearing the cylindrical female inflorescence, which is of three to four times the length of the male inflorescence and consists of very pale ovoid ovaries. The *A. italicum*, var.  $\beta$  *canariense*, growing in the Canary Islands, the *A. italicum*, var.  $\gamma$  *concinatum*, growing in Cyprus and Asia Minor, and the *A. italicum*, var.  $\delta$  *byzantinum*, growing in Crete, differ from the ordinary form chiefly in the form and color of the leaves, spathe, and appendix of the spadix. The root of *A. italicum*—*radix ari gallici* (seu *majoris*, seu *dracunculii*)—has the same properties and is used for the same purposes as that of *A. maculatum*. [B. 180, 216.]—*A. Liepoldii* [Schott]. The *A. Dioscoridis*, var.  $\gamma$  *Syriacum*. [B. 216.]—*A. lyratum* [Roxburgh]. A species more properly referred to the *Amorphophallus lyratus* (q. v. in the Supplement).—*A. macrorrhizon* [Linnaeus]. See *ALOCASIA macrorrhiza* (in Supplement).—*A. macrourum*. The *Pinellia tuberifera*. [L. 75.]—*A. maculatum*. Fr., *aron*, *gout*, *pied-de-veau*, *a. tacheté* (ou *maculé*). Ger., *gefleckter Aron*, *Aronstab*, *gemeine Aronswurzel*, *Aasblume*, *deutscher Ingwer*. It., *aro*, *gigaro*. 1. Of Linnaeus, European dragon-root, wake-robin, cuckoo-pint, lords and ladies. A species growing wild in Europe distinguished by the following characters: The petioles, sheathed for one third their length, are twice as long as the hastate or sagittate-hastate leaves, the oblong anterior lobe of which is twice as long as the retrorse posterior lobe; the peduncle is usually shorter than the petiole; the tube of the spathe, whitish within and marked with a purple band, is one third the length of the oblong-lanceolate lamina, which is greenish within, purplish at the edge; the spadix is at most one half the length of the spathe, bearing at its base the female inflorescence, which is of

three or four times the length of the male inflorescence and consists of ovoid, pale-greenish ovaries; the appendix of the spadix terminates in a violet club-shaped extremity. In the form *A. maculatum*, forma *vulgaris immaculata*, or common variety, the leaves are not spotted; in the *A. maculatum*, forma *vulgaris maculata*, the leaves and lamina of the spathe are sprinkled with black or purple spots. The *A. maculatum*, var.  $\beta$  *angustatum*, found in Dalmatia Montenegro, and Greece, has a spathe with elongated oblong-lanceolate purplish lamina, and the *A. maculatum*, var.  $\gamma$  *alpinum*, growing in Transylvania, is distinguished by its peduncle equal to the petiole in length, the ovate-lanceolate lamina of the spathe, and the slender cylindroid appendix of the spadix. The corn of *A. maculatum*—*radix ari*, *radix ari communis* (seu *vulgaris*), *radix Aronis* (seu *barba Aronis*, seu *serpentaria minoris*, seu *serpentaria minoris*, seu *lappa*, seu *alami*)—is ovoid in shape, of about the size of a hazel-nut, yellowish-brown externally, white within, and contains a very volatile neutral acid principle, a fixed oil, resin, starch (27.2 per cent.), gum, mucilage, sugar, etc. When freshly gathered, it is a powerful irritant, vesicant, and drastic, acting in over-doses as an acrid poison. It loses its acrimony, gradually on drying and immediately on heating, and then, from the quantity of starch which it contains, forms a useful article of diet, furnishing a variety of arrow-root (Portland arrow-root, Portland sago) prepared in the Isle of Portland. Medicinally, the recently dried root, which retains part of its acrimony, is used internally in doses of 10 grains as a stimulant in chronic affections of the respiratory tract, especially asthma, whooping-cough, rheumatism, and various cachectic states. 2. Of Allioni and Mason, includes also the *A. italicum*. [B. 5, 180, 216.]—*A. Malyi* [Schott]. The *A. maculatum*, var.  $\beta$  *angustatum*. [B. 216.]—*A. margaritifera* [Roxburgh]. **ARUNDARBOR FERA SECUNDA** [Rumphius] (Lat.), n. f. *A<sup>2</sup>r(a<sup>2</sup>r)-u<sup>2</sup>nd(u<sup>2</sup>nd)-a<sup>2</sup>r-bo<sup>2</sup>r fef(a<sup>2</sup>)ra<sup>2</sup> se<sup>2</sup>k u<sup>2</sup>n(un)/da<sup>2</sup>*. See *BAMBUSA spinosa*.

**ARUNDE** (Fr.), n. *A<sup>2</sup>r-u<sup>2</sup>nd*. See ARUNDO.

**ARUNDEL**, n. *A<sup>2</sup>r-u<sup>2</sup>nd'e<sup>2</sup>l*. A sea-bathing resort on the southern coast of England. [A. 319.]

**ARUNDIFEROUS**, adj. *A<sup>2</sup>r-u<sup>2</sup>nd-i<sup>2</sup>fe<sup>2</sup>r-u<sup>2</sup>s*. From *arundo*, a reed, and *ferre*, to bear. Producing reeds or canes. [Blount (A. 302).]

**ARUNDINACEÆ** (Lat.), n. f. pl. *A<sup>2</sup>r(a<sup>2</sup>r)-u<sup>2</sup>nd(u<sup>2</sup>nd)-i<sup>2</sup>n-a(a<sup>2</sup>)/se<sup>2</sup>(ke<sup>2</sup>)-e(a<sup>2</sup>-e<sup>2</sup>)*. Fr., *arundinacées, arundinacées*. A tribe of gramineous plants, in Kunth's classification comprising *Arundo*, *Ampelodesmos*, *Phragmites*, *Deyeuxia*, *Calamagrostis*, and some other genera. It is the *Arundineæ* of Bentham and Hooker, with the addition of some genera included by the latter among the *Eragrostaceæ*. [B. 42, 170, 188.]

**ARUNDINACEOUS**, adj. *A<sup>2</sup>r-u<sup>2</sup>nd-i<sup>2</sup>n-a'shu<sup>2</sup>s*. Lat., *arundinaceus*. Fr., *arundinacé*. Resembling the genus *Arundo*; resembling or belonging to the *Arundinaceæ*. [L. 180.]

**ARUNDINARIA** (Lat.), n. f. *A<sup>2</sup>r(a<sup>2</sup>r)-u<sup>2</sup>n(u<sup>2</sup>n)-di<sup>2</sup>n-a(a<sup>2</sup>)/ri<sup>2</sup>-a<sup>2</sup>*. A genus of gramineous plants belonging to the *Bambusidæ*, established by Richard. They form shrubs or small trees with jointed stems resembling those of the bamboo. [B. 19, 197.]—*A. falcata* [Nees]. A species indigenous to Nepal and the Himalayas, where the jointed stems, which contain an abundance of silica, are used to thatch the houses. [B. 19.]—*A. macrosperma* [Mich.]. A species the root of which is used in French Guiana as a diuretic and sudorific. [B. 173.]—*A. Schomburgkii*. A species indigenous to Guiana, with stems often 16 feet in height and 4 to 6 inches in diameter. The latter are used by the Indians in making the blow-guns from which they shoot the poisoned arrows. [B. 197.]

**ARUNDINARIÆ** [Nees], **ARUNDINARIÆ** [Steud.] (Lat.), n's f. pl. *A<sup>2</sup>r(a<sup>2</sup>r)-u<sup>2</sup>n(u<sup>2</sup>n)-di<sup>2</sup>n-a(a<sup>2</sup>)/ri<sup>2</sup>-e(a<sup>2</sup>-e<sup>2</sup>), -a<sup>2</sup>r(a<sup>2</sup>r)-i(e)/e<sup>2</sup>-e(a<sup>2</sup>-e<sup>2</sup>)*. A section or series of gramineous plants belonging to the *Bambusaceæ*, including *Arundinaria* and other genera. [B. 170.]

**ARUNDINEÆ** (Lat.), n. f. pl. *A<sup>2</sup>r(a<sup>2</sup>r)-u<sup>2</sup>n(u<sup>2</sup>n)-di<sup>2</sup>n/e<sup>2</sup>-e<sup>2</sup>, -e(a<sup>2</sup>-e<sup>2</sup>)*. 1. Of Reichenbach, a section of gramineous plants belonging to the *Agrostaceæ*, and, of Lindley, a tribe of the *Gramineæ*, corresponding to the *Arundinaceæ* of Kunth. 2. Of Bentham and Hooker, a subtribe of the *Festuceæ*, including *Arundo*, *Ampelodesmos*, *Phragmites*, and other genera. [B. 42, 170.]

**ARUNDINEOUS**, adj. *A<sup>2</sup>r-u<sup>2</sup>nd-i<sup>2</sup>n-e<sup>2</sup>-u<sup>2</sup>s*. Fr., *arundiné*. See ARUNDINACEOUS.

**ARUNDO** (Lat.), n. f. *A<sup>2</sup>r(a<sup>2</sup>r)-u<sup>2</sup>nd(u<sup>2</sup>nd)/o*. Written also *harundo*. Gen., *arund'inis*. Gr., *κάλαμος*. Fr., *arunde, roseau, canne*. Ger., *Rohr, Schilfrohr*. 1. A reed. 2. A genus of gramineous

plants belonging to the tribe *Festuceæ*, subtribe *Arundineæ*, established by Tournefort. It formerly included many species now referred to distinct genera, but is now restricted to those with broadly paniculate spicules and those in which the flowering glumes are membranaceous, tripli-nerved, bidentate, and mucronate between the dentations. [B. 42, 170.] 3. An old term for a surgical splint or a bandage. [L. 128.]—*A. ægyptia* [Desfontaines]. A variety of *A. donax*, derived from Egypt. [B. 188.]—*A. alpina* [Vill.]. See *CALAMAGROSTIS halleriana*.—*A. ampelodesmos* [Cyrill Neap.]. See *AMPELODESMOS tenax*.—*A. arbor* [Linnaeus]. The *Bambusa* or the *Bambusa spinosa*. [B. 188, 211.]—*A. arenaria* [Linnaeus]. **ARVENSIS** (Lat.), adj. *A<sup>2</sup>r-ve<sup>2</sup>n(we<sup>2</sup>n)/si<sup>2</sup>s*. From *arvum*, cultivated land. Fr., *arvin, arvien*. Growing in cultivated fields (used as a botanical species-name). [B.]

**ARVIC ACID**, n. *A<sup>2</sup>r-vi<sup>2</sup>k*. From *arvum*, cultivated land. Fr., *acide arrique*. Ger., *Ackersäure*. An acid substance obtained

from tilled soil, containing from 4.89 to 15 per cent. of nitrogen; of the same class of substances as Berzelus's apocrenic acid. [B, 140.]

**ARVICOLA, ARVICOLINÆ** (Lat.), n's n. pl. and f. pl.  $A^2r$ -vi<sup>2</sup>k(wi<sup>2</sup>k/o(o<sup>2</sup>)-la<sup>3</sup> -vi<sup>2</sup>k(wi<sup>2</sup>k)-o(o<sup>2</sup>)-li(de)/ne(na<sup>3</sup>-e<sup>2</sup>). From *arvum*, cultivated land, and *colere*, to inhabit. The voles; a subfamily of the family *Muridae* of rodent animals. [A, 359; L, 121.]

**ARVICOLE** (Lat.), adj.  $A^2r$ -vi<sup>2</sup>k(wi<sup>2</sup>k)/o(o<sup>2</sup>)-lu<sup>3</sup>s(lu<sup>3</sup>s). Fr., *arvicole*. Inhabiting cultivated fields. [L, 41.]

**ARVIEN, ARVIN** (Fr.), adj's.  $A^2r$ -vi<sup>2</sup>-a<sup>2</sup>n<sup>2</sup> -va<sup>2</sup>n<sup>2</sup>. See ARVENNIS.

**ARVINA** (Lat.), n. f.  $A^2r$ -vi(we)/na<sup>3</sup>. Lard. [A, 325.]

**ARVISIUM** (Lat.), n. n.  $A^2r$ -vi<sup>2</sup>s(wi<sup>2</sup>s)/i<sup>2</sup>-n<sup>3</sup>m(u<sup>1</sup>m). An ancient wine from Mt. Arvisius, in Chios. [A, 318.]

**ARVORE** (Port.), n.  $A^2r$ -vo-ra. A tree.—**A. da vida**. Paraguay tea. [L, 105.]—**A. de congonha**. The *Ilex paraguayensis*. ["Proc. of the Am. Pharm. Assoc.," xxvi, p. 299 (L).]—**A. de poina**. The *Chorisia speciosa*. [B, 121.]—**A. do mate**. Paraguay tea. [L, 105.]

**ARVUM** (Lat.), n. n.  $A^2r$ -vu<sup>3</sup>m(wu<sup>1</sup>m). A field.—**Arva muliebria, Genitale a.** The female genitals. [Lucretius, Vergil (A, 318).]

**ARYAMUCHA**, n. A Carib name for pimento. [L, 105.]

**ARY-ARYTENOIDEUS** (Lat.), n. m.  $A^2r$ (a<sup>2</sup>r)/i<sup>2</sup>(u<sup>6</sup>)-a<sup>2</sup>r(a<sup>2</sup>r)-i<sup>2</sup>(u<sup>6</sup>)-te<sup>2</sup>n(ta<sup>3</sup>-e<sup>2</sup>n)-o(o<sup>2</sup>)-i<sup>2</sup>d(e<sup>2</sup>-u<sup>3</sup>s(u<sup>3</sup>s)). Fr., *ary-aryténoidien*, *ary-santorinien*. A name given by Morgagni and Santorini to the arytænoideus transversus muscle. [A, 301; L, 41.]

**ARY-CORNICULATUS** (Lat.), n. m.  $A^2r$ (a<sup>2</sup>r)/i<sup>2</sup>(u<sup>6</sup>)-ko<sup>2</sup>rn-i<sup>2</sup>k-u<sup>3</sup>(u<sup>3</sup>)-la(la<sup>3</sup>)/tu<sup>3</sup>s(tu<sup>3</sup>s). See ARYTENOIDEUS *rectus*.—**A.-c. rectus**. See ARYTENOIDEUS *rectus*.

**ARY-EPIGLOTTEUS, ARY-EPIGLOTTICUS** (Lat.), n's m.  $A^2r$ (a<sup>2</sup>r)/i<sup>2</sup>(u<sup>6</sup>)-e<sup>2</sup>p-i<sup>2</sup>-glo<sup>2</sup>t(glo<sup>2</sup>t)/te<sup>2</sup>-u<sup>3</sup>s(u<sup>3</sup>s), -ti<sup>2</sup>k-u<sup>3</sup>s(u<sup>3</sup>s). See ARYTENO-EPIGLOTTICUS.

**ARYSANE** (Lat.), n. f.  $A^2r$ (a<sup>2</sup>r)-i<sup>2</sup>s(u<sup>6</sup>s)/a<sup>3</sup>-ne(na). Gr., ἀρύσανη. See ARYTENA.

**ARY-SANTORINIANUS** (Lat.), n. m.  $A^2r$ (a<sup>2</sup>r)/i<sup>2</sup>(u<sup>6</sup>)-sa<sup>3</sup>(na<sup>3</sup>n)-to(t<sup>2</sup>)-ri<sup>2</sup>n-i<sup>2</sup>-a(a<sup>3</sup>)/nu<sup>3</sup>s(nu<sup>3</sup>s). See ARYTENOIDEUS *transversus*.

**ARYSTER** (Lat.), n. m.  $A^2r$ (a<sup>2</sup>r)-i<sup>2</sup>st(u<sup>6</sup>st)/u<sup>6</sup>r(e<sup>2</sup>r). Gen., *arystēros* (-ris). See ARYTENA.

**ARYSTICHUS** (Lat.), n. m.  $A^2r$ (a<sup>2</sup>r)-i<sup>2</sup>st(u<sup>6</sup>st)/i<sup>2</sup>k(i<sup>2</sup>ch<sup>2</sup>)-n<sup>3</sup>s(u<sup>3</sup>s). Gr., ἀρύστιχος (dim. of ἀρύτης). A little arytæna (q. v.). [L, 50.]

**ARYSTIS, ARYSTRIS** (Lat.), n's f.  $A^2r$ (a<sup>2</sup>r)-i<sup>2</sup>st(u<sup>6</sup>st)/i<sup>2</sup>s, -ri<sup>3</sup>s. Gen., *arystidos* (-dis), *arystridos* (-dis). Gr., ἀρύστis, ἀρύστis. See ARYTENA.

**ARY-SYNDESMICUS** (Lat.), n. m.  $A^2r$ (a<sup>2</sup>r)/i<sup>2</sup>(u<sup>6</sup>)-si<sup>2</sup>n(su<sup>6</sup>n)-de<sup>3</sup>s(mi<sup>2</sup>k-u<sup>3</sup>s(u<sup>3</sup>s)). From *ἀρύταινα* (see ARYTENA), and *συνδεσμικός*, conjunctive. A bundle of muscular fibres running from the cricoid cartilage to the arytenoid. It may be regarded as a part of the crico-arytenoides lateralis. [L, 34.]

**ARYTENA** (Lat.), n. f.  $A^2r$ (a<sup>2</sup>r)-i<sup>2</sup>(u<sup>6</sup>)-te/(ta<sup>3</sup>-e<sup>2</sup>)-na<sup>3</sup>. Gen., *arytēnes*. Gr., ἀρύταινα. 1. A pitcher, jug, cup, or ladle. [A, 322.] 2. A part resembling such a utensil; the arytenoid cartilages. [A, 322.]

**ARYTENEPIGLOTTICUS** (Lat.), adj.  $A^2r$ (a<sup>2</sup>r)-i<sup>2</sup>(u<sup>6</sup>)-te<sup>2</sup>n-(ta<sup>3</sup>-e<sup>2</sup>n)-e<sup>2</sup>p-i<sup>2</sup>-glo<sup>2</sup>t(glo<sup>2</sup>t)/ti<sup>2</sup>k-u<sup>3</sup>s(u<sup>3</sup>s). See ARYTENO-EPIGLOTTIC.

**ARYTENODES** (Lat.), adj.  $A^2r$ (a<sup>2</sup>r)-i<sup>2</sup>(u<sup>6</sup>)-te<sup>2</sup>n(ta<sup>3</sup>-e<sup>2</sup>n)-o<sup>2</sup>-dez(das). See ARYTENOID.

**ARYTENO-EPIGLOTTICUS** (Lat.), adj.  $A^2r$ (a<sup>2</sup>r)-i<sup>2</sup>(u<sup>6</sup>)-te/(ta<sup>3</sup>-e<sup>2</sup>)-no-e<sup>2</sup>p-i<sup>2</sup>-glo<sup>2</sup>t(glo<sup>2</sup>t)/ti<sup>2</sup>k-u<sup>3</sup>s(u<sup>3</sup>s). See ARYTENO-EPIGLOTTIC and ARYTENO-EPIGLOTTIDEUS.

**ARYTENO-EPIGLOTTIDEUS** (Lat.), adj.  $A^2r$ (a<sup>2</sup>r)-i<sup>2</sup>(u<sup>6</sup>)-te/(ta<sup>3</sup>-e<sup>2</sup>)-no-e<sup>2</sup>p-i<sup>2</sup>-glo<sup>2</sup>t(glo<sup>2</sup>t)-ti<sup>2</sup>d(e<sup>2</sup>-u<sup>3</sup>s(u<sup>3</sup>s)). See ARYTENO-EPIGLOTTIC. As a n., a name applied by some anatomists to both the a.-e. superior and the a.-e. inferior. [L.]—**A.-e. inferior**. Syn.: *compressor sacculi laryngis*. A small bundle of muscular fibres running from the arytenoid cartilage to the margin of the epiglottis. [L, 172.]—**A.-e. superior**. A small bundle of muscular fibres arising from the apex of the arytenoid cartilage, which, running upward, is lost in the aryteno-epiglottic mucous membrane. [L, 172.]

**ARYTENOIDES** (Lat.), adj.  $A^2r$ (a<sup>2</sup>r)-i<sup>2</sup>(u<sup>6</sup>)-te<sup>2</sup>n(ta<sup>3</sup>-e<sup>2</sup>n)-o<sup>2</sup>-i(e)/dez(das). See ARYTENOID.

**ARYTENOIDEUS** (Lat.), adj.  $A^2r$ (a<sup>2</sup>r)-i<sup>2</sup>(u<sup>6</sup>)-te<sup>2</sup>n(ta<sup>3</sup>-e<sup>2</sup>n)-o<sup>2</sup>(o<sup>2</sup>)/i<sup>2</sup>d(e<sup>2</sup>-u<sup>3</sup>s(u<sup>3</sup>s)). See ARYTENOID. As a n. (Fr., *muscle arytenoïdien*; Ger., *Giesskannenmuskel*, *Pyramidenmuskel*), a band of muscular fibres passing from the back of one arytenoid cartilage to the other; also a muscle of the solipeds, analogous to the a. of man. [L, 44.]—**A. major**. See *A. transversus*.—**A. minor**. *A. obliquus*. Fr., *aryténoidien oblique* [Cruveilhier] (ou *croisé*, ou *supérieur* [Winslow]). The oblique portion of the a., formerly considered as a separate muscle. [L, 44.]—**A. rectus**. Syn.: *ary-corniculatus rectus*, *depressor cartilaginis Santorini*. An anomalous band of muscular fibres running from the arytenoid cartilage to the corniculum laryngis of the same side. [L, 31.]—**A. transversus**. Fr., *aryténoidien transversal* [Winslow]. Syn.: *a. major*, *a. tertius semicircularis* [Casser]. The transverse portion of the a., formerly considered as a separate muscle. [L, 44.]

**ARYTENO-PHARYNGEUS** (Lat.), n. m.  $A^2r$ (a<sup>2</sup>r)-i<sup>2</sup>(u<sup>6</sup>)-te/(ta<sup>3</sup>-e<sup>2</sup>)-no(n<sup>2</sup>)-fa<sup>2</sup>r(fa<sup>2</sup>r)-i<sup>2</sup>n(u<sup>6</sup>n<sup>2</sup>)/je<sup>2</sup>(ge<sup>2</sup>)-u<sup>3</sup>s(u<sup>3</sup>s). A muscle of the solipeds, extending from the posterior border of the arytenoid cartilage to the origin of the oesophagus. [L, 13.]

**ARYTÉNÉAL** (Fr.), adj.  $A^2r$ -ri<sup>2</sup>-ta-na-a<sup>3</sup>l. Arytenoid; as a n., according to G. St.-Hilaire, the arytenoid cartilage when it is ossified. [L, 181.]

**ARYTENO-EPIGLOTTIC, ARYTENO-EPIGLOTTI-**

**DEAN**, adj's.  $A^2r$ -i<sup>2</sup>-te/'no-e<sup>2</sup>p-i<sup>2</sup>-glo<sup>2</sup>t/ti<sup>2</sup>k, -glo<sup>2</sup>t-ti<sup>2</sup>d(e<sup>2</sup>-a<sup>3</sup>n. Lat., *arytæno-epiglotticus*. Fr., *aryténé-épiglottique*. Ger., *arytæno-epiglottisch*. Pertaining to the arytenoid cartilage and the epiglottis. [C.]

**ARYTENOID**, adj.  $A^2r$ -i<sup>2</sup>-te/'noid. Gr., ἀρυταινώδης (from ἀρύταινα, a pitcher, and εἶδος, resemblance). Lat., *arytænoides*, *aryténoides*. Fr., *aryténoidé*, *aryténoidal*, *aryténoidien*. Ger., *aryténoidisch*, *giesskannenförmig*. 1. Shaped like the mouth of a pitcher. [A, 322.] 2. Pertaining to the a. cartilages. See A. CARTILAGES, A. GLANDS, and ARYTENOIDEUS.

**ARYTENOÏDIEN** (Fr.), n.  $A^3$ -ri<sup>2</sup>-ta-no-i<sup>2</sup>d-i<sup>2</sup>-a<sup>3</sup>n<sup>2</sup>. See ARYTENOIDEUS.—**A. croisé** [Winslow]. See ARYTENOIDEUS *obliquus*.—**A. transversal** [Winslow], **Vrai** a. See ARYTENOIDEUS *transversus*.

**ARYTER** (Lat.), n. m.  $A^2r$ (a<sup>2</sup>r)/i<sup>2</sup>(u<sup>6</sup>)-tu<sup>6</sup>r(te<sup>2</sup>r). Gen., *arytēros* (-ris). Gr., ἀρύτης. See ARYTENA.

**ARYTERA** (Lat.), n. f.  $A^2r$ (a<sup>2</sup>r)-i<sup>2</sup>t(u<sup>6</sup>t)-e(a)/ra<sup>3</sup>. The genus *Rotonia* (Cupania). [B, 121.]

**ARYTHMOÏDE** (Fr.), adj.  $A^2$ -ri<sup>2</sup>-ta-no-ed. See ARYTENOID.

**ARYTHMIA** (Lat.), n. f.  $A^2r$ (a<sup>2</sup>r)-i<sup>2</sup>th<sup>2</sup>(u<sup>6</sup>th<sup>2</sup>)/mi<sup>2</sup>-a<sup>3</sup>. For this and other words in *aryth-*, see the corresponding words in *arrhyth-*.

**ARZ** (Ar.), n. Rice. [L, 105.] See ARZU.

**ARZATWURZ** (Ger.), n.  $A^3$ rt/za<sup>3</sup>t-vurtz. The *Atropa mandragora*. [L, 43.]

**ARZEL** (Fr.), n.  $A^3$ r-ze<sup>2</sup>l. A veterinary term for a horse which has the hind feet and the face white. [A, 301.]

**ARZENEI** (Ger.), n.  $A^3$ rt-ze<sup>2</sup>n-i'. See ARZNEI.

**ARZEZ** (Ar.), n. The *Marchanta polymorpha*. [L, 105.]

**ARZI** (Ar.), n. See ARZ.

**ARZIZ** (Ar.), n. The *Marchanta polymorpha*. [B, 121.]

**ARZNEI** (Ger.), n.  $A^3$ rtz-ni'. A drug, a medicine. [A, 315.]—**A'abgabe**. The dispensing of drugs. [B, 270.]—**A'anwendung**. Medication. [L, 80.]—**A'ausschlag**. A cutaneous eruption produced by a drug. [G. Behrend (A, 319).]—**A'bereiter**. An apothecary. [L, 46.]—**A'bereitung**. Pharmacy, the dispensing of medicines. [L, 46.]—**A'bereitungsbuch**. A dispensatory, a formulaary. [L, 46.]—**A'bereitungskunst**, **A'bereitungslehre**. The science and art of pharmacy. [L, 46.]—**A'bier**. A medicated beer (*cerevisia medicata*). [B, 270.]—**A'buch**. See *A'bereitungsbuch*.—**A'erkenntnislehre**. Pharmacology. [L, 30.]—**A'essig**. See *Acetum medicatum*.—**A'flasche**. The same as *A'glas*, but usually restricted to the narrow-mouthed or to the larger-sized bottles. [B, 270.]—**A'form**. The form into which a drug is brought for medicinal use. [B, 270.]—**A'formel**. A pharmaceutical formula, a prescription. [L, 80.]—**A'gabe**. A dose. [A, 317.]—**A'garten**. A garden in which medicinal plants are cultivated. [L, 30.]—**A'gelatin**. A preparation made by incorporating a medicine with gelatin. [B, 270.] See *LAMELLA*.—**A'gelatinverband**. A medicated gelatin bandage or dressing. [B, 270.]—**A'gelehrsamkeit**. See *A'gelehrtheit*.—**A'gelehrte**. A physician. [L, 46.]—**A'gelehrtheit**. Therapeutics. [L, 46.]—**A'gewicht**. Apothecaries' weight. [A, 315.]—**A'glas**. A bottle or jar in which medicines are dispensed. [B, 270.]—**A'gott**. The god Æsculapius. [A, 317.]—**A'göttin**. The goddess Hygeia. [A, 315.]—**A'handel**. The drug trade. [L, 46.]—**A'händler**. A druggist. [L, 46.]—**A'handlung**. An apothecary's shop or a drug-store. [A, 315.]—**A'kästchen**, **A'kasten**, **A'kiste**. A medicine chest. [L, 80.]—**A'körper**. A medicinal substance. [L, 46.]—**A'kräftig**. Medicinal. [L, 46.]—**A'kraut**. A medicinal herb. [L, 46.]—**A'kugel**. A bolus. [L, 46.]—**A'kügelchen**. A lozenge, a tablet. [L, 46.]—**A'kunde**, **A'kunst**. Pharmacy or therapeutics. [A, 315.]—**A'künstig**. Pharmaceutical. [L, 46.]—**A'künstler**. A pharmacist. [L, 46.]—**A'laden**. An apothecary's shop or a drug-store. [A, 315.]—**A'lehre**. Pharmacology. [L, 46.]—**A'lich**. Medicinal, medical. [L, 46.]—**A'mittel**. A drug. [L, 46.]—**A'mittelkunde**, **A'mittellehre**. Pharmacology. [L, 46, 80.]—**A'niederschreib- lehre**. The art of prescribing. [A, 322.]—**A'öl**. See *OLEUM cœcum* and *OLEUM infusum*.—**A'pflanze**. A medicinal plant. [L, 80.]—**A'schatz**. See *THESAURUS medicamentorum*.—**A'schrank**. See *A'kiste*.—**A'stöff**. A medicinal principle. [L, 80.]—**A'sucht**. An excessive propensity to take or prescribe medicines. [L, 80.] See *PHARMACOMANIA*.—**A'tasche**. A bag or satchel for carrying medicines. [H. Frölich (A, 319).]—**A'trank**. A potion, a draught. [L, 46.]—**A'verkäufer**. A druggist. [L, 43.]—**A'verordnung**. A prescription. [L, 30.]—**A'verordnungslehre**. The art of prescribing. [L, 30.]—**A'verpflegung**. A system of maintaining a supply of medicines (as in an army). [H. Frölich (A, 319).]—**A'verschreibung**. A prescription, a pharmaceutical formula. [L, 46.]—**A'verständig**. Skilled in pharmacology. [L, 46.]—**A'verständiger**. A physician. [L, 46.]—**A'verzeichniss**. A schedule, inventory, or price-list of drugs. [A, 315.]—**A'vorrath**. See *APPARATUS medicaminum*.—**A'waare**. A drug. [A, 317.]—**A'wein**. A medicated wine. [B, 270.]—**A'wesen**. The state of the drug trade, the interests of pharmacists and druggists. [L, 46.]—**A'wirkung**. The action of a drug. [B, 270.]—**A'wissenschaft**. The science of pharmacology. [L, 46.]—**A'wissenschaftlich**. Pharmacological. [L, 46.]—**A'zettel**. A prescription. [L, 46.]—**Bewährte A.** A specific. [L, 43.]—**Gerichtliche A'kunde**. Forensic medicine. [L, 43.]

**ARZNEY** (Ger.), n.  $A^3$ rtz-ni'. See ARZNEI.

**ARZT** (Ger.), n.  $A^3$ rtzt. A physician. [A, 315.]—**Armena'**. A physician appointed to attend the poor.—**A'finger**. The ring-finger. [L, 43.]—**A'gebühr**. A physician's fee. [A, 315.]—**A'in**. A female physician. [L, 43.]—**A'lohn**. See *A'gebühr*.—**Ausübender A.** A practising physician. [A, 315.]—**Hernunziehender A.** A charlatan. [L, 43.]—**Wunda'**. A surgeon.—**Zahna'**. A dentist.

**ARZUELLA**, n. A vegetable substance, supposed to be a *Lichen*, obtained at the Cape de Verde Islands; used to mix with cochineal. [L, 105.]

**ARZUNG** (Ger.), n. A<sup>3</sup>rtz/ung. Medical treatment. [A, 315.]

**AS** (Lat.), n. m. A<sup>2</sup>s(a<sup>3</sup>s). Gen., a<sup>3</sup>s/sis. See **ASSARIUS**.

**AS** (Ar.), n. The *Myrtus communis*. [B, 121.]

**ASA** (Lat.), n. f. A(a<sup>3</sup>/sa<sup>3</sup>). From Pers. *asa*. A gum. [L.]—**A. dulcis**, **A. dulcis odorata**. Benzoin. [L, 105.]—**A. fetida**, **A. fetida**. See **ASAFETIDA**. **ASA FETIDA**, and **ASSA FETIDA**.—**A. odorata**. See **A. dulcis**.—**Stinkende A.** (Ger.). **Asafetida**. [L, 43.]

**ASA**, n. A name given in the Marquesas Islands to the *Ficus religiosa*. [B, 121.]

**ASAB** (Ar.), n. A disease said to be epidemic about the River Senegal, affecting the genitals, but differing from syphilis (applied to it only as it occurs in males). [L, 104, 116.] See **BOROZAIL**.

**ASABA HERMES** (Ar.), n. The meadow-saffron. [L, 119.]

**ASABON**, n. An alchemical name for soap. [Ruland, Johnson (A, 325).]

**ASÆSTUS** (Lat.), n. m. A<sup>2</sup>s(a<sup>3</sup>s)-e<sup>2</sup>st(a<sup>3</sup>/e<sup>2</sup>st)-u<sup>2</sup>s(u<sup>4</sup>s). An old name for lime or limestone. [A, 325.]

**ASAFETIDA**, n. A<sup>2</sup>s-a<sup>3</sup>-fe<sup>2</sup>t(i<sup>2</sup>d-a<sup>3</sup>). See **ASAFETIDA**.—**A. mixture**. See **Mistura ASAFETIDÆ**.—**A. plaster**. See **Emplastrum ASAFETIDÆ**.—**Milk of a**. See **Mistura ASAFETIDÆ**.—**Pills of a**. See **Pilule ASAFETIDÆ**.—**Tincture of a**. See **Tinctura ASAFETIDÆ**.

**ASAFETIDA** [U. S. Ph., Br. Ph.] (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>s)-a<sup>3</sup>-fe<sup>2</sup>t(i<sup>2</sup>d-a<sup>3</sup>). From *asa* (adopted from Pers.), a gum, and *fetidus*, fetid. Gr., σκῆθιον ὑπόκον (Dioscorides). Fr., *asse-fétide*. Ger., *Asafetida Stinkasand*, *Tiefstreck*. It., *assa fetida*. Sp., *asafetida* [Sp. Ph.]. Syn.: *asa fetida* [Fr. Cod., Ger. Ph., Austr. Ph., Hung. Ph., Swiss Ph., Belg. Ph., Netherl. Ph., Greek Ph.], *asafetida* [Br. Ph., 1867], *gummi asæ fetidæ*, *gummi-resina asæ fetida* [Dan. Ph., Norweg. Ph., Russ. Ph., Swed. Ph.], *gummi-resina asæ fetida* [Finn. Ph.], *stercus diaboli*, *cibus deorum*. A gum-resin extracted from the root of the *Ferula narthex* and *Ferula scorodroma*, Persian umbelliferous plants. The fresh juice is white, but gradually becomes yellow and at last dark-brown. A occurs in commerce in the form of reddish gum-like masses streaked with white, having an extremely disagreeable alliaceous odor and a sharp, biting taste. It dissolves readily in alcohol, it contains 65 per cent. of resin, 19.4 per cent. of soluble gum, 11.2 per cent. of bassorin, 3.6 per cent. of volatile oil, and 0.3 per cent. of calcium malate. [B, 2, 5.] It is occasionally used in medicine for flatulence and hysterical attacks, also as an expectorant. — **Amygdaloid a**. Lat., *a. amygdaloides*. Ger., *mandelartige Asafetida*. Tear a. agglutinated into masses. [L, 133.] — **A. disjunctus** [Kaempfer]. See **FERULA a.** — **A. in granis**, **A. in lacrimis**. See **Tear a.** — **A. in massis**. See **Lump a.** — **A. petraea**. See **Stony a.** — **A. tinctur** (Ger.). See **Tinctura asafetide**. — **A. wasser** (Ger.). See **Aqua ASAFETIDÆ**. — **Emplastrum asafetide** [U. S. Ph.]. Fr., *emplâtre d'asa fetida*. Ger., *Stinkasandplaster*. Sp., *emplastro de asafetida compuesto*. SYN. — **Emplastrum asæ fetidæ** [Belg. Ph., Netherl. Ph.], *emplastrum asæ fetidæ compositum* [Finn. Ph., Greek Ph.], *emplastrum fetidum* [Ger. Ph., 1st ed.; Swiss Ph.]. A plaster; made by digesting 35 parts of a. and 15 of galbanum in 120 of alcohol, straining, evaporating to the consistence of honey, and adding a mixture of 35 parts of lead plaster and 15 of yellow wax melted together. The preparations of the other pharmacopœias contained yellow wax 20 per cent. [Belg. Ph., Ger. Ph., Swiss Ph., 40 per cent. [Finn. Ph.], or 42 per cent. [Greek Ph.]; pine-resin 20 per cent. [Belg. Ph., Ger. Ph., Swiss Ph.], 10 per cent. [Finn. Ph.], or 5 per cent. [Greek Ph.]; olive-oil 10 per cent. [Greek Ph.]; powdered ammoniac 10 per cent. [Ger. Ph., Swiss Ph.], or 21 per cent. [Greek Ph.]; powdered a. 40 per cent. [Belg. Ph.], 30 per cent. [Ger. Ph., Swiss Ph.], or 21 per cent. [Greek Ph.]; and turpentine 20 per cent. [Ger. Ph.], or larch turpentine 20 per cent. [Belg. Ph., Swiss Ph.]. The plaster of the Netherl. Ph. contains colophony 31 parts, a. 46 parts, powdered galbanum 15 parts, and larch turpentine 8 parts; that of the Sp. Ph. contains yellow wax 57 per cent., turpentine 14 per cent., a. and olibanum each 7 per cent., anise 54 per cent., myrrh 34 per cent., castoreum canadense and cumin fruit each 24 per cent., and rectified oil of amber, 12 per cent. [B, 5, 95.] — **Emplastrum asafetide matricale** [Brunsw. Disp., 1777]. A plaster containing 12 parts of galbanum, 6 each of tacamahac and yellow wax, and 4 each of a., Venice turpentine, and cumin. With slight variations, it was given in several old formularies. [L, 85.] — **Enema asafetide**. Fr., *lavement d'asa fetida*. A mixture of a. and water, in varying proportions, used as an enema. [L, 85.] — **Essentia asafetide**. See **Tinctura asafetide**. — **Essentia asafetide kalica**. See **Tinctura asafetide kalica**. — **Ferula a**. See under **FERULA**. — **Gummi-resina asafetide**. See **A.** — **Lac asafetide**. See **Mistura asafetide**. — **Lump a**. Lat., *a. in massis*. A. in irregular masses of various sizes, reddish or brownish-yellow in color. [L, 132.] — **Mistura asafetide** [U. S. Ph.]. A mixture, milk of a.; an emulsion made by rubbing up 4 parts of a. with 100 of water, and straining. [B.] — **Oil of a**. A sulphureted essential oil, constituting about 3 per cent. of a., obtained by distilling the latter with water; according to Hlasiwetz, a variable mixture of the two compounds C<sub>12</sub>H<sub>22</sub>S<sub>2</sub> and C<sub>12</sub>H<sub>22</sub>S. [B, 2.] — **Pilule asafetide** [U. S. Ph.]. Pills each containing 3 grains of a. and 1 grain of soap. [B.] — **Pilule asafetide martiate** [Würzb. Ph.]. See **Pilule ASÆ FETIDÆ martiate**. [L, 85.] — **Resin of a**. A resin extracted from a. with alcohol; light-yellow when pure, turning purple on exposure to the sun. [B, 2.] — **Stony a**. Lat., *a. petraea*. Ger., *steiniger Stinkasand*. A. adulterated with plaster of Paris (sometimes to the extent of 50 per cent.); more or less angular pieces, having the odor of

a., yellowish-brown, with numerous small shining points or plates. [L, 132.] — **Tear a**. Lat., *a. in granis* (see in *lacrimis*). Ger., *Stinkasand in Körnern*. A. occurring in flattened, oval, or irregular pieces, in size from that of a pea to that of a walnut, yellow or brownish-yellow without and white within. Compared with lump a., it is feebler in odor and less yellow, and its fractured surface does not become so red or turn red so rapidly. [L, 132.] — **Tinctura asafetide** [U. S. Ph.]. Fr., *teinture d'asa fetida* [Fr. Cod.]. Ger., *Asantinctur* [Ger. Ph.]. Syn.: *tinctura asafetide* [Br. Ph.] (see *asæ fetidæ*) [Fr. Cod., Ger. Ph.]. Tincture of a.; made by macerating a. in alcohol and filtering; 100 parts contain 20 [U. S. Ph., Fr. Cod., Ger. Ph.] or about 15 parts [Br. Ph.] of a. [B.] — **Tinctura asafetide kalica**. Fr., *teinture alcaline d'asa fetida*. An alkaline tincture of a.; made by digesting for three days, with a gentle heat, equal parts of a., potassium carbonate, and alcohol, and filtering. [Brunsw. Disp., 1777; Würtemb. Ph., 1798 (L.).] — **Volatile oil of a**. See **Oil of a**.

**ASA FETIDA** [Fr. Cod., Ger. Ph.] (Lat.), n. f. See **ASAFETIDA**. — **Alcooature d'a. f.** (Fr.). See **Tinctura ASAFETIDÆ**. — **Alcoolé alcaline d'a. f.** (Fr.). See **Tinctura ASAFETIDÆ kalica**. — **Alcoolé d'a. f.** (Fr.). See **Tinctura ASAFETIDÆ**. — **Alcoolé d'a. f. composé** (Fr.). See **Tinctura FULIGINIS fetida**. — **Aqua asæ fetidæ**. Ger., *Asafetidarasser*. A preparation made by distilling asafetida with water. [B, 48.] — **Aqua asæ fetidæ composita** [Belg. Ph., Pruss. Ph., 6th ed.]. The product obtained by distilling 1,000 parts from a mixture of asafetida, angelica root, sweet-flag rhizome, and alcohol, of each, 65 parts [Belg. Ph.] or 60 parts [Pruss. Ph.], and water a sufficiency. [B, 95.] Cf. **Aqua fetida antihysterica**. — **Aqua asæ fetidæ cum castoreo** [Belg. Ph.]. A preparation made up of aqua asæ fetidæ composita 98 parts and tinctura castorei canadensis 2 parts. [B, 95.] — **A. purifiée** [Fr. Cod.]. Asafetida purified by dissolving in alcohol, straining, and evaporating. [B.] — **Emplastrum asæ fetidæ** [Belg. Ph., Netherl. Ph.]. See **Emplastrum ASAFETIDÆ**. — **Emplâtre d'a. f. composé** (Fr.). See **Emplastrum ASAFETIDÆ matricale**. — **Essence d'a. f.** (Fr.). See **Tinctura ASAFETIDÆ**. — **Ethérolé d'a. f.** (Fr.). **ASAGAR**, n. Verdigris. [L, 97.]

**ASAGEN**, n. An alchemical term for dragon's-blood. [Ruland, Johnson (A, 325).]

**ASAGI**, n. An alchemical term for vitriol. [Ruland (A, 325).]

**ASAGRÆA** (Lat.), n. f. A-sa<sup>3</sup>-gra<sup>3</sup>/a<sup>3</sup>. Named after Asa Gray, an American botanist. Fr., *asagrée*. 1. A genus of melantheaceous herbs, established by Lindley, now referred to *Schœnocaulon*. 2. A genus of papilionaceous plants, made by H. Baillon, belonging to the *Psoraleæ*. [B, 5, 19, 121.] — **A. officinalis** [Lindley]. See *SCHœNOCAULON officinale*. — **A. spinosa** [Baillon]. A species of *A.* (2d def.); a branching shrub growing in California. [B, 121.]

**ASAGRAYA** (Lat.), n. f. A-sa<sup>3</sup>-gra<sup>3</sup>/a<sup>3</sup>. See **ASAGRÆA**.

**ASAHASAFRA**, n. A plant mentioned by Avicenna; probably a species of orchis. [B, 121.]

**ASAKANA**, n. A Carib name for the *Laurus borbonia*. [L, 105.]

**ASAMAR**, n. See **ASAGAR**.

**ASAMAZ**, n. See **ASAGI**.

**ASAN** (Hind.), n. The *Terminalia glabrata* and *Terminalia tomentosa*. [B, 121.]

**ASAND** (Ger.), n. A<sup>3</sup>-za<sup>3</sup>nd'. See **ASANT**.

- ASANON**, n. Prepared sal ammoniac. [L, 119.]
- ASANT** (Ger.), n.  $A^3\text{-za}^3\text{nt}'$ . A general term for benzoin and asafetida. [A, 315.]—**A'aloëpillen**. See *Pilules d'aloës et d'asa fetida*.—**A'mmoniumtinctur**. See *Spiritus ammonie fetidis*.—**A'plaster**. See *Emplastrum asaretide*.—**A'pillen**. See *Pilule asaretide*.—**A'tinctur**. See *Tinctura asafetide*.—**Stinka'**, **Stinkender A.** Asafetida. [L, 46.]—**Wohlriechender A.** Benzoin. [L, 46.]
- ASAPEIXE**, n. A Brazilian name for the *Bæhmeria caudata*. [H, Baillon (L, 87).]
- ASAPES** (Lat.), adj.  $A^2s(a^3s)/a^3\text{-pez}(pas)$ . Gr.,  $\acute{\alpha}\sigma\alpha\pi\acute{\iota}\varsigma$  (from  $\alpha$  priv., and  $\sigma\pi\epsilon\upsilon\omega$ , to cause to decay). 1. Not decaying, not decayed. [A, 322.] 2. Crude, uncooked, not elaborated (said of the sputum). [Hippocrates (A, 322, 325).]
- ASAPHATUM**, n. From Ar., *al-safat* or *assafat*. [Choulant (A, 322).] An old term for a cutaneous affection characterized by worm-like formations with black heads (comedones) which may be squeezed out. [Dornæus, Ruland, Johnson (A, 325).]
- ASAPHIA** (Lat.), n. f.  $A^2s(a^3s)\text{-}a^3\text{-fi}(fe)/a^3$ . Gr.,  $\acute{\alpha}\sigma\acute{\alpha}\phi\epsilon\iota\alpha$  (from  $\alpha$  priv., and  $\sigma\alpha\phi\acute{\iota}\varsigma$ , distinct). Fr., *asaphie*. Ger., *unverständliche Ausrede*. Indistinctness of speech, especially from cleft palate. [A, 325; L, 83.]
- ASAPHINI** (Lat.), n. m. pl.  $A^2s(a^3s)\text{-}a^3\text{-fi}(fe)/ni(ne)$ . A family of trilobites. [L, 204.]
- ASAPIXE**, n. See ASAPEIXE.
- ASARABACA, ASARABACCA** (Lat.), n's f.  $A^2s(a^3s)\text{-}a^3\text{-ra}^3\text{-ba}^3k(ba^3k)/ka^3$ . From *Asarum* (q. v.), and *bacca*, a berry. [B, 7.] The *Asarum europæum*. [B, 121.]—**A. officinarum**. See *Asarum europæum*.—**Broad-leaved a.** See *Asarum canadense*.—**Common a.** See *A.*—**Compound powder of a.** See *Pulvis asari compositus*.—**Herba asarabace, Radix asarabace.** The leaves and root of *Asarum europæum*. [B, 180.]
- ASARACÆ** [Link] (Lat.), n. f. pl.  $A^2s(a^3s)\text{-}a^3\text{-ra}^3(r)a^3\text{-}a^3\text{-}se^3(ke^3)/a^3\text{-}e^3$ . From *Asarum*. See *ARISTOLOCHACEÆ*.
- ASARAL**, adj.  $A^2s(a^3s)\text{-}a^3\text{-ra}^3$ . From *Asarum*. Lat., *asaralis*. Of, pertaining to, or resembling, the genus *Asarum*; belonging to the *Asarales*. [B, 197.]—**A. alliance**. See *ASARALES* (1st def.).
- ASARALES** (Lat.), n. f. pl.  $A^2s(a^3s)\text{-}a^3\text{-ra}^3(r)a^3\text{-}a^3\text{-}se^3(ke^3)/le^3z(las)$ . 1. An alliance of epigynous exogens, established by Lindley, comprising the orders *Santalaceæ*, *Loranthaceæ*, and *Aristolochiaceæ*, which have monochlamydeous flowers and a small embryo surrounded by abundant albumen. [B, 197.] 2. In other classifications, a cohort of apetalous dicotyledonous plants, including the orders *Rafflesiaceæ* and *Aristolochiaceæ*, distinguished by their usually monochlamydeous flowers, inferior ovary, and seeds provided with integuments and containing a minute embryo usually surrounded by albumen. Cf. *SERPENTARIA*. [B, 75.]
- ASARAN**, n. An Arabic and Dukhane name for the *Asarum europæum*. [L, 105.]
- ASARATH**, n. A Turkish name for the *Cannabis sativa*. [L, 105.]
- ASARCIA** (Lat.), n. f.  $A^2s(a^3s)\text{-}a^3\text{-r}^3\text{-si}^3(ki^3)/a^3$ . Gr.,  $\acute{\alpha}\sigma\alpha\rho\kappa\iota\alpha$  (from  $\alpha$  priv., and  $\sigma\alpha\rho\acute{\epsilon}$ , flesh). Fr., *ascrécie, maigreur*. Ger., *Asarcie, Asarkie, Fleischmangel*. Emaciation. [L, 50.]
- ASARCODÉS** (Fr.), n. pl.  $A^3\text{-sa}^3\text{-r}^3\text{-ko}^3\text{-da}$ . From  $\alpha$  priv., and  $\sigma\alpha\rho\acute{\epsilon}$ , flesh. A division of *Pungit* in Bertillon's classification, comprising those made up solely of free filaments not connected with any fleshy or membranous body. It corresponds nearly to the old group *Hyphomycetes*. [B, 46, 121.]
- ASARCON** (Lat.), n. n.  $A^2s(a^3s)\text{-}a^3\text{-rk}^3(o^3)n$ . Gr.,  $\acute{\alpha}\sigma\alpha\rho\kappa\omega\nu$ . See *ASARCIA*.
- ASARCUS** (Lat.), adj.  $A^2s(a^3s)\text{-}a^3\text{-rk}^3(u^3s)/u^3s$ . Gr.,  $\acute{\alpha}\sigma\alpha\rho\kappa\omega\varsigma$ . Emaciated. [A, 322.]
- ASAREÆ** (Lat.), n. f. pl.  $A^2s(a^3s)\text{-}a^3\text{-re}^3(e^3)/a^3\text{-}e^3$ . Of Duchartre and others, a suborder of the *Aristolochiaceæ* (q. v.). [B, 104, 170.]
- ASARENE**, n.  $A^2s/a^3\text{-ren}$ . Fr., *asarène*. Ger., *Asaren*. A terpene.  $C_{10}H_{16}$ , found in the volatile oil derived from *Asarum canadense*. [B, 33.]
- ASARERO** (Port.), n.  $A^3\text{-sa}^3\text{-ra}^3\text{-ro}$ . The *Prunus lusitanica*. [B, 121.]
- ASARET** (Fr.), n.  $A^3\text{-sa}^3\text{-ra}$ . The genus *Asarum*. [A, 385.]—**A. à feuilles d'aron**. The *Asarum arifolium*.—**A. d'Europe**. The *Asarum europæum*. [L, 43.]—**A. du Canada**. The *Asarum canadense*. [L.]—**Extrait d'a.** See *Extractum Asari*.—**Poudre d'a. composée**. See *Pulvis asari compositus*.—**Teinture d'a.** See *Tinctura asari*.
- ASARIA-PALA**, n. See *ASARIA-PALA*.
- ASARIFE**, n. According to Bory, a name given by Dioscorides to the *Atriplex halimus*. [B, 121.]
- ASARIFOLIUS** (Lat.), adj.  $A^2s(a^3s)\text{-}a^3\text{-r}^3\text{-i}^3\text{-fol}(fo^3l)/i^3\text{-}u^3s(u^3s)$ . From *Asarum* (q. v.), and *folium*, a leaf. Ger., *haselwurzblättrig*. Having leaves like those of the *Asarum* (e. g., the *Valeriana asarifolia*). [B.]
- ASARIN**, n.  $A^2s/a^3\text{-ri}^3n$ . Fr., *asarine*. Ger., *Asarin*. 1. A bitter, yellow coloring matter,  $C_{20}H_{26}O_8$ , found by Gräber in the root and leaves of *Asarum europæum* and *Asarum canadense*, of an aromatic taste and odor, soluble in alcohol and in ether. [B, 5, 10.] 2. A neutral substance of the empirical formula  $C_{12}H_{16}O_2$  found in the root of *Asarum canadense*. 3. *Asarone* (q. v.). [B.]—**Camphorous a.** See *ASARONE*.
- ASARINÆ** (Lat.), n. f. pl.  $A^2s(a^3s)\text{-}a^3\text{-ri}^3(r)/e^3(ne^3)/na^3\text{-}e^3$ . Fr., *asarinées*. Ger., *Asarinen*. 1. A family of plants belonging to the *Polymorpha* made by Batsch, including *Asarum* and other genera

now ranked with the *Aristolochiaceæ*, and also the genera *Pistia* and *Tacca*, now placed in distinct orders. 2. Of Agardh, Link, and others, a division of aristolochiaceous plants corresponding to the *Asareæ* of Duchartre. [B, 49, 170.]

**ASARINE** (Fr.), n.  $A^3\text{-sa}^3\text{-ren}$ . 1. *Asarin*. 2. The root of *Antirrhinum asarina*. [L, 105.]

**ASARINÆÆ** (Lat.), n. f. pl.  $A^2s(a^3s)\text{-}a^3\text{-ri}^3n/e^3\text{-}e^3(a^3\text{-}e^3)$ . Fr., *asarinées*. 1. A tribe, division, or family of aristolochiaceous plants corresponding in some classifications to the *Asareæ* of Duchartre, in others to the *Aristolochiæ* and *Asareæ*, and, in others, including with the *Asareæ* *Bragantia* and other genera usually placed in distinct tribes. 2. Of Kunth, a family of *Apetalæ*, including *Asarum* and *Aristolochia*. See *ARISTOLOCHACEÆ*. 3. Of Brongniart, a class of perigynous *Dialypetalæ*, including the families *Aristolochiæ*, *Nepentheæ*, *Cytinæ*, *Rafflesiaceæ*, and possibly the *Balanophoræ*. [B, 170.]

**ASARINEOUS**, adj.  $A^2s/a^3\text{-ri}^3n/e^3\text{-}u^3s$ . Lat., *asarineus*. Fr., *asariné*. Resembling the genus *Asarum*, or belonging to the *Asarinææ*. [L, 41.]

**ASARITE**, n.  $A^2s/a^3\text{-rit}$ . Fr., *asarite*. Ger., *Asarit*. Of Gräber, a camphor-like substance found, together with asarin and asarone, in the rhizome of *Asarum europæum*. It forms small acicular crystals of silky lustre, devoid of taste and odor, and soluble in alcohol, in ether, and in the volatile oils. It volatilizes on heating, with the evolution of an acid white vapor. [B, 2, 98.]

**ASARITES** (Lat.), n. m.  $A^2s(a^3s)\text{-}a^3\text{-ri}^3(re^3)/tez(tas)$ . Gr.,  $\acute{\alpha}\sigma\alpha\rho\iota\tau\eta\varsigma$ . Wine flavored with *Asarum*. [Dioscorides (A, 311); L, 97.]

**ASARKIE** (Ger.), n.  $A^3\text{-za}^3\text{-rk}^3\text{-e'}$ . See *ASARCIA*.

**ASAROIDEÆ** (Lat.), n. f. pl.  $A^2s(a^3s)\text{-}a^3\text{-r}^3(o^3)/i^3\text{-}e^3\text{-}e^3(a^3\text{-}e^3)$ . From *asarov* (see *ASARUM*), and  $\epsilon\acute{\iota}\delta\omicron\varsigma$ , likeness. Fr., *asaroides*. Of Ventenat, an order of plants, including *Asarum*, *Aristolochia*, and *Cytinus*. [B, 170.] See *ARISTOLOCHACEÆ*.

**ASAROL**, n.  $A^2s/a^3\text{-ro}^3l$ . A body allied to the camphors,  $C_{10}H_{16}O$ , having the chemical constitution of an alcohol. The acetic and probably the valerician ethers of this body exist in the rhizome of *Asarum canadense*. Two isomeric varieties of a exist, differing in their boiling points and their behavior to polarized light. [F. B. Powers, "Proc. of the Am. Ph. Assoc.," xxviii, p. 485 (B).]

**ASARONE**, n.  $A^2s/a^3\text{-ron}$ . Fr., *asarone*. Ger., *Asaron*. *Asarum* camphor, camphorous asarin; a concrete, volatile, camphor-like substance obtained from the root of *Asarum europæum* by distillation with water; insoluble in water, but readily soluble in alcohol, in ether, and in essential oils. [B, 2, 5.]

**ASARON** (Ar.), n. See *ASARAN*.

**ASAROT**, n. A name given in Languedoc to the *Acer pseudo-platanus*. [B, 121.]

**ASARUM** (Lat.), n. n.  $A^2s(a^3s)\text{-}a^3\text{-ru}^3m(ru^3m)$ . Gr.,  $\acute{\alpha}\sigma\alpha\rho\omega\nu$ , from  $\alpha$  priv., and  $\sigma\alpha\rho\acute{\alpha}$ , a band, because not used in making garlands. Fr., *asaret*. Ger., *Haselwurz*. 1. Wild ginger; a genus of perennial herbs of the *Aristolochiaceæ*, established by Tournefort. It has a creeping rhizome; solitary flowers having a 3-cleft campanulate calyx; 12 stamens, epigynous, with the anthers adnate to the middle or top of the filaments; and a short style with 6-rayed stigma. The fruit is a fleshy 6-celled capsule surmounted by the remains of the calyx. [B, 19, 34.] 2. In the U. S. Ph., the root of *A. canadense*. [A, 247.] 3. In the Fr. Cod., the *A. europæum*. [B.]—**Alcoolé d'opium et d'a. composé** (Fr.). Syn.: *gouttes anodynés anglaises*. A preparation made by digesting for 20 days and filtering a mixture of 30 parts each of the root of *A. europæum* and saffraas, 15 of aloes-wood, 12 of opium, 4 of ammonium carbonate, and 500 of alcohol; used in epilepsy and hysteria. [L, 77.]—**A. arifolium** [Michaux]. A species indigenous to the south-eastern United States, distinguished by its broadly hastate solitary leaves, which are puberulent along the veins, and by its inflated-urceolate purplish-brown calyx, trilobate at its summit. The slender whitish rhizome has a faint taste of ginger, and is sometimes substituted for serpentaria. It has the medicinal properties of *A. europæum*. [B, 34, 180.]—**A.-bitter**. See *ASARIN*.—**A. camphor**. Fr., *camphre d'a*. See *ASARONE*.—**A. canadense** [Linnaeus]. Fr., *asaret du Canada*. Ger., *canadische Haselwurz*. Syn.: *A. villosum* [Michaux] (seu *carolinianum* [Walter], seu *latifolium* [Salisbury]). Canad. snake-root, wild ginger; a species distinguished by its pair of large, radical, reniform leaves, with the solitary purplish flower lying between them and close to the ground. Its rhizome is used in domestic medicine, and contains a volatile oil made up of *asarene*, *asarol*,

THE ASARUM CANADENSE. [A, 327.]

and ethereal derivatives of the latter, also a neutral body (*asarin*) of the composition  $C_{12}H_{16}O_2$ , resin, starch, mucilage, sugar, and a coloring matter (*asurin*). [B, 33, 34.]—*A. carolinianum* (Walter). See *A. canadense*.—*A. europaeum* [Linnaeus]. Fr., *cabaret* [Fr. Cod.], *ronnelle*, *oreille d'homme*, *oreillette*, *nard sauvage*. Ger., *wilde Narde*, *gemeine Haselwurz*. It., *asaro*, *nardo silvatico*. Syn.: *asarium* [Fr. Cod.], *Nardus montana* (seu *rustica*, seu *silvestris*), *asarabacca*. A European species resembling *A. canadense* in appearance and botanical character. It contains a volatile oil, a bitter principle (*asarin*), *asaron*, and *asarine*. The rhizome is rounded, of about the thickness of a quill, branching, and beset with rootlets; it has a sharply aromatic odor like that of pepper and valerian, and a nauseous, bitter, and acrid taste. The leaves and rhizome, *radix* (et *herba*) *asari* (seu *azari*, seu *nardi silvestris*, seu *nardi rusticani*, seu *cabareta*, seu *vulgaginis*, seu *sanguinis Martis*), were formerly much employed before ipecac was known as an emetic, diuretic, and diaphoretic, and in the form of a dry powder as a sternutatory. After the introduction of ipecac they were used chiefly in veterinary practice. [A, 247; B, 19, 180.]—*A. grandiflorum* [Klotsch]. See *A. arifolium*.—*A. Hookeri*. A species resembling *A. canadense*, of which it is sometimes regarded as a variety, growing on the Pacific coast of North America. [B, 214.]—*A. hypocistis* [Linnaeus]. See *CYTINUS hypocistis*.—*A. latifolium* [Salisbury]. See *A. canadense*.—*A. officinale*. See *A. europaeum*.—*A. oil*. Lat., *oleum asari*. A volatile oil obtained in small quantity from the root of *A. europaeum* by distillation; a yellowish, viscid liquid, smelling like valerian oil, of a sharp, burning taste, sparingly soluble in water, but readily soluble in alcohol, in ether, and in fixed and volatile oils. Its exact composition is unknown, but the following formulæ have been deduced:  $C_8H_8O$  and  $C_{10}H_{16}O_2$ . [B, 2; L, 132.] See also *A. canadense*.—*A. Sieboldii* [Miquel]. A species growing in Japan, where it is called *to-sai-shin*, having a slender, aromatic rhizome of a pungent, irritating after-taste. [A, 247.]—*A. udne*. An Arabic name for the *A. europaeum*. [A, 259.]—*A. villosum* [Michaux]. See *A. canadense*.—*A. virginianum*.—*A. virginicum* [Willdenow]. Black snake-weed; a low acaulescent species, growing in the mountainous regions of the southeastern United States, and said also to occur in China and Japan; it resembles *A. canadense*, but differs in having solitary, glabrous, coriaceous, orbicular-ovate, deeply cordate leaves, and a short subcampanulate dark-purple calyx. The root is sometimes substituted for that of *Aristolochia serpentaria*. [B, 34, 180; L.]—*A. vulgare*. *A. vulgare rotundifolium* [Morison]. See *A. europaeum*.—*Essentia asari*. See *Tinctura asari*.—*Extractum asari*. Fr., *extrait d'asaret*. An alcoholic solid extract of the root of *A. europaeum*, formerly official. [L, 85.]—*Folia asari*. *Herba asari*. The leaves of *A. europaeum*. [B, 180; L, 120.]—*Oleum asari*. See *A. oil*.—*Poudre d'a.* [Fr. Cod.]. (Fr.), *Pulvis asari* [Fr. Cod.]. A preparation made by powdering the recently dried leaves of *A. europaeum* and passing the powder through a sieve of 80 meshes to the inch (of 27 mm.). [B.]—*Pulvis asari compositus* (seu *erhlinus*, seu *sternutatorius*). Compound powder of asarabacca, containing 8 parts of the leaves of *A. europaeum* and 1 part of lavender, slightly different proportions being given in several old pharmacopœias; used as an erhine in headache and ophthalmia. [L, 132.]—*Radix asari*. The rhizome of *A. europaeum*. [B, 180.]—*Tinctura asari* [Fr. Cod., 1837]. Fr., *teinture d'asaret*. A tincture made by macerating 1 part of the leaves of *A. europaeum* in 4 parts of alcohol for 15 days, and filtering. [L, 85.]

**ASARWURZ** (Ger.), n.  $A^2/za^3r$ -vurtz. The *Asarum europæum*. [L, 43.]

**ASARYAPALA**, n. See ADSARI-PALA.

**ASASI**, n. A Guinea tree, resembling the laurel, a decoction of which is used for toothache. [L, 105.]

**ASAUNA**, n. The *Briedelia montana*. ["Proc. of the Am. Phar. Assoc.," xxv, p. 225 (B).]

**ASBARDO**, n. The stems of *Kleinia pteroneura*. ["Proc. of the Am. Phar. Assoc.," xxiii, p. 167 (B).]

**ASBEST** (Ger.), n.  $A^2s$ -be<sup>2</sup>st'. Asbestos. [A, 315.]—*A'ähnlich*. See ASBESTOID.—*A'artig*. See ASBESTINE.—*A'holz*. See *Ligneus ASBESTOS*.—*A'veiss*. See AMIANTUS.—*Biegsamer A.* Flexible asbestos. [B, 49.] See ASBESTOS.—*Gemeiner A.* A variety of asbestos having a nacreous lustre, translucent at the edges only, and made up of long, thin fibres which are little or not at all elastic. [B, 49.]—*Holz'*. See *Ligniform ASBESTOS*.—*Kanadischer A.* Canadian asbestos. [B, 49.]—*Papiera'*. See *Elastic ASBESTOS*.—*Schillernder A.* See CHRYSOTILE.

**ASBESTE** (Fr.), n.  $A^2s$ -be<sup>2</sup>st. See ASBESTOS.—*A. ligniforme*. See *Ligneus ASBESTOS*.

**ASBESTIC**, adj.  $A^2s$ -be<sup>2</sup>st'<sup>i2</sup>k. See ASBESTINE.

**ASBESTIFORM**, adj.  $A^2s$ -be<sup>2</sup>st'<sup>i2</sup>-fo<sup>2</sup>rm. Lat., *asbestiformis*. Fr., *asbestiforme*. Fibrous like asbestos. [L, 73, 180.]

**ASBESTINE**, adj.  $A^2s$ -be<sup>2</sup>st'<sup>i2</sup>n. Lat., *asbestinus*. 1. Pertaining to or resembling asbestos. [A, 302.] 2. Incombustible. [A, 302.]

**ASBESTINUM** (Lat.), n. n.  $A^2s(a^2s)$ -be<sup>2</sup>st'<sup>i2</sup>n-u<sup>2</sup>m(u<sup>2</sup>m). See ASBESTOS.

**ASBESTINUS** (Lat.), adj.  $A^2s(a^2s)$ -be<sup>2</sup>st'<sup>i2</sup>n-u<sup>2</sup>s(u<sup>2</sup>s). See ASBESTINE.

**ASBESTOID**, adj.  $A^2s$ -be<sup>2</sup>st'<sup>i2</sup>oid. Lat., *asbestoides*. Fr., *asbestoïde*. Ger., *asbestähnlich*. Resembling asbestos. [L, 180.]

**ASBESTOS** (Lat.), n. m.  $A^2s(a^2s)$ -be<sup>2</sup>st'o<sup>2</sup>s. Gr., *ἀσβεστος* (ἀπ᾽ἀντος understood), unslaked lime. [Dioscorides (A, 311).] 2. A name given to several fibrous varieties of double silicate of magnesium and calcium, remarkable for their resistance to the action of heat. A soft, fibrous substance, made up of flexible or elastic fila-

ments sometimes closely resembling those of flax or silk. It surpasses all other substances as a non-conductor of heat. It is found chiefly in the mountains of northern Italy, but is sparsely distributed throughout the world. The constituents of the Italian and Canadian varieties are given as follows:

	Italian.	Canadian.
Lime and magnesia.....	37.84	33.20
Silica.....	41.69	40.90
Oxide of iron.....	3.01	5.75
Potassa.....	0.85	traces.
Soda.....	1.41	0.68
Alumina.....	2.57	6.60
Moisture (hygroscopic).....	3.04	—
Organic matter and water of hydration...	9.56	12.50
Loss.....	0.03	0.12
Chlorine.....	—	0.25

It was formerly employed in medicine as a local irritant, and has been used internally as an anthelmintic. [A, 247, 347, 377; "Brit. and Colon. Druggist," June 12, 1886, p. 432; B, 180.]—*A. plumosus*. See *A.—Elastic a.* Ger., *Bergkork*, *Papierasbest*. Mountain cork; a variety in which the fibres are so interlaced as to be hardly separable or even distinguishable; dull exteriorly or but slightly lustrous, not translucent, of a brown, gray, or green color. It is found in Sweden, Spain, and the Tyrol. [B, 49.]—*Flexible a.* Lat., *amiantus*, *amianthus*. Ger., *biegsamer Asbest*. Amiant. See *A.—Ligneous a.*, *Ligniform a.* Fr., *asbeste ligniforme*. Ger., *Asbestholz*, *Holzasbest*. A brownish variety found in the Tyrol, closely resembling wood in appearance and texture. [B, 49.]

**ASBESTUS**, adj.  $A^2s$ -be<sup>2</sup>st'<sup>i2</sup>s. See ASBESTINE.

**ASBESTUS** (Lat.), n. m.  $A^2s(a^2s)$ -be<sup>2</sup>st'<sup>i2</sup>s(u<sup>2</sup>s). See ASBESTOS.

**ASBIDAGH** (Ar.), n. Carbonate of lead. [A, 259.]

**ASBIREE** (Ar.), n. See AS (Ar.).

**ASBO**, n. An old name for an unknown animal the fat of which was used as an ingredient of a plaster employed in the treatment of pleurisy. [L, 94.]

**ASBOLAN**, n.  $A^2s$ 'bo-la<sup>2</sup>n. From *ἄσβολος*, soot. See *Earthy COBALT*.

**ASBOLE** (Lat.), n. f.  $A^2s(a^2s)$ 'bo<sup>2</sup>l-e(a). Gr., *ἄσβόλη* (= *ἄσβολος*). See ASBOLOS.

**ASBOLICUS** (Lat.), adj.  $A^2s(a^2s)$ -bo<sup>2</sup>l'<sup>i2</sup>k-u<sup>2</sup>s(u<sup>2</sup>s). Fr., *asbolique*. Ger., *russartig* (1st def.). 1. Sooty, fuliginous. 2. Caused by soot. [A, 322.] See CARCINOMA *scroti asbolicum*.

**ASBOLIN**, n.  $A^2s$ 'bo-l<sup>i2</sup>n. Lat., *asbolinum*, *asbolina*. Fr., *asboline*. Ger., *Asbolin*. 1. An old remedy for tape-worm, containing soot. [A, 322.] 2. A yellow volatile oil, bitter and very acid, extracted, according to Braconnot, from soot. [B, 2.] 3. A resinous substance derived from soot. [B, 7.]

**ASBOLODES** (Lat.), adj.  $A^2s(a^2s)$ 'bo<sup>2</sup>l-o<sup>2</sup>-dez(das). Gr., *ἄσβολῶδης* (from *ἄσβολος*, soot, and *εἶδος*, resemblance). Sooty, resembling soot. [A, 322.]

**ASBOLOS** (Lat.), n. f. and m.  $A^2s(a^2s)$ 'bo<sup>2</sup>l-o<sup>2</sup>s. Gr., *ἄσβολος*. Fr., *suie*. Ger., *Russ*. Soot. [A, 322.] See FULIGO.

**ASBOLOTICUS** (Lat.), adj.  $A^2s(a^2s)$ -bo<sup>2</sup>l-o<sup>2</sup>t'<sup>i2</sup>k-u<sup>2</sup>s(u<sup>2</sup>s). See ASBOLICUS.

**ASCAIN** (Fr.), n.  $A^2s$ -ka<sup>2</sup>n<sup>2</sup>. A town in the department of the Basses-Pyrénées, France, where there is a cold ferruginous spring. [L, 105.]

**ASCALERON** (Lat.), n. n.  $A^2s(a^2s)$ -ka<sup>2</sup>l'(ka<sup>2</sup>l')e<sup>2</sup>r-o<sup>2</sup>n. Of Athenæus, the *asculia* (q. v.). [Bory (B, 121).]

**ASCALIA** (Lat.), n. f.  $A^2s(a^2s)$ -ka<sup>2</sup>l'(ka<sup>2</sup>l')i<sup>2</sup>a<sup>2</sup>. Gr., *ἄσκαλία*. An ancient name for the receptacle of the artichoke. [Pliny (B, 121).]

**ASCALONIA** (Lat.), n. f.  $A^2s(a^2s)$ -ka<sup>2</sup>-lo<sup>2</sup>ni<sup>2</sup>a<sup>2</sup>. See ALLIUM *ascalonicum*.

**ASCALONICUS** (Lat.), adj.  $A^2s(a^2s)$ -ka<sup>2</sup>-lo<sup>2</sup>n(lon)<sup>i2</sup>k-u<sup>2</sup>s(u<sup>2</sup>s). From *Ascalon*, a city in Judæa. See ALLIUM *ascalonicum*.

**ASCALONIUM** (Lat.), n. n.  $A^2s(a^2s)$ -ka<sup>2</sup>-lo<sup>2</sup>ni<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). See ALLIUM *ascalonicum*.

**ASCAMONIA** (Lat.), n. f.  $A^2s(a^2s)$ -ka<sup>2</sup>-mo<sup>2</sup>ni<sup>2</sup>a<sup>2</sup>. Gr., *ἄσκαμωνία* (= *σκαμωνία*). See SCAMMONY.

**ASCARACANTHA** (Lat.), n. f.  $A^2s(a^2s)$ -ka<sup>2</sup>-ra<sup>2</sup>-ka<sup>2</sup>nth-(ka<sup>2</sup>nth)<sup>a2</sup>. From *ἀσκαρίς* (see ASCARIS), and *ἀκανθα*, a prickle. A genus of nematoid worms. [A, 249.]—*A. tenuis*. A species found by Van Beneden in the gizzard of the large goosander, having around its head four blades, toothed on the concave side. [A, 249.]

**ASCARDAMYCTUS** (Lat.), adj.  $A^2s(a^2s)$ -ka<sup>2</sup>-rd-a<sup>2</sup>-mi<sup>2</sup>tk(mu<sup>2</sup>ky'-tu<sup>2</sup>s(tu<sup>2</sup>s)). Gr., *ἀσκαρδάμυκτος* (from *ἀσκαρδάμυκτεῖν*, to look without winking). Fr., *ascardamycte*. Having a fixed, staring gaze. [A, 322.]

**ASCARIASIS** (Lat.), n. f.  $A^2s(a^2s)$ -ka<sup>2</sup>-ri(re)<sup>a2</sup>-si<sup>2</sup>s. Gen., *ascaria'scos* (-ri<sup>a2</sup>sis). See ASCARIDIASIS.

**ASCARICIDA** (Lat.), n. f.  $A^2s(a^2s)$ -ka<sup>2</sup>-r(ka<sup>2</sup>r)-i<sup>2</sup>-si(ke)'da<sup>2</sup>. From *ἀσκαρίς*, an intestinal worm, and *cādere*, to destroy. Fr., *ascaricide*. A genus of vernoniaceous plants, made by Cassini, now referred to *Vernonia*. [B, 42.]—*A. anthelmintica*, *A. indica* [Cassini]. Fr., *ascaricide indienne*. See VERNONIA *anthelmintica*.

**ASCARICIDE**, n.  $A^2s$ -ka<sup>2</sup>r'i<sup>2</sup>-sid. Lat., *ascaricidum* (1st def.). Fr., *ascaricide*. 1. A remedy capable of destroying ascarides. [A, 385.] 2. The genus *Ascaricida*. [B.]—*A. indienne* (Fr.). See *Ascaricida indica*.

**ASCARIDÆ** (Lat.), n. f. pl.  $A^2s(a^2s)$ -ka<sup>2</sup>r(ka<sup>2</sup>r)'i<sup>2</sup>d-e(a<sup>2</sup>-e<sup>2</sup>). Fr., *ascaridiens*, *ascaridés*. Ger., *Askariden*, *Springwürmer*. A family of nematoid worms of the class *Scolecida*, including those genera which have the mouth furnished with three papillæ, one

**ASCENSION, ASCENT**, n's. A<sup>2</sup>s-se<sup>2</sup>n/shu<sup>2</sup>n, -se<sup>2</sup>nt'. Lat., *ascensio, ascensus*. Fr., *ascension*. Ger., *Aufsteigen, Erhöhung*. 1. Locomotion upward, note being taken of the physiological effects of changes of altitude. [A, 385.] 2. An increase in the severity of a disease. [A, 322.] 3. Of an organ, e. g., the uterus (Lat., *ascensus* [seu *elevatio*] *uteri*; Ger., *Höhenstand* [oder *Erhebung*] *des Uterus*), the assumption of a more elevated situation. [A, 69.] 4. An old term for the process of sublimation. [Libavius (L, 116).]

**ASCEOUS**, adj. A<sup>2</sup>s/se<sup>2</sup>-u's. Of or pertaining to an ascus (q. v.). [Farlow (B).]

**ASCESIS** (Lat.), n. f. A<sup>2</sup>s(a<sup>2</sup>s)-se(kh)/si<sup>2</sup>s. Gen., *asce/seos* (-sis). Gr., *ἀσκησις* (from *ἀσκειν*, to exercise, to practice). Exercise. [A, 325.]

**ASCHAM** (Ar.), n. See AMNIYOS.

**ASCHBAUM** (Ger.), n. A<sup>2</sup>sh/ba<sup>2</sup>-u'm. The ash-tree. [A, 315.] —**A'rinde**. See *Cortex FRAXINI*. [B, 180.] See *FRAXINUS excelsior*.

**ASCHBLATT** (Ger.), n. A<sup>2</sup>sh/bla<sup>2</sup>t. See *ARTEMISIA maritima*.

**ASCHBLEI** (Ger.), n. A<sup>2</sup>sh/bli. 1. Graphite. 2. Bismuth. [B, 49, 180.]

**ASCH-BUTCHEGAN** (Ar.), n. Castoreum. [L, 77.]

**ASCHE** (Ger.), n. A<sup>2</sup>sh'e<sup>2</sup>. See *Asn*. —**A'nartig**. Cineritious. [L, 80.] —**A'nbad**. An ash-bath. [L, 80.] —**A'nbett**. The application of heat to the body by means of hot, dry ashes. [L, 135.] —**A'nfloeknblume**. The centaury. [L, 43.] —**A'nkapelle**, **A'nkupelle**. Ashes used in cupellation. [L, 46.] —**A'nkraut**. The sky-flower. [L, 46.] See *CINERARIA*. —**A'nlaenge**. The lye of wood-ashes. [A, 315.] —**A'nplanze**. 1. The sky-flower. [L, 30.] See *CINERARIA*. 2. The *Artemisia vulgaris*. [A, 315.] —**A'npsalz**. Potash. [L, 30.] —**Blau** **A**. Cinis cærulea; azurite. [B, 180.] —**Grüne** **A**. Cinis viridis; chrysocolia or green malachite. [B, 180.] —**Holza'**. Wood-ashes. [L, 30.] —**Knochena'**. Bone-ash. [L, 30.]

**ASCHÉE** (Fr.), n. A<sup>2</sup>sh-a. An old name for the earth-worm. [L, 105.]

**ASCHENFETT** (Ger.), n. A<sup>2</sup>sh/e<sup>2</sup>n-fe<sup>2</sup>t. Salmon-fat. [B, 180.] See *SALMO thymallus*.

**ASCHERWURZEL** (Ger.), n. A<sup>2</sup>sh/e<sup>2</sup>r-vur-tze<sup>2</sup>l. White dittany root; the root of *Dictamnus albus*. [B, 180.]

**ASCHIA** (Lat.), n. f. A<sup>2</sup>s(a<sup>2</sup>s)/ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)-a<sup>2</sup>. The salmon. [B, 180.] —**Axungia aschie**, **Oleum aschie**. Salmon-fat. [B, 180.] See *SALMO thymallus*.

**ASCHIDASARUM** (Lat.), n. n. A<sup>2</sup>s(a<sup>2</sup>s)-ki<sup>2</sup>d(ch<sup>2</sup>i<sup>2</sup>)-a<sup>2</sup>s-(a<sup>2</sup>s)/a<sup>2</sup>-ru<sup>2</sup>m(ru<sup>2</sup>m). From *a* priv., *σχίζω*, to split, and *Asarum* (q. v.). A section of the genus *Asarum*, including species with undivided styles. [Duchartre (B, 214).]

**ASCHIDOBLASTEÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)-ki<sup>2</sup>d(ch<sup>2</sup>i<sup>2</sup>)-o<sup>2</sup>(a<sup>2</sup>)-bla<sup>2</sup>s(bla<sup>2</sup>s)te<sup>2</sup>-e(a<sup>2</sup>-e<sup>2</sup>). From *a* priv., *σχίζω*, to split, and *βλαστός*, a germ. Fr., *aschidoblastées*. Of Jussieu, a subdivision of the *Perispermæ*, including the families (orders) *Burmanniaceæ*, *Apostasiæ*, and *Orchidaceæ*, characterized by the presence of a very imperfect, undivided, homogeneous embryo. [B, 121.]

**ASCHIL, ASCHILL** (Ar.), n's. The *Scilla maritima*. [A, 259.]

**ASCHION** (Lat.), n. n. A<sup>2</sup>s(a<sup>2</sup>s)/ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)-o<sup>2</sup>n. Gr., *ἀσχιον*. An ancient name for the truffle [Dioscorides (A, 311)]; applied by Wallroth to the genus *Tuber*. [B, 121.] —**A. nigrum** [Wallroth]. See *TUBER cibarium*.

**ASCHISTODACTYLIA** (Lat.), n. f. A<sup>2</sup>s(a<sup>2</sup>s)-ki<sup>2</sup>st(ch<sup>2</sup>i<sup>2</sup>)st<sup>2</sup>/o<sup>2</sup>(a<sup>2</sup>)-da<sup>2</sup>k(da<sup>2</sup>k)-ti<sup>2</sup>(tu<sup>2</sup>)l<sup>2</sup>/i<sup>2</sup>-a<sup>2</sup>. From *ἀσχιος*, not cloven, and *δακτυλος*, a finger. Fr., *aschistodactylie*. See *ASCHISTODACTYLIA*.

**ASCHISTODACTYLUS** (Lat.), adj. A<sup>2</sup>s(a<sup>2</sup>s)-ki<sup>2</sup>st(ch<sup>2</sup>i<sup>2</sup>)st<sup>2</sup>/o<sup>2</sup>(a<sup>2</sup>)-da<sup>2</sup>k(da<sup>2</sup>k)-ti<sup>2</sup>(tu<sup>2</sup>)l<sup>2</sup>/i<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). Fr., *aschistodactyle*. Pertaining to or affected with syndactylia. [A, 322.]

**ASCHIUM** (Lat.), n. n. A<sup>2</sup>s(a<sup>2</sup>s)/ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)-u<sup>2</sup>m(u<sup>2</sup>m). See *ASCHIA*. —**Axungia aschii**, **Oleum aschii**. Salmon-fat. [B, 180.] See under *SALMO thymallus*.

**ASCHKUR** (Ar.), n. The *Andropogon schenanthus*. [L, 77.]

**ASCHLAUCH** (Ger.), n. A<sup>2</sup>sh/la<sup>2</sup>-u'k. The common leek (*Allium porrum*). [L, 37.]

**ASCHNITZ** (Ger.), n. A<sup>2</sup>sh/ni<sup>2</sup>tz. The lady's-mantle (*Alchemilla vulgaris*). [L, 46.]

**ASCHWURZ** (Ger.), n. A<sup>2</sup>sh/vurtz. The white dittany (*Dictamnus albus*). [A, 315.]

**ASCHWURZEL** (Ger.), n. A<sup>2</sup>sh/vur-tze<sup>2</sup>l. The root of the *Dictamnus albus*. [B, 180.]

**ASCIA** (Lat.), n. f. A<sup>2</sup>s(a<sup>2</sup>s)-si<sup>2</sup>(ki<sup>2</sup>)-a<sup>2</sup>. From *ἀσκιος*, shadowless, so thin as to cast no shadow. 1. A hatchet, or ax. [A, 322.] 2. In zoology, the salmon (*Salmo thymallus*). 3. A spiral bandage. Galen (A, 325). —**Axungia ascie**, **Oleum ascie**. Salmon-fat. [B, 180.] See under *SALMO thymallus*.

**ASCIANO** (It.), n. A<sup>2</sup>s-chi<sup>2</sup>-a<sup>2</sup>-no. A place in Tuscany, a mile from Pisa, where there is a spring containing earthy sulphates, carbonates, and chlorides. [A, 319; L, 135.]

**ASCIÉDÉS** (Fr.), n. pl. A<sup>2</sup>s-i<sup>2</sup>d-a. The *Ascomycetes*. [Bertillon (B, 46).]

**ASCIDIA** (Lat.), n. n. pl. A<sup>2</sup>s(a<sup>2</sup>s)-si<sup>2</sup>d(ki<sup>2</sup>)-i<sup>2</sup>-a<sup>2</sup>. From *ἀσκιδίων* (= *ἀσκιον*), dim. of *ἀσκός*, a leather wine-bag. Fr., *ascidies, ascidiens*. Ger., *Mantelthiere* (1st def.). 1. The ascidians. See *ASCIDIIDA*. 2. The pl. of *ascidium* (q. v.). —**A. abdominalia** [Huxley]. An order of the *Tunicata* characterized by the alimentary canal being completely behind the branchial sac, which is comparatively small. [L, 147.] —**A. branchialia** [Huxley]. An order of the *Tunicata* characterized by a branchial sac occupying the whole or nearly the whole length of the body, the intestine lying on one side of it. [L, 147.] —**A. larvalia** [Huxley]. An order of

the *Tunicata* which retain the larval form throughout their life. [L, 147.] Cf. *APPENDICULARIA*.

**ASCIDIACEA** (Lat.), n. n. pl. A<sup>2</sup>s(a<sup>2</sup>s)-si<sup>2</sup>d(ki<sup>2</sup>)-i<sup>2</sup>-a(a<sup>2</sup>)/se<sup>2</sup>-(ke<sup>2</sup>)-a<sup>2</sup>. Fr., *ascidiacées*. See *ASCIDIADÆ*.

**ASCIDIADÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)-si<sup>2</sup>d(ki<sup>2</sup>)-i(e)/a<sup>2</sup>-de(da<sup>2</sup>-e<sup>2</sup>). Fr., *ascidiades*. The simple ascidians; a family of the *Tunicata* made by Woodward, characterized by the members being simple, fixed, solitary or gregarious, oviparous, the sexes united, and the branchial sac simple or disposed in deep and regular folds. [L, 147.]

**ASCIDIALIS** (Lat.), adj. A<sup>2</sup>s(a<sup>2</sup>s)-si<sup>2</sup>d(ki<sup>2</sup>)-i<sup>2</sup>-a(a<sup>2</sup>)/li<sup>2</sup>s. Of or pertaining to an ascidium. [B, 198.]

**ASCIDIANS**, n. pl. A<sup>2</sup>s-si<sup>2</sup>d/i<sup>2</sup>-a<sup>2</sup>-nz. Fr., *ascidiens*. See *ASCIDIA*. —**Compound a.** See *BOTRYLLIDÆ*. —**Simple a.** See *ASCIDIADÆ*. —**Social a.** See *CLAVELLINIDÆ*.

**ASCIDIARIUM** (Lat.), n. n. A<sup>2</sup>s(a<sup>2</sup>s)-si<sup>2</sup>d(ki<sup>2</sup>)-i<sup>2</sup>-a(a<sup>2</sup>)/ri<sup>2</sup>-u<sup>2</sup>m-(u<sup>2</sup>m). An aggregation of compound ascidians. [A, 316, 359.] See *BOTRYLLIDÆ*.

**ASCIDIATE**, adj. A<sup>2</sup>s-si<sup>2</sup>d/i<sup>2</sup>-at. Lat., *ascidiatus*. Fr., *ascidié*. Shaped like a vase or flask; in botany, provided with an ascidium. [B, 198; L, 180.]

**ASCIDICOLIDÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)-si<sup>2</sup>d(ki<sup>2</sup>)-i<sup>2</sup>-ko<sup>2</sup>l<sup>2</sup>/i<sup>2</sup>-d-e(a<sup>2</sup>-e<sup>2</sup>). A family of copepods. [L, 204.]

**ASCIDIFORM**, adj. A<sup>2</sup>s-si<sup>2</sup>d/i<sup>2</sup>-fo<sup>2</sup>rm. Lat., *ascidiformis, ascidiiformis* (from *ἀσκιδίων* [see *ASCIDIA*], and *forma*, form). See *ASCIDIION*.

**ASCIDIGEROUS**, adj. A<sup>2</sup>s-si<sup>2</sup>d-i<sup>2</sup>j<sup>2</sup>-e<sup>2</sup>r-u<sup>2</sup>s. From *ἀσκιδίων* (see *ASCIDIA*), and *gerere*, to bear. Fr., *ascidigère*. Bearing ascidia (said of leaves or plants). [B, 121.]

**ASCIDIOCARPA** (Lat.), n. n. pl. of adj. *ascidiocarpus*. A<sup>2</sup>s-(a<sup>2</sup>s)-si<sup>2</sup>d(ki<sup>2</sup>)-i<sup>2</sup>-o(o<sup>2</sup>)-ka<sup>2</sup>r<sup>2</sup>/pa<sup>2</sup>. Fr., *ascidiocarpe*. A class of cryptogams, established by Lüthmann for the two genera *Blasia* and *Riccia*. [B, 170.]

**ASCIDIOCARPOUS**, adj. A<sup>2</sup>s-si<sup>2</sup>d/i<sup>2</sup>-o-ka<sup>2</sup>r<sup>2</sup>/u<sup>2</sup>s. From *ἀσκιδίων* (see *ASCIDIA*), and *καρπός*, a fruit. Fr., *ascidiocarpus*. Fr., *ascidiocarpe*. Having the fruit open at the top (said of certain *Hepaticæ*). [L, 41.]

**ASCIDIION**, adj. A<sup>2</sup>s-si<sup>2</sup>d/i<sup>2</sup>-oid. Lat., *ascidioides* (from *ἀσκιδίων* [see *ASCIDIA*], and *εἶδος*, resemblance). Fr., *ascidiöide*. Ger., *schlauchförmig*. Sac-shaped. [A, 322.]

**ASCIDIODA** (Lat.), n. n. pl. A<sup>2</sup>s(a<sup>2</sup>s)-si<sup>2</sup>d(ki<sup>2</sup>)-i<sup>2</sup>-o(o<sup>2</sup>)-i(e)/da<sup>2</sup>. The *Tunicata* (q. v.), so called because many of them are shaped like a two-necked bottle. [A, 359.]

**ASCIDION** (Lat.), n. n. A<sup>2</sup>s(a<sup>2</sup>s)-si<sup>2</sup>d(ki<sup>2</sup>)-i<sup>2</sup>-o<sup>2</sup>n. From *ἀσκιδίων* (= *ἀσκιον*, dim. of *ἀσκός*), a little pouch or bottle. 1. A genus of lichens found on cinchona barks. 2. A genus of *Fungi*. [L, 41, 109.]

**ASCIDIOZOOID**, n. A<sup>2</sup>s-si<sup>2</sup>d/i<sup>2</sup>-o-zo'id. From *ἀσκιον*, a little pouch, *ζωον*, an animal, and *εἶδος*, resemblance. Huxley's term for one of the zooids or individuals into which the anterior portion of the blastoderm of certain of the ascidians develops. [L.] Cf. *CYATHOZOOID*.

**ASCIDIUM** (Lat.), n. n. A<sup>2</sup>s(a<sup>2</sup>s)-si<sup>2</sup>d(ki<sup>2</sup>)-i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). Fr., *ouïre, goudet*. Ger., *Schlauch*. 1. A tubular or pitcher-shaped organ, open at the top and often filled with liquid, developed from or upon a leaf. 2. A name given by Fries to the spore of an ascophorous *Fungus*, when this spore contains in its interior several vesicles (sporidiola). 3. Of Fée, a genus of lichens. 4. Of A. Braun, a genus of *Algae*. [B, 170, 198.]

**ASCIE** (Fr.), n. A<sup>2</sup>s-se. The *Cyprinus erythrophthalmus*. [A, 385.]

**ASCIFORM**, adj. A<sup>2</sup>s-si<sup>2</sup>-fo<sup>2</sup>rm. From *ἀσκός*, a pouch or bottle, and *forma*, form. Fr., *asciforme*. Ger., *schlauchförmig*. Shaped like a flask or ascus. [B.]

**ASCIGERI** (Lat.), n. m. pl. A<sup>2</sup>s(a<sup>2</sup>s)-si<sup>2</sup>j<sup>2</sup>(ki<sup>2</sup>g<sup>2</sup>/e<sup>2</sup>-i(e)). Fr., *ascigères*. The ascigerous *Fungi*, or *Ascomycetes*. Of Bail, a division of the *Gasteromycetes*, including the *Tuberaceæ*, and of the *Pyrenomycetes*, including the *Sphaeriaceæ*. [B, 121.]

**ASCIGEROUS**, adj. A<sup>2</sup>s-si<sup>2</sup>j<sup>2</sup>-e<sup>2</sup>r-u<sup>2</sup>s. Lat., *ascigerus* (from *ἀσκός*, a pouch or bottle, and *gerere*, to bear). Fr., *ascigère*. Ger., *schlauchtragend*. Bearing asci (said of certain *Fungi*, such as the *Ascomycetes*, which are provided with asci). [B, 19.]

**ASCILLA** (Lat.), n. f. A<sup>2</sup>s(a<sup>2</sup>s)-si<sup>2</sup>l(ki<sup>2</sup>)/la<sup>2</sup>. See *AXILLA*.

**ASCINDOE**, n. A shrub of Guinea, used in gonorrhœa. [L, 105.]

**ASCITE** (Fr.), n. A<sup>2</sup>s-set. See *ASCITES*. —**A. chyiforme**. See *Chylous EFFUSION*. —**A. de l'utérus**. See *HYDROMETRA*. —**A. huleuse**. See *ASCITES adiposus*. —**A. isolée**. A form of ascites occurring suddenly, with fever, and running an acute course (to recovery) without any concomitant disease [Bosnier (L, 87)]. —**A. péritonéale**. See *ASCITES*. —**A. sous-cutanée**. See *EDEMA* and *ANASARCA*. —**A. vaginale**. See *ASCITES vaginalis*. —**A. vrale**. See *ASCITES*.

**ASCITES** (Lat.), n. m. A<sup>2</sup>s(a<sup>2</sup>s)-si(ke)/tez(tas). Gen., *asci'tæ*; acc., *asci'ten*. Gr., *ἀσκιτις* (*ὑδρωψ* understood), the bag-like dropsy (from *ἀσκός*, a pouch or bottle). Fr., *ascite, hydropisie du bas ventre* (ou du péritoine), *hydropéritoine* [Piorry]. Ger., *Bauchwassersucht*. It., *ascite*. Sp., *ascitis*. Syn.: *hydropéritonæum, hydrops peritonæi* (seu *abdominis*). Dropsy of the peritonæum (or of the belly), abdominal dropsy; a collection of serous fluid in the peritoneal cavity, especially one not due to inflammation of the peritonæum. It is a symptom of various diseases, especially of the heart, liver, and kidneys, or may be due to local causes, such as degeneration of the peritonæum or obstruction of the portal circulation. The sp. gr. of the liquid varies from 1.008 to 1.014, and it occasionally contains fibrin, cholesterol, biliary elements, etc., and, in cases of renal origin, urea. [D, 21; Eichhorst (M, 1).] —**Active a.**,

**Acute a.** Fr., *ascite aiguë*. A form in which a large effusion takes place suddenly, especially as the result of exposure to wet and cold. [D. 1.]—**A. ab aqua sanguinolenta** (sen nigrescente). See *A. cruentus*.—**A. abdominalis**. See *A. ab exanthemate*. A. attributed to the suppression of a cutaneous eruption. [L. 132.]—**A. ab hepate**. A. due to hepatic disease. [L. 132.]—**A. ab herpetibus repressis**. See *A. ab exanthemate*.—**A. ab inflammatione et colligatione**. See *A. a sanguifluxibus*.—**A. ab oppilatione**. A. from visceral obstruction. [L. 132; M. 60.]—**A. ab ovariis**. A. due to ovarian disease. [L. 132.]—**A. a colligatione**. See *A. febrilis*.—**A. a cruore loture carniis simili**. A. a cruore mero. See *A. cruentus*.—**A. adiposus**. Fr., *ascite huileuse*. A form in which the effusion contains much fatty matter and occasionally peptones, casein-like masses, or lecithin; commonly associated with malignant or tubercular disease of the peritonæum. [H. Eichhorst (A. 319).]—**A. a liene**. A. due to enlargement of the spleen from malarial poisoning. [L. 132.]—**A. a mesenterio strumoso**. See *A. scrofulosus*.—**A. arthriticus**. A. due to gout. [L. 132.]—**A. a sanguifluxibus**. A. due to impoverishment of the blood from repeated hemorrhages. [L. 132.]—**A. a scabie repulsa**. See *A. ab exanthemate*.—**A. a vesica disrupta**. See *A. urinosus*.—**A. calidus**. See *Acute a.*—**A. chylosus**. See *Chylous effusion*.—**A. cruentus**. Hemorrhage into the peritonæum. [L. 132.]—**A. exquartana** [Werthof]. A. due to malarial fever of the quartan type. [L. 119, 132.]—**A. febrilis**. A. occurring as the result of a fever. [L. 119, 132.]—**A. flatulento-peritonæus**. Abdominal distension from tympanites. [L. 132.]—**A. hepaticus**. A. due to hepatic disease.—**A. hepatocysticus**. Dropsy or great distension of the gall-bladder. [M. 60.]—**A. intercus**. Dropsy situated between the skin and the peritonæum. [L. 132; M. 60.]—**A. internuscularis**. Oedema of the abdominal muscles. [L. 132.]—**A. maculis repressis**. See *A. ab exanthemate*.—**A. a uteris**. See *HYDROMETRA*.—**A. oleosus**. See *A. adiposus*.—**A. omentalis**. Dropsy of the omentum. [L. 132.]—**A. ovarii**. See *Ovarian cystoma*.—**A. purulento-peritonæus**. A. purulentus. Ger., *Eiterbauchwassersucht*. A collection of purulent matter in the peritonæum. [L. 132.]—**A. rubecula repressa**. See *A. ab exanthemate*.—**A. saccatus**. 1. Encysted dropsy of the peritonæum; a form in which the effusion is shut off from the general peritoneal cavity by inflammatory exudate or adhesions. 2. Ovarian dropsy. [L. 84, 132.] See *Ovarian cystoma*.—**A. sanguineo-intercus**. Hemorrhage beneath the peritonæum, separating it from the abdominal muscles. [L. 132.]—**A. sanguineo-peritonæus**. Hemorrhage into the abdominal muscles. [L. 132.]—**A. sanguineo-uterinus**. See *HEMATOMETRA*.—**A. scorbuticus** [Boerhaave]. A. due to scurvy or accompanied with scorbutic symptoms. [L. 132.]—**A. scrofulosus**. A. occurring in scrofulous children. [L. 132.]—**A. stomachi**. An accumulation of water in the stomach. [L. 132.]—**A. urinosus**. An escape of urine into the peritonæum. [L. 132.]—**A. uterinus**. See *HYDROMETRA*.—**A. vaginalis**. Fr., *ascite vaginale*. Ger., *Bauchmuskelscheidewassersucht*. An accumulation of liquid within the sheath of the rectus abdominis muscle. [L. 44.]—**A. vulgarior**. A. preceded by high-colored, scanty urine, evidently due to kidney disease. [L. 132.]—**Chronic a.** A. of long standing, or in which the effusion takes place slowly. [M.]—**Chyliform a.** Chylous a. Fr., *ascite chyliforme*. See *Chylous effusion*.—**Encysted a.** See *A. saccatus*.—**Hepatic a.** See *A. hepaticus*.—**Hydrops a. adiposus**. See *A. adiposus*.—**Mechanical a.** Passive a. A. due to disease of the heart, liver, spleen, or kidneys leading to retardation of the blood current in the vena portæ. [D. 1.]—**Saccated a.** See *A. saccatus*.—**Subcutaneous a.** Oedema of the abdominal wall. [L. 44.]—**Visceral a.** See *Mechanical a.*

**ASCITIC, ASCITICAL**, adj's. A<sup>2</sup>s-si<sup>2</sup>t<sup>2</sup>/i<sup>2</sup>k, -i<sup>2</sup>k-a<sup>2</sup>. Lat., *asciticus*. Fr., *ascitique*. Ger., *ascitisch*, *bauchwassersüchtig*. It., *ascitico*. Sp., *ascítico*. Pertaining to or affected with ascites. [D.]

**ASCIUM** (Lat.), n. n. A<sup>2</sup>s(a<sup>3</sup>s)/si<sup>2</sup>(ki<sup>2</sup>)-u<sup>3</sup>m(u<sup>4</sup>m). See *ASCIDIUM*.  
**ASCLÉPEION** (Fr.), n. A<sup>3</sup>s-kla-pa-o<sup>2</sup>n<sup>2</sup>. See *ASCLÉPEION*.

**ASCLÉPIACEÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>3</sup>s)-kle<sup>2</sup>p(klap)-i<sup>2</sup>a-a<sup>3</sup>-se<sup>2</sup>(ke<sup>2</sup>)-e(a<sup>3</sup>-e<sup>2</sup>). Fr., *asclépiacées*. 1. A division of the *Asclepiadaceæ*, made by Reichenbach. 2. The *Asclepiadaceæ*. [B. 121, 172.]

**ASCLEPIADACEÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>3</sup>s)-kle<sup>2</sup>p(klap)-i<sup>2</sup>a-a<sup>3</sup>-da(da<sup>2</sup>)/se<sup>2</sup>(ke<sup>2</sup>)-e(a<sup>3</sup>-e<sup>2</sup>). For deriv., see *ASCLEPIAS*. Fr., *asclépiadacées*. Ger., *Asclepiadaceen*. It., *asclépiadacee*. Syn.: *Asclepiadæ* [Jacquin, R. Brown, Endlicher, Decaisne, Bentham and Hooker]. The milk-weeds or asclepiads; an order of dicotyledonous herbs or shrubs belonging to the solanale alliance (Lindley) or the cohort *Gentianales* [Bentham and Hooker], having a milky, frequently acrid juice, and bearing entire, exstipulate, usually opposite leaves. The calyx and corolla are regular, 5-parted, and both are valvate in aestivation; the stamens are united to each other, and the pollen coheres in masses (pollinia); there are 2 ovaries, with the 2 stigmas united and adherent to the stamens. The *A. (Asclepiadaceæ)* have been variously subdivided. By Bentham and Hooker and others they are divided into the suborders *Periploceæ*, including the single tribe *Periploceæ*, which have flowers with granulose pollen applied to the extremity of the acuminate or appendiculate anthers, and *Eusclepiadaceæ* (*Asclepiadaceæ veræ*), comprising the tribes *Secomoneæ*, *Cynanchææ*, *Gonolobææ*, *Marsdeniææ*, *Ceropegieæ*, and *Stapelieæ*, which have waxy pollen in masses (pollinia), of which there is usually but one in each loculus. By Endlicher the *Secomoneæ* are made a distinct suborder, and by Decaisne and Lindley the order is divided into the tribes *Periploceæ*, *Secomoneæ*, *Asclepiadaceæ veræ*, *Gonolobææ*, *Stapelieæ*. In the most recent classification (Hooker's) the *Stapelieæ* are omitted as a distinct tribe. [B. 34, 42, 170, 212.]

**ASCLEPIADACEOUS**, adj. A<sup>2</sup>s-kle<sup>2</sup>p<sup>2</sup>/i<sup>2</sup>a-a<sup>3</sup>-shu<sup>3</sup>s. Of or belonging to the *Asclepiadaceæ*. [B.]

**ASCLEPIADÆ** (Lat.), n. m., pl. of *Asclepiades*. A<sup>2</sup>s(a<sup>3</sup>s)-kle<sup>2</sup>p(klap)-i(e)/a<sup>3</sup>-de(da<sup>3</sup>-e<sup>2</sup>). 1. The pl. of *Asclepiades* (q. v.). 2. Of

Decaisne, a division of the *Asclepiadaceæ veræ*, including *Asclepias* and 6 other genera, in which the corolla is naked at the throat and there is a staminal corona made up of 5 concave leaflets each furnished with an appendix. [B. 121, 170.]

**ASCLÉPIADE** (Fr.), n. A<sup>3</sup>s-kla-pi<sup>2</sup>-a<sup>3</sup>d. Syn.: *domp-te-venin*. 1. In the Fr. Cod., the *Cynanchum vincetoxicum*. [B. 5.] 2. The genus *Asclepias*. [A. 385.] 3. See *ASCLEPIADES*.—**A. bicolor**. See *ASCLEPIAS curassavica*.—**A. blanc**, **A. blanche**. See *CYNANCHUM vincetoxicum*.—**A. colorant**. See *GYMNEMA tingens*.—**A. de Curaçoa**. See *ASCLEPIAS curassavica*.—**A. de Syrie**. See *ASCLEPIAS Cornuti*.—**A. lactifère**. See *ASCLEPIAS lactifera*.—**A. laniflore**. See *ASCLEPIAS laniflora*.—**A. tubéreuse**, **A. tubéreuse**. See *ASCLEPIAS tuberosa*.—**Racine d'a. tubéreuse**. The root of *Asclepias tuberosa*.

**ASCLEPIADEACEÆ** [Lindley] (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>3</sup>s)-kle<sup>2</sup>p(klap)-i<sup>2</sup>a<sup>3</sup>d(a<sup>3</sup>d)-e<sup>2</sup>a(a<sup>3</sup>/se<sup>2</sup>(ke<sup>2</sup>)-e(a<sup>3</sup>-e<sup>2</sup>)). See *ASCLEPIADACEÆ*.

**ASCLEPIADEÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>3</sup>s)-kle<sup>2</sup>p(klap)-i<sup>2</sup>a-a<sup>3</sup>-d(a<sup>3</sup>d)/e<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). Fr., *asclépiadées*. 1. Of R. Brown, Endlicher, Bentham and Hooker, and most botanists, the *Asclepiadaceæ* (q. v.). 2. Of Lindley, a tribe of the *Asclepiadaceæ* corresponding to the *A. veræ* of Decaisne. [B. 170.]—**A. genuinæ** [Bartling]. The same as the *Eusclepiadaceæ* (q. v. under *ASCLEPIADACEÆ*). [B. 170.]—**A. veræ**. 1. Of R. Brown, see *A. genuina*. 2. Of Endlicher, a suborder of the *Asclepiadaceæ*, including all the *Eusclepiadaceæ* of Bentham and Hooker, except the *Secomoneæ*, and divided by him into the tribes *Cynanchææ*, *Gonolobææ*, and *Periploceæ*. 3. Of Decaisne and Lindley, a tribe (also called *A.* by Lindley) of the *Asclepiadaceæ*, including genera having stamens with connate filaments and bilocular anthers, each anther bearing a pair of pollinic masses suspended by two threads. It includes the subdivisions *Aspheanææ*, *Microtomææ*, *Haplostemneææ*, *Cynoconeææ*, *Sarcostemneææ*, *Eustegieææ*, *Asclepiadææ*, *Ditasseææ*, and *Orygetaleææ*. [B. 34, 121, 170.]

**ASCLEPIADES** (Lat.), n. m. A<sup>2</sup>s(a<sup>3</sup>s)-kle<sup>2</sup>p(klap)-i(e)/a<sup>3</sup>-dez(das). Gr., Ἀσκληπιάδης (from Ἀσκληπιός = Æsculapius). Fr., *asclépiade*. A son, priest, or disciple of Æsculapius; in the pl., *Asclepiadææ*, physicians. [A. 311, 322.]

**ASCLEPIADIN**, n. A<sup>2</sup>s-kle<sup>2</sup>p-i<sup>2</sup>a<sup>3</sup>d-i<sup>2</sup>n. Fr., *asclépiadine*. Ger., *Asclepiadin*. Syn.: *asclépin*, *cynanchin*. A yellow, amorphous, bitter glucoside obtained from various species of *Asclepias* and *Cynanchum*. It is emetic, diaphoretic, and purgative, and is poisonous, and is readily decomposed into sugar and asclepin (q. v.). [C. Gram, "Arch. f. exp. Pathol. u. Pharm.," xix, 6; "Dtsch. Med.-Ztg.," Jan. 25, 1886, p. 82; "Am. Jour. of Pharm.," Sept., 1886, p. 451; B. 2, 207.]

**ASCLEPIADINEÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>3</sup>s)-kle<sup>2</sup>p(klap)-i<sup>2</sup>a-a<sup>3</sup>-d(a<sup>3</sup>d)-i<sup>2</sup>n<sup>2</sup>-e<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). Fr., *asclépiadinees*. Ger., *Asklepiadineen*. Of Brongniart, a class of hypogynous gamopetalous plants, including the families (orders) *Spigeliaceæ*, *Loganiaceæ*, *Apocynææ*, *Asclepiadææ*, and *Gentianeææ*. [B. 170.] Cf. *GENTIANALES* [Bentham and Hooker].

**ASCLEPIADS**, n. pl. A<sup>2</sup>s-kle<sup>2</sup>p/i<sup>2</sup>-a<sup>3</sup>d-z. See *ASCLEPIADACEÆ*.

**ASCLEPIARIÆÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>3</sup>s)-kle<sup>2</sup>p(klap)-i<sup>2</sup>a-a<sup>3</sup>-r(i<sup>2</sup>)/e<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). 1. Of Reichenbach, a division of asclepiadaceous plants (*Stelliflorææ*), including the *Asclepieææ*, *Aspheanæææ*, *Ditasseæææ*, *Gonolobæææ*, and *Periploceæææ*. 2. Of Dumortier, an order of the *Torocoronæææ*, including the families *Menyantheæææ*, *Gentianeæææ*, *Loganiaceæææ*, *Asclepiadæææ*, and *Apocynææææ*. [B. 170.] Cf. *GENTIANALES*.

**ASCLEPIAS** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>s)-kle<sup>2</sup>p(klap)/i<sup>2</sup>-a<sup>3</sup>-s(a<sup>3</sup>s). Gen., *asclépiados* (-dis). Gr., Ἀσκληπιάς. Fr., *asclépiade*. Ger., *Asclepias*, *Schwalbenwurz*, *Seidenpflanze*. It., *asclépiade*. 1. An unknown plant mentioned by Dioscorides. [A. 311.] 2. The milk-weed, butterfly-weed, or orange swallow-wort; a genus of perennial herbs of the *Asclepiadaceæææ*, made by Tournefort and Linnaeus. The flower consists of a 5-parted calyx, a corolla of 5 petals bent downward toward the stalk, a corona of 5 cup-shaped processes, each provided with a curved, horn-shaped eminence lying within the corolla, and an antheridium consisting of 5 anthers with connate filaments, bearing 5 pairs of pollinia suspended by threads, and adherent to the 5-angled stigma. The fruit is a pair of follicles containing numerous seeds, provided with a tuft of silky hairs. The juice is milky-white and somewhat acrid. [B. 19, 34.] 3. In the U. S. Ph., the root of *A. tuberosa*. [B.]—**A. acida** [Roxburgh]. See *SARCOSTEMMA brevistigma*.—**A. acuminata** [Roxburgh]. See *GYMNEMA acuminata*.—**A. alba** [Cavanilles]. **A. albo flore**. Fr., *asclépiade blanche*. See *CYNANCHUM vincetoxicum*.—**A. alexicaria** [Jacquin]. A species, now referred to *Tylophora*, growing in Malabar and Ceylon, where it is used as an emetic and alexipharmic. [B. 180, 216.]—**A. amena** [Linnaeus]. See *A. incarnata*.—**A. annularis** [Roxburgh]. See *Holostemma Rheedii*.—**A. apophylla**. See *SARCOSTEMMA brevistigma*, *S. forskahianum*, and *S. apophyllum*.—**A. apocynum**. See *A. See *A. curassavica*.—**A. brevicornu** [Scheele]. See *ASCLEPIODORA decumbens*.—**A. connivens** [Baldwin]. See *ANANTHERIX connivens*.—**A. contrayerba**. A Mexican species, said to furnish mechoacan, with which jalap is adulterated. [Guibourt (A. 308).]—**A. convolvulacea**. See *DÆMIA extensa* and *DÆMIA angolensis*.—**A. Cornuti** [Decaisne]. Fr., *asclépiade à la soie, herbe à l'ouate*. Syn.: *A. syriaca* [Linnaeus]. Milk-weed, Virginian swallow-wort, Virginian silk, common silk-weed, wild cotton; a species found throughout the United States. It is an herb from 3 to 4 feet high, bearing numerous greenish-purple, fragrant flowers in a globular umbel, and having the fruit follicles covered with soft, warty spines, and full of silky seeds. The young shoots are used as a substitute for asparagus; a sort of sugar is obtained from the flowers; the rhizome, which is employed in medicine as an anodyne and sedative in catarrhal affections and asthma, contains asclepin,

caoutchouc, resin, starch, sugar, and tannin; and the juice, applied to wounds, forms a firm pellicle. The silk of the seeds is used for stuffing pillows and is sometimes woven into fabrics. [A. 327; B. 19, 33, 34, 180; L. 65.]—*A. crispa* [Linnaeus]. See *GOMPHOCARPUS crispus*.—*A. curassavica* [Linnaeus]. Fr., *asclépiade de Curaçoa*. The *ponchistuis* of Mexico; a species indigenous to South

THE ASCLEPIAS CORNUTI. [A. 327.]  
1, the flower; 2, the pollen masses; 3, the pod; 4, the seeds.

America, Central America, and the West Indies, naturalized in Florida. A tall shrubby plant, bearing scarlet flowers; sometimes erroneously called *ipeacacuanha*. In doses of from 3 to 9 drops, the juice is powerfully emetic and cathartic, and has been used as an antiperiodic and vermifuge; the extract is a violent sternutatory; the stem is credited with the same properties as sarsaparilla and China-root; the leaves are said to be hæmorrhagic, antilemnorrhagic, and curative of cancer; and the root has been recommended in asthma and other nervous affections. Great care is necessary in using any preparation of the plant. [B. 19, 34; J. M. Maisch, "Am. Jour. of Pharm.," Feb., 1886, p. 72.]—*A. cynanchoides* [Willdenow]. Pleurisy-root, wind-root, butterfly-weed; a species indigenous to the United States and Canada, bearing alternate sessile leaves and bright-orange flowers disposed in corymbs. Its root is the a. of the U. S. Ph. it contains starch, tannin, albumin, pectin, gum, two resins, a fixed oil, a volatile odoriferous matter, and a peculiar principle having the taste of the root. It has emetic, purgative, diaphoretic, expectorant, and carminative properties. The *A. tuberosa* of Roxburgh is the *Leptadenia reticulata*. [A. 247; B. 34, 212.]—*A. tunicata* ["Hort. Calc."]. See *TYLOPHORA asthmatica*.—*A. undulata* [Linnaeus]. A species now referred to *Xysmalobium*, several species of which it includes. [B. 214.] See *XYSMALOBium undulatum*.—*A. verticillata* [Elliott]. A species found in the United States, Mexico, and Canada. It stands about 2 feet high, and bears greenish-white flowers, and leaves from 3 to 5 inches long and only a line in width, usually disposed in whorls of from 4 to 6. The *A. verticillata*, var. *pumila* [Gray], occurring in the western and southwestern States, is a dwarf many-stemmed leafy plant. The *A. verticillata*, var. *subverticillata* [Gray] (*A. linearis* [Scheele in Linnaeus]), is a species from 1 foot to 2½ feet high, with opposite leaves, growing in Texas, New Mexico, and Mexico. This variety is the *romerillo* of the Mexicans, the *venenillo* of the Mex. Ph. Its milky juice is said to be a violent and dangerous cathartic; and the seed-hairs are used like elder-dried, and impregnated with a solution of ferric chloride and well dried, are employed in Mexico as a hæmorrhagic. The *A. verticillata* has been used as an anodyne and sudorific, and as a remedy for venomous bites. [A. 308; J. M. Maisch, "Am. Jour. of Pharm.," April, 1886, p. 168; B. 34, 215; "Proc. of the Am. Pharm. Assoc.," xxiv (B).]—*A. vincetoxicum*. See *CYNANCHUM vincetoxicum*.—*A. volubilis*. See *SARCOSTEMMA dombejanum*, *DREGEA volubilis*, and *LEPTADENIA reticulata*.—*A. vomitoria* [Roxburgh]. See *TYLOPHORA asthmatica*.—Flesh-colored a. See *A. incarnata*.

**ASCLEPIASMUS** (Lat.), n. m.  $A^2s(a^2s)\text{-kle}^2p(\text{klap})\text{-i}^2\text{-a}^2z(a^2s)/\text{mu}^2s(\text{mu}^2s)$ . A term applied by the later Greek physicians to hæmorrhoids. [A. 322.]

**ASCLEPIDIN**, n.  $A^2s\text{-kle}^2p/i^2d\text{-i}^2n$ . Fr., *asclépidine*. Ger., *Asclepidin*. A principle found in *Asclepias tuberosa*, said to be efficacious against congestions. [A. 385; B. 8.]

**ASCLEPIEÆ** (Lat.), n. f. pl.  $A^2s(a^2s)\text{-kle}^2p(\text{klap})\text{-l(i}^2\text{)e}^2\text{-e}(a^2\text{-e}^2)$ . Fr., *asclépiées*. A tribe, suborder, or division of asclepiadaceous plants (*Asclepiariæ* [Reichenbach]), corresponding to the *Asclepiadæ vere* of Endlicher [Meisner], or including the tribes *Stapelieæ*, *Cynanchæ*, and *Astephanæ* [Reichenbach], or the tribes *Cynanchæ*, *A. genuinæ* (= *Euasclépiceæ*), and *Calotropidæ* [Reichenbach]. [B. 170.]

**ASCLEPIEION, ASCLEPIEUM** (Lat.), n's n.  $A^2s(a^2s)\text{-kle}^2p(\text{klap})\text{-i}^2\text{-i}^2(e^2/i^2)\text{-o}^2n$ , -e(a)/u<sup>2</sup>i<sup>2</sup>m(u<sup>2</sup>i<sup>2</sup>m). Gr., Ἀσκληπιεῖον. Fr., *Asclépion*. A temple of Æsculapius. [A. 322.]

**ASCLEPIN**, n.  $A^2s\text{-kle}^2p/i^2n$ . Fr., *asclépine*. Ger., *Asclepin*. 1. A gummy, brownish-yellow substance of repulsive odor and taste resembling that of ipecac, insoluble in water, formed by the decomposition of asclepiadin. It is said to be diaphoretic, purgative, and alterative, and acts as a poison to the respiratory centre, and if artificial respiration is kept up, paralyzes the heart. 2. Asclepiadin (*q. v.*). [C. Gram, "Arch. f. exp. Pathol. u. Pharm.," xix, 6 (B); "Dtsch. Med.-Ztg.," Jan. 25, 1886, p. 82; B. 207.]

**ASCLEPIODORA** (Lat.), n. f.  $A^2s(a^2s)\text{-kle}^2p(\text{klap})\text{-i}^2\text{-o}(o^2)\text{-do}^2ra$ . From *Asclepias* (*q. v.*), and *δωρον*, a gift. A genus of asclepiadaceous plants, established by A. Gray. [B. 215.]—*A. decumbens* [Gray]. Syn.: *Asclepias brevicornu* [Scheele]. A species also described as *Acerates decumbens* (*q. v.*), growing in the western and southwestern States and Territories of the United States. [B. 215.]—*A. viridis* [Gray]. Syn.: *Anantheris paniculatus* [Nuttall] (see *torreyanus* [Don]), *Asclepias longipetala* [Scheele]. A species growing in the southern and western United States. [B. 215.]

**ASCLEPION, ASCLEPIONE**, n's.  $A^2s\text{-kle}^2p/i^2o^2n$ , -on. Fr., *asclépione*. Ger., *Asclepien*. A crystalline compound,  $C_{20}H_{24}O_2$ , obtained by coagulating the albumin of the milky juice of *Asclepias Cornuti* with heat, treating the coagulum with ether, and evaporating; white, tasteless, odorless, insoluble in water and in alcohol, but readily soluble in ether. [B. 2, 5, 207.]

**ASCLEPIOS** (Lat.), n. m.  $A^2s(a^2s)\text{-kle}^2p(\text{klap})\text{-i}^2\text{-o}^2s$ . Gr., Ἀσκληπίος (1st def.), Ἀσκληπίος (2d and 3d defs). 1. Æsculapius, the god of medicine. [A. 322.] 2. The name of an ancient dry detergent mentioned by Paulus Ægineta, a troche mentioned by Aetius, and a collyrium mentioned by Scribonius. [A. 325.] 3. A hæmorrhoid. [Leo Medicus (A. 468).]

**ASCOBACTERIA** (Lat.), n. f.  $A^2s(a^2s)/\text{ko}(ko^2)\text{-ba}^2k(\text{ba}^2k)\text{-te}(ta)/\text{ri}^2a^2$ . For deriv., see *ASCUS* and *BACTERIUM*. A genus of *Schizomycetes*, of uncertain affinities, made by Van Tieghem, consisting of colonies of cells surrounded by a thick gelatinous membrane. [B. 73.]—*A. ulvina* [Van Tieghem]. A species found upon the surface of liquids containing decaying leguminous seeds. It consists of short rod-like forms, which increase by division, aggregated into polyhedral colonies inclosed in a cartilage-like membrane. [B. 73.]

**ASCOBOLEI** (Lat.), n. m. pl.  $A^2s(a^2s)\text{-ko}(ko^2)\text{-bo}(bo^2)/\text{e}^2\text{-i}^2\text{-e}$ . Fr., *ascobolées*. A division of helvellaceous *Fungi*, including the *Ascobolus*. [B. 61.] Cf. *ASCOLINEÆ*.

**ASCOBOLIDEÆ** (Lat.), n. f.  $A^2s(a^2s)\text{-ko}(ko^2)\text{-bo}^2/i^2d\text{-e}^2\text{-e}$ . (a<sup>2</sup>-e<sup>2</sup>). Of Gray, a division of *Fungi* belonging to the *Hymenothecæ*, including the single genus *Ascobolus*. [B. 170.]

**ASCOBOLUS** (Lat.), n. m.  $A^2s(a^3s)\text{-}ko^2b^o(o^2)\text{-}lu^3s(lu^4s)$ . From  $\alpha\sigma\kappa\acute{o}s$ , a pouch or bottle, and  $\beta\acute{\alpha}\lambda\lambda\epsilon\upsilon$ , to cast; so called from the manner in which the asci are protruded when ripe. [B, 19.] Fr., *ascobole*. A genus of *Fungi* of the family *Discomycetes*, occurring

SECTION OF THE SPOROCARP OF ASCOBOLUS. (AFTER JANCZENSKI [A, 443].)

a, the cortical layer of cells forming the pericarp; b, the secondary layer (pseudo-parenchymatous sterile tissue); c, the subhymenial tissue bearing the asci; d, asci, containing ascospores; e, paraphyses.

on the excrement of the *Herbivora*. [A, 396.]—*A. furfuraceus*. A species found on cow-dung. [B, 54, 61, 75.]—*A. inuquinans* [Nees]. See *BULGARIA inuquinans*.

**ASCOCHYTACEI** (Lat.), n. m. pl.  $A^2s(a^3s)\text{-}ko(ko^2)\text{-}ki^2t(ch^2n^6t)\text{-}a(a^2)/se^2\text{-}(e)$ . From *Ascochyta*, one of the genera. Of Lebert, a section of *Fungi* belonging to the *Xylomyces*. [B, 170.]

**ASCOCOCCUS** (Lat.), n. m.  $A^2s(a^3s)\text{-}ko(ko^2)\text{-}ko^2k^u^3s(ku^4s)$ . From  $\alpha\sigma\kappa\acute{o}s$ , a pouch or bottle, and  $\kappa\acute{o}\kappa\kappa\acute{o}s$ , a kernel, a berry. A genus of *Schizomycetes* established by Billroth and adopted by Cohn, belonging to the *Coccaceae* [Zopf] and consisting of very small round cells arranged in several layers and united into families by a thick, glairy intercellular substance, each family containing a great number of individuals. [B, 29.]—*A. Billrothii* [Cohn]. A species forming globular or lobulated masses from 20 to 160  $\mu$  in diameter, surrounded by a thick, gelatinous envelope; it produces a sort of mucilaginous fermentation in saccharine solutions and decomposes ammonium tartrate with the evolution of butyric acid. [A, 396; B, 30, 237.]—*A. mesenteroides* [Cienkowski]. See *LEUCONOSTOC mesenteroides*.—*A. vibrans* [Van Tieghem]. A species found upon the surface of water containing *Beggiatoe*, and resembling *A. Billrothii*, but distinguished by the whirling, oscillating motion of the cells. [B, 73.]

THE ASCOCOCCUS BILLROTHII. (FROM ZOPF, AFTER COHN.)

a, a, small isolated colonies of cocci; b, a large isolated colony.

**ASCOGENOUS**, adj.  $A^2s\text{-}ko^2j^e^2n\text{-}u^3s$ . From  $\alpha\sigma\kappa\acute{o}s$ , a pouch, and  $\gamma\epsilon\upsilon\gamma\acute{\alpha}\nu$ , to beget. Fr., *ascogene*. Ger., *ascogen*. Producing asci, as *a. hyphae*, *a. cells*. [B, 54.]

**ASCOGONIUM** (Lat.), n. n.  $A^2s(a^3s)\text{-}ko(ko^2)\text{-}gon(go^2n)/j^2\text{-}u^3m(u^4m)$ . From  $\alpha\sigma\kappa\acute{o}s$ , a pouch or bottle, and  $\gamma\acute{o}\nu\acute{o}s$ , an organ of repro-

AN ASCOGONIUM. (FROM DE BARY, AFTER STAHL.)

A, a section through the thallus of a lichen; B, the hyphal branches (fungal portion of the lichen); C, the gonidia (algal portion); D, the trichogyne; E, an ascogonium; F, an isolated ascogonium; G, D, trichogynes projecting above the thallus and surrounded by spermatia.

duction. Ger., *Ascogon*. An organ discovered by Stahl in the *Collema*, and believed by him to represent the carpogonium of other *Ascomycetes*. It consists of a spirally coiled tube connected with a vertical portion which projects above the surface of the plant and which acts as the channel through which the spermatia act upon the a. After the fertilization of the latter by the spermatia, it develops asci and becomes enveloped in a distinct investment (sporocarp). [B, 54, 75.]

**ASCO-HYMENIUM** (Lat.), n. n.  $A^2s(a^3s)/ko(ko^2)\text{-}hi(hu^6)\text{-}me(ma)/ni^2\text{-}u^3m(u^4m)$ . For deriv., see ASCOS and HYMENIUM. Fr., *ascymène*. An hymenium composed of asci. [Bertillon (B, 46).]

**ASCOIDIUM** (Lat.), n. n.  $A^2s(a^3s)\text{-}ko(ko^2)\text{-}i^2d^i^2\text{-}u^3m(u^4m)$ . From  $\alpha\sigma\kappa\acute{o}s$ , a pouch, and  $\epsilon\acute{\iota}\delta\acute{o}s$ , form, from their pouch-like shape. A genus of *Infusoria* belonging to the *Vorticellae*, found in drainage-water, cattle-stalls, the caecum of pigs, and the dejecta and urine of typhoid-fever patients. [Centrbl. f. Bacteriol. u. Parasitenk., i, 7, p. 204.]

**ASCOLI** (It.), n.  $A^2s\text{-}ko\text{-}le$ . A place in Italy, where there is a hot spring containing sulphates, iron, and hydrogen sulphide, with carbonated saline springs containing sodium sulphate. [A, 316.]

**ASCOLIMBROS, ASCOLOMBROS**, n's. Cretan names for the *Scolymus hispanicus*. [L, 105.]

**ASCOMA** (Lat.), n. n.  $A^2s(a^3s)\text{-}ko^2ma^3$ . Gen., *ascom'atous* (-tis). Gr.,  $\alpha\sigma\kappa\mu\alpha$ . Fr., *ascome*. Lit., a leather padding; in botany, a term used by Wallroth for the receptacle or thalamium of hymenomyatous *Fungi*, and more particularly the hymenophore as distinguished from the hymenium; also an old term for the mons Veneris. [B, 198; L, 94.]

**ASCOMORPHOUS**, adj.  $A^2s\text{-}ko\text{-}mo^3r^fu^3s$ . From  $\alpha\sigma\kappa\acute{o}s$ , a pouch, and  $\mu\acute{o}\rho\phi\eta$ , form. Resembling an ascus in shape or structure. [B, 121.]

**ASCOMYCETES** (Lat.), n. m.  $A^2s(a^3s)\text{-}ko^2m^i^2(u^6)\text{-}sez(kas)$ . Gen., *ascomycet'os* (-tis). From  $\alpha\sigma\kappa\acute{o}s$ , a pouch or bottle, and  $\mu\acute{\upsilon}\kappa\eta\varsigma$ , a mushroom. A species of *Ascomycetous Fungi*, consisting mainly of asci filled with spores, occurring as parasites upon plants. [B, 19.]—*A. bullatus* [Berkeley]. A species found on the leaves of the pear-tree. [B, 61.]—*A. deformans* [Berkeley]. A species forming blisters on the leaves of the peach-tree. [B, 61.]—*A. juglandis* [Berkeley]. A species found on the leaves of the walnut-tree. [B, 61.]—*A. pruni* [Fehl.]. A species that attacks young plums. [B, 61.]

**ASCOMYCETE**, n.  $A^2s\text{-}ko^2m^i^2\text{-}set$ . A member of the *Ascomycetes*. [W. G. Farlow, "Arch. of Otol.," x, 1881 (B).]

**ASCOMYCETES** (Lat.), n. m., pl. of *Ascomycetes* (q. v.).  $A^2s(a^3s)\text{-}ko(ko^2)\text{-}mi(mu^6)\text{-}se(ku^4)\text{-}tez(tas)$ . Fr., *ascomycètes*. Ger., *Ascomyceten*, *Sporenschlauchpilze*, *Schlauchschwämme*. A division of *Fungi* distinguished by their spores being contained in sac-like receptacles (asci). As originally made by Fries, it was considered a subclass and included the cohorts *Hymenomyces* and *Pyrenomyces*. In Lindley's classification it constituted an order of the fungal alliance and included the suborders *Elvellaceae*, *Tuberaceae*, *Phacidiaceae*, *Sphaeriaceae*, *Perisporiaceae*, and *Onygeni*. It is now counted as one of the classes of the grand subdivision *Carposporae*, including non-chlorophyllaceous plants consisting of a mycelium upon which are developed antheridia and carpogonia, the latter of which, upon fertilization by the former, produce sporocarps containing asci in their interior. The asci are at first single cells, but later form sacs in which spores (ascospores) are produced by internal cell-formation. The a. include the groups (orders) *Perisporiaceae*, *Tuberaceae*, *Helvellaceae* (*Discomycetes*), *Pyrenomyces*, *Lichenes* (including the entire division of lichens), and probably the *Uredineae* and *Ustilagineae*. [B, 54, 75, 170.]

**ASCOMYZENTIDÆ** (Lat.), n. f. pl.  $A^2s(a^3s)\text{-}ko(ko^2)\text{-}mi^2z\text{-}(mu^2z)\text{-}e^2nt^2\text{-}i^2d\text{-}e(a^3e^2)$ . A family of copepods. [L, 204.]

**ASCONEMATIDÆ** (Lat.), n. f. pl.  $A^2s(a^3s)\text{-}ko^2n\text{-}e^2m\text{-}a^2t^2(a^3t^2)\text{-}i^2d\text{-}e(a^3e^2)$ . A family of the *Lyssacina* the dermal spicules of which are pinnuli. [L, 121.]

**ASCONEMEÆ** (Lat.), n. f. pl.  $A^2s(a^3s)\text{-}ko(ko^2)\text{-}ne^2m(nam^2)\text{-}e^2\text{-}e(a^3e^2)$ . From  $\alpha\sigma\kappa\acute{o}s$ , a pouch, and  $\nu\eta\mu\alpha$ , a thread. A division of hyphomycetous *Fungi* made by Kickx comprising those with spores developed in the interior of unicellular, claviform, ascomorphous filaments. [B, 121.]

**ASCONES** (Lat.), n. m. pl.  $A^2s(a^3s)\text{-}kon(ko^2n)\text{-}ez(as)$ . An order of calcareous sponges. [L, 173.]

**ASCONIDÆ** [Haeckel] (Lat.), n. f. pl.  $A^2s(a^3s)\text{-}ko^2n^i^2d\text{-}e(a^3e^2)$ . A family of the *Homocela* which are simple or composite, but never develop radial tubes. [L, 121.]

**ASCOPAREA** (Lat.), n. n. pl.  $A^2s(a^3s)\text{-}ko(ko^2)\text{-}pa(pa^3)\text{-}re^2\text{-}a^3$ . A family of tailed *Catarrhini* with cheek-pouches. [L, 173.]

**ASCOPHORA** (Lat.), n. f.  $A^2s(a^3s)\text{-}ko^2f^o^2r\text{-}a^3$ . From  $\alpha\sigma\kappa\acute{o}s$ , a pouch or bottle, and  $\phi\acute{o}\rho\epsilon\iota\nu$ , to bear. Tode's name for a genus of *Fungi* (*Zygosporae*) belonging to the *Mucorini*. It is in part equivalent to the *Mucedo* of Persoon. It differs from the related genus *Mucor* in that sporangia becomes at length flaccid, hanging over the top of their support like a bonnet. [B, 19.]—*A. elegans*. The bread-mold; a species more properly referred to *Mucor*, causing moldiness in bread, distinguished by the repeatedly forked division of its hyphae, each branch bearing a sporangium. It is found very rarely in the ear; first described in that situation by Schenk and von Tröltzsch. [F.]

**ASCOPHORÆ** (Lat.), n. f. pl.  $A^2s(a^3s)\text{-}ko^2f^o^2r\text{-}e(a^3e^2)$ . A cohort of *Fungi*, made by Ehrenberg, including *Aspergillus*, *Mucor*, and other genera in which the sporangium is borne upon an erect pedicel springing from the mycelium. [B, 121, 170.]

**ASCOPHORE**, n.  $A^2s\text{-}ko\text{-}for$ . From  $\alpha\sigma\kappa\acute{o}s$ , a pouch, and  $\phi\acute{o}\rho\epsilon\iota\nu$ , to bear. A branch of the hyphae in *Fungi*, bearing an ascus. [B.]

**ASCOPHOREI** (Lat.), n. m. pl.  $A^2s(a^3s)\text{-}ko(ko^2)\text{-}for(fo^2r)\text{-}e^2\text{-}i(e)$ . Fr., *ascophorées*. Of Lévillé, a section of *Fungi* belonging to the

*Columellei*, including *Ascophora*, *Mucor*, etc. [B, 170.] Cf. ASCOPHORE.

**ASCOPHORI** (Lat.), n. m. pl. A<sup>2</sup>s(a<sup>2</sup>s)-ko<sup>2</sup>f'o<sup>2</sup>r-i(e). Of Corda, a suborder of hymenomycetous *Fungi*, including the families *Pyrenaceae*, *Aggriaceae*, *Patellariaceae*, *Pezizeae*, *Geoglossaceae*, *Leotiaceae*, and *Helvellaceae*. [B, 170.]

**ASCOPHOROUS**, adj. A<sup>2</sup>s-ko<sup>2</sup>f'o<sup>2</sup>r-u<sup>2</sup>s. Lat., *ascophorus*, *ascophoreus*. Fr., *ascophore*. Ger., *schlauchtragend*. Bearing asc (said of hyphae). [B, 75.]

**ASCOPHYCÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)-ko(ko<sup>2</sup>)-fi(fu<sup>6</sup>)/se(ka<sup>3</sup>-e<sup>2</sup>). From *ἀσκός*, a pouch, and *φύκος*, sea-weed. Of Reichenbach, a formation of *Algae* comprising the families *Florideae*, *Fucoeidae*, and *Ceramiceae*. [B, 170.]

**ASCOPHYCÆÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)-ko(ko<sup>2</sup>)-fi<sup>2</sup>s(fu<sup>6</sup>k)<sup>2</sup>e<sup>2</sup>. e(a<sup>3</sup>-e<sup>2</sup>). From *ἀσκός*, a pouch, and *φύκος*, sea-weed. Fr., *ascophycées*. Ger., *Ascophyceen*. 1. Of Zanardini, an order of *Algae* (*Phycæ*), including the series *Gymnosporeæ*, *Angiosporeæ*, and *Gloiosporeæ*. 2. Of Rabenhorst, a suborder of *Algae*, including the families *Ceramiceae*, *Sphaerococcæ*, and *Phycæ*. Cf. ASCOPHYCÆ. [B, 170.]

**ASCOPSORÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)-ko<sup>2</sup>p-so<sup>2</sup>re(r<sup>3</sup>a<sup>3</sup>-e<sup>2</sup>). From *ἀσκός*, a pouch, and *σπόρα*, a seed. 1. Of Fries and others, a genus of *Fungi* belonging to the *Sphaeroneuræ*. [B, 170.] 2. Of some botanists, the spore-case of the *Nidulariæ*; of Vittadini, that of the *Tuber*. [B.]

**ASCORUM** (Lat.), n. n. A<sup>2</sup>s(a<sup>2</sup>s)/ko(ko<sup>2</sup>)-ru<sup>2</sup>m(ru<sup>4</sup>m). From *ἀσκός*, a pouch. Fr., *ascore*. Nees von Eisenbeck's name for that portion of the pleus of a fungus which incloses the asc. [L, 180.]

**ASCOS** (Lat.), n. m. A<sup>2</sup>s(a<sup>2</sup>s)/ko<sup>2</sup>s. Gr., *ἀσκός*. Fr., *asque*. Ger., *Schlauch*, *Sack*. 1. A bag or bottle anciently employed, filled with warm water or oil, for applying heat to a part. [Hippocrates (A, 325; L, 94).] 2. The abdomen, especially when distended by dropsy or pregnancy. [A, 322.]

**ASCOSPORA** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)-ko<sup>2</sup>s(po<sup>2</sup>po<sup>2</sup>)-ra<sup>3</sup>. From *ἀσκός*, a pouch, and *σπόρος*, a seed. 1. Of Fries and others, a genus of *Fungi* belonging to the *Sphaeroneuræ*. [B, 170.] 2. Of some botanists, the spore-case of the *Nidulariæ*; of Vittadini, that of the *Tuber*. [B.]

**ASCOSPORÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)-ko<sup>2</sup>s(po<sup>2</sup>po<sup>2</sup>)-re(r<sup>3</sup>a<sup>3</sup>-e<sup>2</sup>). See ASCOSPORÆÆ (1st def.).

**ASCOSPORE**, n. A<sup>2</sup>s/ko-spor. Fr., *ascospore*. Ger., *Schlauchspore*. Syn.: *sporidium*, *thecaspore*. A spore developed in an ascus, as in the *Ascomycetes*. [B.]

**ASCOSPOREÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)-ko(ko<sup>2</sup>)-spo(spo<sup>2</sup>)/re<sup>2</sup>. e(a<sup>3</sup>-e<sup>2</sup>). 1. Of Fries, a division of the *Phyllostictæ*. [B, 170.] 2. Of Cohn, an order of his class *Thallophyta*, including the families *Tuberaceae*, *Oogonaceae*, *Erysiphaceae*, *Sphaeriaceae* (*Pyrenomyces*), *Helvellaceae*, and *Lichenes*. It corresponds nearly to the *Ascomycetes*. [B, 75.]

**ASCOSPOREI** (Lat.), n. m. pl. A<sup>2</sup>s(a<sup>2</sup>s)-ko(ko<sup>2</sup>)-spo(spo<sup>2</sup>)/re<sup>2</sup>. i(e). Of Bonorden, a family of *Fungi* (*Cryptomycetes*), including *Ascospora* and other genera. [B, 170.]

**ASCOSPORIC**, **ASCOSPOROUS**, adj's. A<sup>2</sup>s-ko<sup>2</sup>s-po<sup>2</sup>r'i<sup>2</sup>2k, -ko<sup>2</sup>s-po<sup>2</sup>r-u<sup>2</sup>s. Lat., *ascosporus*, *ascosporous*. Fr., *ascospore*. Provided with or containing ascospores. [W. G. Farlow, "Arch. of Bot.", x, 1881, p. 324 (B); B, 77.]

**ASCOTRICHÆ** (Lat.), n. f. A<sup>2</sup>s(a<sup>2</sup>s)-ko<sup>2</sup>t'ri<sup>2</sup>k(ri<sup>2</sup>ch<sup>2</sup>)-a<sup>3</sup>. From *ἀσκός*, a pouch, and *τρίχis*, the hair. A genus of perisporiaceous *Fungi*, made by Berkeley. [B, 170.]—*A. chartarum* (Berkeley). One of the varieties of paper-mildew; a species with thin greenish-brown perithecia and numerous linear sporangia containing elliptical chocolate-colored spores. [B, 76.]

**ASCULA** (Lat.), n. f. A<sup>2</sup>s(a<sup>2</sup>s)/ku<sup>2</sup>(ku<sup>4</sup>)-la<sup>3</sup>. Dim. of *ascus* (q. v.). A term applied to the embryo of a sponge after it has become fixed and has lost its flagella, and is developing into the adult form. [B, 100.]

**ASCUS** (Lat.), n. m. A<sup>2</sup>s(a<sup>2</sup>s)/ku<sup>2</sup>s(ku<sup>4</sup>s). Gr., *ἀσκός* (see *Ascus*). Fr., *asque*. Ger., *Sporenschlauch*. In the *Ascomycetes*, a cell or pouch developed as the result of the fertilization of the carpogonium and containing the spores. [B, 54, 75.] See figure under *ASCOBOLUS*.—*A. sulfurolorius* [Corda]. Ger., *Stüttschlauch*. See *STERIGMA*.

**ASCYMÈNE** (Fr.), n. A<sup>2</sup>s-si<sup>2</sup>m-e<sup>2</sup>n. See ASCO-HYMENTUM.

**ASCYPHOUS**, adj. A<sup>2</sup>s/si<sup>2</sup>f-u<sup>2</sup>s. Gr., *ἀσχυφος* (from *a* priv., and *σχύφος*, a cup). Lat., *ascyphos*, *ascyphus*. Fr., *ascyphe*. Ger., *becherlos*. 1. Headless (said formerly of monsters). [A, 322.] 2. Not terminating in a funnel-shaped dilatation (*scyphus*); said of the podetium of lichens. [B, 198.]

**ASCYRÆ** [Reichenbach], **ASCYRINEÆ** [Spach] (Lat.), n's f. pl. A<sup>2</sup>s(a<sup>2</sup>s)-si<sup>2</sup>r(ku<sup>6</sup>r)/e<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>), -si<sup>2</sup>r(ku<sup>6</sup>r)-i<sup>2</sup>n'e<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). Fr., *ascyrées*, *ascyrinees*. A division of plants belonging to *Hypericæ*, including *Ascyrum* [Spach] or *Ascyrum*, *Androsæmum*, *Hypericum*, and related genera [Reichenbach]. [B, 170.]

**ASCYROIDEÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)-si<sup>2</sup>r(ku<sup>6</sup>r)-o(o<sup>2</sup>)-i<sup>2</sup>d'e<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). Fr., *ascyroïdées*. Of Necker, an order of plants including *Cistus* and *Hypericum*. [B, 170.]

**ASCYROIDES** (Lat.), n. n. A<sup>2</sup>s(a<sup>2</sup>s)-si<sup>2</sup>r(ku<sup>6</sup>r)-o(o<sup>2</sup>)-i(e)/dez(das). Gr., *ἀσχροειδής* [Dioscorides]. An ancient name of a plant resembling the *Ascyrum*. [Pliny (A, 318).]

**ASCYRON**, **ASCYRUM** (Lat.), n's n. A<sup>2</sup>s(a<sup>2</sup>s)/si<sup>2</sup>r(ku<sup>6</sup>r)-o<sup>2</sup>n, -u<sup>2</sup>m(u<sup>4</sup>m). Gr., *ἀσχυρον*. Fr., *ascyre*. Ger., *Hartheu*. St. John's-wort, St. Peter's-wort; a genus of hypericaceous plants, made by Linnaeus, characterized by the tetramerous division of the calyx and corolla. [A, 318; B, 34.]—*A. crux Andree*. Ger., *Andreas-kraut*, *Andreaskreuz*. St. Andrew's-cross, a species growing along the Atlantic coast of the United States, with stalk from 1 to 2 feet

in height, bearing many suberect branches with linear-oblong obtuse leaves and bracteolate flowers; used for the same purposes as *Hypericum perforatum*. [A, 247; B, 34; L.]—*A. hypericoides* [Linnaeus], *A. stans* [Michaux]. A species from 1 to 3 feet in height with erect branches and oblong sessile leaves, growing on the Atlantic coast of the United States. From the leaves an astrigent decoction is prepared, and the seeds are said to be purgative. [B, 34, 173.]

**ASEDENIGI**, n. See ASEDENIGI.

**ASE** (Lat.), n. f. A<sup>2</sup>(a<sup>3</sup>)/se(sa). Gr., *ἀση* (from *ἀν*, or *ἀνα*, to hurt, or to satiate). Pain or a sense of oppression in the region of the heart or the stomach, or a general feeling of discomfort, due to repletion of the stomach. [A, 325.]

**ASEB**, n. An alchemical name for alum. [Ruland, Johnson (A, 325).]

**ASED**, n. From Ar., *asad*, a lion. An alchemical name for gold. [B, 52.]

**ASEDENIGI**, n. An alchemical name for the blood-stone (lapis hæmatites). [Ruland, Johnson (A, 325).]

**ASEF** (Ar.). n. An old name for some vesicular affection of the skin (perhaps hidra, sudamina, or pemphigus). [A, 322; L, 84, 94; M, 56.]

**ASEFÉTIDE** (Fr.), n. A<sup>2</sup>s-fa-ted. See ASAFETIDA.

**ASEGEN**, **ASEGON**, n's. Alchemical names for dragon's-blood. [Ruland, Johnson (A, 325); L, 94.]

**ASELGOTRIPSIA**, **ASELGOTRIPSIS** (Lat.), n's f. A<sup>2</sup>s-(a<sup>3</sup>)-e<sup>2</sup>l-go(go<sup>2</sup>)-tri<sup>2</sup>p/si<sup>2</sup>-a<sup>3</sup>, -si<sup>2</sup>s. Gen., *aselgotrip/siæ*, -trip/seos (-sis). From *ἀσέλγος*, lascivious, and *τρίψis*, friction. Fr., *aselgotripsie*. See THIBADISMUS.

**ASELLATION**, n. A<sup>2</sup>s-e<sup>2</sup>l-la'shu<sup>2</sup>n. From *asellus*, an ass. Riding on an ass, prescribed as a remedial measure. [L, 41.]

**ASELLI** (Lat.), n. m. pl. A<sup>2</sup>s(a<sup>2</sup>s)-e<sup>2</sup>l/li(e). Ger., *Asseln*. A name formerly applied to various *Crustacea* belonging to the *Isopoda* (*Armadillo*, *Armadillidium*) and other animals of similar appearance comprising the pharmaceutical group of *Millepedes* (q. v.). [B, 180.]

**ASELLIDÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)-e<sup>2</sup>l/li<sup>2</sup>d-e(a<sup>3</sup>-e<sup>2</sup>). Fr., *asellides*. Ger., *Wasserasseln*. A family of crustaceans having the *Asellus* as a type. [Lamarck (L, 110).]

**ASELLOTA** (Lat.), n. n. pl. A<sup>2</sup>s(a<sup>2</sup>s)-e<sup>2</sup>l-lo<sup>2</sup>ta<sup>3</sup>. Fr., *asellotes*. See ASELLIDÆ.

**ASELUS** (Lat.), n. m. A<sup>2</sup>s(a<sup>2</sup>s)-e<sup>2</sup>l/lu<sup>2</sup>s(lu<sup>4</sup>s). Fr., *aselle*. 1. An ass. [A, 325.] 2. A genus of cursorial isopods of the subclass *Malacostraca*, class *Crustacea*. [A, 359.] 3. An old name for the cod-fish. [A, 306.]—*A. major* [Schoner]. See *GADUS morhua*.—*A. niger* [Willoughby]. See *GADUS carbonarius*.—*A. secundus* [Gessner]. See *GADUS merlangus*.—*A. striatus* (vel *varius*) [Willoughby]. See *GADUS callarias*.—*Oleum jecoris aselli*, *Oleum jecoris aselli* [Ger. Ph.]. Cod-liver oil. [B.]

**ASELOURI**, n. The *Atriplex halimus*. [Dioscorides, Bory (B, 121).]

**ASEMA** (Lat.), n. f. of adj. *asemos* (*crisis* understood). A<sup>2</sup>s-(a<sup>3</sup>)-e(a<sup>3</sup>)/ma<sup>3</sup>. An unexpected crisis, or one that occurs without the usual signs. [A, 322.]

**ASEMA** (Lat.), n. n. pl. of adj. *asemos*. A<sup>2</sup>s(a<sup>2</sup>s)-e(a<sup>3</sup>)/ma<sup>3</sup>. Irregular, deceptive, or untimely morbid phenomena. [M, 13.]

**ASEMASIA** (Lat.), n. f. A<sup>2</sup>s(a<sup>2</sup>s)-e<sup>2</sup>m-a(a<sup>3</sup>)/zi<sup>2</sup>(si<sup>2</sup>)-a<sup>3</sup>. See ASEMA.

**ASEMIA** (Lat.), n. f. A<sup>2</sup>s(a<sup>2</sup>s)-e(a<sup>3</sup>)/mi<sup>2</sup>-a<sup>3</sup>. From *ἀσμία*, unintelligible. Fr., *asémie*. Ger., *Asemie*. A general term suggested by Steinthal, indicating an inability to comprehend signs or tokens as well as articulate speech. [D, 53.]—*A. expressiva*. A. of expression, including aphasia, agaphia, amimia, and their subdivisions. [D, 18.]—*A. graphica*. See *AGRAPHIA*.—*A. mimica*. See *AMIMIA*.—*A. perceptiva*. A. of perception, including alexia, paralexia, anakroasia, and paranakroasia. [D, 18.]—*A. spuria*. See *PARASEMIA*.—*A. verbalis*. See *APHASIA*.

**ASEMOS** (Lat.), adj. A<sup>2</sup>s(a<sup>2</sup>s)-e(a<sup>3</sup>)/mo<sup>2</sup>s. Gr., *ἀσμος* (from *a* priv., and *σμός*, a sign). Taking place without notable signs or symptoms. [A, 322.]

**ASEMOSPERMÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)-e<sup>2</sup>m(am)-o(o<sup>2</sup>)-spu<sup>4</sup>rm(spe<sup>2</sup>rm)/e<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). From *a* priv., *σμός*, sign, and *σπέρμα*, seed. Fr., *asémospérmées*. Kützing's name for a division of *Algae* belonging to the suborder *Tiloblastæ* (section *Glaucisiphææ*), including the *Oscillariæ* and *Leptotrichæ*. [B, 197.]

**ASEMUS** (Lat.), adj. A<sup>2</sup>s(a<sup>2</sup>s)-e(a<sup>3</sup>)/mu<sup>2</sup>s(mu<sup>4</sup>s). See ASEMOS.

**ASEPH**, n. See ASEB.

**ASEPSIS** (Lat.), n. f. A<sup>2</sup>s(a<sup>2</sup>s)-e<sup>2</sup>p(ap)/si<sup>2</sup>s. Gen., *asep/seos* (-sis). From *a* priv., and *σῆψis*, putrefaction. Fr., *asepsie*, *Asepsie*. Freedom from putrefaction or from its effects. [A, 385.]

**ASEPTA** (Lat.), n. n. pl. A<sup>2</sup>s(a<sup>2</sup>s)-e<sup>2</sup>p(ap)/ta<sup>3</sup>. 1. Substances not liable to putrefaction. [Hippocrates (A, 311).] 2. Undigested food. [Hippocrates (A, 311).]

**ASEPTIC**, adj. A<sup>2</sup>s-e<sup>2</sup>p/ti<sup>2</sup>k. Gr., *ἀσηπτος* (from *a* priv., and *σῆψis*, to rot). Fr., *aseptique*. Ger., *aseptisch*. Lat., *aseptus*, *aseptus*. Free from putrefaction and from its causes. [A, 385.]

**ASEPTICISM**, n. A<sup>2</sup>s-e<sup>2</sup>p/ti<sup>2</sup>-si<sup>2</sup>zm. The practice of surgery or obstetrics with strict regard to the prevention of sepsis.

**ASEPTICITY**, n. A<sup>2</sup>s-e<sup>2</sup>p-ti<sup>2</sup>s/ti<sup>2</sup>-i<sup>2</sup>. The state of being aseptic. [B.]

**ASEPTOL**, n. A<sup>2</sup>s-e<sup>2</sup>p/to<sup>2</sup>l. A brown, syrupy, aromatic liquid, C<sub>6</sub>(H<sub>5</sub>), H<sub>2</sub>O, H<sub>2</sub>SO<sub>4</sub> = C<sub>6</sub>H<sub>5</sub>.OH.SO<sub>2</sub>.OH = C<sub>6</sub>H<sub>5</sub>SO<sub>3</sub>H, having an odor of carbolic acid and the chemical constitution of sulpho-

carbolic (orthophenolsulphonic) acid, soluble in 10 parts of water; recommended as an antiseptic application. [Anneessens, "Jour. de pharm. d'Anvers"; "Revist. de Med. y Cirug. Práct.," July 22, 1884, p. 74 (B); Transer, "France méd.," "N. Y. Med. Jour.," Jan. 10, 1885, p. 56; Merck, "Dtsch. Med.-Ztg.," Feb. 11, 1886, p. 137.]

**ASEPTOS, ASEPTUS** (Lat.), adj's.  $A^2s(a^3s)-e^2p(ap)/to^2s, -tu^2s$  (tu's). See ASEPTIC.

**ASEROE** (Lat.), n. f.  $A^2s(a^3s)-e^2r'o(o^2)-e(a)$ . A genus of gasteromycetous *Fungi* belonging to the *Phalloidei*, distinguished by the bifid processes radiating from the receptacle. When fresh, these organisms have a very foetid odor.

THE RECEPTACLE OF AN ASEROE. (FROM DE BARY, AFTER BERKELEY. [B, 54].)

THE RECEPTACLE OF AN ASEROPHALLUS. (FROM DE BARY, AFTER MONTAGNE AND LEPIEUR [B, 54].)

**ASEROPHALLUS** (Lat.), n. m.  $A^2s(a^3s)-e^2r-o-fa^2l(fa^3l)/lu^2s$  (lu's). A genus of gasteromycetous *Fungi* belonging to the *Phalloidei*, characterized by the long cylindrical pedicel bearing the receptacle and terminating at its apex in 4 arms which embrace the gleba. [B, 54.]

**ASEROS** (Lat.), adj.  $A^2s(a^3s)-e(a)/ro^2s$ . Gr., *ἀσρός* (from *ἀσρῆ* [see ASE]). Causing nausea, irksome. [Hippocrates (A, 311).]

**ASEROSMEI** (Lat.), n. m. pl.  $A^2s(a^3s)-e^2r-o^2s-me^2-i(e)$ . Fr., *aserosmées*. Of Lévillé, a tribe of *Fungi* belonging to the *Ectobasides*, including the sections *Phalloidei*, *Clathracei*, and *Lysurei*. [B, 170.]

**ASETIGEROUS**, adj.  $A^2s-e^2t-i^2-j^2-e^2r-u^2s$ . Lat., *asetiger* (from a priv., *seta* [=seta], a bristle, and *gerere*, to bear). Destitute of bristles. [L, 116.]

**ASEXUAL**, adj.  $A^2s-e^2x'u^2-a^2l$ . Lat., *asexual* (from a priv., and *sexus*, sex). Fr., *asexe*, *asexué*, *asexuel*. Ger., *geschlechtlos*. It., *asessuale*. Sp., *asexual*. Non-sexual; in botany, having no organs of reproduction (said formerly of the cryptogams); in botany and zoology, effected without sexual congress (said of reproduction). [B, 19, 28, 75.]

**ASFE**, n. Of Dioscorides, the *Atriplex balinus*. [Bory (B, 121).]

**ASFIDAJ** (Ar.), n. Carbonate of lead. [L, 77, 105.]

**ASFOS**, n. An Egyptian name for the *Ballota foetida*. [B, 121.]

**ASFRAK**, n. Syn.: *trayamana*. An East Indian name for a drug consisting of the flowers, flower-stalks, and the unripe fruit of an unknown plant, probably a species of *Delphinium*. It is of light yellowish-green color and has an odor somewhat resembling that of honey. It is used to make a yellow dye, and is also employed as a detergent, anodyne, and diuretic. ["Proc. of the Am. Pharm. Assoc.," xxvi, p. 161 (B).]

**ASGANDA** [Hind.], n. The *Adhatoda vasica*. [B, 172.]

**ASGANDH** (Hind.), n. The *Physalis somnifera*. [B, 181.]

**ASGUND**, n. See ASGANDEH.

**ASH**, n.  $A^2sh$ . A.-S., *asca* (1st def.), *æsc* (2d def.). Gr., *κόνις* (1st def.), *κίνη* (1st def.), *φραξίνος* (2d def.). Fr., *cendre* (1st def.), *frêne* [Fr. Cod.] (2d def.). Ger., *Asche* (1st def.), *Esche* (2d def.). It., *cenere* (1st def.), *frassino* (2d def.). Sp., *ceniza* (1st def.), *fresno* (2d def.). 1. The incombustible residue left after a substance has been burned with free access of air. [B, 2.] 2. The common name of a number of trees of the genus *Fraxinus* (q. v.). [B.]—**AMERICAN MOUNTAIN-A.** The *Sorbus* (*Pyrus*) *americana*. [B.]—**ANTIMONY A.** See under ANTIMONY.—**A. bath.** See under BATH.—**A. maple.** See NEGUNDO.—**A. weed.** See *Ægopodium podagraria*.—**Bitter a.** 1. The Quassia-tree. [B, 2.] 2. The *Byltera febrifuga*. [B.]—**Black a.** 1. See *British BARK*. 2. The *Fraxinus sambucifolia*. [B, 75.]—**Black mountain-a.** The *Eucalyptus leucocylon*. [B, 19.]—**Blue a.** The *Fraxinus quadrangu-*

*lata*. [B, 34.]—**Bone-a.** The residue left after burning bone. [B.]—**Calabrian a.** The *Fraxinus rotundifolia*. [L.]—**Cape a.** The *Ekebergia capensis*. [B, 19.]—**Common a.** The *Fraxinus excelsior*.—**Copper-a'es.** The scales cast off from copper in the process of forging. [B.]—**European a.** The *Fraxinus excelsior*. [B, 34.]—**European mountain-a.** The *Sorbus* (*Pyrus*) *aucuparia*. [B.]—**Flowering a.** The *Fraxinus ornus*. [L.]—**Fluid extract of prickly a.** See *Extractum xanthoxyl fluidum*.—**Green a.** The *Fraxinus viridis*. [B, 34.]—**Hoop a.** The *Celtis crassifolia*. [B, 19.]—**Manna a.** The *Fraxinus ornus*. [L.]—**Mountain-a.** See *Pyrus aucuparia*, *Sorbus americana*, and *PANAX dendroides*.—**Pearl-a.** See PEARLASH.—**Poison a.** The *Rhus venenatum*. [B, 19.]—**Prickly a.** Properly, the *Xanthoxylum fraxineum*, but also applied to the *Aralia spinosa*. [B, 5.]—**Red a.** The *Fraxinus pubescens*. [B, 19.]—**Rim a.** The *Celtis occidentalis*. [B, 19.]—**Small-leaved flowering a.** The *Fraxinus ornus*. [L.]—**Soda-a.** See under SODA.—**Volcanic a.** The pulverulent portion of the matter thrown out by volcanoes. [B, 2.]—**Water a.** The *Fraxinus sambucifolia*. [B, 34.]—**White a.** The *Fraxinus americana*. [B, 5.]

**ASHBY-DE-LA ZOUCHE**, n.  $A^2sh'bi^2-d'-la^3-zush''$ . A town in Leicestershire, England, where there is a spring containing sodium chloride and bromide, calcium chloride, etc., employed in rheumatic and scrofulous affections. [A, 316; L, 49, 57.]

**ASHEK** (Ar.), n. Gum ammoniacum. [L, 77.]

**ASHEN KEYS**, n. pl.  $A^2sh'e^2n-kez$ . The seed-vessels of the ash-tree. [L, 73.]

**ASHEVILLE**, n.  $A^2sh'vi^2l$ . A town in the centre of the mountainous region of western North Carolina, recommended as a residence for consumptives. [T. M. Lloyd, "N. Y. Med. Jour.," April 9, 1887, p. 399.]

**ASHNEH**, n. A name given in India to the *Parmelia kamtchadalensis*. [B, 121.]

**ASHOCA**, n. The *Jonesia asoca*. [L, 73.] See ASOCA and ASOK.

**ASHOO-KUCHOO** (Bengal.), n. The *Colocasia antiquorum*. [B, 172.]

**ASHTAD**, n.  $A^2sh'te^2d$ . A place in England, near Epsom, where there is a saline spring. [B, 277.]

**ASHUVA** (Sansk.), n. See ASHWA.

**ASHVAGANDSHA**, n. See ASVAGANDHÁ.

**ASHWA** (Sansk.). **ASHWADA-GUNDA** (Bengal.), n's. The *Withania somnifera*. [B, 172.]

**ASHWERTHA** (Bengal.), **ASHWUTH** (Hind.), n's. The *Ficus religiosa*. [A, 316; B, 172.]

**ASIA** (Lat.), n. f.  $A(a^3)/sha^3(si^2-a^3)$ . Gr., *Ἀσία*. An ancient name for a variety of rye. [Pliny (A, 318).]

**ASIALIA**, **ASIALOCHIA** (Lat.), n's f.  $A^2s(a^3s)-i^2-a^2l(a^3l)/i^2-a^3, -a^2l(a^3l)-ok(o^2ch^2)/i^2-a^3$ . From a priv., and *σάλον*, saliva; or *σάλον*, and *χέειν*, to stream. Fr., *asialie*. Ger., *Speichelmangel*. Failure or deficiency of the salivary secretion. [M, 13.]

**ASIALOCHOOS** (Lat.), adj.  $A^2s(a^3s)-i^2-a^2l(a^3l)-o^2k(o^2ch^2)/o(o^2)-o^2s$ . Affected with asialia. [A, 322.]

**ASIALORRHŒA** (Lat.), n. f.  $A^2s(a^3s)-i^2(a^3)-a^2l(a^3l)-o^2r-re'(ro^2e^2)-a^3$ . From a priv., *σάλον*, saliva, and *ρεῖν*, to flow. Fr., *asialorrhée* [Piorry]. See ASIALIA.

**ASIENAWURZEL** (Ger.), n.  $A^2zen/a^3-vurtz-e^2l$ . The rhizome of gentian. [B, 270.]

**ASIGI**, n. See AZAGOR.

**ASIGRUM** (Lat.), n. n.  $A^2s(a^3s)-i^2g'ru^2m$  (ru'm). Of C. Bauhin, the *Hypericum montanum*. [B, 121.]

**ASILE** (Fr.), n.  $A^2s-el$ . See ASYLUM.—**A. d'aliénés.** A lunatic asylum. [A, 385.]—**A. de convalescents.** A home for convalescents. [A, 385.]

**ASILIDÆ** (Lat.), n. f. pl.  $A^2s(a^3s)-i^2l/i^2d-e(a^3-e^2)$ . Fr., *asilidées*. A family of dipterous insects, including the genus *Asilus*. [A, 385; L, 73.]

**ASILIFORMIS** (Lat.), adj.  $A^2s(a^3s)-i^2l-i^2fo^2rm/i^2s$ . From *Asilus* (q. v.), and *forma*, form. Fr., *asiliforme*. Resembling an *Asilus*. [L, 180.]

**ASILUS** (Lat.), n. m.  $A^2s(a^3s)-(e^2)-lu^2s$  (lu's). Fr., *asile*. A genus of flies. [L, 26.]—**A. crabroniformis.** A species which attacks man and the lower animals, inflicting wounds from which considerable blood flows. [L, 26.]

**ASIMEN**, n. A Madagascar name for the *Volkameria*. [B, 121.]

**ASIMIA** (Lat.), n. f.  $A^2s(a^3s)-i^2m'$  (i^2-a^3). See ASIMINA.

**ASIMINA** (Lat.), n. f.  $A^2s(a^3s)-i^2m(me)/na^3$ . Fr., *asimine* (1st def.), *asiminier* (2d def.). 1. Of Desvauz, a fruit, such as that of the *Anona*, formed by the union of several fleshy fruits. [B, 198; L,

THE FLOWERING BRANCH AND MATURE LEAF OF ASIMINA TRILOBATA, 1/2 SIZE. (AFTER J. U. AND C. G. LLOYD.)

41.] 2. A genus of ananaceous trees or shrubs, made by Adanson, much resembling the genus *Anona*, with which it was formerly united. [B, 19, 34.]—*A. triloba* [Dunal]. Fr. *asiminier*, *monin*. Syn.: *Anona triloba* [Linnaeus], *Orchidocarpum arietinum* [Michaux], *Porcelia triloba* [Persoon], *Uvaria triloba* [Torrey, Gray]. The North American papaw, or custard-apple (to be distinguished from the true papaw of tropical America [*Carica papaya*]); a shrub or small tree common in the Ohio Valley, rare in western New York and central and eastern Pennsylvania, and thence south to Florida and west to Kansas. The ripe fruit, somewhat resembling the banana, is edible; the green fruit and all parts of the plant contain a volatile oil of a disagreeable odor; the seeds contain a characteristic alkaloid, *asiminine*. [J. U. and C. G. Lloyd, "Drugs and Med. of N. Am.," Sept., 1886, p. 49.]

**ASIMININE**, n.  $A^2s \cdot i^2m \cdot i^2n \cdot en$ . An alkaloid obtained by J. U. and C. G. Lloyd from the seeds of *Asimina triloba*; colorless, tasteless, and practically insoluble in water, but freely soluble in alcohol and in ether, and less readily in chloroform and in benzol. The hydrochloride tastes sweetish at first, but leaves a bitter after-taste. R. Bartholow, who experimented with it in the form of a 1-to-60 solution of the hydrochloride, found that, in frogs, it produced a primary stage of excitement and exaggerated sensibility to certain tactile impressions, followed by narcosis. ["Drugs and Med. of N. Am.," Sept., 1886, p. 49.]

**ASINA**, n. A Russian name for the *Populus alba*. [B, 121.]

**ASINALUNGA** (It.), n.  $A^3 \cdot se \cdot na^3 \cdot lun \cdot ga^3$ . A place in Italy, where there is an alkaline chalybeate spring. [A, 316.]

**ASINES** (Lat.), adj.  $A^2s(a^3s) \cdot i^2n \cdot ez(as)$ . Gr., *ἀσινής* (from *a priv.*, and *σίνεσθαι*, to hurt). 1. Uninjured. [A, 322.] 2. Innocuous. [A, 322.]

**ASINGAR**, n. See AZAGOR.

**ASININUS** (Lat.), adj.  $A^2s(a^3s) \cdot i^2n \cdot l(e) \cdot nu^3s(nu^4s)$ . Fr., *asine*. Asinine, pertaining to an ass. [A, 312.]—*Lac asininum*. See *ASS'S MILK*.—*Lac asininum artificiale*. See *MOCK ASS'S MILK*.

**ASINUS** (Lat.), n. m.  $A^2s(a^3s) \cdot i^2n \cdot u^3s(u^4s)$ . Gr., *ἄνος*. Fr., *âne*. Ger., *Esel*. It., *asino*. Sp., *asno*, *burro*. 1. The ass. 2. A genus of the family *Equidae*, comprising the asses and zebras. [A, 359.] 3. See *ASIRACUS*.

**ASINUSCA** (Lat.), n. f.  $A^2s(a^3s) \cdot i^2n \cdot u^3s(us) \cdot ka^3$ . An ancient name for a sort of wild vine. [Pliny (A, 318).]

**ASIPHONATE**, adj.  $A^2s \cdot i^2f \cdot o^2n \cdot at$ . From *a priv.*, and *σφών*, a tube. Having no respiratory siphon (said of certain *Mollusca*). [B, 28.]

**ASIPHONIA** [Griffith] (Lat.), n. f. sing. and n. pl.  $A^2s(a^3s) \cdot i^2f \cdot o^2ni^2 \cdot a^3$ . See *BRAGANTIA* and *ASIPHONIATA*.

**ASIPHONIATA**, **ASIPHONIDA**, **ASIPHONIDÆ** (Lat.), n. s. n. pl., n. pl., and f. pl.  $A^2s(a^3s) \cdot i^2f \cdot o \cdot ni^2 \cdot a^3 \cdot a^3 \cdot ta^3$ ,  $i^2f \cdot o^2n(i^2n) \cdot i^2d \cdot a^3$ ,  $o^2n(i^2n) \cdot i^2d \cdot e(a^3 \cdot e^2)$ . A section of lamellibranchiate molluscs characterized by the absence of respiratory siphons, by the mantle lobes being free or united at only one point, which divides the branchial from the exhalant chamber, and by the pallial line being simple and not indented. [L, 147.]

**ASIRACOSTUM**, n. See *SIRACOSTUM*.

**ASIRACUS** (Lat.), n. m.  $A^2s(a^3s) \cdot i^2r \cdot a^3 \cdot ku^3s(ku^4s)$ . Gr., *ἀσिरακος*. Fr., *asiracque*. An ancient name for a kind of wingless locust esteemed a remedy for the bite of the scorpion. [A, 325; L, 94.]

**ASITIA** (Lat.), n. f.  $A^2s(a^3s) \cdot i^2r \cdot shi^2(tu^2) \cdot a^3$ . Gr., *ἀσitia* (from *a priv.*, and *σιτος*, food). Fr., *astie*. Ger., *Asitie*. It., *asizia*. 1. Lack of food. [A, 311.] 2. Fasting. [I, 43.] 3. Loss of appetite. [M, 13.]

**ASIUS** (Lat.), adj.  $A^2s(a^3s) \cdot i^2 \cdot u^3s(u^4s)$ . See *ASSIUS*.

**ASJAGAN**, **ASJOGAM**, n. s. East Indian names for the *Jonesia pinnata*. [A, 385.] Cf. *ASOX*.

**ASKELIA** (Lat.), n. f.  $A^2s(a^3s) \cdot ke^2l \cdot i^2 \cdot a^3$ . From *ἀσκέλης* (from *a priv.*, and *σκέλος*, the lower limb). Fr., *askélie*, *ascélie*. Lack of development of the legs or thighs. [A, 385.]

**ASKER**, n.  $A^2sk \cdot u^3r$ . See *ESCHAR*.

**ASKERN**, n.  $A^2sk \cdot u^3rn$ . A village near Doncaster, England, where there is an alkaline sulphurous spring. [L, 57.]

**ASKIDA** (Lat.), n. f.  $A^2s(a^3s) \cdot ki(ke) \cdot da^3$ . A name applied by Dioscorides to the *Veratrum album*. [Bory (L, 87).]

**ASKOE**, n. A Norwegian island, where there is a hot spring. [A, 305.]

**ASKOGON** (Ger.), n.  $A^2s \cdot ko \cdot gon'$ . See *ASCOGONIUM*.

**ASKOKAN**, n. An African name for the *Pastinaca oleracea*. [L, 105.]

**ASKOLAME** (Ar.), n. The *Asphodelus ramosus*. [L, 105.]

**ASKOLIN**, n.  $A^2s \cdot ko^2l \cdot i^2n$ . Glycerin supersaturated with sulphurous acid. [Hager (B, 270).]

**ASKOMYCETEN** (Ger.), n. pl.  $A^2s \cdot ko \cdot mu^4 \cdot tzat \cdot e^2n$ . See *ASCOMYCETES*.

**ASKOSAIRE** (Fr.), n.  $A^2s \cdot ko \cdot sa^3r$ . From *ἀσκόρ*, a pouch. See *TETRACHÆNIUM*.

**ASKOSIS** (Lat.), n. f.  $A^2s(a^3s) \cdot ko \cdot si^3s$ . Gen., *asko'seos* (-sis). Fr., *askose*. A name formerly applied to that variety of achæniolum found in the *Cyperaceæ* and in some *Polygonaceæ* and *Chenopodiaceæ*. [B, 121.]

**ASMAGA**, n. An alchemical term for an admixture of certain metals in turn. [Ruland, Johnson (A, 325).]

**ASMAN JUNIE** (Ar.), n. Florentine iris. [L, 77.] Cf. *ASMENIS*.

**ASMEGMATIA** (Lat.), n. f.  $A^2s(a^3s) \cdot me^2g(mag) \cdot ma(ma) \cdot shi^2(tu^2) \cdot a^3$ . From *a priv.*, and *σμήγμα* (see *SMEGMA*). A deficiency of smegma. [L, 50.]

**ASMENIS** (Ar.), n. The *Iris germanica*. [L, 105.]

**ASMIAR** (Ar.), n. An alchemical name for verdigris. [Ruland, Johnson (L, 116).]

**ASMOGA**, n. See *ASMAGA*.

**ASMONICH**, n. A Peruvian name for the *Cinchona rosea* [Ruiz and Pavón] (*Lasionema rosea* [Don]). [B, 121; L, 49.]

**ASNELLE-LA-BELLE-PLAGE** (Fr.), n.  $A^3s \cdot ne^2l \cdot la^3 \cdot be^2l \cdot pla^3zh$ . A sea-bathing station in the department of Calvados, France. [L, 57.]

**ASOCA**, n. The *Jonesia a*. [L, 73.] See *ASOK*.

**ASODES** (Lat.), adj.  $A^2s(a^3s) \cdot o \cdot dez(das)$ . Gr., *ἀσώδης* (from *ἄσῃ*, nausea, and *εἶδος*, resemblance). Fr., *asode*. Ger., *asodisch*, *voll Ekel*, *höchst unbehaglich*. Affected with or characterized by restlessness, nausea, and a feeling of anxiety; as a n. (*febris* understood; Ger., *Angstfieber*), an old term for a form of fever characterized by such symptoms. [A, 322, 385.]

**ASOK**, n. An East Indian name for the *Jonesia asoca*. [E. J. Waring, "Indian Med. Gaz.," Aug., 1885, p. 200.]

**ASONATOU**, n. See *ASOATOU*.

**ASPIDÆ** (Lat.), n. f. pl.  $A^2s(a^3s) \cdot o \cdot p \cdot i^2d \cdot e(a^3 \cdot e^2)$ . A family of the suborder *Hemiptera* of the *Hemiptera*. [L, 121.]

**ASOPOR**, n. An alchemical name for soot. [Ruland, Johnson (A, 325).]

**ASOUATOU**, n. An East Indian name for the *Ficus indica*. [B, 121.]

**ASP**, n.  $A^2sp$ . Gr., *ἄσπις*. Lat., *aspis*. Fr., *aspic*. Ger., *Natter* (2d def.). *Ötzer* (2d def.). 1. The Egyptian cobra (*Naja haie*). [A, 311, 385.] 2. The common viper (*Vipera aspic* [Latreille]). [A, 385.]

**ASPALASOMA** (Lat.), n. n.  $A^2s(a^3s) \cdot pa^2l(pa^3l) \cdot a^3 \cdot so \cdot ma^3$ . Gen., *aspalasom'atos* (-tis). From *ἀσπάλαξ*, the mole, and *σώμα*, the body. Fr., *aspalasome*. A monstrosity characterized by an evagination at the lower part of the body, so that the rectum, the urethra, and the genital apparatus open by three distinct orifices, as in the moles. [Geoffroy St.-Hilaire (L, 49).]

**ASPALATH** (Fr., Ger.), n.  $A^2s \cdot pa^3 \cdot la^3t$ ,  $la^3t'$ . See *ASPALATHUS*.—*A'holz* (Ger.), *Bois d'a*. (Fr.). See *ALOES-WOOD* (2d def.) and *Lignum ASPALATHI*.

**ASPALATHOIDES** (Lat.), adj.  $A^2s(a^3s) \cdot pa^2l(pa^3l) \cdot la^3th(la^3th) \cdot o \cdot (e) \cdot dez(das)$ . Fr., *aspalathoïde*. Resembling the *Aspalathus*; as *Indigopera a*. [B; L, 41.]

**ASPALATHUS** (Lat.), n. m. and f.  $A^2s(a^3s) \cdot pa^2l(pa^3l) \cdot a^3 \cdot thu^3s(thu^4s)$ . Gr., *ἀσπάλαθος*. Fr., *aspalath*, *aspalathe*. Ger., *Aspalath*. 1. A prickly shrub, yielding a fragrant oil, mentioned by Theophrastus, Pliny, Celsus, and other ancient writers. 2. A genus of leguminous trees or shrubs belonging to the suborder *Papilionaceæ*, established by Linnaeus, having ternately arranged, sometimes caespitose leaves and flowers in terminal racemes or spikes. 3. A name given to various leguminous plants, as the *Cytisus* and *Ulex*. [A, 311; B, 19, 45, 121.]—*A. ebenus* [Linnaeus]. Syn.: *Amerimum ebenus* [Swartz], *Heterocarpus buxifolius* [Murray] (see *ebenus* [Persoon], see *glaber* [Reichenbach]). A South American tree, the wood of which takes a high polish and is used in cabinet-making. [B, 173.]—*A. indica* [Linnaeus]. See *INDICOFEA uniflora* and *L. aspalathoides*.—*Lignum aspalathi*. Fr., *bois d'aspalath*. A fragrant wood derived, according to some, from the *A. ebenus* [B, 93], but, according to others, from the *Aquilaria malaccensis*. [B.] See *ALOES-WOOD* (2d def.) and *Bois de Rhodes*.

**ASPALTUM** (Lat.), n. n.  $A^2s(a^3s) \cdot pa^2l(ta^3l) \cdot u^3m(u^4m)$ . See *ASPHALTUM*.

**ASPARACTICUS** (Lat.), adj.  $A^2s(a^3s) \cdot pa^3 \cdot ra^2k(rak^3) \cdot ti^2k \cdot u^3s(u^4s)$ . Pertaining to or derived from *Asparagus*. [A, 322.]—*Acidum asparacticum*. See *ASPARTIC ACID*.

**ASPARAGACEÆ** (Lat.), n. f. pl.  $A^2s(a^3s) \cdot pa^2r(pa^3r) \cdot a^2g(a^2g) \cdot a(a^3) \cdot se^2(ke^2) \cdot e(a^3 \cdot e^2)$ . Fr., *asparagacées*. Ger., *Asparagaceen*. Of Kunth, an order of plants belonging to the *Coronarieæ*, including the tribes *Draceneæ* and *Asparageæ*. [B, 170.]

**ASPARAGACEITES** (Lat.), n. f. pl.  $A^2s(a^3s) \cdot pa^2r(pa^3r) \cdot a^2g(a^2g) \cdot a(a^3) \cdot se^2(ke^2) \cdot e^2 \cdot i(e) \cdot te^2z(tas)$ . Of Sternberg, an order of fossil plants. [B, 170.]

**ASPARAGEÆ** (Lat.), n. f. pl.  $A^2s(a^3s) \cdot pa^3 \cdot r \cdot a(a^3) \cdot je^2(ge^2) \cdot e(a^3 \cdot e^2)$ . Fr., *asparagées*. Ger., *Asparageen*. 1. Of De Candolle, Eichler, and others, a family (order) of monocotyledonous plants, including *Asparagus*, *Smilax*, *Convallaria*, *Dracena*, and other genera usually classed under the *Liliaceæ*. 2. Of several authors, a subdivision of the *Smilacaceæ* or *Asphodelaceæ* [Endlicher]. 3. Of Kunth, a division of the *Asparagineæ*, including 3 genera. Bentham and Hooker make it a tribe of the *Liliaceæ*, including *Asparagus*, and three other genera. [B, 42, 170.]

**ASPARAGI** (Lat.), n. m. pl.  $A^2s(a^3s) \cdot pa^2r(pa^3r) \cdot a^2 \cdot ji \cdot ge$ . Gr., *ἀσπάραγοι*. Fr., *asperges*. Ger., *Spargelsprossen*, *Spargelstengel* (1st def.). 1. The young shoots of asparagus and of other leguminous plants. [A, 311, 322; L, 119.] 2. Of Adanson, a section of liliaceous plants, including *Asparagus*, *Smilax*, *Dioscorea*, *Medeola*, and *Ruscus*. 3. Of Jussieu, an order of plants corresponding to the *Asphodelaceæ* and *Smilacineæ* of Brown. [B, 170, 180.]

**ASPARAGIA** (Lat.), n. f.  $A^2s(a^3s) \cdot pa^3 \cdot r \cdot a(a^3) \cdot ji^2(gi^2) \cdot a^3$ . Gr., *ἀσπαράγια*. An ancient name for the root of asparagus. [A, 387.]

**ASPARAGIC ACID**, n.  $A^3s \cdot pa^3 \cdot r \cdot a^2 \cdot ji^2k$ . See *ASPARTIC ACID*.

**ASPARAGIN** (Ger.), n.  $A^3s \cdot pa^3 \cdot r \cdot a^3 \cdot gen'$ . See *ASPARAGINE*.—*A'säure*. See *ASPARTIC ACID*.—*A'thier*. An animal fed on asparagine. [B.]—*Gallena'*. See *TAURINE*.

**ASPARAGINE** (Lat.), n. f. pl.  $A^2s(a^3s) \cdot pa^2r(pa^3r) \cdot a^2 \cdot j(a^2g) \cdot i(e) \cdot ne(na^3 \cdot e^2)$ . Fr., *asparaginéés*. Ger., *Asparaginen*. An order of endogenous plants made by Link. [B, 120.]

**ASPERCETTE** (Fr.), n.  $A^3s\text{-}pe^2r\text{-}se^2t$ . The botanical genus *Onobrychis*. [A, 300; L, 41.]

**ASPERELLE** (Fr.), n.  $A^3s\text{-}pa\text{-}re^2l$ . The *Equisetum arvense*. [A, 300; L, 41.]

**ASPERELLINÆ** (Lat.), n. f. pl.  $A^2s(a^3s)\text{-}pe^2r\text{-}e^2l\text{-}li(c)^n\text{-}ne(na^2\text{-}e^2)$ . Fr., *asperellinées*. A mistaken spelling for *Asprellinæ* (q. v.).

**ASPERELLINÉ** (Fr.), adj.  $A^3s\text{-}pa\text{-}re^2l\text{-}en\text{-}a$ . Rough to the touch (said of leaves). [L, 41.]

**ASPERGE** (Fr.), n.  $A^3s\text{-}pe^2rzh$ . See ASPARAGUS.—**A. commune**. See ASPARAGUS *officinalis*.—**A's de Cosaque**. The young shoots of the *Typha latifolia*, used as food by the Cossacks. [L, 77.]—**A. du Cap**. The edible shoots of the *Aponogeton distachyum*. [A, 385.]—**A. officinale**. See ASPARAGUS *officinalis*.—**Sirap de pointe d'a**. [Fr. Cod.]. Lat., *syrius cum succo asparagi*. A syrup made by mixing, on a water-bath, 10 parts of asparagus juice and 18 of white sugar. [B, 113.]—**Tisane d'a**. [Fr. Cod.]. Lat., *pitiana radice asparagi*. Asparagus tea; made by infusing 2 parts of asparagus root in 100 of boiling water. [B.]

**ASPERGEMENT** (Fr.), n.  $A^3s\text{-}pe^2rzh\text{-}ma^2n^2$ . See ASPERSION.

**ASPERGETTES** (Fr.), n. pl.  $A^3s\text{-}pe^2rzh\text{-}e^2t$ . The young shoots of the *Ornithogalum pyrenaicum*, used as food in the neighborhood of Geneva. [B, 173.]

**ASPERGILLACEÆ, ASPERGILLÆ** (Lat.), n's f. pl.  $A^2s\text{-}(a^3s)\text{-}pu^2r(pe^2r)\text{-}ji^2l(gi^2l)\text{-}a(a^3)\text{-}se^2(ke^2)\text{-}e(a^2\text{-}e^2)$ . Fr., *aspergillacées, aspergillées*. Ger., *Aspergillaceen, Aspergilleen*. Of Link, a family of mucedinous Fungi, including *Aspergillus, Mucor, Penicillium*, etc. [B, 170.]

**ASPERGILLE** (Lat.), n. m. pl.  $A^2s(a^3s)\text{-}pu^2r(pe^2r)\text{-}ji^2l(gi^2l)\text{-}e^2(i)^e$ . Fr., *aspergilles*. Of Fries and Lévêillé, a division of Fungi belonging to the *Mucedines* or *Hormiscini*, characterized by the floccose receptacle, which is either simple or branching and which bears the sporidia fixed upon a spherical or ovate terminal vesicle. [B, 170, 239.]

**ASPERGILLIDÆ** (Lat.), n. f. pl.  $A^2s(a^3s)\text{-}pu^2r(pe^2r)\text{-}ji^2l(gi^2l)\text{-}li^2(d'e^2\text{-}e(a^2\text{-}e^2))$ . Fr., *aspergillidées*. Of Gray, a division of Fungi, corresponding in part to *Aspergillacées*. [B, 170.]

**ASPERGILLIFORM**, adj.  $A^2s\text{-}pu^2r\text{-}ji^2l\text{-}li^2\text{-}fo^2rm$ . Lat., *aspergilliformis* (from *aspergillus*, a sprinkler, and *forma*, form). Fr., *aspergilliforme*. Ger., *sprunggeldförmig*. In botany, resembling a sprinkler. [A, 300; B.]

**ASPERGILLINI** (Lat.), n. m. pl.  $A^2s(a^3s)\text{-}pu^2r(pe^2r)\text{-}ji^2l(gi^2l)\text{-}li(le)^n(ni)^e$ . Fr., *Aspergillinés*. Of Corda, a family of hyphomycetous Fungi (*Mucedines*), including *Stilbum, Peronospora, Penicillium*, etc. Of Reichenbach, a section of Fungi including *Oidium, Penicillium, Aspergillus*, etc. [B, 170.]

**ASPERGILLINUS** (Lat.), adj.  $A^2s(a^3s)\text{-}pu^2r(pe^2r)\text{-}ji^2l(gi^2l)\text{-}li(le)^n(ni)^s$ . Fr., *aspergillin*. Pertaining to or caused by the *Aspergillus*. [Siebenmann, "Arch. of Otol," xii, 3, 4; "N. Y. Med. Jour.," May 10, 1884, p. 539.] See OTOMYCOSIS *aspergillina*.

**ASPERGILLUS** (Lat.), n. m.  $A^2s(a^3s)\text{-}pu^2r(pe^2r)\text{-}ji^2l(gi^2l)\text{-}li^2s(lu^2s)$ . From *aspergere*, to sprinkle (from its resemblance to the *aspergillus* used for sprinkling holy water). Fr., *aspergille*. Ger., *Aspergillus, Kolbenschimmel*. It., *aspergillo*. Sp., *aspergilo*. A genus of ascomycetous Fungi, made by Michell, belonging to the section *Aspergillæ*, consisting of a mycelium made up of translucent, tubular, septate, branching threads (hyphæ), with thin walls, bearing erect, unbranched, usually non-septate, and thick-walled branches, the apices of which are dilated into spherical or club-shaped vesicles (receptacles). From the receptacle radiate a number of thin processes, the sterigmata, and each sterigma, by a process of terminal segmentation, divides into a row of spores (conidia). The entire apparatus, receptacle, sterigmata, and conidia, constitute the capitulum. *A.* is also found in another stage of development, the so-called sclerotium stage, when it consists of a dense tissue of mycelial threads inclosing hard, irregularly shaped granules (the sclerotia) made up of a dark fibrous cortex and a tough, yellowish medullary substance. Several species of *A.* are now known to be only the non-sexual reproductive stages of *Eurotium*, and the other species should probably be referred to the latter or to some similar genus. [B, 72, 239.]—**A. albus**. A species growing upon bread, distinguished by its branching sterigmata, white capitulum, and the small size of all its parts. [B, 72.]—**A. auricularis** [Link]. A species said to have been found in the external auditory canal of man. [B, 93.]—**A. caudius** [Michell]. Syn.: *Monilia candida* [Persoon]. A species with white hyphæ and conidia, found in the air-sacs of a bird (*Pyrhula vulgaris*) which were infiltrated with tubercles. [B, 46, 239.]—**A. clavatus**. A greenish-colored species with club-shaped receptacle larger than that of *A. fumigatus*, bearing very small conidia and supported upon very large and long hyphal branches. [B, 72.]—**A. flavescens** [Wreden]. **A. flavus** [Brefeld]. The conidial form of *Eurotium a. flavus* (q. v.). [B, 72.]—**A. fumigatus** [Fresenius]. Syn.: *A. nigrescens* [Robin]. A pathogenetic species, with small club-shaped receptacles, bearing unbranched sterigmata and spherical conidia and carried upon short hyphal branches. The capitulum is at first colorless; afterward the receptacle and sterigmata (seldom the conidia) become yellowish, then blue or dark-green, and finally brown or dark-gray. The whole fungus has the aspect of a thin blue, green, or gray mold. It is the smallest of the varieties found in the human ear, and is said to be the only one capable of development in the healthy ear, and then only under the influence of constant moisture. It causes in the external auditory canal a variety of inflammation, although, according to Bezold, it is less apt to do so than the other species. It has also been found in the lungs of man and of the lower animals (the pheasant) and the nose of man. [A, 396; B, 72, 232, 239.]—**A. glaucus** [Link, Fries]. The

conidial stage of *Eurotium a. glaucus* (q. v.). [B, 72.]—**A. mucoroides**. A species found, according to Virchow, in human lungs affected with tuberculosis or gangrene. [L, 87.]—**A. niger** [Van Tieghem]. See *Eurotium a. niger*.—**A. nigrescens** [Robin]. See *A. fumigatus*.—**A. nigricans** [Wreden]. See *Eurotium a. niger*.—**A. ochraceus**. A species distinguished by its branched sterigmata, its regularly spherical receptacles, and its color, which, at first flesh-colored, soon changes to an ochre-yellow. [B, 72.]—**A. oryzae**. See *Eurotium oryzae*.—**A. rubens**. J. O. Green's name for the *Otomycetes purpureus*. [F.]

**ASPERGOUTE** (Fr.), n.  $A^3s\text{-}pe^2r\text{-}gut$ . See ESPARGOUTE.

**ASPERGULA** (Lat.), n. f.  $A^2s(a^3s)\text{-}pu^2rg(pe^2rg)\text{-}u^2t(u^4)\text{-}la^3$ . See ASPERULA.

**ASPERICIFOLIACEÆ** (Lat.), n. f. pl.  $A^2s(a^3s)\text{-}pe^2r\text{-}i^2s(i^2k)^n\text{-}i^2\text{-}fo(fo^2)\text{-}li^2\text{-}a(a^3)\text{-}se^2(ke^2)\text{-}e(a^2\text{-}e^2)$ . See ASPERIFOLIACEÆ.

**ASPERICOLLIS** (Lat.), adj.  $A^2s(a^3s)\text{-}pe^2r\text{-}i^2\text{-}ko^2l\text{-}li^2s$ . From *asper*, rough, and *collum*, the neck. Fr., *aspéricolle*. Ger., *rauhhälsig*. Having the neck or corselet rough. [L, 109, 116.]

**ASPERICORNIS** (Lat.), adj.  $A^2s(a^3s)\text{-}pe^2r\text{-}i^2\text{-}ko^2rni^2s$ . From *asper*, rough, and *cornu*, a horn. Having rough, horny processes. [L, 180.]

**ASPERIFOLIACEÆ** [Reichenbach], **ASPERIFOLIÆ** [Linnaeus] (Lat.), n's f. pl.  $A^2s(a^3s)\text{-}pe^2r\text{-}i^2\text{-}fo(fo^2)\text{-}li^2\text{-}a(a^3)\text{-}se^2(ke^2)\text{-}e(a^2\text{-}e^2)$ ,  $-fo\text{-}li^2\text{-}e(a^2\text{-}e^2)$ . From *asper*, rough, and *folium*, a leaf. Fr., *asperifoliées, asperifoliacées*. Ger., *Rauhblättrige*. A family of plants belonging to the *Tubifloræ*, corresponding nearly to the *Borraginæ*; by some, made a tribe of that order. It is divided into the *Borraginæ*, *Echieæ*, and *Hydrophyllæ*, or into the *Schizocarpiæ*, *Diocarpiæ*, and *Capsulæ*. [B, 170.]

**ASPERIFOLIATE**, adj.  $A^2s''\text{-}pe^2r\text{-}i^2\text{-}fo\text{-}li^2at$ . See ASPERIFOLIOLIS.

**ASPERIFOLIEÆ** (Lat.), n. f. pl.  $A^2s(a^3s)\text{-}pe^2r\text{-}i^2\text{-}fo(fo^2)\text{-}li(li^2)\text{-}e^2\text{-}e(a^2\text{-}e^2)$ . Fr., *asperifoliées*. 1. Of Martins, Spach, and Jussieu, a tribe or suborder of borraginaceous plants including *Buglossum, Arnebæ*, and the *Anchusæ* and *Cymoglossæ* of Endlicher. 2. Of Brongniart, a class of hypogynous *Gamopetalæ*, comprising the families *Cordiææ*, *Borraginæ*, *Echieæ*, and *Hydrophyllæ*, and *Hydroleacæ*. [B, 170.]

**ASPERIFOLIOLIS**, adj.  $A^2s\text{-}pe^2r\text{-}i\text{-}fo\text{-}li^2\text{-}u^2s$ . Lat., *asperifolius*. Fr., *asperifolié*. Ger., *rauhblättrig*. Having the leaves rough. [A, 385.]

**ASPERITAS** (Lat.), n. f.  $A^2s(a^3s)\text{-}pe^2r\text{-}i^2\text{-}ta^2s(a^3s)$ . Gen., *asperitatis*. Fr., *aspérité, âpreté*. Ger., *Asperität, Rauhgkeit*. 1. Roughness, coarseness, rugosity (as of the surface of a bone where a muscle is attached). [A, 385; L, 43.] 2. Dryness, barrenness. [A, 312.] 3. Hoarseness. [A, 312.] 4. Harshness, sharpness, acidity, brackishness. [A, 312.]—**A. ab ætate**, **A. a lixivio**. See *A. cutis*.—**A. arteriæ asperæ**. See *A.* (3d def.).—**A. a saponæ**, **A. a vento**. See *A. cutis*.—**A. cutis**. Roughness of the skin. Plenck describes an *a. a vento*, due to exposure to cold winds; an *a. a lixivio* (seu a saponæ), affecting the hands of washerwomen, and due to the caustic alkali in the soap used; and an *a. ab ætate*, observed in old persons, in whom the skin, especially that of the face, tends to grow coarse and rough. [G, 11.]—**A. unguium**. Roughness of the nails. [G.]

**ASPERITÉ** (Fr.), n.  $A^3s\text{-}pa\text{-}ri^2\text{-}ta$ . See ASPERITAS and SCABRITIES.

**ASPERITUDO** (Lat.), n. f.  $A^2s(a^3s)\text{-}pe^2r\text{-}i^2\text{-}tu^2t(tu^4)\text{-}do$ . Gen., *asperitudinis*. See ASPERITAS.

**ASPERITY**, n.  $A^2s\text{-}pe^2r\text{-}i^2\text{-}ti^2$ . See ASPERITAS.

**ASPERMA** (Lat.), n. f.  $A^2s(a^3s)\text{-}pu^2rm(pe^2rm)\text{-}a^3$ . See ASPERMATISM.

**ASPERMÆ** (Lat.), n. f. pl.  $A^2s(a^3s)\text{-}pu^2rm(pe^2rm)\text{-}e(a^2\text{-}e^2)$ . Fr., *aspermes*. Ger., *Aspermen*. Of Wiggers, an order of cryptogamous plants, comprising such as he believed to be without seed or spore, and including *Ceramium, Conferva, Byssus, Ulva*, and other genera. [B, 170.]

**ASPERMAL**, adj.  $A^2s\text{-}pu^2rm\text{-}a^3l$ . See ASPERMOUS.

**ASPERMASIA, ASPERMATIA** (Lat.), n's f.  $A^2s(a^3s)\text{-}pu^2rm(pe^2rm)\text{-}a(a^3)\text{-}zi^2(si^2)\text{-}a^3$ ,  $-shi^2(ti^2)\text{-}a^3$ . Fr., *aspermasie*. See ASPERMATISM.

**ASPERMATIC**, adj.  $A^2s\text{-}pu^2rm\text{-}a^2\text{-}i^2k$ . Lat., *aspermaticus*. Fr., *aspermaticque*. Ger., *aspermatisch*. 1. Aspermous (q. v.). [A, 322.] 2. Pertaining to, caused by, or affected with, aspermaticism. [M, 13.]

**ASPERMATISM**, n.  $A^2s\text{-}pu^2rm\text{-}a^2\text{-}i^2zm$ . Lat., *aspermaticismus* (from *a priv.*, and *σπέρμα*, a seed). Fr., *aspermatisme*. Ger., *Aspermie, Samenmangel*. 1. A deficiency of seminal fluid. [D, 18.] 2. An habitually deficient or impeded ejaculation of the semen. [D, 18.]

**ASPERMATOUS**, adj.  $A^2s\text{-}pu^2rm\text{-}a^2\text{-}u^2s$ . See ASPERMOUS.

**ASPERMATOZOË** (Ger.), n.  $A^3s\text{-}pe^2rm\text{-}a^3\text{-}to\text{-}tso\text{-}e^2$ . See AZOOSPERMIA.

**ASPERMATUS** (Lat.), adj.  $A^2s(a^3s)\text{-}pu^2r(pe^2r)\text{-}ma(ma^2)\text{-}tu^2s$  (tu^4s). Fr., *aspermé*. In botany, unable to reproduce; said of certain plants. [B, 121.]

**ASPERMIA** (Lat.), n. f.  $A^2s(a^3s)\text{-}pu^2rm(pe^2rm)\text{-}i^2a^3$ . Fr., *aspermie*. See ASPERMATISM.

**ASPERMOUS**, adj.  $A^2s\text{-}pu^2rm\text{-}u^2s$ . Gr., *ἀσπερμος*. Lat., *aspermus*. Fr., *aspermé*. Ger., *aspermisch, samenlos*. 1. Deficient in semen, affected with aspermaticism. [A, 322.] 2. In botany, destitute of seeds. [B, 7.]

**ASPEROCOCCEÆ** (Lat.), n. f. pl.  $A^2s(a^3s)\text{-}pe^2r\text{-}o(o^2)\text{-}ko^2k\text{-}se^2(ke^2)\text{-}e(a^2\text{-}e^2)$ . From *asperococcus*, one of the genera, from *asper*,

rough, and κόκκος, a berry. Fr., *aspéroccées*. Of Zanardini, a tribe of *Algae* (*Ectogymnosporae*), including 4 genera. [B, 170.]

**ASPEROUS**, adj.  $A^2s\text{-}pu^r\text{-}u^s$ . In entomology, rugged, uneven, having very distinct elevated dots. [B, 240.]

**ASPERION**, n.  $A^2s\text{-}pu^r\text{-}zhu^s$ . Gr., *ἄσπεριον*. Lat., *asperio* (from *aspergere*, to sprinkle). Fr., *aspersion*, *arrosage*, *arrosement*. Ger., *Bestreuen*, *Besprengen*. Irrigation or sprinkling of the body or of a part with a liquid or a powder. [A, 322, 325.]

**ASPERUS** (Lat.), adj.  $A^2s(a^3s)\text{-}pu^r(s)\text{-}u^s(u^s)$ . From *aspergere*, to sprinkle. Ger., *aufgestreut*. In botany, covered with scattered spots as if sprinkled. [B, 198.]

**ASPERTANNIC ACID**, n.  $A^2s\text{-}pu^r\text{-}ta^2n\text{-}ni^2k$ . Fr., *acide aspertannique*. Ger., *Aspertannsäure*. A variety of tannic acid,  $C_{14}H_8O_6$ , or according to others,  $C_7H_4O_4 + \frac{1}{2}H_2O$ , found in the *Asperula odorata*. It is a light-brown, odorless, very hygroscopic substance. [B, 2, 81, 307.]

**ASPERUGO** (Lat.), n. f.  $A^2s(a^3s)\text{-}pe^r\text{-}u^2(u)\text{-}go$ . Gen., *asperuginis*. 1. A prickly plant mentioned by Pliny. [A, 312.] 2. A genus of boraginaceous plants. [B, 19.]—**A. ægyptiaca** [Linnaeus]. Syn.: *Anchusa ægyptiaca* [De Candolle], *Lycopsis ægyptiaca* [Linnaeus]. A species more properly referred to *Anchusa*; an annual plant growing near Alexandria. [B, 214.]—**A. procumbens** [Linnaeus], **A. vulgaris** [Dumortier]. Fr., *porte-feuille*. A species found throughout Europe and in the Caucasus and adjoining portions of Asia; an annual herb with procumbent branching stems covered with stiff, curved bristles, bristly oblong leaves, the radical ones petiolate, the cauline attenuate at the base and subopposite or alternate; and with very small, bluish-purple or white, axillary flowers, the calyx of which enlarges after the fruit ripens and incloses the latter. It has been used as an emollient, diuretic, and diaphoretic, and as a condiment for soups, and the root furnishes a red dye. [B, 19, 173, 214.]

**ASPERULA** (Lat.), n. f.  $A^2s(a^3s)\text{-}pe^r\text{-}u^2(u^4)\text{-}la^3$ . Fr., *aspérule*. Ger., *Waldmeister*. Woodruff; a genus of rubiaceous herbs established by Linnaeus, having square stems bearing whorled leaves and 4-parted flowers and 2-cleft pistil. [B, 19.]—**A. arvensis** [Linnaeus]. Fr., *aspérule bleue* (ou des champs). An annual European herb with blue flowers, the root of which is used as a red dye. [B, 173, 214.]—**A. chelidonia**. See *A. odorata*.—**A. ciliata** [Mönnch], **A. cerulea** [Dod.]. See *A. arvensis*.—**A. cynanchica** [Linnaeus]. Fr., *aspérule* (ou herbe à l'esquinancie, *petite garance*, *étranglechien*. Ger., *Hügel-Waldmeister*, *Bräunewurzel*. Syn.: *A. rubra*, var.  $\alpha$  [Lamarck], *A. tinctoria*, var.  $\beta$  [Lamarck], *Rubia cynanchica* [J. Bauhin], *Galium cynanchicum* [Scopoli]. A small perennial, nearly erect, herb growing in dry, sunny places throughout Europe. The *A. cynanchica*, var.  $\beta$  *heterophylla* (the *A. pyrenaica* [Linnaeus], *A. rubra* [Gratel]), is decumbent, with leaves ovate on the sterile branches, linear on those which bear flowers. The var.  $\gamma$  *saxatilis* (the *A. pyrenaica* [Linnaeus], *A. multiflora* [Lapeyrouse], *A. saxatilis* [Lamarck]), is caespitose and erect, with linear leaves of the length of the internodes. The var.  $\delta$  *elongata*, with elongated, erect stem, bearing linear leaves shorter than the internode, is found in Tauria. The *A. cynanchica* was formerly used as a gargle in quinsy and other affections of the throat, and the root (*radix cynanchica*) furnishes a red dye formerly used in place of madder. [A, 301; B, 19, 180, 214.]—**A. dubia** [Willdenow]. See *A. arvensis*.—**A. galloides** [Bieb.], **A. glauca** [Bess.]. Fr., *aspérule gaillet*. Syn.: *Galium glaucum* [Linnaeus] (see *Halleri* [Sut.], seu *campanulatum* [Villars]), seu *grandiflorum* [Clairo]. A perennial herb growing in middle and southern Europe. [B, 214.]—**A. multiflora** [Lapeyrouse]. Fr., *aspérule odorante*, *muguet* (ou reine, ou hépatique) *des bois*, *petit muguet*, *hépatique étoilée*. Ger., *gemeiner Waldmeister*, *Meserich*, *Megerkraut*. Syn.: *Galium odoratum*, *herba matrisilvae*. Sweet-scented woodruff, wood-rose; a European species bearing brilliant white flowers and bright-green leaves disposed in a stellate fashion about the stem. The leaves, which are inodorous when fresh, acquire the scent of new-mown hay when wilted, and, after being dried, retain it for years; they are infused in Rhine wine to make the *Maitrank*, or *Matein*, of the Germans. The plant contains aspertannic acid and comarin, and is esteemed as an aromatic, tonic, astringent, and diaphoretic. Its herb, *herba matrisilvae* (seu *hepaticae stellate*, seu *asperula*, seu *aparinis montana*, seu *stellaria*), was formerly used as a remedy for hydropothia. [A, 301, 327; B, 19, 119, 180; H. Baillon (L, 87).]—**A. odorata**. See *A. odorata*.—**A. pyrenaica** [Linnaeus], **A. rubra [Lamarck, Gratel], **A. saxatilis** [Lamarck]. Species now regarded as varieties of *A. cynanchica* (q. v.). [B, 214.]—**A. tinctoria** [Linnaeus]. Fr., *aspérule à teinture*. Syn.: *A. rubra*, var.  $\beta$  [Lamarck], *A. tinctoria*, var.  $\alpha$  [Lamarck], *Galium tinctorium* [Scopoli]. A perennial species, closely related to *A. cynanchica*, and used as a dye-plant, growing in dry, rocky places of Europe. The *A. tinctoria*, var.  $\beta$ , of Lamarck is a variety of the *A. cynanchica*. [B, 173, 214.]—**Herba asperulae**. The herb of *A. odorata*. [A, 319.]—**Herba asperulae aureae**. The herb of *Galium cruciata*. [B, 180.]—**Radix asperulae**. The root of *A. odorata*. [L, 57.]**

**ASPERULE** (Fr.), n.  $A^2s\text{-}pa\text{-}ru^l$ . See *ASPERULA*.—**A. à l'esquinancie**.—See *ASPERULA*.—**A. à teinture**. See *ASPERULA tinctoria*.—**A. des champs**. See *ASPERULA arvensis*.—**A. des teinturiers**. See *ASPERULA tinctoria*.—**A. gaillet**. See *ASPERULA glauca*.—**A. odorante**. See *ASPERULA odorata*.

**ASPERULEÆ** (Lat.), n. f. pl.  $A^2s(a^3s)\text{-}pe^r\text{-}u^2(u)\text{-}le^2\text{-}e(a^2\text{-}e^2)$ . Fr., *aspérulées*. A tribe of rubiaceae plants, including the genus *Asperula*, corresponding to the *Stellatæ* of De Candolle. [A. Richard (B, 170).]

**ASPERULEOUS**, adj.  $A^2s\text{-}pe^r\text{-}u^2\text{-}le^2\text{-}u^s$ . Lat., *asperuleus*. Fr., *aspérulé*. Resembling or belonging to the genus *Asperula*. [L, 41.]

**ASPERULUS** (Lat.), adj.  $A^2s(a^3s)\text{-}pe^r\text{-}u^2(u^4)\text{-}lu^s(lu^4s)$ . Dim. of *asper*. Slightly rough. [B, 121.]

**ASPERUM** (Lat.), n. n.  $A^2s(a^3s)\text{-}pe^r\text{-}u^2(u^4)m$ . A rough surface. [L, 94.]

**ASPHALGESIA** (Lat.), n. f.  $A^2s(a^3s)\text{-}fa^2l(fa^3l)\text{-}je(ga)\text{-}zi^2(si^2)a^3$ . A term applied by A. Pitres to that condition in which a person affected with hemi-anesthesia or hemi-analgnesia feels intense pain on touching certain articles, such as copper or silver, followed by a convulsive attack if the contact is prolonged; usually observed during hypnotism, rarely in the waking state. ["Brit. Med. Jour.," Nov. 13, 1886, p. 946.]

**ASPHALT**, n.  $A^2s\text{-}fa^2l(t^4)$ . Gr., *ἄσφαλτος*, *ἀσφαλτον*. Lat., *asphaltum* [Fr. Cod.], *bitumen judaicum*. Fr., *asphalte*, *goudron minéral*, *bitume de Judée* [Fr. Cod.]. Ger., *Asphalt*, *Judenpech*, *Erdharz*, *Erdpech*, *Bergpech*. It., *asfalto*, *bitume giudaco*. Sp., *asfalto* [Sp. Ph.]. Compact bitumen, mineral pitch, Jew's pitch; a smooth, hard, brittle, black or brownish-black, resinous mineral, of conchoidal fracture and bituminous odor, which takes fire easily and burns with a bright but very smoky flame. It consists of carbon, hydrogen, oxygen, and nitrogen in varying proportions, with a variable amount of ash. According to Boussingault, it is a mixture of asphaltene and petroleum. It is found pure on the shores of the Dead Sea, and more or less pure in other parts of the world. Occurring mixed with liquid petroleum, so as to be semi-solid, it constitutes *maltha*, or mineral tar. It was used by the ancient Egyptians for embalming. [B, 2.]—**Artificial a.** Coal-tar a., gas-tar a.; a mixture of sand, chalk, or limestone, with the thick, pitchy residue obtained by evaporating the more volatile portion of coal-tar. [B.]—**A. cement**. See *A. varnish*.—**A. oil**. Lat., *oleum asphalti*. Ger., *Äöl*. A yellow or dark-brown oil, consisting of hydrocarbons with a small quantity of oxidized matter, obtained by the dry distillation of a. It has been used in the treatment of phthisis and as an antispasmodic. [A, 301; B, L, 30.]—**A'stein** (Ger.). A mixture of a. and limestone, found in various parts of the world. [L, 37.]—**A. varnish**. Brunswick black, a varnish made by dissolving, with the aid of heat, 4 oz. of asphalt and  $\frac{1}{2}$  drachm of India-rubber in 10 oz. of mineral naphtha; used for making cells on microscope slides. [Carpenter (B, 164).]—**Coal-tar a.** See *Artificial a.*—**Gas-tar a.** See *Artificial a.*

**ASPHALTENE**, n.  $A^2s\text{-}fa^2l(t^4)\text{-}en$ . Fr., *asphaltène*. Ger., *Asphalten*. A black solid body,  $C_{10}H_{20}O_8$ , forming the chief constituent of certain bituminous substances. [A, 385.]

**ASPHALTIAS** (Lat.), n. m.  $A^2s(a^3s)\text{-}fa^2l(t^4)\text{-}ia^2\text{-}a^3(s)$ . Gr., *ἀσφαλτίας*. An ancient name for one of the lumbar vertebrae. Authors differ as to whether it was the first or the fifth. [A, 301; Pollux (A, 311); A, 322, 323; Gorræus (A, 325); A, 385.]

**ASPHALTIC**, adj.  $A^2s\text{-}fa^2l(t^4)\text{-}ik$ . Fr., *asphaltique*. Consisting of, containing, derived from, contained in, or pertaining to, asphalt. [B, 137; L, 73.]

**ASPHALTION** (Lat.), n. n.  $A^2s(a^3s)\text{-}fa^2l(t^4)\text{-}ia^2\text{-}o^2n$ . Gr., *ἀσφαλτίον*. An ancient name for a kind of trefoil having a bituminous odor, supposed to have been the *Psoralea bituminosa*. [Dioscorides (A, 311); L, 105; Pliny (A, 312).]

**ASPHALTITES** (Lat.), adj.  $A^2s(a^3s)\text{-}fa^2l(t^4)\text{-}i(e)\text{-}tez(tas)$ . Gr., *ἀσφαλτίτης*. Fr., *asphaltite*. Of, pertaining to, or containing, asphalt; as a n. (*σπόνδυλος* understood), see *ASPHALTIAS*. [A, 311.]

**ASPHALTITIS** (Lat.), n. f. of adj. *asphaltites*.  $A^2s(a^3s)\text{-}fa^2l(t^4)\text{-}i(e)\text{-}ti^2s$ . Gen., *asphaltitidis*. Gr., *ἀσφαλτίτις*. Fr., *asphaltite*. 1. See *ASPHALTIAS*. 2. See *ASPHALTION*.

**ASPHALTUM** (Lat.), n. n.  $A^2s(a^3s)\text{-}fa^2l(t^4)\text{-}u^2m(u^4m)$ . Gr., *ἀσφαλτον*, *ἀσφαλτον*. In the Fr. Cod., the official title of asphalt (*q. v.*). [B.]—**Gummil asphalti**. See *ASPHALT*.—**Oleum asphalti**. See *ASPHALT oil*.

**ASPHARAGONIA** (Lat.), n. f.  $A^2s(a^3s)\text{-}fa^2r(fa^3r)\text{-}a^3\text{-}go\text{-}ni^2\text{-}a^3$ . See *ASPHARAGONIA*.

**ASPHARAGUS** (Lat.), n. m.  $A^2s(a^3s)\text{-}fa^2r(fa^3r)\text{-}a^3\text{-}gu^s(gu^4s)$ . Gr., *ἀσφαράγος*. See *PHARYNX* and *ASPARAGUS*.

**ASPHENDAMNOS** (Lat.), n. f.  $A^2s(a^3s)\text{-}fe^2n\text{-}da^2m(da^3m)\text{-}no^2s$ . See *ASPHENDAMNUS*.

**ASPHODEL**, n.  $A^2s\text{-}fo\text{-}de^2l$ . See *ASPHODELUS*.—**Bog a.** The *Narthecium ossifragum*. [B, 19.]—**False a.** The *Tofieldia*. [B, 19.]—**Lancashire a.** The *Narthecium ossifragum*. [B, 19.]—**Scotch a.** The *Tofieldia palustris*. [B, 19.]—**White a.** See *ASPHODELUS ramosus* and *ASPHODELUS albus*.—**Yellow a.** See *ASPHODELINE lutea*.

**ASPHODELE** (Fr.), n.  $A^2s\text{-}fo\text{-}de^2l$ . See *ASPHODELUS*.—**A. à Jeanne**. See *ASPHODELINE lutea*.—**A. blanc**. See *ASPHODELUS*

THE ASPERULA ODORATA. [A, 327.]

for years; they are infused in Rhine wine to make the *Maitrank*, or *Matein*, of the Germans. The plant contains aspertannic acid and comarin, and is esteemed as an aromatic, tonic, astringent, and diaphoretic. Its herb, *herba matrisilvae* (seu *hepaticae stellate*, seu *asperula*, seu *aparinis montana*, seu *stellaria*), was formerly used as a remedy for hydropothia. [A, 301, 327; B, 19, 119, 180; H. Baillon (L, 87).]—**A. odorata**. See *A. odorata*.—**A. pyrenaica** [Linnaeus], **A. rubra [Lamarck, Gratel], **A. saxatilis** [Lamarck]. Species now regarded as varieties of *A. cynanchica* (q. v.). [B, 214.]—**A. tinctoria** [Linnaeus]. Fr., *aspérule à teinture*. Syn.: *A. rubra*, var.  $\beta$  [Lamarck], *A. tinctoria*, var.  $\alpha$  [Lamarck], *Galium tinctorium* [Scopoli]. A perennial species, closely related to *A. cynanchica*, and used as a dye-plant, growing in dry, rocky places of Europe. The *A. tinctoria*, var.  $\beta$ , of Lamarck is a variety of the *A. cynanchica*. [B, 173, 214.]—**Herba asperulae**. The herb of *A. odorata*. [A, 319.]—**Herba asperulae aureae**. The herb of *Galium cruciata*. [B, 180.]—**Radix asperulae**. The root of *A. odorata*. [L, 57.]**

*ramosus*, ASPHODELUS *albus*.—*A. jaune*. See ASPHODELINE *lutea*.  
—*A. mâle*, *A. rameux*. See ASPHODELUS *ramosus*.

**ASPHODELEÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>3</sup>s)-fo(f<sup>2</sup>o)-de<sup>2</sup>l-e<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). Fr., *asphodelées*. Ger., *Asphodeleen*. A family (order) of monocotyledonous plants, in the systems of Jussieu, Brown, and others, comprising *Aletris*, *Sansevieria*, *Aloe*, *Anthericum*, *Asphodelus*, *Phalangium*, *Hyacinthus*, *Scilla*, *Ornithogalum*, *Allium*, and other genera. It includes caulescent or acaulescent herbs with 6-parted regular perianth, deciduous or withering; 6 stamens inserted on the calyx with introrse bilocular anthers; a free trilobular ovary with the loculi opposite the outer divisions of the perianth, and each loculus containing several (rarely 2 or 1) biseriate, generally anatropous ovules; a single terminal, more or less elongated style with entire or 3-cleft stigma; and a capsular, trilobular, loculicidal fruit containing in each loculus 1 to many seeds which have a membranaceous, rarely crustaceous, testa and horny or fleshy albumen. It was divided by Endlicher into the *Hyacintheae*, *Anthericeae*, and *Asparageae*; by Kunth into *Hyacintheae*, *Allieae*, and *Anthericeae*, to which others add a fourth tribe, the *Tulipeae*; by Reichenbach into the *Scilleae*, *Hemerocallideae*, and *Anthericeae*, and in another classification into the *Tullbaghieae*, *Scilleae*, and *Draceneae*; and by others into the *Aloineae*, *Hemerocallideae*, *Tullbaghieae*, *Hyacintheae*, *Scilleae*, *Eriospemeae*, *Anthericeae*, *Aphyllanthaceae*, and *Tulipeae*. By most of the later writers it is joined to the *Liliaceae*, being regarded as a tribe of the latter. It then is usually employed in a more restricted sense, comprising those liliaceous herbs in which the rhizome is quite short, the stem rarely bulbous, the leaves are not fleshy, the inflorescence is simple, rarely branching, the segments of the perianth are separate and patent, the anthers are introrsely dehiscent, and the fruit is a capsule [Bentham and Hooker]. It is divided into the subtribes *Eusphodelaceae*, *Chlorogaleae*, *Bowieae*, *Anthericeae*, and *Dianelleae*. Engler divides the *A.* into the subtribes *Asphodelineae*, the *Anthericineae* (in part, the *Anthericeae* and the *Eusphodelaceae* of Bentham and Hooker), the *Chlorogalineae* (Bentham and Hooker's *Chlorogaleae*), the *Odontostemineae*, the *Eriospemeae* (Bentham and Hooker's *Bowieae*), the *Xeronemieae* (comprising two genera referred by Bentham and Hooker to the *Eusphodelaceae* and the *Anthericeae*), and the *Dianellineae* (Bentham and Hooker's *Dianelleae*). [B, 42, 170, 188; Engler (B, 245).]

**ASPHODELEOUS**, adj. A<sup>2</sup>s-fo-de<sup>2</sup>l-e<sup>2</sup>-u<sup>3</sup>s. Lat., *asphodelæus*. Fr., *asphodèle*. Resembling an *Asphodelus* or belonging to the *Asphodelæe*. [L, 116.]

**ASPHODELI** (Lat.), n. m. pl. A<sup>2</sup>s(a<sup>3</sup>s)-fo<sup>2</sup>d-e<sup>2</sup>l-i(e). Fr., *asphodelés*. Ger., *Asphodelen*. Of Jussieu and De Candolle, a section of plants corresponding to *Asphodelæe* in the more extended sense. [B, 170.]

**ASPHODELIACEÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>3</sup>s)-fo<sup>2</sup>d-e<sup>2</sup>l-i<sup>2</sup>-a(a<sup>3</sup>)-se<sup>2</sup>(ke<sup>2</sup>)-e(a<sup>3</sup>-e<sup>2</sup>). Fr., *asphodeliacées*. Ger., *Asphodeliaceen*. See ASPHODELEÆ.

**ASPHODELIN**, n. A<sup>2</sup>s-fo<sup>2</sup>d-e<sup>2</sup>l-i<sup>2</sup>n. Fr., *asphodeline*. Ger., *Asphodelin*. Rogain's name for the variety of cane-sugar found in the root of *Asphodelus ramosus*. [B, 207.]

**ASPHODELINEÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>3</sup>s)-fo(f<sup>2</sup>o)-de<sup>2</sup>l-i(e)-ne(na<sup>3</sup>-e<sup>2</sup>). Of Engler, a subtribe of the *Asphodelæe*, comprising *Asphodelus*, *Asphodeline*, and two other genera with racemose flowers having an infundibuliform or campanulate perianth. [Engler (B, 245).]

**ASPHODELINE** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>s)-fo<sup>2</sup>d-e<sup>2</sup>l-i(e)-ne(na). A genus of plants separated by Reichenbach from *Asphodelus*, from which it differs in its more or less leafy stem and usually yellow flowers. [B, 42.]—*A. lutea* [Reichenbach]. Fr., *asphodelé jaune*. Ger., *gelber Asphodill* (oder *Affodill*). Syn.: *Asphodelus luteus* [Linnaeus]. A perennial herb growing in rocky districts in southern Europe and North America, with erect leafy stalks 1 to 3 feet in height, bearing long racemes of fragrant yellow flowers. The tubers (*radix asphodeli lutei*) of the yellow fleshy root were formerly employed like those of *Asphodelus ramosus*. [B, 180.]

**ASPHODELODES** (Lat.), adj. A<sup>2</sup>s(a<sup>3</sup>s)-fo<sup>2</sup>d(f<sup>2</sup>o)-de<sup>2</sup>l-o-dez(das). Gr., ἀσφodelώδης. Resembling the *Asphodelus*. [Theophrastus (A, 311).]

**ASPHODELOIDEÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>3</sup>s)-fo<sup>2</sup>d-e<sup>2</sup>l-o(o<sup>2</sup>)-i<sup>2</sup>d-e<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). Fr., *asphodeloïdées*. 1. A section of liliaceous plants made by Ventenat. [B, 170.] 2. Of Engler, a suborder of liliaceous plants, comprising the tribes *Asphodelæe*, *Hemerocallideae*, *Aloineae*, *Aphyllanthaceae*, *Johnsoniaceae*, *Dasygongoneae*, *Lomandreeae*, and *Calceastieae*; corresponding in part, therefore, to *Asphodelæe* in its widest sense. [Engler (B, 245).]

**ASPHODELUS** (Lat.), n. m. A<sup>2</sup>s(a<sup>3</sup>s)-fo<sup>2</sup>d-e<sup>2</sup>l-u<sup>3</sup>s(u<sup>3</sup>s). Gr., ἀσφodelός. Fr., *asphodèle*. Ger., *Asphodill*, *Affodill*. It., *asfodillo*. Sp., *asfodel*. The asphodel, day-lily, or daffodil; a genus of liliaceous plants belonging to the *Asphodelæe*, established by Linnaeus, comprising herbs with radical subulate leaves, and flowers, usually white, having a 6-parted, spreading perianth, and 6 declinate up-curved stamens with dilated bases arching over the free ovary, and with a globular, trilobular, capsular fruit, having 2 seeds in each cell. [B, 34, 180.]—*A. aestivus*. 1. Of Reichenbach, see *A. tenuifolius*. 2. Of Brotero, a perennial Portuguese species. [B, 188.]—*A. albus* [Miller]. *A. albus non ramosus*. Fr., *asphodèle blanc*. Ger., *weisser Asphodill* (oder *Affodill*). A species by some united with *A. ramosus*, but differing from the latter in its non-branching stem, the color and length of the bracts and the larger, ovate capsule. It is found in the portions of Europe and Africa bordering upon the Mediterranean and in Dalmatia and Persia. Its root-tubers (*radix asphodeli albi*) were used like those of *A. ramosus*. The *A. albus* of Nees v. Esenbeck is the *A. fistulosus*. [B, 180, 188.]—*A. albus ramosus*. See *A. ramosus*.—*A. canariensis* [Smith]. See *A. tenuifolius*.—*A. fistulosus* [Linnaeus]. A species, by some included with *A. ramosus*, growing in the Mediterranean countries of Europe and Africa, distinguished by its stems branching above and by its subulate, subfistulose, rather rough leaves. [B,

188.]—*A. foeminus* [Cam.]. *A. folio fistuloso striato* [Morison]. The *Asphodeline lutea*. [B, 211.]—*A. intermedius* [Hornem.]. See *A. tenuifolius*.—*A. luteus* [Linnaeus]. See ASPHODELINE *lutea*.—*A. major albus ramosus*. See *A. ramosus*.—*A. major non ramosus*. See *A. albus*.—*A. major ramosus flore albo*. See *A. ramosus*.—*A. microcarpus* [Viviani]. See *A. ramosus*.—*A. minor* [Clusius]. See *A. fistulosus*.—*A. neglectus* [Römer and Schultes]. A species growing in Hungary, the mountains of Italy, and the Pyrenees; by Kunth identified with *A. albus*, by others regarded as a distinct species closely related to *A. ramosus*. It has the same medicinal applications as the latter. [B, 180, 188.]—*A. racemosus* [Link]. See *A. ramosus*.—*A. ramosus* [Linnaeus]. Fr., *asphodèle rameux*, *lis asphodèle*, *baton royal*. Ger., *ästiger Asphodill*, *Königswurzel*, *Kupferwurzel*, *Goldwurzel*. Syn.: *hastula regia*, *sceptrum regium*. King's-spear, white branched asphodel; a species having a naked branching stem, each branch bearing a spike of white, star-shaped flowers having the petals streaked with purple. The rhizome and aggregated, oblong, wedge-shaped root-tubers, brownish externally, dirty yellow within, of fleshy consistency and unpleasant, acrid, bitter taste, were formerly used in medicine under the names of *radix asphodeli* (seu *asphodeli albi vera*, seu *hastulæ*, seu *hastulæ regis*, seu *martagii*) and *ba-cilli regii*. They were the ἀσφodelός of Dioscorides and are said to constitute the drug, used at the present day in Morocco, known as *abalulz*. They have been used as a diuretic, emetic, and emmenagogue, and boiled in wine lees, as a poultice for application to wounds and cutaneous eruptions. [A, 327; B, 180; "Proc. of the Am. Pharm. Assoc.," xxiii, p. 133 (B); L, 94.]—*A. tenuifolius* [Cavanilles]. A species indigenous to the Canary Islands, closely related to *A. fistulosus* and perhaps only a variety of the latter. It constitutes the drug known as *ethel lahode* in Morocco. The *A. tenuifolius* of the "Hortus berolinensis" is the *A. fistulosus*. [B, 188; "Proc. of the Am. Pharm. Assoc.," xxiv, p. 114 (B).]—*A. verus albus*. See *A. albus*.—*A. verus luteus*. See ASPHODELINE *lutea*.—*Radix asphodeli*. The tuberous roots of *A. ramosus* and *Asphodeline lutea*. [B, 180; L, 90.]—*Radix asphodeli albi*. The rhizome and tubers of *A. albus* and *A. ramosus*. [B, 180.]—*Radix asphodeli albi vera*. The rhizome and tubers of *A. ramosus*. [B, 180.]—*Radix asphodeli lutei*. The tuberous rhizome of *Asphodeline lutea*. [B, 180.]

THE ASPHODELUS RAMOSUS.  
[A, 327.]

**ASPHODILL** (Ger.), n. A<sup>2</sup>s-fo-de<sup>2</sup>l. See ASPHODELUS.—*Aestiger A.*, *A'llille*. See ASPHODELUS *ramosus*.—*Gelber A.* See ASPHODELINE *lutea*.—*Weisser A.* See ASPHODELUS *ramosus* and ASPHODELUS *albus*.

**ASPHOTA** (Sanscr.), n. The *Clitorea ternata*. [B, 172.]

**ASPHYCTIC**, adj. A<sup>2</sup>s-fi<sup>2</sup>k-ti<sup>2</sup>k. Gr., ἀσφυκτος. Lat., *asphycticus*, *asphycticus*. Fr., *asphyctique*. Ger., *asphyktisch*. It., *asfitico*. Sp., *asfictico*. Pertaining to, affected with, or causing, asphyxia. [A, 322, 385; L, 54.]

**ASPHYCTOUS**, adj. A<sup>2</sup>s-fi<sup>2</sup>k-tu<sup>3</sup>s. See ASPHYCTIC.

**ASPHYXIA** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>s)-fi<sup>2</sup>x(fu<sup>2</sup>x)-i<sup>2</sup>-a<sup>3</sup>. Gr., ἀσφύξια (from *a*, priv., and *σφύξω*, to pulsate, or *σφύξιν* [=σφύγμως], pulsation). Fr., *asphyxie*. Ger., *Asphyxie*. *Pulslosigkeit*, *Scheintod*. It., *asfissia*. Sp., *asfisia*. 1. Anciently, any condition attended with sudden cessation or weakness of the pulse. [A, 387.] 2. As now used, a state of suspended animation caused by impeded respiration, as by strangulation, smothering, submersion, or the inhalation of an irrespirable gas. 3. In botany, that condition of a plant which is produced by an obstruction to the entrance of air into its tissues. [B, 19.]—*A. absoluta*. A. without intervals of sensibility or consciousness. [L, 83.]—*A. a carbone*. A. due to the inhalation of the fumes of burning charcoal. [L, 132.]—*A. a funis*. A. due to the inhalation of any noxious gas, vapor, or exhalation. [L, 132.]—*A. algida*. Insensibility from exposure to cold. [L, 83, 132.]—*A. a nephitide*. A. a *nustio*. See *A. a funis*.—*A. a pathemate*. See APOPLEXIA *mentalis*.—*A. a carbone*. See *A. a carbone*.—*A. cataleptica*. Catalepsy. [L, 132.]—*A. cataphora*. A. with short, imperfect remissions. [L, 83.]—*A. congelatorium*. See *A. algida*.—*A. demersorium*. See *A. immersorium*.—*A. electrica*. A. caused by electricity or lightning. [L, 120.]—*A. ex compressu*. A. from being crushed. [M, 66.]—*A. ex corpore superincubante*. A. from overlying. [M, 66.]—*A. ex obturatis spiribus itineribus*. A. from occlusion of the air-passages. [M, 66.]—*A. ex suspendio*. See *A. suspensorium*.—*A. ex vaporibus pestiferis*. See *A. a funis*.—*A. flutulenta*. See APOPLEXIA *flutulenta*.—*A. fornicarium*. A. *funis*. See *A. a funis*.—*A. hysterica*. Sudden loss of consciousness due to hysteria. [L, 132.]—*A. idiopathica*. See *Idiopathica*.—*A. immersorium* [Morgagni]. A. due to submersion, apparent death by drowning. [L, 132.]—*A. lethargica*. A state of mental and bodily torpor with deep, quiet sleep. [L, 83.]—*A. livida*. That form or stage of suspended animation in which the skin is dusky-red or cyanotic, the cutaneous vessels being turged with blood, and the reflex contractility of the muscles is preserved. [A, 22.]—*A. localis*. See *Localis*.—*A. localis cum gangrena symmetrica*. Fr., *asphyxie locale avec gangrène symétrique*. Syn.: *Raynaud's disease*, *Raynaud's symmetrical gangrene*. A general

nervous disease, specially characterized by local disorders of the circulation (in the form of ischaemia, cyanosis, or rubor) of the skin, affecting particularly the extremities, and attended with severe pain, together with symmetrical gangrene of the ends of the fingers or toes, and sometimes also of the nose, ears, or other parts. [Raynaud, "De l'asphyxie locale et de la gangrène symétrique des extrémités." Thèse de Paris, 1862 (G. 75).]—**A. mephitica**, A. **musta**. See *A. a fumis*.—**A. neonatorum**. Fr., *asphyxie* (ou mort apparente) des nouveau-nés. Ger., *Scheintot Neugeborenen*. It., *assissia dei neonati*. Sp., *asfisia de los recién nacidos*. Suspended animation of the new-born; a condition in which the respiratory muscles do not act, or act imperfectly, and consequently breathing does not take place, although the heart may be acting with regularity. It is met with under two forms, *a. livida* and *a. pallida* (q. v.). [A, 22; D, 29].—**A. neophytorum**, **A. of the new-born**. See *A. neonatorum*.—**A. pallida**. That form or stage of suspended animation in which the surface is cold and pallid, and the reflex contractility of the muscles is lost. [A, 22].—**A. pestilenta**. See *Asiatic CHOLERA*.—**A. sideratorum**. Apparent death from sunstroke or from a stroke of lightning. [L, 132].—**A. spinalis** [Duhamel]. Death from extravasation into the spinal canal. [L, 132].—**A. strangulatorum**, **A. suffocationis**. A. from suffocation. [L, 83].—**A. suspensorum**. A. from suspension (hanging). [L, 132].—**A. traumatica** [Bohn]. Apparent death due to an injury. [L, 132]. See SHOCK.—**A. vasaletica**. Cardiac syncope. [L, 132].—**A. vigil**. See *COMA vigil*.—**CHOLERA a.** See *Asiatic CHOLERA*.—**Choleatic a.** An asphyctic state occurring in the course of Asiatic cholera. [D, 41].—**Cutaneous a.** Fr., *asphyxie cutanée*. Ger., *Hautasphyxie*. It., *asfissia cutanea*. 1. A term which has been applied to the condition which results from covering an animal, such as a rabbit, with an impermeable varnish so as to prevent all ingress or egress of liquids or gases by the skin. The temperature undergoes a decided reduction, due to its increased discharge from the surface, and the condition may be mitigated by keeping the animal warm; otherwise it soon ends in death. It seems to be due to retention of some of the constituents of the sweat in the blood and to rapid loss of heat. [A, 383.] 2. Cutaneous gangrene. [L, 44].—**Heat a.** Sunstroke. [D].—**Idiopathic a.** Lat., *a. idiopathica*. A really meaningless term formerly applied to such occurrences as sudden death from heart disease. [A, 69].—**Local a.** Lat., *a. localis*. Fr., *asphyxie locale* (ou des parties). Ger., *locale Asphyxie*. 1. A localized anaemia with chilling, as of the tips of the fingers, so that they become white and insensible, as if frozen; a condition due to spasmodic constriction of the blood-vessels. [Huchard, "Sur les névroses," Paris, 1882; rev. in "Gaz. hebdomadaire de médecine et de chirurgie," Apr. 28, 1882, p. 274.] 2. Gangrene of a part. Cf. *Symmetrical gangrene* and *A. localis cum gangrena symmetrica*.—**Paralytic a.** A form of *a. neonatorum* produced by compression or other injury of the brain and medulla oblongata during delivery. [A, 398].—**Pestilential a.** Lat., *a. pestilenta*. See *Asiatic CHOLERA*.—**Secondary a.** A form that comes on after apparent resuscitation, gradually increasing and sometimes proving fatal. [M. Hall (A, 398).]—**Solar a.** Sunstroke. [M, 10.]

**ASPHYXIAL**, adj. A<sup>2</sup>s fi<sup>2</sup>x i<sup>2</sup>a<sup>2</sup>l. See ASPHYCTIC.

**ASPHYXIANT** (Fr.), adj. A<sup>2</sup>s fi<sup>2</sup>x i<sup>2</sup>a<sup>2</sup>n<sup>2</sup>. Asphyxiating, producing asphyxia. [L, 41, 42.]

**ASPHYXIATED**, adj. A<sup>2</sup>s fi<sup>2</sup>x i<sup>2</sup>a<sup>2</sup>t-e<sup>2</sup>d. Fr., *asphyxié*. Ger., *asphyxirt*. In a state of asphyxia.

**ASPHYXIE** (Fr., Ger.), n. A<sup>2</sup>s fi<sup>2</sup>x-e-e'. Asphyxia.—**A. croupale** (Fr.). Asphyxia due to croup. ["Rev. mens. des mal. de l'enfance," Nov., 1884 (D).]—**A. des nouveau-nés** (Fr.). See ASPHYXIA *neonatorum*.—**A. des parties** (Fr.). See *Local ASPHYXIA*.—**A. lente des nouveau-nés** (Fr.). See *SCLEREMA neonatorum*.—**A. locale** (Fr.). See *Local ASPHYXIA*.

**ASPHYXIED**, adj. A<sup>2</sup>s fi<sup>2</sup>x i<sup>2</sup>a<sup>2</sup>d. See ASPHYXIATED.

**ASPHYXY**, n. A<sup>2</sup>s fi<sup>2</sup>x i<sup>2</sup>. See ASPHYXIA.

**ASPIC**, n. A<sup>2</sup>s pi<sup>2</sup>k. Fr., *aspic*. Ger., *Spiege* (1st def.). 1. (A corruption of *spica*) see *LAVANDULA spica*. 2. The asp. [L, 43].—**A. d'outre mer** (Fr.). See *ANDROPOGON nardus*.—**Essence d'a.** (Fr.). *Huile d'a.* (Fr.). *Oil of a.* See *Oleum LAVANDULÆ*.

**ASPICILLIÆ** (Fr.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)-pi<sup>2</sup>-si<sup>2</sup>l(i<sup>2</sup>ki<sup>2</sup>l)-i<sup>2</sup>(i<sup>2</sup>e<sup>2</sup>-e<sup>2</sup>-(a<sup>2</sup>-e<sup>2</sup>)). Fr., *aspicillées*. Of Arnold, a tribe of the *Urcolariaceæ*, comprising 2 genera. [B, 170.]

**ASPIDECHIDNEI** (Lat.), n. m. pl. A<sup>2</sup>sp(a<sup>2</sup>sp)/i<sup>2</sup>d-e<sup>2</sup>-ki<sup>2</sup>d-(ch<sup>2</sup>i<sup>2</sup>d)/ne<sup>2</sup>-i(e). From *aspis*, a shield, and *echidna*, a viper.

**ASPIDES** (Lat.), n. m. pl. A<sup>2</sup>s(a<sup>2</sup>s)-pi<sup>2</sup>d-ez(as). Ger., *Aspiden*, *Schildthiere*. Of Hæckel, a class of the *Articulata*, including the *Tribolita* and the *Merostoma*. [L, 228.]

**ASPIDEUS** (Lat.), adj. A<sup>2</sup>s(a<sup>2</sup>s)-pi<sup>2</sup>d-i<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). Shield-shaped; a botanical species-name. [B.]

**ASPIDACEÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)-pi<sup>2</sup>d-i<sup>2</sup>-a<sup>2</sup>(a<sup>2</sup>)/se<sup>2</sup>(ke<sup>2</sup>)-e(a<sup>2</sup>-e<sup>2</sup>). Fr., *Aspidacées*. Of Gray, Presl, and others, a suborder or division of polypodiaceous ferns, including *Aspidium* and related genera. According to Hooker, it comprises *Aspidium*, *Nephrodium*, *Oncoclea*, and 5 other genera with subglobose, rarely elliptical, dorsal sori, and superior involucre which may be orbicular and peltate, or cordate, or reniform and affixed by the sinus, or elliptical and attached by a longitudinal receptacle, the margins being free or nearly so. [B, 170, 242.]

**ASPIDACEOUS**, adj. A<sup>2</sup>s-pi<sup>2</sup>d-i<sup>2</sup>-a<sup>2</sup>-shu<sup>2</sup>s. Lat., *aspidiaceus*. Fr., *aspidiacé*. Resembling the genus *Aspidium*, or belonging to the *Aspidiaceæ*. [L, 116, 180.]

**ASPIDACITES** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)-pi<sup>2</sup>d-i<sup>2</sup>-a<sup>2</sup>(a<sup>2</sup>)-si(ke)-tez(tas). A tribe of fossil ferns (*Filicacites*), made by Sternberg. [B, 170.]

**ASPIDARIÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)-pi<sup>2</sup>d-i<sup>2</sup>-ar(a<sup>2</sup>r)-i<sup>2</sup>-e(a<sup>2</sup>-e<sup>2</sup>). A section of the *Aspidiaceæ*, made by Presl, including *Aspidium* (in

its broadest sense) and one other genus, which have a peltate sub-orbicular indusium. [B, 121, 170.]

**ASPIDIÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)-pi<sup>2</sup>-d-i<sup>2</sup>(i<sup>2</sup>e<sup>2</sup>-e<sup>2</sup>-(a<sup>2</sup>-e<sup>2</sup>)). Fr., *aspidiées*. Of Gaudichaud and others, a tribe or subtribe of polypodiaceous ferns, corresponding to the *Aspidiaceæ*, with the addition of *Cystopteris* and 1 or 2 other genera. [B, 170.]

**ASPIDIN**, n. A<sup>2</sup>s-pi<sup>2</sup>d-i<sup>2</sup>n. Fr., *aspidine*. Ger., *Aspidin*. It., *aspidina*. A substance obtained by Pavesi from the male fern (*Aspidium filix mas*); not a definite chemical compound, but a sort of extract. [B, 5.]

**ASPIDIODE**, adj. A<sup>2</sup>s-pi<sup>2</sup>d-i<sup>2</sup>-oid. Gr., *ἀσπίδοειδής* (from *ἀσπίς*, a shield, and *είδος*, resemblance). Lat., *aspidioides*, *aspidioides*. Fr., *aspidiote*. Ger., *schildförmig*. 1. Shield-shaped. [M, 13.] 2. In botany, resembling *Aspidium*. [B, 19.]

**ASPIDION** (Lat.), n. n. A<sup>2</sup>s(a<sup>2</sup>s)-pi<sup>2</sup>d-i<sup>2</sup>-o<sup>2</sup>n. Gr., *ἀσπίδιον* (dim. of *ἀσπίς*, a shield). An ancient name for the plant *Alysson*, from the resemblance of its pods to a buckler. [Dioscorides (L, 84).]

**ASPIDIONEÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)-pi<sup>2</sup>-d-i<sup>2</sup>-on(o<sup>2</sup>n)/e<sup>2</sup>-e<sup>2</sup>-(a<sup>2</sup>-e<sup>2</sup>). Fr., *aspidionées*. See ASPIDACEÆ.

**ASPIDIONEUS**, adj. A<sup>2</sup>s-pi<sup>2</sup>-d-i<sup>2</sup>-o<sup>2</sup>-ne<sup>2</sup>-u<sup>2</sup>s. Lat., *aspidioneus*. Fr., *aspidione*. See ASPIDACEOUS.

**ASPIDIOSORIASIS** (Lat.), n. f. A<sup>2</sup>s(a<sup>2</sup>s)-pi<sup>2</sup>-d-i<sup>2</sup>-o-so-ri<sup>2</sup>-a(a<sup>2</sup>)/si<sup>2</sup>s. Gen., *aspidiosoria* (seos (-sis)). From *ἀσπίδιον* (dim. of *ἀσπίς*, a shield), and *ψωρίασις* (see PSORIASIS). Fr., *aspidiosorise*. Ger., *Schildträude*. An old term for a variety of psoriasis attended with the formation of shield-shaped scales. [A, 322.]

**ASPIDIOTA** (Lat.), n. n. pl. A<sup>2</sup>s(a<sup>2</sup>s)-pi<sup>2</sup>-d-i<sup>2</sup>-o<sup>2</sup>-ta<sup>2</sup>. Fr., *aspidiotes*. A family of *Crustaceæ* having the body covered with a kind of shield; parasitic on plants. [L, 90; Latreille (L, 116).]

**ASPIDIPHORA** (Lat.), n. n. pl. A<sup>2</sup>s(a<sup>2</sup>s)-pi<sup>2</sup>-d-i<sup>2</sup>-o<sup>2</sup>(o<sup>2</sup>)-ra<sup>2</sup>. From *ἀσπίς*, a shield, and *φορέω*, to bear. Fr., *aspidiphores*. Ger., *Schildträger*. A family of *Crustaceæ* having the body covered with a shell. [Cuvier, Latreille (L, 116).]

**ASPIDISCINA** (Lat.), n. n. pl. A<sup>2</sup>s(a<sup>2</sup>s)-pi<sup>2</sup>-dj<sup>2</sup>-s-si(ke)/na<sup>2</sup>. A family of *Infusoria*, made by Ehrenberg, including loricate genera, provided with an intestine (*Enterodæla*), and having the apertures variously disposed (*Allotreta*). [B, 208.]

**ASPIDISCOS**, **ASPIDISCUS** (Lat.), n's m. A<sup>2</sup>s(a<sup>2</sup>s)-pi<sup>2</sup>-dj<sup>2</sup>sk(o<sup>2</sup>s, -u<sup>2</sup>s(u<sup>2</sup>s)). Gr., *ἀσπίδιοςκος*. Fr., *aspidisque*. 1. Lit., the boss of a shield; applied figuratively to the sphincter ani. [Cælius Aurelianus (A, 325; L, 84).] 2. A genus of *Infusoria* belonging to the *Aspidiscina*. [Ehrenberg (B, 208).]

**ASPIDISTIACEÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)-pi<sup>2</sup>-d-i<sup>2</sup>-s-tra(tr<sup>2</sup>a)/se<sup>2</sup>(ke<sup>2</sup>)-e(a<sup>2</sup>-e<sup>2</sup>). From *Aspidistra*, one of the genera. Fr., *aspidistacées*. An order of plants belonging to the *Cornariæ*, made by Kunth. [B, 170.]

**ASPIDISTREÆ** [Bentham and Hooker], **ASPIDISTRINÆ** [Engler] (Lat.), n's f. pl. A<sup>2</sup>s(a<sup>2</sup>s)-pi<sup>2</sup>-d-i<sup>2</sup>-s-tre<sup>2</sup>-e(a<sup>2</sup>-e<sup>2</sup>), -i<sup>2</sup>s-tri(tr<sup>2</sup>e)/ne(a<sup>2</sup>-e<sup>2</sup>). Fr., *aspidistrées*. Of Endlicher, a family of plants related to the *Smilacæ*, from which they are distinguished by their radiate stigma and dense spicate inflorescence; by others, made a tribe of the *Smilacæ*. Of Bentham and Hooker, a tribe (of Engler, a subtribe) of the *Liliacæ*, distinguished by the style terminating in more or less broad stigmatic lobes. [B, 42, 245.]

**ASPIDIUM** (Lat.), n. n. A<sup>2</sup>s(a<sup>2</sup>s)-pi<sup>2</sup>-d-i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). From *ἀσπίδιον* (dim. of *ἀσπίς*, a shield), from the shape of the indusium. Fr., *rhizome de fougère mâle* [Fr. Cod.] (3d def.). Ger., *Schildfarn*. Syn.: *filix mas* [Br. Ph.] (2d def.), *rhizoma filicis* [Ger. Ph.] (2d def.). 1. The shield-fern; a genus of polypodiaceous ferns belonging to the tribe *Aspidiæ*, characterized by the dorsal subglobose sori, covered by the orbicular-peltate or reniform indusium. It includes the following sections, frequently regarded as distinct genera: (1) *Polystichum*, in which the veins are free (non-anastomosing) and either simple, pinnate, or variously dichotomous, and the pinnae and pinnules are usually rigid and spinulose-serrate; (2) *Cyclocladum*, in which the primary veins are pinnate, opposite branches uniting at an angle and sending a free veinlet into the areola so formed, and the pinnae of the fertile frond are contracted; (3) *Cytrotium*, in which the primary veins are pinnate, and the branches being more or less united or often quite free, and the fronds, sterile and fertile, are nearly or quite uniform; (4) *Euaspidium* (the A. of Schott and many others), in which the primary veins arising from the costæ are generally straight, the rest are compoundly anastomosing and sometimes send free veinlets into the included areolæ, and the indusium is orbicular-peltate, as in the preceding sections, or cordate, or horseshoe-shaped; (5) *Nephrodium*, distinguished by its cordate or reniform indusium attached by its sinus to the backs of the veins. This last subgenus is itself divided into the sections *Pleocnemia*, *Eunephrodium* (the *Nephrodium* of Schott), and *Lastrea*, which are often regarded as distinct genera. 2. In the U. S. Ph., the rhizome of *A. filix mas*. [B, 5, 242.]—**A. aculeatum** [Swartz]. Syn.: *Polypodium aculeatum* [Linnæus], *Polystichum aculeatum* [Roth]. False male fern; a species belonging to the section *Polystichum*, found in the mountain woods of Italy, closely resembling *A. filix mas*. [B, 10.]—**A. æmulum** [Swartz]. A variety of *A. spinulosum*. [B, 242.]—**A. alpestre** [Swartz]. See *POLYPODIUM alpestre*.—**A. angustum** [Willdenow]. See *ASPLENIUM filix femina*.—**A. appendiculatum** [Wallich]. See *A. molle*.—**A. argutum** [Kaulfuss]. See *A. rigidum*.—**A. asplenoides** [Swartz]. See *ASPLENIUM filix femina*.—**A. athamanticum** [Kunze]. Syn.: *Nephrodium athamanticum* [Hooker], *Lastrea Plantii* [Moore]. A southern African species belonging to the section *Nephrodium*. The rhizome, which is thicker than that of the *A. filix mas* and is brownish inside, is termed *umkomo-komo* and *panna-panna* by the natives of Natal, who use it as a ténia-cure. [B, 33, 242.]—**A. barometz** [Willdenow]. See *CYNOTRICH glaucescens*.—**A. californicum**. A California species enumer-

ated among the medicinal plants. ["Proc. of the Am. Pharm. Assoc.," xix, p. 307 (B).]—*A. campylopterum* [Kunze]. A variety of *A. spinulosum*. [B. 242.]—*A. canariense* [A. Braun]. A variety of *A. filix mas*. [B. 242.]—*A. canescens* [Wall.]. See *A. molle*.—*A. capense* [Willdenow]. See *A. coriaceum*.—*A. colobodon* [Kunze].—A variety of *Cystopteris fragilis* (q. v.). [B. 242.]—*A. coriaceum* [Swartz]. Syn.: *Polypodium berterianum* [Sprengel] (seu *adiantiforme* [Forster]), *Tectaria calahuala* [Cavanilles], *Rumohrea aspidioides* [Raddi]. A species, belonging to the section *Polystichum*, found throughout the Pacific islands, New Zealand, southern Africa, Madagascar, the Mauritius, South America, and the West Indies. The rhizome, *radix calagualae* (seu *calahualae*, seu *calaguelae*), *calahuala*, is said to contain an acrid oil and other principles, and was formerly held in much repute as a tonic, respiratory stimulant, diuretic, diaphoretic, and antispasmodic, and as a remedy in syphilis. Several varieties of the rhizome were formerly described. [B. 173, 180, 242.]—*A. depastum* [Schkuhr]. A variety of *A. filix mas*. [B. 242.]—*A. discolor* [Langs. and Fisch.]. See *A. coriaceum*.—*A. elatius* [Link]. See *ASPLENIUM filix femina*.—*A. elongatum* [Swartz], *A. erosum* [Schkuhr]. A variety of *A. filix mas*. [B. 242.]—*A. filix femina* [Swartz]. The *Asplenium filix femina*. [B. 242.]—*A. filix mas* [Swartz]. Fr.,

THE ASPIDIUM FILIX MAS. (AFTER DE LANESSAN.)

*fougère mâle* [Fr. Cod.]. Ger., *männliches Farnkraut*, *Farnkraut-männchen*, *Wurmfarn*, *Waldfarn*, *Johanniswurzel*. It., *felce maschia*. Sp., *helecho macho*. Syn.: *Polypodium* [Linnaeus] (seu *Nephrodium* [Richard]) *filix mas*. The male fern; a species belonging to the section *Nephrodium*, common in Europe, and found also in Africa, eastern India, and tropical America, but rare in the United States, where it has been found only in the neighborhood of Lake Superior. It has a lanceolate frond with linear-lanceolate pinnae, very obtuse pinnales toothed at the apex, and the sori placed nearer to the mid-vein than to the border of the frond. A number of varieties are described, differing much in appearance, and including many sorts described as distinct species by some botanists. The rhizome is from 3 to 6 inches long, and from 3 to 1 inch thick (or, with the adherent stipe, from 2 to 2½ inches thick), and covered with transparent, brown, chaffy scales; internally it is light-green and of a spongy texture; it contains filitannic acid, filicic acid, filix red, chlorophyll, and a fixed oil; it has a slight disagreeable odor and an astringent, bitter, and nauseous taste. The rhizome is used as a remedy for tape-worm, in doses of from 30 to 90 grains of the powder, fasting, followed by a purge. The *A. filix mas* of Pursh is the *A. goldieanum*. [A. 327; B. 33, 34, 242; L. 65.]—*A. fragile* [Swartz]. See *CYSTOPTERIS fragilis*.—*A. furcatum* [Forster]. Syn.: *Nephrodium furcatum* [Hooker]. A species, belonging to the section *Nephrodium*, found in tropical America from Peru to Panama.—*A. goldieanum* [Hooker]. Syn.: *Nephrodium goldieanum* [Hooker], *A. filix mas* [Pursh]. Goldie's fern; a species, belonging to the section *Nephrodium*, having a broad ovate frond, from 10 to 16 inches in length, and with a uniform petrate indusium, found in the northern and western United States and Canada. [B. 34.]—*A. heracleifolium* [Willdenow]. See *A. trifoliatum*.—*A. lonchitis* [Swartz]. Ger., *Milzkraut*. Syn.: *Polypodium lonchitis* [Linnaeus], *Polystichum lonchitis* [Roth]. A species growing in Europe, India, and, though rarely, the northern part of North America. Under the name of *herba lonchitis majoris*

it was formerly employed in diseases of the spleen. [B. 180, 242.]—*A. ludovicianum* [Kunze]. A variety of the *A. filix mas*. [B. 242.]—*A. marginale* [Swartz]. The marginal shield-fern; a large fern, belonging to the section *Nephrodium*, found in the United States and Canada, distinguished by its fruit-dots being disposed in regular rows along the borders of the segments of the frond. Its rhizome is employed for the same purpose as that of *A. filix mas*. [B. 33.]—*A. molle* [Swartz]. Syn.: *Nephrodium molle* [Desvaux], *Polypodium molle* [Jacquin], *Polystichum molle* [Gaudichaud]. A species belonging to the section *Nephrodium*. It is found throughout the entire world except in North America. [B. 242.]—*A. munitum* [Kaulfuss]. Syn.: *Polystichum munitum* [Presl], *Nephrodium plumula* [Presl]. A species growing in California and Oregon; the roots are roasted and eaten by the Indians. [B. 242.]—*A. nymphaeale* [Forster]. See *A. molle*.—*A. oreopteris* [Swartz]. Syn.: *Nephrodium oreopteris* [Desvaux], *Polypodium oreopteris* [English botany], *Lastrea oreopteris* [Presl]. A species, belonging to the section *Nephrodium*, growing in hilly regions throughout Europe. It possesses a balsamic fragrance due to its numerous resin-glands. [B. 242.]—*A. orientale* [Desvaux]. See *A. coriaceum*.—*A. pallidum* [Link]. See *A. rigidum*.—*A. parvifolium* [Kunze]. A variety of *A. filix mas*. [B. 242.]—*A. parasiticum* [Sieb. and Swartz]. See *A. molle*.—*A. Pontederæ* [Willdenow]. A variety of the *Cystopteris fragilis*. [B. 242.]—*A. pseudo-trifoliatum* [Swartz]. See *POLYPODIUM pseudo-trifoliatum*.—*A. recurvum* [Bree]. A variety of *A. spinulosum*. [B. 242.]—*A. remotum* [A. Braun]. A variety of *A. filix mas*. [B. 242.]—*A. rheticum* [Swartz]. See *POLYPODIUM alpestre*.—*A. rigidum* [Swartz]. Syn.: *Nephrodium rigidum* [Desvaux], *Polypodium rigidum* [Hoffmann] (seu *fragrans* [Villars]). A species, belonging to the section *Nephrodium*, growing in central Europe and in the mountainous parts of Great Britain. The variety *α americanum* (the *A. pallidum* [Link]) with pale-green fronds is found in Asia Minor and the Mediterranean islands, and the variety *β americanum* (the *A. argutum* [Kaulfuss]) with very large fronds, grows in California and New Mexico. It is closely related to some varieties of the *A. filix mas*, from which it differs in the longer and thinner rhizome, and in that the stipes are not closely imbricated. It is used as a remedy for the tape-worm, and in Siberia an infusion has been employed as a substitute for tea, and under the name of *serlik* as a remedy in gout and scurvy. [B. 33, 88, 242; L.]—*A. schimperianum* [Hochst. and A. Braun]. A variety of the *A. filix mas*. [B. 242.]—*A. setosum* [Swartz]. See *A. varium*.—*A. spinulosum* [Swartz]. Syn.: *Nephrodium spinulosum* [Desvaux], *Polystichum spinosum* [Roth]. A species, belonging to the section *Nephrodium*, of which a number of varieties, often referred to distinct species and even to other genera, are known. Some of these varieties bear a close resemblance to the *A. filix mas*, and, according to some, the latter should be included with *A. spinulosum* in a single species. The rhizome is thin, with about 6 fibro-vascular bundles, remnants of a dark-brown nearly cylindrical stipe, and little or no chaff. [B. 242; L. 65.]—*A. tenue* [Swartz]. A variety of the *Cystopteris fragilis*. [B. 242.]—*A. trifoliatum* [Swartz]. Syn.: *Polypodium trifoliatum* [Linnaeus] (seu *cordifolium* [Martius and Gal.]), *Drynaria cordifolia* [Fée]. A species belonging to the section *Euspidium*, growing in the West Indies, tropical South America, Central America, and Mexico, where it is said to be used for the same purposes as the *Polypodium vulgare*. [B. 180, 242.]—*A. varium* [Swartz]. Syn.: *Polypodium varium* [Linnaeus]. A species belonging to the section *Polystichum* growing in China, Cochinchina, and Japan, where the tender shoots form an article of food. [B. 88, 242.]—*Oleo-resina aspidii* [U. S. Ph.], *Oleo-resin of a.* [U. S. Ph.]. Fr., *extraît étheré (ou huile) de fougère mâle*. Ger., *Wurmfarnextrakt*, *Wurmfarnöl*. Syn.: *oleo-resina filicis* [U. S. Ph., 1870], *extractum filicis etherium* [Br. Ph.], *extractum filicis* [Ger. Ph.], *oleum filicis maris*. Fluid (or liquid) extract of male fern; made by digesting 100 parts of the rhizome of *A. filix mas*, in No. 60 powder, in a sufficient quantity of stronger ether. The powder is put into a cylindrical glass percolator, provided with a stopcock and arranged with a cover and receptacle suitable for volatile liquids, and pressed firmly, and stronger ether is poured upon it until 150 parts of liquid have slowly passed. The greater part of the ether is recovered by distillation on a water-bath, and the residue is exposed in a capsule until the remaining ether has evaporated. On standing, the preparation usually deposits a granular-crystalline substance (filicic acid), which should be well mixed with the liquid before it is used. This is a very sure remedy for the unarméd tape-worm, and reasonably certain for the armed variety, if suitable precautions are taken. Trouseau and Pidoux's method of using it, recommended by Bartholow, is as follows: On the first day, a strictly milk diet; on the morning of the second day, 4 grammes (about 1 drachm) of the oleo-resin in four doses, with an interval of a quarter of an hour between them; on the third day, the same quantity, given in the same way, followed by 50 grammes (about 1¼ drachms) of syrup of ether, and, a half-hour later, an emulsion containing 3 drops of croton-oil. [A. 247, 286.]

**ASPIDOACHIRI** (Lat.), n. m. pl. A<sup>2</sup>s(a<sup>3</sup>s)/pi<sup>2</sup>d-o(o<sup>2</sup>)-a<sup>3</sup>-kl-(ch<sup>2</sup>e)/ri(re). From *ἀσπίς*, a shield, a priv., and *χεῖρ*, the hand. Fr., *aspidochires*. J. A. Ritgen's name for a family of saurian reptiles, comprising those having the body covered with scales having 2 feet behind and none in front. [L. 180.]

**ASPIDOBANCHIA**, **ASPIDOBANCHIATA** (Lat.), n's n. pl. A<sup>2</sup>s(a<sup>3</sup>s)/pi<sup>2</sup>d-o(o<sup>2</sup>)-bra<sup>2</sup>n<sup>2</sup>(bra<sup>2</sup>n<sup>2</sup>/ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)-a<sup>3</sup>)-bra<sup>2</sup>n<sup>2</sup>(bra<sup>2</sup>n<sup>2</sup>)-ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)-a(a<sup>3</sup>)/ta<sup>3</sup>. From *ἀσπίς*, a shield, and *βράγχια*, gills. Fr., *aspidobanchies*. 1. A family of gasteropod mollusks having the branchiæ protected by a shield-shaped shell. [L. 180.] 2. Of Schweigger, the *Scutibanchia* of Cuvier. [L. 204.]

**ASPIDOCARPA** (Lat.), n. n. pl. A<sup>2</sup>s(a<sup>3</sup>s)-pi<sup>2</sup>d-o(o<sup>2</sup>)-a<sup>3</sup>/pa<sup>3</sup>. From *ἀσπίς*, a shield, and *καρπός*, fruit. Of Lähmann, a class of cryptogamous plants, including the orders *Idiothalamia* and *Ce-nothalamia*. [B. 170.]

**ASPIDOCEPHALI** (Lat.), n. m. pl.  $A^2s(a^2s)/pi^2d-o(o^2)-se^2f$ . (ke<sup>2</sup>f/a<sup>2</sup>-li-le). From *ἀσπίς*, a shield, and *κεφαλή*, the head. Fr., *aspidocéphales*. A section of ophidian reptiles, comprising those having the head covered with scales. [Ritgen (L, 180).]

**ASPIDOCHIRI** (Lat.), n. m. pl.  $A^2s(a^2s)/pi^2d-o(o^2)-ki(ch^2e)/ri^2e$ . Fr., *aspidochires*. From *ἀσπίς*, a shield, and *χείρ*, the hand. Ritgen's name for a division of saurian reptiles covered with scales and having 2 feet in front and none behind. [L, 180.]

**ASPIDOCHIOTA** (Lat.), n. n. pl.  $A^2s(a^2s)/pi^2d-o(o^2)-ki(ch^2i^2)-ro^2ta^2$ . An order of the *Eupodia*, or sea-cucumbers, with aquatic feel and scutiform tentacles. [L, 173.]

**ASPIDOCHIOTÆ** (Lat.), n. f. pl.  $A^2s(a^2s)/pi^2d-o(o^2)-ki(ch^2i^2)-ro^2te(ta^2-e^2)$ . A division of the *Dipneumona* having shield-like tentacles. [L, 121.]

**ASPIDOCOLABI** (Lat.), n. m. pl.  $A^2s(a^2s)/pi^2d-o(o^2)-ko^2l(o^2)-bi^2be$ . Fr., *aspidocolobes*. A family of saurian reptiles with scaly bodies and imperfect limbs. [Ritgen (L, 180).]

**ASPIDOCOTYLUS** (Lat.), n. m.  $A^2s(a^2s)/pi^2d-o(o^2)-ko^2t'i^2(u^2l)-u^2s(u^2s)$ . From *ἀσπίς*, a shield, and *κότυλα*, a socket. Fr., *aspidocotyle*. A genus of the *Trematoda* (family *Polystemidae*), made by Diesing. [Cobbold (L).]

**ASPIDOFERÆ** (Lat.), n. f. pl.  $A^2s(a^2s)/pi^2d-o^2f'e^2r-e(a^2-e^2)$ . From *ἀσπίς*, a shield, and *ferre*, to bear. Of Wiggers, an order of cryptogamous plants (lichens), comprising the genera *Lichen*, *Collema*, *Cladonia*, *Usnea*, *Verrucaria*, etc. [B, 170.]

**ASPIDOGASTER** (Lat.), n. f.  $A^2s(a^2s)/pi^2d-o(o^2)-ga^2s(ga^2s)-tu^2r(tar)$ . From *ἀσπίς*, a shield, and *γαστήρ*, the belly. Fr., *aspidogastre*. A genus (or a larval form) of entozoa of the order *Distomatida*, infesting certain fresh-water shell-fish. [Von Baer (L, 16, 18); Rudolphi (L, 27).]

**ASPIDOID**, adj.  $A^2s/pi^2d-oid$ . From *ἀσπίς*, a shield, and *είδος*, resemblance. Fr., *aspidoides*. Ger., *Schildförmig*. Shield-shaped, scutiform, peltate. [A, 385.] See *ASPIDOID*.

**ASPIDOL**, n.  $A^2s/pi^2d-o^2l$ . A substance,  $C_{20}H_{34}O$ , obtained by Dacomo from the *Aspidium filix mas*, giving the reactions of cholesterol. ["Ann. d. chim. e. d. farm.," Aug., 1886, p. 112 (B).]

**ASPIDOPHORA** (Lat.), n. n. pl.  $A^2s(a^2s)/pi^2d-o^2f'o^2r-a^2s$ . From *ἀσπίς*, a shield, and *φορέω*, to bear. Fr., *aspidophores*. See *ASPIDOFERÆ*, than which, however, this is a better form.

**ASPIDOPHOROUS**, adj.  $A^2s/pi^2d-o^2f'o^2r-u^2s$ . Lat., *aspidophorus*. Fr., *aspidophore*. Ger., *schildtragend, beschildet*. In zoology, provided with a shield-like scaly exoskeleton. [L, 41, 42.]

**ASPIDORRHYNCHIDÆ** (Lat.), n. f. pl.  $A^2s(a^2s)/pi^2d-o^2r-ri^2n^2(ru^2n^2)/ki^2d(ch^2i^2d)-e(a^2-e^2)$ . From *ἀσπίς*, a shield, and *ῥύγχος*, a snout. A family of the *Lepidosteoidæ* having an elongated body, ganoid scales, and beak-like jaws, with the termination of the vertebral column homocercal. [L, 207.]

**ASPIDOSAMINE**, n.  $A^2s/pi^2d-o^2s/a^2m-en$ . For deriv., see *ASPIDOSPERMA* and *AMINE*. Fr., *aspidosamine*. Ger., *Aspidosamin*. An alkaloid,  $C_{22}H_{28}N_2O_2$ , melting at about 100° C., found in white quebracho bark, having emetic properties. [Hesse, "Ann. d. Chem.," cxi; "Pharm. Jour. and Trans.," Mar. 25, 1882, p. 781; "Am. Jour. of Pharm.," July, 1882, p. 369; Harnack and Hoffmann, "Ztschr. f. klin. Med.," viii, 6; "Gaz. hebdomadaire de méd. et de chir.," Feb. 13, 1885, p. 113; A, 247.]

**ASPIDOSPERMA** (Lat.), n. n.  $A^2s(a^2s)/pi^2d-o(o^2)-spu^2rm-(spe^2rm)/a^2$ . Gen., *aspidosperm'atos(-tis)*. From *ἀσπίς*, a shield, and *σπέρμα*, a seed. Fr., *aspidosperme*. A genus of apocynaceous trees, established by Martius and Zuccarini, bearing alternate leaves and having the flowers disposed in terminal cymes, with a 5-parted calyx, an hypogynous, subfundibuliform, 5-lobed corolla, 5 stamens inserted into the middle of the corolla, with subsessile anthers and 2 ovaries with numerous ovules. The fruit is an obovate woody follicle with many membranaceous seeds. [B, 19.]—*A. peroba*. A Brazilian species the fruit of which is used medicinally. ["Proc. of the Am. Pharm. Assoc.," xxxii, p. 102 (B).]—*A. quebracho* [Schlechtendal]. Sp., *quebracho blanco*. A large evergreen tree of South America, furnishing the quebracho bark of commerce. The bark contains tannic acid, aspidospermine, aspidospermatine, aspidosamine, quebrachine, quebrachamine, and hypoquebrachine. It is used chiefly as a remedy for dyspnoea, but also as a stomachic tonic. [A, 247, 286.] Cf. *QUEBRACHO*.

**ASPIDOSPERMATINE**, n.  $A^2s/pi^2d-o-spu^2rm/a^2-ten$ . Lat., *aspidospermatina*, *aspidospermatinum*. Fr., *aspidospermatine*. Ger., *Aspidospermatin*. A crystalline, bitter, lævogyrous alkaloid found in the bark of *Aspidosperma quebracho*, isomeric with aspidosamine, melting at 162° C. [Hesse, "Ann. d. Chem.," cxi; "Pharm. Jour. and Trans.," Mar. 25, 1882, p. 781; "Am. Jour. of Pharm.," July, 1882, p. 366; A, 247.]—*A. lactate*. Lat., *aspidospermatine lactas*, *aspidospermatinum lacticum*. A compound of a. and lactic acid, having a marked depressant action upon the animal temperature. [C. Eloy and H. Huchard, "Union méd.," 1884, No. 137; "Ctbl. f. d. med. Wssensch.," Feb. 2, 1885, p. 77 (B).]

**ASPIDOSPERMINE**, n.  $A^2s/pi^2d-o-spu^2rm-en$ . Lat., *aspidospermina*, *aspidosperminum*. Fr., *aspidospermine*. Ger., *Aspidospermin*. A weak, crystalline, lævogyrous alkaloid,  $C_{22}H_{28}N_2O_2$ , melting at 205° C., found in the bark of *Aspidosperma quebracho*; soluble with difficulty in water, but readily soluble in oils, in absolute alcohol, and in ether. Its physiological action closely resembles that of quebracho bark. [Hesse, "Ann. d. Chem.," cxi; "Pharm. Jour. and Trans.," Mar. 25, 1882, p. 781; "Am. Jour. of Pharm.," July, 1882, p. 366; A, 247, 286; B, 5.]—*A. citrate*. Ger., *citronensaures Aspidospermin*. A salt of a. and citric acid; obtained either as an amorphous or as a crystalline compound, readily soluble in water. [A, 286; Guttman, "Arch. f. exp. Path. u. Pharm.," xiv, p. 451 (B).]—*A. hydrochloride*. A. *hydrochloride*. Lat., *aspidospermine hydrochloras* (seu *hydrochloridum*), *aspidosperminum hydrochloricum*. Fr., *chlorhydrate d'aspi-*

*spermine*. Ger., *chlorwasserstoffsäures Aspidospermin*, *Chlorwasserstoffsaspidospermin*. A salt of a. and hydrochloric acid, very soluble in water. [B, 5.]—*A. sulphate*. Ger., *schwefelsaures Aspidospermin*. A salt of a. and sulphuric acid, very soluble in water. [B, 5.]

**ASPIDOSTRACA** (Lat.), n. n. pl.  $A^2s(a^2s)-pi^2d-o^2s/tra^2-ka^2$ . A family of crustaceans established by Zenker, now included in the *Branchiopoda*. [L, 204.]

**ASPIDOTA** (Lat.), n. n. pl.  $A^2s(a^2s)-pi^2d-o^2ta^2$ . See *ASPIDIOTA*.

**ASPILIA** (Lat.), n. f.  $A^2s(a^2s)-pi^2l(pel)/i^2a^2$ . Fr., *aspilie*. A genus of composite plants, belonging to the *Helianthoidæ*, established by Dupetit-Thouars. [B, 121; L, 41.]—*A. latifolia* (Olivier and Hiern). *Hæmorrhage* plant; an herbaceous African species, 1½ to 4 feet in height, with spreading branches, opposite, very hard and roughly hairy, ovate, acuminate, serrulate leaves, and yellow flowers with neuter ray florets and nearly obsolete pappus. It is said to have remarkable hæmostatic powers when locally applied, and it is also used internally in the form of infusion in pulmonary hæmorrhage. ["Proc. of the Am. Pharm. Assoc.," xxvi, p. 168 (B); B, 250.]

**ASPIRALES** (Lat.), n. f. pl.  $A^2s(a^2s)-pi^2r-a(a^2)/lez(las)$ . Of Corda, a division of vascular cryptogams, comprising the subdivisions *Stomatophoræ* and *Astomatophoræ*. [B, 170.]

**ASPIRATION**, n.  $A^2s-pi^2r-a/shu^2n$ . Lat., *aspiratio* (from *aspirare*, to breathe or blow upon). Fr., *aspiration*. Ger., *Aspiration*. It., *aspirazione*. Sp., *aspiración*. 1. In chemistry and pharmacy, the process of sucking a gas or a liquid from one receptacle into another, as by means of a siphon. [B, 2.] 2. The act of drawing in the breath; inspiration (used in this sense by French and Italian writers especially). [J.] 3. The sucking action exerted upon the circulatory system during inspiration, by which the vessels in the thorax are somewhat expanded, so that the movement of the blood in the systemic veins toward the heart is accelerated, while the peripheral, or outward, movement of the blood in the systemic arteries is retarded. The movement of the blood in the entire pulmonary circulation is accelerated after the first instant. [J, 11, 19.] 4. Pronunciation with a full emission of the breath, giving a rough h-sound. [J.] 5. The removal of fluid from a cavity of the body by means of suction, especially with the aspirator (q. v., 3d def.).—*Pneumatic a.* Fr., *a. pneumatique*. See *A.* (5th def.).

**ASPIRATOR**, n.  $A^2s-pi^2r-a-to^2r$ . Fr., *aspirateur*. Ger., *Aspirationsapparat*. It., *aspiratore*. Sp., *aspirador*. 1. In chemistry, an apparatus for sucking a stream of air or liquid through a

DIEULAFOY'S ASPIRATOR.

tube or other vessel; generally a modification of the siphon. A vessel provided with a stopcock at the bottom is filled with water, which, being allowed to flow out by opening the stopcock, sucks a current of air or other fluid through a tube opening into the vessel at its top. [B, 2.] 2. A drying apparatus formed of V-shaped tubes filled with pumice-stone soaked in sulphuric acid, for dehydrating air or gases. [L, 41.] 3. An apparatus devised by Dieulafoy for removing liquids from a natural or pathological cavity of the body

by suction. It consists essentially of an exhausting pump (a glass barrel partly incased in metal), a set of sharp and blunt cannulae of various sizes, and two pieces of flexible tubing. The nozzle of the pump has a short tube connected at its side, with a stopcock. A cannula is attached at the nozzle by one of the pieces of tubing, the other piece of tubing being connected with the side-tube and having its free end placed in a basin. The cannula is thrust into the cavity to be evacuated, and, when the stopcock is turned so as to open the nozzle and close the side-tube, and the piston of the pump is slowly drawn up, the fluid rushes into the pump to fill the vacuum. On reversing the stopcock so as to close the nozzle, and pushing the piston down, the fluid is driven through the side-tube into the basin. This alternation is repeated until enough of the fluid has been withdrawn. Many modifications of the instrument are in use. [E.]—**MICRO-A.** A suction apparatus for drawing a current of air through some filtering medium, so as to separate the microscopical substances contained in it for purposes of examination. [L. Vorstädter, "Illustr. Mntschr. d. ärztl. Polytechn.", Aug., 1884, p. 171.]—**PNEUMATIC A.** Fr., *aspirateur pneumatique*. See A. (especially 3d def.).—**TRACHEAL A.** A hard-rubber syringe terminating in a soft-rubber cup; to be applied over the mouth of a tracheotomy-tube, when in position, for the purpose of freeing it from clots, mucus, etc.

**ASPIRATORY**, adj. A<sup>2</sup>s<sup>2</sup>pi<sup>2</sup>r-a<sup>2</sup>-to-ri<sup>2</sup>. Pertaining to aspiration.

**ASPIROZ** (Sp.), n. A<sup>2</sup>s-a<sup>2</sup>-pe-roth<sup>2</sup>. A place in Navarre, Spain, where there is a cold sulphurous spring. [A, 385.]

**ASPIS** (Lat.), n. f. A<sup>2</sup>s(a<sup>2</sup>s)<sup>2</sup>pi<sup>2</sup>s. Gen., *aspidos* (-dis). Gr., *ἀσπίς*. See ASP.—**EMPLASTUM EX ASPIDIBUS.** An old plaster made from asps; used for serofulous swellings and for gout. [Paulus Ægineta (L, 94).]

**ASPIS** (Ar.), n. The *Cannabis sativa*. [H. Baillon (B).]

**ASPISTÈRE** (Fr.), n. A<sup>2</sup>s-pi<sup>2</sup>st-er. The botanical genus *Parmelia*. [L, 41.]

**ASPISTES** (Lat.), adj. A<sup>2</sup>s(a<sup>2</sup>s)<sup>2</sup>pi<sup>2</sup>st-er. (as). Gr., *ἀσπίστis*. Fr., *aspiste*. Covered with scales (said of serpents). [L, 109.]

**ASPISURE** (Fr.), adj. A<sup>2</sup>s-pi<sup>2</sup>s-ur. From *ἀσπίστις*, armed with a shield, and *οὐρά*, the tail. Having the tail covered with horny plates. [A, 385.]

**ASPLENIACEÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)<sup>2</sup>-ple<sup>2</sup>n(plan)-i<sup>2</sup>-a(a<sup>2</sup>)<sup>2</sup>-se<sup>2</sup>. (ke<sup>2</sup>-e(a<sup>2</sup>-e<sup>2</sup>)). Fr., *asplénacées*. Ger., *Aspleniaceen*. Of Gray and others, a division or suborder of polypodiaceous ferns, including the genus *Asplenium* (in its widest sense) and one or two other genera, and hence corresponds to the *Aspleneæ* of Hooker (q. v.); according to some, it also comprises *Blechnum*, *Lomaria*, *Scolopendrium*, and similar genera, included by Hooker among the *Lomariaceæ* and *Scolopendriaceæ*. By Presl, the A. were divided into the *Cystopteridaceæ*, *Blechnaceæ*, *Aspleniariaceæ*, *Diplaziaceæ*, and *Scolopendriaceæ*. [B, 170, 242.]

**ASPLENIACEOUS**, adj. A<sup>2</sup>s-ple<sup>2</sup>n<sup>2</sup>/i<sup>2</sup>-a<sup>2</sup>-shu<sup>2</sup>s. Lat., *aspleniaceus*. Fr., *asplénacé*. Resembling the genus *Asplenium*; of or pertaining to the *Aspleniaceæ*. [B; L, 41.]

**ASPLENIACITES** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)<sup>2</sup>-ple<sup>2</sup>n(plan)-i<sup>2</sup>-a(a<sup>2</sup>)<sup>2</sup>-s(a<sup>2</sup>k)-i(e)<sup>2</sup>-tez(tas). A tribe of fossil ferns (*Filicaceites*), made by Sternberg. [B, 170.]

**ASPLENIARIÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)<sup>2</sup>-ple<sup>2</sup>n(plan)-i<sup>2</sup>-ar(a<sup>2</sup>r)-i<sup>2</sup>-e(a<sup>2</sup>-e<sup>2</sup>). Fr., *asplénariées*, *asplénariées*. Of Presl, a section of the *Aspleniaceæ*, comprising *Asplenium* and 2 other genera. [B, 170.]

**ASPLÉNIE** (Fr.), n. A<sup>2</sup>s-pla-ne. See ASPLENIUM.—**A. noire.** See ASPLENIUM *adiantum nigrum*.—**A. polytrich.** See ASPLENIUM *trichomanes*.—**A. rue de muraille.** See ASPLENIUM *ruta muraria*.

**ASPLENIÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)<sup>2</sup>-ple<sup>2</sup>n(plan)-i<sup>2</sup>-e(a<sup>2</sup>-e<sup>2</sup>). Fr., *asplénies*. Ger., *Asplenieen*. A section or subtribe of polypodiaceous ferns, including *Asplenium* (in its widest sense) and 2 other genera [Hooker]; or, according to others, also comprising *Ceterach*, *Grammitis*, *Scolopendrium*, *Diplazium*, *Blechnum*, *Lomaria*, etc. As defined by Hooker, it comprises ferns, either tufted or furnished with somewhat elongated caudex or rhizome, with dorsal, linear or oblong sori, usually distant from the margin, scattered, and generally oblique with regard to the costa, and with involucre, arising from the side of a vein or veinlet, sometimes from the superior or inferior aspect, opening toward the costa, plane or vaulted, and generally membranaceous in texture. [B, 170, 242.]

**ASPLENIIFOLIUS** (Lat.), adj. A<sup>2</sup>s(a<sup>2</sup>s)<sup>2</sup>-ple<sup>2</sup>n(plan)-i<sup>2</sup>-fo(-fo<sup>2</sup>)/i<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). From *Asplenium* and *folium*. Having leaves or fronds like the *Asplenium*. [B, 242.]

**ASPLENIOD**, adj. A<sup>2</sup>s-ple<sup>2</sup>n<sup>2</sup>/i<sup>2</sup>-oid. Lat., *aspleniodes* (from *ἀσπληνιον* [see ASPLENIUM], and *είδος*, resemblance). Fr., *asplénioïde*. Resembling the *Asplenium*, or disposed as in the *Asplenium* (said of an arrangement of sori). [B.]

THE TRACHEAL ASPIRATOR.

**ASPLENIOIDEÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>2</sup>s)<sup>2</sup>-ple<sup>2</sup>n(plan)-i<sup>2</sup>-o(o<sup>2</sup>)-i<sup>2</sup>d(e<sup>2</sup>-e(a<sup>2</sup>-e<sup>2</sup>)). Fr., *asplénioïdées*. A section of polypodiaceous ferns, made by Reichenbach, including *Asplenium*, *Scolopendrium*, *Diplazium*, and 3 other genera. [B, 170.]

**ASPLENIUM** (Lat.), n. n. A<sup>2</sup>s(a<sup>2</sup>s)<sup>2</sup>-ple<sup>2</sup>n(plan)/i<sup>2</sup>-o<sup>2</sup>n. See ASPLENIUM.

**ASPLENIUM** (Lat.), n. n. A<sup>2</sup>s(a<sup>2</sup>s)<sup>2</sup>-ple<sup>2</sup>n(plan)/i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). Gr., *ἀσπληνιον*, *ἀσπληνιον* (from a priv., and *σπλην*, an affection of the spleen). Fr., *asplénie*, *asplénium*, *doradille*. Ger., *Miltzfar*, *Miltzkraut*, *Streifenfar*, *Strichfar*. It., *asplénio*. A genus of polypodiaceous ferns belonging to the *Aspleniaceæ*, having a short rhizome, very variable venation, and dorsal, linear or oblong sori, in rows arranged more or less obliquely to the mid-vein of the frond, and usually asplenioid in attachment, i. e., attached to one side of a vein, sometimes diplazioid, i. e., in sets of 2, one on each side of the vein and opposite the other. The indusium is of the same shape as the sorus and opens toward the costa when single, but, when diplazioid, the 2 indusia open in opposite directions. The genus includes the following sections, frequently regarded as independent genera: (1) *Thamnopteris*, having undivided fronds and a vein running longitudinally along the margin and uniting with the apices of the transverse veins. The sori are nearly or quite plane and quite single. (2) *Euasplenium*, including by far the greater number of species, which has sori like (1) and usually free veins. (3) *Athyrium*, with pinnate-pinnatifid or bi-tripinnate fronds, usually short sori, and a loose convex indusium which may be straight or often more or less arcuate. (4) *Eudiplazium*, with free veins, and diplazioid, usually associated with asplenioid, indusia. (5) *Anisogonium*, resembling (4) but having anastomosing veins. (6) *Hemidictyum*, with very long, naked, asplenioid sori with the veins near the margin anastomosing. [B, 242.]—**A. acrostichoides.** See *A. thelyptroides*.—**A. acutiusculum** [Blume]. See *A. hirtum*.—**A. acutum** [Bory]. The *A. adiantum nigrum*, var. *β acutum*. [B, 242.]—**A. adiantum nigrum** [Linnaeus]. Fr., *capillaire*, *doradille noir*. Ger., *Frauenhaarstreiffar*. Black maiden-hair; a species belonging to the section *Euasplenium*, found throughout Europe, northern and southern Asia, northern and southern Africa, and the adjacent islands. The varieties *β acutum*, with acute or acuminate narrower pinnae, pinules, and segments, *γ obtusum* [Moore] or *capense* [Schlecht.], with the lobes of the pinnules very broad, and *δ gaudichaudianum* [Hooker], with thick, coriaceous fronds, are known. The rhizome, which is beset with numerous black fibrils, and the frond (*herba adiantifolii nigri*) were formerly employed like the true maiden-hair (*Adiantum capillus Veneris*) as a heclic and diuretic. [B, 173, 180, 242.]—**A. alternifolium** [Wulf]. See *A. germanicum*.—**A. ambiguum** [Swartz]. See *A. esculentum*.—**A. anceps** [Sol]. See *A. trichomanes*.—**A. approximatum** [Blume]. See *A. hirtum*.—**A. arboreum** [Willdenow]. Syn.: *Diplazium auriculatum* [Kaulfuss]. A species, belonging to the section *Eudiplazium*, growing in South America and Jamaica. The *A. pelucidum* of Lamarck, said to be useful in thoracic affections and as a vermifuge, is by Hooker identified with this species and with *A. hirtum*. [B, 173, 242.]—**A. argutum** [Kaulfuss]. See *A. adiantum nigrum*.—**A. aureum**. The *A. ceterach*. [B.]—**A. Breynii** [Retzius]. See *A. germanicum*.—**A. capense** [Linnaeus]. See *A. adiantum nigrum*.—**A. castanum** [Schlecht.]. A variety of the *A. trichomanes*. [B, 242.]—**A. ceterach** [Linnaeus]. Fr., *dorad*, *doradille*, *herbe doree*. Ger., *kleine Hirschzunge*, *gebräuchlicher Miltzfar*, *Miltzkraut*. Sp., *doradilla*. Syn.: *Ceterach officinarum* [Willdenow], *Grammitis* [Schkuhr] (seu *Gymnogramme* [Sprengel], seu *Scolopendrium* [Swartz]) *ceterach*. Milt-waste, scale fern; a species, belonging to the section *Hemidictyum*, growing throughout Europe and Asia. It is distinguished by its coriaceous texture and the dense covering of tawny imbricated scales upon the lower surface of the frond. The variety *β aureum*, the *Ceterach aureum* [Link] (seu *canariensis* [Willdenow], seu *latifolium* [Fée]), *Acrostichum aureum* [Cavanilles], *Grammitis aurea* [Swartz], is larger and has longer segments and toothed scales. The whole plant, constituting the *ἀσπληνιον* of Dioscorides and the *herba ceterach* (seu *asplénii*, seu *asplénii veri*, seu *scolopendrii veri*, seu *doradilla*), is somewhat bitter and mucilaginous, and was formerly held in great repute in diseases of the spleen, dropsy, and asthma, and is now sometimes employed as a demulcent, anodyne, and mildly astringent remedy in pulmonary disorders, and as a lithontriptic. [B, 19, 180, 242.]—**A. crenulatum** [Presl]. See *A. serratum*.—**A. cuneifolium** [Vis.]. The *A. adiantum nigrum*, var. *γ obtusum*. [B, 242.]—**A. densum** [Brack.]. **A. dichroum** [Kunze]. See *A. trichomanes*.—**A. esculentum** [Presl]. Syn.: *Diplazium malabaricum* [Sprengel] (seu *umbrosum* [Moritz]), *Digrammaria ambigua* [Presl]. A species, belonging to the section *Anisogonium*, growing in India, Java, and China. It is said to be employed in the treatment of intermittent fever and thoracic affections, and as a laxative. [B, 180, 242.]—**A. falcatum** [Lamarck]. Syn.: *Trichomanes adiantoides* [Linnaeus], *filix non ramosa zeylanica* [Burmann]. A species, belonging to the section *Euasplenium*, found in Australia, New Zealand, the South Sea Islands, Mauritius, Ceylon, and India, and, according to some, in the West Indies. The rhizome is used in the treatment of dysentery, and the herb as a laxative. [B, 180, 242; L, 37.]—**A. filix femina** [Bernhardt]. Fr., *fongère femelle*. Ger., *weiblicher Streiffar*, *Farnkrautweibchen*. It., *felce femmina*. Sp., *helecho hembra*. Syn.: *Polypodium* [Linnaeus] (seu *Athyrium* [Roth], seu *Aspidium* [Swartz], seu *Tectaria* [Cavanilles]) *filix femina*, *Polypodium rhoeticum* [Linnaeus], *Aspidium asplenioides* [Swartz], etc. Lady-fern, female fern; a species belonging to the section *Athyrium*, found in Europe and America, having fronds from 1 to 2 feet in height, of a peculiarly delicate plummy appearance, and bipinnately or tripinnately divided into obtuse, deeply serrated segments. The sori are large and finally confluent, giving the frond a brownish hue. The rhizome is used as a substitute for that of the *Aspidium filix mas*, but is much less powerful. [B, 19, 34.]—**A. firmum** [Fée]. A variety of *A. falcatum*. [B, 242.]—**A. frondibus pinnatis**. See *A. trichomanes*.—**A. germanicum** [Weiss]. A species, belonging to the section

*Euasplenium*, growing in central and northern Europe and rarely in Great Britain. It is used like *A. ruta muraria*. [B, 173, 242; L, 33.]—*A. Harovii* [Godr.]. See *A. trichomanes*.—*A. hemionitis*. 1. Of Linnaeus, a species, belonging to the section *Euasplenium*, growing in the woody regions of northwestern Africa and southwestern Europe and the adjacent Atlantic islands. It is the *Hemionitis vulgaris* [Bauhin] (seu vera [Chusius]). 2. Of other authors, the *Scolopendrium hemionitis* (q. v.). [B, 211, 242.]—*A. heterochromum* [Kunze]. See *A. trichomanes*.—*A. hirtum* [Kaulfuss]. A species, belonging to the section *Euasplenium*, growing in the South Pacific islands, Mauritius, Madagascar, Java, and Borneo. The *A. pellucidum* of Lamarck, which, by Hooker, is identified with this species and with *A. arboreum*, is said to be efficient as a vermifuge and remedy in diseases of the chest. [B, 173, 242.]—*A. humile* [Blume]. See *A. adiantum nigrum*.—*A. hymenodes* [Mettenius]. See *A. arboreum*.—*A. integrum* [Fée]. See *A. serratum*.—*A. latifolium* [Sturm.]. A species belonging to the section *Athyrium*. The *A. latifolium* [Bory] is the *A. ceterach*. [B, 242.]—*A. lucidum* [Forster]. A New Zealand species belonging to the section *Euasplenium*. [B, 138, 242.]—*A. luridum* [Salisbury]. See *A. adiantum nigrum*.—*A. Lyalli* [Moore]. See *A. adiantum*.—*A. Macraei* [Hooker]. See *A. rhizophyllum*.—*A. Matthioli* [Gasp. and Guss.]. See *A. ruta muraria*.—*A. melanocaulon* [Muhlenberg]. See *A. trichomanes*.—*A. meyerianum* [Presl]. See *A. hirtum*.—*A. microphyllum* [Tineo]. See *A. trichomanes*.—*A. multicaule* [Presl]. *A. murale* [Bernhardt]. *A. murorum* [Lamarck]. See *A. ruta muraria*.—*A. myriophyllum* [Presl]. See *A. rhizophyllum*.—*A. nidus* [Raddi]. See *A. serratum*.—*A. nigrum* [Bernhardt]. See *A. adiantum nigrum*.—*A. obtusum* [Kittel]. See *A. adiantum nigrum*.—*A. officinarum*. See *A. ceterach*.—*A. palmatum* [Lamarck]. The *A. hemionitis* [Linnaeus]. [B, 242.]—*A. patens* [Gaudichaud]. The *A. adiantum nigrum*, var.  $\delta$ . [B, 242.]—*A. pellucidum* [Lamarck]. See *A. hirtum* and *A. arboreum*.—*A. plumosum* [Bory]. See *A. hirtum*.—*A. polyodon* [Forster]. See *A. falcatum*.—*A. productum* [Low.]. See *A. adiantum nigrum*.—*A. pubescens* [Mettenius]. See *A. esculentum*.—*A. radiatum* [Swartz]. A species described under *Acrostichum dichotomum* (q. v.), but more properly referred to *Actinopteris radiata*. [B, 242.]—*A. Rad-dii* [Kl.]. See *A. serratum*.—*A. rhizophyllum* [Kunze]. Syn.: *Cænopteris myriophylla* [Swartz], *Campitosorus rhizophyl-*

THE ASPLENIUM RHIZOPHYLLUM. [A, 327.]

*lus*. The walking fern, or walking leaf. A species belonging to the section *Euasplenium*, growing in the United States, Mexico, Central America, tropical South America, the West Indies, and the Sandwich Islands. [B, 138, 242.]—*A. ruta muraria* [Linnaeus]. Fr., *capillaire blanc, sauve-vie, rue de muraille*. Ger., *Mauerrauhe, Mauer-Streifarn*. Syn.: *Ruta muraria* [Bauhin], *Adiantum album*. Wall-rue, tent-wort, white maiden-hair; a species belonging to the section *Euasplenium*, growing in Europe, northern Asia, northern and southern Africa, and North America. The leafy frond, *herba ruta murarie* (seu *adianti albi*, seu *paronychie*), was formerly employed in the form of a decoction as an aperient and expectorant remedy in phthisis and other thoracic affections, and also in disorders of lactation and in gout. [B, 180, 242.]—*A. saxatile* [Salisbury]. See *A. trichomanes*.—*A. schomburgkianum* [Kl.]. See *A. serratum*.—*A. scolopendrium* [Linnaeus]. See *Scolopendrium vulgare*.—*A. semihastatum* [Kunze]. See *A. arboreum*.—*A. septentrionale* [Swartz]. A species belonging to the section *Euasplenium*, growing in mountainous districts in Europe, and central Asia, and in New Mexico. It is said to have the same properties as *A. ruta muraria*. [B, 173, 242.]—*A. Serpentinum* [Tausch and Henfl.]. The *A. adiantum nigrum*, var.  $\gamma$ . [B, 242.]—*A. serratum* [Linnaeus]. A species belonging to the section *Euasplenium*, growing in the West Indies, South America, and the Pacific islands. It is said to be used in the West Indies in diseases of the liver and obstinate diarrheas. [B, 173, 180, 242.]—*A. silesiacum* [Milde]. See *A. adiantum nigrum*.—*A. spicant*. See *Lomaria spicant*.—*A. stenopteris* [Kunze]. See *A. hirtum*.—*A. tenuifrons* [Wall.]. See *A. filix femina*.—*A. thelypteroides* [Michaux.]. A species belonging to the section *Athyrium*, growing in Canada, the United States, India, and Tartary; its

rhizome closely resembles that of *Aspidium filix mas*. [B, 242; L, 65.]—*A. torresianum* [Gaudichaud]. See *A. hirtum*.—*A. trichomanes* [Linnaeus]. Fr., *asplenie polytrix, polytrix officinal, capillaire rouge*. Ger., *rothes Frauenhaar, Goldhaar, rother (oder gemeiner) Wiederthron, Abthron, Aetherthron*. Syn.: *Adiantum aureum, Polytrichum commune*. Dwarf-spleenwort, common maidenhair; a species belonging to the section *Euasplenium*, found generally distributed throughout the world; a small fern having a black, polished stipe and a pinnate frond from 3 to 6 inches high, with from 8 to 12 pairs of rounded, sessile leaflets about  $\frac{1}{4}$  inch long; formerly accounted one of the five aperient herbs. Its frond, *herba trichomanes* (seu *adianti rubri*, seu *saxifrage rubra*), was formerly used like that of *A. ruta muraria*. This species was the *τρίχομανές* of Dioscorides. [B, 5, 34, 180; L, 30.]—*A. trichomanoides* [Cavanilles]. See *A. trichomanes*.—*A. zamiaefolium* [Presl]. See *A. falcatum*.—*Herba asplenii, Herba asplenii veri*. The herb of *A. ceterach*. [B, 180.]

**ASPENUM** (Lat.), n. n.  $A^2s(a^2s)$ -ple(pla)/nu<sup>m</sup>(nu<sup>m</sup>4m). Gr., *ἀσπληνον*. 1. Of Dioscorides, the *Asplenium ceterach*. [B, 180.] 2. An ancient name for the *Mandragora silvestre*, from the notion that it destroyed the spleen in animals that fed upon it. [B, 2.] 3. A name proposed for *Asplenium*, as being etymologically more correct. [B.]

**ASPENDYLOÏDE, ASPENDYLOPHORE** (Fr.), adj's.  $A^2s$ -po<sup>nd</sup>-[2]-o-ed, -for. From a priv., *ἀσπύνδωλος*, a vertebra, and *εἶδος*, resemblance, or *φορεῖν*, to bear. Invertebrate. [L, 41, 109.]

**ASPORÆ** (Lat.), n. f. pl.  $A^2s(a^2s)$ -po<sup>r</sup>-e(a<sup>3</sup>-e). From a priv., and *σπός*, seed. Fr., *asporées*. Ger., *Asporen*. A name formerly applied to a group of *Fungi*, including *Sclerotium* and other genera, which were supposed to be destitute of spores. These genera are now known to be only vegetative states of spore-producing *Fungi*. [B, 121.]

**ASPOREÆ** (Lat.), n. f. pl.  $A^2s(a^2s)$ -po(po<sup>2</sup>)/re<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). Fr., *asporées*. Ger., *Asporeen*. A division of *Schizomycetes*, comprising those which have no spores, or, at least, none which are distinguishable from the vegetative cells of which the organisms are composed. [H. M. Ward (B, 77).]

**ASPORI** (Lat.), n. m. pl.  $A^2s(a^2s)$ -po<sup>r</sup>-i(e). Fr., *asporés*. See **ASPOREÆ**.

**ASPOROMYCETES** (Lat.), n. m. pl.  $A^2s(a^2s)$ -po(po<sup>2</sup>)-ro(ro<sup>2</sup>)-mi(mu<sup>3</sup>)-se(ka)/tez(tas). From a priv., *σπός*, a seed, and *μύκης*, a fungus. Of Wallroth, an order of *Fungi* comprising 3 groups: the *A. gongromorphi*, including *Sclerotium* and other genera; the *A. helicomorphi*; and the *A. rhizomorphi*, including *Dematiu*, *Rhizomorpha*, etc. [B, 170.] Cf. **ASPOREÆ**.

**ASPOROUS**, adj.  $A^2s$ -po-ru<sup>s</sup>. From a priv., and *σπός*, a seed. Fr., *asporre*. Having no spores. [B, 38.]

**ASPREDO** (Lat.), n. f.  $A^2s(a^2s)$ -pre(p<sup>ra</sup>)/do. Gen., *aspreddinis*. From *asper*, rough. 1. Trachoma. [G, 13.] 2. Urticaria. [Celsus (G, 13).] 3. The ruff, a sort of perch, one of the bones of the head of which was formerly used as a remedy for nephritic colic. [Gesner (L, 94).]—*A. ceruna*. See *A.* (3d def.).—*A. millacea*. An old term for miliaria. [G.]—*A. perca fluviatilis minor*. See *A.* (3d def.).

**ASPRELLA** (Lat.), n. f.  $A^2s(a^2s)$ -pre<sup>l</sup>/la<sup>3</sup>. From *asper*, rough. Fr., *asprelle*. 1. An old name for the *Equisetum majus*. [L, 94.] 2. A genus of gramineous plants. [B.]—*A. oryzoides* [Lamarck]. See *LEERSIA oryzoides*.

**ASPRELLINEÆ** (Lat.), n. f. pl.  $A^2s(a^2s)$ -pre<sup>l</sup>-li(e)/ne(na<sup>3</sup>-e<sup>2</sup>). From *asprellus* (q. v.). Fr., *asprellinées*. A family of gramineous plants, including *Leersia*, made by Link. [B, 170.]

**ASPRELLUS** (Lat.), adj., dim. of *Asper*.  $A^2s(a^2s)$ -pre<sup>l</sup>/lu<sup>s</sup>-(lu<sup>3</sup>). Slightly rough; a botanical species name. [B, 74.]

**ASPRES-LEZ-VEYNE** (Fr.), n.  $A^3$ -spr-la-van. A place in the department of the Hautes-Alpes, France, where there are hot springs containing carbonates. [A, 321, 385.]

**ASPRETUDO** (Lat.), n. f.  $A^2s(a^2s)$ -pre<sup>2</sup>-tu<sup>2</sup>(u)/do. Gen., *aspretudinis*. See **ASPREDO**.

**ASPRIS** (Lat.), n. f.  $A^2s(a^2s)$ -pri<sup>2</sup>s. Gr., *ἀσπρις*. An ancient name for a kind of oak-tree [Theophrastus (A, 311)]; according to others, a gramineous plant akin to *Avena* [Bory (B, 121)].

**ASPRITUDO** (Lat.), n. f.  $A^2s(a^2s)$ -pri<sup>2</sup>-tu<sup>2</sup>(tu)/do. Gen., *aspritudinis*. See **ASPREDO**.

**ASQUE** (Fr.), n.  $A^3$ sk. See **ASCUS**.

**ASS**, n.  $A^3s(a^2s)$ . See **ASINUS**.

**ASS** (Ar.), n. See **AS**.

**ASSA** (Lat.), n., f. of adj. *assus* (*nutrix* understood).  $A^2s(a^2s)$ -sa<sup>3</sup>. 1. A dry-nurse. [A, 312; M, 60.] 2. See **ASA**. 3. The tamarind. [C. Bauhin (B, 121).]

**ASSA** (Lat.), n., n. pl. of adj. *assus*. An ancient term for a sun-bath or for the sweating-room (sudatorium) of a bath. [A, 312.]

**ASSAB**, n. See **ASAB**.

**ASSABATUS**, n. See **BOROZAIL**.

**ASSAC**, n. See **AMMONIACUM** (1st def.).

**ASSACOU, ASSACU**, n's. Written also *ussacou* and *ussacú*. Brazilian names for the *Hura brasiliensis* or for a poisonous substance contained in its bark and juice, used in the treatment of elephantiasis. [B; L, 30, 65.]

**ASSADA**, n. An old name for the nutmeg. [L, 84.]

**ASSAFAT, ASSAFATUM**, n's. See **SAFAT**.

**ASSAFETIDA, ASSAFETIDA** (Lat.), n's f.  $A^2s(a^2s)$ -sa<sup>3</sup>-fe<sup>2</sup>t(fat)/i<sup>2</sup>d-a<sup>3</sup>, -fe<sup>2</sup>t(fat)/i<sup>2</sup>d-a<sup>3</sup>. See **ASAFETIDA**.

**ASSA FŒTIDA** (Lat.), n. f. See ASAFŒTIDA.—**Emplastrum asse fœtidæ compositum** [Finn. Ph., Greek Ph.]. See *Emplastrum ASAFŒTIDÆ*.—**Emulsio asse fœtidæ** [Finn. Ph.]. See *Mistura ASAFŒTIDÆ*.—**Gummi resina a. f.** [Finn. Ph.]. See *ASAFŒTIDA*.

**ASSAL**, n. A Brazilian term for a drink made from the fruits of various species of palm. [L, 49.] See *ETERPE edulis*.

**ASSAINISSEMENT** (Fr.), n. A<sup>3</sup>-se<sup>2</sup>n-es-ma<sup>3</sup>n<sup>2</sup>. The sanitation of a locality; the act or process of rendering it wholesome (as by disinfection, drainage, etc.); also the result of such action. [A, 300, 385.]

**ASSAISONNEMENT** (Fr.), n. A<sup>3</sup>-se<sup>2</sup>z-on-ma<sup>3</sup>n<sup>2</sup>. The act of seasoning; also a condiment. [A, 300.]

**ASSAL** (Ar.), n. Honey. [L, 77.]

**ASSALA**, n. The nutmeg. [Dornæus, Ruland, Johnson (A, 325); L, 87.]

**ASSALIÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>3</sup>s)-sa(sa<sup>3</sup>)li<sup>2</sup>e(a<sup>3</sup>-e<sup>2</sup>). An old name for worms that feed on wood; anciently esteemed in the treatment of jaundice. [A, 325.]

**ASSAM**, n. An East Indian name for the tamarind. [L, 105.]

**ASSAMAR**, n. A<sup>2</sup>s(sa<sup>3</sup>m-a<sup>3</sup>r). From *assare*, to roast, and *amarus*, bitter. Fr., *assamare*. Ger., *Röstbitter*. Reichenbach's term for a peculiar bitter principle formed by roasting gum, sugar, starch, gluten, meat, bread, etc.; said to have the property of retarding tissue metamorphosis. [B, 2, 14; L, 120.]

**ASSAM-KALUBI**, n. An East Indian name for the *Zalacca conferta*. [B, 121.]

**ASSAMODUM**, n. A Cingalese name for various aromatic and stimulating umbelliferous plants, including probably the *Ammi majus*. [H. Baillon (L, 87).]

**ASSAM-PAIAH**, n. See *ASSAM-KALUBI*.

**ASSANEGLI ASSANGI**, n's. The powder that falls from the walls of salt mines. [Ruland (A, 325); L, 94, 104.]

**ASSAPHAT, ASSAPHATUM**, n's. See *SAFAT*.

**ASSARABACCA** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>s) sa<sup>3</sup>-ra<sup>3</sup>-ba<sup>3</sup>k(ba<sup>3</sup>k)'ka<sup>3</sup>. See *ASARABACCA*.

**ASSARIUM, ASSARIUS** (Lat.), n's n. and m. A<sup>2</sup>s(a<sup>3</sup>s)-sa(sa<sup>3</sup>)-ri<sup>2</sup>-u<sup>3</sup>m(u<sup>4</sup>m), -u<sup>3</sup>s(u<sup>4</sup>s). Syn.: as. Gr., *ἀσσάριον*. Ancient names for: (1) the twelfth part of anything; (2) a weight of 2 drachms. [Galen (A, 325).]

**ASSASSIN**, n. Ar., *hashish*. See *HASCHISCHIN*.

**ASSATIO** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>s)-sa(sa<sup>3</sup>)shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., *assatio-nis*. From *assare*, to roast. Gr., *ἀσσιον*. Fr., *assation*. Ger., *Rösten, Braten*. It., *assazione*. The cooking of any article of food or medicine in its own juice. [A, 325, 385; L, 35, 94.]

**ASSATURA** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>s)-sa<sup>3</sup>-tu<sup>2</sup>(tu)'ra<sup>3</sup>. Syn.: a. *suffocata* [Santes Ardyunus]. An old term for a roasted animal or piece of meat swathed in cloth immediately after its removal from the fire; considered poisonous. [A, 325.]

**ASSAY**, v. tr. A<sup>2</sup>s-sa'. Fr., *essayer*. Ger., *versuchen, probiren*. It., *assaggiare*. Sp., *ensayar*. To subject a substance, especially a metallic compound, to analysis; to test it with the special purpose of ascertaining the proportion in which a particular constituent is contained in it. Thus, opium and its preparations are a'ed to determine the amount of morphine that they contain.

**ASSAY**, n. A<sup>2</sup>s-sa'. Fr., *essai*. Ger., *Versuch, Probe, Prüfung, Untersuchung*. It., *saggio*. Sp., *ensayo*. The process of assaying (see *ASSAY*, v.).

**ASSAZZE**, n. An Abyssinian name for a plant (probably fabulous) believed to be efficacious against the bites of serpents. [L, 105.]

**ASSBERRI** (Ar.), n. The *Ruscus aculeatus*. [L, 77.]

**ASSEFOLIUM** (Lat.), n. n. A<sup>2</sup>s(a<sup>3</sup>s)-se<sup>2</sup>-fo(fo<sup>2</sup>)li<sup>2</sup>-u<sup>3</sup>m(u<sup>4</sup>m). The herb, dog's-tooth or dog's-grass. [Apuleius (A, 318).]

**ASSEL** (Ger.), n. A<sup>3</sup>s-se<sup>2</sup>l. The woodlouse; in the pl., A'n, the *Aselli*. [B, 180.]—**Kellera'**. The *Oniscus scaber*. [B, 49.]—**Kugela'n**. The *Sphaeromidae*. [B, 49.]—**Landa'n**. The *Oniscidae*. [B, 49.]—**Rolla'**. The *Armadillo officinarum*. [B, 49.]—**Wassera'n**. The *Asellidae*. [B, 49.]

**ASSELLA** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>s)-se<sup>2</sup>li<sup>2</sup>a<sup>3</sup>. See *AXILLA*.

**ASSENAR** (Ar.), n. A species (in the pharmaceutical sense). [L, 77.]

**ASSENZIO** (It.), n. A<sup>3</sup>s-se<sup>2</sup>nt/si<sup>2</sup>-o. Wormwood. [B.] See *ABSINTHIUM*.—**A. alpinum**. See *ACHILLEA moschata*.—**A. magiore**. See *ARTEMISIA absinthium*.—**A. maritimo**. A *romano*. See *ARTEMISIA ponicca*.—**A. selvatico**. See *ARTEMISIA vulgaris*.—**Piccolo a.** See *ARTEMISIA ponicca*.—**Sale d'a.** See *Sal ABSINTHI*.

**ASSER** (Lat.), n. m. A<sup>2</sup>s(a<sup>3</sup>s)su<sup>3</sup>(se<sup>2</sup>r). Gen., *as'seris*. A splint. [L, 135.]—**A. pedibus fulcendis**. A splint for fractures of the bones of the feet. [L, 135.]

**ASSERAC**, n. See *HASCHISCHIN* and *ASSIS*.

**ASSERCULUM, ASSERCULUS** (Lat.), n's n. and m. A<sup>2</sup>s(a<sup>3</sup>s)-su<sup>3</sup>(se<sup>2</sup>r)k(u<sup>2</sup>u<sup>3</sup>)-lu<sup>3</sup>m(lu<sup>4</sup>m), -lu<sup>3</sup>s(lu<sup>4</sup>s). Dim. of *asser* (q. v.).

**ASSERIDA**, n. The native name of a Guinea plant which is chewed for pain in the stomach. [L, 105.]

**ASSERVATIO** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>s)-su<sup>3</sup>(se<sup>2</sup>r)-va(wa<sup>3</sup>)shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., *asservatio-nis*. From *asservare*, to keep, to preserve. The preservation of drugs in readiness for use. [A, 325; L, 84.]

**ASSESTRIX** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>s)-se<sup>2</sup>s'tri<sup>2</sup>x. Gen., *asses-*

*tri'cis*. From *assidere*, to sit by, to attend upon. A midwife. [A, 318.]

**ASSI**, n. A Madagascar name for the *Dracena umbraculifera*. [B, 121.]

**ASSIDENS** (Lat.), adj., pres. partic. of *assidere*, to sit by. A<sup>2</sup>s-(a<sup>3</sup>s)si<sup>2</sup>d-e<sup>2</sup>nz(e<sup>2</sup>ns). Fr., *assident*. Associated, accessory, concomitant (said of symptoms). [A, 301, 325, 385.]

**ASSIDERATION**, n. A<sup>2</sup>s-si<sup>2</sup>d-e<sup>2</sup>r-a'shu<sup>3</sup>n. From *ad*, intens., and *sideratio* (from *sidus*, a star), the stroke of a malign influence, because such strokes were formerly attributed to the evil action of certain stars. Fr., *ossidération*. A medico-legal term for homicide (especially infanticide) by forcing the victim to remain for a long time in ice-cold water, so that the cause of death may not be known. [A, 301; L, 41.]

**ASSIDUUS** (Lat.), adj. A<sup>2</sup>s(a<sup>3</sup>s)-si<sup>2</sup>d'u<sup>2</sup>(u<sup>4</sup>)-u<sup>3</sup>s(u<sup>4</sup>s). Continued (said of fevers). [Fernelius (A, 325).]

**ASSILIS** (Ar.), n. The *Selinum silvestre*. [L, 105.]

**ASSIMILABILITY**, n. A<sup>2</sup>s-si<sup>2</sup>m'i<sup>2</sup>-la<sup>3</sup>b-i<sup>2</sup>li<sup>2</sup>-i<sup>2</sup>. Fr., *assimilabilité*. Ger., *Assimilationsvermögen*. That state of an aliment in which it is capable of being assimilated; according to Burdach, its capability, while still in the intestinal canal, of assuming a form similar to that of the constituents of the blood. [A, 385; C.]

**ASSIMILABLE**, adj. A<sup>2</sup>s-si<sup>2</sup>m'i<sup>2</sup>-a<sup>3</sup>-bl'. Lat., *assimilabilis*. Fr., *assimilable*. Ger., *angleichbar*. It., *assimilabile*. Sp., *semejable*. Capable of being assimilated (said of food). [C.]

**ASSIMILATION**, n. A<sup>2</sup>s-si<sup>2</sup>m'i<sup>2</sup>-a'shu<sup>3</sup>n. Gr., *ὁμοίωσις*. Lat., *assimilatio* (from *similis*, like). Fr., *assimilation*. Ger., *Ähnlichmachung, Gleichmachung, Aneignung*. It., *assimilazione*. Sp., *asimilación*. The process by which nutritive material, having been prepared by digestion, and having been brought into molecular contact with the organism, is appropriated by the latter and becomes a part of it. [A, 385; C; K.]—**A'skraft** (Ger.). The assimilative faculty. **A'svermögen** (Ger.). See *ASSIMILABILITY*.—**De-structive a.** Fr., *désassimilation*. Ger., *zerstörende A.* Disassimilation, destructive metamorphosis; the molecular separation of any of the constituents of an organism and their reduction to the excrementitious state. [K.]

**ASSIMILATIVE**, adj. A<sup>2</sup>s-si<sup>2</sup>m'i<sup>2</sup>-a-ti<sup>2</sup>v. Lat., *assimilativus*. Fr., *assimilateur*. Ger., *ähnlichmachend*. Assimilating; having the power to assimilate. [C.]

**ASSIMILATORY**, adj. A<sup>2</sup>s-si<sup>2</sup>m'i<sup>2</sup>-a-ti<sup>2</sup>-o-ri<sup>2</sup>. See *ASSIMILATIVE*.

**ASSIMINUM** (Lat.), n. n. A<sup>2</sup>s(a<sup>3</sup>s)-si<sup>2</sup>m'i<sup>2</sup>n-u<sup>3</sup>m(u<sup>4</sup>m). Fr., *assimine*. A sort of fruit. [L, 109.] See *ASIMINA*.

**ASSIMINIA** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>s)-si<sup>2</sup>m-i<sup>2</sup>n'i<sup>2</sup>-a<sup>3</sup>. See *ASIMINIA*.

**ASSIS** (Lat.), n. m. and f. A<sup>2</sup>s(a<sup>3</sup>s)si<sup>2</sup>s. 1. An ancient name for opium or for some preparation of hemp, of an intoxicating nature, used by the Egyptians. [Prosper Alpinus (A, 325); L, 105, 116.] 2. A slice (as of a root). [Pliny (A, 318).] 3. See *ASSER*.

**ASSISTENTES** (Lat.), n., fem. pl. of partic. *assistens* (*glandulæ* understood). A<sup>2</sup>s(a<sup>3</sup>s)-si<sup>2</sup>st-e<sup>2</sup>nt(zas). Lit., the accessory glands; an old term for either the epididymides or the lobes of the prostate. [A, 325; L, 116.] Cf. *PARASTATÆ*.

**ASSITRA**, n. The *Bauhinia variegata*. [B, 121; L, 94, 104.]

**ASSIUS** (Lat.), adj. A<sup>2</sup>s(a<sup>3</sup>s)si<sup>2</sup>-u<sup>3</sup>s(u<sup>4</sup>s). Gr., *ἄσσιος*. From *Assos*, a city of Troas. Ger., *assisch*. See *LAPIS a* and *SARCOPHAGUS*.

**ASSMANNSHAUSEN** (Ger.), n. A<sup>3</sup>s-ma<sup>3</sup>ns-ha<sup>3</sup>-u-ze<sup>2</sup>n. A place on the Rhine, where there are warm springs containing sodium bicarbonate and chloride and lithium bicarbonate. [L, 57.]

**ASSOCIABLE**, adj. A<sup>2</sup>s-so<sup>2</sup>si<sup>2</sup>-a-bl'. Liable to be affected by sympathy (said of a part). [L, 56.]

**ASSOCIATÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>3</sup>s)-so(so<sup>2</sup>)-si<sup>2</sup>(ki<sup>2</sup>)-a(a<sup>3</sup>)te(ta<sup>3</sup>-e<sup>2</sup>). Of Hill, a class of herbaceous plants the type of which is *Candrus*. [B, 121.]

**ASSOCIATED**, adj. A<sup>2</sup>s-so<sup>2</sup>si<sup>2</sup>-a-te<sup>2</sup>d. Fr., *associé*. Accompanying voluntary muscular acts, but not directed by the will (said of muscular action). [L, 41.]

**ASSOCIATION**, n. A<sup>2</sup>s-so-si<sup>2</sup>-a'shu<sup>3</sup>n. Lat., *associatio* (from *associare*, to join to, to unite with). Fr., *association*. Ger., *Association, Verbindung, Vereinigung*. It., *associazione*. Sp., *asociación*. 1. A functional or structural connection (said chiefly of the structure and functions of the brain). See *A. BUNDLES*, *A. FIBRES*, *A. PARALYSIS*, and *A. SYSTEM*. 2. In chemistry, the reverse of dissociation (q. v.). [B, 196.]—**A. of ideas**. Fr., *a. des idées*. Ger., *Ideenverbindung*. That operation of the mind by which an idea or a mental impression evokes the memory of other ideas or mental impressions that at some previous time have co-existed with one similar to the former. [A, 306.]

**ASSODES** (Lat.), adj. A<sup>2</sup>s(a<sup>3</sup>s)-so<sup>2</sup>-dez(das). See *ASODES*.

**ASSOGNE**, n. Sp., *azogue* (probably from Ar., *zavaq*, mercury). Originally, mercury; hence, a vessel in which mercury was carried. [B, 52.]

**ASSONIA** [Cavanilles] (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>s)-so<sup>2</sup>-ni<sup>2</sup>-a<sup>3</sup>. See *DOMBEYA*.

**ASSOS**, n. An alchemical name for alum. [Ruland (A, 325).]

**ASSOSUNUL** (Ar.), n. *Iris florentina*. [L, 77.]

**ASSOUBLEND TCHICHEI**, n. A Turkish name for benzoic acid. [A, 259.]

**ASSOUPISSANT** (Fr.), adj. A<sup>3</sup>s-su-pe-sa<sup>3</sup>n<sup>2</sup>. Causing drowsiness. [A, 385.]

**ASSOUPISSEMENT** (Fr.), n. A<sup>3</sup>s-su-pes-ma<sup>3</sup>n<sup>2</sup>. Somnolence, drowsiness. [A, 385.]

**ASSOUPLESSEMENT** (Fr.), n. A<sup>3</sup>s-su-ples-ma<sup>3</sup>n<sup>2</sup>. A term which seems to denote a peculiar kind of softening (attributed to imbibition) which fibrous tumors of the uterus undergo during the last few days of pregnancy. [A, 24.]

**ASSOUROU**, n. A Jamaica name for the *Myrtus pimenta*, or, according to some, of the *Myrtus citrifolia*. [L, 87.]

**ASSOUVISSEMENT** (Fr.), n. A<sup>3</sup>s-su-ves-ma<sup>3</sup>n<sup>2</sup>. Satiety. [A, 385.]

**ASSRAMINA**, n. A native name of a Guinea plant which is said to kill the Guinea worm. [L, 105.]

**ASSUEFACTIO** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>s)-su<sup>2</sup>(su<sup>4</sup>)-e<sup>2</sup>(a)-fa<sup>2</sup>k(fa<sup>3</sup>k)-shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., *assuefactio*-nis. From *assuefacere*, to accustom to. Ger., *Angewöhnung*. Properly, the establishment of assuetude, but sometimes used as synonymous with that term. [A, 355.]

**ASSUETUDE**, n. A<sup>3</sup>s'swe<sup>2</sup>-tu<sup>2</sup>d. Lat., *assuetudo* (from *assuescere*, to become accustomed to). Fr., *assuetude*. Ger., *Angewohnheit*. An acquired tolerance of disturbing agencies, climatic, medicinal, toxic, etc.; that state of the organism in which it has become so habituated to an agent that the latter no longer has its former effect. [A, 385.]

**ASSUJETTISSEMENT** (Fr.), n. A<sup>3</sup>s-su<sup>2</sup>-zhe<sup>2</sup>t-tes-ma<sup>3</sup>n<sup>2</sup>. The process or means of restraining an animal on which an experiment is to be performed. [L, 49.]

**ASSULA** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>s)-su<sup>2</sup>(su<sup>4</sup>)-la<sup>3</sup>. Dim. of *assis*. Fr., *assule*. 1. A splint. [E.] 2. In zoology, the cultrass of a mammal when composed of scales united in a sort of areolated form. [Illiger (L, 180).]

**ASSULTUS** (Lat.), n. m. A<sup>2</sup>s(a<sup>3</sup>s)-sù<sup>3</sup>lt(sult)/u<sup>3</sup>s(u<sup>4</sup>s). Gen., *assultus*. From *assultare*, to leap upon. An attack (as of a disease). [L, 45.]

**ASSUMPTION**, n. A<sup>2</sup>s-su<sup>2</sup>mp/shu<sup>3</sup>n. Gr., *πρόσληψις, προσφορά*. Lat., *assumptio* (from *assumere*, to take to one's self). Fr., *assomption*. Ger., *Aufnahme, Annahme*. It., *assunzione*. Sp., *asunción*. A taking up, an appropriation (as of oxygen or nutrient material by the blood). [J, 19.]

**ASSURGENT**, adj. A<sup>2</sup>s-su<sup>2</sup>rgj'e<sup>2</sup>nt. Lat., *assurgens* (from *assurgere*, to rise up). Fr., *assurgent*. Ger., *aufstrebend*. In botany, at first depressed, and then rising so as to grow upward; ascending. [B.]

**ASSURINE**, n. A<sup>2</sup>s-u<sup>2</sup>-ren. Fr., *assurine*. Ger., *Assurin*. A substance, C<sub>16</sub>H<sub>14</sub>N<sub>2</sub>P<sub>2</sub>O<sub>9</sub> or C<sub>17</sub>H<sub>10</sub>N<sub>2</sub>P<sub>2</sub>O<sub>11</sub>, belonging to the group of diphosphatides, occurring in the alcoholic extract of cerebrine, from which myeline, sphingomyeline, and kersine have been extracted. [B, 220.]

**ASSY**, n. See *Assi*.

**ASSYOUNI**, n. An African name for an intoxicating preparation of *Cannabis indica*. [A, 259.] See *HASHESH* and *BIANG*.

**AST** (Ger.), n. A<sup>3</sup>st. A branch. [B.]—**A'achsel**. The axilla of a branch; the angle made by a branch with the stem or with another branch. [B, 198.]—**A'achselständig**. Placed in the axilla of a branch; alar. [B, 198.]—**A'ähnlich**. Resembling a branch. [B, 198.]—**A'blatt**. A leaf growing upon a branch (folium rameale). [B, 198.]—**A'gabel**. See *A'achsel*.—**A'knorren**. A knot (in wood). [B, 198.]—**A'los**. Destitute of branches. [L, 46.]—**A'moos**. See the major list.—**A'pinsel**. See *PENCILLI ramulorum*.—**A'ständig**. See *RAMULUS* and *RAMULUS*.—**A'ranke**. See *CAPREOLUS*.—**A'stiel**. See *CLADOPODIUM*.—**A'voil**. Branching; full of branches. [B, 131.]—**A'vortretend**. See *RAMENUS*.—**A'winkel**. See *A'achsel*.—**Horizontaler A.** A horizontal branch. [L, 80.]—**Horizontaler A. des Arbor vite**. A layer of white substance which extends backward from the corpus trapezoides in a line with the roof of the fourth ventricle of the brain. [L, 17; K.]—**Kleiner A.** See *RAMULUS*.—**Verticaler A. des Arbor vite**. A tract of white substance described by Schwabe as extending vertically upward from the medullary centre of the vermiform process of the cerebellum. [L, 17; K.]

**ASTACAIRE** (Fr.), adj. A<sup>3</sup>s-ta<sup>3</sup>-ka<sup>2</sup>r. See *ASTACOID*.

**ASTACIAN**, adj. A<sup>2</sup>s-ta<sup>3</sup>-sha<sup>2</sup>n. Fr., *astacien*. Belonging to the genus *Astacus* or to the family *Astacidae*. [L, 73.]

**ASTACIDÆ** (Lat.), n. f. pl. A<sup>2</sup>st(a<sup>3</sup>st)-a<sup>2</sup>s(a<sup>3</sup>k)/i<sup>2</sup>d-e(a<sup>3</sup>-e<sup>2</sup>). Fr., *astacides*. See *ASTACOIDES*.

**ASTACIFORM**, adj. A<sup>2</sup>st-a<sup>2</sup>s/i<sup>2</sup>-fo<sup>2</sup>rm. Lat., *astaciformis* (from *astacus* [= *αστακος*], a kind of lobster, and *forma*, form). Fr., *astaciforme*. Ger., *krebsförmig*. Having a shell like a crab. [B, 195.]

**ASTACII** (Lat.), n. m. pl. A<sup>2</sup>s(a<sup>3</sup>s)-ta(ta<sup>3</sup>)/si<sup>2</sup>(ki<sup>2</sup>)-i(e). Of Lamarck, see *ASTACOIDES*.

**ASTACINA** (Lat.), n. n. pl. A<sup>2</sup>s(a<sup>3</sup>s)-ta<sup>3</sup>-si(ke)/na<sup>3</sup>. A tribe of the *Crustacea*, including *Astacus*, divided into the families *Potamobiidae* and *Parastacidae*. [L, 168.] Cf. *ASTACOIDES*.

**ASTACINÆ** (Lat.), n. f. pl. A<sup>2</sup>st(a<sup>3</sup>st)-a<sup>3</sup>-si(ke)/ne(na<sup>3</sup>-e<sup>2</sup>). See *ASTACOIDES*.

**ASTACOID**, adj. A<sup>2</sup>st/a<sup>3</sup>-koid. Lat., *astacoides* (from *αστακος*, a lobster, and *ειδος*, resemblance). Fr., *astacoides*. Ger., *krebsähnlich*. Belonging to or resembling the genus *Astacus*. [L, 109, 116.]

**ASTACOIDES** (Lat.), n. m. pl. A<sup>2</sup>s(a<sup>3</sup>s)-ta<sup>3</sup>(ta<sup>3</sup>)-ko(ko<sup>2</sup>)-i(e)/dez-das). An order of *Crustacea*, or a family of decapod *Crustacea*, including *Astacus*. [B, 195.]

**ASTACOLITH**, n. A<sup>2</sup>s-ta<sup>3</sup>k-o-li<sup>2</sup>th. From *αστακος*, a lobster, and *λιθος*, a stone. Fr., *astacolithe*. Syn.: *eye-stone*, *crab-stone*. A concretion found in the stomach of the craw-fish (*Astacus fluviatilis*), consisting of calcium carbonate and a gelatinous material. These concretions, commonly termed crab's eyes (Lat., *oculi seu lapides cancerum*; Fr., *yeux* [ou *pierres*] *d'écrevisses*; Ger., *Krebsaugen*, *Krebssteine*; It., *occhi di granchio*; Sp., *ojos de can-*

*grajos*), are little hemispherical bodies formed of concentric layers, smooth, hard, and having a shallow central depression which gives them some resemblance to an eye. They were formerly used for acidity, gout, and hæmorrhages. [A, 259, 385.] See *Yeux d'écrevisses*.

**ASTACUS** (Lat.), n. m. A<sup>2</sup>st(a<sup>3</sup>st)/a<sup>3</sup>-ku<sup>2</sup>s(ku<sup>4</sup>s). Gr., *αστακος*. Fr., *astaque, écrevisse*. Ger., *Krebs*. A genus of the family *Astacoides*. It was formerly considered anaphrodisiac and a remedy for asthma and obstructions. [A, 259, 359.]—**Astaci fluviatilis concrementa**. See *ASTACOLITH*.—**A. fluviatilis**. Fr., *écrevisse*

THE ASTACUS FLUVIATILIS. [A, 327.]

*de rivière*. Ger., *Flusskrebs, Bachkrebs*. It., *cammaro*. The crawfish, cray-fish, or river-lobster; a species found in the United States and in Europe. Its flesh is esteemed as an article of food, and in its stomach are found the concretions known as crab's eyes (see *ASTACOLITH*). [A, 327; L, 65.]—**A. homarus**, **A. marinus**. The lobster. [L, 128.] See *HOMARUS vulgaris*.

**ASTA DE CIERVO** (Sp.), n. A<sup>3</sup>s-ta<sup>3</sup> da the-e<sup>2</sup>r'vo. See *Cornu CERVI*.

**ASTAKILLOS** (Lat.), n. m. A<sup>2</sup>st(a<sup>3</sup>st)-a<sup>3</sup>-ki<sup>2</sup>/l'o<sup>2</sup>s. Probably a dim. of *αστακος*, a kind of lobster. See *ASTACHACHIOS*.

**ASTANTES** (Lat.), n. m. and f. pl. A<sup>2</sup>st(a<sup>3</sup>st)-a<sup>2</sup>nt(a<sup>3</sup>nt)/ez(as). From *astare*, to stand by. An old term for nurses. [M, 59.]

**ASTAPHIS** (Lat.), n. f. A<sup>2</sup>st(a<sup>3</sup>st)/a<sup>3</sup>-fi<sup>2</sup>s. Gen., *astaphidos* (-dis). Gr., *ασταφίς*. 1. A raisin; especially the Corinthian raisin. [L, 94.] 2. Staphisagria. [B, 217.]—**A. agria** [Pliny]. See *STAPHISAGRIA*.

**ASTAPHYS** (Lat.), n. f. A<sup>2</sup>st(a<sup>3</sup>st)/a<sup>3</sup>-fi<sup>2</sup>s(fu<sup>6</sup>s). See *ASTAPHIS* (1st def.).

**ASTAQUE** (Fr.), n. A<sup>3</sup>st-a<sup>3</sup>k. See *ASTACUS*.

**ASTARACH**, n. Ar., *aç'arak*. The *Styrax officinale*. [B, 121.]

**ASTARTIF**, n. An African name for chamomile. [L, 105.]

**ASTARZOF**, n. A term applied by Paracelsus to an ointment made with  $\frac{1}{2}$  oz. of washed litharge,  $\frac{1}{2}$  oz. of frog-spawn, and 3 oz. each of the juice of the house-leek and of the water-lily; also to a mixture of 1 oz. of camphor and 2 oz. of rose-water. [L, 94.]

**ASTASIA** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>s)-ta(ta<sup>3</sup>)/zi<sup>2</sup>(si<sup>2</sup>)-a<sup>3</sup>. Gr., *αστασία* (from a priv., and *στάσις*, to be stationary). Fr., *astatie*. Ger., *Astasie*. It., *astasi*. Sp., *astasis*. 1. Great restlessness with fluctuation. [A, 322.] 2. Muscular unsteadiness, tremor. [M, 3.] 3. A genus of *Infusoria* (*Flagellata-Eustomata*), made by Ehrenberg. [B, 208.]

**ASTASIÆ** [Perty] (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>3</sup>s)-ta(ta<sup>3</sup>)/zi<sup>2</sup>(si<sup>2</sup>)-e(a<sup>3</sup>-e<sup>2</sup>). A family of *Infusoria*, including *Astasia* and other genera. [B, 208.] See *ASTASIADÆ*.

**ASTASIÆA** (Lat.), n. n. pl. A<sup>2</sup>s(a<sup>3</sup>s)-ta<sup>2</sup>s(ta<sup>3</sup>s)-i<sup>2</sup>-e(a<sup>3</sup>/e<sup>2</sup>)-a<sup>3</sup>. A family of *Infusoria*, made by Ehrenberg, comprising genera such as *Astasia*, which are anenterous, without appendages (pseudopodia), of changeable form, and illoricate. [B, 208.]

**ASTASIADÆ** (Lat.), n. f. pl. A<sup>2</sup>s(a<sup>3</sup>s)-ta<sup>2</sup>s(ta<sup>3</sup>s)-i<sup>2</sup>(i<sup>2</sup>)/a<sup>3</sup>-de(-da<sup>3</sup>-e<sup>2</sup>). A family of flagellate infusorians (*Eustomata*), including those with single flagellum (*Monomastiga*), of very changeable form (metabolic) and with colorless endoplasm. [B, 208.]

**ASTASINA** (Lat.), n. n. pl. A<sup>2</sup>s(a<sup>3</sup>s)-ta<sup>2</sup>-si(se)/na<sup>3</sup>. A family of the *Euglenoidea*, colorless, metabolic or stiff, and provided with a supplementary paraflagellum. [L, 121.]

**ASTATHE**, n. A<sup>2</sup>s-tath<sup>3</sup>. From *ασταθής*, unstable. Fr., *astathe*. The innermost layer of cellulose in vegetable cells. [Hartig (A, 385).]

**ASTATIC**, adj. A<sup>2</sup>s-ta<sup>2</sup>t/i<sup>2</sup>k. Lat., *astaticus* (from a priv., and *στατικός*, bringing to a stand-still. Fr., *astatique*. Ger., *astatisch*. It., *astatico*. Sp., *astático*. 1. Unstable, constantly in motion (said of the needle of a galvanometer). [A, 385.] 2. Free to move, not affected by the earth's magnetism (said of a magnetic needle that is made free to move in any direction—usually by connecting to the axis on which it revolves a parallel needle with its poles reversed). [B.]

**ASTACHACHIOS** (Lat.), n. m. A<sup>2</sup>st(a<sup>3</sup>st)-ka<sup>3</sup>(ch<sup>2</sup>a<sup>3</sup>)/ki<sup>2</sup>(ch<sup>2</sup>e)/lo<sup>2</sup>s. Syn.: *araneum*. A malignant gangrenous ulcer of the foot, spreading to the leg, attributed to the presence of a mercurial salt in the blood. [Paracelsus (A, 325).]

**ASTEATODES** (Lat.), adj. A<sup>2</sup>s(a<sup>3</sup>s)-te(te<sup>2</sup>)-a<sup>3</sup>-to/dez-das). From a priv., and *στεατός*, tallow-like. Deficient in or destitute of sebaceous secretion; as a n. see *ASTEATOSIS*. [G.]

**ASTEATOSIS** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>s)-te(te<sup>2</sup>)-a<sup>3</sup>-to/si<sup>2</sup>s. Gen., *asteato/seos* (-sis). For deriv., see *A\**, *STEARIN*, and *-osis*. Fr., *asteatose*. Ger., *Asteatose*. It., *asteatosi*. Sp., *asteatosis*. A deficiency of sebum or of fat; in the pl., *asteatoses*, in Auspitz's classification of skin diseases, a family of the *steatoses*, comprising xeroderma congenita and xeroderma acquisita, characterized by absence or deficiency of the sebaceous secretion. [G, 4.]

**ASTELIA** (Lat.), n. f.  $A^2s(a^2s)\text{-}te(ta)/li^2a^3$ . From  $\alpha$  priv., and  $\sigma\tau\acute{\eta}\lambda\eta$ , a column. Fr., *astélie*. 1. A genus of liliaceous plants belonging to the tribe *Dracaceæ*. [Banks and Soander (B. 42).] 2. The state of being astelic. ["Ann. des sci. nat. (Bot.)," 1886, p. 275 (B).] — **A. alpina**. A Tasmanian species having a very short flattened scape bearing at its apex a dense panicle of chestnut-colored flowers. The hairy linear leaves are edible. [B. 19.]

**ASTELIACEÆ** [Dumortier], **ASTELIÆ** [Endlicher] (Lat.), n's f. pl.  $A^2s(a^2s)\text{-}te^2l(ta)/i^2a^3\text{-}se^2(ke)^2e(a^2e^2)$ ,  $i^2e^2/e^2e(a^2e^2)$ . A family of plants related to the *Juncaceæ* (by some made a sub-order of the latter), including the genus *Astelia*, which is now referred to the *Liliaceæ*. [B. 170.]

**ASTELIC**, adj.  $A^2s\text{-}te^2l/i^2k$ . Fr., *astélique*. Having no central cylinder, or stele (said of the stems of plants). ["Ann. des sci. nat. (Bot.)," 1886, p. 275 (B).]

**ASTELIS** (Lat.), adj.  $A^2s(a^2s)\text{-}te(ta)/li^2s$ . From  $\alpha$  priv., and  $\sigma\tau\acute{\eta}\lambda\eta$ , a column. Without support, pedicel, or podetium; a term applied to lichens. [B. 123.]

**ASTEMON** (Lat.), n. m.  $A^2s(a^2s)\text{-}te(ta)/mo^2n(mon)$ . Gen., *astemonos* (-is). From  $\alpha$  priv., and  $\sigma\tau\acute{\eta}\mu\omega\nu$ , a thread. A genus of labiate plants. [B. 19.] — **A. graveolens**. A shrub, 6 to 8 feet in height, of disagreeable odor, growing in Bolivia. [B. 19.]

**ASTELLE** (Fr.), n.  $A^2s\text{-}te^2l$ . A splint. [L. 100.]

**ASTEOS** (Lat.), adj.  $A^2s(a^2s)\text{-}te(ta)/o^2s$ . Gr., *ἀστεῖος*. Lit., pleasant; harmless, non-poisonous (said of plants). [Hippocrates (A. 325).]

**ASTEPHANÆ** [Decaisne], **ASTEPHANÆÆ** [Reichenbach] (Lat.), n's f. pl.  $A^2s(a^2s)\text{-}te^2f(a^2\text{-}ne(na^2e^2))\text{-}te^2f\text{-}a^2n(a^2n)/e^2e(a^2e^2)$ . A division of asclepiadaceous plants, including *Astephanus* and 3 or 4 other genera. As defined by Decaisne, it includes those of the *Asclepiadaceæ* *veræ* in which the throat of the corolla is devoid of scales and the stamens have no corona. [B. 121, 170, 214.]

**ASTER** (Lat.), n. m.  $A^2s(a^2s)/tu^2r(tar)$ . Gen., *asteris*. Gr., *ἀστρον*. Fr., *aster* (1st def.), *étoile mère* (1st def.). Ger., *Stern* (1st def.), *Sternform* (1st def.), *Sternblume* (3d def.). 1. That phase or condition (*star*, *mother-star*, *astral* or *stellate* phase or figure) of a dividing nucleus in which the fibrils are in open loops and arranged around a common centre, thus producing the appearance of a star; also a star-like figure that appears in an ovum, in the vitelline plasma between the lacuna and the surface, after the disappearance of the germinal spot (Cf. AMPHIASTER). [A. 15; J. 30, 32; Flemming, "Arch. f. mikr. Anat.," 1878, 1880 (J).] 2. An ancient name for a very white earth, used as a hæmostatic. [Aretæus (A. 322).] Cf. *TERRA samia*. 3. A genus of composite plants, established by Tournefort, belonging to the tribe *Asteroideæ*, subtribe *Heterochromææ*, including leafy-stemmed herbs with hemispherical or campanulate, sometimes oblong or turbinate, involucre, consisting of several rows of imbricated, unequal, generally herbaceous, bracts; flowers with numerous, not very narrow rays and slender-subulate, lanceolate, or ovate-acute style-appendages; and fruit consisting of compressed 2 to 10-nerved achenia with abundant, usually simple pappus. The genus *A.* includes 2 series: (a) perennial herbs with many-headed rhizome, and (b) annuals or biennials. The first series includes the sections *Amellastrum*, with 2 to 3 rows of slightly unequal bracts, the outer foliaceous or herbaceous at the tip, and with broad, obovate, usually flat achenia with callous nerves at the margin only; *Megalastrum*; *Heleastrum* (the genus *Heleastrum* of DeCandolle); *Hesperastrum*; *Biotia* (the genus *Biotia* of DeCandolle), having corymbosely cymose heads, campanulate involucre of subcoriaceous, appressed, obtuse bracts, 6 to 18 rays, subulate-lanceolate style-appendages, achenia, usually linear, but little compressed, and with 3 or more ribs and slightly rigid simple pappus, and having the radical and lower cauline leaves cordate and long-petiolate; *Aster* proper (*Euaster*), including most of the species, having bracts either foliaceous or with green herbaceous tips and non-scarious margins, obovate-oblong or linear achenia with 3 or more nerves and usually fine, soft, simple pappus; *Erigerastrum*; *Doellingeria*; *Ianthæ*; and *Orthomeris*, with imbricated, appressed bracts without foliaceous or herbaceous tips and often scarious at the edge, and with fertile rays. The second series includes *Oxytripolium*, *Conyzopsis*, and *Machæranthra*. [B. 215.] — **A. acris** [Linnaeus]. See *A. tripolium*. — **A. alpinus** [Linnaeus]. A species with violet rays belonging to the section *Amellastrum*, growing in Europe on the Alps and Pyrenees, in the Caucasian Mountains and Siberia, and in the Arctic regions of North America and the northern Rocky Mountains. [B. 214, 215.] — **A. amelloides** [Besser, Reichenbach, Römer]. Different varieties of *A. amellus*. [B. 214.] — **A. amellus** [Linnaeus]. Gr., *ἀστρον* *ἀρούκας*. Fr., *œil de Christ*. Ger., *blaue A.* A species belonging to the section *Amellastrum*, growing in central and southern Europe and western Asia, of which several varieties are described. Its herb and root, *radix et herba bubonii* (seu *asteris atticæ*), were formerly employed in inflammatory buboes, hernias, and diseases of the eyes. [B. 180, 214.] — **A. amoenus** [Lamarck]. See *A. puniceus*. — **A. annuus** [Linnaeus]. See *ERIGERON annuus*. — **A. argophyllus** [Labillardière]. See *OLEARIA argophylla*. — **A. artemisiæ folius** [Poirét]. See *A. Tradescanti*. — **A. atticus** [Dod.] Gr., *ἀστρον* *ἀρούκας*. See *A. amellus*. — **A. atticus montanus villosus, magno flore** [Bauhin]. The *Inula montana* [Linnaeus]. [B. 211.] — **A. bessarabicus** [Bernhardi]. A variety of *A. amellus*. [B. 214.] — **A. bifrons** [Allioni]. See *INULA bifrons*. — **A. blaudus** [Todd, Pursh]. See *A. puniceus*. — **A. britannicus** [Allioni]. See *INULA britannica*. — **A. eschscherioides** [Nees]. See under *ASTEREÆ*. — **A. chinensis** [Linnaeus]. See *CALLISTEPHUS chinensis*. — **A. eschscherioides** [Nees]. See under *ASTEREÆ*. — **A. Collinsii** [Nuttall]. See *SERIOCARPUS tenuifolius*. — **A. confertus** [Hort. par.] The *A. puniceus*, var. *laticaulis*. [B. 215.] — **A. conyzoides**. See *ERIGERON acris*. — **A. conyzoides flore luteo**. See *PULICARIA dysenterica*. — **A. cordifolius**. 1. Of Linnaeus, the heart-leaved a., a species belonging to the section *Aster* proper, found throughout the eastern half of the United States

and in Canada. 2. Of Michaux, the *A. corymbosus*. [B. 215.] — **A. corymbosus** [Aiton]. Syn., *Biotia* [DeCandolle] (seu *Eurybia* [Cassin]) *corymbosa*. A species belonging to the section *Biotia*, found in the Atlantic United States and Canada. [B. 215.] — **A. crispus** [Forskål]. A species referred to *Pulicaria* (q. v.). [B. 42.] — **A. divaricatus** [Linnaeus]. See *A. corymbosus*. — **A. Durandi** [Nuttall]. See *A. Menziesii*. — **A. dysentericus** [Scopoli]. See *PULICARIA dysenterica*. — **A. ericoides** [Melloti, agraria umbone [Dillenius]. A variety of the *A. vinineus*. [B. 215.] — **A. firmus** [Nees]. A variety of *A. puniceus*. [B. 215.] — **A. flexuosus** [Nuttall]. The *A. tenuifolius* [Linnaeus]. [B. 215.] — **A. foliolosus** [Aiton]. A variety of the *A. vinineus* [Lamarck]. [B. 215.] — **A. fragilis**. 1. Of Willdenow, the *A. Tradescanti*. 2. Of Nees, the *A. vinineus* [Lamarck]. — **A. fruticosus** [Linnaeus]. *A. fruticosus* [Willdenow]. Syn.: *Diplopappus fruticosus* [Less.] (et *obtusatus* [Less.]). A species growing at the Cape of Good Hope. [B. 214.] — **A. eschscherioides** [Nees]. See under *ASTEREÆ*. — **A. helenium [Scopoli]. See *INULA helenium*. — **A. heterophyllum [Willdenow]. The *A. cordifolius* [Linnaeus]. [B. 215.] — **A. hirtus** [Scopoli]. See *INULA hirta*. — **A. hispidus** [Lamarck]. See *A. puniceus*. — **A. ibericus** [Stev.]. A variety of *A. amellus*. [B. 214.] — **A. indicus** [Linnaeus]. See *LOTONIA indica*. — **A. inguinalis**. See *ERYNGIUM campestre*. — **A. javanensis** [Gac.]. See *BOLTONIA indica*. — **A. latifolius glaber** [Moris.]. *A. latifolius autumnalis*. The *A. cordifolius* [Linnaeus]. [B. 211.] — **A. leucanthemus** [Desfontaines]. See *A. Tradescanti*. — **A. linosyris** [Bernhardi]. Fr., *dorelle*. Syn.: *Linosyris vulgaris* [Cassin] (et *foliosa* [Cassin]), seu *nuperorum* [Lob.], *Chrysocoma* [Linnaeus] (seu *Crinitaria* [Less.], seu *Erigeron* [Clair.]) *linosyris*. A perennial European species said to be anethelmintic and deobstruent. [B. 42, 173, 214.] — **A. lucidus** [Wenderoth]. The *A. puniceus*, var. *lucidulus*. [B. 215.] — **A. luteus radice odora**. The *Inula* (*Pulicaria*) *odora*. [B. 211.] — **A. Menziesii** [Lindley]. Syn.: *A. Durandi* [Nuttall]. A California species, belonging to the section *A.* proper, enumerated among the medicinal plants. [B. 215; "Proc. of the Am. Pharm. Assoc.," xix, p. 302 (B).] — **A. miser**. 1. Of Aiton, the *A. Tradescanti*. 2. Of Linnaeus, a variety of the *A. vinineus* [Lamarck]. [B. 215.] — **A. odoratus** [Allioni]. See *PULICARIA odora*. — **A. officinalis** [Allioni]. See *INULA helenium*. — **A. omnium maximus**. The *Inula helenium*. [B. 211.] — **A. eschscherioides** [Nees]. See under *ASTEREÆ*. — **A. palustris** [Lamarck]. See *A. tripolium*. — **A. paniculatus**. 1. Of Nees and Willdenow, the *A. cordifolius*. 2. Of Lamarck, a species, belonging to the section *A.* proper, growing throughout the United States and Canada. [B. 215.] — **A. pannonicus** [Jacquin]. A variety of *A. tripolium*. [B. 214.] — **A. parviflorus** [Nees]. See *A. Tradescanti*. — **A. persoonoides** [Cum.]. See *OLEARIA argophylla*. — **A. peruvianus**. The *Helianthus tuberosus*. [B. 59.] — **A. eschscherioides** [Nees]. See under *ASTEREÆ*. — **A. pratensis autumnalis conyzæ folio**. The *Pulicaria dysenterica*. [B. 211.] — **A. pseudo-amellus** [DeCandolle]. A variety of *A. amellus*. [B. 214.] — **A. pulicaria** [Allioni]. *A. pulicarius* [Scopoli]. See *PULICARIA vulgaris*. — **A. puniceus** [Linnaeus]. Rough-stemmed a., red-stalked a.; a species belonging to the section *A.* proper, growing in Canada and the northern, central, and Atlantic districts of the United States. It has a stem from 3 to 7 feet in height, covered with spreading bristles and often red or purple in color. The *A. puniceus*, var. *lenticaulis*, is lower, and the stem, which is usually green, is almost completely devoid of bristly appendages; and the *A. puniceus*, var. *lucidulus*, which is also lower and has a glabrous stem, has somewhat lucid leaves. This species is counted among the medicinal plants. [B. 215; "Proc. of the Am. Pharm. Assoc.," xxix, p. 442 (B).] — **A. salicifolius** [Scholler]. A variety of *A. paniculatus* [Lamarck]. [B. 215.] — **A. salicinus** [Scopoli]. See *INULA salicina*. — **A. salinus** [Schrader]. A variety of the *A. tripolium*. [B. 214.] — **A. samius**. See *A.* (3d def.). — **A. scabrosus** [Bertol.]. See *SERIOCARPUS tortifolius*. — **A. secundiflorus** [Desfontaines]. The *A. vinineus* [Lamarck]. [B. 215.] — **A. simplex** [Torrey and Gray]. The *A. paniculatus* [Lamarck]. [B. 215.] — **A. sparsiflorus** [Pursh]. The *A. tenuifolius* [Linnaeus]. [B. 215.] — **A. eschscherioides** [Nees]. See under *ASTEREÆ*. — **A. tenuifolius**. 1. Of Linnaeus, a species belonging to the section *Orthomeris*, growing in salt marshes along the Atlantic coast of the United States. 2. Of Nees, in part, the *A. paniculatus* [Lamarck]. 3. Of Elliott, the *A. vinineus* [Lamarck]. [B. 215.] — **A. thalassius**. Gr., *ἀστρον* *θαλάσσιος*. Syn.: *stella marina*. 1. A certain marine zoophyte which, together with a species of *Brassica* and aromatic wine, was recommended by Hippocrates for the so-called ascent of the womb and for hysterical pains. [A. 325.] 2. An ancient name for a medicament used for catarrh and for various pains. [Galen (A. 325).] — **A. eschscherioides** [Nees]. See *A. thalassius*. — **A. tortifolius** [Michaux]. See *SERIOCARPUS tortifolius*. — **A. Tradescanti** [Linnaeus]. The *Michaelmas daisy*; a species belonging to the section *A.* proper, growing throughout the United States. It is enumerated among the medicinal plants. [B. 215; "Proc. of the Am. Pharm. Assoc.," xxix, p. 442 (B).] — **A. tripolium**. Syn.: *Tripolium vulgare* [Nees]. 1. Of Linnaeus, a species of which several varieties are enumerated, growing in Europe and northern Asia. Its ash contains a large amount of soda, potash, and sodium chloride. 2. Of Walter, the *A. tenuifolius* [Linnaeus]. [B. 196, 214, 215.] — **A. undulus** [Mönch]. See *PULICARIA dysenterica*. — **A. vinineus**. 1. Of Nees, the *A. puniceus*, var. *lenticaulis*. 2. Of Lamarck, a species belonging to the section *A.* proper, found in moist ground throughout the eastern half of the United States and in Canada. [B. 215.] — **A. virginianus parvis floribus Tradescanti** [Moris.]. See *A. Tradescanti*. — **Blaue A.** (Ger.). See *A. amellus*. — *China*. Ger., *chinesische A.* See *CALLISTEPHUS chinensis*. — *Heart-leaved a.* See *A. cordifolius*. — *Herba asteris atticæ*. The herb of *A. amellus*. [B. 180.] — *Herba asteris conyzoidis*. The herb of *Erigeron acris*. [B. 180.] — *Jährige A.* (Ger.). See *ERIGERON heterophyllum*. — *Radix asteris atticæ*. The root of *A. amellus*. [B. 180.] — *Radix asteris conyzoidis flore luteo*. The root of *Pulicaria dysenterica*. [B. 180.] — *Radix asteris inguinalis*. The root of *Eryngium campestre*. [B. 180.] — *Red-stalked a.*, *Rough-stemmed a.* See *A. puniceus*.****

**ASTEROLINON, ASTEROLINUM** (Lat.), n's. n.  $A^2s(a^3s)''te^2r-o(o^2)''li(e)''no^2n$ , - $nu^2n(nu^2m)$ . From  $\alpha\sigma\tau\eta\rho$ , a star, and  $linum$ , flax. Fr., *asterolinon*. A genus of primulaeaceae plants closely related to *Lysimachia*, from which it differs in having minute corollae and capsules with few seeds. [B. 19.]—**A. linum stellatum** [Link and Hoff.], **A. stellatum**. Syn.: *Lysimachia linum stellatum* [Linnæus]. A small annual plant with pale-red, star-shaped flowers, and flax-like leaves, growing in France. [B. 243.]

**ASTEROMA** [De Candolle] (Lat.), n. n.  $A^2(a^3s)''te^2r-o''ma^3$ . Gen., *asteromatos (-tis)*. Fr., *astérome*. A genus of microscopic *Fungi* parasitic on the upper surface of leaves. [L. 109.]—**A. rosæ**. A species attacking roses. [B. 61.]

**ASTEROMEI** (Lat.), n. m. pl.  $A^2s(a^3s)''te^2r-o(o^2)''me^2i(e)$ . Fr., *astéromées*. Of Leveille, a section of *Fungi* belonging to the *Endospori* (*Endoclini*), having horny conceptacles opening by a pore at the apex and supported by a receptacle composed of radiating fibres. [B. 121, 170.]

**ASTEROMEA** (Lat.), n. f.  $A^2s(a^3s)''te^2r-o(o^2)''me''(mo^2e^2)''a^3$ . A genus of composite plants, made by Blume; now regarded as a section of *Boltonia*. [B. 42.]—**A. indica** [Blume]. See *BOLTONIA indica*.

**ASTROPHORA** (Lat.), n. n. pl.  $A^2s(a^3s)''te^2r-o^2f''o^2r''a^3$ . From  $\alpha\sigma\tau\eta\rho$ , a star, and  $\phi\omega\sigma\epsilon\iota\nu$ , to bear. A suborder of the *Choristida*, the microclere of which is an aster. [L. 121.]

**ASTROPHORIDEÆ** (Lat.), n. f. pl.  $A^2s(a^3s)''te^2r-o(o^2)''fo''(fo^2)''ri^2d''e^2e(a^2e^2)$ . Fr., *astérophoridées*. A division of *Hymenothecæ* (*Cænomacæ*), made by Gray. [B. 170.]

**ASTROPHRYDIDÆ** (Lat.), n. f. pl.  $A^2s(a^3s)''te^2r-o^2f''ri^2d''(ru^2d)''i^2d''e(a^2e^2)$ . 1. A family of the *Opisthoglossa* made by Günther. [L. 204.] 2. A family of the *Arceferi* having opisthocæalous vertebrae. [E. D. Cope, "Nat. Hist. Rev.," 1865, p. 104 (L); L. 204.]

**ASTROPHYLLITÆ** (Lat.), n. f. pl.  $A^2s(a^3s)''te^2r-o(o^2)''i^2l''(fu^2l)''li(e)''te''(ta^2e^2)$ . A family of fossil *Equisetaceæ*, made by Brongniart. [B. 170.]

**ASTÉROSPHÉRIE** (Fr.), n.  $A^2s$ - $ta$ - $ro$ - $sfa$ - $re$ . Itzigsohn's name for a star-shaped body which develops in the *Conjugatæ* at the point at which conjugation takes place, and which is regarded by him as the male generative element. [B. 121.]

**ASTÉROSCOPIE** (Fr.), n.  $A^2s$ - $ta$ - $ro$ - $sco$ - $pe$ . From  $\alpha\sigma\tau\eta\rho$ , a star, and  $\sigma\kappa\omicron\upsilon\epsilon\iota\nu$ , to observe. Divination by examining stars. [A. 385.]

**ASTEROSONDYLIA** (Lat.), n. f.  $A^2s(a^3s)''te^2r-o(o^2)''spo^2n''i^2l''(du^2l)''i^2a^3$ . From  $\alpha\sigma\tau\eta\rho$ , a star, and  $\sigma\tau\acute{o}\nu\delta\upsilon\lambda\omicron\varsigma$  (=  $\sigma\phi\acute{o}\nu\delta\upsilon\lambda\omicron\varsigma$ ), a vertebra. The development of osseous rays around the double cone represented by the bodies of the vertebrae, as in certain of the *Plagiostomi*. [A. 385.]

**ASTEROSPORIUM** (Lat.), n. n.  $A^2s(a^3s)''te^2r-o(o^2)''spo''(spo^2)''ri^2-u^2m(u^2m)$ . From  $\alpha\sigma\tau\eta\rho$ , a star, and  $\sigma\pi\acute{o}\rho\omicron\varsigma$ , a seed. A genus of *Fungi* (*Stilbosporæ*), made by Kunze. [B.]

**ASTEROSTIGMEÆ** (Lat.), n. f. pl.  $A^2s(a^3s)''te^2r-o(o^2)''sti^2g''me^2e(a^2e^2)$ . Of Schott, a tribe of araceae plants belonging to the section *Effilamentatæ*, subsection *Pachyzugmaticeæ*. [B. 121.]

**ASTHENEMA** (Lat.), n. n.  $A^2s(a^3s)''the^2n''e(a)''ma^3$ . Gen., *asthenematos (-tis)*. Gr.,  $\alpha\sigma\theta\acute{\epsilon}\nu\eta\mu\alpha$ . See **ASTHENIA**.

**ASTHENES** (Lat.), adj.  $A^2s(a^3s)''the^2n''ez(as)$ . Gr.,  $\alpha\sigma\theta\acute{\epsilon}\nu\eta\varsigma$ . Feeble, sickly, infirm. [Hippocrates (A. 325).] Cf. **ASTHENIC**.

**ASTHENIA** (Lat.), n. f.  $A^2s(a^3s)''the^2n''i(e)''a^3$ . Gr.,  $\alpha\sigma\theta\acute{\epsilon}\nu\eta\epsilon\alpha$  (from  $\alpha$  priv., and  $\sigma\theta\acute{\epsilon}\nu\omicron\varsigma$ , strength). Fr., *asthénie*. Ger., *Asthenie*, *Schwäche*, *Kraftlosigkeit*. It., *astenia*. Sp., *astenia*. 1. Infirmité, debility. [Galen (A. 325).] 2. That state of an individual in which he is not really sick, but is prone to be affected by morbid influences. [Hippocrates (L. 41).] 3. According to the Brunonian nosology, one of the fundamental divisions (the other being *sthenia*), characterized by weakness and lassitude. Brown regarded disease as a departure from the normal irritability; named an increase of the latter *sthenia*, and a decrease *a.*; and classed fevers as sthenic or asthenic, according as they were attended with a full, strong pulse or a small, weak, and thready pulse. [D. 3; Samuel (M. 1).] 4. According to Sauvages, weakness of the organs of animal life. [L. 87.]—**Alcoholic a.** A condition, imputed to the habitual use of alcohol, in which sensations are felt that seem to depend on a flagging of the heart's power (notably a feeling of depression or sinking, referred to the locality of the stomach or to some point within the chest), and are relieved for the time being by taking alcohol. [B. W. Richardson, "Asclepiad," iii, 3, p. 193.]—**Ab inanitione**. A. resulting from hemorrhages or morbid fluxes. [L. 132.]—**A. ab osteosarcosi**. The debility of osteomalacia. [L. 132.]—**A. abstinentinum**. Weakness due to abstinence from food. [L. 132.]—**A. a hydrocephalo**. A. due to hydrocephalus. [L. 132.]—**A. americana**. A form of a. observed in scorbutic persons who are addicted to strong drink. [L. 132.]—**A. a pathematia**. A. due to mental disturbances. [L. 132.]—**A. aphrodisiaca**. Sterility. [Young (L. 83).]—**A. cachectica**. The debility of scrofulous children. [L. 132.]—**A. chlorotica**. The a. of scurvy. [L. 132.]—**A. deglutitionis** [Young]. See *DYSPHAGIA atonica*.—**A. dolorifica**. Angina pectoris. [Darwin (L. 134).]—**A. febrilis**. The feeling of lassitude that precedes severe diseases. [L. 132.]—**A. hydrocephali**. **A. hydrocephalica**. See *A. a hydrocephalo*.—**A. hysterica**. Debility due to hysteria. [L. 132.]—**A. infantum**. The marasmus of children. [L. 132.]—**A. nativa**. Congenital weakness. [L. 132.]—**A. ossifraga**. A debilitating disease attributed to the use of *Narthecium ossifragum*. [L. 132.]—**A. panonica**. See *AMPEMERINA hungarica*.—**A. pectoralis**. Angina pectoris. [Young (L. 134).]—**A. scorbutica**. Weakness due to scurvy. [L. 132.]—**A. syphilitica**. A. due to syphilitic infection. [L. 132.]—**A. virginica**. A form of a. characterized by wakefulness, loss of appetite, and emaciation, observed among the early settlers in America. [L. 132.]—**A. vocis** [Young]. See *PSSELLISMUS dentiloquens*.—**Local a.** Fr., *asthénie locale*. Loss or impairment

of function of any organ or set of organs (*e. g.*, muscular a.). [L. 41.]—**Muscular a.** Fr., *asthénie musculaire*. Weakness of certain groups of muscles. Pinel made five varieties: 1. Weakness of voluntary movements. 2. Paralysis. 3. Muscular tremor. 4. Contracture. 5. Torticollis. [L. 41.]—**Nervous a.** A lowering of the tone of the nervous system. [A. Flint, "N. Y. Med. Jour.," Nov. 29, 1884, p. 597 (D).] Cf. **NEURASTHENIA**.—**Structural a.** A normal or pathological weakness of parts or tissues which prevents their effective resistance to opposing forces. [W. D. Schuyler, "N. Y. Med. Jour.," Dec. 1, 1885, p. 596 (D).]—**Typhoid a.** A weak and depressed condition of the system in which, while no definite type of disease is present, more or fewer of the symptoms of the typhoid condition are manifest. [D. 1.]

**ASTHENIC**, adj.  $A^2s$ - $the^2n''i^2k$ . Gr.,  $\alpha\sigma\theta\acute{\epsilon}\nu\eta\varsigma$ . Lat., *asthenes*, *asthenicus*. Fr., *asthénique*. Ger., *asthenisch*. It., *astenico*. Sp., *asténico*. Of the nature of, depending on, characterized by, or causing, asthenia. [A. 322; L. 105.] See *A. FEVER* and *ADYNAMIC*.

**ASTHENICOPYRA, ASTHENICOPYRETOS, ASTHENICOPYRETUS** (Lat.), n's f., m., and m.  $A^2s(a^3s)''the^2n''i^2k''o^2p''i^2(u^2)''ra^3$ , - $o(o^2)''pi^2r(pu^2r)''e^2t''o^2s$ , - $u^2s(u^2s)$ . See **ASTHENOPYRA**.

**ASTHÉNIE** (Fr.), n.  $A^2s$ - $ta$ - $ne$ . See **ASTHENIA**.—**A. cérébrale**. Cerebral exhaustion. [L. 41.]—**A. surrénale**. See *ADDITION'S DISEASE*.

**ASTHENOGENIA** (Lat.), n. f.  $A^2s(a^3s)''the^2n''o(o^2)''je''(ge^2)''ni^2a^3$ . From  $\alpha\sigma\theta\acute{\epsilon}\nu\eta\epsilon\alpha$  (see **ASTHENIA**) and  $\gamma\acute{\epsilon}\nu\eta\epsilon$  (=  $\gamma\acute{\iota}\nu\epsilon\sigma\theta\acute{\alpha}\iota$ ), to come into existence. Fr., *asthénogénie*. The production of asthenia. [A. 322.]

**ASTHENOLOGY**, n.  $A^2s$ - $the^2n''o(o^2)''l''o''ji^2$ . Lat., *asthenologia* (from  $\alpha\sigma\theta\acute{\epsilon}\nu\eta\epsilon\alpha$ , asthenia, and  $\lambda\acute{o}\gamma\omicron\varsigma$ , understanding). Fr., *asthénologie*. Ger., *Asthenologie*. The study, science, or doctrine of asthenia. [A. 322.]

**ASTHENOMACROBIOtica** (Lat.), n., f. of adj. *asthenomacrobiocticus* (ars understood).  $A^2s(a^3s)''the^2n''o(o^2)''ma^2i''k''(ma^2)''k''ro^2(u^2)''bi''(h^2)''i^2l''o^2t''i^2k''a^3$ . From  $\alpha\sigma\theta\acute{\epsilon}\nu\eta\epsilon\alpha$ , asthenia, and  $\mu\alpha\kappa\rho\beta\iota\omicron\varsigma$ , long-lived. Ger., *Asthenomakrobiotik*. The art of prolonging a life which is naturally feeble. [D. 18.]

**ASTHENOPIA** (Lat.), n. f.  $A^2s(a^3s)''the^2n''o(o^2)''pi^2a^3$ . From  $\alpha\sigma\theta\acute{\epsilon}\nu\eta\varsigma$ , weak, and  $\omicron\upsilon\varsigma$ , the power of sight. Fr., *asthénopie*, *amblyopie presbytique*. Ger., *Asthenopie*, *Gesichtsermüdung*, *Augenschwäche*, *Schwachichtigkeit*. It., *astenopia*. Sp., *astenopia*. Syn.: *copiopia*, *hebetudo* (seu *debititas*) *visus*. Impaired vision, weak-sightedness; a peculiar condition described by Donders, consisting of more or less inability to use the eyes continuously for close work without the occurrence of one or more of the following symptoms; fatigue, tension, or a strained feeling in and above the eyes, sometimes amounting to absolute pain; blurring of the sight, so that all objects appear indistinct; blepharospasm; lacrymation; photophobia; nausea, and even vomiting; and vertigo. There is no organic disease of the eyes, and the cause is usually to be found in an error of refraction, generally hypermetropia. [H. Schmidt-Rimpler (A. 318); F.]—**Accommodative a.** Lat., *a. accommodativa*. Fr., *asthénopie accommodative*. Ger., *accommodative Asthenopie*. A. of accommodation; a. dependent on either an inherent weakness or an overworked condition of the ciliary muscle (muscle of accommodation), due in the latter case to an uncorrected error of refraction, almost always hypermetropia. [F.]—**A. nervosa**. See *Retinal a.*—**A. of accommodation**. See *Accommodative a.*—**Binocular a.** See *Muscular a.*—**Muscular a.** Lat., *a. muscularis*. Fr., *asthénopie musculaire*. Ger., *muskuläre Asthenopie*. It., *astenopia musculare*. Sp., *astenopia muscular*. A. dependent on inherent weakness of the muscles of the eyes (insufficiency of the internal or external recti), alone or in connection with weakness of the ciliary muscle. [F.]—**Nervous a.** Lat., *a. nervosa*. Fr., *asthénopie nerveuse*. Ger., *nervöse Asthenopie*. See *Retinal a.*—**Retinal a.** Lat., *a. retinalis*. Fr., *asthénopie rétinienne* (ou de la rétine). Ger., *Netzhautasthenopie*. It., *astenopia retinica*. Sp., *astenopia retinal*. 1. An old term implying an a. depending on hyperæsthesia and irritability of the retina, accompanied with hyperæmia, occurring mainly in feeble, nervous, and excitable persons. 2. A reflex form, of sympathetic nature, characterized by periodical failure of central vision of very short duration, during which all objects seem covered by a thin mist or fog. [F.]—**True a.** See *Accommodative a.*

**ASTHENOPYRA, ASTHENOPYRETOS, ASTHENOPYRETUS** (Lat.), n's f., m., and m.  $A^2s(a^3s)''the^2n''o(o^2)''pi^2(u^2)''ra^3$ , - $o(o^2)''pi^2r(pu^2r)''e^2t''o^2s$ , - $u^2s(u^2s)$ . From  $\alpha\sigma\theta\acute{\epsilon}\nu\eta\varsigma$ , weak, and  $\pi\upsilon\rho$  or  $\pi\upsilon\rho\acute{\epsilon}\varsigma$ , fever. Fr., *asthénopire*. Fever accompanied with or dependent on asthenia. [A. 322.]

**ASTHMA** (Lat.), n. n.  $A^2sth(a^2sth)''ma^3$ . Gen., *asth'matos (-tis)*. Gr.,  $\alpha\sigma\theta\mu\alpha$ . Fr., *asthme*. Ger., *Asthma*, *Kurzathmatigkeit*, *Engbrüstigkeit*. It., *asma*, *boisaggine*. Sp., *asma*. A disease characterized chiefly by attacks of excessive dyspnoea caused by spasmodic contraction of the smaller bronchial tubes. It is manifested by paroxysms, which may be excited by indigestion, by nervous strain, by various meteorological conditions, or by causes that are peculiar to the individual case. In many instances it seems to be due to an inherited tendency, and is believed by some to be associated with the gouty or the rheumatic diathesis. It attacks infants and persons of all ages, and seems to have no tendency to shorten life. The paroxysms commonly come on at night, and may recur for several nights; they may last only a few minutes or be prolonged, with brief intermissions, for many hours or days. The patient wheezes and gasps, the shoulders are raised, the head is thrown back, the upper part of the chest is immovable, while the lower part is agitated, the face becomes livid, and suffocation seems imminent. As the spasm wears away, there is an expectoration of tough mucus in which certain crystals have been found that have been thought to be connected with the ætiology of the disease. At the beginning of the attack there is apt to be profuse diuresis, and neuralgic pains may occur in various parts of the body. [A.

Fraenkel (A. 319); D. 1.]—**Abdominal a.** Lat., *a. abdominale*. A. due to some abdominal affection. [M. 6.]—**Acute and chronic a. of Millar.** See *A. acutum et chronicum Millari*.—**Arthritic a.** Lat., *a. arthriticum*. 1. A. depending on the gouty diathesis. [M. 2.] 2. Angina pectoris. [Schmidt (L. 134).]—**A. abdominale.** See *Abdominal a.*—**A. acutum.** *A. acutum et chronicum Millari*. *A. acutum periodicum infantum* (seu *Millari*). Fr., *asthme aigu de Millar*. Spasm of the glottis or laryngismus stridulus. [D. 39.]—**A. adulatorum convulsivum.** The ordinary a. of adults.—**A. a gibbo.** 1. A form observed in hunchbacks. [Hippocrates (L. 132).] 2. A. due to bronchocele. [M. 60.]—**A. a poly-pno cordis.** Shortness of breath, with palpitation of the heart, attributed to concretions in the heart. [L. 132.]—**A. arthriticum.** See *Arthritic a.*—**A. biliosum.** See *Dyspeptic a.*—**A. bronchiale.** See *A. a. cachecticum*. A. associated with cachexia. Fraenkel (M. 1).]—**Bronchial a.** Lat., *a. bronchiale*. Fr., *asthme bronchial*. Ger., *Bronchialasthma*. It., *asma bronchiale*. See *A. Bronchitic a.* See *Catarrhal a.*—**Cardiac a.** Lat., *a. cardiacum*. Fr., *asthme cardiaque*. Ger., *cardiales A.* It., *asma cardiaco*. A term applied to sudden attacks of pain and distress, with dyspnoea, occurring in subjects of advanced heart disease. [B. F. Westbrook, "N. Y. Med. Jour.," Oct. 9, 1886, p. 393.]—**Catarrhal a.** Lat., *a. catarrhale*. Fr., *asthme catarrhal*. Ger., *catarrhalisches A.* A. attended with increased bronchial secretion. [Copland (M).]—**Central a.** [Salter]. A. or dyspnoea due to the influence of the central nervous system. [L. 87.]—**Congestive a.** Ordinary a. attributed to a congested state of the digestive organs. [D. 1.]—**Continued a.** See *Moist a.*—**Convulsive a.** Lat., *a. convulsivum*. Fr., *asthme convulsif*. Ger., *convulsivisches A.* 1. Dry a. [B. 117.] 2. Spasm of the glottis. [M. 80.]—**Diathetic a.** Fr., *asthme diathésique*. A. depending on some diathesis. [M. 69.]—**Diurnal a.** A. in which the attacks occur in the day-time. [D. 1.]—**Dry a.** Lat., *a. siccum*. A. without expectoration. [B. 117.]—**Dynamic a.** See *A. Dyspeptic a.* Lat., *a. dyspepticum*. A. presumed to depend on gastric irritation. [D. 1.]—**Emotional a.** [Salter]. A. in which the attacks are due to emotional excitement. [D. 1.]—**Fœchtes A.** (Ger.). See *Moist a.*—**Flatulent a.** Lat., *a. flatulentum*. Shortness of breath arising from flatus. [Copland (M).]—**Grinders' a.** Lat., *a. cutlariorum*. Fr., *maladie des aiguisers, phthisie calculeuse (ou silicieuse)*. Ger., *Schleiferkrankheit*. It., *asma degli arrotini*. A., or pulmonary phthisis, caused by the constant inhalation of small particles of steel or of stone. [D. 92.]—**Hæmic a.** See *Toxic a.*—**Hay a.** Lat., *a. ex fœno*. Fr., *asthme (ou fièvre, ou rhume) des foin (ou d'été)*. Ger., *Heu-A.* The asthmatic form of hay fever (see under *FEVER*).—**Heberden's a.** Angina pectoris. [L. 44.]—**Herpetic a.** Lat., *a. herpeticum*. A. occurring in connection with cutaneous eruptions. [Waldenburg (M. 2).]—**Heu-A.** (Ger.). See *Hay a.*—**Humid a.** *A. humidum*. Lat., *a. humidum*. See *Catarrhal a.*—**Hysterical a.** Lat., *a. hysterium*. A. due to hysteria. [D. 1.]—**Idiopathic a.** Lat., *a. idiopathicum*. Ger., *idiopathisches A.* A. not depending on any other disease. [M. 6.]—**Idiosyncratic a.** Lat., *a. idiosyncraticum*. A. in which the attacks are brought on by some substance, like a rose, a violet, etc., concerning which the individual has an idiosyncrasy. [A. Fraenkel (M. 1).]—**Infantile a.** Spasm of the glottis or laryngismus stridulus. [L. 132.]—**Intermittent a. of children.** Laryngismus stridulus. [L. 132.]—**Intrinsic a.** Fr., *asthme intrinsèque*. An a. or dyspnoea due to a direct irritation of the lungs. [L. 87.]—**Kopp's a.** Lat., *a. thymicum Koppii*. Spasm of the glottis. [D. 40.]—**Kramppf' (Ger.).** See *Convulsive a.*—**Laryngeal a.** Laryngismus stridulus. [L. 132.]—**Marine a.** See *Grinders' a.*—**Metastatic a.** Lat., *a. metastaticum*. A. supposed to be due to a metastasis of some other disease. [M. 69.]—**Millar's a.** Ger., *Millar'sches A.* See *A. acutum et chronicum Millari*.—**Miners' a.** Lat., *a. metallariorum*. Fr., *asthme des mineurs*. Ger., *A. der Bergleute*. It., *asma dei minatori*. See *ANTHRACOSIS* (4th def.).—**Moist a.** Lat., *a. humidum*. Ger., *feuchtes A.* A. with expectoration of purulent matter. [B. 117.]—**Nervous a.** *A. Neuro-pulmonary a.* Lat., *a. nervosum*. 1. Ordinary a. [D. 35.] 2. A variety described by Laennec, in which there is apparently no bronchial spasm, but simply dyspnoea accompanied by puerile respiration. [Copland (L. 137).]—**Non-organic a.** See *Idiopathic a.*—**Organic a.** See *Cardiac a.*—**Paralytic bronchial a.** A rare form, supposed to depend on a relaxed rather than a spasmodic condition of the bronchies. [Walshe (L. 132).]—**Peptic a.** See *Dyspeptic a.*—**Periodic a.** A. recurring at definite intervals. [Salter (D. 1).]—**Pituitous a.** See *Catarrhal a.*—**Plethoric a.** Lat., *a. plethoricum*. A. due to plethora or to the suppression of some habitual flux. [L. 132; M. 60.]—**Pneumobulbar a.** See term for a. supposed to be occasioned by pulmonary irritation transmitted to the origin of the pneumogastric nerve and reflected back to the bronchioles. [Mendelssohn, "Dtsch. med. Wehnschr.," Oct. 15, 1885; "Med. Chron.," Dec., 1885, p. 211.]—**Primary a.** See *Idiopathic a.*—**Renal a.** Lat., *a. nephriticum*. See *Uremic a.*—**Rheumatic a.** A. depending on the rheumatic diathesis. [M. 69.]—**Saturnine a.** The dyspnoea that sometimes attends lead poisoning. [Remak (M. 1).]—**Secondary a.** See *Symptomatic a.*—**Senile a.** Lat., *a. senile*. A term applied by some authors to a. attributed to old age. [L. 135.]—**Simple a.** *Spasmodic a.* See *A. Spasmodic a. of children*. Spasmodic croup. [D. 63.]—**Spasmodic bronchial a.** [Walshe]. See *A. Spitting a.* See *Moist a.*—**Stomachic a.** See *Dyspeptic a.*—**Symptomatic a.** Lat., *a. symptomaticum*. A. occurring as a manifestation of some other disease, organic or functional. [M.]—**Thymic a.** Lat., *a. thymicum*. Fr., *asthme thymique*. It., *asma timica*. Spasm of the glottis; so called by Kopp, who attributed it to enlargement of the thymus gland. [D. 5, 39.]—**Thyreoid a.** A. attributed to enlargement of the thyreoid gland. [Hildebrandt (M. 1).]—**Toxic a.** A. due to poisoning of the nervous system by some specific morbid matter. [G. Sée (L. 88).]—**Uremic a.** Lat., *a. uramicum*. A. occurring in connection with Bright's disease, often due to a chronic pulmonary oedema. [Korányi (M. 1).]—**Uterine a.** Lat., *a. uterinum*. A form of dyspnoea observed in hysterical patients and not dependent on any organic disease. [M. 1.]—**Urticarial a.** A. associated with urticaria. [Pryce, "Lancet," May 22, 1886; "N. Y. Med. Jour.," Aug. 21, 1886, p. 222.]

**ASTHMATIC**, adj. and n. *Asthma*  $\alpha\sigma\theta\mu\alpha$ . Gr., *ἀσθμα*. Lat., *asthmaticus*. Fr., *asthmatique*. Ger., *asthmatisch* (adj.), *engbrüstig* (adj.), *Asthmatiker* (n.). It., *asmatico*. Sp., *asmático*. Pertaining to, affected with, or proceeding from, asthma, or dyspnoea; as a n., one who suffers with asthma. [A. 322; D.]—**A. dropsy.** See *BERI-BERI*.—**A. fever.** See *Fièvre asthmaticque*.

**ASTHMATICO-SCORBUTIC**, adj.  $A^2st^h-ma^t/i^2k-o-sko^2r$ - $bu^2ti^2k$ . Pertaining at the same time to asthma and scurvy; suffering from asthma and scurvy. [B, 200.]

**ASTHMATOPHTHISIS** (Lat.), n. f.  $A^2st^h(a^2st^h)/ma^3-to(t)^2$ - $ti^2te/si^2s$ . Gen., *asthmatoptosis eos (-sis)*. For deriv., see **ASTHMA** and **PHTHISIS**. Fr., *asthmato-pthisie*. Ger., *Schwindsucht mit Asthma*. Syn.: *ptthisis asthmatica*. Phthisis accompanied with asthma. [A, 322.]

**ASTHMATORTHOPNEA** (Lat.), n. f.  $A^2st^h(a^2st^h)-ma^3t$ - $(ma^3t)-o^2r-tho^2p-ne^2(n)^2e^2-a^2$ . See **ASTHMORTHOPNEA**.

**ASTHME** (Fr.), n.  $A^2sm, a^2zm$ . See **ASTHMA**.—**A. aigu de Millar**. See *Asthma acutum et chronicum Millari*.—**A. aigu des enfants**. Laryngismus stridulus. [L.]—**A. avec respiration puerile**. See *Nervous Asthma* (2d def.).—**A. charbonneux**. See *ANTHRACOSIS* (4th def.).—**A. dartreux**. See *Eczanthenatic Asthma*.—**A. des algues**. See *Grinders' Asthma*.—**A. des foies**. See *Hay Fever*.—**A. des solipèdes**. Syn.: *pousses*. Puriness; a disease of horses, in which there is pulmonary emphysema, characterized by pulsation in the flanks, and by an interruption of the inspiratory act. [A, 385.]—**A. des vieillards**. See *Senile Asthma*.—**A. d'été**. See *Hay Fever*.—**A. glottique**. Spasm of the glottis. [M, 3.]—**A. mixte**. See *Diathetic Asthma*.—**A. nocturne**. Nightmare. [M, 80.] See *INCUBUS*.—**A. pituiteux**, **A. pneumonique**, **A. pseudo-continu**. See *Moist Asthma*.—**A. sec**. See *Dry Asthma*.

**ASTHMORTHOPNEA** (Lat.), n. f.  $A^2st^h(a^2st^h)/mo^2r-tho^2p$ - $ne^2(n)^2e^2-a^2$ . For deriv., see **ASTHMA** and **ORTHOPNEA**. Fr., *asthmorthopnée*. Ger., *Asthmorthopnoë, Bruststeckung*. Orthopnea due to asthma or to any impediment to respiration situated within the chest. [A, 322; M, 56.]

**ASTHWEED**, n.  $A^2st^h/wed$ . The genus *Egopodium*. [L, 67.]

**ASTICHUS** (Lat.), adj.  $A^2s(a^2s)/ti^2k(ti^2ch)^2-u^2s(u^2s)$ . From a priv., and *στικός*, a row. Ger., *unreihig*. Not disposed in rows. [B, 198.]

**ASTICOT** (Fr.), n.  $A^2s-te-ko$ . The larva of the fly (various species of *Musca*). [A, 385.]

**ASTIGMATIC**, adj.  $A^2s-ti^2g-ma^2t/i^2k$ . Fr., *astigmatique*. Ger., *astigmatisch*. It., *astigmatico*. Sp., *astigmático*. 1. Pertaining to, caused by, or affected with, astigmatism. 2. Used for defining degrees of astigmatism (e. g., a lens).

**ASTIGMATISM** [Whewell], n.  $A^2s-ti^2g-ma^2t-i^2zm$ . Lat., *astigmatismus* (from a priv., and *στίγμα*, a spot). Fr., *astigmatisme*. Ger., *Astigmatismus*. It., Sp., *astigmatismo*. A state of irregular refraction of an eye, usually congenital, in which the rays of light diverging from a single point can not be brought to a focus at a point on the retina; an asymmetrical condition of the refraction of the different meridians of the eye. [F.]—**Abnormal irregular a.** Fr., *astigmatisme irrégulier anormal*. Ger., *abnormer unregelmässiger Astigmatismus*. It., *astigmatismo irregolare anormale*. Sp., *astigmatismo irregular anormal*. A due to some defect in the curvature of the cornea or to some irregularity in the structure or position of the crystalline lens. Metamorphopsia is the chief symptom. [F.]—**Acquired a.** Fr., *astigmatisme acquis*. Ger., *erworbener Astigmatismus*. It., *astigmatismo acquisito (o guadagnato)*. Sp., *astigmatismo adquirido*. A. dependent on flattening of the cornea from inflammatory changes, or on irregular apposition of the flaps after a cataract extraction, or on dislocation of the crystalline lens. [F.]—**Compound hypermetropic a.** Fr., *astigmatisme hypermétrique composé*. Ger., *zusammengesetzter hypermetropischer Astigmatismus*. It., *astigmatismo ipermetropico composto*. Sp., *astigmatismo hipermetrópico compuesto*. That state of refraction in which hypermetropia exists in the two principal meridians, with an additional degree of hypermetropia in one of them; symbol, H+Hm. [F.]—**Compound myopic a.** Fr., *astigmatisme myopique composé*. Ger., *zusammengesetzter myopischer Astigmatismus*. It., *astigmatismo miopico composto*. Sp., *astigmatismo miópico compuesto*. That state of refraction in which myopia exists in both principal meridians, with an additional degree of myopia in one of them; symbol, M+Am. [F.]—**Corneal a.** A. due to causes residing in the cornea. [L.]—**Hypermetropic a.** Fr., *astigmatisme hypermétrique*. Ger., *hypermetropischer Astigmatismus*. It., *astigmatismo ipermetropico*. Sp., *astigmatismo hipermetrópico*. See **Simple and Compound hypermetropic a.**—**Irregular a.** Fr., *astigmatisme irrégulier*. Ger., *unregelmässiger Astigmatismus*. It., *astigmatismo irregolare*. Sp., *astigmatismo irregular*. See **Normal and Abnormal irregular a.**—**Lenticular a.** Fr., *astigmatisme lenticulaire*. Ger., *Linsenastigmatismus*. It., *astigmatismo misto*. A form of a. in which myopia exists in one principal meridian, and hypermetropia in the other. When there is predominant myopia, its symbol is Amb, and when there is predominant hypermetropia, Ahm. [F.]—**Myopic a.** Fr., *astigmatisme myopique*. Ger., *myopischer Astigmatismus*. It., *astigmatismo miopico*. Sp., *astigmatismo miópico*. See **Simple and Compound myopic a.**—**Normal irregular a.** Fr., *astigmatisme irrégulier normal*. Ger., *unregelmässiger normaler Astigmatismus*. It., *astigmatismo irregolare normale*. Sp., *astigmatismo irregular normal*. A. due to irregularities in the structure and density of the crystalline lens, so that an aberration of the rays occurs as they traverse the different sectors, in consequence of which there is an imperfect coincidence of the images of the different sectors. Its chief symptom is polyopia. [F.]—**Regular a.** Fr., *astigmatisme régulier*. Ger., *regelmässiger Astigmatismus*. It., *astigmatismo regolare*. Sp., *astigmatismo regular*. That error of refraction which is due to a difference in the focal distance of the two principal meridians, and depends mainly on the curvature of the cornea. [F.]—**Simple hypermetropic a.** Fr., *astigmatisme simple hypermétrique*. Ger., *einfacher hypermetropischer Astigmatismus*.

It., *astigmatismo ipermetropico semplice*. Sp., *astigmatismo hipermetrópico simple*. A. with emmetropia in one of the principal meridians of the eye and hypermetropia in the other; symbol, Ah. [B; F.]—**Simple myopic a.** Fr., *astigmatisme simple myopique*. Ger., *einfacher myopischer Astigmatismus*. It., *astigmatismo miopico semplice*. Sp., *astigmatismo miópico simple*. A. with emmetropia in one of the principal meridians of the eye and myopia in the other; symbol, Am. [B; F.]

**ASTIGMATISMUS** (Lat.), n. m.  $A^2s(a^2s)-ti^2g-ma^3-ti^2z(t)^2s^2y$ - $mu^2s(mu^2s)$ . See **ASTIGMATISM**.—**Linsena's** (Ger.). See **Lenticular ASTIGMATISM**.

**ASTIGMOMETER**, n.  $A^2s-ti^2g-mo^2m/e^2t-u^2r$ . From a priv., *στίγμα*, a spot, and *μέτρον*, a measure. Fr., *astigmomètre*. An instrument for measuring the degree of astigmatism by determining the difference in refraction between the meridians of the cornea, devised by Javal and Schiotz, and based upon Coccilus's ophthalmometer. The object of fixation is formed by two white rectangles moving on a perimetric arc, with a radius of 35 cm., in the centre of which is the corneal image of the eye observed. This reflection is seen through a lens or glass, the objective of which produces a real and reversed image in the tube of the instrument. This image is divided by a Wollaston's bi-refracting prism, introduced between the two objectives and seen through the eye-piece, at the focus of which it is formed. The strength of the bi-refracting prism is such that it exactly bisects an object of 3 mm., situated at the point where the eye of the patient is to be placed. One of the white rectangles is cut out in the shape of a staircase in which the steps measure 6 mm. in width. The instrument being properly placed, the two rectangles may readily be turned until one of the images of one is in contact with one of the images of the other. In turning the instrument around its axis, the two images maintain their relative position if no astigmatism is present. They separate or become superimposed if the curvature of the cornea varies from one meridian to another. Each step of the staircase, one of the images of which encroaches upon the other, when the position of the arc changes by 90°, corresponds to a refractive difference of D1 between the two meridians of the cornea, and a fraction of a step to an equivalent fraction of a dioptré. [F.] Cf. **Registering KERATOSCOPE**.

**ASTILBEE** (Lat.), n. f. pl.  $A^2s(a^2s)-ti^2l/be^2-e(a^2e^2)$ . From *Astilbe*, the typical genus. Fr., *astilbées*. A suborder of saxifragaceous plants, made by Miquel. [B, 170.]

**ARTISCOCCUS** (Lat.), n. m.  $A^2s(a^2s)-ti^2s-ko^2k/ku^2s(ku^2s)$ . See **ARTISCOCCUS**.—**A. levis**. See *ARTISCOCCUS levis*.

**ASTITES** (Lat.), n. m. pl.  $A^2s(a^2s)/ti^2t-ez(as)$ . See **PARASTATE**.

**ASTMARY**, n.  $A^2st/ma-ri^2$ . The *Chrysanthemum balsamita*. [B.]

**ASTMOOS** (Ger.), n.  $A^2st/mos$ . The genus *Hypnum*. [B, 180.]—**Dreieckiges A., Dreikantiges A.** The *Hypnum triquetrum*. [L, 80.]

**ASTOCHADOS** (Sp.), n.  $A^2s-to-cha^3/dos$ . The *Lavandula stœchas*. [B, 121.]

**ASTOMA** (Lat.), n. f.  $A^2s(a^2s)/to^2m-a^3$ . 1. The genus *Sclerodium*. [Gray (B, 121).] 2. A genus of umbelliferous plants. [De Candolle (B, 42).]

**ASTOMÆ** (Lat.), n. f. pl.  $A^2s(a^2s)/to^2m-e(a^2e^2)$ . From a priv., and *στόμα*, the mouth. Fr., *astomées*. 1. A division of mosses made by Agardh. Cf. **ASTOMI**. 2. A name given by Persoon to a group of the *Sphæriæ*, in which the ostiole is not apparent. [B, 121, 170.]

**ASTOMATA** (Lat.), n. n. pl.  $A^2s(a^2s)-to^2m/a^3-ta^3$ . A term used by some authors to include the *Gregarinidea* and the *Rhizopodes*. [L, 147.]

**ASTOMATICEÆ** (Lat.), n. f. pl.  $A^2s(a^2s)-to^2m-a^2t(a^2t)/i^2-se$ - $(ka^3e^2)$ . 1. In Kützing's classification of the *Diatomeæ*, an order of the tribe *Striatæ*, comprising those without a central opening on the secondary side (the families *Eunatiæ*, *Meridiæ*, *Fragilariæ*, *Melosiræ*, and *Surirellæ*). 2. In the same classification, an order of the *Vittatæ*, including those without a central aperture on the secondary side (the tribes *Licmophoræ* and *Striatellæ*). [B, 261.]

**ASTOMATOPHORÆ** (Lat.), n. f. pl.  $A^2s(a^2s)-to^2m-a^3-to^2f(o^2r)-e(a^2e^2)$ . From a priv., *στόμα*, the mouth, and *φορεῖν*, to bear. Of Corda, a division of plants (*Aspirales*) including the classes *Lenææ*, *Rhizospermeæ*, *Characeæ*, and *Musci*. [B, 170.]

**ASTOMATOUS**, adj.  $A^2s-to^2m/a^2t-u^2s$ . See **ASTOMOUS**.

**ASTOMI** (Lat.), n. m. pl.  $A^2s(a^2s)/to^2m-i(e)$ . Fr., *astomés*. A class of mosses (*Vaginulati*), comprising the orders *Acrocarpi* and *Pleurocarpi*. [Brid. (B, 170).]

**ASTOMIA** (Lat.), n. f.  $A^2s(a^2s)-tom(to^2m)/i^2-a^3$ . From a priv., and *στόμα*, the mouth. Fr., *astomie*. Ger., *Astomie*. It., *astomia*. Sp., *astomia*. The state of having no mouth. [L, 49.]

**ASTOMOUS**, adj.  $A^2s-to-mu^2s$ . Gr., *ἀστόμος*. Lat., *astomus*, *astomus*. Fr., *astome*. Ger., *mundlos, mündungslos, astomös*. It., Sp., *astomo*. Having no mouth; in botany, having no opening to the theca (said of mosses). [B, 7.]

**ASTOURES** (Fr.), n. pl.  $A^2s-tur$ . Certain seeds poisonous to fishes, said to be the product of two species of *Verbascum*. [Bosc (B, 121).]

**ASTOURON**, n. The Carib name for the *Pimenta communis*. [B, 121.]

**ASTRABES** (Lat.), adj.  $A^2s(a^2s)/tra^3-bez(bas)$ . Gr., *ἀστραβής* (= *ἀστράβης*). 1. Not twisted or distorted (said of the jaws or the teeth). [Hippocrates (A, 311, 325).] 2. Stretched tight. [Aretæus (A, 311).]

**ASTRÆA** (Lat.), n. f.  $A^2s(a^2s)-tre^2(tra^3e^2)-a^3$ . From *ἀστραῖος*, stary, starred. Of Klotzsch, a genus of euphorbiaceous plants, by Bentham and Hooker referred to *Croton*. [B, 42, 170.]

**ASTREANS**, n. pl.  $A^2s\text{-}tre^2a^2n^2$ . See **ASTREIDÆ**.

**ASTREIDÆ** (Lat.), n. f. pl.  $A^2s(a^2s)\text{-}tre^2(tras^2e^2)\text{-}i^2(d\text{-}e(a^2e^2))$ . The astreae; a family of the division *Aporosa* of the order *Zoantharia sclerodermata* of the *Actinozoa*; characterized by having the corallum simple or compound, no proper coenenchyma, numerous dissepiments, no synapticalae, no tabulae, and the corallites well defined and separated from each other by perfect walls. [A, 359.]

**ASTREIFORM**, adj.  $A^2s\text{-}tre^2fo^2rm$ . Shaped like the *Astrea*, a genus of the *Astreaeidae*. [L, 121.]

**ASTREOPSIS** (Lat.), n. f.  $A^2s(a^2s)\text{-}tre^2(tras^2e^2)\text{-}o^2p^2si^2s$ . Gen., *astropseos* (-sis). From *Astrea* and *opsis*, an appearance. A section of the genus *Croton*. [H. Baillon (B, 121).]

**ASTRAGALAR**, adj.  $A^2s\text{-}tra^2g^2a^2l\text{-}ar$ . Lat., *astragaleus*. Fr., *astragalien*. Pertaining to the astragalus. [L, 41.]

**ASTRAGALE** (Fr.), n.  $A^2s\text{-}tra^2g^2a^2l$ . See **ASTRAGALUS**.—**A. à gousses velues**, **A. antivénérien**. See **ASTRAGALUS exscapus**.—**A. de Crète**. See **ASTRAGALUS creticus**.—**A. gommeux**, **A. gommifère**. See **ASTRAGALUS gummifer**.—**A. réglisse**. See **ASTRAGALUS glycyphyllos**.—**A. sans tige**. See **ASTRAGALUS exscapus**.

**ASTRAGALÉ** (Fr.), adj.  $A^2s\text{-}tra^2g^2a^2l\text{-}a$ . See **ASTRAGALOID** and **ASTRAGALEOUS**.

**ASTRAGALEÆ** (Lat.), n. f. pl.  $A^2s(a^2s)\text{-}tra^2g^2a^2l(ga^2l)\text{-}e^2e^2$ . Fr., *astragalees*. Ger., *Astragaleen*. According to Sprengel, De Candolle, and Benth and Hooker, a subtribe of papilionaceous plants of the tribe *Galegeæ*, including herbs, shrubs, and trees, bearing axillary flowers, which are sometimes solitary, but usually disposed in racemes, spikes, or umbels, and have an erect vexillum, often narrow, with reflected margins; a free vexillary stamen and a mass formed by the fusion of the other stamens; mucicous anthers; and numerous ovules with a glabrous style. The fruit is either inflated, vesiculate, cylindrical, or, more rarely, compressed, and is often divided into two false longitudinal compartments by an inward projection of the wall. It includes the genera *Astragalus*, *Oxytropis*, *Caragana*, *Glycyrrhiza*, and four others. [B, 121, 170.]

**ASTRAGALEOUS**, adj.  $A^2s\text{-}tra^2g^2a^2l\text{-}e^2u^2s$ . Lat., *astragaleus*. Fr., *astragale*. Belonging to the *Astragaleæ*.

**ASTRAGALI** (Lat.), n. m. pl.  $A^2s(a^2s)\text{-}tra^2g^2(tras^2g)\text{-}li^2(le)$ . A section of leguminous plants including the genus *Astragalus*. [Adanson (B, 121, 170).]

**ASTRAGALIDÆ** (Lat.), n. f. pl.  $A^2s(a^2s)\text{-}tra^2g^2(tras^2g)\text{-}a^2li^2(d\text{-}e(a^2e^2))$ . A section of the *Leguminosae* comprising the genera *Astragalus* and *Oxytropis*. [Gray (B, 121).]

**ASTRAGALIEN** (Fr.), adj.  $A^2s\text{-}tra^2g^2a^2l\text{-}i^2a^2n^2$ . See **ASTRAGALAR**.

**ASTRAGALINEÆ** (Lat.), n. f. pl.  $A^2s(a^2s)\text{-}tra^2g^2(tras^2g)\text{-}a^2li^2n^2e^2e^2$ . Fr., *astragalines*. Ger., *Astragalineen*. Brongniart's term for the **ASTRAGALOIDÆ** (q. v.). [B, 170.]

**ASTRAGALINEUS**, **ASTRAGALINUS** (Lat.), adj's.  $A^2s(a^2s)\text{-}tra^2g^2(tras^2g)\text{-}a^2li^2n^2e^2u^2s(u^2s)$ ,  $-li^2n^2e^2u^2s(nu^2s)$ . Fr., *astragalin*, *astragalin*. Pertaining to or resembling the genus **ASTRAGALUS**. [B.] Cf. **ASTRAGALINEÆ**.

**ASTRAGALO-CALCANEAL**, adj.  $A^2s\text{-}tra^2g^2a^2l\text{-}o\text{-}ka^2l\text{-}ka^2ne^2a^2l$ . Lat., *astragalo-calcaneus*. Fr., *astragalo-calcaneen*. Pertaining to the astragalus and the calcaneum. See **A.-c. LIGAMENTS**.

**ASTRAGALO-EX-MÉTATARSII** (Fr.), n.  $A^2s\text{-}tra^2g^2a^2l\text{-}o\text{-}e^2x\text{-}ma\text{-}ta^2r\text{-}si^2a^2n^2$ . One of the extensor muscles of the thigh in the frog. [L, 109.]—**A.-e. m. du pouce** [Dugès]. The extensor brevis digiti of certain of the *Amphibia*. [L, 204.]

**ASTRAGALOGIA** [De Candolle] (Lat.), n. f.  $A^2s(a^2s)\text{-}tra^2g^2(tras^2g)\text{-}a^2l\text{-}o\text{-}lo\text{-}gi^2a^2$ . See **ASTRAGALOGIA**.

**ASTRAGALOID**, adj.  $A^2s\text{-}tra^2g^2a^2l\text{-}oid$ . Gr., *ἀστραγαλώδης* (from *ἀστράγαλος* [see **ASTRAGALUS**], and *είδος*, resemblance). Lat., *astragaloides*, *astragaloides*. Fr., *astragaloides*, *astragaloidé*, *astragalé*. Resembling an astragalus.

**ASTRAGALOIDÆ** (Lat.), n. f. pl.  $A^2s(a^2s)\text{-}tra^2g^2(tras^2g)\text{-}a^2l\text{-}o\text{-}lo\text{-}i^2d\text{-}e^2e^2$ . Fr., *astragaloides*. Syn.: *Astragalineæ* [Brongniart]. A section of papilionaceous plants including the genera *Astragalus*, *Oxytropis*, *Phaca*, and *Bisserula*. [B, 170.]

**ASTRAGALOIDES** (Lat.), adj. and n. f.  $A^2s(a^2s)\text{-}tra^2g^2(tras^2g)\text{-}a^2l\text{-}o\text{-}lo\text{-}i^2d\text{-}e^2e^2$ . 1. (Adj.) See **ASTRAGALOID**. 2. (N.) of Tournefort and others, a genus of leguminous plants corresponding in part to *Astragalus*. [B, 170.] 3. (N.) of Adanson, the same as the genus *Phaca*. [B, 170.]—**A. cicera** [Mönch]. See **ASTRAGALUS cicera**.—**A. glauca** [Mönch]. See **ASTRAGALUS glauca**.—**A. syphilitica** [Mönch]. See **ASTRAGALUS exscapus**.

**ASTRAGALOGIA** (Lat.), n. f.  $A^2s(a^2s)\text{-}tra^2g^2(tras^2g)\text{-}a^2l\text{-}o\text{-}lo\text{-}gi^2a^2$  (from *ἀστράγαλος* [see **ASTRAGALUS**], and *λόγος*, understanding. Fr., *astragalologie*. Ger., *Astragalologie*. That department of botany which treats of the *Astragali*. [De Candolle (A, 322).]

**ASTRAGALOMANCY**, n.  $A^2s\text{-}tra^2g^2a^2l\text{-}o\text{-}ma^2n\text{-}ci^2$ . From *ἀστράγαλος* (see **ASTRAGALUS**), and *μαντία*, divination. Fr., *astragalomanie*. Divination by means of the astragalus and other small bones. [A, 385.]

**ASTRAGALOS** (Lat.), n. m.  $A^2s(a^2s)\text{-}tra^2g^2(tras^2g)\text{-}a^2l\text{-}o\text{-}s$ . Gr., *ἀστράγαλος*. See **ASTRAGALUS**.

**ASTRAGALO-SCAPHOID**, adj.  $A^2s\text{-}tra^2g^2a^2l\text{-}o\text{-}ska^2f\text{-}oid$ . For deriv., see **ASTRAGALUS** and **SCAPHOID**. Fr., *astragalo-scaphoïde*. Syn.: *talo-scaphoid*. Pertaining to the astragalus and to the scaphoid bone.

**ASTRAGALO-SUS-PHALANGETIEN** (Fr.), **ASTRAGALO-SUS-PHALANGIEN** (Fr.), n's.  $A^2s\text{-}tra^2g^2a^2l\text{-}o\text{-}su^2fa^2$ .

$la^3n^2\text{-}zhe^2t\text{-}i^2a^3n^2$ ,  $-zhi^2a^3n^2$ . One of the extensor muscles of the thigh in the frog. [L, 109, 229.]

**ASTRAGALUM** (Lat.), n. n.  $A^2s(a^2s)\text{-}tra^2g^2(tras^2g)\text{-}a^2l\text{-}u^2m$  ( $lu^2m$ ). See **ASTRAGALUS**.

**ASTRAGALUS** (Lat.), n. m.  $A^2s(a^2s)\text{-}tra^2g^2(tras^2g)\text{-}a^2l\text{-}u^2s(lu^2s)$ . Gr., *ἀστράγαλος*, *ἀστράγος* (3d def.). Fr., *astragale*. Ger., *Sprungbein* (3d def.), *Würfelbein* (3d def.), *Rollbein* (3d def.), *Wirtelbein* (3d def.). It., *astragalo*. Sp., *astrágalo*. Syn.: *talus* (3d def.), *quattro* (3d def.), *os balliste* (3d def.). 1. An old name for one of the cervical vertebrae. [A, 311.] 2. Anciently, any small bone used in the game of dice. [A, 311.] 3. The ankle bone, the sling bone, the huckle-bone, the first bone of the tarsus; an irregularly cubical bone which forms the key-stone of the arch of the foot, articulating above with the tibia and fibula, anteriorly (by a large convex head) with the scaphoid bone, and inferiorly (by two synovial joints, one behind the other) with the os calcis. The superior articulation (the ankle joint proper) is a simple hinge-joint allowing of antero-posterior motion, the rolling lateral mobility of the foot being provided for in the articulations between the a. and the os calcis below and the scaphoid bone in front. The convex portion which articulates with the scaphoid bone is termed the *head*, the constricted portion behind it the *neck*, and the remainder of the bone the *body*. The a. of the hare and that of the pig were recommended by the ancients in the treatment of epilepsy, difficult parturition, colic, and calculous affections, also for the pain following fractures. [A, 5, 70, 325.] 4. An ancient measure used by physicians. [A, 311.] 5. A leguminous plant mentioned by Dioscorides. 6. Of Linnæus, the milk-vetch, a genus of herbaceous or suffrutescent, papilionaceous plants belonging to the tribe *Galegeæ*, subtribe *Astragaleæ*, bearing imparipinnate leaves, flowers growing in axillary clusters with 5-parted calyx, blunt carina, and diadelphous stamen, and fruit consisting of a legume divided into 2 compartments by a reflection of the cell-wall inward. [B, 34.]—**A. aboriginum** [Richards]. A species growing in the polar regions of North America, where its sweet, juicy root is eaten. [B, 270.]—**A. acanthoides** [Lamarck]. See *A. declinatus*.—**A. ammodytes** [Pallas]. A perennial herb indigenous to Siberia, all parts of which are sweet and can be used as a substitute for licorice. [B, 173, 214; L, 105.]—**A. angustifolius** [Lamarck]. A shrubby species, of which the principal variety, *A. angustifolius*, var. *a. genuinus* (the *A. echinoides* of L'Héritier), indigenous to Greece and Crete, is distinguished by its peduncles shorter than the leaves and its whitish-yellow corolla. This variety furnishes a sort of tragacanth. The varieties *A. angustifolius*, var. *β. violaceus* with violet corolla, and var. *γ. glabrescens*, also occur in Greece, and the *A. angustifolius*, var. *δ. peduncularis* (the *A. bracteolatus* of De Candolle), so called from its longish peduncles equaling or exceeding in length the bracteate calyx, is found in Galatia and Cappadocia. [B, 63, 173.]—**A. arenarius** [Pallas]. See *A. hypoglottis*.—**A. argenteus** [Wheeler]. Probably the *A. syriacus*. [B, 200.]—**A. aristatus**. 1. Of L'Héritier, a perennial herb (the *A. sempervirens* of Lamarck, the *τραγάκανθα ἐν Ἀρκαδία* of Eresios) with spiny petioles, hairy mucronate leaves, and aristate calyx, growing throughout the mountainous districts of southern Europe. It is said to furnish a variety of tragacanth which is largely exported from Morea. 2. Of the "Flora græca," the *A. Parnassi*. [B, 63, 71, 180.]—**A. arnicantha** [Biebst.]. A Caucasian species said to furnish a slight amount of tragacanth of poor quality. Its root contains much mucilage. [B, 63, 180.]—**A. ascendens** [Boissier and Haussknecht]. An undershrub about 4 feet in height, growing on the mountains of southwestern Persia, having branches at first prostrate, finally ascending, and bearing compound leaves provided with adnate triangular stipules, tomentose at the base, glabrous at the apex, and made up of 4 to 6 pairs of hairy, oblong-linear, mucronate leaflets. It is said to furnish a large quantity of tragacanth and a variety of manna like that afforded by *A. florulentus*. [B, 63, 106, 270; L, 78.]—**A. aureus** [Willdenow]. A species growing in Armenia, Turkey, and the Caucasus, closely resembling *A. aristatus*, but bearing sessile yellowish flowers. [B, 63, 214.]—**A. batiacus** [Linnaeus]. Fr., *café français*. Ger., *spanischer Tragacanth*. An annual herb growing in southern Europe and northern Africa, with ascending stem and compound leaves, having ovate acuminate stipules, and consisting of from 10 to 15 pairs of obtuse oblong leaflets. The seeds, which are contained in an erect 3-sided pod, are sometimes employed as a substitute for coffee. [B, 63, 180.]—**A. bethlemifolius** [Boissier]. A species growing in Lebanon, Syria, and Judæa. [B, 63.]—**A. Boissieri** [Bunge]. The *A. creticus* of Linnaeus. [B, 63.]—**A. brachycalyx** [Fischer]. A species about 3 feet high, closely related to *A. ascendens*, from which it differs chiefly in the larger size and elliptical shape of its leaflets and in its oval obtuse bracts. It is a native of Persian Kurdistan and furnishes tragacanth. [B, 63, 106; L, 78.]—**A. bracteolatus** [De Candolle]. The *A. angustifolius*, var. *δ. peduncularis*. [B, 63.]—**A. carnosus**. 1. Of Nuttall, the *A. caryocarpus*. 2. Of Pursh, a trailing shrub bearing fleshy pods, indigenous to the southern United States. [B, 71, 214.]—**A. caryocarpus** ["Botanical Register"]. An annual herb growing in the southern and western United States; counted among the medicinal plants. [B, 214; "Proc. of the Am. Pharm. Assoc.," xxix, p. 447 (B).]—**A. caucasicus** [Pallas]. A shrubby species growing in the Caucasus and furnishing tragacanth. [B, 63, 173.]—**A. caudatus** [Fischer]. A variety of *A. aristatus*. [B, 63.]—**A. charlostegius** [Boissier and Haussknecht]. An oriental species furnishing a variety of manna like that afforded by *A. florulentus*. [B, 270.]—**A. christianus** [Linnaeus]. An herbaceous species having an erect stalk with leaves having linear subulate stipules and elliptical leaflets, and with clusters of yellow flowers, indigenous to Armenia and Judæa. [B, 71, 214.]—**A. chromolepis** [Boissier and Hol]. A variety of the *A. aureus*. [B, 63.]—**A. cicer** [Linnaeus]. Syn.: *Astragaloides cicera* [Mönch]. A perennial herb growing throughout middle and southern Europe, Russia, the Caucasus, and Siberia, employed as a forage plant and having an edible seed used in Rus-

sia as a food for children. The seeds are said to be laxative and detensive. [B, 63, 173; L, 91, 105.]—*A. cornutus* [Pallas]. See *A. vimineus*.—*A. crassicaarpus* [Fras.]. See *A. caryocarpus*.—*A. creticus* [Lamarck]. Fr., *astragale de Crète*. Ger., *Kretischer Traganth*. Syn.: *A. Boissieri* [Bunge], *Tragacantha cretica incana* [Tournefort].

THE ASTRAGALUS CRETICUS. (AFTER DE LANESSAN.)

growing on the Pacific coast of California; according to some authorities, the poisonous rattle-weed or loco-weed which produces in cattle feeding upon it the disease called loco. ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 247 (B).] Cf. *A. Hornii* and *A. mollissimus*.—*A. cylleneus* [Boissier and Heldreich]. A shrub growing in the Peloponnesus, having short branches armed with long slender spines, and bearing leaves composed of 5 pairs of oblong obtuse leaflets terminating in a long spine and flowers in oval or oblong heads. It furnishes a variety of the tragacanth exported from Greece. [B, 63, 106; L, 65.]—*A. danius* [Hoffmann]. See *A. hypoglottis*.—*A. declinatus* [Willdenow]. A species growing in Armenia, Turkey, the Caucasus, and Kurdistan. [B, 63.]—*A. denudatus* [Stev.]. See *A. microcephalus*.—*A. Dioscoridis quibsdam*, *A. Dioscoridis vulgari*, *A. syriacus* or *A. christianus*. [B, 200.]—*A. echinoides* [L'Héritier], *A. echioides* [Willdenow]. The *A. angustifolius*, var. *a. genuinus*. [B, 214.]—*A. erianthus* [Willdenow]. See *A. gummifer*.—*A. ericantha* [Stev.]. See *A. arnicantha*.—*A. erinaceus* [Presl]. The *A. angustifolius*, var. *a. genuinus*. [B, 63.]—*A. eriocaulis* [De Candolle]. See *A. microcephalus*.—*A. eriophaca* [Ball.]. See *Phaca batica*.—*A. exsepheus* [Linnaeus]. Fr., *astragale sans tige (ou à gousse velue)*. Ger., *stengelloser Traganth*. Syn.: *Astragaloides syphilitica* [Mönch]. Stemless milk-vetch. A perennial European herb with very short stem covered with shaggy hairs and bearing imparipinnate leaves with deciduous petiole, adnate deciduous stipules, and ovate leaflets, and capitate racemes of flowers upon short stalks. The root, which is cylindrical, from  $\frac{1}{4}$  to 1 inch in thickness, and frequently 2 feet in length is odorless, has a taste at first bitter and astringent, afterward sweetish, and contains a bitter extractive principle, and mucilage. Under the name of *radix astragali exscapi*, it was formerly much employed as a diuretic and diaphoretic, and was especially used as a remedy for the various complications of the later stages of syphilis, and also for gout and rheumatism. [B, 173, 180.]—*A. floridus* [Scopoli]. See *A. christianus*.—*A. florulentus* [Boissier and Haussknecht]. A species indigenous to southwestern Persia, related in botanical characters to *A. leioclados*. It furnishes a variety of manna (the *gaz anjabin*, *gaz alefi*, or *gaz khonsari* of the Persians) which contains dextrin, uncrystallizable sugar, and acids. [B, 63, 370; L, 78.]—*A. glaucoides* [Gmelin]. The *Coronilla varia*. [B, 214.]—*A. glauus* [Linnaeus]. Fr., *herbe au lait*. Syn.: *Astragaloides glauus* [Mönch]. An annual herb growing in dry places in the south of France and in Spain, believed to be the *γλαυξ* of Dioscorides. This plant, prepared with a decoction of

THE ASTRAGALUS GLYCYPHYLLOS.  
(AFTER DE LANESSAN.)

barley, has been used as a galactagogue in Spain. [B, 173, 180.]—*A. glycyphyllos* [Linnaeus]. Fr., *fausse réglisse, réglisse bâtarde (ou sauvage), chasse-vaches*. Ger., *wildes Süßholz, Wollschoten*. A prostrate, nearly glabrous, perennial herb, growing throughout Europe and northern Asia, bearing leaves, with ovate, acute, nearly free stipules and from 5 to 6 pairs of ovate leaflets, flowers in pedunculated spicate racemes, shorter than the leaves, and 3-sided cylindrical pods. The disagreeably tasting, sweetish leaves (*herba glycyrrhizæ silvestris*) and the seeds (*semen glycyrrhizæ silvestris*) have been used as an aperient and a remedy in retention of urine, strangury, and dartous affections; and the sweetish root has been employed as a substitute for licorice. [B, 121, 173, 180.]—*A. granatensis* [Linnaeus]. See *A. poterium* (1st def.).—*A. gummifer*, *A. gummiferus* [Labillardière]. Fr., *astragale gommifère*. Ger., *gummigebender Traganth*. A shrub from 2 to 3 feet in height, growing throughout central Asia Minor, Syria, and thence north to Kurdistan, having numerous branches which bear glabrous leaves with from 4 to 6 pairs of linear-oblong leaflets, persistent thorny petioles, and persistent adnate glabrous stipules, and sessile flowers aggregated in groups of 2 to 5 in the axils of the leaves. It is said to furnish a variety of tragacanth, but not so copiously as *A. verus*, also, according to Guibourt, a variety of false tragacanth (Bassora gum) used in the adulteration of genuine tragacanth. [B, 63, 106, 121, 180, 270.]—*A. hispidulus* [De Candolle]. A species growing in Egypt and Arabia. [B, 63, 214.]—*A. Hornii* [Gray]. A California species, said to be one of those producing the disease loco in animals which feed upon it. [B, 66.]—*A. horridus*. 1. Of Boissier, a Persian species. 2. Of Willdenow, the *A. arnicantha*. [B, 63.]—*A. hypoglottis* [Linnaeus]. A procumbent species distributed through North America, Siberia, Barbary, and Europe. [B, 63, 71, 214.]—*A. incanus*. 1. Of Linnaeus, an acaulescent European species with purplish flowers borne on decumbent scapes. 2. Of Wulfen, the *A. Wulfeni*. [B, 71, 214.]—*A. incurvus* [Reichenbach]. See *A. Wulfeni*.—*A. kurdicus* [Boissier]. A shrub, 3 to 4 feet in height, growing throughout Cilicia and Cappadocia and extending eastward to Kurdistan. It has numerous naked branches with branchlets bearing blackish spines, with leaves having short, flat, narrow, silvery leaflets terminating in a long spine, and with flowers disposed in groups of 2 to 6 in a short loose spike. It furnishes, along with *A. stromatodes*, the greater part of the Aintab tragacanth. [B, 63, 106; L, 78.]—*A. lanigerus* [Desfontaines]. A north African species. A variety (the *A. tragacanthoides* [Willdenow]), a perennial herb indigenous to Armenia and Russia, is said to furnish a decoction employed by the Russians in the treatment of intermittent fever. [B, 173, 214.]—*A. leioclados* [Boissier]. A very branching fruticose species, the *quint* of the Kurds, growing in Cappadocia, Armenia, and Lebanon. It is closely related in botanical characters to *A. ascendens* and *A. brachyactyx*, and like them, furnishes tragacanth. [B, 63; L, 78.]—*A. lentiginosus* [Douglas]. A species growing throughout the Pacific United States. A variety, the *A. lentiginosus*, var. *Freemontii* [Watson], growing in Nevada and California, is said to produce the disease called loco in animals feeding upon it. [B, 66.]—*A. leucophyllus* [Willdenow]. The *A. angustifolius*, var. *a. genuinus*. [B, 63.]—*A. lusitanicus* [Lamarck]. See *Phaca batica*.—*A. luteus perennis procumbens vulgaris* [Morison]. The *A. glycyphyllos*. [B, 211.]—*A. macropodium* [Fischer]. See *A. aureus*.—*A. massiliensis* [Lamarck]. Fr., *barbe de renard, dragante, épine de bouc*. Syn.: *A. tragacantha* [Pallas], *A. tragacantha*, var. *a.* [Linnaeus], *Tragacantha massiliensis* [Miller]. A shrubby species, growing in the south of France, Corsica, and Morocco, with spiny petioles and whitish flowers. It is said not to furnish tragacanth, although it has been placed among the plants producing that gum. [B, 173, 214.]—*A. mexicanus* [De Candolle]. A species growing in the prairies of the western United States, where the fruit, which is as large as a plum, is said to be eaten both raw and cooked. [B, 34.]—*A. micranthus* [Nuttall]. See *A. nuttallianus*.—*A. microcephalus* [Willdenow]. A shrub, growing in Asia Minor, Armenia, and Russia, with stems covered with white lanuginous hairs and yellowish petiolar spines, and bearing its flowers in small oval or oblong heads. It furnishes a variety of tragacanth. [B, 63, 106; L, 78.]—*A. mollissimus*. 1. Of Presl, the *A. bethlemiticus*. 2. Of Torrey, a species growing in the United States west of the Mississippi as far as California. It is one of the so-called loco weeds producing loco in cattle. It contains an active principle which, according to Ott, reduces the cardiac force and frequency; at first increases, then diminishes, the arterial tension; decreases motor irritability, blunts the sensibility of the cerebral centres, and acts as a strong narcotic; increases the secretion of saliva, powerfully dilates the pupil, and acts as a tetanizing agent upon the spinal centres. [B, 63; J. Ott, "New Remedies," Aug., 1882, p. 236; "Proc. of the Am. Pharm. Assoc.," xxxi, p. 157 (B).]—*A. monspessulanus*. 1. Of Linnaeus, an acaulescent herbaceous species growing in the south of Europe and in Morocco. 2. Of Grisebach, the *A. Wulfeni*. [B, 63, 214.]—*A. Mortoni* [Nuttall]. A California species, said to act as a deadly poison upon sheep. [B, 66.]—*A. nudatus* [Bunge]. See *A. kurdicus*.—*A. nummularis* [C. Meyer]. See *A. talschensis*.—*A. nuttallianus* [De Candolle]. An annual or biennial decumbent herb, becoming perennial on cultivation, found in the western United States and as far as California. It produces a fatal variety of loco in cattle. [B, 214; "Proc. of the Am. Pharm. Assoc.," xxvii, p. 611 (B).]—*A. odessaensis* [Besser]. See *A. vimineus*.—*A. olympicus* [Pallas]. The *A. angustifolius*, var. *a. genuinus*. [B, 63.]—*A. orientalis acanthis*, *flore luteo* [Tournefort]. See *A. declinatus*.—*A. Parnassi* [Boissier]. A species growing on Mt. Parnassus in Greece. The *A. Parnassi*, var. *cylleneus*, of some is the *A. cylleneus* (q. v.). [B, 63.]—*A. plumosus* [Sieber]. See *A. bethlemiticus*.—*A. poterium*. 1. Of Vahl, the *A. granatensis* [Linnaeus] and *A. tragacantha*, var.  $\beta$  [Linnaeus], the *poterium* of Clusius, and probably the *potriop* of Dioscorides; a shrub with white flowers growing in dry places in Granada. The root contains much gum, and was formerly used as a tonic, nervine, and vulnerary. 2. Of

Pallas, the *A. arnacantha*. 3. Of Willdenow, a species not satisfactorily determined, but probably different from the species of Vahl. [B. 180, 214.]—*A. pseudo-tragacantha* [Pallas]. See *A. aureus*.—*A. pungen* [Willdenow]. The *A. angustifolius*, var.  $\delta$  *peduncularis*. [B. 63.]—*A. pycnocladus* [Boissier and Haussknecht]. A species growing in Persia and Kurdistan, closely allied to *A. microcephalus*, from which it is distinguished chiefly by its densely set, slender spines and its very short, green, folded leaflets. It furnishes a large amount of tragacanth. [B. 63, 106; L. 78.]—*A. pycnophyllus* [Stev.]. See *A. microcephalus*.—*A. retusus* [Willdenow]. The *A. angustifolius*, var. *A. genuinus*. [B. 63.]—*A. sempervirens* [Lamarck]. See *A. aristatus*.—*A. siculus* [Biv.]. A species with white or purplish flowers, growing in Sicily and southern Italy. [B. 214.]—*A. silvaticus* [Willdenow]. *A. silvicolus* [Pallas]. The *Oxytropis silvatica*. [B. 214.]—*A. spicatus* [Pallas]. The *Oxytropis caudata*. [B. 214.]—*A. strobiliferus* [Lindley]. An herbaceous species, growing in Turkestan, bearing woolly leaves with 3 pairs of oval awned leaflets and purple flowers in sessile heads, with plumose calyx and regular corolla; said to furnish the red variety of tragacanth. [B. 5, 71; L. 190.]—*A. stromatodes* [Bunge]. A species closely resembling the *A. kurdicus*, from which it differs chiefly in its globular inflorescence, its larger flowers, and its smaller size. It grows in northern Syria at elevations of about 5,000 feet. [B. 63, 106; L. 78.]—*A. succulentus* [Richards]. A species growing in polar North America, where it is used like *A. aboriginum*. [B. 270.]—*A. syriacus* [Linnaeus]. *A. syriacus hirsutus* [Bauhin]. A plant of uncertain botanical character; probably the *A. vimineus*. [B. 63, 211, 214.]—*A. talyshensis* [Bunge]. A species growing in waste fields in the province of Talyshin bordering on northern Persia. [B. 63.]—*A. tragacantha*. 1. Of Bernhardi, the *A. siculus*. 2. Of Pallas, the *A. massiliensis*. 3. Of Linnaeus, the *A. massiliensis* and *A. poterium*. [B. 214.]—*A. tragacanthoides*. 1. Of Willdenow, the *A. lanigerus*. 2. Of Lamarck, the *A. declinatus*. 3. The *A. talyshensis*. [B. 63, 214.]—*A. uncinatus* [Mönnch]. See *A. boteticus*.—*A. varius* [Gmelin]. See *A. virgatus*.—*A. verus*. 1. Of Olivier, a shrub growing in western Persia, with thick tomentose branches covered with short, slender, petiolar spines, and bearing leaves with 8 to 10 pairs of very narrow, linear, hispid leaflets and sessile flowers disposed in groups of 2 to 5, tomentose, and with obtusely 5-dentate calyx. According to Olivier, it furnishes the greater part of the gum tragacanth of commerce according to Martius, it furnishes the flake tragacanth. 2. Of De Candolle, a plant referred to a different species. [B. 63, 106.]—*A. vimineus* [Pallas]. A species growing in Siberia and about Odessa. [B. 214.]—*A. virgatus* [Pallas]. 1. A species growing in Hungary and eastward along the Volga to the Caspian Sea. 2. A variety of the *A. erotalarie*, made by Gray. [B. 214; "Proc. of the Am. Pharm. Assoc.," xxvii, p. 247 (B).]—*A. vulgo Christianae radix*. The *A. christianae*, or perhaps the *A. syriacus*. [B. 200, 211.]—*A. Wulfenii* [Koch]. A species growing in Greece, Macedonia, and Dalmatia. [B. 63.]—*Gummi astragalorum*. Gum tragacanth. [B.]—*Infusum astragali exscapi*. A preparation made by infusing 1 part of the root of *A. exscapus* in 12 parts of water and straining. [B. 119.]—*Radix astragali*, *radix astragali exscapi*. Ger., *Astragalwurzel*. The root of *A. exscapus*. [B. 180; L. 30.]

**ASTRAGALWURZEL** (Ger.), n.  $A^2s$ -tra<sup>2</sup>-ga<sup>1</sup>/vurt-se<sup>2</sup>. See *Radix ASTRAGALI*.

**ASTRAL**, adj.  $A^2s$ -tra<sup>2</sup>. Gr., *ἀστρικός*. Lat., *astralis* (from *aster*, a star). Fr., *astral*. Ger., *astralisch*. 1. Pertaining to the stars or to an aster (*q. v.*). 2. Pertaining to the stellate phase of the nucleus in karyokinesis. [J.]

**ASTRANCE** (Fr.), n.  $A^2s$ -tra<sup>2</sup>-ns. See *ASTRANTIA*.

**ASTRANTHIUM** [Nuttall] (Lat.), n. n.  $A^2s$ ( $a^2s$ )-tra<sup>2</sup>n(tran<sup>3</sup>)-thi<sup>2</sup>-u<sup>3</sup>m(u<sup>3</sup>m). From *ἀστρῆ*, a star, and *ἄνθος*, a flower. A genus of composite plants corresponding in part to *Bellis* (*q. v.*). [B. 121.]

**ASTRANTIA** (Lat.), n. f.  $A^2s$ ( $a^2s$ )-tra<sup>2</sup>n(tran<sup>3</sup>)-shi<sup>2</sup>-ti<sup>2</sup>-a<sup>3</sup>. From *ἀστρῶν*, a star. Fr., *astrance*. Ger., *Astrantie*, *Sterndolde*, *Meisterwurz*. A genus of umbelliferous herbs of the tribe *Saniculeae*, established by Linnaeus. [B. 121.]—*A. candida* [Miller]. See *A. major*.—*A. diapiensia* [Scopoli]. The *Sanicula europaea*. [B. 180.]—*A. epipactis* [Linnaeus]. A species supposed to be the *ἐπιπᾶκτις* of Dioscorides. [L. 105.]—*A. major* [Linnaeus]. Fr., *otruche noire*, *sanicle femelle* (ou de montagne). Ger., *grosse Astrantie*, *schwarze* (odor falsche) *Meisterwurz*. The black sanicle, black masterwort; a species growing in the mountainous districts of central Europe. The rhizome (*radix astrantie majoris*, *radix imperatoria nigra*) is brownish-black, or, when dried, completely black, beset with numerous slender branching fibrils, and devoid of odor, but of an acrid, bitter taste. It has been used as a purgative, and is sometimes mixed with or substituted for black hellebore root. [B. 173, 180; L. 80.]—*A. minor*. Ger., *kleine Astrantie*. An herbaceous plant indigenous to Switzerland. [B. 71.]—*A. nigra* [Scopoli]. *A. nigra major*, *A. vulgaris*. See *A. major*.—*Radix astrantie*. The rhizome of *Imperatoria ostruthium*. [B. 180.]—*Radix astrantie majoris*. The rhizome of *A. major*. [B. 180.]

**ASTRANTIEÆ** (Lat.), n. f. pl.  $A^2s$ ( $a^2s$ )-tra<sup>2</sup>n(tran<sup>3</sup>)-ti(<sup>2</sup>)-e<sup>2</sup>-e(<sup>2</sup>-e<sup>2</sup>). A tribe of umbelliferous plants including only the genus *Astrantia*. [B. 170.]

**ASTRAPEÆ** (Lat.), n. f.  $A^2s$ ( $a^2s$ )-tra<sup>2</sup>-pe(<sup>2</sup>-e<sup>2</sup>)-a<sup>3</sup>. From *ἀστραπῆς*, pertaining to lightning. A genus of plants, referred by Lindley to the *Sterculiaceae*, by others to the *Malvaceae*, and regarded by many as a section of *Dombeya*, but distinguished from the latter by the sessile flowers being surrounded by an involucre of large bracts. [B. 19, 121, 170.]—*A. cannabina*. A Madagascar species furnishing a material used in making cordage. [B. 19.]—*A. Wallichii*. A species indigenous to Madagascar and cultivated in Europe, having bright-red flowers borne in pendulous umbels. [B. 19.]

**ASTRAPEÆRIEÆ** (Lat.), n. f. pl.  $A^2s$ ( $a^2s$ )-tra<sup>2</sup>-pe(<sup>2</sup>-e<sup>2</sup>)-a<sup>3</sup>-ri(<sup>2</sup>)-e<sup>2</sup>-e(<sup>2</sup>-e<sup>2</sup>). A subdivision of the *Malveæ* made by Reichenbach, including *Astrapeæ*. [B. 170.]

**ASTRAPE** (Lat.), n. f.  $A^2s$ ( $a^2s$ )-tra<sup>2</sup>-pe(<sup>2</sup>-e<sup>2</sup>). Gr., *ἀστραπῆ*. Lightning; reckoned by Galen among the procatactic causes of epilepsy. [A. 325.]

**ASTRAPHOBIA** (Lat.), n. f.  $A^2s$ ( $a^2s$ )-tra<sup>2</sup>-fo(<sup>2</sup>-fo<sup>2</sup>)-bi<sup>2</sup>-a<sup>3</sup>. From *ἀστραπῆ*, lightning, and *φόβος*, terror. Fr., *astraphobie*. Excessive terror at the approach of thunder-storms, accompanied by nausea, vomiting, weakness of the limbs, and vertigo. [A. 445.]

**ASTRAPOLECTUS** (Lat.), adj.  $A^2s$ ( $a^2s$ )-tra<sup>2</sup>-po(<sup>2</sup>-ple<sup>2</sup>-k(plak)/tu<sup>3</sup>s(tu<sup>3</sup>s). Gr., *ἀστραποπηκτός*. Struck or blasted with lightning. [A. 318.]

**ASTRENZWURZEL** (Ger.), n.  $A^2s$ -tre<sup>2</sup>-ntz/vurtz-e<sup>2</sup>. See *Radix ASTRUTHI*.

**ASTREPHIA** (Lat.), n. f.  $A^2s$ ( $a^2s$ )-tre<sup>2</sup>/f<sup>2</sup>-i<sup>2</sup>-a<sup>3</sup>. Of Dufresne, a genus of perennial valerianaceous herbs. [B. 42, 214.]—*A. coarctata* [Dufresne]. See *VALERIANA coarctata*.

**ASTRICTIF** (Fr.), adj.  $A^2s$ -tri<sup>2</sup>-k-tef. Astrigent. [L. 41.]

**ASTRICTIO**, n.  $A^2s$ -tri<sup>2</sup>-k/shu<sup>3</sup>n. Lat., *astrictio* (from *astringere*, to bind, to tighten). Fr., *astriction*. Ger., *Zusammenziehung*, *Verstopfung*. It., *astrizione*. Sp., *astricción*. 1. The tightening of a bandage or a ligature. [L. 41, 42.] Cf. *CONSTRICION*. 2. The action of an astrigent or a styptic. [A. 385.]

**ASTRICTIVE, ASTRICTORY**, adj's.  $A^2s$ -tri<sup>2</sup>-k/ti<sup>2</sup>v-, to-ri<sup>2</sup>. Lat., *astrictorius*. Fr., *astrictif*. Ger., *zusammenziehend*, *styp-tisch*. See *ASTRINGENT*.

**ASTRICTUS** (Lat.), adj.  $A^2s$ ( $a^2s$ )-tri<sup>2</sup>-k(trek)/tu<sup>3</sup>s(tu<sup>3</sup>s). 1. Constipated. [Celsus (A. 318).] 2. Astrigent. [Pliny (A. 318).]

**ASTRICUS** (Lat.), adj.  $A^2s$ ( $a^2s$ )-tri<sup>2</sup>-k-u<sup>3</sup>s(u<sup>3</sup>s). Gr., *ἀστρικός*. See *ASTRAL*.

**ASTRIFIBRIA** (Lat.), n. f.  $A^2s$ ( $a^2s$ )-tri<sup>2</sup>-fi<sup>2</sup>-b/ri<sup>2</sup>-a<sup>3</sup>. See *CORTICALIA*.

**ASTRINGENCY**, n.  $A^2s$ -tri<sup>2</sup>-n/je<sup>2</sup>-n-si<sup>2</sup>. Fr., *astringence*. Ger., *adstringende Kraft*. The property of acting as an astrigent. [A. 385.]—**Principle of a**. An old name for gallic acid. [B. 91.]

**ASTRINGENT**, adj. and n.  $A^2s$ -tri<sup>2</sup>-n/je<sup>2</sup>-nt. Lat., *astringens*. Fr., *astringent*. Ger., *adstringend* (adj.), *zusammenziehend* (adj.), *adstringende Mittel* (n.). It., *astringente*. 1. Having the property of causing contraction or shrinking of living tissues, so as to diminish the amount of blood and other liquids in them, control or reduce hæmorrhage from them, and lessen their secretion. [A. 385.] 2. Constipating (by diminishing the intestinal secretions). 3. As a n., any agent producing these effects.—**A's absorbants** (Fr.). A's which act by withdrawing liquid from the tissues. [De Savignac (L. 87).]—**A's condensants** (Fr.). Those which act by contracting relaxed fibres. [De Savignac (L. 87).]—**A's emphracticus** (Fr.). A's *invisquans* (Fr.). Those which decrease the secretion of a part by coagulating the material in the mouths of its vessels. [De Savignac (L. 87).]—**A. principle**. See *Principle of ASTRINGENCY*.—**A's pycnotiques** (Fr.). See *A's condensants*.—**A's reserrants** (Fr.). A's *stégnotiques* (Fr.). Styptics. [L. 87.]

**ASTRION** (Lat.), n. n.  $A^2s$ ( $a^2s$ )-tri<sup>2</sup>-o<sup>2</sup>-n. Gr., *ἀστριον* (dim. of *ἀστὴρ*, a star). 1. Of Dioscorides, the *Plantago coronopifolia*. [Bory (B. 121).] 2. According to Ingrassias, a term used by Galen as synonymous with *astragalus* (the ankle bone); but C. G. Kühn maintains that Galen wrote *astris*. [A. 322.]

**ASTRIS** (Lat.), n. f.  $A^2s$ ( $a^2s$ )-tri<sup>2</sup>s. Gr., *ἀστρῆς*. See *ASTRAGALUS*.

**ASTRIZWURZEL** (Ger.), n.  $A^2s$ -tri<sup>2</sup>-tz/vurtz-e<sup>2</sup>. See *Radix ASTRUTHI*.

**ASTROBLES** (Lat.), adj.  $A^2s$ ( $a^2s$ )-tro<sup>2</sup>-b/lez(las). Gen., *astroble-tos* (-tis). Gr., *ἀστροβλής*, *ἀστροβλητος* (from *ἀστρῶν*, a star, and *βάλλειν*, to strike). Syn.: *sideratus*. Affected with astrobolismis. [A. 325.]

**ASTROBLESLA** (Lat.), n. f.  $A^2s$ ( $a^2s$ )-tro(tro<sup>2</sup>)-ble(bla)/si<sup>2</sup>-a<sup>3</sup>. Gr., *ἀστροβλησία*. See *ASTROBOLISMUS*.

**ASTROBLETOS** (Lat.), adj.  $A^2s$ ( $a^2s$ )-tro(tro<sup>2</sup>)-ble(bla)/to<sup>2</sup>s. Gr., *ἀστροβλητος*. See *ASTROBLES*.

**ASTROBOLESLA, ASTROBOLIA, ASTROBOLISMUS** (Lat.), n's f. f., and m.  $A^2s$ ( $a^2s$ )-tro(tro<sup>2</sup>)-bo(bo<sup>2</sup>)-le(la)/si<sup>2</sup>-a<sup>3</sup>. -bol(bo<sup>2</sup>)/i<sup>2</sup>-a<sup>3</sup>. -bo(bo<sup>2</sup>)-li<sup>2</sup>s(mu<sup>3</sup>s(mu<sup>3</sup>s). Gr., *ἀστροβλησία*, *ἀστροβόλια*, *ἀστροβολισμός*. Fr., *astrobolisme*. Syn.: *sideratio*. 1. A sudden withering or blighting of an organism or a part (said originally of plants), as by the heat of the sun or by some malign influence attributed to the stars, especially the dog-star. [A. 322, 387.] 2. The state of being struck by lightning. [L. 30.] 3. Sunstroke. [A. 322.] 4. A stroke of apoplexy. [Gorræus (A. 325); L. 41.] 5. Sphacelus. [A. 325.]

**ASTROBOLUS** (Lat.), n. m.  $A^2s$ ( $a^2s$ )-tro<sup>2</sup>-b/o(o<sup>2</sup>)-lu<sup>3</sup>s(lu<sup>3</sup>s). Gr., *ἀστροβόλος*. See *ASTERIAS* (2d def.).

**ASTROCARPEÆ** [Reichenbach], **ASTROCARPINEÆ** [Spach] (Lat.), n's f.  $A^2s$ ( $a^2s$ )-tro(tro<sup>2</sup>)-ka<sup>3</sup>rp<sup>2</sup>-e<sup>2</sup>-e(<sup>2</sup>-e<sup>2</sup>), -ka<sup>3</sup>rp<sup>2</sup>-i<sup>2</sup>n<sup>2</sup>-e<sup>2</sup>-e(<sup>2</sup>-e<sup>2</sup>). Fr., *astrocarpées*. A tribe of resedaceous plants, including the single genus *Astrocarpus*. [B. 121, 170.]

**ASTROCARYUM** [C. N. G. Meyer] (Lat.), n. n.  $A^2s$ ( $a^2s$ )-tro(tro<sup>2</sup>)-ka<sup>3</sup>rp<sup>2</sup>(ka<sup>3</sup>rp<sup>2</sup>)/i<sup>2</sup>(u<sup>3</sup>)-u<sup>3</sup>m(u<sup>3</sup>m). From *ἀστρῶν*, a star, and *κάρων*, a nut, from the stellate dehiscence of the pericarp in some of the species. A genus of palms of the tribe *Coccothæceæ*. [B. 19, 121.]—**A. acule** [Martius]. The (*Enocarpus baccana* (*baccaba*)). [B. 173.]—**A. ayri** [Martius]. Syn.: *Trophopanax aculeatissima* [Schott]. A Brazilian species (the *ayri* of the Brazilians), of the wood of which the Indians make bows, spindles, etc., and which has an edible fruit. [B. 121, 173.]—**A. murmur** [Martius]. A Brazilian species, the

fruit of which is eaten by the natives and given to cattle. The stony seeds, which pass through the alimentary canal unchanged, are afterward devoured by pigs. The leaves are used for thatching huts. [B, 19, 173.]—*A. tucuma* [Martius], *A. vulgare*. The tucum palm; a Brazilian species, the leaves of which furnish a fine thread woven by the Indians into hammocks. The fruit furnishes tucum oil. [B, 19, 173; L, 63, 73.] The root is said to be used as an antisyphilitic. [A, 316.]

**ASTROCOMIA** (Lat.), n. f.  $A^2s(a^3s)\text{-tro}(tro^2)\text{-kom}(ko^2m)/i^2\text{-}a^3$ . A subfamily of *Nucularia*, including two genera. [Rafinesque (B, 170).]

**ASTROCYNOLGIA** (Lat.), n. f.  $A^2s(a^3s)/\text{tro}(tro^2)\text{-si}^2n(ku^6n)\text{-o}(o^2)\text{-loj}(lo^2g)/i^2\text{-}a^3$ . From *αστροκύων*, the dog-star, and *λόγος*, understanding. Astrology in its relations to the dog-star. [A, 325.]

**ASTRODACTYLÆ** (Lat.), n. f. pl.  $A^2s(a^3s)\text{-tro}(tro^2)\text{-da}^2k\text{-}(da^2k)/ti^2l(tu^6l)\text{-e}(a^3\text{-}e^2)$ . A family of the *Caducibranchia* of J. Hogg; frog-like, short-bodied, tailless, tongueless, four-legged, and having the tympanum concealed. [L, 204.]

**ASTRODENDRON** (Lat.), n. n.  $A^2s(a^3s)\text{-tro}(tro^2)\text{-de}^2n\text{'dro}^2n$ . From *αστρον*, a star, and *δένδρον*, a tree. See STERCUARIA.

**ASTROFEL**, **ASTROFELL**, n's.  $A^2s/\text{tro}\text{-fe}^2l$ . See ASTER (3d def.).

**ASTROGYNE** [Bentham] (Lat.), n. f.  $A^2s(a^3s)\text{-tro}^2j(tro^2g)/i^2n(u^6n)\text{-e}(a)$ . A genus of euphorbiaceous plants, now regarded as a section of the genus *Croton*. [B, 121.]

**ASTROIDEUS** (Lat.), adj.  $A^2s(a^3s)\text{-tro}(tro^2)\text{-i}^2d(ed)/e^2\text{-u}^3s(u^4s)$ . Fr., *astroïde*. Star-shaped. [B, 212; L, 109.]

**ASTROITES**, **ASTROITIS** (Lat.), n's m. and f.  $A^2s(a^3s)\text{-tro}(tro^2)\text{-i}(e)/tez(tas)\text{-ti}^2s$ . Gen., *astroi'tae*, *-it'idis*. See ASTERIAS (2d def.).

**ASTROLINÆÆ** (Lat.), n. f. pl.  $A^2s(a^3s)\text{-tro}(tro^2)\text{-li}^2n\text{'e}^2\text{-e}(a^3\text{-}e^2)$ . Of Baudo, a tribe of primulaceous plants, including *Asterolinon* and *Pelletiera*. [B, 170.]

**ASTROLINOIDES** (Lat.), n. f. pl.  $A^2s(a^3s)\text{-tro}(tro^2)\text{-li}^2n\text{'o}^2\text{-o}(o^2)\text{-i}(e)/dez(das)$ . A tribe of plants of the family *Anagallidæ*, made by Baudo, with *Asterolinon* as the typical genus. [B, 170.]

**ASTROLINON** (Lat.), n. n.  $A^2s(a^3s)\text{-tro}^2l/i^2n\text{'o}^2n$ . See ASTEROLINON.

**ASTROLOBIIUM** (Lat.), n. n.  $A^2s(a^3s)\text{-tro}(tro^2)\text{-lob}(lo^2b)/i^2\text{-u}^3m(u^4m)$ . See ARTHROLOBIUM.

**ASTROLOGER**, n.  $A^2s\text{-tro}^2l/o\text{-ju}^6r$ . Gr., *αστρολόγος* (from *αστρον*, a star, and *λόγος*, understanding). Lat., *astrologus*. Fr., *astrologue*. Ger., *Astrolog*, *Sterndeuter*. A practitioner of astrology.

**ASTROLOGY**, n.  $A^2s\text{-tro}^2l/o\text{-ji}^2$ . Gr., *αστρολογία*. Lat., *astrologia*. Fr., *astrologie*. Ger., *Astrologie*, *Sterndeuterei*. The pretended science of divination by observations of the stars, and of the influence of the stars on the health, etc., of human beings. [A, 322, 325.]

**ASTROLOMA** (Lat.), n. n.  $A^2s(a^3s)\text{-tro}(tro^2)\text{-lo}^2ma^3$ . From *αστρον*, a star, and *λωμα*, a fringe or border. A genus of epacridaceous undershrubs of the tribe *Stipeliæ*, made by R. Brown. [B, 19, 121.]—*A. humifusum* [R. Brown], *A. pallidum* [Sond.]. A diffuse or prostrate, much-branched species growing in Australia and Tasmania. [B, 219.]

**ASTROMANTIA** (Lat.), n. f.  $A^2s(a^3s)\text{-tro}(tro^2)\text{-ma}^2n(ma^3n)\text{-ti}(te)/a^3$ . Gr., *αστρομαντία*, *αστρομαντική* (τέχνη understood). Fr., *astromantie*. Ger., *Astromantie*. See ASTROLOGY.

**ASTROMANTIS** (Lat.), n. m.  $A^2s(a^3s)\text{-tro}(tro^2)\text{-ma}^2n(ma^3n)/ti^2s$ . Gen., *astromant'eos* (-tis). Gr., *αστρομαντις*. See ASTROLOGER.

**ASTROMARCHANTIA** (Lat.), n. f.  $A^2s(a^3s)/\text{tro}(tro^2)\text{-ma}^2r\text{-ka}^2n(ch^2a^3n)/shi^2(tii^2)\text{-a}^3$ . A section of the botanical genus *Marchantia*, including the species with a central female receptacle. [Nees (B, 121).]

**ASTROMATICÆ** (Lat.), n. f. pl.  $A^2s(a^3s)\text{-tro}(tro^2)\text{-ma}^2t(ma^3t)/i^2\text{-se}(ka^3\text{-}e^2)$ . A series of pyrenomycetous *Fungi*, including those species of *Sphaeria* in which the receptacles, which are simple and distinct, are not borne upon a stroma. [Wallroth (B, 121).]

**ASTRON** (Lat.), n. n.  $A^2s(a^3s)/\text{tro}^2n$ . See ASTRUM.

**ASTRONIA** (Lat.), n. f.  $A^2s(a^3s)\text{-tro}/ni^2\text{-}a^3$ . A genus of melastomaceous plants resembling *Melastoma* in general appearance and belonging to the tribe *Anacardiæ*. [B, 19, 121.]—*A. papetaria*. A species growing in the Moluccas, having acidulous leaves which are cooked and used as a sauce for fish. [B, 19.]

**ASTRONIÆÆ** (Lat.), n. f. pl.  $A^2s(a^3s)\text{-tro}^2n\text{-i}(i^2)/e^2\text{-e}(a^3\text{-}e^2)$ . Fr., *astroniées*. 1. A division of the *Anacardiæ* made by Marchand, including *Astronium*. [B, 121.] 2. Of Bentham and Hooker, a tribe of melastomaceous plants including genera, such as *Astronia*, which have triplinnerved leaves; equal stamens with short, subulate filaments and short, recurved anthers, with loculi dehiscing by introrse fissures, and with a connective usually spurred below; an ovary completely inferior, bearing a capitate, grooved, or punctiform stigma, and having from two to five loculi containing numerous ovules placed upon placentæ which are either basilar, parietal, or situated in the angles of the loculi. The fruit is a coriaceous or fleshy, many-seeded berry. [B, 121.]

**ASTRONIUM** (Lat.), n. n.  $A^2s(a^3s)\text{-tro}/ni^2\text{-u}^3m(u^4m)$ . A genus of American anacardiaceous plants made by Jacquin. [A, 385; B, 121.]—*A. fraxinifolium* [Schott]. A species which furnishes a turpentine and has an astringent wood. [B, 121.]—*A. graveolens* [Jacquin]. A species bearing an astringent fruit, used in New Granada as a medicine. [B, 121; L, 49.]

**ASTROPECTINIDÆ** (Lat.), n. f. pl.  $A^2s(a^3s)/\text{tro}(tro^2)\text{-pe}^2k\text{-ti}^2n(i^2d\text{-e}(a^3\text{-}e^2))$ . A family of the *Asteroidæ*, made by Gray, including those with two rows of feet and having the back flatish, with numerous tubercles crowned with radiating spines. [L, 147.]

**ASTROPHEA** (Lat.), n. f.  $A^2s(a^3s)\text{-tro}(tro^2)/fe^2\text{-}a^3$ . A section of the botanical genus *Pussiflora*, destitute of cirrhi and involucre, and having a 10-parted calyx and five stamens. [B, 19.]

**ASTROPHEL**, n.  $A^2s/\text{tro}\text{-fe}^2l$ . See ASTER (3d def.).

**ASTROPHORE** (Fr.), adj.  $A^2s\text{-tro}\text{-for}$ . From *αστρον*, a star, and *φορεῖν*, to bear. Bearing star-shaped processes. [L, 41.]

**ASTROPHYLLA** (Lat.), n. f.  $A^2s(a^3s)\text{-tro}(tro^2)\text{-fi}^2l(fu^6l)/la^3$ . From *αστρον*, a star, and *φύλλον*, a leaf. A subfamily of *Aparinia* made by Rafinesque, including *Asperula* and other genera. [B, 121.]

**ASTORRHIZIDEA** [Brady] (Lat.), n. n. pl.  $A^2s(a^3s)\text{-tro}^2r\text{-ri}^2z\text{-i}^2d\text{'e}^2\text{-}a^3$ . A marine order of the *Imperforata*, having a coating composed of foreign particles, comprising the families *Astorrhizina*, *Pilulina*, *Saccaminina*, and *Rhabdamminina*. [L, 121.]

**ASTORRHIZINA** [Brady] (Lat.), n. n. pl.  $A^2s(a^3s)\text{-tro}^2r\text{-ri}^2z\text{-i}(e)/na^3$ . A family of the *Astorrhizidea*, having thick walls of loosely cemented sand or mud. [L, 121.]

**ASTOTRICHIA** (Lat.), n. f. of adj. *astrotrichus*.  $A^2s(a^3s)\text{-tro}^2t\text{'ri}^2k(ch^2)\text{-}a^3$ . Fr., *astrotriche*. A genus of umbelliferous plants indigenous to New Holland. [L, 109.]

**ASTOTRICHUS** (Lat.), adj.  $A^2s(a^3s)\text{-tro}^2t\text{'ri}^2k(ch^2)\text{-}u^3s(u^4s)$ . From *αστρον*, a star, and *τριχ*, a hair. Fr., *astrotriche*. Having hairs arranged in the form of a star; a botanical species-name. [L, 109.]

**ASTRUM** (Lat.), n. n.  $A^2s(a^3s)/\text{tru}^3m(tru^4n)$ . Gr., *αστρον*. Lit., anything brilliant or admirable; a name formerly applied to alcohol and all essences, also to any medicinal preparation which was supposed to have acquired special virtues in the method of its preparation; the power thus acquired; any remedy of extraordinary virtues. [A, 325; L, 94, 109.]—*A. duplicatum*. Ger., *Doppelgestirn*. An old charlatanistic name for a noted stomachic preparation containing antimony, coral, amber, and musk. [A, 322.]—*A. ex igne*. The appearance of fire. [Dornæus (A, 325).]—*A. salis*. The oily liquid resulting from the deliquescence of salt. [A, 325.]—*Mercurii*. A sublimed mercury. [A, 325.]—*Sulphuris* a. "A most excellent oil" made by burning sulphur. [L, 94.]

**ASTRUTHIUM**, **ASTRUTHIUM** (Lat.), n's n.  $A^2s(a^3s)\text{-tru}^2(tru^3)/u^3m(u^4m)$ ,  $ti^2\text{-u}^3m(u^4m)$ . See IMPERATORIA *ostruthium*.—*Radix astruthii*. Ger., *Astrenzwurzel*. The rhizome of *Imperatoria ostruthium*. [B, 180.]

**ASTUCHIUM** (Lat.), n. n.  $A^2s(a^3s)\text{-tu}^2(tu^3)/ki^2(ch^2i^2)\text{-u}^3m(u^4m)$ . It., *astuccio*. That portion of the inferior cornu of the lateral ventricle of the brain which is in relation with the hippocampus major. [L, 44.]

**ASTURIENSIS** (Lat.), adj.  $A^2s(a^3s)\text{-tu}^2(tu^4)\text{-ri}^2\text{-e}^2n\text{'si}^2s$ . Asturian, pertaining to Asturias. [G.] See ROSE of the Asturias.

**ASTYLIS** (Lat.), n. f.  $A^2s(a^3s)\text{-ti}(tu^6)/li^2s$ . Gen., *astyl'idis* (-dis). From a priv., and *στυλῖς* (dim. of *στυλος*, a shaft). 1. Of Wight, a section of *Hemicyclia*, referred by Bentham to *Drypetes*. [A, 322.]—An old name for the mistletoe (*Viscum album*). 3. A variety of lettuce (*Lactuca*) formerly used as an antaphrodisiac. [B, 121.]

**ASTYLON** (Lat.), n. n.  $A^2s(a^3s)\text{-ti}(tu^6)/lo^2n$ . A section of the genus *Physarum*. [B, 121.]

**ASTYLOUS**, adj.  $A^2s\text{'ti}^2lu^3s$ . Gr., *αστυλος* (from a priv., and *στυλος*, a pillar). Lat., *astyle*. Fr., *astyle*. Ger., *griffellos*. In botany, having no style. [Wachendorf (B, 121).]

**ASTYPHIA** (Lat.), n. f.  $A^2s(a^3s)\text{-ti}^2f(tu^6f)/i^2\text{-}a^3$ . See ASTYSIA.

**ASTYPHOS** (Lat.), adj.  $A^2s(a^3s)\text{-ti}(tu^6)/fo^2s$ . Gr., *αστυφος*. See ASCYPHOUS.

**ASTYSIA** (Lat.), n. f.  $A^2s(a^3s)\text{-ti}^2s(tu^6s)/i^2\text{-}a^3$ . Gr., *αστυσία* (from a priv., and *στυνέω*, to make erect). Fr., *astysie*. A defective power of erection of the penis. [L, 70.]

**ASTYTICUS** (Lat.), adj.  $A^2s(a^3s)\text{-ti}^2t(tu^6t)/i^2k\text{-u}^3s(u^4s)$ . See ASTYTOS.

**ASTYTIS** (Lat.), n. f.  $A^2s(a^3s)\text{-ti}(tu^6t)/ti^2s$ . Gen., *astyl'idis* (-dis). Gr., *αστυτις*. See ASTYLIS (3d def.).

**ASTYTOS**, **ASTYTUS** (Lat.), adj's.  $A^2s(a^3s)\text{-ti}(tu^6t)/to^2s\text{-tu}^3s(tu^4s)$ . Gr., *αστυτος*. Pertaining to, dependent on, causing, or affected with, astysia. [A, 322.]

**ASUGAR**, n. See AZAGOR.

**ASUL** (Ar.). n. The *Tamarix orientalis*; in India, the *Tamarix ferox*. [B, 19.]

**ASULCI**, n. See LAPIS lazuli.

**ASUNTROPHON**, n. An ancient name for the *Rubus fruticosus*. [Dioscorides (B, 121).]

**ASUOLI**, n. An alchemical name for soot and for ink. [Ruland, Johnson (A, 325).]

**ASURIK**, n. An African name for the *Eruca sativa* (*Brassica eruca*). [Adanson (B, 121); L, 105.]

**ASVAGANDHĀ** (Sanskrit), n. The *Withania somnifera*. [B, 181.]

**ASVATTHA** (Sanskrit), n. The *Ficus religiosa*. [B, 181.]

**ASVOLI**, n. See ASUOLI.

**ASWAGANDHI** (Telooogo), n. See ASVAGANDHĀ.

**ASWANA**, n. A Ceylonese name for the *Spermocoe hispida*. [B, 121.]

**ASYLA** (Lat.), n. f.  $A^2s(a^3s)\text{-i}(u^6)/la^3$ . An herb mentioned by Pliny. [A, 318.]

**ASYLUM** (Lat.), n. n.  $A^2s(a^3s)\text{-i}(u^6)/lu^3m(lu^4m)$ . From *ασυλος*, safe from violence. Fr., *asyle*. Ger., *Asyl*, *Zufluchtsort*. It., *Sp.*, *asilo*. A place of refuge for those who are sick or afflicted in any way calling for special care and protection.—*Insane* a., *Lunatic* a. Fr., *asyle des aliénés*. Ger., *Irrenanstalt*. An a. for the care

and treatment of the insane.—**Lying-in a.** Fr. *maternité*. Ger. *Gebäranstalt*. A maternity hospital; an institution into which women are received at or shortly before the time of labor, and where they are cared for during parturition and the puerperal period.

**ASYMBOLIA** (Lat.), n. f.  $A^2s(a^3s)-i^2m(u^4m)-bo(bo^2y)li^2-a^3$ . From a priv., and *σύνβολον*, a sign. Ger. *Asymbole*. A term proposed by Finkelnburg for the phenomena of aphasia, because those affected with it are unable to make themselves understood by the customary signs (*i. e.*, by words). [R. Arndt (D, 18).]

**ASYMÉTRANTHE** (Fr.), adj.  $A^2s-i^2m-a-trant$ . For this and other French words in *Asymétr-* not here given, see the corresponding English words in *Asymmetr-*.

**ASYMMETRICAL**, adj.  $A^2s-i^2m/me^2t-ra^2l$ . See **ASYMMETRICAL**.

**ASYMMETRANTHOUS**, adj.  $A^2s-i^2m/me^2t-ra^2n-thu^3s$ . From *ἀσύμμετρος*, lacking in symmetry, and *άνθος*, a flower. Fr. *asymétranthe*. Having asymmetrical flowers. [L, 41.]

**ASYMMETRIC**, **ASYMMETRICAL**, adj's. Gr. *ἀσύμμετρος*. Lat. *asymmetricus*. Fr. *asymétrique*. Ger. *asymmetrisch*. Lacking in symmetry, not developed alike on both sides; of organs, existing on only one side of the body. [L, 41, 49.]

**ASYMMETROCARPOUS**, adj.  $A^2s-i^2m-me^2t-ro-ka^2rp-u^3s$ . From *ἀσύμμετρος*, asymmetrical, and *καρπός*, a fruit. Fr. *asymétrocarpe*. Having asymmetrical fruit. [L, 41, 180.]

**ASYMMETRY**, n.  $A^2s-i^2m/me^2t-rí^2$ . Gr. *ἀσυνμετρία* (from a priv., and *συνμετρία*, symmetry). Lat. *asymmetria*. Fr. *asymétrie*. Ger. *Asymmetrie*. It. *asimmetria*. Sp. *asimetria*. A deviation from equality of development of the two sides of the body, of an organ, or of the two members of a pair of organs; the existence of an organ on one side of the body without that of a corresponding organ on the other side. [A, 385; L, 42.]—**Meridional a.** Fr. *asymétrie méridionale*. Ger. *meridionale Asymmetrie*. It. *asimmetria meridionale*. Sp. *asimetria meridional*. See **Regular ASTIGMATISM**.

**ASYMPHOROS**, **ASYMPHORUS** (Lat.), adj's.  $A^2s(a^3s)-i^2m-(u^4m)fo^2r-o^2s$ ,  $-u^3s(u^4s)$ . Gr. *ἀσύνφορος*. Prejudicial, noxious. [Hippocrates (A, 322).]

**ASYMPHYTOUS**, adj.  $A^2s-i^2m/i^2t-u^3s$ . Gr. *ἀσύνφυτος*. Lat. *asymphytus*. Distinct, not grown together. [Hippocrates (A, 311, 325).]

**ASYMPTOTOUS**, adj.  $A^2s-i^2mp-to^2u^3s$ . Gr. *ἀσύνπτωτος*. Lat. *asymptotus*. Not restored to normal compactness (said of swollen parts). [Hippocrates, Galen (A, 325).]

**ASYNCLETISM**, n.  $A^2s-i^2n/klí^2-i^2zm$ . From a priv., *σύν*, along with, and *κλίσις* or *κλίσις*, an inclination, a slope. Fr. *asynclitisme*. The state of obliquity of two or more things to each other (*e. g.*, the foetal head and the parturient canal or a particular portion of it). [A, 385.]

**ASYNECHIA** (Lat.), n. f.  $A^2s(a^3s)-i^2n(u^4n)-e^2k(e^2ch^2y)li^2-a^3$ . From *ἀσυνεχής*, not continuous. Fr. *asynéchie*. Lack of structural continuity. [A, 322.]

**ASYNECHIC**, adj.  $A^2s-i^2n-e^2k/i^2k$ . Lat. *asynéchicus*. Pertaining to, affected with, or caused by, asynechia. [A, 322.]

**ASYNERGIA** (Lat.), n. f.  $A^2s(a^3s)-i^2n(u^4n)-u^4r(e^2r)-jíl(ge)^2-a^3$ ,  $-u^4r(e^2r)/jíl^2(ge)^2-a^3$ . See **ASYNERGY**.

**ASYNERGIC**, adj.  $A^2s-i^2n-u^4r/jí^2k$ . Gr. *ἀσύνεργος*. Lat. *asynérgos*. Fr. *asynérgique*. Ger. *asynérgisch*, *nicht mitwirkend*. Pertaining to asynergy, not acting in harmony. [A, 322.]

**ASYNERGY**, n.  $A^2s-i^2n-u^4r/jí^2$ . Lat. *asynergia* (from a priv., and *συνέργεια* or *συνεργία*, concerted action). Fr. *asynergie*. Ger. *Asynergie*, *Mangel an Mitwirkung*. A lack of due proportion in the simultaneous action of two or more organs or parts. [A, 322, 385.] Cf. **INCO-ORDINATION**.—**Progressive locomotor (or motorial) a.** Fr. *asynergie locomotrice progressive*. See **Locomotor ATAXIA**.—**Verbal a.** Fr. *asynergie verbale*. Inco-ordination of speech, as in aphasia. [Lordat (D, 53).]—**Vocal a.** Fr. *asynergie vocale*. Choreic inco-ordination of the phonatory muscles of the larynx. [Krishaber.]

**ASYNESIA** (Lat.), n. f.  $A^2s(a^3s)-i^2n(u^4n)-e(e^2y)si^2-a^3$ . Gr. *ἀσυνεσία*. Fr. *asynésie*. Ger. *Dummheit*, *Einsichtslosigkeit*. Stupidity. [A, 322.]

**ASYNETOUS**, adj.  $A^2s-i^2n-e^2t-u^3s$ . Gr. *ἀσύνετος*. Lat. *asynetos*. Ger. *dumm*, *einsichtslos*. Affected with asynesia. [A, 322.]

**ASYNGAMIA** (Lat.), n. f.  $A^2s(a^3s)-i^2n(u^4n)-ga^2m(ga^2m)/i^2-a^3$ . From a priv., *σύν*, with, and *γαμέιν*, to marry. That state of a flower in which its pistils and stamens are not at the same moment ready for the act of fertilization: a condition believed by the Darwinists to be favorable to the evolution of new varieties. [B, 121.]

**ASYNODIA** (Lat.), n. f.  $A^2s(a^3s)-i^2n(u^4n)-o(o^2y)di^2-a^3$ . From a priv., and *συνόδια*, a journeying together. Fr. *asynodie*. Ger. *Asynodie*, *Mangel des Beischlafs* (1st def.), *Unvermögen zum Beischlaf* (2d def.). 1. Lack of sexual intercourse. 2. Impotence. [A, 322.]

**ASYNODIC**, adj.  $A^2s-i^2n-o^2d/i^2k$ . Lat. *asynodicus*. Fr. *asynodique*. Ger. *asynodisch*. Pertaining to, caused by, or affected with, asynodia. [A, 322.]

**ASYNOVIA** (Lat.), n. f.  $A^2s(a^3s)-i^2n(u^4n)-o^2vi^2(wi^2)-a^3$ . For deriv., see **A\*** and **SYNOVIA**. Fr. *asynovie*. An insufficiency of synovial fluid. [A, 322.]

**ASYNTHESIS** (Lat.), n. f.  $A^2s(a^3s)-i^2n(u^4n)-the^2s-i^2s$ . Gen. *asyntheseos* (*-syn/thesis*). From a priv., and *σύνθεσις*, composition. Fr. *asynthèse*. Syn.: *defectus juncturae*. A defective connection of parts. [A, 322.]

**ASYNTHETOS** (Lat.), adj.  $A^2s(a^3s)-i^2n(u^4n)-the^2t-o^2s$ . From a priv., and *σύνθετος*, put together. Affected with asynthesis. [A, 322.]

**ASYNTRPHY**, n.  $A^2s-i^2n-tro-fi^2$ . From a priv., and *συντροφία*, development in common. Lack of symmetrical growth or development (said of paired bones and of the lateral halves of median bones). [Gardiner-Brown, "Lancet," 1879, ii, p. 684.]

**ASYSTASIA** (Lat.), n. f.  $A^2(a^3)-si^2s(su^4s)-ta(ta^2)/zi^2(si^2)-a^3$ . Fr. *asystasie*. A genus of acanthaceous herbs or shrubs established by Blume. [B, 19.]

**ASYSTASIEÆ** (Lat.), n. f. pl.  $A^2s(a^3s)-i^2st(u^4st)-a^3-si(si^2)/e^2-e(a^3-e^2)$ . Of Bentham and Hooker, a subtribe of acanthaceous plants of the tribe *Justicieæ*. [B, 42.]

**ASYSTOLE** (Lat.), n. f.  $A^2s(a^3s)-i^2s(u^4s)/to(t^2)-le(la)$ . From a priv., and *συστολή*, a contraction. Fr. *asystolie*. Ger. *Asystolie*. It. *asistolia*. An abnormal action of the heart characterized by defective contraction and emptying of one or both of the ventricles, particularly in cardiac affections in the stage of compensatory disturbance. [D; M, 1.]—**Cardiataxic a.** Fr. *asystolie cardiataxique*. Temporary a. due to tumultuous action of the heart. [H. Huchard, "Union méd.," June 22, 1886, p. 1013.]—**Cardioplegic a.** Fr. *asystolie cardioplogique* [Gubler]. Permanent paralytic a.; anyocardia. [H. Huchard, l. c.]

**ASYSTOLIC**, adj.  $A^2s-i^2st-o^2l/i^2k$ . Fr. *asystolique*. Ger. *asystolisch*. Pertaining to or affected with asystole. [A, 385.]

**ASYSTOLISM**, n.  $A^2s-i^2st-o^2l-i^2zm$ . See **ASYSTOLE**.

**ÁTÁ** (Bengal.), n. The *Anona squamosa*. [B, 181.]

**ATAC**, n. An alchemical name for talc or nitre. [B, 50.]

**ATACAMEZ CORTEX**, n. See *Cinchona bicolor*.

**ATACLIN**, n. An African name for the *Rhamnus catharticus*. [Adanson (B, 121).]

**ATACTIC**, adj.  $A^2t-a^2k/ti^2k$ . Lat. *atactos*, *atacticus* (from *ἀτακτος*, disorderly). Fr. *atactique*. Ger. *atactisch*. It. *atattico*. Sp. *atáctico*. Pertaining to, caused by, or affected with, ataxia; irregular, inco-ordinate, arrhythmic. [D, 20.] Cf. **ATAXIC**.

**ATACTOMORPHOSIS** (Lat.), n. f.  $A^2t(a^2t)-a^2k(a^3k)/to-mo^2rf-o^2si^2s$ . Gen. *atactomorphosios* (*-eis*). From *ἀτακτος*, irregular, and *μόρφωσις*, a shaping. Fr. *atactomorphose*. In entomology, the state in which a larva passes through its nymphal stage in a condition of almost absolute quiescence, from which it does not emerge until it has been transformed into a perfect insect. [B, 195; L, 41, 109.]

**ATACTOS** (Lat.), adj.  $A^2t(a^2t)-a^2k(a^3k)/to^2s$ . See **ATACTIC**.

**ATACTOSIA** (Lat.), n. f.  $A^2t(a^2t)-a^2k(a^3k)/to-si^2-a^3$ . A section of the botanical genus *Polypodium*, made by Blume. [B, 121.]

**ATACTUS** (Lat.), adj.  $A^2t(a^2t)-a^2k(a^3k)/tu^3s(tu^4s)$ . See **ATACTIC**.

**ATADH**, n. The *Rhamnus catharticus*. [L, 105.]

**ATAICHA** (Sancer.), n. The *Aconitum heterophyllum*. [B, 181.]

**ATAKTIKER** (Ger.), n.  $A^3-ta^3k/ti^2-ke^2r$ . See **ATAXIC** (3d def.).

**ATALANTA** (Lat.), n. f.  $A^2t(a^2t)-a^3-la^2n(la^3n)/ta^3$ . 1. See **ATALANTIA**. 2. Of Nuttall, see **PERITOMA**.

**ATALANTIA** (Lat.), n. f.  $A^2t(a^2t)-a^3-la^2n(la^3n)/shi^2(ti^2)-a^3$ . Fr. *atalantie*. A genus of aurantiaceous trees and shrubs established by Correa, distinguished by the leaves being entire, by the stamens being few and united below, and by the single ovule in each loculus of the ovary. [B, 19, 121.]—**A. monophylla** [De Candolle]. Syn.: *Limonia monophylla* [Linnaeus], *Turraea virens* [König], *Trichilia spinosa* [Willdenow]. A thorny shrub, about 8 feet in height, growing in Malabar and Coromandel, the fruit of which is called wild lime. The bark of the root is reddish-brown, aromatic, bitter, and antispasmodic; the leaves are aromatic; the fruit has a bitter, acid taste, and has been used in medicine; an oil obtained from the seeds is used externally in rheumatism and paralysis. [B, 19, 172, 180.]

**ATALANTIEÆ** (Lat.), n. f. pl.  $A^2t(a^2t)-a^3-la^2n(la^3n)-ti(ti^2)/e^2-e(a^3-e^2)$ . A section of the *Limoniæ* made by Reichenbach, comprising *Atalantia*, *Feronia*, and *Lavanga* (*Luvunga*). [B, 121, 170.]

**ATALEA** (Lat.), n. f.  $A^2t(a^2t)-a^3-le^2-a^3$ . See **ATTALEA**.

**ATALEC** (Ar.), n. See **ATTALEH**.

**ATALÉN** (Sp.), n.  $A^2-ta^3-lan^2$ . A place in Spain, where there is a sulphurous spring. [A, 385.]

**ATALERRIE** (Fr.), n.  $A^3-ta^3-le^2r-re$ . The *Hydrolea zeylanica*. [B, 121.]

**ATALLEC**, **ATALLECH** (Ar.), n's. See **ATTALEH**.

**ATAMARAM**, n. The *Anona squamosa*. [Rheede (B, 121).]

**ATAMOSCO**, **ATAMOSKO**, n's. A genus of plants made by Adanson, including the *Zephyranthus atamosco*. [B, 121.]

**ATANOR**, n. "Olla perforata." [B, 50.]

**ATANTA**, n. A species of *Rhus*, probably akin to the *Rhus tomentosum*, used in Guinea as a roborant. [B, 88.]

**ATANTASCH**, n. An Abyssinian name for the *Euphorbia depauperata*. [B, 270.]

**ATAR**, n. Attar of roses. [B, 121.]

**ATARACTOPEESIA**, **ATARACTOPOESIA**, **ATARACTOPOIESIA** (Lat.), n's.  $A^2t(a^2t)-a^3-ra^2k(ra^3k)/to(t^2)-pe(po^2-e^2)-e(a^3-si^2)-a^3$ ,  $-po(po^2)-e(a^3-si^2)-a^3$ ,  $-poi-e(a^3-si^2)-a^3$ . Gr. *ἀταρακτοποῖσις*

(from *ἀράκτος*, steady, not confused, and *ποίησις*, a making or doing). Fr., *ataractopoesie*. Cool and collected behavior, presence of mind. [Hippocrates (A, 322, 325).]

**ATARAXIA** (Lat.), n. f.  $A^2t(a^3t)-a^3-ra^2x(ra^2x)^{1/2}-a^3$ . Gr., *ἀταραξία* (from a priv., and *τάραξις*, disturbance). Fr., *ataraxie*. Ger., *Geistesruhe*. It., *atarassia*. Freedom from emotional disturbance. [A, 322, 385.]

**ATARUSHA**, n. An East Indian name for the *Adhatoda vasica*. [B, 181.]

**ATAS**, n. The fruit of the *Anona squamosa*. [B, 121.] Cf. *ATÁ* and *ATRE*.

**ATASI** (Sanskrit), n. The *Linum usitatissimum*. [B, 181.]

**ATASITES** (Lat.), n. m.  $A^2t(a^3t)-a^3-si(se)^{1/2}-(tas)$ . Necker's name for the botanical genus *Gerbera*. [B, 121.]

**ATATIER** (Fr.), n.  $A^3-ta^3-ti^2-a$ . The fruit of the *Clematis viorna*. [B; L, 109.]

**ATAUHERO**, n. A New Zealand name for the *Rhabdanthus Solandri*. ["Proc. of the Am. Pharm. Assoc.," xxiv, p. 737 (B).]

**ATAVISM**, n.  $A^2t(a^3v)-i^2zm$ . Lat., *atavismus* (from *atavus*, a forefather). Fr., *atavisme*. Ger., *Atavismus*, *Stammähnlichkeit*. It., *Sp., atavismo*. 1. Resemblance to one's ancestors. [A, 385.] 2. The reappearance of one of the primitive types in the descendants of parents of different races. [A, 385.] 3. That manifestation of ancestral influence which consists in bodily or mental peculiarities inherited from an ancestor more remote than the father and mother; the reappearance of family traits after they have been in abeyance for one or more generations. [H; K; L, 149.]—**Direct a.** Fr., *atavisme directe*. A. occurring in the direct line of descent. [B, 121.]—**Indirect a.** Fr., *atavisme indirecte*. A term used by Sedgwick to express the phenomenon of the transmission of peculiarities not presented by, or prevailing in the family of, either parent, but possessed by a male by whom the mother had previously been impregnated; the transmission of the peculiarities of a woman's first husband to her children by a succeeding husband. [A. Lingard, "Lancet," Apr. 19, 1884, p. 703.]

**ATAVISTIC**, adj.  $A^2t-a^3v-i^2st^{1/2}ik$ . Fr., *atavistique*. Pertaining to atavism. [K.]

**ATAW**, n. A Gaulish name for the *Nymphæa alba*. [B, 121.]

**ATAXACANTHUS** (Lat.), adj.  $A^2t(a^3t)-a^2x(a^3x)^{1/2}-a^3-ka^2n-(ka^2n)^{1/2}-(thu^3s)$ . From *ἀταξία*, irregularity, and *ἀκανθα*, a spine. Fr., *ataxacanthé*. In botany, having spines disposed irregularly upon the branches and petioles; a species name. [B, 195.]

**ATAXIA** (Lat.), n. f.  $A^2t(a^3t)-a^2x(a^3x)^{1/2}-a^3$ . Gr., *ἀταξία*. Fr., *ataxie*. Ger., *Ataxie*. It., *atassia*. Sp., *ataxia*. 1. Anciently, any morbid state, especially if characterized by disordered, irregular action, such as irregularity of the pulse, or by not conforming to the typical course. [Hippocrates, Galen (A, 314, 325).] 2. An assemblage of nervous symptoms characterized by irregularity and by want of correspondence to the gravity of the disease with which they are apparently associated; indicative of a primary or secondary cerebral affection of greater or less gravity. [Pinel (A, 314).] 3. Inco-ordination of muscular action, especially of the kind mentioned under *locomotor a.* (q. v.). [D.] 4. A genus of graminaceous plants of the tribe *Phalarideæ*, made by R. Brown, distinguished by the flowers being borne in thyrsoid panicles, each spikelet bearing 2 unequal glumes and 3 flowers, the lower one male and provided with 2 pales, the middle one neuter with 1 pale, and the upper one hermaphrodite with 3 anthers. Bentham and Hooker refer the genus to *Hierochloa*. [B, 19, 42, 121.]—**Abortive locomotor a.** Fr., *ataxie locomotrice frustée*. Syn.: *tabes dolorosa*, *painful tabes*. The neuralgic form of locomotor a., in which the lancinating pains are the most prominent feature and may remain such for many years. [D, 35.]—**Acute a.** Locomotor a. of rapid development. [D, 35.]—**Alcoholic a.** A form of muscular inco-ordination observed in drunkards, resembling locomotor.; said to depend on peripheral neuritis. [D, 35; Dreschfeld (M), A.]—**Horsfieldii**. A species of a. (4th def.) growing in Java, which, when crushed, emits a pleasant odor due to the presence of coumarin. [B, 19.]—**A. mensium**. **A. menstruum**. See *Menstrual a.*—**A. motus**. See *Locomotor a.*—**A. spirituum**. Fr., *ataxie des esprits animaux*. It., *atassia degli spiriti animali*. An instability of the nervous system to which Sydenham attributed nervous disorders. [A, 314.]—**Bulbar a.** Ger., *bulbäre Ataxie*. Locomotor a. occasioned by a lesion of the pons Varolii or of the medulla oblongata. [A. Pick (D, 18).]—**Central a.** Ger., *centrale Ataxie*. A. due to disturbance in the centres which preside over co-ordination. [A. Pick (D, 18).] Cf. *Sensory a.*—**Cerebellar a.** Fr., *ataxie cérébelleuse*. Ger., *cerebelläre Ataxie*. A. depending on disease of the cerebellum; usually to be distinguished by the patient's staggering from side to side like a drunken man and often falling to one side. [A. Pick (M, 1).]—**Cerebral a.** Ger., *cerebrale Ataxie*. A. due to a lesion of the cerebrum. [Friedreich, "Arch. f. path. Anat. u. Physiol. u. f. klin. Med.," lxxviii, p. 216 (L).]—**Choreic a.** Fr., *ataxie choréiforme*. The muscular inco-ordination that accompanies the voluntary movements of patients with chorea. [D, 35.]—**Diphtheritic a.** A form which sometimes follows diphtheria and precedes the occurrence of diphtheritic paralysis. The main phenomena of locomotor a. are observed, and the attack may pass off without paralysis, or it may end in death from nervous exhaustion. [D, 40; A. Pick (M, 1).]—**Drunkards' a.** See *Alcoholic a.*—**Family a.**, **Friedreich's a.**, **Hereditary a.** [Friedreich]. Fr., *ataxie héréditaire*. Ger., *hereditäre Ataxie*. It., *atassia ereditaria*. Friedreich's disease; a rare and peculiar disease somewhat resembling locomotor a., but almost always occurring in several children of a family, especially the girls, between the ages of twelve and eighteen years. The preliminary pains are usually absent; there is marked ataxia of the lower limbs, which soon extends to the arms, and subsequently

there is a disturbance of speech supposed to depend on inco-ordination, together with nystagmus. The disease lasts for many years, and, being incurable, ends in paralysis, contractures, and atrophy of the muscles involved. [A, 446.]—**Hysterical a.** An assemblage of hysterical phenomena resembling those of locomotor a., but usually without the darting pains. [D, 47.]—**Locomotor a.** Lat., *a. motus*. Fr., *ataxie locomotrice*. Ger., *Bewegungsataxie*. It., *atassia locomotrice*. Sp., *a. locomotriz*. Syn.: *progressive locomotor* (or *motorial*) *a.* [Duchenne] (or *asynergy*), *posterior spinal sclerosis*, *inflammation* (or *sclerosis*) of the posterior root-zones of the spinal cord [Hammond], *tabes dorsalis* (seu *dorsualis*) [Romberg], *consumption of the spinal cord*, *gray degeneration of the posterior columns of the spinal cord* [Leyden], *cerebral paraplegia* [Gull], *Duchenne's paralysis* (or disease). A disease of the nervous system (commonly the posterior root-zones of the dorso-lumbar portion of the spinal cord) usually occurring in middle-aged men, which is generally very chronic in its course, but is believed to prove fatal in all cases. The initial symptoms are variable, the most remarkable of them being lightning-like pains beginning in the back and following the course of the nerves of the lower limbs. After a short time, muscular inco-ordination of the lower limbs (or of the upper limbs also when the spinal lesions are situated at a high level) sets in and becomes the prominent symptom to which the affection owes its name. There is no loss of power in the muscles, and the patient's lack of control over them is due to diminished sensibility, so that he is deprived of the normal guiding sensations, and has to depend almost entirely on the sense of sight—if he shuts his eyes, he is "often entirely unaware of the situation and position of his limbs," and is very apt to fall if he attempts to walk. The tendon reflexes, particularly that of the patella, are almost always diminished or abolished. Visual and auditory disturbances are frequent, especially contraction, inequality, or reflex immobility of the pupils, paralysis of the ocular muscles, atrophy of the optic or the acoustic nerve, and auditory vertigo. "Crises" are often observed, consisting of functional disturbances of the digestive organs or the laryngeal muscles, attacks of renal colic, and, in women, paroxysms of sexual excitement. Various diseases of the joints (rheumatic arthropathies) are not uncommon. [A, 394, 446; D, 1.]—**Menstrual a.** Lat., *a. mensium*. Fr., *ataxie menstruelle*. An old term for vicarious menstruation, sometimes applied to other disorders of the menstrual function. [V. Poullet, "Gaz. hebdom. de méd. et de chir.," May 14, 1886 (M).]—**Motor a.** Ger., *motorische A.* 1. Locomotor a. 2. A disturbance of the nerve tracts which bear the co-ordinating impulses to the periphery. [D, 18.]—**Muscular a.** Fr., *ataxie musculaire*. Muscular inco-ordination from any cause. [Potain (L, 87).]—**Paralytic a. of the heart**. A condition observed in bulbar affections, without organic disease of the heart; characterized by palpitation, dyspnea, weakness of the cardiac sounds, oedema, and dropsy. ["Gaz. hebdom. de méd. et de chir.," Sept. 10, 1886, p. 605 (M).]—**Progressive locomotor a.** Fr., *ataxie locomotrice progressive* [Duchenne]. Ger., *progressive locomotorische Ataxie*. It., *atassia locomotrice progressiva*. Sp., *a. locomotriz progresiva*. See *Locomotor a.*—**Sensory a.** Ger., *sensorische Ataxie*. A form of a. (the existence of which is denied by Erb and Friedreich) attributed to disturbance of the nerve tracts leading from the periphery to the centres of co-ordination. [D, 18.] Cf. *Motor a.*—**Spinal a.** Fr., *ataxie spinale*. Ger., *spinale Ataxie*. See *Locomotor a.*—**Static a.** A term for the unsteadiness of locomotor a. observed when the patient attempts to stand erect with the eyes closed and the feet side by side; also for the uncertain movements of the upper limbs in the later stages of the disease. [D, 35.]

**ATAXI-AMNESIC**, adj.  $A^2t-a^2x^{1/2}-a^2m-ne^{1/2}zi^2k$ . Pertaining to a combination of muscular inco-ordination with loss of memory (said of disturbances of speech). [D, 34.]

**ATAXIC**, adj.  $A^2t-a^2x^{1/2}ik$ . Fr., *atarique*. 1. See *ATACTIC*. 2. See *ADYNAMIC*. 3. As a n. (Ger., *Ataktiker*), a person affected with locomotor ataxia.

**ATAXIE** (Fr., Ger.), n.  $A^3-ta^3x-e-e'$ . See *ATAXIA*.—**A. cardiovasculare** (Fr.). Féréol's term for exophthalmic goitre. [F.]—**A. choréiforme** (Fr.). See *Choreic ATAXIA*.—**A. des esprits animaux** (Fr.). See *ATAXIA spirituum*.—**A. locomotrice frustée** (Fr.). See *Abortive locomotor ATAXIA*.—**A. morale** (Fr.). The instability of ideas and volition found in a certain class of hysterical subjects, sometimes accompanied by spasms and visceral pains. [Huchard, "Union méd.," Apr. 29, 1882; "Jour. de méd. de Paris," June 7, 1884, p. 1155 (D).] Cf. *ATAXIA spirituum*.—**A. spasmodique** (Fr.). See *Choreic ATAXIA*.—**Bewegungs'** (Ger.). See *Motor ATAXIA*.—**Bindena'** (Ger.). *Ataxia* due to disease of the cerebral cortex. [D, 18.]

**ATAXIOCARPEÆ** (Lat.), n. f. pl.  $A^2t(a^3t)-a^2x(a^3x)^{1/2}-o(o^2)-ka^3tp'e-e(a^3e^2)$ . From *ἀταξία*, disorder, and *καρπός*, a fruit. Fr., *ataxiocarpees*. The *Acrosticheæ* (q. v.); so called because the sporangia are scattered over the surface of the fertile frond without definite order. [B, 121.]

**ATAXMIR** (Ar.), n. The treatment of distichiasis, four methods of which were mentioned by Albucasis under this term. [A, 325.]

**ATAXO-ADYNAMIA** (Lat.), n. f.  $A^2t(a^3t)-a^2x(a^3x)^{1/2}-o(o^2)-a^3d-(a^3d)-i^2n(u^6n)-a^2m(a^3m)^{1/2}-a^3$ . Fr., *ataxo-adyndymie*. A state of adynamia with ataxia. [A, 385.]

**ATAXO-ADYNAMIC**, adj.  $A^2t-a^2x^{1/2}-o-a^3d-i^2n-a^2m^{1/2}ik$ . Lat., *ataxo-adyndymicus*. Fr., *ataxo-adyndymique*. Pertaining to or affected with ataxo-adyndymia. [A, 385.]

**ATAXODYNAMY**, n.  $A^2t-a^2x-o-di^2n-a^2m-i^2$ . From *ἀταξία*, confusion, and *δύναμις*, power. Fr., *ataxodynamie*. Irregularity of the movements of an organ. [L, 109.]

**ATAXOPHEMIA** (Lat.), n. f.  $A^2t(a^3t)-a^2x(a^3x)-o(o^2)-fe(fe)a^{1/2}-mi^2-a^3$ . From *ἀταξία*, irregularity, and *φάσμα*, to speak. Fr., *atazo-*

**phémie**. It., *atastosemia*. Inco-ordination of speech; also any abnormal cerebral condition on which it depends. [A, 385; L, 44.]

**ATAXO-SPASMODIQUE** (Fr.), adj.  $A^2t-a^3x-o-spa^2z-mo-dek$ . Pertaining to, caused by, or affected with, choreic ataxia.

**ATAXY**, n.  $A^2t-a^2x-i^2$ . See ATAXIA.

**ATCEBARA**, n. A Catalan name for the *Agave americana*. [B, 121.]

**ATCHA** (Tâmil), n. The *Bauhinia racemosa*. [B, 172.]

**ATCHAR**, n. See ACHAR.

**ATCHISO** (Jap.), n. The *Hibiscus rosea*. [B, 121.]

**ATCHY** (Hind.), n. The *Morinda squamosa*. [B, 172.]

**ATÉ**, n. The fruit of the *Anona squamosa*. [B, 121.] See ATTE and ÁTÁ.

**ATEBRAS**, n. An alchemical name for a subliming vessel ("uncus aquinus, id est, vas sublimatorium"). [B, 50.]

**ATECHNIA** (Lat.), n. f.  $A^2t(a^3t)-e^2k(e^2ch^2)/ni^2-a^3$ . Gr., *ἀτεχνία*. Fr., *atechnie*. Lack of art, unskillfulness. [Hippocrates (A, 322).] Used also (improperly) for *atecnia* (q. v.).

**ATECNIA** (Lat.), n. f.  $A^2t(a^3t)-e^2k/ni^2-a^3$ . Gr., *ἀτεχνία* (from a priv., and *τέκνω*, a child). Fr., *atecnie*. Ger., *Ateknie*. Properly, childlessness or barrenness; used also to signify impotence and anaphrodisia. [A, 322, 385.]

**ATECNOS** (Lat.), adj.  $A^2t(a^3t)-e^2k/no^2s$ . Gr., *ἀτεκνος*. Ger., *ateknisch*. Childless or barren. [A, 322.]

**ATEES**, n. See ÁTIS.

**ATEGUDO, ATEGOCUDO**, n's. The *Wrightia antidysenterica*. [B, 121.]

**ATEIRA**, n. An East Indian name for a fruit thought to be that of the *Anona squamosa*. [B, 121.]

**ATEL** (Ar.), n. The *Juniperus communis*. [Bory (B, 121).]

**ATELMORRHOIDES** (Lat.), n. f. pl.  $A^2t(a^3t)-e^2l-e^2m-(a^3e^2m)-o^2r-ro(r)^2-i^2d(ed)/ez(as)$ . From *ἀτελής*, incomplete, and *αἰμορροῖς*, a hemorrhoid. Fr., *atelmorrhoides*. See *Blind HÆMORRHOIDS*.

**ATELECTASIAL**, adj.  $A^2t-e^2l-e^2k-ta^2/zi^2a^2l$ . See ATELECTATIC.

**ATELECTASIE** (Ger.), n.  $A^3-ta^2l-e^2k-ta^2-ze'$ . See ATELECTASIS.—*Lungena'* (Ger.). See ATELECTASIS *pulmonum*.

**ATELECTASIE** (Fr.), n.  $A^3-ta-le^2k-ta^2-ze$ . See ATELECTASIS.

**ATELECTASIÉ** (Fr.), adj.  $A^3-ta-le^2k-ta^2-zi^2a^2$ . See ATELECTATIC.

**ATELECTASIS** (Lat.), n. f.  $A^2t(a^3t)-e^2l-e^2k/ta^2-si^2s$ . Gen., *atelectasios* (ec'tasis). From *ἀτελής*, imperfect, and *έκτασις*, extension. Fr., *atelectasie*. Ger., *Atelectasie*, *Atelectasie*. It., *atelettasia*. Sp., *atelectasia*. Defective expansion; as commonly employed, *a. pulmonum* (q. v.). [A, 322, 385].—**Acquired a.** Lat., *a. acquisita*. Collapse of pulmonary tissue from disease. [M, 2].—**A. aduata**. Congenital *a. pulmonum*. [M, 2].—**A. pulmonum**. Fr., *atelectasie des poudons*. Ger., *Lungenatelectasie*. Imperfect expansion of the lungs with consequent persistence of their fetal condition after birth. [D, 29].—**Compression a.** Ger., *Compressionsatelectasie*. Pulmonary collapse due to pressure, as by pleural effusion. [L, 54].—**Obstructive a.** Ger., *Obstructionsatelectasie*. Pulmonary collapse from plugging of a bronchial tube. [L, 54].—**Post-natal a.** See *Acquired a.*

**ATELECTATIC**, adj.  $A^2t-e^2l-e^2k-ta^2/ti^2k$ . Fr., *atelectasique*, *atelectasié*. Ger., *atelectatisch*. Pertaining to or affected with atelectasis. [A, 15.]

**ATELEKTASE** (Ger.), **ATELEKTASIE** (Ger.), n's.  $A^3-ta^2l-e^2k-ta^2/ze'$ . See ATELECTASIS.

**ATELEKTATISCH** (Ger.), adj.  $A^3-ta^2l-e^2k-ta^2/ti^2sh$ . See ATELECTATIC.

**ATÉLENCÉPHALIE** (Fr.), n.  $A^3-ta-la^3n^2-sa-fa^2l-e$ . From *ἀτελής*, incomplete, and *έγκέφαλος*, the brain. Imperfect development of the brain. [L, 49.]

**ATELEBRANCHIA** (Lat.), n. n. pl.  $A^2t(a^3t)-e^2l/e^2-o(o)^2-bra^2n^2-(bra^3n^2)/ki^2(ch^2)i^2-a^3$ . From *ἀτελής*, imperfect, and *βράγχιον*, a gill. Syn.: *Imperfecti-branchia* [Hogg]. Amphibious animals with imperfect branchiae. [B, 78.]

**ATELEOPODES** (Lat.), n. m. pl.  $A^2t(a^3t)-e^2l-e^2-o^2p'o^2d-ez(as)$ . For deriv., see ATELEOPUS. A tribe of aquatic birds having no thumbs. [Vieillot (L, 180).]

**ATELEOPUS** (Lat.), adj.  $A^2t(a^3t)-e^2l-e(e^2)/o(o)^2-pu^2s(pu^4s)$ . From *ἀτελής*, imperfect, and *πούς*, a foot. Fr., *atéléopode*. Lacking the thumb or some other digit. [L, 41; Vieillot (L, 116).]

**ATELEPLASIA** (Lat.), n. f.  $A^2t(a^3t)-e^2l-e^2-pla(pla^3)/zi^2(si^2)-a^3$ . From *ἀτελής*, imperfect, and *πλάσις*, formation. See ATELIA (1st def.).

**ATELIA** (Lat.), n. f. and n. pl.  $A^2t(a^3t)-e^2l-i(e)/a^3$ . Gr., *ἀτέλεια*. Fr., *atélie* (1st def.), *atelines* (2d def.). 1. In teratology, a lack of development of a part. [Malcaren (L, 49).] 2. In botany, as a pl., Sprengel's last class of the vegetable kingdom, comprising the orders *Aetherogamia*, *Epiphyllispermae*, *Pteroides*, *Musci frondosi*, *Hepaticae*, *Hornnallphyllae*, *Lichenes*, *Algae*, *Gastromyci*, and *Fun-gi*. [B, 170.]

**ATELLA-BASILICATE** (It.), n.  $A^3-ta^2l-la^3-ba^2-si^2l-i^2-kn^3/ta$ . A place in Italy, where there are hot sulphurous and ferruginous springs. [A, 385.]

**ATELOCARDIA** [Crampton] (Lat.), n. f.  $A^2t(a^3t)-e^2l-o(o)^2-ka^2rd/i^2-a^3$ . From *ἀτελής*, imperfect, and *καρδία*, the heart. Fr., *atolocardie*. See CARDIATELIA.

**ATELOCHEILIA** (Lat.), n. f.  $A^2t(a^3t)-e^2l-o(o)^2-ki^2(ch^2e^2/i^2)-li^2-a^3$ . From *ἀτελής*, imperfect, and *χείλος*, the lip. Fr., *atélocheilie*. Imperfect development of the lip. [M, 80.]

**ATELOENCEPHALIA** (Lat.), n. f.  $A^2t(a^3t)-e^2l-o(o)^2-e^2n(e^2n^2)-se^2f(ke^2t)-a^2l(a^3l)/i^2-a^3$ . See ATÉLENCÉPHALIE.

**ATELOGLOSSIA** (Lat.), n. f.  $A^2t(a^3t)-e^2l-o(o)^2-glo^2s(glos)/si^2-a^3$ . From *ἀτελής*, imperfect, and *γλῶσσα*, the tongue. Defective development of the tongue. [E.]

**ATELOGNATHIA** (Lat.), n. f.  $A^2t(a^3t)-e^2l-o^2g-na(na^3)/thi^2-a^3$ . From *ἀτελής*, imperfect, and *γνάθος*, the jaw. Fr., *atelognathie*. Imperfect development of the lower jaw. [A, 385; L, 49.]

**ATELOMYELIA** [Béclard] (Lat.), n. f.  $A^2t(a^3t)-e^2l-o(o)^2-mi(mu^4)-e(e^2)/li^2-a^3$ . From *ἀτελής*, imperfect, and *μυελός*, marrow. Fr., *atélomyélie*. See MYELATELIA.

**ATELOPROSOPIA** (Lat.), n. f.  $A^2t(a^3t)-e^2l-o(o)^2-pro^2s-o^2pi^2-a^3$ . From *ἀτελής*, imperfect, and *πρόσωπον*, the face. Fr., *atéloprosopie*. Imperfect development of the face. [M, 80.]

**ATELORRHACHIDIA** (Lat.), n. f.  $A^2t(a^3t)-e^2l-o^2r-ra^2k-(ra^3ch^2)-i^2d/i^2-a^3$ . From *ἀτελής*, imperfect, and *ράχης*, the spine. Fr., *atélorrhachidie*. Imperfect development of the spine. [A, 385.] See SPINA *bifida*.

**ATELOSTOMIA** (Lat.), n. f.  $A^2t(a^3t)-e^2l-o(o)^2-sto(sto^2)/mi^2-a^3$ . From *ἀτελής*, imperfect, and *στόμα*, the mouth. Defective development of the mouth. [E.]

**ATENES** (Lat.), adj.  $A^2t(a^3t)-e^2n-ez(as)$ . Gr., *ἀτενής* (from *α* intens., and *τείνειν*, to stretch). Staring. [A, 322.]

**ATER** (Lat.), adj.  $A(a^3)/tu^2r(te^2r)$ . Gr., *μέλας*. Fr., *noir*. Ger., *schwarz*. It., *nero*. Sp., *negro*. Intensely black. [B, 1.]—**A. succus**, *Atra billis*. See MELANCHOLIA.

**ATERAMNIA** (Lat.), n. f.  $A(a^3)-tu^2r(te^2r)-a^2m(a^3m)/ni^2-a^3$ . Gr., *ἀτεραμνία*. Crudeness, harshness, indigestibility. [A, 325.]

**ATERAMNOS, ATERAMNUS, ATEREMNOS, ATER-EMNUS** (Lat.), adj's.  $A(a^3)-tu^2r(te^2r)-a^2m(a^3m)/no^2s$ ,  $-nu^2s(nu^4s)$ ,  $-e^2m/no^2s$ ,  $-nu^2s(nu^4s)$ . Gr., *ἀτέραμνος*, *ἀτέραμνος*. 1. Crude, harsh, refractory, indigestible. [A, 322.] 2. Constipated. [A, 311.]

**ATERES** (Lat.), adj.  $A^2t(a^3t)-e(a)/rez(ras)$ . Gr., *ἀτηρός*, *ἀτηρός*. Noxious. [Hippocrates (A, 325).]

**ATERLUSI**, n. The *Aristolochia indica*. [L, 105.] Cf. Ger., OSTERLUZEL.

**ATERRIMUS** (Lat.), adj., superl. of *ater*.  $A^2t(a^3t)-e^2r-ri^2-mu^2s(mu^4s)$ . Excessively black, a botanical species name. [B.]

**ATESINE**, n.  $A^3t-e^2s-en$ . See ATISINE.

**ATERERÉ**, n. A Carib name for a species of EUPATORIA. [Borg (B, 121).]

**ATEUCHUS** (Lat.), n. m.  $A^2t(a^3t)-u^2ku^2s(ch^2u^4s)$ . A variety of Egyptian scarabæus, anciently used as an amulet. [A, 385.]

**ATHAD**, n. Heb., אֶתָד, from an Ar. root meaning to fasten or drive in firmly. [Parkhurst (B).] A Hebrew name for the *Lycium afrum*. [B, 121.]

**ATHALAMI** (Lat.), n. m. pl.  $A^2th(a^3th)-a^2l(a^3l)/a^3-mi(me)$ . From a priv., and *θαλαμος*, an inner chamber. Fr., *athalames*. A class of lichens, embracing those in which no organs of fructification had been observed. [Acharius (B, 121, 170).]

**ATHALAMOUS**, adj.  $A^2th-a^2l/a^3-mu^2s$ . Lat., *athalamus*. Fr., *athalame*. Having no visible spore-containing organs (thalamii); belonging to the *Athalamii*. [B, 7.]

**ATHALLINE, ATHALLOUS**, adj's.  $A^2th-a^2l/en$ ,  $-lu^2s$ . From a priv., and *θαλλός*, a palm-leaf. Fr., *athalle*. Having no leaves, or having no thallus. [B, 109.]

**ATHAMANTA** (Lat.), n. f.  $A^2th(a^3th)-a^3-ma^2n(ma^3n)/ta^3$ . Gen., *athamantæ*. For deriv., see ATHAMANTIC. Fr., *athamante*. Ger., *Augenwurz*. A genus of umbelliferous plants, of the tribe *Seselineæ*, established by Linnæus. Most of the species are referred by Benthams and Hooker to *Seseli* and *Peucedanum*. [B, 42, 180].—**A. ajowan** [Wallich]. See *CARUM coticum*.—**A. annua** [Linnæus]. A species probably identical with *A. Matthioli*. [B, 173, 214].—**A. aureoselinum**. See *PEUCEDANUM oreoselinum*.—**A. cervaria** [Linnæus]. See *PEUCEDANUM cervaria*.—**A. cervariaefolia** [De Candel]. See *TINGUARRA*.—**A. chiliosciadica** [Boiss]. See under *SESELI*.—**A. chinensis** [Loureiro]. See *SELINUM Monnierii*.—**A. cretensis** [Linnæus]. **A. cretica**. Gr., *δαῦκος* [Hippocrates], *δαῦκος κρητικός* [Dioscorides]. Fr., *daucus de Candie* (ou de Crète [Fr. Cod.]). Ger., *Atgen-Augenwurz*, *kretische Hirschwurz*. It., *dauco cretica*. Syn.: *Petrocarvi* [Tausch], *Libanotis hirsuta* [Rochloing] (seu *cretensis* [Scopoli]), *daucus creticus* (seu *candianus*), *myrrhis annua*. A perennial European species, of which there are two varieties: the var. *a. hirsuta*, with tomentose leaves, growing on the higher portions of the Alps; and the var. *b. mutellinoides*, with glabrous leaves, growing at lower elevations. The fruit, often called the seed (*semen dauci cretici* [seu *candiani*], seu *myrrhidis annuæ*, seu *athamantis creticæ*), is oblong-lanceolate, about 3 lines in length, with a contracted neck. It has a pleasant aromatic odor and taste, and was formerly much used as a stimulant, stomachic tonic, diuretic, and emmenagogue. [B, 42, 180, 214].—**A. daucifolia** [Host.], **A. dancoides [Roesisch.]. See *SESELI libanotis*.—**A. flexuosa** [Jussieu], "Hortus parisiensis". The *Peucedanum silvestre*. [B, 214].—**A. lucana** [Willdenow]. The *Libanotis vulgaris* (*Seseli libanotis*). [B, 214].—**A. latifolia** [Viviani]. The *Peucedanum cervaria*. [B, 173].—**A. leucospermum [Poirer]. The *Seseli leucospermum*. [B, 214].—**A. libanotis** [Linnæus]. **A. lucida** [Retzius]. See *SESELI libanotis*.—**A. macedonica** [Sprengel]. Ger., *macedonische Augenwurz*. See under *SESELI*.—**A. Matthioli**. 1. Of Wulfen (the *Libanotis rupestris* of Scopoli), a perennial species growing in central Europe. 2. Of De Candel,****

the *A. cretensis*, var. *mutellinoides*. [B. 42, 216.]—*A. maxima* [Chois.]. See *A. ceraticeifolia*.—*A. meum* [Linnaeus]. See *Meum athamanticum*.—*A. mutellinoides* [Lamarck]. The *A. cretensis*, var. *mutellinoides*. [B. 214.]—*A. oreoselinum* [Linnaeus]. 1. Of Linnaeus, the *Peucedanum oreoselinum*. [B. 173, 180.] 2. Of Hudson, the *Seseli libanotis*. [B. 121, 214, 216.]—*A. pisana* [Savi]. The *Peucedanum silvestre*. [B. 214.]—*A. pubescens* [De Candolle]. A variety of *Libanotis vulgaris*. [B. 214.]—*A. roxburghiana* [Wallich]. See *Carum roxburghianum*.—*A. rupestris* [Vill.]. The *A. cretensis*, var. *mutellinoides*. [B. 216.]—*A. sicula* [Linnaeus]. See *Tinguarra*.—*Radix athamantae*. The root of *Meum athamanticum*. [B. 180.]—*Semen athamantae creticae*. The fruit of *A. cretica*. [B. 180.]

**ATHAMANTHA** (Lat.), n. f.  $A^{2th}(a^{3th})-a^{3}-ma^{2}n(ma^{3}n)/tha^{3}$ . 1. Of Scopoli, the *Libanotis* [Crantz]. 2. Of De Candolle and others, the genus *Athamanta* (q. v.). [B. 121, 214.]

**ATHAMANTICA, ATHAMANTICUM** (Lat.), n's f. and n.  $A^{2th}(a^{3th})-a^{3}-ma^{2}n(ma^{3}n)/ti^{2}k-a^{3}$ ,  $-u^{3}n(u^{4}m)$ . See *Meum athamanticum*.—*Radix athamanticae*. The root of *Meum athamanticum*. [B. 180.]

**ATHAMANTICUS** (Lat.), adj.  $A^{2th}(a^{3th})-a^{3}-ma^{2}n(ma^{3}n)/ti^{2}k-u^{3}s(u^{4}s)$ . Gr., *ἀθαμαντικός*. Named for Athamas, a son of Zeus, and others, or coming from the mountain of the same name (a botanical species name). [A. 312, 380.]

**ATHAMANTIN**, n.  $A^{2th}-a^{3}-ma^{2}n/ti^{2}n$ . Fr., *athamantine*. Ger., *Athamantin*. A substance,  $C_{12}H_{20}O_7$ , forming slender acicular crystals, of a bitter and acrid taste, found in the root and seeds of *Peucedanum (Athamanta) oreoselinum*. It is insoluble in water, but dissolves readily in alcohol and in ether. By boiling with hydrochloric acid it is converted into valeric acid and oreoselinone. [B. 2, 158.]

**ATHAMANTIS** (Lat.), n. f.  $A^{2th}(a^{3th})-a^{3}-ma^{2}n(ma^{3}n)/ti^{2}s$ . Gen., *athamantidis*. From *Ἀθαμαντις*, a daughter of Athamas. See *ATHAMANTA*.

**ATHAMANTOID**, adj.  $A^{2th}-a^{3}-ma^{2}n/toid$ . For deriv., see *ATHAMANTICUS* and *-oid*. Fr., *athamantoides*. Resembling the genus *Athamanta*. [L. 109.]

**ATHAMANTÖL** (Ger.), n.  $A^{3}-ta^{3}-ma^{2}nt/u^{3}l$ . An oil obtained from the *Peucedanum (Athamanta) oreoselinum*. [L. 30.]

**ATHAMBIA** (Lat.), n. f.  $A^{2th}(a^{3th})-a^{3}m(a^{3}m)/bi^{2}-a^{3}$ . Gr., *ἀθαμβία*. Imperturbability. [Democritus (A. 322).] Cf. *ATARAXIA*.

**ATHAMOS**, n. The *Cicer arietinum*. [B. 121; L. 105.]

**ATHANASIA** (Lat.), n. f.  $A^{2th}(a^{3th})-a^{3}n-a^{3}/zi^{2}(si^{2})-a^{3}$ . Gr., *ἀθανασία* (from a priv., and *θανεῖν*, to die). Fr., *athanasie*. Ger., *Athanasie*, *Unsterblichkeit*. 1. An old name for various medicines, to express their extraordinary virtues (e. g., tansy, because, when inserted into the nostrils of a corpse, it was said to prevent putrefaction). [L. 84, 94, 97, 109, 119.] 2. A genus of composite plants of the tribe *Senecionidae*, established by Linnaeus; so called from the flowers preserving their freshness for a long time. [B. 19.]—*A. amara* [Cervantes]. Sp., *prodigiosa* [Mex. Ph.]. A species of *A.* (2d def.) growing in the temperate parts of Mexico, the leaves of which are said to be tonic and antelmintic. ["Proc. of the Am. Pharm. Assoc.," xxiv, p. 774 (B); J. M. Maisch, "Am. Jour. of Pharm.," Feb., 1886, p. 72.]—*A. magna*. An old name for a certain preparation used for dysentery and for various hæmorrhages. [A. 325.]—*A. maritima* [Linnaeus]. See *Drosera candidissima*.—*Herba (seu Flores, seu Summitates) athanasiae*. The herb of *Tanacetum vulgare*. [B. 180.]

**ATHANASIEÆ** (Lat.), n. f. pl.  $A^{2th}(a^{3th})-a^{3}n(a^{3}n)-a^{3}-zi-(si^{2})-e-(a^{3}-e)^{2}$ . A subtribe of composite plants belonging to the *Anthemideæ* of De Candolle (the *Artemisideæ* of Lessing), including species with a paleaceous receptacle, corymbose heads usually discoid, and alternate leaves. [B. 121, 170.]

**ATHANATOS** (Lat.), n. m.  $A^{2th}(a^{3th})-a^{3}n(a^{3}n)/a^{3}-to^{2}s$ . From *ἀθάνατος*, immortal. An old name for the *Lydanis coronaria*. [L. 94.]

**ATHANOR**, n.  $A^{2th}/a^{3}n-o^{2}r$ . From Ar., *al-tannûr* (pronounced *at-tannûr*), and this from Hebrew תַּנּוּר, a furnace, from root *nûr*, fire. [B. 52.] Lat., *furnus philosophorum* (seu *philosophicus compositus*, seu *turritus*, seu *chymicus*), *uterus chymicus* (seu *spagyricus*), *piger Henricus*. Fr., *fourneau des papes-seurs*. Ger., *Acanor, faule Heinz*. A sort of self-feeding charcoal furnace formerly used by chemists, in which the reserve of fuel was contained in a hollow cylinder above the fire, and subsided gradually as the combustion made room for it—precisely as in the modern "base-burning" stove. The name is said to have been given it by Raymond Lully. [A. 1, 322.]

**ATHAPSIA**, n. Fr., *athapsie*. A Portuguese name for the *Ipomœa turpethum*. [A. 259; L. 87.]

**ATHAR**, n. See *ATTAR*.

**ATHARA** (Lat.), n. f.  $A^{2th}(a^{3th})/a^{3}-ra^{3}$ . Gr., *ἀθάρα*. An ancient term for husked wheat, also for pap or porridge. [Pliny (A. 318); A. 387.]

**ATHARASA**, n. A name for a plant, probably a *Tamarix* (Ar., *el-tharsa*), found in the Latin version of an Arabic work wrongly attributed to Aristotle. [B. 121.]

**ATHARE** (Lat.), n. f.  $A^{2th}(a^{3th})/a^{3}-re(ra)$ . Gr., *ἀθάρα*. See *ATHARA*.

**ATHARODES** (Lat.), adj.  $A^{2th}(a^{3th})-a^{3}-ro^{2}/dez(das)$ . See *ATHARODES*.

**ATHAROMA** (Lat.), n. n.  $A^{2th}(a^{3th})-a^{3}-ro^{2}/ma^{3}$ . See *ATHAROMA*.

**ATHECATA** (Lat.), n. n. pl.  $A^{2th}(a^{3th})-e^{2}k(ak)-a^{3}/ta^{3}$ . From a priv., and *θήκη* (see *THECA*). See *GYMNOBLASTEA*.

**ATHELASMUS** (Lat.), n. m.  $A^{2th}(a^{3th})-e^{2}(al)-a^{2}-a^{3}s(mu^{2}s-mu^{4}s)$ . From a priv., and *θηλασμός* (from *θήλη*, the nipple), suckling. Inability to give suck, especially from imperfect development of the nipple. [A. 322; L. 81.]

**ATHELES** (Lat.), adj.  $A^{2th}(a^{3th})-e(a)/lez(las)$ . Gr., *ἀθηλῆς* (from a priv., and *θήλη*, the nipple). 1. Having no nipples. [A. 322.] 2. Never having given suck. [A. 311.] 3. As a n., a child that has not been suckled. [A. 322.] Cf. *ATHELUS*.

**ATHELIA** (Lat.), n. f.  $A^{2th}(a^{3th})-e(a)/li^{2}-a^{3}$ . Fr., *athélie*. 1. The state of having no nipple. [A. 33.] 2. A genus of *Fungi* made by Persoon, now regarded as the byssoid state of certain *Telephora*. [B. 121.]

**ATHELUS** (Lat.), adj.  $A^{2th}(a^{3th})-e(a)/lu^{3}s(lu^{4}s)$ . Gr., *ἀθηλος* (from a priv., and *θήλη*, the nipple). 1. Weaned. 2. Having never been suckled. [A. 322.]

**ATHELXIS** (Lat.), n. f.  $A^{2th}(a^{3th})-e^{2}lx/i^{2}s$ . Gen., *athelx/eos (-is)*. Gr., *ἀθελξις* (from *ἀθελγειν*, to draw off or press out). Fr., *athelxie*. The act of suckling or pressing out milk from the breast. [A. 322; L. 41, 109.]

**ATHEM** (Ger.), n.  $A^{3}/te^{2}m$ . The breath; respiration. [L. 80.]—*Accessorische A'muskeln*. The auxiliary respiratory muscles. [J. 53.]—*A'bar*. Respirable. [J.]—*A'barkelt*. Respirability. [L. 43.]—*A'beklemmung, A'beschwerden*. Difficulty of breathing. [L. 50; M.]—*A'bewegungen*. The movements of respiration. [J. 53.]—*A'centrum*. See *Respiratory CENTRE*.—*A'folge*. The respiratory rhythm. [L.]—*A'frequenz*. The respiratory rate. [J.]—*A'geräusch*. The respiratory murmur. [A. 317.]—*A'grösse*. The breathing capacity. [J.]—*A'höhlen*. The dilated spaces formed in plants by the intercellular passages beneath each stoma. [B. 49.]—*A'hölen*. To draw a breath; as a n., respiration. [A. 315.]—*A'los*. Breathless. [A. 315.]—*A'loisig-keit*. Breathlessness. [A. 315.]—*A'messer*. See *SPINOMETER*.—*A'messung*. See *SPINOMETRY*.—*A'muskeln*. The respiratory muscles. [J. 53.]—*A'nerven*. The nerves supplying the respiratory apparatus. [J. 53.]—*A'noth*. The sensation of the necessity after an expiration and before the beginning of the succeeding inspiration. [J.]—*A'probe*. An examination of the lungs of a dead body for medico-legal purposes. [L. 135.]—*A'raum*. See *A'grösse*.—*A'schöpfen*. To breathe. [A. 315.]—*A'schwankung*. The variation of the breathing in depth, frequency, etc. [J. 53.]—*A'stickung*. Dyspnoea. [M. 6.]—*A'zäpfchen, A'zäpflein*. The uvula. [A. 315.]—*A'zug*. A breath. [A. 315.]—*A'zünglein*. 1. The uvula. [A. 315.] 2. The epiglottis. [L. 43.]—*Beil'scher A'nerv*. The spinal accessory nerve. [L. 115.]—*Beschwerliches A'hölen*. Excessive dyspnoea. [L. 80.]—*Cheyne-Stokes'scher A*. See *Cheyne-Stokes RESPIRATION*.—*Kurzer A*. Shortness of breath. [A. 315.]—*Leichter A*. Free respiration. [L. 43.]—*Mittlere vitale A'lage*. That state of the lungs in which they are moderately filled with air, as in ordinary breathing. [Panum (J. 53).]—*Schwerer A*, *Schwerer A'zug*. Dyspnoea; gasping or sighing respiration. [A. 315.]

**ATHENA** (Lat.), n. f.  $A^{2th}(a^{3th})-e(a)/na^{3}$ . From *Ἀθηνᾶ* (= *Ἀθ-ῆνη*), the goddess Athene. The name of an ancient vulgar plaster of complex composition. [Gorreaus (A. 325); L. 94.]

**ATHENATORIUM** (Lat.), n. n.  $A^{2th}(a^{3th})-e^{2}n(an)-a^{3}-to^{2}ri^{2}-u^{3}m(u^{4}m)$ . A thick glass cover for a cucurbit, used by the old chemists in subliming. Its neck led into the cucurbit, instead of winding around it. [A. 325.]

**ATHENIPPUM, ATHENIPPON, ATHENIPPUM** (Lat.), n's n.  $A^{2th}(a^{3th})-e^{2}n(an)-i^{2}p/pi^{2}-n^{3}m(u^{4}m)$ ,  $-i^{2}p/po^{2}n$ ,  $-pu^{3}m(pu^{4}m)$ . Gr., *ἀθενίπιον*, from the name of its inventor. Syn.: *diasmyrnes*. An ancient collyrium containing pompholyx, oxide of copper, saffron, myrrh, spikenard, hematite, white pepper, opium, and Chian wine. [Gorreaus (L. 116).]—*Athenippion panchreston*. Another collyrium described by Galen. [L. 94.]

**ATHENOR**, n.  $A^{2th}/e^{2}n-o^{2}r$ . See *ATHANOR*.

**ATHER** (Lat.), n. m.  $A(a^{3})/thu^{3}r(thar)$ . Gen., *a'theros (-ris)*. Gr., *ἀθήρ*. 1. See *AWN*. 2. The point or barb of a weapon. [Hippocrates (A. 311).]

**ATHER**, n. See *ATTAR*.

**ATHERA** (Lat.), n. f.  $A^{2th}(a^{3th})-e(a)/ra^{3}$ . See *ATHARA*.

**ATHERANDRA** (Lat.), n. f.  $A^{2th}(a^{3th})-e^{2}r-a^{3}n(a^{3}n)/dra^{3}$ . From *ἀθήρ*, an awn or spike, and *άνδρᾱ*, a man. A genus of climbing asclepiadaceous shrubs, of the tribe *Periploceæ*, established by Decaisne. [B. 19, 42.]

**ATHERAPEUSIA** (Lat.), n. f.  $A^{2th}(a^{3th})-e^{2}r-a^{3}-pu^{2}/si^{2}-a^{3}$ . Gr., *ἀθεραπευσία* (from a priv., and *θεραπεύειν*, to give medical attendance). Want of care or attendance, neglect of a patient. [A. 387.]

**ATHERAPEUTOS** (Lat.), adj.  $A^{2th}(a^{3th})-e^{2}r-a^{3}-pu^{2}/to^{2}s$ . Gr., *ἀθεράπευτος*. 1. Neglected, not taken care of, not cured. 2. Incurable. [A. 387.]

**ATHERE** (Lat.), n. f.  $A^{2th}(a^{3th})-e(a)/re(ra)$ . Gr., *ἀθήρη*. See *ATHARA*.

**ATHÉREUX** (Fr.), adj.  $A^{3}-ta-ru^{3}$ . See *ATHEROID* (2d def.).

**ATHER-GUL**, n. From *attar* (q. v.), and Pers., *gul*, a rose. [B.] See *ATTAR of roses*.

**ATHERICERA** (Lat.), n. n. pl.  $A^{2th}(a^{3th})-e^{2}r-i^{2}s(i^{2}k)/e^{2}r-a^{3}$ . From *ἀθήρ*, a point, and *κέρας*, a horn. Fr., *athéricère*. Cuvier's name for one of the primary divisions of dipterous insects. [L. 108.]

**ATHERICEROUS**, adj.  $A^{2th}-e^{2}r-i^{2}s/e^{2}r-n^{3}s$ . Lat., *athericeros*. Fr., *athéricère*. Having the lower and side pieces of the suckers setaceous (said of dipterous insects). [L. 116.]

**ATHERINIDÆ** (Lat.), n. f. pl.  $A^{2th}(a^{3th})-e^{2}r-i^{2}n-i^{2}d-e(a^{3}c^{2})$ . A family of mugiliform *Acanthopterygii*. [L. 207.]

**ÄTHERISCH** (Ger.), adj.  $A^{te}r-i^{sh}$ . Aerial, ethereal. [L, 52.]

**THERMAL**, adj.  $A^{th}-u^{rm}-a^{2}l$ . Gr.,  $\alpha\theta\epsilon\rho\mu\omicron\varsigma$  (from  $\alpha$  priv., and  $\theta\epsilon\rho\mu\eta$ , heat). Fr., *athermal*. Ger., *athermisch*. Cool (said of spring waters of a temperature between  $0^{\circ}$  and  $15^{\circ} C$ . [=  $32^{\circ}$  and  $59^{\circ} F$ .]). [A, 385.]

**THERMANCY**, n.  $A^{th}-u^{rm}-a^{2}n-si^{2}$ . From  $\alpha$  priv., and  $\theta\epsilon\rho\mu\alpha\iota\sigma\tau\alpha\iota$ , to become heated. Fr., *athermanité*. The state of being athermanous. [B, 21.]

**THERMANOUS**, adj.  $A^{th}-u^{rm}-a^{2}n-u^{s}$ . Fr., *athermane*. Ger., *atherman*. Impervious to, or not transmitting, radiant heat (the opposite of diathermanous). [L, 49.]

**THERMASIA** (Lat.), n. f.  $A^{th}(a^{3}th)-u^{rm}(e^{2}rm)-a(a^{2})^{2}si^{2}-a^{2}$ . From  $\alpha$  priv., and  $\theta\epsilon\rho\mu\alpha\sigma\iota\alpha$ , heat. Fr., *athermasie*. Absence of heat. [L, 41, 109.]

**THERMENNIG** (Ger.), n.  $A^{te}r-me^{2}n-ni^{2}g$ . See AGRIMONIA.

**THERMIC**, adj.  $A^{th}-u^{rm}-i^{2}k$ . Gr.,  $\alpha\theta\epsilon\rho\mu\omicron\varsigma$  (from  $\alpha$  priv., and  $\theta\epsilon\rho\mu\eta$ , heat). Fr., *athémique*. Ger., *athermisch*. 1. Athermanous (q. v.). [L, 41.] 2. Taking place without raising the bodily temperature. [A, 385.]

**THERMOSIA** (Lat.), n. f.  $A^{th}(a^{3}th)-u^{rm}(e^{2}rm)-o^{2}si^{2}-a^{2}$ . See THERMASIA.

**THERMOSYSTALTIC**, adj.  $A^{th}-u^{rm}-o-si^{2}ta^{2}lt-i^{2}k$ . From  $\alpha$  priv.,  $\theta\epsilon\rho\mu\eta$ , heat, and  $\sigma\upsilon\sigma\tau\alpha\lambda\tau\iota\kappa\omicron\varsigma$ , contracting. Fr., *athermosystaltique*. Not contracting under the influence of heat (said of muscles). [K; L, 158.]

**THEROID**, adj.  $A^{th}-e^{2}r-oid$ . Gr.,  $\alpha\theta\epsilon\rho\omega\delta\eta\varsigma$ . Lat., *atherodes*. Fr., *athéroïde*, *athéroux*. Ger., *ährenartig*, *ährenförmig* (1st def.), *voll Ähren* (3d def.). 1. Resembling an ear or spike, aristiform. [A, 322; B, 78.] 2. Full of spikes, spicate, aristate. [B, 78.] 3. Mealy; gruel-like. [B, 78.]

**THEROLOGION** (Lat.), n. n.  $A^{th}(a^{3}th)-e^{2}r-o(o^{2})-lo(o^{2})-ji^{2}(gi^{2})-o^{2}n$ . Gr.,  $\alpha\theta\epsilon\rho\omega\lambda\omicron\gamma\iota\omicron\nu$  (from  $\alpha\theta\epsilon\rho\eta$ , the point of a weapon, and  $\lambda\epsilon\gamma\epsilon\iota\nu$ , to gather). An ancient forceps for extracting thorns, splinters, etc. [A, 387.]

**THEROMA** (Lat.), n. n.  $A^{th}(a^{3}th)-e^{2}r(ar)-o^{2}ma^{2}$ . Gen., *atheromatos* (-tis). Gr.,  $\alpha\theta\epsilon\rho\omega\mu\alpha$  (from  $\alpha\theta\epsilon\rho\eta$ , porridge). Fr., *athérome*, *loupé enkystée*, *molluscum stéarique*. Ger., *Atherom*, *Breigschwulst*, *Balggeschwulst*, *Grützbeutelgeschwulst*. It., *ateroma*. Sp., *ateroma*, *lobanillo*. Syn.: *steatoma*, *acne sebacea molluscum*, *cystis sebacea*, *lupia*, *talpa*. 1. Properly, a wen (a sebaceous cyst); a subcutaneous cyst of considerable size, consisting of the retained contents of one or more sebaceous follicles, situated most commonly on the scalp, forehead, neck, or back, usually covered with skin unaltered in appearance; so called from the porridge-like character of the contents. [G.] 2. Any morbid deposit resembling the contents of a wen. The ancients applied the term to glands affected with serofulous degeneration. [Celsus (A, 318).] It is now often applied to atheromatous degeneration of an artery.—**Arterial**. Lat., *a. arteriale*. Fr., *athérome artériel*. The formation of yellowish patches, consisting mostly of fat granules; on the inner surface of the elastic coat of an artery, which subsequently assume the consistency of gruel. [A, 385.]—**A. cutis**. See A. (1st def.).—**Blepharo-a**. See the major list.—**Capillary a.** Fr., *athérome des capillaires*. The formation in the walls of the capillaries of fatty granules like those of the early stage of arterial a.

**THEROMASIA** (Lat.), n. f.  $A^{th}(a^{3}th)-e^{2}r(ar)-o(o^{2})-ma(ma^{2})-si^{2}-a^{2}$ . Fr., *athéromasie*. It., *ateromasia*. Atheromatous degeneration of an artery. [Sanné, "Rev. mens. des mal. de l'enfance," Feb., 1887.]

**THEROMATOUS**, adj.  $A^{th}-e^{2}r-o^{2}m-a^{2}t-u^{s}$ . Lat., *atheromaticus*, *atheromatodes*. Fr., *athéromateux*. Ger., *atheromatös*. Pertaining to, of the nature of, caused by, or affected with, atheroma. [A, 322.]

**THEROPOGON** (Lat.), n. m.  $A^{th}(a^{3}th)-e^{2}r(ar)-o(o^{2})-po^{2}go^{2}n$  (gon). Gen., *atheropogon* (-nis). From  $\alpha\theta\epsilon\rho\eta$ , a spike, and  $\pi\omega\gamma\omega\nu$ , the beard. A section of the botanical genus *Bouteloua* (q. v.).

**THEROSIS** (Lat.), n. f.  $A^{th}(a^{3}th)-e^{2}r(ar)-o^{2}si^{2}s$ . Gen., *atheroses* (-sis). See ATHEROMASIA.

**THEROSPERMA** (Lat.), n. n.  $A^{th}(a^{3}th)-e^{2}r(ar)-o(o^{2})-spu^{2}rm$  (spe<sup>2</sup>rm)<sup>a</sup>. Gen., *atherosperm* (-atis). From  $\alpha\theta\epsilon\rho\eta$ , a beard, and  $\sigma\pi\epsilon\rho\mu\alpha$ , a seed. Fr., *athérosperme*. A genus of trees of the order *Atherosperma*, established by Labillardière. [B, 42.]—**A. moschatum** [Labillardière (who wrote *A. moschata*)]. The Tasmanian or Australian sassafras; a large tree growing in New Holland, bearing opposite leaves and monocous axillary flowers. The male flower is campanulate, with from 10 to 12 fertile and several barren stamens; the female flower contains numerous sessile ovaries with one cell and one ovule. The bark (sassafras bark) yields a volatile oil which is said to act, in drop-doses, as a diuretic, diaphoretic, and cardiac sedative; it also contains wax, a fixed oil, gum, sugar, protein matters, a brownish-red aromatic resin (said to have the composition  $C_{27}H_{32}O_8$ ), butyric and oxalic acids, atherospermatic acid, and an alkaloid called atherospermine. [B, 5, 19, 75, 196.]—**A. Novæ Zelandiæ** [Hooker]. See LAURELIA *Novæ Zelandiæ*.—**A. sassafras** [Cunningham]. See DORYPHORA *sassafras*.—**A. sempervirens** [H. Baillon]. See LAURELIA *sempervirens*.

**THEROSPERMACEÆ** (Lat.), n. f. pl.  $A^{th}(a^{3}th)-e^{2}r(ar)-o(o^{2})-spu^{2}rm(spe^{2}rm)-a(a^{2})^{2}se^{2}(ke^{2})-e(a^{2})-e^{2}$ . Fr., *atherospermacees*. Of Lindley, an order of trees the fruit of which is an aromatic nut provided with a permanent style covered with long hairs; by Bentham and Hooker made a tribe of the *Monimiaceæ*. [B, 19, 42.]

**THEROSPERMATANNIC ACID**, n.  $A^{th}-e^{2}r-o-spu^{2}rm-a^{2}ta^{2}n-i^{2}k$ . Fr., *acide atherosperma-tannique*. Ger., *Atherospermanagersäure*. A variety of tannic acid, obtained from the

bark of *Atherosperma moschatum*, the lead salt of which has the composition  $C_{10}H_{14}O_3.Pb$  [B, 196] or  $C_{16}H_{14}Pb_2O_3$ . [B, 207.]

**THEROSPERMEÆ** (Lat.), n. f. pl.  $A^{th}(a^{3}th)-e^{2}r(ar)-o(o^{2})-spu^{2}rm(spe^{2}rm)-e^{2}-e(a^{2})-e^{2}$ . Fr., *atherospermees*. 1. Of R. Brown and Bentham and Hooker, the *Atherosperma*. 2. Of Reichenbach, a division of nyctagineous plants, comprising the subdivisions *Pneumee*, *Chimonanthee*, and *Calycanthee*. [B, 170.]

**THEROSPERMINE**, n.  $A^{th}-e^{2}r-o-spu^{2}rm-en$ . Fr., *athérospermine*. Ger., *Atherospermin*. An alkaloid extracted by Zezer from the bark of the *Atherosperma moschatum*; a grayish, light, odorless, bitter powder,  $C_{30}H_{49}N_2O_8$ , insoluble in water, slightly soluble in ether, and readily soluble in alcohol and in chloroform. [B, 5, 196, 207.]

**THEROUS**, adj.  $A^{th}-e^{2}r-oid$ . See ATHEROID (2d def.).

**THERUREÆ** (Lat.), n. f. pl.  $A^{th}(a^{3}th)-e^{2}r(ar)-u^{2}(u)-re^{2}-e(a^{2})-e^{2}$ . A subtribe of dracunculineous plants made by Blume, including the single genus *Atherurus*. [B, 170.]

**THERURUS** [Blume] (Lat.), n. m.  $A^{th}(a^{3}th)-e^{2}r(ar)-u^{2}(u)-ru^{2}(ru^{2})$ . The botanical genus *Pinellia* (q. v.). [B, 42.]—**A. ternatus** [Blume]. See *PINELLIA tuberosa*.

**THERTOD**, adj.  $A^{th}-e^{2}t-oid$ . From  $\alpha\theta\epsilon\rho\omicron\varsigma$  (see ATHETOSIS), and  $\epsilon\iota\theta\omicron\varsigma$ , resemblance. Ger., *athetotisch*. Resembling athetosis. [D.]

**ATHETOSIS** (Lat.), n. f.  $A^{th}(a^{3}th)-e^{2}t-o^{2}si^{2}s$ . Gen., *athetoses* (-sis). From  $\alpha\theta\epsilon\rho\omicron\varsigma$  (from  $\alpha$  priv., and  $\tau\eta\theta\epsilon\iota\nu\alpha\iota$ , to bring into position), without fixed position (see also  $-osis^{2}$ ). Fr., *athétose*. Ger., *Äthetose*. It., *atetosi*. Sp., *atetosis*. Syn.: *Hammond's disease*. An affection of the nervous system described by W. A. Hammond in 1871 and considered by him to be due to degenerative changes in the brain and to be distinct from post-hemiplegic chorea, with which it has been confounded. It is characterized by involuntary movements of the fingers and toes, usually of one side only, of a slow, apparently determinate, systematic, and uniform character, with a tendency to distortion; often preceded and accompanied by other symptoms of cerebral disease, especially epileptic seizures and impairment of the intellect, and attacking middle-aged men of intemperate habits. In a case observed by S. Ringer, lesions of the optic thalamus, the corpus striatum, and adjacent parts were found after death. [A, 394.]

**ATHIN** (Ar.), n. The *Antirrhinum*. [L, 105.]

**ATHLETE**, n.  $A^{th}-let$ . Gr.,  $\alpha\theta\lambda\eta\tau\eta\varsigma$ ,  $\alpha\theta\lambda\eta\tau\eta\rho$  (from  $\alpha\theta\lambda\epsilon\iota\nu$ , to contend with). Lat., *athleta*. Fr., *athlète*. Ger., *Athlet*. It., *atleta*. A person of powerful build and great muscular development, or one who practises bodily exercises for the purpose of increasing his muscular power. [A, 322, 385.]

**ATHLETIC**, adj.  $A^{th}-le^{2}t-i^{2}k$ . Gr.,  $\alpha\theta\lambda\eta\tau\iota\kappa\omicron\varsigma$ . Lat., *athleticus*. Fr., *athlétique*. Ger., *athletisch*. It., *atletico*. Pertaining to, of the character of, or resembling, an athlete or the exercises practised by athletes. [A, 322, 385.]

**ATHLETICS**, n. sing.  $A^{th}-le^{2}t-i^{2}ks$ . Fr., *athlétique*. Ger., *Athletik*. The art and exercises of athletes. [A, 315.]

**ATHLIPTOS**, **ATHLIPTUS** (Lat.), adj's.  $A^{th}(a^{3}th)-li^{2}p^{2}to^{2}s$ ,  $-tu^{2}(tu^{2})$ . Gr.,  $\alpha\theta\lambda\iota\pi\tau\omicron\varsigma$ . Fr., *athlipte*. Ger., *athliptisch*. Setting in suddenly without premonition (said of fevers). [Galen (M, 59).]

**ATHMEN** (Ger.), v. intr. and n.  $A^{t}me^{2}n$ . To breathe; as a n., breath, respiration. [D; J.]—**A. röhre**. A siphon (of a mollusc). [L, 228.]—**A. sbedürfniss**. The respiratory sense. [J.]—**A. scentrum**. A respiratory centre. [J.]—**A. sstoff**. See ELEMENTS of respiration.—**Ausa'**. To breathe out, expire, exhale. [A, 315.]—**Baucha'**. Abdominal respiration. [L.]—**Schwera'**. To breathe with difficulty. [A, 315.]—**Tiefa'**. To draw a long, deep breath. [A, 315.]

**ATHMUNG** (Ger.), n.  $A^{t}mung$ . Respiration. [J.]—**Aeusseres A.** See EXTERNAL RESPIRATION.—**A. losigkeit**. See APNEEA.—**A. sapparatus**. The respiratory apparatus. [J.]—**A. sbewegung**. The respiratory movements. [J.]—**A. sbreite**. The circumference of the chest when a full breath is taken and held. [M, 1.]—**A. scapazität des Blutes**. The respiratory capacity of the blood (i. e., its capacity to absorb oxygen). [Maragliano, "Cribl. f. d. med. Wsenschaft," Dec. 13, 1884, p. 881 (B).]—**A. scentrum**. A respiratory centre. [J.]—**A. scurve**. A graphic tracing showing the respiratory movements. [J, 53.]—**A. sdruck**. Syn.: *Respirationsdruck*. The pressure of the air in the respiratory tract; less than the atmospheric pressure during inspiration and greater during expiration. [J, 19, 53.]—**A. sfähig**. Capable of breathing. [A, 315.]—**A. sform**. A type of respiration. [J, 53.]—**A. sgeräusch**. The respiratory murmur. [A, 315.]—**A. sgrösse**. 1. According to Budge, the air inspired and expired at one breath; the tidal air or the breathing capacity. [J, 7.] 2. According to Rosenthal, the air inhaled at one inspiration multiplied by the number of inspirations in a minute. [J, 53.] Cf. *Respiratory volume*.—**A. shöhle**. A respiratory cavity. [A, 46.]—**A. sluft**. See *Tidal air*.—**A. smechanismus**. The mechanism of respiration. [J, 53.]—**A. smedium**. The medium (air or water) in which respiration is carried on. [J, 52.]—**A. smuskeln**. The respiratory muscles. [J.]—**A. snooth**. The sensation of the necessity of breathing.—**A. splasma**. Brass's term for the intermediate of the three layers into which he divides the body of a cell; supposed to be especially concerned in the assumption of oxygen. [J, 55, 60.]—**A. sraum**. A respiratory cavity; the lungs. [J, 52.]—**A. srlhythmus**. The respiratory rhythm. [J.]—**A. sstillstand**. A cessation of the respiratory movements in either the inspiratory or the expiratory phase. [J, 19, 40.] See *Expiratory and Inspiratory tetanus*.—**A. stypos**. A type of respiration. [J, 53.]—**A. sunterbrechung**. An interruption or intermission of respiration. [J, 52.]—**A. swege**. The respiratory passages. [M, 6.]—**A. swerkzeug**. The respiratory apparatus. [M, 6.]—**A. szentrum**. A respiratory centre. [B, 49.]—**Cheyne-Stokes'sches A. splänomen**. See *Cheyne-Stokes RESPIRATION*.—**Darma'**.

The process of the absorption and evolution of gas by the mucous membrane of the intestines. [B, 49].—**Hautat**. Cutaneous respiration. [B, 49].—**Innere A.** Internal respiration, tissue respiration. [B, 49].—**Intramolekuläre A.** The respiration of plants when, being deprived of a free supply of oxygen, they form carbon dioxide at the expense of the carbon and oxygen of their own tissues. [B, 49].—**Luxusa**. The introduction into the lungs of an amount of air in excess of that which the system actually requires; a phenomenon regarded by Mosso as occurring in normal respiration. [Du Bois-Raymond's "Archiv.", 1886; "Ctrbl. f. d. med. Wssnsch.", Feb. 19, 1887, p. 133 (B)].—**Periodische A.** Breathing which presents periodical variations in intensity and rhythm, or periodical intermissions. [Mosso, Du Bois-Raymond's "Archiv.", 1886; "Ctrbl. f. d. med. Wssnsch.", Feb. 19, 1887, p. 133 (B)].—**Ruhige A.** Tranquil respiration. [J.].—**Tiefe A.** A full inspiration. [J.]

**ATHON** (Ger.), n.  $A^3$ -ton'. The *Asplenium trichomanes*. [B, 49.]

**ATHONDAIYALAI**, n. An East Indian name for the *Caparix horrida*. [P. S. Mootooswamy, "Indian Med. Gaz.", Jan., 1887, p. 3.]

**ATHONOR**, n. See **ATHANOR**.

**ATHORACICA** (Lat.), n., n. pl. of adj. *athoracicus* (q. v.).  $A^2$ th-( $a^3$ th)-o-ra<sup>2</sup>s(ra<sup>3</sup>k)'i<sup>2</sup>k-a<sup>3</sup>. Blainville's name for a class of the *Decapoda*, including those *Crustacea* which apparently have no thorax. [B, 195.]

**ATHORACICUS** (Lat.), adj.  $A^2$ th( $a^3$ th)-o-ra<sup>2</sup>s(ra<sup>3</sup>k)'i<sup>2</sup>k-u<sup>3</sup>s-(u<sup>3</sup>s). From *a* priv., and *thorax* (see **THORAX**). Fr., *athoracique*. Having no thorax. [L, 42.]

**ATHORACOCEPHALUS** (Lat.), n. m.  $A^2$ th( $a^3$ th)-o-r<sup>2</sup>(or)'i<sup>2</sup>k-a<sup>3</sup>-ko(ko<sup>2</sup>)-se<sup>2</sup>f(ke<sup>2</sup>f)'a<sup>3</sup>-lu<sup>3</sup>s(lu<sup>4</sup>s). From *a* priv., *thorax* (see **THORAX**), and *κεφαλή*, the head. See **ACEPHALOGASTER**.

**ATHORECTUS** (Lat.), adj.  $A^2$ th( $a^3$ th)-o-re<sup>2</sup>k(rak)'tu<sup>3</sup>s(tu<sup>4</sup>s). Gr., *ἀθωρεκτος*. Sober, not drunk. [Hippocrates (A, 325).]

**ATHORYBIADÆ** (Lat.), n. f. pl.  $A^2$ th( $a^3$ th)-o-r<sup>2</sup>-i<sup>2</sup>b(u<sup>3</sup>b)'i(i<sup>2</sup>)-a<sup>3</sup>-de(da<sup>3</sup>-a<sup>2</sup>). In zoology, a family of the *Physophoridae*, characterized by the hydrosoma having necoticalces, but without hydrophyllia, by the distal end of the filiform coenosare being dilated, and by the pneumatocyst being small. [Huxley (L, 147).]

**ATHREPSIA** (Lat.), n. f.  $A^2$ th( $a^3$ th)-re<sup>2</sup>p'si<sup>2</sup>-a<sup>3</sup>. From *a* priv., and *θρέψω* (from *τρέφω*, to nourish), nutrition. Fr., *athrepsie*. Ger., *Atrepsie*. It., *atrepsia*. Defective nutrition; Parrot's term for a chronic state of malnutrition in infants, attributed to faulty development, characterized by progressive emaciation, with greenish, liquid evacuations from the bowels, vomiting, and loss of digestive power. [A, 385; D, 40.]

**ATHRIX** (Lat.), adj.  $A^2$ th( $a^3$ th)'ri<sup>2</sup>x. Gen., *at'richos* (-chis). Gr., *ἀθριξ* (from *a* priv., and *θρίξ*, the hair). 1. Devoid of hair. [G.] 2. Weak, enervated. [Galen (A, 325).]

**ATHRIXIÆ** (Lat.), n. f. pl.  $A^2$ th( $a^3$ th)-ri<sup>2</sup>x-i(i<sup>2</sup>)'e<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). Fr., *athrixides*. A subtribe of composite plants of the tribe *Inulideæ*, comprising herbs and under-shrubs with leaves flat or recurved at the border; a non-paleaceous receptacle; homogamous radiate, or sometimes subsdiscoid, heads; the flowers usually fertile, or those of the disc alone sterile, with styles having truncate divisions. [B, 42, 121.]

**ATHRESMA** (Lat.), n. n.  $A^2$ th( $a^3$ th)-re<sup>2</sup>z'(ro<sup>2</sup>)'e<sup>2</sup>s-ma<sup>3</sup>. Gen., *athresmatos* (-tis). Gr., *ἀθροισμα* (from *ἀθροίζω*, to collect). 1. In the Epicurean philosophy, a concourse of atoms. [Diogenes (A, 311).] 2. According to the empirics, a collection of observations. [Goræus (A, 325).]

**ATHROON** (Lat.), n., n. of adj. *athroos* (q. v.).  $A^2$ th( $a^3$ th)-ro(ro<sup>2</sup>)-o<sup>2</sup>n. Gr., *ἀθρόον*. A group, a collection (as of phenomena). [Galen (A, 325).]

**ATHROOPOMPHOLYX** (Lat.), n. f. and m.  $A^2$ th( $a^3$ th)-ro(ro<sup>2</sup>)-o<sup>2</sup>(o<sup>2</sup>)-po<sup>2</sup>m'fo(fo<sup>2</sup>)-li<sup>2</sup>x(lu<sup>4</sup>x). Gen., *athroopomphol'ygus* (-gis). For deriv., see **ATHROOS** and **POMPHOLYX**. See **POMPHOLYX conferta**.

**ATHROOS** (Lat.), adj.  $A^2$ th( $a^3$ th)-ro(ro<sup>2</sup>)-o<sup>2</sup>s. Gr., *ἀθρόος*. Ger., *gehäuft*. Heaped up, aggregated, copious (said of cutaneous lesions and of secretions). [L, 94; M, 13.]

**ATHROPOMATA** (Lat.), n. n. pl.  $A^2$ th( $a^3$ th)-ro(ro<sup>2</sup>)-po<sup>2</sup>m'a<sup>3</sup>-ta<sup>3</sup>. See **CLISTENTERATA**.

**ATHROSPHYTUM** (Lat.), n. n.  $A^2$ th( $a^3$ th)-ro(ro<sup>2</sup>)-so<sup>2</sup>f'i<sup>2</sup>t-(u<sup>3</sup>t)-u<sup>3</sup>m(u<sup>4</sup>m). From *ἀθρόος*, accumulated, and *φυτόν*, a plant. Necker's term for an order of plants, including many genera, such as *Jungermannia*, *Riccia*, *Fucus*, *Lichen*, *Ulva*, *Conferva*, etc., now placed in widely different orders. [B, 170.]

**ATHRUPHYLLUM** (Lat.), n. n.  $A^2$ th( $a^3$ th)-ru-fi<sup>2</sup>(fu<sup>3</sup>)'lu<sup>3</sup>m(lu<sup>4</sup>m). From *ἀθρόος*, accumulated, and *φύλλον*, a leaf. Loureira's name for *Myrsine* (q. v.). [B, 170.]

**ATHYMIA** (Lat.), n. f.  $A^2$ th( $a^3$ th)'i(u<sup>3</sup>)'mi<sup>2</sup>-a<sup>3</sup>. Gr., *ἀθυμία* (from *a* priv., and *θυμός*, animation). Fr., *athymie*. Ger., *Muthlosigkeit*. 1. Mental dejection. [Hippocrates (A, 325).] 2. See **APSYCHIA**.

**ATHYMICUS, ATHYMUS** (Lat.): adj's.  $A^2$ th( $a^3$ th)-i<sup>2</sup>m(u<sup>3</sup>m)'-i<sup>2</sup>k-u<sup>3</sup>s(u<sup>4</sup>s), -(u<sup>3</sup>)'mu<sup>3</sup>s(mu<sup>4</sup>s). Gr., *ἀθυμος*. Ger., *schwerthilig*. Pertaining to, caused by, or affected with, athymia. [A, 322.]

**ATHYMY**, n.  $A^2$ th-i'mi<sup>2</sup>. See **ATHYMIA**.

**ATHYRIUM** (Lat.), n. n.  $A^2$ th( $a^3$ th)-i<sup>2</sup>r(u<sup>3</sup>r)'i<sup>2</sup>-u<sup>3</sup>m(u<sup>4</sup>m). Fr., *athyron*. A genus of ferns of the suborder *Polypodiaceæ*, closely allied to *Asplenium*, from which it is distinguished by the sori being innate or somewhat resembling a horse-shoe in shape. [B, 19.]—**A. asplenoides** (Desvaux). **A. cyclosorum** [Rupr.]. **A. filix femina** [Roth]. See **ASPENIUM filix femina**.—**A. filix mas**. See **ASPIDIUM filix mas**.—**A. letium** [Gray]. **A. laxum** [Schum.]. See **ASPENIUM filix femina**.—**A. ovatum** [Newman]. See **ASPENIUM filix femina**.—**A. tripinnatum** [Rupr.]. See **ASPENIUM filix femina**.

**ATHYRUS** (Lat.), n. m.  $A^2$ th( $a^3$ th)'i<sup>2</sup>(u<sup>3</sup>)'-ru<sup>3</sup>s(ru<sup>4</sup>s). See **LATHYRUS**.

**ATI**, n. A Tahiti name for the *Caulophyllum inophyllum*. [B, 121.]

**ATIBALÁ** (Sanscr.), n. The *Sida rhombifolia*. [B, 181.]

**ATINCAR**, n. An alchemical name for borax. [Ruland, Johnson (A, 325).]

**ATINIA** (Lat.), n. f.  $A^2$ t(a<sup>3</sup>t)-i<sup>2</sup>n'i<sup>2</sup>-a<sup>3</sup>. The *Ulmus campestris*, or perhaps the *Carpinus betulus*. [Pliny (B, 88).]

**ATINKAL, ATINKAR**, n's. See **ATINCAR**.

**ATIPOLO**, n. A name in the Philippine Islands for the jack-tree (*Artocarpus*). [B, 88.]

**ATIRBESIA**, n. An African name for the *Marrubium vulgare*. [B, 88.]

**ATIRSITA**, n. Fr., *atirsite*. The *Plantago coronopus*. [B, 121.]

**ÁTIS**, n. A common name in India for the *Aconitum heterophyllum*. [B, 5, 181.] It is also applied to the root of *Aconitum napellus* and to the root of another plant, probably the *Asparagus sarmenosus*. [L, 78.]

**ATISINE**, n.  $A^2$ t'i<sup>2</sup>s-en. From *átis* (q. v.). Fr., *atisine*. Ger., *Atisin*. An alkaloid,  $C_{16}H_{17}N_2O_6$ , found in *Aconitum heterophyllum*. [A, 319; B, 5, 8.]

**ATITARA**, n. The *Desmoncus* [Martius]; according to Adanson, the *Calamus rotang*. [B, 121.]

**ÁTIVISHA**, n. The *Aconitum heterophyllum*. [B, 181.]

**ATJA**, n. An Abyssinian name for the *Triticum arras*. [B, 121.]

**AT KULAGI**, n. The flowers and ripe or nearly ripe fruit of a variety of *Rheum*, said to contain iron and tannin, used in Turkestan in the preparation of baths for rheumatism. ["Proc. of the Am. Pharm. Assoc.," xxii, p. 104 (B).]

**ATLANCHANA** [Mex. Ph.], (Sp.), n.  $A^3$ t-la<sup>3</sup>n-cha<sup>3</sup>na<sup>3</sup>. A Mexican name for the *Cuphea lanceolata*. ["Proc. of the Am. Pharm. Assoc.," xxiv, p. 776 (B).]

**ATLANTACEA** (Lat.), n. n. pl.  $A^2$ t(a<sup>3</sup>t)-la<sup>2</sup>n(la<sup>3</sup>n)-ta(ta<sup>3</sup>)'se<sup>2</sup>-(ke<sup>2</sup>)-a<sup>3</sup>. See **PTEROPODA**.

**ATLANTAD** [Barclay], adv.  $A^2$ t-la<sup>2</sup>nt'a<sup>2</sup>d. Toward the atlas (q. v. for deriv.). [L, 141.]

**ATLANTAL, ATLANTAN** [Barclay], adj's.  $A^2$ t-la<sup>2</sup>nt'a<sup>2</sup>l, -a<sup>2</sup>n. Gr., *Ἀτλαντικός*. Lat., *atlanticus*. Fr., *atlantique*. Ger., *atlantisch*. Pertaining to, connected with, or directed toward, the atlas; hence, superior (in this sense, said of the upper limbs). [L, 141.]

**ATLANTIC CITY**, n.  $A^2$ t-la<sup>2</sup>nt'i<sup>2</sup>k si<sup>2</sup>t'i<sup>2</sup>. A seaside resort in southern New Jersey, esteemed in the climatic treatment of consumption. [B, Reed, "N. Y. Med. Jour.," xxxiii, p. 325.]

**ATLANTIDÆ** (Lat.), n. f. pl.  $A^2$ t(a<sup>3</sup>t)-la<sup>2</sup>n(la<sup>3</sup>n)'ti<sup>2</sup>d-e(a<sup>3</sup>-e<sup>2</sup>). A family of molluscs of the order *Nucleobranchiata* (*Heteropoda*), class *Gasteropoda*. There is a well-developed shell into which the animal can retire; the branchiæ are contained in a dorsal mantle-cavity; and the shell is symmetrical, discoidal, and sometimes having an operculum. [A, 359.]

**ATLANTI-OBLIQUUS** (Lat.), n. m.  $A^2$ t(a<sup>3</sup>t)-la<sup>2</sup>n(la<sup>3</sup>n)'ti<sup>2</sup>-o<sup>2</sup>b-li(li<sup>2</sup>)'kwu<sup>3</sup>s(kwu<sup>4</sup>s). E. Coen's name for the obliquus capitis superior muscle. ["Med. Record," July 23, 1887 (L).]

**ATLANTION** (Lat.), n. n.  $A^2$ t(a<sup>3</sup>t)-la<sup>2</sup>n(la<sup>3</sup>n)-ti(ti)'o<sup>2</sup>n. Gr., *ἀτλαντίον*. An old name for the atlas (the bone). [A, 325.]

**ATLANTI-RECTUS** (Lat.), n. m.  $A^2$ t(a<sup>3</sup>t)-la<sup>2</sup>n(la<sup>3</sup>n)'ti<sup>2</sup>-re<sup>2</sup>k'-tu<sup>3</sup>s(tu<sup>4</sup>s). E. Coen's name for the rectus capitis posticus minor muscle. ["Med. Record," July 23, 1887 (L).]

**ATLANTIUS** (Lat.), adj.  $A^2$ t(a<sup>3</sup>t)-la<sup>2</sup>n(la<sup>3</sup>n)-ti(ti)'u<sup>3</sup>s(u<sup>4</sup>s). Gr., *Ἀτλαντίος*. See **ATLANTAL**.

**ATLANTO-AXIAL, ATLANTO-AXOID**, adj's.  $A^2$ t-la<sup>2</sup>nt'-o-a<sup>2</sup>x'i<sup>2</sup>-a<sup>2</sup>l, -a<sup>2</sup>x'oid. Lat., *atlanto-axialis*, *atlanto-axoideus*. Fr., *atlanto-axoïdien*. Pertaining to the bones termed the atlas and the axis. [L.]

**ATLANTO-MANDIBULARIS** (Lat.), n. m.  $A^2$ t(a<sup>3</sup>t)-la<sup>2</sup>n(la<sup>3</sup>n)'to(to<sup>2</sup>)-ma<sup>3</sup>n(ma<sup>4</sup>n)-di<sup>2</sup>b-u<sup>3</sup>(u<sup>4</sup>)-la(la<sup>3</sup>)'ri<sup>2</sup>s. Owen's name for a muscle in certain of the *Amphibia*, analogous to the temporal muscle of man. [L, 204.]

**ATLANTO-OCCIPITAL**, adj.  $A^2$ t-la<sup>2</sup>nt''o-o<sup>2</sup>k-si<sup>2</sup>p'i<sup>2</sup>t-a<sup>2</sup>l. Lat., *atlanto-occipitalis*. Fr., *atlanto-occipital*. Pertaining to the atlas and the occipital bone. [L, 44.]

**ATLANTO-ODONTOID**, adj.  $A^2$ t-la<sup>2</sup>nt''o-o-do<sup>2</sup>nt'oid. Lat., *atlanto-odontoides*. Fr., *atlanto-odontôide*. Pertaining to the atlas and the odontoid process of the axis. [L, 44.]

**ATLANTOSAURIDÆ** (Lat.), n. f. pl.  $A^2$ t(a<sup>3</sup>t)-la<sup>2</sup>n(la<sup>3</sup>n)'to(to<sup>2</sup>)-sa<sup>3</sup>r(sa<sup>4</sup>r)-i<sup>2</sup>d-e(a<sup>3</sup>-e<sup>2</sup>). A family of the *Dinosauria*. [L, 121.]

**ATLAS** (Lat.), n. m.  $A^2$ t(a<sup>3</sup>t)'la<sup>3</sup>s. Gen., *atlan'tos* (-tis). Gr., *ἄτλας* (the name of the god who was supposed to bear up the pillars of heaven). The first cervical vertebra; ring-like or elliptical in shape, from the fact that its body, instead of being consolidated with it, constitutes the odontoid process of the second vertebra (the axis), upon which the a. turns in rotation of the head. It articulates above with the condyles of the occipital bone, allowing of the nodding movements of the head. [A, 70.]

**ATLAS** (Lat.), adj.  $A^2$ t(a<sup>3</sup>t)'la<sup>3</sup>s. Gr., *ἄτλας* (from *a* intens. [1st def.], or priv. [2d def.], and *τλάν* [= *τολμάν*], to dare). 1. Able to bear great suffering. [A, 322.] 2. Weak, faint-hearted, unable to bear much. [A, 311, 322.]

**ATLAS**, n.  $A^2$ t'la<sup>3</sup>s. A sort of fine satin formerly obtained from the East. [B, 7].—**Ähnlich** (Ger.), **A'tig** (Ger.). In botany, the same as *bombicinus* or, less properly, *sericeus*. [B,

198.]—**A'baum** (Ger.), **A'beerbaum** (Ger.). The *Prunus padus*, also, the *Crataegus terminalis*. [A, 315.]—**A'beere** (Ger.). The fruit of the *Crataegus terminalis*. [A, 315.]—**A'blume** (Ger.). The satin-flower (*Lunaria rediviva*). [B, 180.]—**A'erz** (Ger.). Malachite. [B, 49.]—**A'holz** (Ger.). See *Satin wood*.—**A'kies** (Ger.). Malachite. [A, 315.]—**A'kirschbaum** (Ger.). See *A'baum*.—**A'kraut** (Ger.). The *Lunaria biennis*. [A, 315.]—**A'spath** (Ger.). *Satin-spar*; a white or variously colored limestone of fibrous texture and silky lustre, found in various parts of Europe, especially England. [B, 49, 180.]—**A'stein** (Ger.). A fibrous variety of gypsum. [B, 196.]—**A'vitriol** (Ger.). Copperas (sulphate of iron). [A, 315.]—**A'wood**. See *Satin wood*.—**Ostindischer A'holzbaum** (Ger.). The *Chloroxylon swietenia*. [B, 180.]

**ATLATLANCUAYA** (Sp.), n. A<sup>3</sup>t-la<sup>3</sup>n-kwa<sup>3</sup>ya<sup>3</sup>. A Mexican name for the *Achyranthes caley*. [A, 447.] See **TLATLANCUAYA**.

**ATLAT-ZOPILIN**, n. A Mexican name for the *Matvaviscus pentacarpus*. [B, 121.]

**ATLÉ, ATLEE**, n's. Ar., *athlah*. Egyptian names for the *Tamarix orientalis*. [B, 19, 52.]—**Atlee gall**. A gall, filled with a scarlet liquid, produced on the *Tamarix orientalis*. [B, 19.]

**ATLO-AXOID**, adj. A<sup>2</sup>t-lo-a<sup>2</sup>x'oid. See **ATLANTO-AXIAL**.

**ATLODIDYMUS, ATLODYMUS** (Lat.), n's m. A<sup>2</sup>t(a<sup>3</sup>t)-lo(lo<sup>2</sup>)-di<sup>2</sup>d'i<sup>2</sup>m(u<sup>6</sup>m)-u<sup>3</sup>s(u<sup>3</sup>s), -di<sup>2</sup>(du<sup>6</sup>)/mu<sup>3</sup>s(mu<sup>3</sup>s). From *ἀτλός*, the atlas (the bone), and *διδυμός*, double. Fr., *atloidyne*, *atloidyne*. I. Geoffroy St.-Hilaire's term for a monster having a single trunk and two separate but contiguous heads on a single neck. [A, 301, 385; L, 32, 49, 109.]

**ATLOID**, adj. A<sup>2</sup>t-lo'id. Fr., *atloïde*, *atloïdien*. See **ATLANTAL**.

**ATLOÏDE** (Fr.), adj. A<sup>3</sup>t-lo-ed. See **ATLANTAL**. As a n., the atlas. [Chaussier (A, 301).]

**ATLOÏDO-AXOID**, adj. A<sup>3</sup>t-lo'id-'o-a<sup>2</sup>x'oid. Fr., *atloïdo-axoïdien*. See **ATLANTO-AXIAL**.

**ATLOÏDO-CORONODIEN** (Fr.), n. A<sup>3</sup>t-lo-ed-o-co-ro-no-ed-i<sup>2</sup>a<sup>2</sup>n<sup>2</sup>. See **ATLANTO-MANDIBULARIS**.

**ATLOÏDO-INFRA-OCCIPITALIS** (Lat.), n. m. A<sup>2</sup>t(a<sup>3</sup>t)-lo(lo<sup>2</sup>)-i(e)'-do(do<sup>2</sup>)-i(e)'-do(do<sup>2</sup>)-i<sup>2</sup>n-fra<sup>3</sup>-o<sup>2</sup>k-si<sup>2</sup>p(ki<sup>2</sup>p)-i<sup>2</sup>t-a<sup>2</sup>/li<sup>2</sup>s. See **ATLOÏDO-SUB-OCCIPITALIS**.

**ATLOÏDO-MASTOIDEUS** (Lat.), n. m. A<sup>2</sup>t(a<sup>3</sup>t)-lo(lo<sup>2</sup>)-i(e)'-do(do<sup>2</sup>)-ma<sup>3</sup>s(ma<sup>3</sup>s)-to(to<sup>2</sup>)-i<sup>2</sup>d(ed)'e<sup>2</sup>-u<sup>3</sup>s(u<sup>3</sup>s). The oblique capitis superior muscle in man, also an analog of the same in the solipeds. [Girard, Percivall, Leyh (L, 13).]

**ATLOÏDO-MUSCULARIS** (Lat.), n. f. A<sup>2</sup>t(a<sup>3</sup>t)-lo(lo<sup>2</sup>)-i(e)'-do(do<sup>2</sup>)-mu<sup>3</sup>s(mu<sup>3</sup>s)-ku<sup>2</sup>(ku<sup>2</sup>)-la(la<sup>3</sup>)ri<sup>2</sup>s. Fr., *atloïdo-musculaire*. Girard's term for the superior branch of the occipital artery. [L, 43.]

**ATLOÏDO-OCCIPITAL**, adj. A<sup>3</sup>t-lo'id-'o-o<sup>2</sup>k-si<sup>2</sup>p-i<sup>2</sup>t-a<sup>2</sup>/li<sup>2</sup>s. Lat., *atloïdo-occipitalis*. Fr., *atloïdo-occipital*. See **ATLANTO-OCCIPITAL**; as a n., the rectus capitis posticus minor muscle in man, also an analogous muscle in the solipeds. [L, 9, Girard, Percivall, Leyh (L, 13).]

**ATLOÏDO-ODONTOID**, adj. A<sup>3</sup>t-lo'id-'o-o-do<sup>2</sup>nt'oid. Fr., *atloïdo-odontoidien*. See **ATLANTO-ODONTOID**.

**ATLOÏDO-SOUS-MASTOÏDIEN** (Fr.), n. A<sup>3</sup>t-lo-e-do-su-ma<sup>3</sup>s-to-e-di<sup>2</sup>a<sup>2</sup>n<sup>2</sup>. The superior oblique muscle of the head. [A, 385.]

**ATLOÏDO-SOUS-OCCIPITAL** (Fr.), n. A<sup>3</sup>t-lo-e-do-suz-o<sup>2</sup>k-si<sup>2</sup>p-i<sup>2</sup>t-a<sup>2</sup>/li<sup>2</sup>s. The rectus capitis lateralis muscle. [A, 385.]

**ATLOÏDO-STYLOIDEUS** (Lat.), n. m. A<sup>2</sup>t(a<sup>3</sup>t)-lo(lo<sup>2</sup>)-i(e)'-do(do<sup>2</sup>)-sti(stu<sup>6</sup>)-lo(lo<sup>2</sup>)-i<sup>2</sup>d(ed)'e<sup>2</sup>-u<sup>3</sup>s(u<sup>3</sup>s). Fr., *petit droit latéral de la tête*. Ger., *Trägergriffelmuskel, kleiner (oder schiefer) Beuger des Kopfes*. Syn.: *flexor capitis parvus* [Bourgelat], *obliquus capitis anticus* [Percivall]. A muscle of the neck in quadrupeds, analogous to the rectus capitis lateralis in man. [A, 314; L, 13.]

**ATLOÏDO-SUB-MASTOÏDIEN** (Lat.), n. m. A<sup>2</sup>t(a<sup>3</sup>t)-lo(lo<sup>2</sup>)-i(e)'-do(do<sup>2</sup>)-su<sup>3</sup>b(su<sup>3</sup>b)-ma<sup>3</sup>s(ma<sup>3</sup>s)-to(to<sup>2</sup>)-i<sup>2</sup>d(ed)'e<sup>2</sup>-u<sup>3</sup>s(u<sup>3</sup>s). See **OBLIQUUS capitis superior**.

**ATLOÏDO-SUB-OCCIPITALIS** (Lat.), n. m. A<sup>2</sup>t(a<sup>3</sup>t)-lo(lo<sup>2</sup>)-i(e)'-do(do<sup>2</sup>)-su<sup>3</sup>b(su<sup>3</sup>b)-o<sup>2</sup>k-si<sup>2</sup>p(ki<sup>2</sup>p)-i<sup>2</sup>t-a<sup>2</sup>/li<sup>2</sup>s. Fr., *atloïdo-sous-occipital*. Syn.: *flexor capitis brevis* [Bourgelat], *rectus capitis anticus minor* [Percivall], *atloïdo-occipitalis inferior* [Leyh]. The rectus capitis lateralis muscle in man, also an analogous muscle in quadrupeds. [L, 9, 13.]

**ATMAGOPTA-MURKUTEE** (Bengal), **ĀTMAGUPTĀ** (Sanskrit), n's. The *Mucuna pruriens*. [B, 172, 181.]

**ATME** (Lat.), n. f. A<sup>2</sup>t(a<sup>3</sup>t)/me(ma). Gr., *ἀτμή*. See **ATMOS**.

**ATMELLA** (Lat.), n. f. A<sup>2</sup>t(a<sup>3</sup>t)-me(ma). Gr., *ἀτμή*. See *Spilanthes acmella*. [B.]—*Herba atmellae*, *Semen atmellae*. The herb and seed of *Spilanthes acmella*. [B, 180.]

**ATMERYTHRIN**, n. A<sup>2</sup>t-me<sup>2</sup>r-i<sup>2</sup>th-ri<sup>2</sup>n. Kane's name for a body forming reddish-green laminae, produced by distilling litmic and litmylic acids with lime. [B, 196.]

**ATMIATRIA** (Lat.), n. f. A<sup>2</sup>t(a<sup>3</sup>t)-mi<sup>2</sup>a<sup>2</sup>-ri(re)/a<sup>3</sup>. Fr., *atmiatrie*. Ger., *Atmiatrie*. See **ATMIATRIC**.

**ATMIC**, adj. A<sup>2</sup>t/mi<sup>2</sup>k. Lat., *atmicus* (from *ἀτμός*, vapor). Pertaining to, caused by, or consisting of, vapor. [M, 13.]

**ATMIDIATRICA, ATMIDIATRICE** (Lat.), n's, f. of adj. *atmidiatricus* (ars understood). A<sup>2</sup>t(a<sup>3</sup>t)-mi<sup>2</sup>d-i<sup>2</sup>a<sup>2</sup>-tri<sup>2</sup>-ca<sup>3</sup>-se(k). From *ἀτμός*, vapor, and *ιατρικός*, medical. Fr., *atmidiatrice*. Ger., *Dampfkunde*. Medical treatment by means of vapors or gases. [A, 322, 385.]—**A. pulmonalis**. Fr., *atmiatrie pulmonaire* [Martin Solon]. The treatment of pulmonary diseases with inhalations of medicated vapors. [A, 301; L, 44.]

**ATMIDODES** (Lat.), adj. A<sup>2</sup>t(a<sup>3</sup>t)-mi<sup>2</sup>d-o-dez(das). Gr., *ἀτμίδος* (from *ἀτμός*, vapor, and *εἶδος*, resemblance). Ger., *dampfig-dunstig, dunstartig, dunstähnlich*. Vapor-like, vaporous. [A, 322.]

**ATMIDOMETER**, n. A<sup>2</sup>t-mi<sup>2</sup>d-o<sup>2</sup>m'e<sup>2</sup>t-u<sup>3</sup>. Lat., *atmidometrum* (from *ἀτμός*, vapor, and *μέτρον*, a measure). Fr., *atmidomètre*. Ger., *Ausdünstungsmesser*. An instrument for measuring the amount of aqueous vapor in the air by determining the rate of evaporation from a moist surface. It consists of a long, thin, upright glass tube, graduated into inches, terminating below in a bulb of porous earthenware. It is filled with water, and the latter oozes through the bulb and evaporates, causing the level of the water to sink in the tube. The drier the air is, the faster does the evaporation proceed. [A, 305, 377.]

**ATMIDOMÉTROGRAPHE** (Fr.), n. A<sup>3</sup>t-mi<sup>2</sup>d-o-ma-tro-gra<sup>3</sup>ff. From *ἀτμός*, vapor, *μέτρον*, a measure, and *γράφειν*, to write. A self-registering atmidometer. [L, 41.]

**ATMIDOSCOPE**, n. A<sup>2</sup>t-mi<sup>2</sup>d'o-skop. From *ἀτμός*, vapor, and *σκοπεῖν*, to examine. Ger., *Atmidoskop*. Cabinet's name for the atmidometer. [B, 196; L, 41.]

**ATMOMÈTRE** (Fr.), n. A<sup>3</sup>t-me-o-me<sup>2</sup>tr. An apparatus for the employment of atmidiatrica (q. v.). [Jacobelli, "Gaz. hebdomadaire de méd. et de chir.," Aug. 5, 1887, p. 505.] Cf. *Pneumatic CABINET*.

**ATMISMOMETER**, n. A<sup>3</sup>t-mi<sup>2</sup>s-mo<sup>2</sup>m'e<sup>2</sup>t-u<sup>3</sup>r. Fr., *atmis-momètre* [Délézenne]. See **ATMIDOMETER**.

**ATMISTERION** (Lat.), n. n. A<sup>2</sup>t(a<sup>3</sup>t)-mi<sup>2</sup>s-te(ta)/ri<sup>2</sup>-o<sup>2</sup>n. From *ἀτμός*, vapor. See **VAPORIUM**.

**ATMIZONE**, n. A<sup>2</sup>t/mi<sup>2</sup>z-on. Meissner's name for antozone. [B, 196.]

**ATMIZONIQUE** (Fr.), adj. A<sup>3</sup>t-mi<sup>2</sup>z-o-nek. See **ATMOZONICUS**.

**ATMOCLÉIDE** (Fr.), n. A<sup>3</sup>t-mo-kla-ed. An apparatus for the inhalation of gases. [L, 41.]

**ATMODES** (Lat.), adj. A<sup>2</sup>t(a<sup>3</sup>t)-mo'dez(das). See **ATMIDODES**.

**ATMOGRAPH**, n. A<sup>2</sup>t/mo-gra<sup>3</sup>ff. From *ἀτμός*, the breath, and *γράφειν*, to write. An instrument invented by J. B. Sanderson for registering the movements of the chest in respiration. [L, 25.]

**ATMOGRAPHY, ATMOLGY**, n's. A<sup>2</sup>t-mo<sup>2</sup>g-ra<sup>3</sup>-fi<sup>2</sup>, -mo<sup>2</sup>l'-o-i<sup>2</sup>. Lat., *atmographia* (from *ἀτμός*, vapor, and *γράφειν*, to write), *atmologia* (from *ἀτμός*, and *λόγος*, understanding). Ger., *Atmologie*. The science of vapors or of evaporation. [A, 322; B, 49.]

**ATMOLUTRON, ATMOLUTRUM** (Lat.), n's n. A<sup>2</sup>t(a<sup>3</sup>t)-mo<sup>2</sup>me<sup>2</sup>-lu<sup>2</sup>(lu)/tro<sup>2</sup>n, -tru<sup>3</sup>m(tru<sup>3</sup>m). From *ἀτμός*, vapor, and *λουτρόν*, a bath. Ger., *Dampfbad*. A vapor bath. [A, 322; L, 81.]

**ATMOLYSIS** (Lat.), n. f. A<sup>2</sup>t(a<sup>3</sup>t)-mo<sup>2</sup>l'i<sup>2</sup>s(u<sup>3</sup>s)-i<sup>2</sup>s. Gen., *atmolysis/eos* (-ol'ysis). From *ἀτμός*, vapor, and *λύσις*, a liberation. The separation of air or any gas by diffusion through a porous plate. [B.]

**ATMOLYZER**, n. A<sup>3</sup>t/mo<sup>2</sup>l-iz-u<sup>3</sup>r. An apparatus for the performance of atmolysis. [L, 73.]

**ATMOMECHANE** (Lat.), n. f. A<sup>2</sup>t(a<sup>3</sup>t)-mo(mo<sup>2</sup>)-me<sup>2</sup>k(mach<sup>2</sup>)/a<sup>3</sup>-ne(na). From *ἀτμός*, vapor, and *μηχανή*, a machine. Fr., *machine à vapeur*. Ger., *Dampfmaschine*. A steam engine. [L, 81.]

**ATMOMECHANICUS** (Lat.), adj. A<sup>2</sup>t(a<sup>3</sup>t)/mo(mo<sup>2</sup>)-me<sup>2</sup>k(mach<sup>2</sup>)-a<sup>2</sup>n(a<sup>2</sup>n)/i<sup>2</sup>k-u<sup>3</sup>s(u<sup>3</sup>s). Pertaining to or worked by steam power. [L, 81.]

**ATMOMETER**, n. A<sup>2</sup>t-mo<sup>2</sup>m'e<sup>2</sup>t-u<sup>3</sup>r. Lat., *atmometrum* (from *ἀτμός*, vapor, and *μέτρον*, a measure). Fr., *atmomètre*. Ger., *Atmometer*, *Dunstmesser*, *Dampfmesser*. See **ATMIDOMETER**.

**ATMOPYRE**, n. A<sup>2</sup>t/mo-pir. From *ἀτμός*, vapor, and *πῦρ*, fire. A hollow cylinder of burnt clay, closed at the top, open at the bottom, and having numerous perforations in the sides; used in chemical manipulations, being fixed loosely over an ordinary gas-burner. The gas burns with a perfectly blue, smokeless flame, which envelops the cylinder and soon renders it incandescent. [B, 2.]

**ATMORÁ** (Bengal), n. The *Helicteres isora*. [B, 181.]

**ATMOS** (Lat.), n. m. A<sup>2</sup>t(a<sup>3</sup>t)/mo<sup>2</sup>s. Gr., *ἀτμός*. A vapor, an exhalation, the breath. [J, L, 94.]

**ATMOSPHERILIA** (Lat.), n. n. pl. A<sup>2</sup>t(a<sup>3</sup>t)-mo<sup>2</sup>s-fe<sup>2</sup>r(fa<sup>3</sup>-e<sup>2</sup>r)/i<sup>2</sup>l'i-a<sup>3</sup>. Fr., *atmosphérites*. Ger., *Atmosphäridien*. The chemical constituents found in the atmosphere, especially considered in relation to alterations due to processes of combustion, respiration, etc., or to meteorological changes; constituting, according to some naturalists, a fourth, the gaseous, kingdom of nature. [B, 49; L, 43.]

**ATMOSPHERE**, n. A<sup>2</sup>t/mo<sup>2</sup>s-fer. Lat., *atmosphæra* (from *ἀτμός*, vapor, and *σφαῖρα*, a sphere). Fr., *atmosphère*. Ger., *Atmosphäre*, *Dunstkreis*, *Luftkreis*. It., *atmosfera*. Sp., *atmósfera*. 1. In chemistry, any special gaseous medium surrounding a solid or liquid body. [Tyndall (B, 2).] 2. As usually employed, the gaseous envelope (air) surrounding the earth. The height of the a. has been variously estimated. The usual estimates place it at about forty or fifty miles, but there is reason to think that it may be much greater than this. Its weight is estimated by the degree of pressure which it exerts in obedience to the law of gravitation. This pressure varies with the temperature, with differences of meteorological condition, and more especially with the height above the sea-level at which the estimate is made. It is measured with the barometer. At the level of the sea, and at a temperature of 0° C. the pressure is equal to that of a column of mercury 760 mm. (somewhat over 30 inches) in height; or it is equivalent to a weight of about 15 lbs. to every square inch of surface. The a. is continually varying in density, and the variations are the cause of those disturbances of atmospheric equilibrium which are apparent as winds and storms. Such alterations of density are due chiefly to changes of temperature effected in the a. either by variations in the amount of heat received from the sun or by inequality in the amount of heat radiated from different portions of the earth's surface. In its chemical composition, the a. may be considered as consisting of pure air (made up of oxygen and nitrogen in the proportion of

about 4 volumes of the latter to 1 volume of the former) mixed with variable amounts of water, carbon dioxide, ammonia, ozone, free nitric acid, nitrites, and various organic and inorganic gases and solids. Water is present in the a., either under the form of invisible aqueous vapor or as the visible finely divided particles of liquid coexisting mist and clouds. It is constantly renewed by evaporation from the ocean and other bodies of water, and is also constantly exhaled from the cutaneous and respiratory surfaces of animals. The amount taken up from these sources increases with the temperature. When the a. has absorbed as much moisture as it can contain, it is said to be saturated; and the degree of moisture, or *humidity*, of the a. at any time is measured by the ratio between the amount of moisture actually present and the amount that would be required to saturate it at the temperature of observation. This ratio is usually expressed as a percentage; a humidity of 50, for instance, denoting that the air is half saturated with moisture. The humidity is measured with the hygrometer. When the amount of moisture present exceeds the limit of saturation, the atmospheric water is precipitated in the form of rain, snow, hail, dew, or frost. This is usually brought about by a lowering of the temperature, as an amount of aqueous vapor which is insufficient to saturate warm air will more than saturate an equal volume of colder air. Carbon dioxide (so-called carbonic acid) constitutes about 4 parts in 10,000 by volume of the a. It is continually renewed by the processes of animal respiration, and is continually decomposed by the processes of vegetable assimilation. Its quantity, therefore, varies according to the relative preponderance of these two factors. It is proportionately great in the a. of cities, and especially in houses where people are crowded together and ventilation is insufficient. The ammonia of the a. is usually present in combination. It is of importance as supplying plants with the nitrogenous material necessary for the full development of their seeds and other portions of their structure. The amount of atmospheric ozone is extremely small. It is produced in the evaporation of water and by the passage of an electric discharge (lightning) through the air. It is used up in the oxidation of nitrogen and organic matters. The other constituents of the a. may be regarded as purely adventitious. They consist of: (1) gaseous emanations from factories, furnaces, and dwellings; (2) exhalations from decaying animal and vegetable matter; (3) finely pulverized solid materials; and (4) minute living organisms. Under the first head are included coal-gas, chlorine, hydrochloric acid, sulphur dioxide, sulphurous and sulphuric acids, and carbon monoxide. Under the second head are included marsh-gas, sulphureted hydrogen, and some of the ammoniacal compounds. Under the third head are included pulverized fragments of soil, coal-dust, and other inorganic material; chloride of sodium and other salts left in suspension by the evaporation of sea-water; and finely divided organic material composed chiefly of excrement and the products of putrefaction. Under the fourth head are included the pollen of plants and a variety of invisible vegetable germs which are believed to be the effective agents in the transmission of disease and the production of fermentations. The relative amount of these adventitious constituents varies greatly. Upon their amount the degree of salubrity of the a. chiefly depends, any air which contains a large proportion of them being unfit for respiration. The variations of the more constant ingredients of the a. are within narrow limits and are of secondary importance as regards wholesomeness. [B.] 3. In physics, a pressure equal to that of the a. (approximately, one of 15 lbs. to the square inch). [B.]—**ELECTRICAL a.** Lat., *atmosphæra electrica*. Fr., *atmosphère électrique*. Ger., *elektrische Atmosphäre*. The space about an electrified body in which it produces electric manifestations. [B., 49.]

**ATMOSPHERE** (Fr.), n. A<sup>3</sup>t-mo-sfe<sup>2</sup>r. 1. See ATMOSPHERE. 2. A non-aerial medium surrounding a body.—**A. adipeuse** (ou *cellulo-graisseuse*, ou *graisseuse*) du rein. The fatty tissue surrounding the kidney. [Guyon, "Ann. des mal. des org. génito-urin.," March, 1887, p. 129.]

**ATMOSPHERIC, ATMOSPHERICAL**, adj's. A<sup>2</sup>t-mo<sup>2</sup>s-fe<sup>2</sup>r-i<sup>2</sup>k-a<sup>2</sup>l. Lat., *atmosphæricus*. Fr., *atmosphérique*. Ger., *atmosphärisch*. It., *atmosferico*. Sp., *atmosferico*. Of or pertaining to the atmosphere. [B.] See A. LINES, A. MOISTURE, A. PRESSURE, and A. PRECIPITATES.

**ATMOSPHERIE** (Fr.), n. A<sup>3</sup>t-mo-sfa-re. The therapeutical use of air. [A., 385.]

**ATMOSPHERIZATION**, n. A<sup>2</sup>t<sup>u</sup>/mo<sup>2</sup>s-fe<sup>2</sup>r-i<sup>2</sup>z-a<sup>2</sup>/shu<sup>2</sup>n. The change of venous into arterial blood by the absorption of oxygen. [K.]

**ATMOSPHEROLOGY**, n. A<sup>2</sup>t-mo<sup>2</sup>s-fe<sup>2</sup>r-o<sup>2</sup>/i<sup>2</sup>-j<sup>2</sup>. Lat., *atmosphærologia* (from *ἀτμός*, vapor, *σφαῖρα*, a sphere, and *λόγος*, understanding). Fr., *atmosphérologie*. Ger., *Atmosphärologie*. That department of science which relates to the atmosphere.

**ATMOSPOREUS** (Lat.), n. m. A<sup>2</sup>t(a<sup>2</sup>t)-mo<sup>2</sup>s-po<sup>2</sup>(o<sup>2</sup>)/re<sup>2</sup>-u<sup>2</sup>s-(u<sup>2</sup>s). From *ἀτμός*, vapor, and *σπορεύς* (from *σπερμι*, to sow), a sower. Ger., *Dampferbreiter*. Syn.: *vaporis disseminator*, *vaporisator*. An apparatus devised by J. Corrigan for disseminating vapor. ["Dublin Jour. of Med. Sci.," March, 1839, p. 94 (A., 322).]

**ATMOSTATICS**, n. sing. A<sup>2</sup>t-mo<sup>2</sup>s-ta<sup>2</sup>t/i<sup>2</sup>ks. Lat., *atmostatica* (from *ἀτμός*, vapor, and *στατική ἐπιστήμη* understood), *statics—scientia* understood). Ger., *Atmostatik*. The science of gases in a state of equilibrium. [B., 78.]

**ATMOSTATICUS** (Lat.), adj. A<sup>2</sup>t(a<sup>2</sup>t)-mo<sup>2</sup>s-ta<sup>2</sup>t/(ta<sup>2</sup>t)/i<sup>2</sup>k-u<sup>2</sup>s-(u<sup>2</sup>s). Pertaining to atmostatics or to the specific gravity of gases. [A., 322.]

**ATMOZOMICUS, ATMOZONICUS** (Lat.), adj. A<sup>2</sup>t(a<sup>2</sup>t)-mo<sup>2</sup>(mo<sup>2</sup>)-zo<sup>2</sup>m(zom)/i<sup>2</sup>ks-u<sup>2</sup>s-(u<sup>2</sup>s), -zo<sup>2</sup>m(zon)/i<sup>2</sup>ks-u<sup>2</sup>s-(u<sup>2</sup>s). From *ἀτμός*, vapor, and *ζῶμα*, or *ζώνη*, a girdle. Fr., *atmosphérique, atmozonique*. One or the other of these terms was applied by Blackadder to the wet-bulb hygrometer, from the bulb being swathed with muslin. [L., 41, 116; B., 195.]

**ATMUS** (Lat.), n. m. A<sup>2</sup>t(a<sup>2</sup>t)/mu<sup>2</sup>s(mu<sup>2</sup>s). See ATMOS.

**ATNON**, n. A name said to have been applied by Dioscorides to the *Lotium temulentum*. [Bory (B., 121).]

**ATOA**, n. A Brahman name for the *Anona*. [Bory (B., 121).]

**ATOCHA** (Sp.), n. A<sup>2</sup>-to<sup>2</sup>/cha<sup>2</sup>. The *Lygeum spartum*, the *Stipa tenacissima*, or the berries of the *Oxyococcus palustris*. [B., 19, 46, 121.]

**ATOCHADOS** (Sp.), n. A<sup>2</sup>-to<sup>2</sup>-cha<sup>2</sup>/dos. The *Lavandula stoechas*. [B., 46.]

**ATOCIA** (Lat.), n. f. A<sup>2</sup>t(a<sup>2</sup>t)-o(o<sup>2</sup>)/si<sup>2</sup>(ki<sup>2</sup>)-a<sup>2</sup>. Gr., *ἀτοκία* (from a priv. and *τέκνω*, to bring forth). Fr., *atocie*. Ger., *Unfruchtbarkeit*. Sterility in the female. [A., 385.]

**ATOCION** (Lat.), n. n. A<sup>2</sup>t(a<sup>2</sup>t)-o(o<sup>2</sup>)/si<sup>2</sup>(ki<sup>2</sup>)-o<sup>2</sup>n. Gr., *ἀτόκιον* (*φάρμακον* understood). An old term for a medicine supposed to prevent conception. [Pliny (A., 318); A., 322.]

**ATOCIOS** (Lat.), adj. A<sup>2</sup>t(a<sup>2</sup>t)-o(o<sup>2</sup>)/si<sup>2</sup>(ki<sup>2</sup>)-o<sup>2</sup>s. Gr., *ἀτόκιος*. Causing barrenness. [A., 322.]

**ATOCIUM** (Lat.), n. n. A<sup>2</sup>t(a<sup>2</sup>t)-o(o<sup>2</sup>)/si<sup>2</sup>(ki<sup>2</sup>)-u<sup>2</sup>m(u<sup>2</sup>m). 1. The *Lychnis silvestris*. [Pliny (B., 134).] 2. See ATOCION.

**ATOCIUS** (Lat.), adj. A<sup>2</sup>t(a<sup>2</sup>t)-o(o<sup>2</sup>)/si<sup>2</sup>(ki<sup>2</sup>)-u<sup>2</sup>s(u<sup>2</sup>s). See ATOCIOS.

**ATOCIVE** (Fr.), n. A<sup>3</sup>-to-sev. The *Anona squamosa*. [L., 49.]

**ATOCOS, ATOCUS** (Lat.), adj's. A<sup>2</sup>t(a<sup>2</sup>t)/o(o<sup>2</sup>)-ko<sup>2</sup>s-, -ku<sup>2</sup>s-(ku<sup>2</sup>s). Gr., *ἀτοκος*. 1. Nulliparous. 2. Barren. [A., 311, 322.]

**ATOLE**, n. The *Bixa orellana* or the dye (annatto) obtained from it. [B., 173, 180.]

**ATOLLIDÆ** (Lat.), n. f. pl. A<sup>2</sup>t(a<sup>2</sup>t)-o<sup>2</sup>/i<sup>2</sup>l<sup>2</sup>d-e(a<sup>2</sup>-e<sup>2</sup>). A family of *Hydrozoa* belonging to the order *Discomedusæ*, suborder *Cubostomæ*. [E. R. Lankester (B., 77).]

**ATOM**, n. A<sup>2</sup>t/o<sup>2</sup>m. Gr., *ἄτομος* (from a priv. and *τέμνω*, to cut). Lat., *atomus*. Fr., *atome*. Ger., *Atom*. *Urstofftheilchen*. It., *atomo*. Sp., *átomo*. 1. In philosophy and physics, a supposititious, excessively small, indivisible, and unalterable particle of matter. By the aggregation of a's all substances were supposed to be formed, differences in their physical properties being attributed to differences in the a's themselves or in the arrangement and location of the component a's. This conception of an a. dates back to the time of Anaxagoras, Democritus, and Lucretius, and still exists in a somewhat modified form. [B.] See MOLECULE and ATOMIC THEORY. 2. In chemistry, a name given by Dalton to the smallest particle of a body, whether elementary or compound, which could be imagined to exist by itself or in combination. His definition thus includes both the a. and the molecule of recent chemistry. [B.] 3. In recent chemistry, the smallest conceivable portion of an elementary body which can preserve the chemical properties of the body, and go into and out of combination. [B.] Cf. MOLECULE.—**A'ähulich** (Ger.). Atom-like. [L., 46.]—**A'gewicht** (Ger.). Atomic weight. [B.]—**A'refraction** (Ger.). See ATOMIC REFRACTION.—**A'wärme** (Ger.). Atomic heat. [B.]—**Chemical a.** See A. (2d and 3d defs.).—**Compound a.** A molecule. [B., 140.]—**Elementary a.** The a. of an elementary body; or an a. in the chemical sense. [B., 140.]—**Organic a.** A molecule forming part of an organic compound. [B., 140.]—**Physical a.** See A. (1st def.) and MOLECULE.—**Simple a.** See *Elementary a.*—**Vortex a.** Fr., *atome-tourbillon*. The elementary constituent of a substance according to the so-called vortex theory of matter; a whirling ring (like the ring of smoke), being a portion of the infinitely attenuated, perfectly fluid ether supposed to permeate all space, to which portion a vortex motion has been communicated. Such a vortex-ring, produced in a perfect fluid (i. e., one in which no friction exists), has been shown by Helmholtz to be indestructible and indivisible. [Tait (B., 164).]

**ATOMARIUS** (Lat.), adj. A<sup>2</sup>t(a<sup>2</sup>t)-o<sup>2</sup>m-a(a<sup>2</sup>)/ri<sup>2</sup>-n<sup>2</sup>s-(u<sup>2</sup>s). Fr., *atomaire*. Having colored dots (an entomological and botanical species-name). [B., 121.]

**ATOMATO-FLOCCULOSUS** (Lat.), adj. A<sup>2</sup>t(a<sup>2</sup>t)-o<sup>2</sup>m-a(a<sup>2</sup>)/to<sup>2</sup>(to<sup>2</sup>)-flo<sup>2</sup>k-ku<sup>2</sup>(ku<sup>2</sup>)-lo<sup>2</sup>/su<sup>2</sup>s-(u<sup>2</sup>s). From *atomus*, an atom, and *floc-cus*, a lock of wool. Ger., *atomatisch-flockig*. Flocculose in spots of very small size (like the pileus of an agaric). [B., 198.]

**ATOMATIS** (Lat.), adj. A<sup>2</sup>t(a<sup>2</sup>t)-o<sup>2</sup>m-a(a<sup>2</sup>)/tu<sup>2</sup>s-(tu<sup>2</sup>s). See ATOMARIUS.

**ATOME** (Fr.), n. A<sup>3</sup>-tom. See ATOM.—**A. insécable** [Dumas]. See ATOM (3d def.).—**A. séccable** [Dumas]. See MOLECULE.—**A-tourbillon**. See Vortex-ATOM.

**ATOMIC**, adj. A<sup>2</sup>-o<sup>2</sup>m/i<sup>2</sup>k. Lat., *atomicus*. Fr., *atomique*. Ger., *atomisch*. It., *atomico*. Sp., *atómico*. Pertaining to atoms. [B.] See A. HEAT, A. THEORY, A. VOLUME, and A. WEIGHT.

**ATOMICIAN**, n. A<sup>2</sup>t-o<sup>2</sup>m-i<sup>2</sup>sh-a<sup>2</sup>n. See ATOMIST.

**ATOMICISM**, n. A<sup>2</sup>t-o<sup>2</sup>m/i<sup>2</sup>-si<sup>2</sup>sm. See ATOMISM.

**ATOMICITY**, n. A<sup>2</sup>t-o<sup>2</sup>m-i<sup>2</sup>s/i<sup>2</sup>ti<sup>2</sup>d. Fr., *atomicité*. Ger., *Atomicität*. It., *atomicità*. Sp., *atomicidad*. Syn.: *combining capacity* (or *power*), *quantivalence*, *valence*, *valency*. The combining power of an element as compared with that of hydrogen; a number representing the greatest number of atoms of hydrogen which it will replace in a compound. The degrees of a. are expressed by the terms *univalence*, or the a. of a *monad* element, which replaces one atom of hydrogen; *bivalence*, or the a. of a *diad* element, replacing two atoms of hydrogen; *trivalence*, or the a. of a *triad* element; *quadrivalence*, or the a. of a *tetrad* element; *quinquivalence*, or the a. of a *pentad* element; *sextivalence*, or the a. of a *hexad* element; etc. [B.]—**Absolute a.** The maximum combining capacity of an element; expressed by a number indicating the maximum number of atoms of a univalent element with which it can combine. It is equal to the sum of the active and latent atomicities (q. v.). [B., 159.]—**Active a.** The combining capacity of an element actually shown in combination with another element or a radicle (e. g., the active a. of nitrogen in ammonia, NH<sub>3</sub>, is 3, although the absolute

a. of nitrogen is 5). [B, 159.]—**Latent a.** The difference between the absolute a. and the active a. (e. g., the latent a. of nitrogen in ammonia is 2). It expresses the number of bonds which are not attached to those of another element, and so become inter-united.

Thus, ammonia may be written  $\begin{matrix} \text{H} \\ | \\ \text{H}-\text{N} > \\ | \\ \text{H} \end{matrix}$ , where the 2 bonds on the right, having no connection with another element, unite with each other. [B, 159.]

**ATOMIFERUS** (Lat.), adj.  $\text{A}^2\text{t}(\text{a}^3\text{t})\text{-o}^2\text{m}\text{-i}^2\text{f}\text{'e}^2\text{r}\text{-u}^2\text{s}(\text{u}^4\text{s})$ . From *atomus*, an atom, and *ferre*, to bear. Fr., *atomifère*. See **ATOMARIUS**.

**ATOMIGKEIT** (Ger.), n.  $\text{A}^3\text{-to}\text{'mi}^2\text{g}\text{-kit}$ . See **ATOMICITY**.

**ATOMISM**, n.  $\text{A}^2\text{t}\text{'o}^2\text{m}\text{-i}^2\text{zm}$ . Lat., *atomismus*, *atomistica* (doctrina understood). Fr., *atomisme*. Ger., *Atomismus*, *Atomistik*. It., Sp., *atomismo*. 1. The science or theory of atoms. [A, 302.] Cf. **Atomic theory**. 2. The philosophical doctrine which regards the universe as composed of atoms. [B, 49.]

**ATOMIST**, n.  $\text{A}^2\text{t}\text{'o}^2\text{m}\text{-i}^2\text{st}$ . Lat., *atomista*. Fr., *atomiste*. Ger., *Atomist*, *Atomistiker*. One who believes in atomism. [B.]

**ATOMISTIC**, adj.  $\text{A}^2\text{t}\text{'o}^2\text{m}\text{-i}^2\text{st}\text{'i}^2\text{k}$ . Lat., *atomisticus*. Fr., *atomistique*. Ger., *atomistisch*. It., *atomistico*. Sp., *atomistico*. 1. Of or pertaining to an atom, consisting of a single atom, atomic. 2. Pertaining to atomism. [B.]

**ATOMISTICS**, n. sing.  $\text{A}^2\text{t}\text{'o}^2\text{m}\text{-i}^2\text{st}\text{'i}^2\text{k}s$ . Lat., *atomistica*, *atomistica* (doctrina understood), *atomisticum* (systema understood). See **ATOMISM**.

**ATOMISTIKER** (Ger.), n.  $\text{A}^3\text{-to}\text{-mi}^2\text{st}\text{'i}^2\text{k}\text{-e}^2\text{r}$ . See **ATOMIST**.

**ATOMIZATION**, n.  $\text{A}^2\text{t}\text{'o}^2\text{m}\text{-i}^2\text{z}\text{'a}\text{'shu}^2\text{n}$ . Fr., *atomisation*. Ger., *Zerstäuben*. The act or process of reducing a body to a state of very fine subdivision, especially that of converting a liquid into the form of spray. [B.]

**ATOMIZER**, n.  $\text{A}^2\text{t}\text{'o}^2\text{m}\text{-i}\text{-zu}^2\text{r}$ . Fr., *appareil à vapeur*, *pulvérisateur*. Ger., *Zerstäuber*, *Dampfapparat*. It., *apparecchio di vapore* (o di spuma), *polverizzatore*. Sp., *aparato de vapor* (o

RICHARDSON'S ATOMIZER.

*de espuma*). Syn.: *spray producer* (or *apparatus*), *nebulizer*. An apparatus for throwing a jet of liquid in the form of a very fine spray. [B.] In the early a's, the spray was formed by means of a syringe having the objective end of the barrel closed with a plate of metal in which there were numerous minute perforations, through which the liquid was forced directly by the action of the

THE SUCTION ATOMIZER. (SASS'S PATTERN.)

piston. These were soon supplanted by Richardson's apparatus. This consists of a bottle to hold the liquid, closed with a stopper perforated by two tubes. One of the tubes extends nearly to the bottom of the bottle, so that its lower end is immersed in the liquid; its upper portion, which is directed at any convenient angle, ends in a fine aperture. The other tube stops short of the surface of the

liquid, and is connected externally with a bulb apparatus for forcing a current of air through it. When the bulb is worked, the pressure of the air upon the surface of the liquid forces the latter out through the first tube, and, by means of a connection between the two tubes above the stopper, a portion of the current of air is diverted into the upper part of the first tube and divides the liquid into spray as it emerges. In the third form of the a., the stream of liquid, instead of being forced through the delivery tube by pressure on the surface of the liquid, is sucked up through it by the action of the current of air, the apertures of the two tubes being at right angles, the current serving at the same time to break the liquid up into spray as it reaches the aperture. Many varieties of the suction atomizer are in use, the power being furnished either by the hand-ball apparatus, by compressed air, or by a small steam-boiler, usually worked with a spirit lamp. The last-named is preferred when it is desired to warm

A STEAM ATOMIZER.

WEIR'S STEAM ATOMIZER.

the spray, as for inhalation, or to continue its production for a long time. A's are used for applying medicated liquids to diseased parts, for the production of local anesthesia by freezing the skin, for producing sprays to be inhaled, and for disinfecting the air of an apartment or that in the immediate vicinity of a wound. [L.]

**ATOMOGYNIA** (Lat.), n. f.  $\text{A}^2\text{t}(\text{a}^3\text{t})\text{'o}(\text{o}^2)\text{-mo}(\text{mo}^2)\text{-ji}^2\text{n}(\text{gu}^4\text{n})\text{'-i}^2\text{a}^3$ . From *átomos*, very small, and *γυνή*, a female. Fr., *atomogynie*. Ger., *Atomogynie*. Richard's name for the Linnæan order *Angiospermia*. [B, 1.]

**ATOMOLOGY**, n.  $\text{A}^2\text{t}\text{'o}^2\text{m}\text{-o}^2\text{l}\text{'o}\text{-ji}^2$ . Lat., *atomologia* (from *átomos*, an atom, and *λόγος*, understanding). Fr., *atomologie*. See **ATOMISM** (1st def.).

**ATOMON** (Lat.), n. n.  $\text{A}^2\text{t}(\text{a}^3\text{t})\text{'o}(\text{o}^2)\text{-mo}^2\text{n}$ . A name said to have been given by Dioscorides to the *Hyoscyamus niger*. [L, 105.]

**ATOMUS** (Lat.), n. m.  $\text{A}^2\text{t}(\text{a}^3\text{t})\text{'o}(\text{o}^2)\text{-mu}^2\text{s}(\text{mu}^4\text{s})$ . 1. An atom. 2. In zoology, a minute dot or point. [B, 240.]

**ATON**, n. The *Bunium bulbocastanum*. [Bory (B, 121); L, 105.]

**ATONIA** (Lat.), n. f.  $\text{A}^2\text{t}(\text{a}^3\text{t})\text{'o}(\text{o}^2)\text{-ni}^2\text{-a}^3$ . Gr., *ἀτονία* (from *α priv.* and *τείνω*, to stretch). See **ATONY**.—**A. nutritiva**. Atrophy. [Dupuytren (L, 44).]

**ATONIATOBLEPHARON** (Lat.), n. f.  $\text{A}^2\text{t}(\text{a}^3\text{t})\text{'o}(\text{o}^2)\text{'ni}^2\text{-a}^3\text{-ton}\text{-ble}^2\text{f}\text{'a}^3\text{-ron}$ . A Latin way of writing *ἀτονία των βλεφάρων* (= *atonia palpebrarum*). A relaxed or paretic condition of one or both eyelids. [Beer (F).]

**ATONIC**, adj.  $\text{A}^2\text{t}\text{'o}^2\text{n}\text{'i}^2\text{k}$ . Gr., *ἀτονός*. Lat., *atonus*, *atonicus*. Fr., *atonique*. Ger., *atonisch*, *schwach*, *schlaff*. It., *atonico*. Sp., *atónico*. Pertaining to, caused by, causing, or affected with, atony. [A, 322.]

**ATONIFICATION** (Fr.), n.  $\text{A}^3\text{-to}\text{-ni}^2\text{-fi}^2\text{-ka}^3\text{-si}^2\text{-o}^2\text{n}^2$ . The production of atony. [L, 41.]

**ATONUS** (Lat.), adj.  $\text{A}^2\text{t}(\text{a}^3\text{t})\text{'o}(\text{o}^2)\text{-nu}^2\text{s}(\text{nu}^4\text{s})$ . See **ATONIC**.

**ATONY**, n.  $\text{A}^2\text{t}\text{'o}\text{-ni}^2$ . Gr., *ἀτονία*. Lat., *atonia* (q. v. for deriv.). Fr., *atonie*. Ger., *Atonie*, *Erschlaffung*, *Schlaffheit*. It., *atonia*. Sp., *atonia*. Weakness, relaxation, lack of tone or of normal contractile power (said of muscles and of hollow muscular organs). [D, 85; L, 32.]—**A. of the uterus**. Lat., *atonia* (seu *adynamia*) *uteri*. Fr., *atonie de l'utérus*. According to Wigan, the second degree of diminished uterine action in parturition, the contractions being weak and imperfect, besides being too infre-

quent. [A, 20.] See also *Uterine INERTIA* and *PARALYSIS of the uterus*.—*Nutritive atony*. Fr., *atonie nutritive*. Dupuytren's term for atrophy. [A, 301.]

**ATOPOS, ATOPUS** (Lat.), adj's. A<sup>2</sup>t(a<sup>2</sup>t)/o(o<sup>2</sup>)-po<sup>2</sup>s, -pu<sup>2</sup>s. (pu<sup>2</sup>s). Gr., *átōpos* (from a priv., and *tópos*, a place). Out of place, strange, paradoxical (said of symptoms). [Hippocrates (A, 311).]

**ATORCULARIEN** (Fr.), adj. A<sup>2</sup>t-or-ku<sup>2</sup>-la<sup>2</sup>-ri<sup>2</sup>-a<sup>2</sup>n<sup>2</sup>. For deriv., see A<sup>2</sup> and TORCULAR. Not connected with the torcular Herophilii (said of the sinuses of the dura mater). [A, 385.]

**ATORSAXOCOTI, ATORSAXOCOTL CHICHILTIC**, n's. A West Indian fruit like a plum. [L, 119.]

**ATOYONICO EL GRANDE** (Sp.), n. A<sup>2</sup>-to-vo<sup>2</sup>-ne-ko e<sup>2</sup>l gra<sup>2</sup>n<sup>2</sup>da. A place in Mexico, where there is a hot spring. [A, 385.]

**ATOXIC**, adj. A<sup>2</sup>t-o<sup>2</sup>x<sup>2</sup>/i<sup>2</sup>k. Lat., *atoxicus* (from a priv., and *τοξικόν*, an arrow-poison). Fr., *atoxique*. Not venomous (said of serpents). [L, 42.]

**ATOYAXACOTL**, n. See MACAXOCOTILIFERA.

**ATRABILARIAN**, n. A<sup>2</sup>t-ra<sup>2</sup>-bi<sup>2</sup>l-a<sup>2</sup>-ri<sup>2</sup>-a<sup>2</sup>n. A person disposed to melancholy or to biliary derangements. [L, 56.]

**ATRABILARIOUS**, adj. A<sup>2</sup>t-ra<sup>2</sup>-bi<sup>2</sup>l-a<sup>2</sup>-ri<sup>2</sup>-u<sup>2</sup>s. See ATRABILARY.

**ATRABILARY, ATRABILIOUS**, adj's. A<sup>2</sup>t-ra<sup>2</sup>-bi<sup>2</sup>l/i<sup>2</sup>-a<sup>2</sup>-ri<sup>2</sup> -i<sup>2</sup>-u<sup>2</sup>s. Lat., *atrabiliarius, atrabiliosus*. Fr., *atrabilaire, atrabileux*. Ger., *atrabilarisch, gallsüchtig*. It., *atrabiliare*. Sp., *atrabiliar*. 1. Pertaining to, caused by, causing, or affected with, atrabils (*q. v.*). [A, 385.] 2. Pertaining to the kidneys or the supra-renal capsules or to their blood-vessels. [A, 301.]

**ATRABILIS** (Lat.), n. f. A<sup>2</sup>t(a<sup>2</sup>t)-ra<sup>2</sup>-bi<sup>2</sup>(be)/li<sup>2</sup>s. Originally written *atra* (fem. of *ater, black*) *bilis* (bile). Gr., *μέλαινα χολή*. Fr., *atrabile*. Ger., *Gallsucht*. Black bile; a black humor supposed by the ancients to be secreted by the supra-renal capsules and, when in excess, to give rise to melancholy. [K.]

**ATRABILITÄT** (Ger.), n. A<sup>2</sup>-tra<sup>2</sup>-bi<sup>2</sup>l-i<sup>2</sup>-tät'. The state of being atrabilious. [M, 7.]

**ATRACHELIA** (Lat.), n. f. sing. and n. pl. A<sup>2</sup>t(a<sup>2</sup>t)-ra<sup>2</sup>-ke-(ch<sup>2</sup>a)/i<sup>2</sup>-a<sup>2</sup>. Fr., *atrachélie* (1st def.). Ger., *Kurzhaalsigkeit* (1st def.). 1. (F. sing.) absence or abnormal shortness of the neck, *i. e.*, the absence of any constriction between the head and the body. [L, 41.] 2. (N. pl.) a division of the *Heteromera* in which there is no narrowing between the head and the corselet. [L, 121.]

**ATRACHELIUS, ATRACHELUS** (Lat.), adj's. A<sup>2</sup>t(a<sup>2</sup>t)-ra<sup>2</sup>-ke-(ch<sup>2</sup>a)/li<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s), -ke(ch<sup>2</sup>a)/lu<sup>2</sup>s(lu<sup>2</sup>s). See ATRACHELOUS.

**ATRACHELOCEPHALUS** (Lat.), adj. A<sup>2</sup>t(a<sup>2</sup>t)-ra<sup>2</sup>k(r<sup>2</sup>a<sup>2</sup>ch<sup>2</sup>)/e<sup>2</sup>l(al)/o(o<sup>2</sup>)-se<sup>2</sup>f(ke<sup>2</sup>f)/a<sup>2</sup>-lu<sup>2</sup>s(lu<sup>2</sup>s). From *ἀτραχέλιος*, having no neck, and *κεφαλή*, the head. Affected with atrachelia (1st def.); as a n., a monster so characterized. [L, 45.]

**ATRACHELOUS**, adj. A<sup>2</sup>t-ra<sup>2</sup>-ke/lu<sup>2</sup>s. Gr., *ἀτραχέλιος* (from a priv., and *ράχνη*, the neck). Lat., *atrachelus*. Fr., *atrachète*. Ger., *halslos, kurzhaalsig*. 1. Having a very short neck. 2. Having no neck (sometimes in the sense of no head—beheaded). [Galen (A, 325).]

**ATRACIUS** (Lat.), adj. A<sup>2</sup>t(a<sup>2</sup>)-ra(r<sup>2</sup>a<sup>2</sup>)/si<sup>2</sup>(ki<sup>2</sup>)-u<sup>2</sup>s(u<sup>2</sup>s). Of or pertaining to Atrax (a city of Thessaly). [B, 49.] See *Ars atracia*.

**TRACTASPIDIDÆ** (Lat.), n. f. pl. A<sup>2</sup>t(a<sup>2</sup>t)-ra<sup>2</sup>k(r<sup>2</sup>a<sup>2</sup>k)-ta<sup>2</sup>s-(ta<sup>2</sup>s)-pi<sup>2</sup>d/i<sup>2</sup>d-e(a<sup>2</sup>-e<sup>2</sup>). A family of venomous colubriform *Ophidi* having a cylindrical body, a short tail, the head short and not distinct from the body, and no teeth behind the poison-fangs. [L, 121.]

**TRACTENCHYMA** (Lat.), n. n. A<sup>2</sup>t(a<sup>2</sup>t)-ra<sup>2</sup>k(r<sup>2</sup>a<sup>2</sup>k)-te<sup>2</sup>n<sup>2</sup>/ki<sup>2</sup>(ch<sup>2</sup>u<sup>2</sup>)-ma<sup>2</sup>. Gen., *tractenchymatos* (-tis). From *ἀτρακτος*, a spindle, and *χύμα*, plastic material. A tissue of spindle-shaped cells. [Morren (L, 73).]

**TRACTOCERE** (Fr.), adj. A<sup>2</sup>-tra<sup>2</sup>k-to-se<sup>2</sup>r. From *ἀτρακτος*, a spindle, and *κέρας*, a horn. Having the antennæ spindle-shaped. [A, 385.]

**TRACTOÏDE** (Fr.), adj. A<sup>2</sup>-tra<sup>2</sup>k-to-ed. Gr., *ἀτρακτοῖδης*. Spindle-shaped. [A, 385.]

**TRACTOSOMATA** (Lat.), n. n. pl. A<sup>2</sup>t(a<sup>2</sup>t)-ra<sup>2</sup>k(r<sup>2</sup>a<sup>2</sup>k)-to(to<sup>2</sup>)-so<sup>2</sup>m(som)/a<sup>2</sup>-ta<sup>2</sup>. From *ἀτρακτος*, a spindle, and *σώμα*, the body. Fr., *tractosomes*. 1. Of Duméril, a family of fishes having the body fusiform. [L, 180.] 2. Of Blainville, all animals having the body fusiform. [L, 180.]

**TRACTOSOMATOUS**, adj. A<sup>2</sup>t-ra<sup>2</sup>k-to-so<sup>2</sup>m'a<sup>2</sup>t-u<sup>2</sup>s. Lat., *tractosomus*. Fr., *tractosome*. Having the body spindle-shaped. [L, 42.]

**TRACTOSOMI** (Lat.), n. m. pl. A<sup>2</sup>t(a<sup>2</sup>t)-ra<sup>2</sup>k(r<sup>2</sup>a<sup>2</sup>k)-to(to<sup>2</sup>)-so<sup>2</sup>-mi(me). See ATRACTOSOMATA (1st def.).

**TRACTOSOMOUS**, adj. A<sup>2</sup>t-ra<sup>2</sup>k-to-so<sup>2</sup>/mu<sup>2</sup>s. See ATRACTOSOMATOUS.

**TRACTYLE** (Fr.), n. A<sup>2</sup>-tra<sup>2</sup>k-tel. See ATRACTYLIS.

**TRACTYLATE**, n. A<sup>2</sup>-tra<sup>2</sup>k-ti<sup>2</sup>l-at. A salt of atractylic acid. [A, 385.]

**TRACTYLIC ACID**, n. A<sup>2</sup>t-ra<sup>2</sup>k-ti<sup>2</sup>l/i<sup>2</sup>k. Fr., *acide atractylique*. Ger., *Attractylsäure*. A tribasic acid, C<sub>30</sub>H<sub>14</sub>S<sub>2</sub>O<sub>18</sub>, or a hexabasic acid, C<sub>30</sub>H<sub>10</sub>S<sub>4</sub>O<sub>36</sub>, derived from the root of the *Attractylis gummifera*, colorless, odorless, astringent, and of a sweetish-bitter taste; said by some to have the properties of a glucoside, but by others only to be converted into a glucoside, *atractylin*, by saponification with baryta or potash. An isomeric form, *β a. a.*, occurs in the form of silky acicular crystals. [B, 2, 196, 244; "Proc. of the Am. Pharm. Assoc." xix, p. 285 (B); Lefranc, "Rec. de méd. de méd. . . mil." xxii, 1869, p. 137 (B).]

**TRACTYLIDEÆ** (Lat.), n. f. pl. A<sup>2</sup>t(a<sup>2</sup>t)-ra<sup>2</sup>k(r<sup>2</sup>a<sup>2</sup>k)-ti<sup>2</sup>l(tu<sup>2</sup>l)-i<sup>2</sup>d-e<sup>2</sup>-e(a<sup>2</sup>-e<sup>2</sup>). A division of composite plants (*Amphicenanthæ*)

established by Reichenbach, including *Attractylis* and some other genera. [B, 170.]

**TRACTYLIGENIN**, n. A<sup>2</sup>t-ra<sup>2</sup>k-ti<sup>2</sup>l-i<sup>2</sup>j<sup>2</sup>-e<sup>2</sup>n-i<sup>2</sup>n. Fr., *atractyligénine*. A substance produced by the decomposition of atractylin. [B, 244.]

**TRACTYLIN**, n. A<sup>2</sup>t-ra<sup>2</sup>k-ti<sup>2</sup>l-i<sup>2</sup>n. Fr., *atractylin*. Ger., *Attractylin*. A sweetish gummy substance, C<sub>30</sub>H<sub>20</sub>O<sub>16</sub>, having the properties of a glucoside, obtained by saponifying atractylic acid. By treating it with a dilute solution of potassa it is converted into atractyligenin and glucose. [B, 244.]

**TRACTYLIS** (Lat.), n. f. A<sup>2</sup>t(a<sup>2</sup>t)-ra<sup>2</sup>k(r<sup>2</sup>a<sup>2</sup>k)/ti<sup>2</sup>l(tu<sup>2</sup>l)-i<sup>2</sup>s. Gen., *atractyl'idis* (-dis). Gr., *ἀτρακτύλις, ἀτρακτύλλις*. Fr., *atractyle, atractylide*. Ger., *Spindelkraut*. Syn.: *Anactis* (Cassini). A genus of perennial or annual composite herbs established by Linneus, bearing dentate or pinnatifid leaves, frequently with spinose margins, and terminal flowers in clusters of from 1 to 4, with 2 involucres, the outer one, consisting of pinnatifid leafy scales armed with spines, separated from the inner one, which consists of spinose ovate or lanceolate scales. [B, 19.]—*A. acutis* (Desfontaines). See *A. gummifera*.—*A. flore luteo* [Park.].—*A. fusus agrestis* (Gärtner). See *CARTHAMUS lanatus*.—*A. gummifera* (Linneus). Fr., *chardonnette gommeuse, grenouillette*. Syn.: *Acarna gummifera* (Willdenow), *Carthamus gummiferus* [Lamarck], *Cirsellum gummiferum* [Lamarck], *Carlina gummifera* [Lessing]. A perennial species growing on the shores of Asia Minor and of Greece, said to be the *χαμαλέον λευκός* of Dioscorides. It contains atractylic acid, and furnishes a gum (acantho-mastic) which is used in Morocco. The root and the flower-receptacle are edible, and the leaves are used to make *amadou*. [B, 173, 180; L, 65, 77.]—*A. humilis* (Linneus). Fr., *chardon doré*. Syn.: *Cirsellum humile* (Gärtner), *Centaurea carduus* [Forskål]. A biennial species growing in France, having the same properties as *A. gummifera*. [B, 173.]—*A. lanata* [Scopoli]. See *CARTHAMUS lanatus*.—*A. lancea* (Thunberg). Syn.: *Attractylodes lancea* (seu *alba*). A Chinese and Japanese species, with an erect branching stem; lanceolate, glabrous, ciliate leaves; and white flowers; containing a resinous substance not capable of extraction with water. The root occurs in hard, contorted pieces, wrinkled and brown externally, yellowish-white within, of a strong aromatic odor and slightly sweetish, aromatic taste. A tea, said to be stomachic and tonic, is made from it. [B, 193, 214; "Proc. of the Am. Pharm. Assoc." xxiv, p. 750, and xxviii, p. 148 (B).]—*A. lutea* (C. Bauhin). See *CARTHAMUS lanatus*.—*A. ovata* (Thunberg). Syn.: *Attractylodes ovata* (seu *rubra*). The *biaku jutsu, biakou sitou, or ikeru*; a Japanese and Chinese species with an erect, simple stem, glabrous, ciliate, ovate leaves, and purplish or violet flowers. The root (*biak yit*) occurs in knotty, twisted fragments of irregular shape, about 1 inch long and  $\frac{1}{2}$  inch thick, pale-brown externally, whitish within, and speckled with yellowish-brown dots due to the presence of an oily, resinous substance like that of *A. lancea*. It is said to be used in Japan as a febrifuge, and in China as a tonic, stimulant, diuretic, and diaphoretic. [B, 193, 214; "Proc. of the Am. Pharm. Assoc." xxiv, p. 749 (B).]—*A. pilosa* [Mönnch].—*A. vera flore luteo* [J. Bauhin]. See *CARTHAMUS lanatus*.—*Herba atractylidis*. The herb of *Carthamus lanatus*. [B, 180.]

**TRACTYLODES** (Lat.), n. f. A<sup>2</sup>t(a<sup>2</sup>t)-ra<sup>2</sup>k(r<sup>2</sup>a<sup>2</sup>k)-ti<sup>2</sup>l(tu<sup>2</sup>l)-o<sup>2</sup>-dez(das). Fr., *atractylode*. A genus of mutisaceous plants, made by De Candolle to include the *Attractylis ovata* and *Attractylis lancea*, and referred by Bentham and Hooker to *Attractylis*. [B, 42, 170.]—*A. alba*.—*A. lancea*. See *TRACTYLIS lancea*.—*A. ovata*, *A. rubra*. See *TRACTYLIS ovata*.

**TRACTYLSÄURE** (Ger.), n. A<sup>2</sup>-tra<sup>2</sup>k-tu<sup>2</sup>l/zoi-re<sup>2</sup>. See ATRACTYLIC ACID.

**ATRAGENE** (Lat.), n. f. A<sup>2</sup>t(a<sup>2</sup>t)-ra<sup>2</sup>-je(ga)/ne(ma). Ger., *Alpenrebe*. 1. A name formerly applied to the *Clematis vitalba*. [B, 19.] 2. A genus of ranunculaceous plants closely related to *Clematis*, to which it is referred by Bentham and Hooker. [B, 42, 211.]—*A. alpina* [Linneus]. Ger., *Alpendoppelblume*. See *CLEMATIS alpina*.—*A. americana* (Sims). See *CLEMATIS verticillaris*.—*A. austriaca* [Scopoli]. See *CLEMATIS alpina*.—*A. flava*. A variety of *A. alpina*. [B, 173.] See *CLEMATIS alpina*.—*A. sibirica* [Linneus]. See *CLEMATIS sibirica*.—*A. vesicatoria* [Linneus]. The *Adonis* (Knowltonia) *vesicatoria*. [B, 49.]

**ATRAMENTACEOUS, ATRAMENTAL**, adj's. A<sup>2</sup>t-ra<sup>2</sup>-me<sup>2</sup>nt-a<sup>2</sup>/shu<sup>2</sup>s, -me<sup>2</sup>nt-a<sup>2</sup>l. Inky. [B, 116.]

**ATRAMENTARI** (Lat.), n. m. pl. A<sup>2</sup>t(a<sup>2</sup>t)-ra<sup>2</sup>-me<sup>2</sup>nt-a<sup>2</sup>(a<sup>2</sup>)/ri<sup>2</sup>-i(e). Fr., *atramentaires*. Of Paulet, a group of *Agarici*, comprising those which grow black on maturing. [B, 121.]

**ATRAMENTARIOUS**, adj. A<sup>2</sup>t-ra<sup>2</sup>-me<sup>2</sup>nt-a<sup>2</sup>/ri<sup>2</sup>-u<sup>2</sup>s. See ATRAMENTARIUS.

**ATRAMENTARIUS** (Lat.), adj. A<sup>2</sup>t(a<sup>2</sup>t)-ra<sup>2</sup>-me<sup>2</sup>nt-a<sup>2</sup>(a<sup>2</sup>)/ri<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). Fr., *atramentaire*. Inky, ink-colored; a specific name applied to some plants (*e. g.*, to a species of *Agaricus* which readily melts into a sort of inkly liquid). [B, 195.]

**ATRAMENTOSUS** (Lat.), adj. A<sup>2</sup>t(a<sup>2</sup>t)-ra<sup>2</sup>-me<sup>2</sup>nt-o<sup>2</sup>/su<sup>2</sup>s(su<sup>2</sup>s). See ATRAMENTARIUS.

**ATRAMENTOUS**, adj. A<sup>2</sup>t-ra<sup>2</sup>-me<sup>2</sup>nt/u<sup>2</sup>s. See ATRAMENTARIUS.

**ATRAMENTSTEIN** (Ger.), n. A<sup>2</sup>-tra<sup>2</sup>-me<sup>2</sup>nt/stin. See LAPIS atramentarius.

**ATRAMENTUM** (Lat.), n. n. A<sup>2</sup>t(a<sup>2</sup>t)-ra<sup>2</sup>-me<sup>2</sup>nt/u<sup>2</sup>m(u<sup>2</sup>m). From *ater, black*. Gr., *μέλας*. Fr., *atrament*. Ink or any black liquid. In the middle ages it often denoted the philosopher's stone. [A, 318; B, 49.]—*A. album*. White vitriol (zinc sulphate). [B, 50.]—*A. citrinum*. Colcothar. [B, 50.]—*A. hispanicum*. Vitriol. [B, 50.]—*A. liberarium*. See *A. scriptorium*.—*A. pictorium*. Ink used for painting; made of sepia, ivory, or other substances. [B.]—*A. rubrum*. Red ink. [L, 119.]—*A. scriptorium*, *A.*

**scriptorum** [Celsus]. Lit., black writing-ink; a solution of "jet-black ointment," recommended by Hippocrates to be applied to a fractured skull to aid in the detection of the line of fracture. [Nancrede (A, 63).]—**A. sutorium**. A solution of a copper salt, probably the sulphate, in water, mentioned by Pliny and Celsus, the latter of whom recommended it as a styptic; so called because it was used by shoemakers to blacken leather. [B, 45; L, 41.]

**ATRANORIC ACID**, n.  $A^2t(a^3t)-ra^3-fa^2x(fa^3x)^{i2}s$ . Gen., *atraxaxeos (-is)*. Gr., *ἀτράφαξ*. 1. The plant *Atriplex* (orach), especially the *Atriplex hortensis*. [Dioscorides (B, 180).] 2. A genus of polygonaceous shrubs of the tribe *Polygonaceae*, established by Linnaeus. [B, 134.]—**A. crassifolia** [Agardh]. The *A. spinosa*, var.  $\beta$ . [B, 214.]—**A. densiflora** [Koch]. The *A. spinosa*, var.  $\alpha$ . [B, 214.]—**A. Fischeri** [Jaub. and Spach]. The *A. spinosa*, var.  $\beta$ . [B, 214.]—**A. Karelini** [Jaub. and Spach]. The *A. spinosa*, var.  $\gamma$ . [B, 214.]—**A. Laxmanni** [Agardh]. The *A. spinosa*, var.  $\beta$ . [B, 214.]—**A. replicata**. Of Lamarck, the *A. spinosa*, var.  $\alpha$ ; of Fischer, the *A. spinosa*, var.  $\gamma$ . [B, 214.]—**A. spinosa** [Linnaeus]. Syn.: *Tragopyrum spinosum* [Presl]. A dwarf shrub growing in western Asia, often cultivated as an ornamental plant in Europe; thought to be one of the sources of Oriental manna. The var.  $\alpha$  (Linnaeus), the *A. spinosa* of Linnaeus, is found in the Caucasus and in Armenia; the var.  $\beta$  (Fischer) is found in southern Russia and in Siberia; the var.  $\gamma$  (Karelin) is found on the eastern shore of the Caspian Sea. [B, 214; L, 75.]

**ATRAPAXIS** (Lat.), n. f.  $A^2t(a^3t)-ra^3-fa^2x(fa^3x)^{i2}s(u^6s)$ . Gr., *ἀτράφαξ*. See *ATRAPAXIS* (1st def.).

**ATRATUS** (Lat.), adj.  $A^2t(a^3t)-ra^3-ra^3/tu^6s(tu^4s)$ . From *ater*, black. Blackened. [B.]

**ATRAXYLE** (Lat.), n. f.  $A^2t(a^3t)-ra^3x(ra^3x)^{i2}(u^6t)^e(a)$ . From a Greek name for the *Carthamus lanatus*. A section of the botanical genus *Centropygium*, referred by Bentham and Hooker to *Carthamus*. [B, 42, 214.]

**ATREDEORA** (Lat.), n. n. pl.  $A^2t(a^3t)-re^2d(rad)^o(o)^2-ra^3$ . See *ATRETODERA*.

**ATREMIA** (Lat.), n. f.  $A^2t(a^3t)-re(re)^2/mi^2-a^3$ . Gr., *ἀτρεμία* (from *a priv.*, and *τρέμειν*, to tremble). Properly, absence of tremor; applied by Neftel to a condition, real or fancied, occurring chiefly in women, in which they are unable to walk, stand, sit, or read, although the power of voluntary motion is not abolished, nor the intellect impaired. Abnormalities of sensibility are present, and are intensified by any attempt at movement. ["Lancet," April 21, 1883, p. 695 (D).]

**ATRESELYTRIA** (Lat.), n. f.  $A^2t(a^3t)-rez(ras)^e(e)^2-i^2t(u^6t)^{i2}-a^3$ . See *ATRELYTRIA*, and for other words in *Atres-* not here given, see the corresponding words in *Atret-*.

**ATRESIA** (Lat.), n. f.  $A^2t(a^3t)-re(ra)^2/zi^2(si)^2-a^3$ . Gr., *ἀτρεία* (from *a priv.*, and *τρέψω*, a perforation; is said, however, to be from *Atretia*, or *al-ratqa* [F. B. Stephenson, "N. Y. Med. Jour.," July 24, 1886, p. 92]). Fr., *atresie*, imperforation. Ger., *Atresie*, *Verschlossenheit*, *Verschluß*, *Verschliessung*. It., *atresia*, *chiusimento*, *imperforazione*. Sp., *atresia*, *cerramiento*, *imperforación*. Syn.: *imperforatio*. The absence or occlusion (sometimes only an excessive narrowness) of one of the natural openings or channels of the body. [A, 322, 385.]—**Ano-rectal a.**, **A. ani**. See *Imperforate anus*.—**A. ani adnata** (see *congenita*). Fr., *imperforation congénitale de l'anus*. Ger., *angeborene Aftersperre*. A congenital imperforate state of the anus. [J. G. Albertus (D, 87).]—**A. ani vaginalis**. A. of the anus with the rectum opening into the vagina. [A. Hammer (D, 87).]—**A. ani vesicalis**. A. of the anus with the rectum opening into the bladder. [L, 54.]—**A. auris**. See *ANKYLOTIA*.—**A. hymenis**. An imperforate hymen. [L, 135.]—**A. ilei**. A. of the ileum. [L, 135.]—**A. intestini duodeni**. A. of the duodenum. [L, 135.]—**A. iridis**. See *A. pupillae*.—**A. nymphaeae**. A. of the nymphaeae. Fr., *atresie de la pupille*. Ger., *Pupillensperre*. It., *a. della pupilla*. Sp., *atresia de la pupila*. An obsolete term for anterior synechia. [F.]—**A. urethrae**. A. of the urethra. [L, 135.]—**A. utero-vaginalis**. A rare condition of simultaneous a. of the uterus and vagina. [P. Müller (A, 182).]—**A. vaginae**. A. of the vagina. [L, 135.]—**A. ventriculi**. A. of the stomach. [L, 135.]—**A. vesicae**. A. of the urinary bladder. [L, 135.]—**A. vestibularis**. A. of the vaginal orifice in front of the hymen. [Eggel, "Mittheil. f. Geburtsh. u. Frauenkr.," xxxi, p. 119 (A); A, 182.]—**A. vulvae**. Fr., *atresie vulvaire*. Obliteration or extreme narrowness of the vaginal orifice. [A, 385.]

**ATRESIÉ** (Fr.), adj.  $A^3t-ra^3-zi^2-a$ . Affected with atresia. [A, 385.]

**ATRETA** (Lat.), n. f. of adj. *atretus* (*femina* understood).  $A^2t(a^3t)-re(ra)^2/a^3$ . A woman with atresia of the vaginal orifice. [A, 322.]

**ATRETELYTRIA** (Lat.), n. f.  $A^2t(a^3t)-re^2t(rat)-e^2l-i^2t(u^6t)^{i2}-a^3$ . From *ἀτρετος*, imperforate, and *ἐλντρον*, the vagina. Fr., *atrétytrie*. Breschet's term for atresia of the vagina. [L, 41, 180.]

**ATRETENTERIA** (Lat.), n. f.  $A^2t(a^3t)-re^2t(rat)-e^2n-te(te)^2/ri^2-a^3$ . From *ἀτρετος*, imperforate, and *ἐντρον*, an intestine. Fr., *atréntérie*. Breschet's term for atresia of the intestinal canal. [L, 109, 180.]

**ATRETISMUS** (Lat.), n. m.  $A^2t(a^3t)-re^2t(rat)-i^2z(i^2s)^{mu}6s(mu^6s)$ . Fr., *atréisme*. See *ATRESIA*.

**ATRETOBLEPHARIA** (Lat.), n. f.  $A^2t(a^3t)-re^2t(rat)-o(o)^2-ble^2f(a^3)^{i2}-a^3$ . From *ἀτρετος*, imperforate, and *βλεφάρων*, the eyelid. Fr., *atrétolepharie*. Breschet's term for symblepharon. [L, 109, 180.]

**ATRETOCEPHALUS** (Lat.), n. m.  $A^2t(a^3t)-re^2t(rat)-o(o)^2-se^2f(ke^2f)^{a^3-lu^6s(lu^4s)}$ . From *ἀτρετος*, imperforate, and *κεφαλή*, the head. Fr., *atrétocephale*. A monster having atresia of one or more of the openings situated on the head, such as the mouth, the nostrils, etc. [A, 385; M, 13.]

**ATRETOCORMUS** (Lat.), n. m.  $A^2t(a^3t)-re^2t(rat)-o(o)^2-ko^2rm(u^6s)^{lu^6s(lu^4s)}$ . From *ἀτρετος*, imperforate, and *κορμός*, the trunk. Fr., *atrétoforme*. A monster having atresia of one or more of the openings situated on the trunk, such as the anus, the vulva, etc. [A, 385; L, 81; M, 13.]

**ATRETOCYSLA** (Lat.), n. f.  $A^2t(a^3t)-re^2t(rat)-o(o)^2-si^2s(ku^6s)^{i2}-a^3$ . From *ἀτρετος*, imperforate, and *κύσος* (= *κύσθος*), the anus. Fr., *atrétoycsie*. Breschet's term for atresia of the anus. [L, 32, 180.]

**ATRETOCYSTIA** (Lat.), n. f.  $A^2t(a^3t)-re^2t(rat)-o(o)^2-si^2s(ku^6s)^{ti^2}-a^3$ . From *ἀτρετος*, imperforate, and *κύστις*, the bladder. Fr., *atrétoycstie*. Breschet's term for atresia of the bladder. [L, 180.]

**ATRETODERA** (Lat.), n. n. pl.  $A^2t(a^3t)-re^2t(rat)-o(o)^2-e^2r-a^3$ . From *ἀτρετος*, imperforate. A group of the tailed *Batrachia* made by S. F. Baird, characterized by gill-openings which disappear in the mature animal. [L, 304.]

**ATRETOGASTRIA** (Lat.), n. f.  $A^2t(a^3t)-re^2t(rat)-o(o)^2-ga^2s(ga^3s)^{tri^2}-a^3$ . From *ἀτρετος*, imperforate, and *γαστήρ*, the stomach. Fr., *atréto gastrie*. Breschet's term for atresia of either the cardiac or the pyloric orifice of the stomach. [L, 32, 41, 180.]

**ATRETOLÉMIA** (Lat.), n. f.  $A^2t(a^3t)-re^2t(rat)-o(o)^2-le^2m(la^3e^2m)^{i2}-a^3$ . From *ἀτρετος*, imperforate, and *λαύμος*, the gullet. Fr., *atrétolemie*. Breschet's term for atresia of the pharynx or the oesophagus. [L, 32, 41, 180.]

**ATRETOMETRIA** (Lat.), n. f.  $A^2t(a^3t)-re^2t(rat)-o(o)^2-me^2t(mat)^{ri^2}-a^3$ . From *ἀτρετος*, imperforate, and *μήτρα*, the womb. Fr., *atréto métrie*. Breschet's term for atresia of the uterus. [L, 41, 180.]

**ATRETOPSIA** (Lat.), n. f.  $A^2t(a^3t)-re^2t(rat)-o(o)^2-p(op)^{si^2}-a^3$ . From *ἀτρετος*, imperforate, and *ὤψ*, the eye. Fr., *atrétopsie*. Breschet's term for atresia of the pupil. [L, 180.] See *COECLESTIS*.

**ATRETORRHINIA** (Lat.), n. f.  $A^2t(a^3t)-re^2t(rat)-o(o)^2-ri^2n(i^2)-a^3$ . From *ἀτρετος*, imperforate, and *ῥίς*, the nose. Fr., *atréto rhinie*. Breschet's term for atresia of the nose. [L, 32, 180.]

**ATRESTOMIA** (Lat.), n. f.  $A^2t(a^3t)-re^2t(rat)-o(o)^2-sto(sto)^2-mi^2-a^3$ . From *ἀτρετος*, imperforate, and *στόμα*, the mouth. Fr., *atréto stomie*. Breschet's term for atresia of the mouth. [L, 32.]

**ATRETURETHRIA** (Lat.), n. f.  $A^2t(a^3t)-re^2t(rat)-u^2(u)^e-re(ra)^{thri^2}-a^3$ . From *ἀτρετος*, imperforate, and *ὠυρήθρα*, the urethra. Fr., *atréturethrie*. Breschet's term for atresia of the urethra. [L, 32, 180.]

**ATRETUS** (Lat.), adj.  $A^2t(a^3t)-re(ra)^2/tu^6s(tu^4s)$ . Gr., *ἀτρετος*. Fr., *atrétié*. Imperforate; as a n., a person affected with atresia. [A, 322.]

**ATRIA** (Lat.), n. n., pl. of *atrium* (q. v.).  $A^2t(a^3t)/ri^2-a^3$ .

**ATRIAL**, adj.  $A^2t/ri^2-a^3$ . Fr., *atrial*. Pertaining to an atrium. [Huxley (B, 53).]

**ATRIC ACID**, n.  $A^2t/ri^2k$ . From *atra* (f. of *ater*), the specific name of the plant from which it is obtained. Fr., *acide atrique*. Paterno's name for an acid,  $C_6H_8O_6$ , found by him in the *Lecanora atra*. [B, 244.] Cf. *ATRANORIC ACID*.

**ATRICAPILLUS** (Lat.), adj.  $A^2t(a^3t)-ri^2-ka^2p(ka^3p)^{i2}/lu^6s(lu^4s)$ . From *ater*, black, and *capillus*, a hair. Having black hair. [A, 316.]

**ATRICAUDATUS** (Lat.), adj.  $A^2t(a^3t)-ri^2-ka^2d(ka^3ud)-a(a)^3-tu^6s(tu^4s)$ . From *ater*, black, and *cauda*, a tail. Fr., *atricaudé*. Ger., *schwarzschwanzig*. Having a black tail. [L, 42, 180.]

**ATRICAULES** (Fr.), n. pl.  $A^3t-re-kol$ . A group of *Fungi* made by Paulet, comprising those of dark color and firm consistence, such as *Sclerotium*, *Hypocylon*, etc. [B, 121.]

**ATRICES** (Lat.), n. m., pl. of *atrica* (q. v.).  $A^2t(a^3t)-ri^2-sez(kas)$ . An obsolete name for condylomata of the anus. [G.] Cf. *ATRICI*.

**ATRICHE** (Lat.), n. f. pl.  $A^2t(a^3t)/ri^2k(ri^2ch)^2-e(a^3e)^2$ . From *a priv.*, and *ῥιχ*, a hair. Of Rostafinski, a section of the *Myzomycetes* (*Endosporeae*) belonging to the *Amaurosporeae*, including those in which the fruit is devoid of a capillum. [B, 236.]

**ATRICHI** (Lat.), n. m., pl.  $A^2t(a^3t)/ri^2k(ri^2ch)^2-l(e)$ . From *a priv.*, and *ῥιχ*, the hair. Of Sprengel, a division of gastromycetous *Fungi*, including *Eurotium*, *Coniosporium*, *Phragmidium*, *Puccinia*, and two or three other genera. [B, 170.]

**ATRICHIA** (Lat.), n. f.  $A^2t(a^3t)-ri^2k(ri^2ch)^2-i^2-a^3$ . Fr., *atrichie*. Ger., *Attriehe*, *Haarlosigkeit*. 1. Baldness, loss of hair. [G.] 2. A genus of mosses. [L, 41.]

**ATRICHIASIS** (Lat.), n. f.  $A^2t(a^3t)-ri^2k(ri^2ch)^2-i^2/a^3-si^2s$ . Gen., *atrichiasis* (-*asis*). See *ATRICHIA* (1st def.).

**ATRICHOME** [Piorry] (Fr.), n.  $A^3t-tri^2-ko-me$ . Falling out of the hair. [L, 82.]

**ATRICHOSES** (Lat.), n. f.  $A^2t(a^3t)-ri^2k(ri^2ch)^2-o^2-si^2s$ . Gen., *atrichos* (-*sis*). From *a priv.*, and *ῥιχ*, hairiness. A disease characterized by absence or loss of hair. In Auspitz's classification of skin diseases the atrichoses are a family of the trichoses, including the various forms of alopecia (q. v.). [G, 4.]

**ATRICHUS** (Lat.), adj.  $A^2t(a^3t)/ri^2k(ri^2ch)^2-u^2(u)^e$ . Gr., *ἀτριχος*, *ἀτριχ*. Ger., *haarlos*. Not hairy, affected with loss of hair.

**ATRICI** (Lat.), n. m. pl.  $A^2t(a^3t)/ri^2-si^2(ke)$ . An old term for certain small ulcers or fissures of the anus. [A, 322.] Cf. *ATRICES*.

**ATRICOLLIS** (Lat.), adj.  $A^2t(a^3t)-ri^2-ko^2l(i^2s)$ . From *ater*, black, and *collum*, the neck. Fr., *atricolle*. In zoology, having the neck or the corselet black. [L, 41, 180.]

**ATRICORNIS** (Lat.), adj. A<sup>2</sup>t(a<sup>3</sup>t)ri<sup>2</sup>-ko<sup>2</sup>rn<sup>1</sup>i<sup>2</sup>s. From *ater*, black, and *cornu*, a horn. Fr. *atricorne*. In zoology, having the horns or the antennæ black. [L. 41, 180.]

**ATRIGASTER** (Lat.), adj. A<sup>2</sup>t(a<sup>3</sup>t)ri<sup>2</sup>-ga<sup>2</sup>s(ga<sup>3</sup>s)'tu<sup>5</sup>r(tar). From *ater*, black, and *gaster* (γαστήρ), the belly. Fr. *atrigastre*. In zoology, having the ventral surface of the body black. [L. 109, 180.]

**ATRIOPORE**, n. A<sup>2</sup>t'ri<sup>2</sup>-o-por. For deriv., see **ATRIUM** and **PORE**. The exhalant orifice of the peribranchial chamber in the *Chordata*. [L. 210.]

**ATRIO-VENTRICULAR**, adj. A<sup>2</sup>t'ri<sup>2</sup>-o-ve<sup>2</sup>n-tri<sup>2</sup>k'u<sup>2</sup>-la<sup>3</sup>r. For deriv., see **ATRIUM** and **VENTRICLE**. Lat., *atrio-ventricularis*. See **AURICULO-VENTRICULAR**.

**ATRIPEDES** (Lat.), adj. A<sup>2</sup>t(a<sup>3</sup>t)ri<sup>2</sup>-pez(pas). From *ater*, black, and *pes*, a foot. Fr. *atripède*. In zoology, having the feet black; in botany, having the foot (or, of an agaric, the stipes) black (a specific name). [B. 1, 42, 180.]

**ATRIPLEX** (Lat.), n. m., f., and n. A<sup>2</sup>t(a<sup>3</sup>t)ri<sup>2</sup>-ple<sup>2</sup>x. Gen., *atripl'icis*. Gr., ἀτρίπλαξ. Fr., *arroche*. Ger., *Melde*. It., *atripl'ice*. An ancient name for the plant orache; of Linnaeus, a genus of chenopodiaceous herbs or shrubs with alternate, petiolate, scurfy leaves, and spikes of closely clustered, green, monoecious or dioecious flowers, the male flower bractless, the female usually with 2 bracts, which enlarge after flowering and inclose the fruit. [B. 19, 34.]—*Aqua atriplicis foetida*. A distilled water made from the *Chenopodium vulvaria*. [B. 97.]—*A. alba*. 1. Of Scopoli, a variety of *A. rosea*. 2. Of Crantz, the *Chenopodium album*. 3. In pharmacy, the *A. hortensis*. [B. 180, 214.]—*A. albicans*. 1. Of Aiton (the *Eomis albicans* [Moquin]), seu *atripl'icoides*, a species growing at the Cape of Good Hope, having an odor like that of the musk-melon. 2. Of Besser, a variety of *A. rosea*. [B. 214.]—*A. album*. See *A. hortensis*.—*A. alimus*. See *A. halimus*.—*A. ambrosioides* [Crantz].—*A. americana*.—*A. americanum*. See *CHENOPODIUM ambrosioides*.—*A. angustifolia* [Smith]. See *A. patula*.—*A. anthelmintica* [Crantz]. See *CHENOPODIUM anthelminticum*.—*A. arenaria* [Nuttall]. Syn.: *Obione arenaria* [Moquin]. The sand-orache; an annual herb growing in sandy places on the Atlantic coast of the United States. [B. 34, 214.]—*A. argentea*. 1. Of Schrader, the *A. rosea*, var.  $\beta$ . 2. Of Nuttall (the *Obione argentea*), a species growing throughout the United States west of the Mississippi River. [B. 214, 228.]—*A. astracantha* [Babington]. The *A. laciniata* [Linnaeus]. [B. 214.]—*A. axillaris* [Tenore]. The *A. rosea*. [B. 214.]—*A. besserianum* [Römer and Schultes]. The *A. rosea*, var.  $\beta$ . [B. 214.]—*A. bonus Henricus* [Crantz]. The *Chenopodium bonus Henricus*. [B. 214.]—*A. botrys* [Crantz]. The *Chenopodium botrys*. [B. 214.]—*A. californica* [Moquin]. Syn.: *Phytolacca californica* [Nuttall]. A California species. It is used as a substitute for soap, and its seeds are made into a sort of mush or bread by the Indians. ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 153 (B); B. 214.]—*A. campestris* [Koch and Ziz.]. The *A. tatarica*, var.  $\beta$  *campestris*. [B. 214.]—*A. canescens*. 1. Of Nuttall, see *A. Nuttallii*. 2. Of James, a species growing throughout the United States west of the Missouri River; used like *A. californica*. ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 153 (B); B. 214, 228.]—*A. canina*.—*A. caninum*. The *Chenopodium bonus Henricus*. [B. 180.]—*A. chenopodia foetida*. The *Chenopodium vulvaria*. [B. 200.]—*A. conduplicata*. An Australian shrub, resembling *A. hastata*, but differing from the latter in its fruit. [Von Müller, "Australas. Jour. of Pharm.," "Brit. and Colon Druggist," Jan. 8, 1887, p. 37.]—*A. confertifolia* [Watson]. Syn.: *Obione confertifolia* [Torrey]. A species growing in the western United States, from Idaho to New Mexico; used like *A. californica*. ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 153 (B); B. 228.]—*A. crassifolia* [Moquin]. A species akin to *A. patula*, growing in the Altai region and furnishing soda. [B. 46, 214.]—*A. deltoidea* [Babington]. The *A. hastata*, var.  $\alpha$  *deltoidea*. [B. 214.]—*A. diffusa* [Tenore]. The *A. laciniata*, var.  $\delta$  *diffusa*. [B. 214.]—*A. dioica* [Rafinesque]. The *A. purshiana*. [B. 214.]—*A. erecta* [Hudson]. The *A. patula*, var.  $\gamma$  *mixta*. [B. 214.]—*A. expansa* [Watson]. A species growing in Colorado, California, and New Mexico; used like *A. californica*. ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 153 (B); B. 228.]—*A. foetida*.—*A. foetidum*. See *CHENOPODIUM vulvaria*.—*A. fruticosum* [Nuttall]. See *A. Nuttallii*.—*A. gigantea* [Poiret]. The *A. hastata*. [B. 214.]—*A. glauca*. 1. Of Linnaeus, the *Obione glauca* [Moquin]; a perennial species growing on the coasts of Spain, Algeria, Egypt, and Arabia; used, in vinous infusion, for the relief of colic. [B. 46, 173.] 2. Of Crantz, the *Chenopodium glaucum*. [B. 214.]—*A. gracilis* [Nuttall]. The *A. hastata*, var.  $\gamma$ . [B. 214.]—*A. halimoides* [Rafinesque]. The *A. hastata*. [B. 214.]—*A. halimus* [Linnaeus]. Fr., *pourpier de mer*, *arroche en arbrisseau*, *soutenelle*. Ger., *Meer-melde*, *Meerportulak*. Syn.: *Chenopodium halimus* [Thunberg]. A shrub 6 feet in height, growing in sandy places in southern Europe, Syria, Africa, Chili, and New Holland. The leaves are emollient, and are eaten raw or cooked. The plant is one of those furnishing soda. [B. 173, 180.]—*A. hastata* [Linnaeus]. Fr., *gosseline*, *trâmasse*. An annual herb growing in the Atlantic United States, South America, and Europe, with an ascending or erect stem and triangular, hastate leaves varying much in shape. The var.  $\beta$  *deltoidea* (*A. deltoidea* [Babington]) grows in England, in cultivated fields. The var.  $\gamma$  *triangularis*, the var.  $\delta$  *microsperma* (having very minute seeds), the var.  $\epsilon$  *oppositifolia*, and the var.  $\xi$  *parvifolia* are also described. The plant is used for the same purposes as *A. halimus*. [B. 34, 214.]—*A. heterophylla* [Nuttall]. See *A. Nuttallii*.—*A. hortense* (Römer and Schultes). *A. hortensis* [Linnaeus]. Fr., *arroche-épinard blanche*, *arroche des jardins*, *bonne-dame*, *érole*, *arrode*, *irribble*, *fallette*. Ger., *Gartenmelde*, *Zuckermelde*, *wilder Spinat*. Garden orache, mountain spinach; an annual, erect, branching herb from 3 to 5 feet high, indigenous to Siberia, but cultivated in Europe and occasionally in America. It is supposed to be the ἀντρίπλαξ of Hippocrates and the ἀντρίπλαξ

(ἀντρίπλαξ) of Dioscorides. Var.  $\beta$  *bengalensis* (*A. bengalensis* [Lamarck]), the *bétoua du Bengal*, a Bengal variety, is somewhat reddish. The leaves are emollient and are eaten in India. Var.  $\gamma$  *rubra* (the var.  $\beta$  of Linnaeus) is of a dark blood-red color all over. Var.  $\delta$  *obtusifolia* is greenish all over. Var.  $\epsilon$  *microsperma* is green or reddish, with smaller fruit. The leaves (*herba atriplicis hortensis*, seu *sativ*, seu *albi*, seu *rubri*), which are emollient, are used as a pot-herb in place of spinach. The seeds (*semen atriplicis hortensis*, etc.) are emetic and purgative. [B. 173, 180, 214.]—*A. hortensis rubra* [Bauhin]. The *A. hortensis*, var.  $\gamma$  *rubra*. [B. 214.]—*A. incisa* [Bieb.]. The *A. laciniata*, var.  $\alpha$  *incisa*. [B. 214.]—*A. laciniata*. 1. Of Linnaeus, the *Chenopodium laciniatum* [Thunberg] (seu *sinuatum* [Thunberg], seu *pinnatum* [Hortus]); an herbaceous species growing on the coast of Europe, in North America, and in Palestine, silvery-white all over. Var.  $\alpha$  *incisa* is found in Corsica and the Caucasus; var.  $\beta$  *recurva* in Greece; var.  $\gamma$  *sinuata* in Venetia and France; var.  $\delta$  *diffusa* in Naples; var.  $\epsilon$  *turcomanica* in Turcomania; and var.  $\xi$  *integra* in France and Odessa. 2. Of Pursh, the *A. purshiana*. [B. 19, 214.]—*A. laciniata americana* [Torrey]. The *A. purshiana*. [B. 214.]—*A. latifolia* [Wahlenberg]. The *A. hastata*. [B. 214.]—*A. lentiformis*. A species growing in the western United States, used like *A. californica*. ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 153 (B).]—*A. littorale*.—*A. littoralis* [Linnaeus]. Fr., *arroche des rivages*. Ger., *Strandmelde*. Syn.: *Chenopodium littorale* [Thunberg]. The sea-orache; an annual plant growing in waste-fields and in the sand in Europe and on the shores of the great lakes in the United States. The leaves are eaten, and the plant furnishes soda. Two varieties are described: var.  $\beta$  *serrata*, with suberrate leaves; and var.  $\gamma$  *angustissima*, with linear, entire leaves. [B. 34, 46, 173, 180, 214.]—*A. marina* [Persoon]. The *A. littorale*, var.  $\beta$  *serrata*. [B. 214.]—*A. maritima*.—*A. maritimum*. 1. A variety of *A. littorale*. [B. 173.] 2. Of Crantz, the *Chenopodium maritimum*, var. *vulgaris*. [B. 214.]—*A. mexicana*.—*A. mexicanum*. See *CHENOPODIUM ambrosioides*.—*A. microsperma*. 1. Of Waldstein and Kitabel, the *A. hastata*, var.  $\delta$  *microsperma*. 2. Of the gardens, the *A. hortensis*, var.  $\epsilon$  *microsperma*. [B. 214.]—*A. Nuttallii* [Watson]. Syn.: *A. canescens* [Nuttall]. *Obione canescens* [Moquin], *Calligonum canescens* [Pursh]. A species growing in the western United States; used like *A. californica*. ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 153 (B); B. 214, 228.]—*A. oblongifolia*. 1. Of Host, the *A. hastata*, var.  $\delta$  *microsperma*. 2. Of Waldstein and Kitabel, the *A. tatarica*. [B. 214.]—*A. odora suaveolens*. See *A. odoratum*.—*A. odorata*. 1. Of Persoon, the *A. albicans*. 2. The *A. odoratum*. [B. 180, 214.]—*A. odoratum*. The *Chenopodium ambrosioides* and the *Chenopodium botrys*. [B. 180.]—*A. olida*. The *Chenopodium vulvaria*. [B. 211.]—*A. oppositifolia* [De Candolle]. The *A. hastata*, var.  $\epsilon$ . [B. 214.]—*A. patula* [Linnaeus]. A species growing in England, continental Europe, northern Africa, and the western United States. Several varieties are distinguished: var.  $\beta$  *microcarpa*; var.  $\gamma$  *mixta*, with rather an erect stem; and var.  $\delta$  *obtusifolia*. [B. 19, 214, 228.]—*A. pedunculata* [Linnaeus]. *A. pedunculatum* [Römer and Schultes]. Syn.: *Obione pedunculata* [Moquin]. An annual species growing in England and continental Europe, distinguished by the fruit being pedicellate. [B. 19.]—*A. piqueres* [Lag.]. The *A. laciniata* [Linnaeus]. [B. 214.]—*A. polysperma* [Tenore]. The *A. rosea*. [B. 214.]—*A. portulacoides* [Linnaeus]. Fr., *arroche-pourpier*. Ger., *Portulakmelde*. Syn.: *Obione portulacoides* [Moquin], *Chenopodium portulacoides* [Thunberg], *Halimus portulacoides* [Dumortier]. The sea-purslane; a shrub or perennial herb growing on the European and African coasts of the Mediterranean, on the Atlantic coast of Europe, in Syria, and in North America. The young shoots are eaten as a relish, and the whole plant furnishes soda. [B. 173, 180, 214.]—*A. Powellii* [Watson]. A species growing in Arizona and southwestern Colorado; used like *A. californica*. ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 153 (B); B. 228.]—*A. prostrata* [Bouch.]. The *A. hastata*, var.  $\gamma$ . [B. 214.]—*A. purshiana* [Moquin]. Syn.: *A. laciniata* [Pursh], *A. laciniata americana* [Torrey]. An annual herb with an ascending, angulate stem, found in North America. [B. 214.]—*A. recurva* [Dun.]. The *A. laciniata*, var.  $\beta$ . [B. 214.]—*A. rosea* [Linnaeus]. An annual herbaceous species growing in Europe, North America, Africa, Asia, and New Holland; comprising the varieties  $\beta$  *alba*, erect or procumbent, silvery-farinose;  $\gamma$  *crassifolia*, procumbent or ascending, with thick rhomboid or deltoid leaves; and  $\delta$  *parvifolia*, ascending, subfarinose, with the leaves much smaller and subovate or subrotund. The *A. rosea* of Lamarck includes the *A. tatarica*. [B. 214.]—*A. ruberrima*.—*A. rubra*.—*A. rubrum*. The *A. hortense*, var.  $\gamma$ . [B. 214.]—*A. Sackii* [Rostk. and Sch.]. The *A. hastata*, var.  $\gamma$ . [B. 214.]—*A. salicina* [Pallas]. A Siberian species, perhaps a variety of *A. littorale*. [B. 214.]—*A. salina*. Of Desvoux, the *A. littorale*. [B. 214.]—*A. sativa*.—*A. sativum*. The *A. hortense*. [B. 180.]—*A. serrata* [Hudson]. The *A. littorale*, var.  $\beta$ . [B. 214.]—*A. silvestris* [J. Bauhin]. *A. silvestris altera* [C. Bauhin]. *A. silvestris folio sinuato*, etc., *A. silvestris vulgarior sinuata* [Park.]. The *Chenopodium album*. [B. 211.]—*A. solanacea* [Linnaeus]. The *Solanum aggregatum*. [B. 214.]—*A. spectabilis* [Ehr.]. The *A. hortense*, var.  $\epsilon$ . [B. 214.]—*A. tatarica* [Linnaeus]. An annual herb found in the Altai region, in Hungary, and in Tartary. It includes a variety (var.  $\beta$  *campestris*) with narrower leaves. The leaves are eaten. [B. 173, 214.]—*A. tetrandra* [Torrey]. The *A. purshiana*. [B. 214.]—*A. thunbergianum* [Römer and Schultes]. The *A. laciniata* [Linnaeus]. [B. 214.]—*A. triangularis*. 1. Of Willdenow, the *A. hastata*, var.  $\gamma$ . 2. Of the gardens, the *A. hortensis*, var.  $\epsilon$ . [B. 214.]—*A. turcomanica* [Turczan]. The *A. laciniata*, var.  $\epsilon$ . [B. 214.]—*A. unctuosus*.—*A. unctuosum*. The *Chenopodium bonus Henricus*. [B. 180.]—*A. verticillata* [Lag.]. The *A. rosea*. [B. 214.]—*A. vulvaria* [Crantz]. The *Chenopodium vulvaria*. [B. 214.]—*Herba atriplicis alba* (seu *albi*). The herb of *A. hortense*. [B. 180.]—*Herba atriplicis americana*. The herb of *Chenopodium ambrosioides*. [B. 180.]—*Herba atriplicis*

**canine** (seu canini). The herb of *Chenopodium bonus Henricus*. [B. 180.]—**Herba atriplicis foetidi**. The herb of *Chenopodium vulvaria*. [B. 180.]—**Herba atriplicis hortensis**. The herb of *A. hortense*. [B. 180.]—**Herba atriplicis mexicanæ** (seu mexicanæ). The herb of *Chenopodium ambrosioides*. [B. 180.]—**Herba atriplicis odoratæ** (seu odorati). The herb of *Chenopodium botrys* and of *Chenopodium ambrosioides*. [B. 180.]—**Herba atriplicis olidæ** (seu olidi). The herb of *Chenopodium vulvaria*. [B. 180.]—**Herba atriplicis rubri** (seu sativi). The herb of *A. hortense*. [B. 180.]—**Herba atriplicis silvestris**. The herb of *Chenopodium rubrum*. [B. 180.]—**Herba atriplicis unctuosæ**. The herb of *Chenopodium bonus Henricus*. [B. 180.]—**Semen atriplicis albæ** (seu albi, seu hortensis, seu rubræ, seu rubri, seu sativæ, seu sativi). The seed of *A. hortense*. [B. 180.]

**ATRIplexum** (Lat.), n. n.  $A^2t(a^2t)ri^2ple^2x'u^3m(u^4m)$ . A name formerly applied to certain species of *Atriplex*, and by Reichenbach to a section of that genus. [B. 121.]

**ATRIPLICEÆ** (Lat.), n. f. pl.  $A^2t(a^2t)ri^2pli^2s(pli^2k)e^2e(a^2e^2)$ . Fr. *atriplícees*. 1. Of Necker, Jussieu (1842), and others, an order of dicotyledonous plants corresponding to the *Chenopodeæ* of other authors; divided by Reichenbach into the *Chenopodeæ*, *Anartheæ*, and *Phytolacææ*, and again into the *A.*, *Salicorniææ*, *Chenopodeææ*, and *Salsolææ*, and by Jussieu into the *Cyclobeææ* and *Spirolobæææ*. 2. Of Meyer, Endlicher, and others, a tribe of chenopodaceous plants (*Chenopodeææ*, *Cyclobeææ*, etc.) including *Atriplex*, *Diotis*, *Spinacia*, and one or two other genera, in which the seed has a double integument, a crustaceous or coriaceous testa, copious albumen, and a slender milky embryo. [B. 170, 214.]

**ATRIPLICES** [Jussieu] (Lat.), n. m., f., and n. pl.  $A^2t(a^2t)ri^2p'li^2sez(kas)$ . The *Chenopodeæ* of Ventenat. [B. 170.]

**ATRIPLICINÆ** (Lat.), n. f. pl.  $A^2t(a^2t)ri^2p-li^2si^2n(ki^2n)e^2e(a^2e^2)$ . Fr. *atriplíceines*. Of Persoon, a family of plants including *Atriplex*, *Chenopodium*, *Beta*, *Salsola*, *Anabasis*, *Anrederera*, and two other genera. [B. 170.]

**ATRIPLICOIDES** (Lat.), adj.  $A^2t(a^2t)ri^2p-li^2ko(ko^2)-i(e)^2dez(das)$ . Resembling the genus *Atriplex* (see *g.*, *Exomis* a.). [B.]

**ATRIQUE** (Fr.), adj.  $A^2t-rek$ . See *ATRICID*.

**ATRIROSTRIS** (Lat.), adj.  $A^2t(a^2t)ri^2ro^2st/ri^2s$ . From *ater*, black, and *rostrum*, the beak. Fr., *atrirostre*. Having a black beak. [L. 42.]

**ATRITARSE** (Fr.), adj.  $A^2t-re-tars$ . From *ater*, black, and *tarsus* (q. v.). Having a black tarsus. [L. 41.]

**ATRIUM** (Lat.), n. n.  $A^2t(a^2t)ri^2u^3m(u^4m)$ . Ger., *Vorhof*. 1. Lit., the hall, or entry, of a house; a dilatation, pouch, sinus, or ampulla. [A. 385.] 2. In the *Tunicata*, the cloaca into which the intestine opens. [B. 28.] 3. In many of the *Medusæ*, an enlargement of the somatic cavity situated at the base of the manubrium, from which the radiating canals proceed. [L. 193.] 4. An auricle of the heart, especially the main portion as distinguished from the appendix. [L. 142.] 5. The lower or main portion of the cavity of the tympanum, as distinguished from the attic; that part which is situated directly behind the tympanic membrane. [B.]—**A. anterius**, **A. cordis dextrum**. The right auricle of the heart. [L. 115, 175.]—**A. cordis sinistrum**. The left auricle of the heart. [L. 175.]—**A. dextrum cordis**. See *A. cordis dextrum*.—**A. genitale**. In the hermaphrodite *Planaria*, the cloaca into which the male and female organs open. [L. 121.]—**Atria mortis**. Lit., the halls of death; a term given by the ancients to those organs which are the instruments of the most important activities, and injury of which most quickly causes death; they include the heart, the lungs, and the medulla oblongata. [D. 3.]—**A. posterius** (seu *sinistrum*) **cordis**. The left auricle of the heart. [L. 115, 175.]—**A. vaginæ**. The vestibule of the vulva. [A. 182.]

**ATRIVOLVO**, n. The *Tribulus terrestris*. [B. 83.]

**ATRIX** (Lat.), n. m.  $A^2t(a^2t)ri^2x$ . Gen., *at'ricis*. Thought to be from *ἀτρίξ*, hairless. See *ATRICES*.

**ATRO-ALBUS** (Lat.), adj.  $A^2t(a^2t)ro(ro^2)-a^2l(a^2l)/bu^2s(bu^4s)$ . From *ater*, black, and *albus*, white. Black and white (a botanical species-name). [B.]

**ATROBILAIRE** (Fr.), adj.  $A^2t-ro-be-la^2r$ . See *ATRABILIOUS*.

**ATRO-CÆRULEUS** (Lat.), adj.  $A^2t(a^2t)ro(ro^2)-se^2r(ka^2e^2r)-u^3(u^4)/le^2-u^3s(u^4s)$ . From *ater*, black, and *cæruleus*, blue, azure. Ger., *schwarzblau*. Dark sky-blue. [B. 1, 81.]

**ATROCEPHALUS** (Lat.), adj.  $A^2t(a^2t)ro(ro^2)-se^2f(ke^2f)/a^2-lu^2s(lu^4s)$ . From *ater*, black, and *κεφαλή*, the head. Fr., *atrocéphale*. Having a black head. [B. 195; L. 180.]

**ATROCHA**, **ATROCHÆ** (Lat.), n's n. and f. pl.  $A^2t(a^2t)ro(ro^2)-ka^2(ch^2a^2e^2)$ . From a priv., and *τροχῆ*, a running, a course. A division of chaetopod larvae in which the larva has at first a uniform coating of cilia which, although it may subsequently disappear from certain areas, does not break up into a series of definite bands. [L. 201.]

**ATRO-CYANEUS** (Lat.), adj.  $A^2t(a^2t)ro(ro^2)-si(ku^4)-a^2n(a^2n)-e^2-u^3s(u^4s)$ . From *ater*, black, and *κύανεος*, deep-blue. Dark-blue (a botanical species-name). [B.]

**ATROGLYCERIC ACID**, n.  $A^2t'ro-gli^2s-e^2r'i^2k$ . Fr., *acide atroglycérique*. Ger., *Atroglycerinsäure*. Syn.: *a phenylglyoxypropionic acid*. A monobasic acid,  $C_9H_8O_4 = C_6H_5 - C(OH)(CO.OH) - CH_2.OH$ . ["Ber. d. dtsh. chem. Gesellsch.," xvi, 1883, p. 1291 (B); B. 221.]

**ATROGLULARIS** (Lat.), adj.  $A^2t(a^2t)ro(ro^2)-gu^2(gu^4)-la(la^2)-ri^2s$ . From *ater*, black, and *gula*, the throat. Fr., *atroglulaire*. Having a black throat (a zoological species-name). [B. 195; L. 180.]

**ATROLACTIC ACID**, n.  $A^2t'ro-la^2k'ti^2k$ . From *atropic* and *lactic* (q. v.). Fr., *acide atrolactique*. Ger., *Atrolactinsäure*. A

monobasic acid,  $C_9H_9O_3$ , or, combined with water of crystallization,  $C_9H_9O_3 + \frac{1}{2}H_2O$ . It probably has the structural composition  $CH_3 - C(C_6H_5)(OH) - CO.OH$ , or that of a phenylactic acid (hence isomeric with tropic acid), and not, as Fittig and Wurstler give it,  $C_6H_5 - CH(CH_2.OH) - CO.OH$ . ["Jahresb. . . d. reinen Chem.," 1882, p. 372 (B); B. 225.]

**ATROLACTYL**, n.  $A^2t-ro-la^2k'ti^2l$ . The radicle,  $C_9H_9O_2$ , of atrolactic acid. [B.]—**A'tropoïne**. Ger., *A'tropeïn*. Syn.: *pseudoatropine*. A tropeine derived from atrolactic acid; a base isomeric with atropine,  $C_{17}H_{23}NO_3 = C_6H_5.NO.C_9H_9O_2$ , obtained by Roth. Like atropine, it acts as a mydriatic. ["Ber. d. dtsh. chem. Gesellsch.," xv, 1882, p. 1027 (B).]

**ATRO-MARGINATUS** (Lat.), adj.  $A^2t(a^2t)ro(ro^2)-ma^2r-j'i^2n-(gi^2n)-a(a^2)/tu^2s(tu^4s)$ . From *ater*, black, and *marginare*, to inclose with a border. Fr., *atro-marginé*. Having a black margin (a species-name). [L. 41, 180.]

**ATROMIOS** (Lat.), n. m.  $A^2t(a^2t)ro(ro^2)-mo^2s$ . From a priv., and *τρώμος*, a trembling. Absence of shivering or of a thrill. [A. 322.] See *THORACATROMOS*.

**ATRONIC ACID**, n.  $A^2t-ro^2n'i^2k$ . Fr., *acide atronique*. Ger., *Atronsäure*. It., *acido atronico*. A derivative,  $C_{17}H_{14}O_2 = C_6H_5 - C(CO.OH) - CH$

||  
 $C_6H_4 - CH_2 - CH$ , of atropic acid, acting as a dibasic acid.

An isomeric form, *isatronic acid*,  $C_6H_5 - CH - CH$  is produced by the decomposition of isatropic acid. [Fittig, "Ann. d. Chem.," (B).]

**ATRONOL**, n.  $A^2t-ro^2n-o^2l$ . An oily liquid,  $C_{16}H_{14}$ , probably  $C_6H_5 - CH - CH$  ||  
 $C_6H_4 - CH_2 - CH$ , produced by heating isatropic acid. [B. 225; Fittig, "Ann. d. Chem.," (B).]

**ATROPA** (Lat.), n. f.  $A^2t(a^2t)ro(ro^2)-pa^2$ . From *ἄτροπος*, one of the *Parceæ*. Fr., *belladone*. Ger., *Tollkirsche*, *Tollkraut*. A genus of herbs of the *Solanaceæ* (according to Miers, the *Atropaceæ*), distinguished by the bell-shaped, purplish corolla formed of 5 united petals, having its 5-parted calyx and its 5 stamens adherent to the tube of the corolla. The fruit is a black, succulent berry containing several seeds and having at its base the enlarged persistent calyx. [B. 19.]—**A. acuminata** [Royle]. The *A. belladonna*. [B. 212.]—**A. arborescens**. 1. Of Linnaeus, the *Acnistus arborescens*. 2. Of Römer and Schultes, the *Acnistus Plumieri*. [B. 173, 214.] See Supplement.—**A. belladonna** [Linnaeus]. Fr., *belladone*, *belladame*, *bouton noir*, *morcelle furieuse* (ou *marine*). Ger., *Tollkirsche*, *Wolfskirsche*, *gemeines Tollkraut*, *Nachtschatten*. It., *belladonna*. Sp., *belladonna*, *belladama*, *yerbamora violenta*. Syn.: *Belladonna trichotoma* [Scopoli] (seu *laccifera* [Lamarck]), *Solanum lethale* [Volck.] (seu *melano-cerasus* [C. Bauhin]). The belladonna, deadly nightshade, common dwale; an erect perennial European herb, from 3 to 5 feet high, bearing dull-green, ovate, entire leaves having a peculiar heavy odor and a fatty feel, and solitary, axillary, dull-purplish, bell-shaped flowers on drooping stalks. The fruit is a dark, shining, many-seeded berry, resembling a cherry in shape and attached in the base of the permanent calyx. The branches, the inferior surface of the leaves, and the peduncles are pubescent. The root is carrot-shaped, branching, dirty-yellow externally, white within. The root and leaves (*radix et herba belladonnae* [seu *atropæ belladonnae*, seu *solanii furiosi* (seu *lethalis*, seu *maniaci*, seu *somniferi*)] are official as belladonna (q. v.). [B. 19.]—**Atropæ belladonnae radix**. See *Radix atropæ belladonnae*.—**A. frutescens** [Linnaeus]. See *WITHANIA frutescens*.—**A. lethalis**. See *A. belladonna*.—**A. lutescens** [Jacquin]. The *A. belladonna*. [B. 212.]—**A. mandragora** [Linnaeus]. See *MADRAGORA officinalis*.—**A. physaloides** [Linnaeus]. See *NICANDRA physaloides*.—**A. plicata** [Roth]. **A. procumbens** [Cavanilles]. The *Saracha procumbens*. [B. 180, 214.]—**A'siure** (Ger.). Atropic acid. [B.]—**A. solanæ**. See *A. arborescens*.—**Extractum atropæ belladonnae** [Fr. Cod.]. See *Extractum belladonnae alcoholicum* (1st def.).—**Extractum de radice atropæ belladonnae** [Fr. Cod.]. See *Extractum belladonnae alcoholicum* (2d def.).—**Herba atropæ belladonnae**. The leaves of *A. belladonna*. [B. 180.] See *BELLADONNA*.—**Herba atropæ mandragoræ**. The herb of *Mandragora officinalis*. [B. 180.]—**Pulvis folii atropæ belladonnae** [Fr. Cod.]. See *Poudre de belladone (feuilles)*.—**Radix atropæ belladonnae**. The root of *A. belladonna*. [B. 180.] See *BELLADONNA*.—**Radix atropæ mandragoræ**. The root of *Mandragora vernalis*. [B. 180.]

THE ATROPA BELLADONNA.  
[A. 327.]

**ATROPACEÆ** (Lat.), n. f. pl.  $A^2t(a^2t)ro(ro^2)-pa(pa^2)/se^2e(ke^2e)-e(a^2e^2)$ . Fr., *atropacées*. Ger., *Atropaceen*. An order of plants separated by Miers from the *Solanaceæ*, including the tribes *Nicotianeæ*, *Datureæ*, *Duboisieæ*, *Schizanthææ*, *Salpiglossideæ*, *Petunieæ*, *Hyoscyameæ*, *Atropææ*, *Solanandreeæ*, and *Brunsfelsieæ*. [B. 19, 170.]

**ATROPAL**, adj. A<sup>2</sup>t-ro-pa<sup>2</sup>l. Gr., *ἀτροπος* (from *a* priv., and *trépew*, to turn). Fr., *atrope*. See ORTHOTROPAL.

**ATROPE**, adj. A<sup>2</sup>trop. See ORTHOTROPAL.—**A. line**. See under LINE.

**ATROPÉ** (Fr.), adj. A<sup>2</sup>-tro-pa. Resembling the genus *Atropa*. [L. 41.]

**ATROPEÆ** (Lat.), n. f. pl. A<sup>2</sup>t(a<sup>2</sup>t)-ro(ro<sup>2</sup>)pe<sup>2</sup>-e(a<sup>2</sup>-e<sup>2</sup>). Fr., *atropées*. A division or tribe of the *Solaniceæ* (*Atropaceæ*) including the genera *Atropa*, *Nicandra*, *Cliocarpus*, *Anisodus*, *Mandragora*, and *Lycium*, according to Miers, and also, according to Reichenbach, *Lycopersicum*, *Capsicum*, and *Physalis*. [B. 170.]

**ATROPHIA** (Lat.), n. f. A<sup>2</sup>t(a<sup>2</sup>t)-ro(ro<sup>2</sup>)fi<sup>2</sup>-a<sup>2</sup>. See ATROPHY.—**A. ab alvi fluxu**. Emaciation from diarrhoea. [L. 132.]—**A. ab lactatorum**. Emaciation and diarrhoea due to weaning in infants. [Cheyne (A. 316).]—**A. a crinibus**. A wasting disease of infants ascribed to the presence of stiff hairs on the back, which prick them and prevent them from sleeping. [L. 132.]—**A. acuta jecinoris**. See *Acute yellow atrophy of the liver*.—**A. a fascino**. See *A. verminosa*.—**A. a leucorrhœa**. A. due to seminal losses in men or to leucorrhœa in women. [L. 132.]—**A. anglica**. See *A. nervosa*.—**A. a pytalismo**. A. due to excessive salivation. [L. 132.]—**A. a sanguifluxu**. A. due to continued hæmorrhages. [L. 132.]—**A. a vomitu** [Velschius]. A. due to repeated vomiting. [L. 132.]—**A. cacoehymica**. A. due to improper food. [M. 60.]—**A. cutis linearis**. See *Linear atrophy of the skin*.—**A. cutis propria**. See *Adesmosis*.—**A. facialis**. See *Facial atrophy*.—**A. facialis bilateralis**. See *Bilateral facial atrophy*.—**A. famelicorum**. A. from lack of food. [L. 83.]—**A. febrisæque**. A. consequent on a fever. [L. 132.]—**A. glandularis**. See *TABES mesenterica*.—**A. inanitorium**. A. due to excessive evacuations. [L. 83.]—**A. infantilis**. **A. infantum**. See *TABES mesenterica*.—**A. ingravescens musculorum**. See *Progressive muscular atrophy*.—**A. lateralis**. A. of one lateral half of the body. [L. 132.]—**A. linearis**. See *Progressive facial atrophy*.—**A. physiologique** (Fr.). See *Physiological atrophy*.—**A. sénile** (Fr.). See *Senile atrophy*.—**A. simple** (Fr.). See *Simple atrophy*.—**A. sympathique** (Fr.). Atrophy of one member of a pair of organs (e. g., an eye) in consequence of preceding atrophy of the other. [B. Ball (L. 87).]—**Drucka'** (Ger.). Atrophy due to pressure.—**Excentriche A.** (Ger.). See *Excentric atrophy*.—**Pädä'** (Ger.). See *Infantile atrophy*.—**Progressive Muskela'** (Ger.). See *Progressive muscular atrophy*.

**ATROPHIED**, adj. A<sup>2</sup>t-ro<sup>2</sup>fi<sup>2</sup>d. Fr., *atrophie*. Ger., *atrophisirt*. It., *atrofizzato*. Affected with or in a state of atrophy. [D.]

**ATROPHOLYSIS** (Lat.), n. f. A<sup>2</sup>t(a<sup>2</sup>t)-ro(ro<sup>2</sup>)fo<sup>2</sup>l<sup>2</sup>i<sup>2</sup>s(u<sup>2</sup>s)-i<sup>2</sup>s. Gen., *atropholys-eos* (-ol'ysis). From *ἀτροφία*, want of food, and *λύσις*, a setting loose. Fr., *atropholyse*, *dissolution atrophique*. Ger., *atrophische Auflösung*. Syn.: *solutio atrophica*. Weakness and Habbiness or ulceration from lack of nourishment. [Magendie (A. 322, 385).]

**ATROPHUS** (Lat.), adj. A<sup>2</sup>t(a<sup>2</sup>t)-ro(ro<sup>2</sup>)fu<sup>2</sup>s(fu<sup>2</sup>s). Gr., *ἀτροφος*. 1. Atrophic. 2. Not nutritious. [A. 322.]

**ATROPHY**, n. A<sup>2</sup>t-ro-fi<sup>2</sup>. Gr., *ἀτροφία* (from *a* priv., and *τρέφειν*, to nourish). Lat., *atrophia*. Fr., *atrophie*. Ger., *Atrophie*, *Darrsucht*. It., *atrofia*. Sp., *atrofia*. Defective nutrition; wasting of a tissue, an organ, a part, or the whole body; in Good's nosology, a genus of the order *Marasmus*, characterized by a pale, dry, wrinkled skin and shrunken, flabby muscles, with little or no fever. [A. 322, 385; L. 83.]—**Accidental a.** A. of a part from pressure upon it or from interference with its supply of blood. [M. 66.]—**Active a.** Fr., *atrophie active*. Ger., *active Atrophie*. It., *atrofia attiva*. A general term for those forms of a. which are due to deficient or excessive functional activity, the action of certain chemical poisons or the virus of an infectious disease, to inflammations, to high fever, or to nutritive disorders of the nervous system. [D. 3.]—**Acute yellow a. of the liver**. Lat., *atrophia acuta jecinoris*. Fr., *atrophie jaune aiguë du foie*. Ger., *acute Leberatrophie*. It., *atrofia gialla acuta del fegato*. Sp., *atrofia amarilla aguda del hígado*. A rare disease, more common in women than in men, and especially in pregnant women. After a simple jaundice of a few days or weeks' duration, about which nothing peculiar is observed, symptoms indicating disease of the nervous system suddenly set in, such as delirium, convulsions, deep coma, and dilatation of the pupils, the pulse rising to 120 or 130, but the temperature remaining low until a short time before death. It is a general disease, likened by Troussau to a pyrexia. Degeneration attacks all the glandular tissues, and, according to Virchow, is of a parenchymatous inflammatory nature. The cells of the glands become filled with granules, which are quickly followed by oily particles and drops. The disease derives its name from the yellow color of the liver and from the fact that it is usually, but not invariably, very much reduced in size. It almost always ends in death. [A. 448.] Cf. *ICTERUS gravis* and *ICTERUS gravidarum*.—**Amphiblastoid a.** Lat., *amphiblastoidatrophie*. A. of the retina. [D. 80, 90.]—**A. of the placenta**. See *PLACENTA membranacea* (3d def.).—**Bilateral facial a.** Lat., *atrophia facialis bilateralis*. A. of both sides of the face. Only one case has been recorded ("Berlin. klin. Wchnschr.," 1880, No. 31), and that occurred in a child who had been exposed to measles, but did not take that disease. [Samuel (M. 1).]—**Brown a.** Ger., *braune Atrophie*. A form of a. of the liver or the spleen observed chiefly in old people. In the liver, there is brown coloration due to pigment within the cells. In the spleen, the organ is small, dense, and reddish-brown; the capsule may be thickened and the tissue of the organ limited to trabeculae and thickened vessels. [D. 3, 4.] See also *Simple brown a.*—**Concentric a.** Ger., *concentrische Atrophie*. A form of a. of a hollow organ, like the heart, which, proceeding from without inward, leads to a diminution of the capacity of the cavities. [D. 1, 4.]—**Cruveilhier's a.** See *Progressive muscular a.*—**Cyanotic a.** Ger., *cyanotische Atrophie*. A form of a. observed in the liver, due to long-continued and extensive interference with its circulation. [D. 66.] Cf. *Red a.*—**Degenerative a.** Fr., *atrophie dégénérative*. Ger., *Degenerationsatrophie*. A. in which there is degeneration followed by absorption of the degenerated elements. [L. 49, 87.]—**Eccentric a.** Ger., *excentrische Atrophie*. A. proceeding from within outward, leading, in the case of a hollow organ, to enlargement of the cavity. [D. 4.]—**Facial a.** See *Progressive facial a.*—**Fatty a.** Lat., *atrophia lipomatosa*. Fr., *atrophie grasseuse* (ou *lipomateuse*). Ger., *Fettatrophie*. It., *atrofia lipomatosa*. Sp., *atrofia grasienta*. A. with fatty degeneration. [D. 70.]—**Fatty muscular a.** Lat., *atrophia musculorum lipomatosa*. Fr., *atrophie musculaire grasseuse* (ou *lipomateuse*). Ger., *fettige Muskelatrophie*. See *Pseudo-hypertrophic spinal paralysis*.—**General a.** Lat., *atrophia universalis*. Fr., *atrophie générale*. Ger., *allgemeine Atrophie*. Emaciation. [M.]—**Granular a.** Ger., *Granularatrophie*. A form of a. due to chronic interstitial inflammation, generally observed in the liver and the kidneys; besides the reduced size of the organs, there is an extensive formation of connective tissue, with the presence of an abundance of granular matter. [D. 4.]—**Gray a.** (of the optic papilla). A degenerative change in the optic disc in which the disc presents, on ophthalmoscopic examination, a distinctly grayish hue, different from the bluish-white or white color of simple a., with ill-defined outlines. It may result from inflammation of the retina or from disease of the central nervous system, in which the process is usually progressive, ending in more or less complete blindness. [F.]—**Hälistereie a.** A form of a. of bone; the lamellæ of the spongy tissue gradually grow thinner, but no other obvious change is to be discovered with the microscope. [Volkmann (E. 15).]—**Hemi-a.** A. limited to one lateral half of the body. See *Progressive facial a.*—**Hereditary muscular a.** A form of pseudo-hypertrophic spinal paralysis (q. v.) described by Erb. [L. 191.]—**Individual a.** Ger., *individuelle Atrophie*. Charcot's term for a. of single muscles in different parts, the adjacent muscles remaining intact: said to be pathognomonic of progressive muscular a. [Pick (M. 1).]—**Infantile a.** Lat., *atrophia infantilis* (see *infantum*). Fr., *atrophie de l'enfance*. Ger., *Pädäatrophie*, *Darrsucht der Kinder*. It., *atrofia infantile*. Sp., *atrofia infantil*. See *TABES mesenterica*.—**Infantile cerebral a.** Fr., *atrophie cérébrale de l'enfance*. A localized a. of the brain in infants; described by French writers as proceeding from a variety of processes. [D. 18.]—**Juvenile muscular a.** See *Pseudo-hypertrophic spinal paralysis*.—**Linear a.** of the skin. Lat., *atrophia cutis linearis*, *strice atrophica cutis*, *lineæ albicantes*. Fr., *atro-*

*phie linéaire de la peau.* Ger., *linearförmige Hautatrophie*. A form of a. of the cutis giving rise to stripes having the appearance of scars. In the idiopathic form, the lesions occur without obvious cause, most commonly about the nates, the hips, or the thighs, sometimes on the trunk, the neck, or the arms. The stripes are from 1 to 2 or more lines in width, curved, undulating, or irregularly broken in their course, whitish or bluish-gray, smooth, glistening, and apparently slightly depressed. In the symptomatic form, they have the same general appearance, but are most common on the abdomen, being due to over-distension of the skin by tumors, ascites, pregnancy, corpulence, etc. [G.; R. W. Taylor, "N. Y. Med. Jour.," Jan. 2, 1886, p. 1.]—**Mesenteric a.** Fr., *atrophie mésentérique*. See *TABES mesenterica*.—**Myopathic muscular a.** Muscular a. due to disease of the muscles themselves, and not to a spinal lesion. [L., 191.]—**Necrobiotic a.** Ger., *nekrobiotische Atrophie*. Numerical a. (q. v.). [D., 3.]—**Neural a.** Fr., *atrophie névrique*. A. of a nerve due, in conjunction with sclerosis, to chronic neuritis. [D., 34.]—**Neuritic a.** A. of a part due to neuritis.—**Neurotic a.** Fr., *atrophie névrotique*. Ger., *neurotische Atrophie*. A. of a part from disorder of its trophic nerves or from lack of use (e. g., the "glossy skin" produced by injury of a nerve trunk). [D., 35; Samuel (M., 1).]—**Numerical a.** That form of a. in which there is not only a diminution in the volume of the part, but also an actual decrease in the number of its elements, some of them having been destroyed. [D., 3.]—**Partial a. of the face.** Fr., *atrophie partielle de la face* [Lasègue]. See *Progressive facial a.*—**Passive a.** Ger., *passive Atrophie*. A general term for various forms of a., especially such as are due to pressure, want of nourishment, digestive and various other visceral diseases, exhausting evacuations, and certain forms of concussion. [D., 3.] Cf. *Active a.*—**Pathological a.** Fr., *atrophie pathologique*. Ger., *pathologische Atrophie*. A. due to disease, as opposed to physiological a. (q. v.). [D.]—**Physiological a.** Fr., *atrophie physiologique*. Ger., *physiologische Atrophie*. The natural wasting of an organ or structure that has fulfilled the normal period of its functional activity (e. g., that of the thymus gland). [B. Ball (L., 87).]—**Progressive facial a.** Lat., *atrophia* (seu *hemi-atrophia*) *facialis progressiva*, *nova atrophia facialis* [Bergson], *prospodysmorphism* [Bergson], *trophoneurosis facialis* [Rombertz]. Fr., *atrophie partielle de la face* [Lasègue] (ou *du tissu conjonctif*), *aplasie tamineuse progressive*. Ger., *einseitige Gesichtsatrophie*. Syn.: *partial* [Lasègue] (or *unilateral* [Moore]) a. of the face, *laminar aplasia* [Lande]. An uncommon disease characterized by progressive wasting of one side of the face, generally the left side, most commonly occurring in middle-aged persons, especially women. One or more small spots of pigmentation are first noticed; then the skin grows thin, the hairs become discolored, and the cheek falls in from loss of its fatty tissue, and after a time the bony and cartilaginous structures begin to waste. It is incurable, but not dangerous to life. It is generally attributed to an affection of the cervical sympathetic nerve, but some hold that it is due to primary a. of the subcutaneous connective tissue independently of nervous influence. There is but little paralysis of motion, and the sensibility and the secretions are not usually affected. [D., 34; Seeligmüller (M., 1).]—**Progressive muscular a.** Lat., *atrophia musculorum ingravescentis* (seu *progressiva*). Fr., *atrophie musculaire progressive*, *paralyse musculaire progressive atrophique*. Ger., *progressive Muskelatrophie*. It., *atrofia muscolare progressiva*. Sp., *atrofia muscular progresiva*. Syn.: *Cruevillier's a.*, *creeping* (or *partial*, or *local*, or *wasting*) *palsy*, *Wetherbee ail*, *atrophic paralysis*. A chronic disease characterized by progressive paralysis and wasting of the muscles, usually beginning with those of the extremities and finally producing death by implicating those of respiration. Its onset is usually preceded by fibrillary contractions (q. v.). As it advances, contractures are apt to occur. Its pathology is not definitely known; Hammond refers it to a. of the cells of the gray matter of the anterior horns of the spinal cord. Instances have been observed of a decided hereditary tendency to the disease. [D., 34.]—**Progressive nervous a.** Fr., *atrophie nerveuse progressive*. Jaccoud's term for a. of the spinal nerve roots caused by compression by minute plates of fibrous material deposited on the spinal arachnoid. It leads to complete loss of power in all the limbs, with a. and abolition of reflex excitability. [D., 34.]—**Progressive unilateral a. of the face.** See *Progressive facial a.*—**Pseudo-hypertrophic progressive muscular a.** See *Pseudo-hypertrophic spinal paralysis*.—**Pure a.** Ger., *reine Atrophie*. See *Simple a.*—**Qualitative a.** See *DEGENERATION*.—**Quantitative a.** See *Simple a.*—**Red a.** See *Cyanotic a.* and *Acute cirrhosis of the liver*.—**Sclerotic a.** A term applied to deposits of connective tissue sometimes found in the substance of the heart after attacks of myocarditis. [D., 70.]—**Senile a.** Lat., *atrophia senilis*. Fr., *atrophie sénile*. Ger., *senile Atrophie*, *Altersatrophie*. A progressive wasting of the organs and tissues in general consequent on old age. [D.]—**Serous a.** [Martini]. A lesion found in the primitive muscular fasciculi in cases of sarcoma, lipomatosis, etc., in which the roundish or oval openings are filled with serous fluid and coalesce, the intervening striated tissue disappearing. [D., 3.]—**Simple a.** Lat., *atrophia simplex*. Fr., *atrophie simple*. Ger., *einfache* (or *reine*) *Atrophie*. A simple wasting of tissue without any other pathological change. [L., 87.]—**Simple a. of the heart.** That form in which the cavities preserve their proper size as compared with one another, although the walls may undergo thinning to any extent. [D., 1.] Cf. *Simple brown a.*—**Simple brown a.** A term applied to that condition of the heart in which the muscle cells are small and contain numerous fine yellow pigment granules, but the fibres retain their normal striation. [D., 48.]—**Spinale a.** Lat., *atrophia spinalis*. See *Locomotor ATAXIA*.—**Subacute red a. of the liver.** See *Acute cirrhosis of the liver*.—**Unilateral a. of the face.** *Unilateral progressive a. of the face*. See *Progressive facial a.*—**Varicose a.** See *Cyanotic a.*—**Yellow a. of the liver.** See *Acute yellow a. of the liver*.

**ATROPHY**, v. intr. A<sup>2</sup>tro-<sup>2</sup>. Fr., *s'atrophier*. To become atrophied.

**ATROPIA** (Lat.), n. f. A<sup>2</sup>t(a<sup>2</sup>t)-ro(ro<sup>2</sup>)/pi<sup>2</sup>a<sup>2</sup>. See *ATROPINE*.—**Atropie sulphas** [Br. Ph., 1867; U. S. Ph., 1870]. See *ATROPINE sulphate*.—**Atropie valerianae**. See *ATROPINE valerianate*.—**Liquor atropie** [Br. Ph., 1867]. A solution of 4 grains of atropine in 1 fluidrachm of rectified spirit and 7 fluidrachms of water. [B., 5.]—**Liquor atropie sulphatis** [Br. Ph., 1867]. See *Liquor ATROPINÆ sulphatis*.—**Ointment of a.** See *Unguentum ATROPINÆ*.—**Solution of a.** See *Liquor atropie*.—**Solution of sulphate of a.** See *Liquor ATROPINÆ sulphatis*.—**Sulphate of a.** [Br. Ph., 1867]. See *ATROPINE sulphate*.—**Unguentum atropie** [Br. Ph., 1867]. See *Unguentum ATROPINÆ*.

**ATROPIC**, adj. A<sup>2</sup>t-ro<sup>2</sup>/p<sup>2</sup>ik. Lat., *atropicus*. Fr., *atropique*. It., *atropico*. Sp., *atropico*. Of or pertaining to the genus *Atropa* or to atropine. [B.]—**A. acid.** Lat., *acidum atropicum*. Fr., *acide atropique*. Ger., *Atropensäure*. It., *acido atropico*. Sp., *ácido atropico*. A monobasic acid, C<sub>8</sub>H<sub>9</sub>O<sub>2</sub> = CH<sub>2</sub>-C(C<sub>6</sub>H<sub>5</sub>)-CO. OH (a phenylacrylic acid), derived from tropic acid, forming colorless monoclinic tables or acicular crystals melting between 106° and 107° C. *Isotropic acid*, which has the polymeric formula

and acts as a dibasic acid, is a crystalline substance of which two varieties, *α isotropic acid* and *β isotropic acid*, are known, differing in their melting points and in their solubility. They are both derived from *α. acid* by the action of acids. [B., 4, 225; Fittig, "Ann. d. Chem.," 206 (B).]

**ATROPIDINE**, n. A<sup>2</sup>t-ro<sup>2</sup>/p<sup>2</sup>id-en. Fr., *atropidine*. Ger., *Atropidin*. A name given to the so-called light atropine (hyoscyamine). ["Proc. of the Am. Pharm. Assoc.," xxx, p. 422 (B).]

**ATROPIN** (Ger.), n. A<sup>3</sup>-tro-pen'. See *ATROPINE*.—**Aepfelsaures A.** *Atropine malate*. [B.]—**A'isirt.** See *ATROPINIZED*.—**A'isirung.** See *ATROPINIZATION*.—**A'salbe.** See *Unguentum ATROPINÆ*.—**Baldriansaures A.** *Atropine valerianate*. [B.]—**Chlorwasserstoffa.** *Chlorwasserstoffsäures A.* *Atropine hydrochloride*. [B., 207.]—**Chlorwasserstoffsäures A.** *Atropine hydrochloride*. [B., 207.]—**Essigsäures A.** *Atropine acetate*. [B.]—**Leichtes A.** See *Light atropine*.—**Pikrinsaures A.** *Atropine picrate*. [B.]—**Salpetersaures A.** *Atropine nitrate*. [B.]—**Salzsaures A.** *Atropine hydrochloride*. [B.]—**Schwefelsaures A.** *Atropine sulphate*. [B.]—**Schweres A.** See *Heavy ATROPINE*.—**Weinsaures A.** *Atropine tartrate*. [B.]

**ATROPINA** [U. S. Ph., Br. Ph., Fr. Cod., Belg. Ph., Dan. Ph., Sp. Ph., Mex. Ph.] (Lat.), n. f. A<sup>2</sup>t(a<sup>2</sup>t)-ro(ro<sup>2</sup>)-pi(pe)/na<sup>2</sup>. See *ATROPINE*.—**Atropinae salicylas.** *Atropine salicylate*. [B.]—**Atropine sulphas** [U. S. Ph., Br. Ph., Fr. Cod., Belg. Ph., Dan. Ph., Mex. Ph., Sp. Ph., 1870]. See *ATROPINE sulphate*. [B.]—**Atropinae valerianae.** *Atropine valerianate*. [B.]—**Liquor atropie sulphatis** [Br. Ph., 1867]. Syn.: *liquor atropie sulphatis* [Br. Ph., 1867]. A solution of 4 grains of atropine sulphate in a fluidounce of distilled water. [B., 5.]—**Oleatum atropine.** A mixture of 98 parts of oleic acid and 2 of atropine. [L., 63.]—**Sulfas atropine** [Fr. Cod.]. *Atropine sulphate*. [B., 113.]—**Unguentum atropine** [Br. Ph., 1867]. Syn.: *unguentum atropie* [Br. Ph., 1867]. An ointment made by dissolving 8 grains of atropine in ½ fluidrachm of rectified spirit, and mixing with an ounce of prepared lard. [B.]

**ATROPINÆ** [Miers] (Lat.), [n. f. pl. A<sup>2</sup>t(a<sup>2</sup>t)-ro(ro<sup>2</sup>)-pi(pe)/ne-(na<sup>2</sup>-e<sup>2</sup>). See *ATROPACEÆ*.

**ATROPINE**, n. A<sup>2</sup>t-ro-pen. From *Atropa* (q. v.). Lat., *atropina* [U. S. Ph., Br. Ph., Fr. Cod., Belg. Ph., Dan. Ph., Sp. Ph., Mex. Ph.], *atropinum* [Ger. Ph., Nederl. Ph., Russ. Ph., Gr. Ph.], *atrophia* [U. S. Ph., 1870; Br. Ph., 1867], *atropium*. Fr., *atropine* [Fr. Cod.], Ger., *Atropin*, *Atropin*. It., *Sp. atropina*. An alkaloid, C<sub>17</sub>H<sub>23</sub>NO<sub>3</sub>, obtained from *Atropa belladonna* and other solanaceous plants. It forms colorless acicular crystals having a bitter taste, dissolving in 600 parts of cold and in 35 parts of boiling water, and dissolving readily in alcohol and in chloroform. The symbol At is sometimes applied to it. Commercial a. is a mixture of true a. (heavy a., atropium verum, heavy daturine) and the isomeric hyoscyamine (light a., light daturine, duboisine, atropidine). [B., 5, 118; "Proc. of the Am. Pharm. Assoc.," xxx, p. 422 (B); "Jahresb. d. rein. Chem.," 1882, p. 512 (B).]—**Alcoolé d'a.** (Fr.). See *Teinture d'a.*—**Anhydro-a.** *Atropyltropine*. [B.] See under *ATROPYL*.—**A. acetate.** Fr., *acétate d'a.* Ger., *Atropinacetat*, *essigsäures Atropin*. A salt of a. and acetic acid, C<sub>17</sub>H<sub>23</sub>NO<sub>3</sub>.C<sub>2</sub>H<sub>3</sub>O<sub>2</sub>, forming very soluble nacreous prisms grouped in stars. [B., 2, 196.]—**A. chloroaurate.** Fr., *chloroaurate d'a.* Ger., *chlorwasserstoffsäures Atropingoldchlorid*. A golden-yellow crystalline mass, C<sub>17</sub>H<sub>23</sub>NO<sub>3</sub>.HCl.AuCl<sub>3</sub>, soluble with difficulty in water, formed by the action of trichloride of gold on a hydrochloride. [A., 1; B., 196.]—**A. chloroplatinate.** See *A. platinichloride*.—**A. conjunctivitis.** See under *CONJUNCTIVITIS*.—**A. hydrochlorate.** A. *hydrochloride*. Fr., *chlorhydrate d'a.* Ger., *Chlorwasserstoffatropin*, *salzsaures Atropin*. A compound of a. and hydrochloric acid, C<sub>17</sub>H<sub>23</sub>NO<sub>3</sub>.HCl, crystallizing in tufts. [Geiger (A., 1); B.]—**A. isovalerate.** See *A. valerianate*.—**A. malate.** Fr., *malate d'a.* Ger., *äpfelsaures Atropin*. A salt of a. and malic acid; the form in which a. appears to exist in the *Atropa belladonna*. [B., 8.]—**A. nitrate.** Fr., *azotate d'a.* Ger., *Atropinnitrat*, *salpetersaures Atropin*. A salt of a. and nitric acid; a syrupy, deliquescent mass. [A., 1.]—**A. picrate.** Fr., *picrate d'a.* Ger., *Atropinpicrat*, *pikrinsaures Atropin*. A yellow pulverulent precipitate compounded of a. and picric acid. [A., 1; B.]—**A. platinichloride.** Fr., *platinichlorure d'a.* Ger., *Atropinplatinchlorid*. A compound of a. hydrochloride and platinic chloride, (C<sub>17</sub>H<sub>23</sub>NO<sub>3</sub>.HCl)<sub>2</sub>.PtCl<sub>4</sub>. [B., 207.]—**A. salicylate.** Lat., *atropinae salicylas*. Fr., *salicylate a.* Ger., *salicylsäures Atropin*. A salt of a. and salicylic acid, an uncrystallizable, colloidal mass, C<sub>17</sub>H<sub>23</sub>NO<sub>3</sub>.C<sub>7</sub>H<sub>5</sub>O<sub>3</sub>, obtained by dissolving 289 parts of a. and 138 of salicylic acid in an excess of water, and evaporating. [B., 81.]—**A. santionate.** A compound of a. and santonic acid; recommended as a mydriatic, being said to be absolutely uniritant

ing and to resemble homatropine in its action, 1 drop of a 1-to-2,000 solution causing dilatation of the pupil which persists for nearly twenty-four hours. [Bombelon, "Pharm. Ztg." April, 1886; "Therap. Gaz." June, 1886, p. 409; "N. Y. Med. Jour." July 10, 1886, p. 56.]—**A. sulphate.** Lat., *atropine sulphas* [U. S. Ph., Br. Ph.], *atropine sulphas* [U. S. Ph., 1870; Br. Ph., 1867], *sulfas atropine* [Fr. Cod.], *atropinum sulfuricum* (Ger. Ph., Austr. Ph., Hung. Ph., Swiss Ph., Russ. Ph., Gr. Ph.), *sulphas atropini* [Netherl. Ph.], *sulphas atropicus* [Dan. Ph., Finn. Ph., Norweg. Ph., Swed. Ph.], *Fr., sulfate d'a.* [Fr. Cod.], *Ger., Atropinsulfat, schwefelsaures Atropin.* It., *solfato d'atropina.* Sp., *sulfato atropico* [Sp. Ph.] (*de atropina*). A salt of a. and sulphuric acid,  $(C_{17}H_{23}NO_3)_2 \cdot H_2SO_4$ , a white crystalline substance having a neutral reaction and a very bitter taste, soluble in about half its weight of water and in 6 or 7 parts of alcohol. It is the salt commonly employed in medicine, being used in ophthalmic practice to dilate the pupil, paralyze the muscle of accommodation, allay inflammation in the cornea and iris, subdue pain in various inflammatory affections of the eye, etc. [A. 1; B. 5; F.] See also **BELLADONNA**.—**A. tartrate.** *Fr., tartrate d'a.* *Ger., Atropintartrat, weinsaures Atropin.* It., *tartrato di atropina.* Sp., *tartrato de atropina.* A salt of a. and tartaric acid; a syrupy mass. [B. 2.]—**A. valeriate.** **A. valerianate.** Lat., *valeras atropinus* [Fr. Cod.], *valerianas atropicus* [Finn. Ph., Swed. Ph.], *atropinum valerianicum* [Russ. Ph., Gr. Ph.], *Fr., valerianate d'a.* [Fr. Cod.], *Ger., baldriansaures Atropin.* It., *valerianato di atropina.* Sp., *valerianato atropico* [Sp. Ph.] (*de atropina*). A salt of a. and valerianic acid,  $C_{17}H_{23}NO_3 \cdot C_6H_5O_2$ , occurring under the form of minute white crystals soluble in water. [B. 10.] See also **VALERIANAS atropicus saccharatus**.—**Azotate d'a.** (Fr.). See **A. nitrate**.—**Chlorhydrate d'a.** (Fr.). See **A. hydrochloride**.—**English a.** See **ATROPINUM usu anglico paratum**.—**Gouttes d'a.** (Fr.). See **Teinture d'a.**—**Graanules d'a.** [Fr. Cod.] (Fr.). Granules made of sugar of milk, gum arabic, honey, and water, together with such an amount of a. sulphate as the prescriber may direct. [B. 113.]—**Heavy a.** *Ger., schweres Atropin.* True a. [B.] See under **A.**—**Light a.** *Ger., leichtes Atropin.* Hyoscyamine. [B.] See under **A.**—**Ointment of a.** See **Unguentum atropinæ**.—**Oleate of a.** See **Oleatum atropinæ**.—**Pommade d'a.** (Fr.). See **Unguentum atropinæ**.—**Solution of a.** See **Liquor atropinæ**.—**Solution of a. sulphate.** See **Liquor atropinæ sulphatis**.—**Teinture d'a.** (Fr.). A solution of 1 part of a. sulphate in 40 parts of dilute alcohol. [B. 92.]—**Valerate d'a.** [Fr. Cod.] (Fr.). See **A. valerianate**.

**ATROPINEÆ** (Lat.), n. f. pl.  $A^{2t}(a^{3t})\text{-ro(ro}^2)\text{-pi}^2\text{-e}^2\text{-a}^2\text{-e}^2$ . Fr., *atropinées*. Ger., *Atropineen*. Of Duval, a division of the *Solanaceæ* including *Atropa*, *Mandragora*, and several other genera. [B. 170, 214.]

**ATROPINIZATION**, n.  $A^{2t}/\text{ro}^2\text{-pi}^2\text{-n}^2\text{-i}^2\text{-z}^2\text{-a}^2\text{-shu}^2\text{-n}$ . Fr., *atropinisation*. Ger., *Atropinisierung*. The act or process of bringing the organism, or a part of it, under the influence of atropine. [B.]

**ATROPINIZED**, adj.  $A^{2t}/\text{ro}^2\text{-pi}^2\text{-n}^2\text{-izd}$ . Fr., *atropinisé*. Ger., *atropinisirt*. Treated or poisoned with atropine, or brought under its influence. [B.]

**ATROPINUM** [Ger. Ph., Netherl. Ph., Russ. Ph., Gr. Ph.] (Lat.), n. n.  $A^{2t}(a^{3t})\text{-ro(ro}^2)\text{-pi}^2\text{(pe}^2)\text{-nu}^2\text{(nu}^2\text{m}^2)$ . See **ATROPINE**.—**A. hydrochloricum.** See **ATROPINE hydrochloride**.—**A. purum.** See **ATROPINE**.—**A. salicylicum.** See **ATROPINE salicylate**.—**A. sulfuricum** [Ger. Ph., Austr. Ph., Hung. Ph., Swiss Ph., Russ. Ph., Gr. Ph.]. See **ATROPINE sulphate**.—**A. sulfuricum album neutrale crystallisatum.** Pure white crystalline sulphate of atropine. [Merck, "Dtsch. Med.-Ztg." Feb. 11, 1886, p. 137.]—**A. usu anglico paratum.** The so-called "English atropine," made (mostly in Germany) for the English market. [Merck, l. c.]—**A. valerianicum** [Russ. Ph., Gr. Ph.]. See **ATROPINE valerianate**.—**Liquor atropini.** See **Liquor atropinæ**.—**Liquor atropini sulfurici.** See **Liquor atropinæ sulphatis**.—**Sulphas atropini** [Netherl. Ph.]. See **ATROPINE sulphate**.—**Unguentum atropini.** See **Unguentum atropinæ**.

**ATROPINUS** (Lat.), adj.  $A^{2t}(a^{3t})\text{-ro(ro}^2)\text{-pi}^2\text{(pe}^2)\text{-nu}^2\text{(nu}^2\text{s}^2)$ . Of or pertaining to the genus *Atropa* (see **ATROPINÆ**) or to atropine (see **VALERAS a.**). [B.]

**ATROPION** (Fr.), n.  $A^{3t}\text{-tro-pe-o}^2\text{-n}^2$ . See **ATROPINE**.

**ATROPIS** (Lat.), n. f.  $A^{2t}(a^{3t})\text{-ro(ro}^2)\text{-pi}^2\text{-s}$ . Trinius's name for a section of the botanical genus *Poa* (= *Puccinellia* [Parlatore]), now referred to *Glyceria*. [B. 42.]—**A. californica.** The squirrel-grass; a California species used as fodder. ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 604 (B).]

**ATROPISM**, n.  $A^{2t}/\text{ro}^2\text{-pi}^2\text{-zm}$ . Fr., *atropisme*. Poisoning with atropine or with belladonna. [A. 385; L. 44.]

**ATROPIUM** (Lat.), n. n.  $A^{2t}(a^{3t})\text{-ro(ro}^2)\text{-pi}^2\text{-u}^2\text{(u}^2\text{m}^2)$ . Atropine. [B. 196.]—**A. verum.** True (heavy) atropine. ["Proc. of the Am. Pharm. Assoc.," xxx, p. 422 (B).]

**ATROPIVORUS** (Lat.), adj.  $A^{2t}(a^{3t})\text{-ro(ro}^2)\text{-pi}^2\text{-vo}^2\text{(wo}^2)\text{-ru}^2\text{(ru}^2\text{s}^2)$ . From *atropos* (a species-name), and *vorare*, to devour. Fr., *atropivore*. Feeding on the larvæ of the *Sphinx atropos* (said of dipterous insects). [L. 41, 116, 180.]

**ATROPOIDES** (Lat.), adj.  $A^{2t}(a^{3t})\text{-ro(ro}^2)\text{-po}^2\text{(po}^2)\text{-e}^2\text{(e}^2\text{dez}^2)$ . (das). From *Atropos* (see **ATROPA**), and *eidos*, resemblance. Ger., *toltkirschenartig*. Resembling the genus *Atropa* (a botanical species-name). [B. 180.]

**ATROPOUS**, adj.  $A^{2t}/\text{ro}^2\text{-pu}^2\text{-s}$ . From *ἀτροπος*, not to be turned. See **ORTHOPODAL**.

**ATROPTERUS** (Lat.), adj.  $A^{2t}(a^{3t})\text{-ro}^2\text{-p}^2\text{-te}^2\text{-r}^2\text{-u}^2\text{(u}^2\text{s}^2)$ . From *ater*, black, and *πτερόν*, a wing. Fr., *atroptère*. Ger., *schwarzflügelicht*. Having black wings. [L. 109, 180.]

**ATROPUNCTUS** (Lat.), adj.  $A^{2t}(a^{3t})\text{-ro(ro}^2)\text{-pu}^2\text{(nk}^2)\text{-tu}^2\text{(tu}^2\text{s}^2)$ . (tu)s. From *ater*, black, and *pungere*, to prick in. Dotted with black points (a botanical species-name). [B.]

**ATROPURPUREUS** (Lat.), adj.  $A^{2t}(a^{3t})\text{-ro(ro}^2)\text{-pu}^2\text{(pur}^2)\text{-ru}^2\text{(ru}^2\text{re}^2\text{-u}^2\text{s}^2)$ . From *ater*, black, and *purpureus*, purple. Blackish-purple (a botanical descriptive and species name). [B. 74, 121.]

**ATROPYL**, n.  $A^{2t}/\text{ro}^2\text{-pi}^2\text{-l}$ . The radicle  $C_9H_7O_2$ , found in atropic acid. [B.]—**A'tropeine.** Ger., *Atropyltropin*. Syn.: *anhydro-atropine*. A monacid base,  $C_7H_{11}NO_2 = C_8H_{14}NO \cdot C_9H_7O_2$ , obtainable as an oily liquid. [Ladenberg, "Ber. d. dtisch. chem. Gesellsch.," xiii, 1880, p. 1085 (B).]

**ATROBUBENS, ATORUFUS** (Lat.), adj's.  $A^{2t}(a^{3t})\text{-ro(ro}^2)\text{-ru}^2\text{(ru}^2\text{be}^2\text{nz}^2)\text{(bans)}$ ,  $-\text{fu}^2\text{(fu}^2\text{s}^2)$ . From *ater*, black, and *rubere*, to be red, or *rufus*, red. Of a dark-reddish color (botanical descriptive and species names). [B. 74, 121.]

**ATROSANGUINEUS** (Lat.), adj.  $A^{2t}(a^{3t})\text{-ro-sa}^2\text{(n}^2\text{sa}^2\text{n}^2)\text{-gw}^2\text{(n}^2\text{e}^2\text{-u}^2\text{s}^2)$ . From *ater*, black, and *sanguineus*, blood-red. Of a dark blood-red color. [B. 121.]

**ATROSIA** (Lat.), n. f.  $A^{2t}(a^{3t})\text{-ro-si}^2\text{-a}^2$ . See **ATROSIN**.

**ATROSIN**, n.  $A^{2t}/\text{ro-si}^2\text{-n}$ . Fr., *atrosine*. A red coloring matter found in the *Atropa belladonna*. [B. 10, 14.]

**ATROSTOMUS** (Lat.), adj.  $A^{2t}(a^{3t})\text{-ro}^2\text{-s}^2\text{(to}^2)\text{-mu}^2\text{(mu}^2\text{s}^2)$ . From *ater*, black, and *στομα*, the mouth. Fr., *atrostome*. Ger., *schwarzmäundig*. In zoology, having a black mouth. [L. 103.]

**ATROTOMENTOSUS** (Lat.), adj.  $A^{2t}(a^{3t})\text{-ro(ro}^2)\text{-to}^2\text{(to}^2)\text{-me}^2\text{(nt}^2\text{-o}^2\text{su}^2\text{s}^2)$ . From *ater*, black, and *tomentum*, stuffing (such as hair, feathers, etc.). Dark-colored and downy. [B. 74.]

**ATROVIPARE** (Fr.), adj.  $A^{2t}\text{-ro-ve-pa}^2\text{-r}$ . From *ater*, black, *ovum*, an egg, and *parire*, to lay. Laying brown eggs. [L. 41.]

**ATROVIRENS, ATROVIRIDIS** (Lat.), adj's.  $A^{2t}(a^{3t})\text{-ro(ro}^2)\text{-vi}^2\text{(we}^2\text{re}^2\text{nz}^2)$  (rans),  $-\text{vi}^2\text{(r}^2\text{wi}^2\text{r}^2)\text{-i}^2\text{d}^2\text{-is}$ . From *ater*, black, and *virere*, to be green, or *viridis*, green. Ger., *schwarzgrün*. Dark green (botanical descriptive and species names). [B. 74, 121.]

**ATROZOPHYTUM** (Lat.), n. n.  $A^{2t}(a^{3t})\text{-ro(ro}^2)\text{-zo}^2\text{(zof}^2)\text{-i}^2\text{(u}^2\text{b}^2\text{-u}^2\text{m}^2)$ . See **ATROZOPHYTUM**.

**ATRYPTODONTOPHOLIDOPHIDES** (Lat.), n. m. pl.  $A^{2t}(a^{3t})\text{-ri}^2\text{(p}^2\text{ru}^2\text{p}^2)\text{''''to}^2\text{(to}^2)\text{-do}^2\text{(nt}^2)\text{''''o}^2\text{(o}^2\text{)}\text{-i}^2\text{(d}^2\text{-e}^2\text{z}^2)$ . (as). From a priv., *τρῦπᾶν*, to pierce, *δόντις*, a tooth, *φοῖς*, a reptile's scale, and *ὄφις*, a serpent. A family of reptiles having scales, but without venomous fangs. [J. A. Ritgen (L. 180).]

**ATSCHI**, n. 1. See **ACHAR**. 2. The *Capsicum annum*. [B. 121.]

**ATSCHIER** (Ger.), n.  $A^{3t}/\text{sher}$ . See **ATS HIER**.

**ATS HIER** (Bengal.), n. An East Indian poison derived from a species of *Strychnos*. [A. 259; B. 121.]

**ATSIAR**, n. See **ACHAR**.

**ATTA** (Lat.), n. m.  $A^{2t}(a^{3t})\text{-ta}^2$ . Perhaps from *ἄττειν* (= *ἀίσσω*), to glide. An ancient name for a person who, on account of some trouble with the legs or feet, walked without bringing the heel to the ground. [Festus (A. 312, 325).]

**ATTA** (Lat.), n. f.  $A^{2t}(a^{3t})\text{-ta}^2$ . Of Martius, a section of the botanical genus *Anona*, characterized by the absence of interior petals or by their being small and scale-like. [B. 121.]

**ATTACHE** (Fr.), n.  $A^{3t}\text{-ta}^2\text{-sh}$ . A portion of bone to which a tendon, a ligament, or the like, is attached. [A. 385.]

**ATTACHMENT**, n.  $A^{2t}\text{-ta}^2\text{ch}^2\text{-me}^2\text{-nt}$ . Fr., *attachement*. Ger., *Zuneigung*. It., *attaccamento*. Sp., *afcción*. According to Gall, a cerebral trait having its seat near that of philoprogenitiveness, leading the individual to become fond of certain other individuals or of certain localities. [A. 301.]

**ATTACK**, n.  $A^{2t}\text{-ta}^2\text{k}^2$ . Gr., *εἰσβολή*. Lat., *insultus*. Fr., *attaque*. Ger., *Attoke, Anfall, Angrif*. It., *attacco*. Sp., *ataque*. The onset of a disease; an individual illness; a paroxysm or outbreak of a constitutional or recurrent disease. [A. 385.]

**ATTAGAR**, n. An alchemical name for a stone or mineral. [B. 50.]

**ATTAGAS, ATTAGEN, ATTAGENA** (Lat.), n's m., m., and f.  $A^{2t}(a^{3t})\text{-ta}^2\text{-ga}^2\text{(ga}^2\text{s}^2)$ ,  $-\text{je}^2\text{(n}^2\text{gan}^2)$ ,  $a^{2t}(a^{3t})\text{-ta}^2\text{-je}^2\text{(ga}^2\text{na}^2)$ . Gen., *at'tage, attage'nis, -ge'nie*. Gr., *ἄτταγας, ἄτταγνῆ*. Ancient names for a game bird of the grouse kind, supposed to have been the hazel-hen, or heath-cock (*Tetrao bonasia* [Linnaeus]; Fr., *franco-lin*; Ger., *Haselhuhn*), esteemed a great delicacy and used also in medicine. [A. 311, 312, 322, 325, 385.]

**ATTAGENUS** (Lat.), n. m.  $A^{2t}(a^{3t})\text{-ta}^2\text{-je}^2\text{(ga}^2\text{nu}^2\text{s}^2)$ . Fr., *attagène*. A genus of coleopterous insects, the larvæ of many species of which prey upon dried animal substances. [Latreille (L. 49).]

**ATTAINT**, n.  $A^{2t}\text{-tant}^2$ . Fr., *atteinte*. An injury of a horse's leg caused by over-reaching. [A. 385; White (L. 56).]

**ATTALEA** (Lat.), n. f.  $A^{2t}(a^{3t})\text{-ta}^2\text{(ta}^2\text{y}^2)\text{-le}^2\text{-a}^2$ . Fr., *attalée*. A genus of palm-trees of the tribe *Coccothæ*, subtribe *Attaleæ*, established by Humboldt and Bonpland, consisting of trees of moderate height, with a thick, irregularly ringed stem, large feathery leaves, yellow flowers, and an ovate or elliptical fruit with a fibrous-woody cortex and 3 edible seeds. [B. 19, 49.]—**A. Cohune** [Martius]. A Honduras species, growing about 40 feet high. A sort of wine is made from the juice of the stem, and the nuts (coihoun-nuts) furnish a fatty matter which can be substituted for cocoa-nut oil. [B. 19, 49.]—**A. compta** [Martius]. The Pindova palm, a Brazilian species having an edible fruit. [B. 19, 173.]—**A. excelsa**. A species the nuts of which are used like those of *A. speciosa*. [B. 19.]—**A. funifera** [Martius]. The piassata palm (chiqui-chiqui, *piassaba*); a Brazilian tree from 20 to 30 feet high, with very long leaves, from the base of the petioles of which, and of the spathe, a very strong, durable fibre (monkey-grass) is obtained. The nuts (coquillan-nuts) are very hard and are turned into small articles such as knobs. [A. 327; B. 75, 173.]—**A. speciosa** [Martius]. A species

furnishing nuts which are burned in order to dry the juice of the caoutchouc-tree (*Siphonia elastica*). [B, 19, 180.]

THE ATTALEA FUNIFERA. [A, 327.]

**ATTALEÆ** (Lat.), n. f. pl. A<sup>2</sup>t(a<sup>3</sup>t)-ta(ta<sup>3</sup>)-le(lē<sup>2</sup>)e<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). A subtribe of coccineous palms including the genus *Attalea*. [B, 245.]

**ATTALEH**, n. A Barbary name for a tree that furnishes a variety of gum arabic known as Barbary gum. [Jackson (A, 308).]

**ATTALÉRIE** (Fr.), n. A<sup>3</sup>t-ta<sup>3</sup>-la-re. See **ATALERRIE**.

**ATTALICUM** (Lat.), n. n. A<sup>2</sup>t(a<sup>3</sup>t)-ta<sup>3</sup>-(ta<sup>3</sup>)i<sup>2</sup>k-u<sup>3</sup>m(u<sup>4</sup>m). Gr., ἀτταλικόν. See **ATTALUS**.

**ATTALO**, n. See **ANNATTO**.

**ATTALUS** (Lat.), n. m. A<sup>2</sup>t(a<sup>3</sup>t)/ta<sup>3</sup>-lu<sup>3</sup>s(lu<sup>4</sup>s). Gr., ἄτταλος. A name applied by Galen to a certain medicament. [A, 325.]

**ATTANCOURT** (Fr.), n. A<sup>3</sup>t-ta<sup>3</sup>-n<sup>2</sup>-kur. A village in the department of the Haute-Marne, France, where there is a chalybeate spring. [L, 105.]

**ATTAQUE** (Fr.), n. A<sup>3</sup>t-ta<sup>3</sup>k. See **ATTACK**.—A's de clownisme. See **HYSTERO-EPILEPSY**.—A's démoniaques. The paroxysms of persons who fancy themselves possessed by an evil spirit. [Charcot (M, 1).]—A. de nerfs. A nervous paroxysm characterized by cerebral excitement with disordered and grotesque muscular movements. [A, 385.]

**ATTAR**, n. O<sup>2</sup>t-ta<sup>3</sup>r. From an Ar. word meaning perfume. An Oriental name for the essential oil of roses. [A, 250; B, 2.] See under **ROSE**.—A. ghul, A. gul, A. of roses. See **A**.

**ATTARUSCHA** (Sancr.), n. The *Justicia adhatoda*. [L, 87.]

**ATTCHAR**, n. See **ACHAR**.

**ATTE** (Fr.), n. A<sup>3</sup>t. The fruit of the *Anona squamosa*. [B, 173.]

**ATTEI** (Tamil), n. The leech. [A, 250.]

**ATTEINTE** (Fr.), n. A<sup>3</sup>t-ta<sup>3</sup>nt. 1. An attack, especially a mild one. [L, 111.] 2. A lesion. [A, 385.] 3. See **ATTAINTE**.

**ATTELABUS** (Lat.), n. m. A<sup>2</sup>t(a<sup>3</sup>t)-te<sup>2</sup>l/a<sup>3</sup>-bu<sup>3</sup>s(bu<sup>4</sup>s). Gr., ἀτταλαβός. An ancient name for a sort of small locust without wings. [Pliny (A, 318).]

**ATTELLE** (Fr.), n. A<sup>3</sup>t-te<sup>2</sup>l. A splint. [A, 385.]

**ATTENTAT** (Fr.), n. A<sup>3</sup>t-ta<sup>3</sup>n<sup>2</sup>-ta<sup>3</sup>. An attempt at a criminal act. [A, 300.]—A. à la pudeur. An indecent assault or attempt upon a woman or a child. [L, 42.]—A. aux mœurs. An indecent act committed in public. [L, 49.]

**ATTENUANT**, adj. A<sup>2</sup>t-te<sup>2</sup>n<sup>2</sup>-u<sup>2</sup>-a<sup>2</sup>nt. Gr., λεπνίνων. Lat., attenuans (pres. partic. of *attenuare*, to weaken). Fr., atténuant. Ger., vermindern (1st def.). It., attenuante. Sp., atenuante. 1. Having the effect of thinning the blood or the other humors. [A, 385; B, 117.] 2. Diminishing the effects of an agent. [A, 385.] 3. As a n., an agent producing either of those effects

**ATTENUATE**, **ATTENUATED**, adj's. A<sup>2</sup>t-te<sup>2</sup>n<sup>2</sup>-u<sup>2</sup>-at, -at-e<sup>2</sup>d. Lat., attenuatus. Fr., atténué, aminci. Ger., verdünnt. It., attenuato, assottigliato. Sp., atenuado. 1. In botany, gradually diminishing in size. [B, 1.] 2. Diluted or finely divided. [L, 41.] 3. Reduced in potency (said particularly of viruses). [J. Guérin, 1803 (A, 385).] 4. Lean, spare. [Pliny (A, 318).]

**ATTENUATION**, n. A<sup>2</sup>t-te<sup>2</sup>n<sup>2</sup>-u<sup>2</sup>-a<sup>2</sup>shu<sup>3</sup>n. Gr., λεπνισμός, λεπνίνσις, λεπτοτομήσις. Lat., attenuatio. Fr., atténuation, amoindrissement. Ger., Verdünnung. It., attenuazione, snuinità. Sp., atenuación. 1. The division of a substance into the finest particles possible. [L, 41.] 2. Dilution. 3. The state of being lean, or the process of losing flesh. [A, 385.] 4. A system of dietetic and medicinal treatment for the purpose of reducing corpulence. [A, 385.] 5. A process of diminishing the virulence of a pathogenic organism by certain methods of cultivation or inoculation. [B.] See **ATTENUATED VIRUS**.

**ATTENUATO-ACUATE**, adj. A<sup>2</sup>t-te<sup>2</sup>n<sup>2</sup>-u<sup>2</sup>-a<sup>2</sup>'to-a<sup>2</sup>k<sup>2</sup>-u<sup>2</sup>-at. Tapering gradually from a hemispherical base to an acute apex. [L, 232.]

**ATTENUATO-CLAVATE**, adj. A<sup>2</sup>t-te<sup>2</sup>n<sup>2</sup>-u<sup>2</sup>-a<sup>2</sup>'to-klav<sup>2</sup>/at. Attenuated at one end and clavate at the other. [L, 232.]

**ATTENUATO-CYLINDRICAL**, adj. A<sup>2</sup>t-te<sup>2</sup>n<sup>2</sup>-u<sup>2</sup>-a<sup>2</sup>'to-si<sup>2</sup>l-i<sup>2</sup>n<sup>2</sup>/dri<sup>2</sup>k-a<sup>2</sup>l. Terminating hemispherically at each end, but with the shaft tapering from base to apex. [L, 232.]

**ATTENUATO-DEPRESO-SPINULATE**, adj. A<sup>2</sup>t-te<sup>2</sup>n<sup>2</sup>-u<sup>2</sup>-a<sup>2</sup>'to-de-pre<sup>2</sup>s''so-spi<sup>2</sup>n<sup>2</sup>-u<sup>2</sup>-lat. Having a basal inflection depressed and the shaft tapering gradually from base to apex. [L, 232.]

**ATTENUATO-EXPANSO-TERNATE**, adj. A<sup>2</sup>t-te<sup>2</sup>n<sup>2</sup>-u<sup>2</sup>-a<sup>2</sup>'to-e<sup>2</sup>x-pa<sup>2</sup>ns''o-tu<sup>2</sup>rn<sup>2</sup>/at. Having three attenuated terminal radii projecting from a shaft at angles of from 45° to 70°. [L, 232.]

**ATTENUATO-PATENTO-TERNATE**, adj. A<sup>2</sup>t-te<sup>2</sup>n<sup>2</sup>-u<sup>2</sup>-a<sup>2</sup>'to-pa<sup>2</sup>t-e<sup>2</sup>nt''o-tu<sup>2</sup>rn<sup>2</sup>/at. Having three attenuated terminal radii projecting from a shaft nearly at right angles. [L, 232.]

**ATTENUATO-POIRRECTO-TERNATE**, adj. A<sup>2</sup>t-te<sup>2</sup>n<sup>2</sup>-u<sup>2</sup>-a<sup>2</sup>'to-po<sup>2</sup>r-r-e<sup>2</sup>kt''o-tu<sup>2</sup>rn<sup>2</sup>/at. Having three attenuated terminal radii projecting from a shaft at an angle of less than 45°. [L, 232.]

**ATTENUATO-RECURVO-TERNATE**, adj. A<sup>2</sup>t-te<sup>2</sup>n<sup>2</sup>-u<sup>2</sup>-a<sup>2</sup>'to-re-ku<sup>2</sup>rv''o-tu<sup>2</sup>rn<sup>2</sup>/at. Having three attenuated terminal radii recurved from the apex of a shaft. [L, 232.]

**ATTENUATO-STELLATE**, adj. A<sup>2</sup>t-te<sup>2</sup>n<sup>2</sup>-u<sup>2</sup>-a<sup>2</sup>'to-ste<sup>2</sup>l<sup>2</sup>/at. Having radii attenuated toward the apices. [L, 232.]

**ATTER** (Ger.), n. A<sup>3</sup>t-te<sup>2</sup>r. The adder (*Vipera berus* [Goldfuss]). [B, 180.]

**ATTHEE** (Dan.), n. The genus *Athæa*. [A, 250.]

**ATTI-ALU**, n. A Malabar name for the *Ficus racemosa*. [B, 121.]

**ATTIC OF THE TYMPANUM**, n. A<sup>2</sup>t-ti<sup>2</sup>k. Lat., atticus tympanicus. Fr., portion attique du tympan. A pyramidal recess over the atrium and above the tympanic extremity of the external auditory meatus. It communicates with the mastoid antrum by the petro-mastoid canal (Sappey). It is partially filled by the malleus and the incus. [J. Leidy, "Science," May 11, 1883, p. 380 (L).]

**ATTICH** (Ger.), n. A<sup>3</sup>t-ti<sup>2</sup>ch<sup>2</sup>. The dwarf-elder (*Sambucus ebulus*). [A, 250; B, 180.]—A<sup>2</sup>'beerens. The fruit of the *Sambucus ebulus*. [B, 180.]—A<sup>2</sup>'beerensaft. The inspissated juice (rob) of dwarf-elder berries. [A, 315; L, 80.]—A<sup>2</sup>'hirschschwanz, A<sup>2</sup>'holunder. See **A**.—A<sup>2</sup>'mus. See **A<sup>2</sup>'beerensaft**.—**Virginischer A**. The *Spiræa opulifolia*. [A, 315.]

**ATTICUM** (Lat.), n., n. of adj. atticus (mel understood). A<sup>2</sup>t-(a<sup>3</sup>t)/ti<sup>2</sup>k-u<sup>3</sup>m(u<sup>4</sup>m). Gr., ἀττικόν (μέλι understood). An ancient name for the best honey. [A, 325.]

**ATTICUS** (Lat.), adj. and n. m. A<sup>2</sup>t(a<sup>3</sup>t)/ti<sup>2</sup>k-u<sup>3</sup>s(u<sup>4</sup>s). See **ATTIC** and **ATTICUM**.

**ATTIE-PUTTAY**, n. An East Indian name for the *Ficus racemosa*. [L, 105.]

**ATTIER** (Fr.), n. A<sup>3</sup>t-te-a. The *Anona squamosa*. [L, 41, 109.]

**ATIKA-MAMADIE** (Teloogoo), n. The *Boerhavia diffusa*. [B, 172.]

**ATILA**, n. One of the springs at Ofen, Hungary: 1,000 parts of the water contain 24,190 of magnesium sulphate, 33,517 of sodium sulphate, and 1,715 of calcium sulphate. [L, 57.]

**ATILUS** (Lat.), n. m. A<sup>2</sup>t(a<sup>3</sup>t)/ti<sup>2</sup>l-u<sup>3</sup>s(u<sup>4</sup>s). An ancient name for the *Acipenser huso* [Linnaeus]. [B, 88.]

**ATTI-MEER-ALOU** (Malay), n. The *Ficus excelsa*. [B, 172.]

**ATTINCAR VENERIS**, n. Syn.: tinctura (seu elixir) ad lunam. An alchemical preparation for whitening copper into the semblance of silver. [Paracelsus (A, 325); L, 119.]

**ATTINGAS, ATTINGAT** (Ar.), n's. Alchemical names for verdigris. [B, 50; L, 105.]

**ATTINGIR, ATTINGIT**, n's. Alchemical names for an earthen capsule or crucible. [B, 50.]

**ATTIRABLE** (Fr.), adj. A<sup>2</sup>t-ter-a<sup>3</sup>bl. Capable of being attracted (as by a magnet). [B, 195.]

**ATTIRANT** (Fr.), adj. A<sup>3</sup>t-ter-a<sup>3</sup>n<sup>2</sup>. See **ATTRAHENS**.

**ATTITUDE**, n. A<sup>2</sup>t-ti<sup>2</sup>-tu<sup>2</sup>d. Lat., habitus, situs corporis. Fr., attitude. Ger., Haltung, Lage. It., attitude. Sp., actitud. The form of a body (as of the person or an organ) as determined by the state of its movable parts. See remarks under **POSITION**.—**CRUCIFIXION** a. An a. sometimes assumed by patients with hystero-epilepsy; the body is rigid, the head is thrown somewhat backward, and the arms are stretched straight out from the body. [Finlayson, "Liverpool Med.-chir. Jour.," Jan., 1885, p. 14.]

**ATTMELLA** (Lat.), n. f.  $A^2t(a^2t)\text{-ine}^2l^3a^3$ . See *SPILANTHES acmella*.

**ATTOLE** (Fr.), n.  $A^2t\text{-tol}$ . See *ATOLE*.

**ATTOLLENS** (Lat.), adj.  $A^2t(a^2t)\text{-to}^2l^2\text{-e}^2nz$  (lans). Pres. partic. of *attollere*, to lift. Fr., *élevant*. Ger., *aufhebend*. It., *attollente*. Acting as an elevator of a part; as a n., a muscle having that action (Lat., *levator*; Ger., *Aufhebungsmuskel*.—A. anterior. See *ZYGOMATO-AURICULARIS*.—A. aurem, A. auriculae, A. auriculo superior, A. auriculam. Fr., *muscle éleveur de l'oreille*, *temporo-conchinois*, *auriculaire supérieur*, *temporo-auriculaire*, *premier de l'oreille* [Duverney], *premier myogène*, *second myogène* [Vieussens], *supérieur de l'oreille* [Winslow]. Ger., *Aufheber des Ohres*. It., *attollente* (o *elevator*) *dell' orecchio*, *temporo-conchiano*, *temporo-auricolare*. Syn.: *levator* (seu *superior*) *auris*, *auricularis superior* [Santorini], *superior auriculae* [Santorini], *auriculae primus* [Fallopianus]. A muscle which arises from the temporal portion of the epicranial aponeurosis and is inserted into the upper part of the median surface of the pinna; its action is to draw the auricle upward. [A, 7, 214, 246, 290, 314.]—A. humerum [Spigelius]. See *DELTOIDES*.—A. labium superior [Spigelius]. See *ZYGOMATOUS major*.—A. linguam [Spigelius]. See *MYOLOGOSUS*.—A. maxillam temporalis [Spigelius]. See *TEMPORALIS*.—A. maxillis. The temporo-auricularis externus muscle. [Percival (L, 13).]—A. oculi, A. oculum [Spigelius]. See *RECTUS superior oculi*.—A. ossis hyoidei [Spigelius]. See *GENIO-HYOIDEUS*.—A. posterior. The temporo-auricularis internus muscle. [Percival (L, 13).]—A. scapulam [Spigelius]. See *LEVATOR anguli scapulae*.—A. sedem [Spigelius]. See *LEVATOR ani*.—A. superiores palpebram. The levator palpebrae superioris muscle. [Riolan (A, 246).]

**ATTONTITSSYMPOTOM** (Ger.), n.  $A^2t\text{-to}^2n\text{-i}^2\text{-tats}^2\text{-su}^2\text{-mp}^2\text{-tom}^2$ . An apoplectic symptom. [L, 57.]

**ATTONITUS** (Lat.), adj.  $A^2t(a^2t)\text{-to}^2n\text{-i}^2\text{-u}^2s(u^4s)$ . Perf. partic. of *attonere*, to stun. Gr., *ἐμπρόντης, ἀπώλητος, ἐκστατικός*. Fr., *étonné*. Ger., *betäubt*. Stunned, stupefied, in an apoplectic state. [A, 322.]—**MORBUS a.**, **Stupor a.** Apoplexy. [Lullier-Winslow (M, 71).]

**ATTOUchement** (Fr.), n.  $A^3t\text{-tush-ma}^2n^2$ . 1. A tactile examination. [A, 300.] 2. The supposed conveyance of an influence from one person to another by a laying on of hands. [A, 305.] 3. An impingement (as of light upon the retina). [Richerand (A, 806).] 4. The topical application of a medicament. [A, 385.] 5. Masturbation. [L, 109.]

**ATTRACTIF** (Fr.), adj. and n.  $A^3t\text{-tra}^3k\text{-tef}$ . See *ATTRAHENS*.—A. d'Estamque. A sort of lever used in extracting teeth; so called from the name of its inventor. [A, 301.]

**ATTRACTIO** (Lat.), n. f.  $A^2t(a^2t)\text{-tra}^3k(\text{tra}^3k)/\text{shi}^2(t)^2\text{-o}$ . Gen., *attractionis*. See *ATTRACTION*.—A. electiva duplex. See *DOUBLE AFFINITY*.—A. electiva multiplex. A variety of double affinity by virtue of which two ternary compounds, ABC and DEF, are decomposed into three binary compounds, AD, BE, and CF. [B, 140.]—A. electiva simplex. Simple elective affinity. [B.]

**ATTRACTION**, n.  $A^2t\text{-tra}^3k/\text{shu}^2n^2$ . Gr., *ἄλξις*. Lat., *attractio* (from *attrahere*, to draw toward). Fr., *attraction*. Ger., *Anziehung*, *Anziehungskraft*. It., *attrazione*. Sp., *atracción*. The act or force by which bodies are drawn toward each other. [B, L, 43.]—**Acoustic a.** The a. exerted by a body when in a state of sonorous vibration upon another body in its vicinity. [B, 164.]—**Adherent a.** See *CAPILLARY a.*—**Adhesive a.** The force of adhesion. [B, 140.]—**Atomic a.** The a. existing between atoms. [B, 164.] See *CHEMICAL a.* and *AFFINITY*.—A. of adhesion. See *Adhesive a.*—A. of affinity. See *AFFINITY*.—A. of aggregation. A. of cohesion. Cohesion. [B, 140; L, 120.]—A. of crystallization. The mutual a. by virtue of which particles of matter tend to arrange themselves into crystalline forms. [B, 140.]—A. of gravitation. See *GRAVITATION*.—A. skraft (Ger.). The force of a. [L, 20.]—**Capillary a.** Fr., *a. capillaire*. Ger., *Capillar-A.* It., *attrazione capillare*. Sp., *atracción capilar*. The a. exerted upon the particles of a liquid by those of a solid body with which it is in contact, causing an elevation of the surface of the liquid at the line of contact; so called because it is best observed in capillary tubes, where the elevation becomes considerable. The absorption of water by unsized paper and other vegetable tissues is due to capillary a. [B, 21.] Cf. *CAPILLARY REPULSION*.—**Chemical a.** Fr., *a. chimique*. Ger., *chemische Anziehungskraft*. See *CHEMICAL AFFINITY*.—**Cohesive a.** The force which binds similar particles together, as distinguished from chemical affinity, which binds dissimilar particles together; cohesion. [B, 37.]—**Cone of a.** See under *COXE*.—**Corpuscular a.** See *Cohesive a.*—**Double elective a.** See *DOUBLE AFFINITY*.—**Elective a.** Lat., *attractio electiva*. Fr., *a. élective*. Ger., *elektrische Anziehung*. It., *attrazione elettrica*. Sp., *atracción eléctrica*. The a. exerted by an electrified body upon another body charged with an opposite variety of electricity. [B, 158.]—**Electro-dynamic a.** The a. produced by the interaction of two neighboring electrical currents or an electrical current and a magnet. [B, 158.]—**Magnetic a.** Fr., *a. magnétique*. Ger., *magnetische Anziehung*. It., *attrazione magnetica*. Sp., *atracción magnética*. The a. exerted by a magnet on iron and other magnetic substances. [B, 21.]—**Molar a.** Fr., *a. molaire*. Ger., *Massenanziehung*. The a. existing between masses, or the a. of gravitation. [B, 164.]—**Molecular a.** Fr., *a. moléculaire*. Ger., *molekulärziehung*. It., *attrazione molecolare*. The a. existing between molecules. [B, 164.] See *ADHESION* and *COHESION*.—**Simple elective a.** See *SIMPLE AFFINITY*.—**Terrestrial a.** Fr., *a. terrestre*. A. exerted by the earth or exhibited upon its surface. [B.]—**Universal a.** Fr., *a. universelle*. Ger., *allgemeine Anziehungskraft*. See *GRAVITATION*.

**ATTRACTIVE**, adj.  $A^2t\text{-tra}^3k/ti^2v$ . Lat., *attractivus*. Fr., *attratif*. Ger., *anziehend*. Attracting, drawing; medicaments

supposed to have the power of drawing the animal juices to the surface were formerly called *attractiva*, *attractorica*, or *attrahentia*. [B, 50, 117; L, 43.]

**ATTRACTO-ÉLECTRIQUE** (Fr.), adj.  $A^3t\text{-tra}^3k\text{-to-a-le}^3k\text{-trek}$ . Having the property of attracting an electrical current. [L, 109.]

**ATTRACTOR** (Lat.), n. m.  $A^2t(a^2t)\text{-tra}^3k(\text{tra}^3k)/\text{to}^2r$ . Gen., *attractoris*. See *ATTRAHENS*.—A. scapulae. See *LEVATOR scapulae*.

**ATTRACTORIUS** (Lat.), adj.  $A^2t(a^2t)\text{-tra}^3k(\text{tra}^3k)\text{-to}^2ri^2\text{-u}^2s(u^4s)$ . See *ATTRACTIVE*.

**ATTRAHENS** (Lat.), adj.  $A^2t(a^2t)/\text{tra}^3\text{-he}^2nz$  (hans). Pres. partic. of *attrahere*, to draw toward. Ger., *anziehend*. Attractive (q. v.); as a n. (*musculus* understood), a muscle the action of which is to draw a movable part toward another part, also (*remedium* understood) a "drawing" medicament (see under *ATTRACTIVE*).—A. alae nasi. See *COMPRESSOR naris*.—A. aurem, A. auriculae, A. auriculam. Syn.: *prior* [Cloquet] (seu *protrahens*) *auriculæ*, *epicranii temporalis*. See *AURICULARIS anterior*.

**ATTRAHENT**, adj.  $A^2t/\text{tra}^3\text{-he}^2nt$ . See *ATTRACTIVE*.

**ATTRAPE-LOURDAUD** (Fr.), n.  $A^3t\text{-tra}^3p\text{-lur-do}$ . A sheathed bistouri. [A, 385.]

**ATTRAPE-MOUCHE** (Fr.), n.  $A^3t\text{-tra}^3p\text{-mush}$ . Venus's fly-trap; the *Silene muscipula* [Linnæus], *Apocynum androsaemifolium*, *Drosera*, and certain other plants. [B, 173.]

**ATTRAQUININE**, n.  $A^2t\text{-tra}^3\text{-kw}^2n^2\text{-en}$ . See *HOMOQUININE*.

**ATTRIPLEX** (Lat.), n. f.  $A^2t(a^2t)/\text{tri}^2\text{-ple}^2x$ . See *ATTRIPLEX*.

**ATTRIPLICES** (Lat.), n. f. pl.  $A^2t(a^2t)\text{-tri}^2p/\text{li}^2\text{-sez}$  (kas). See *ATTRIPLEXES*.

**ATTRITION**, n.  $A^2t\text{-tri}^2sh^2u^2n^2$ . Gr., *παράτριψις*. Lat., *attritio* (from *atterere*, to rub against). Fr., *attrition*. Ger., *Anreibung*, *Aufreibung*, *Zermalmung*. It., *attrizione*. Sp., *atrición*. 1. The friction of bodies upon each other, also the effects (chafing, abrasion, intertrigo, etc.) of such friction. [L, 41, 43.] 2. (Obs.) a severe form of cardialgia with panting respiration. [A, 325.]

**ATTRITUS** (Lat.), n. m.  $A^2t(a^2t)\text{-tri}^2(\text{tre})/\text{tu}^2s(u^4s)$ . Gen., *attritus*. See *ATTRITION* and cf. *ERYTHEMA ab attritu*.

**ATTROW**, n. A plant of Guinea, used in decoction to disperse swellings. [B, 88; L, 103.]

**ATTRUMPHAPHRE**, n. A Guinea name for the *Indigofera hirsuta*. [B, 88.]

**ATTY-ALOW, ATTY-ALU**, n's. See *ATTI-ALU*.

**ATUM CANDIDATUM** (Lat.), n. n.  $A^2(a^2)/\text{tu}^2m(\text{tu}^4m)\text{-ka}^2n(\text{ka}^2n)\text{-di}^2d\text{-a}^2(a^2)/\text{tu}^2m(\text{tu}^4m)$ . The *Lycopodium rubrum*. [B, 121.]

**ATUN**, n. A shrub of the Moluccas, the scaly fruit of which contains a kernel which, grated, is used by the Malays as a condiment and digestive, and in the treatment of dysentery; probably a species of *Heritiera*. [B, 88.]

**ATUNYANGUA**, n. A Peruvian name for the *Cybtastz anti-syphilitica*. [B, 19.]

**ATUREB**, n. An alchemical name for glass. [B, 50.]

**ATURION** (Lat.), n. n.  $A^2t(a^2t)\text{-u}^2(u)/\text{ri}^2\text{-o}^2n$ . See *ATYRION*.

**ATWISHA**, n. See *ATVISHA*.

**ATY**, n. A West Indian name for the *Capsicum annum*. [L, 87, 105.]

**ATYLOSIA** (Lat.), n. f.  $A^2t(a^2t)\text{-l}^2(u^4l)\text{-o}^2si^2\text{-a}^3$ . A genus of leguminous plants closely related to *Cajanus*. [B, 19.]

**ATYOURAGLE**, n. A Carib name for the *Parthenium hysterophorus*. [B, 88.]

**ATYPIA** (Lat.), n. f.  $A^2t(a^2t)\text{-i}^2p(u^6p)/\text{i}^2\text{-a}^3$ . Fr., *atypie*. Ger., *Mangel an Regelmässigkeit*. The state of being atypical (q. v.). [A, 322, 385.]

**ATYPIC, ATYPICAL**, adj's.  $A^2t/\text{i}^2p(a^2i^2p)/\text{i}^2k$ ,  $\text{-i}^2p/\text{i}^2k\text{-a}^2l$ . Gr., *ἀτυπος* (from *a priv.*, and *τύπος*, a type). Lat., *atypus, atypicus*. Fr., *atypique*. Ger., *atypisch*. Erratic, irregular, not conforming to any definite type (said particularly of periodical fevers). [Galen (A, 325); A, 385.]

**ATYPOMORPHOSIS** (Lat.), n. f.  $A^2t(a^2t)/\text{i}^2p(u^6p)\text{-o}^2(o^2)\text{-mo}^2rf\text{-o}^2si^2s$ . Gen., *atypomorphoseos* (-sis). From *ἀτυπος*, atypical, and *μόρφωσις*, a shaping. Fr., *atypomorphose*. In entomology, a variety of metamorphosis in which the nymphæ bear no resemblance to their larval or imago state. [L, 41.] Cf. *HOLOMETABOLISM*.

**ATYPOS, ATYPOS** (Lat.), adj's.  $A^2t(a^2t)/\text{i}^2p(u^6p)\text{-o}^2s$ ,  $\text{-u}^2s(u^4s)$ . 1. Atypical (q. v.). 2. (N.) a person who speaks indistinctly. [A, 322.] 3. (N.) a cripple. [A, 322.]

**ATYRION** (Lat.), n. n.  $A^2t(a^2t)\text{-i}^2r(u^6r)/\text{i}^2\text{-o}^2n$ . An ancient name for the *Asplenium ceterach*. [L, 87.]

**ATZCALXOCHITL**, n. A Mexican name for the *Colchicum alpinum* [De Candelolle]. [A, 447.]

**ATZEL** (Ger.), n.  $A^3tz^2e^2l$ . The *Corvus pica*. [B, 180; L, 80.]

**ATZOYATL**, n. A Mexican name for the *Mirabilis mexicana*. [L, 94.]

**AUANSIS** (Lat.), n. f.  $A^4(a^3\text{-u}^4)\text{-a}^2n(a^3n)/\text{si}^2s$ . Gen., *auan'seos* (-sis). Gr., *ἀνανσις* (from *ἀναίεσθαι*, to be dried up). An old term for morbid dryness (said of the parturient canal). [Hippocrates (A, 325).]

**UAUNTE** (Lat.), n. f.  $A^4(a^3\text{-u}^4)\text{-a}^2n(a^3n)/\text{te}^2ta$ . Gr., *ἀυαντή* (*vó-sos* understood). A term applied by Hippocrates to a special form of wasting or withering of the body ascribed to acidity of the stomach, flatulence, and a vicious state of the pancreatic juice. [A, 325.]

**AUANTICUS, AUANTOS** (Lat.), adj's.  $A^4(a^3-u^4)-a^2n(a^2n)/ti^2k-u^3s(u^4s)$ ,  $-a^2n(a^2n)/to^2s$ . Gr., *αυαντός*. Desiccative. [A, 322, 325.]

**AUAPSE** (Lat.), n. f.  $A^4(a^3-u^4)-a^2p(a^2p)/se(sa)$ . Gr., *αυαψή*. Galen's term for *auante* (q. v.). [A, 325.]

**AUAREMOTEMO**, n. See **ABAREMOTEMO**.

**AUBAD** (Ger.), n.  $A^3u-ba^2d$ . An alkaline chalybeate spring in the Tyrol, near Rattenberg. [L, 30.]

**AUBAINE** (Fr.), n. O-ban. A variety of the *Triticum durum*. [A, 385.]

**AUBE** (Fr.), n. Ob. A name applied in the south of France to the *Populus alba*. [L, 41.]

**AUBENTONIA** (Lat.), n. f. O-ba<sup>2</sup>n<sup>2</sup>-to<sup>2</sup>ni<sup>2</sup>-a<sup>3</sup>. The botanical genus *Waltheria*. [B, 121.]

**AUBÉPIN** (Fr.), n. O-ba-pa<sup>2</sup>n<sup>2</sup>. See **AUBÉPINE**.

**AUBÉPINE** (Fr.), n. O-ba-pen. The hawthorn (*Crataegus oxyacantha*). [A, 385; B, 121.]

**AUBERGINE** (Fr.), n. O-be<sup>2</sup>r-zhen. The fruit of the egg-plant (*Solanum esculentum*). [B, 121.]

**AUBERGINO**, n. A Languedoc name for the aubergine. [B, 121.]

**AUBERJO**, n. A Languedoc name for a sort of cling-stone peach with yellow pulp. [B, 121.]

**AUBERTIA** (Lat.), n. f. O-be<sup>2</sup>r-ti<sup>2</sup>-a<sup>3</sup>. Syn.: *Euodia* [Forster]. Of Endlicher, a section of the genus *Xanthoxylon*. [B, 121.]

**AUBESON**, n. In the Walloon dialect, a name for the *Agarici*. [B, 121.]

**AUBESSIN** (Fr.), n. Ob-sa<sup>2</sup>n<sup>2</sup>. See **AUBÉPINE**.

**AUBE-VIGNE** (Fr.), n. Ob-ven. The *Clematis vitalba*. [L, 49.]

**AUBIER** (Fr.), n. O-bi<sup>2</sup>-a. 1. See **ALBURNUM**. 2. In central France, a name for the willow, also for the *Viburnum opulus*. [B, 121, 173.]—**A. double**, **A. faux**. Alburnum accidentally covered by a layer of true wood, over which alburnum forms again. [L, 41.]

**AUBIFOIN** (Fr.), n. O-bi<sup>2</sup>-fwa<sup>2</sup>n<sup>2</sup>. The *Centaurea cyanus*. [B, 121.]—**Grand a.** The *Centaurea officinalis*. [A, 321; L, 41.]

**AUBIFONIA** (Lat.), n. f.  $A^4(a^3-u^4)-bi^2fo-ni^2-a^3$ . The *Centaurea cyanus*. [B.]—**Flores aubifoniae**. The flowers of the *Centaurea cyanus*. [B, 180.]

**AUBITON, AUBITOU** (Fr.), n's. O-bi<sup>2</sup>-to<sup>2</sup>n<sup>2</sup>, -tu. See **AUBIFON**.

**AUBLETIA** (Lat.), n. f. O-bla<sup>2</sup>-ti<sup>2</sup>-a<sup>3</sup>. From *Aublet*, a French botanist. Fr., *aublétié*. 1. Of Gärtner, the genus *Sonneratia*. 2. Of Jacquin, the *Verbena*. 3. Of Loureiro, the *Patiurus*. 4. Of Necker, the *Ruellia*. 5. Of Persoon, the *Monnieria*. 6. Of Schreb. the *Apeiba*. [B, 121.]—**A. caseolaris** [Gärtner]. See *SONNERATIA acida*.—**A. trifolia** [Richard]. See *MONNIERIA trifolia*.

**AUBOUR** (Fr.), n. O-bur. The *Cytisus laburnum*, also the *Viburnum opulus*. [B, 121; L, 49.]

**AUBRE** (Fr.), n. Obr. See **ARBRE**.

**AUBRELLE** (Fr.), n. O-bre<sup>2</sup>. A name applied in central France to the poplar and the willow. [B, 121.]

**AUBRESPI**, n. A Languedoc name for the hawthorn (*Crataegus oxyacantha*). [B, 121.]

**AUBRESSIN** (Fr.), n. Obr-sa<sup>2</sup>n<sup>2</sup>. The *Crataegus oxyacantha*. [L, 105.]

**AUBRIETIA** (Lat.), n. f. O-bri<sup>2</sup>-a<sup>3</sup>-ti<sup>2</sup>-a<sup>3</sup>. Fr., *aubriétie*. A genus of cruciferous plants made by Adanson. [B, 121.]

**AUBRYA** (Lat.), n. f. O-bre-a<sup>3</sup>. From *Aubry*, the name of a botanist. A genus of humiferae plants made by Baillon, now referred by him to *Humiria*. [B, 121.]—**A. gabonensis** [Baillon]. See *HUMIRIA gabonensis*.

**AUBSUR** (Fr.), n. Ob-su<sup>2</sup>r. The *Cytisus laburnum*. [A, 385.]

**AUBURON** (Fr.), n. O-bu<sup>2</sup>-ro<sup>2</sup>n<sup>2</sup>. The *Agaricus acris*. [B, 88.]

**AUBUZON** (Fr.), n. O-bu<sup>2</sup>-zo<sup>2</sup>n<sup>2</sup>. The genus *Agaricus*. [B, 173.]

**AUCHE** (Lat.), n. f.  $A^4(a^3-u^4)-ke(ch^2a)$ . Gr., *αυχή*. Ger., *Halsstarrigkeit*. Lit., pride, haughtiness; stiffness of the neck. [A, 322.]

**AUCHEIS** (Lat.), adj.  $A^4(a^3-u^4)-ke(ch^2a)/i^2s(es)$ . Gr., *αυχής*. See **AUCHETICUS**.

**AUCHEN** (Lat.), n. m.  $A^4(a^3-u^4)-ke^2n(ch^2an)$ . Gen., *au'chenos* (-is). Gr., *αυχών*. The neck or the throat, also the neck of a bone, of the uterus, etc. [A, 311, 322.]

**AUCHENATES** (Lat.), n. m. pl.  $A^4(a^3-u^4)-ke^2n(ch^2e^2n)-a(a^3)-te^2z(as)$ . A family of apterous insects having the head distinct from the corselet. [L, 41.]

**AUCHÉNYDROCELE** (Fr.), n. O-kan-i<sup>2</sup>d-ro-se<sup>2</sup>. See **AUCHÉNYDROCELE**.

**AUCHENIA** (Lat.), n. f.  $A^4(a^3-u^4)-ken(ch^2e^2n)/i^2-a^3$ . A genus of ruminants of the camel family. [B, 180.]—**A. lama** [Illiger]. Ger., *Kameelziege*. Syn.: *Camelus lama* [Linnæus]. The llama; a domesticated species found in the mountains of Peru and Chili. A variety of bezoar (occidental bezoar) is sometimes found in its fourth stomach. [B, 180.]—**A. vicunna** [Illiger]. Ger., *Schafkameel*. The vicuña; a species found on the summits of the Cordilleras, furnishing vicuña wool. At times a variety of bezoar is found in its stomach. [B, 180.]

**AUCHENIATRIA** (Lat.), n. f.  $A^4(a^3-u^4)-ke^2n(ch^2e^2n)-i^2-a^3t-(a^3t)-ri(re)^2a$ . From *αυχών*, the throat, and *λατρεία*, medical treatment. Fr., *auchéniatric*. Ger., *Halsheilkunde*. The treatment of diseases of the throat. [A, 322, 385.]

**AUCHENICUS** (Lat.), adj.  $A^4(a^3-u^4)-ke^2n(ch^2e^2n)/i^2k-u^3s(u^4s)$ . Gr., *αυχένιος* (from *αυχών*, the neck). Pertaining to the neck. [A, 322.]

**AUCHENISTER** (Lat.), n. m.  $A^4(a^3-u^4)-ke^2n(ch^2e^2n)-i^2st-e^2r$  (-ar). Gen., *auchenister* (-ris). Gr., *αυχενιστήρ* (from *αυχένισαι*, to behead). A term applied by Von Scanzoni to a decapitator devised by him. [A, 30.]

**AUCHENIUM** (Lat.), n. n.  $A^4(a^3-u^4)-ke(ch^2e^2n)/ni^2-u^3m(u^4m)$ . Fr., *auchénion*. The portion of the neck situated below the nucha. [L, 41.]

**AUCHENOPTERUS** (Lat.), adj.  $A^4(a^3-u^4)-ke^2n(ch^2an)-o^2p$ -te<sup>2</sup>r-u<sup>3</sup>s(-u<sup>4</sup>s). From *αυχών*, the neck, and *πτερόν*, a wing or a fin. Fr., *auchénoptère*. Ger., *halsflügelig*. Having ventral fins under the neck. [L, 41.]

**AUCHENORRHEUMA** (Lat.), n. n.  $A^4(a^3-u^4)-ke^2n(ch^2an)-o^2r$ -ru<sup>2</sup>ma<sup>3</sup>. Gen., *auchenorrhœumatos* (-tis). From *αυχών*, the neck, and *ῥεῦμα*, a flux. Fr., *auchénorrhumatisme*. Ger., *Halsrheumatismus*. Rheumatism of the neck. [A, 322.]

**AUCHENORRHYNCHUS** (Lat.), adj.  $A^4(a^3-u^4)-ke^2n(ch^2an)-o^2r$ -ri<sup>2</sup>n<sup>2</sup>(ru<sup>2</sup>n<sup>2</sup>)/ku<sup>3</sup>s(ch<sup>2</sup>u<sup>4</sup>s). From *αυχών*, the neck, and *ῥινχός*, the beak. Fr., *auchénorrhynque*. Ger., *halschnabelig*. Having the beak arising apparently from the neck. [L, 41.]

**AUCHENOSCHISIS** (Lat.), n. f.  $A^4(a^3-u^4)-ke^2n(ch^2an)-o^2s$ -ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)-si<sup>2</sup>s. Gen., *auchenoschisis* (-os/chisis). From *αυχών*, the neck, and *σχίσσις*, a fissure. A fissure of the neck, especially of the cervical vertebrae. [A, 322.]

**AUCHENOSPHINXIS** (Lat.), n. f.  $A^4(a^3-u^4)-ke^2n(ch^2an)-o$ -(o<sup>2</sup>)-sf<sup>2</sup>n<sup>2</sup>x'i<sup>2</sup>s. Gen., *auchenosphinx* (-is). From *αυχών*, the neck, and *σφίγγις* (from *σφίγγειν*), constriction. Strangulation. [A, 322.]

**AUCHENOSTRANGALE** (Lat.), n. f.  $A^4(a^3-u^4)-ke^2n(ch^2an)-o$ -(o<sup>2</sup>)-stra<sup>2</sup>n<sup>2</sup>(stra<sup>2</sup>n<sup>2</sup>)/ga<sup>2</sup>-le(la). From *αυχών*, the neck, and *σπαραγάνη*, a halter. See **AUCHENOSPHINXIS**.

**AUCHENOZOSTER** (Lat.), n. m.  $A^4(a^3-u^4)-ke^2n(ch^2an)-o$ -(o<sup>2</sup>)-zo<sup>3</sup>s(zos)/te<sup>2</sup>r(-tar). Gen., *auchenozoster* (-ris). From *αυχών*, the neck, and *ζωστήρ*, a girdle. Ger., *Halsgürtel*, *Halsbrenngürtel*. Zoster of the neck. [A, 322.]

**AUCHÉNYDROCELE** (Lat.), n. f.  $A^4(a^3-u^4)-ke^2n(ch^2an)-i^2d$ -(n<sup>2</sup>d)-ro(ro<sup>2</sup>)-se(ka)/le(la). From *αυχών*, the neck, and *ὕδρον* (see **HYDROCELE**). Fr., *auchénydrocèle*. Ger., *Blasenkrepp*, *Wasserbruch des Halses*. Cystic goitre. [J. P. Maunoir (A, 322).]

**AUCHENYOSPHINXIS** (Lat.), n. f.  $A^4(a^3-u^4)-ke^2n(ch^2an)-i$ (u<sup>6</sup>)-po(po<sup>2</sup>)-sf<sup>2</sup>n<sup>2</sup>x'i<sup>2</sup>s. Gen., *auchenyosphinx* (-is). See **AUCHENOSPHINXIS**.

**AUCHETICUS** (Lat.), adj.  $A^4(a^3-u^4)-ke^2n(ch^2at)/i^2k-u^3s(u^4s)$ . Gr., *αυχητικός*. Having a stiff neck. [A, 322.]

**AUCHMOS, AUCHMUS** (Lat.), n's m.  $A^4k(a^3-u^4ch^2)-mo^2s$ , -mu<sup>3</sup>s(mu<sup>4</sup>s). Gr., *αυχμός*. 1. Drought, aridity. [Hippocrates (A, 325).] 2. A dry, raw air. [Hippocrates (A, 325).]

**AUCKLANDIA** (Lat.), n. f.  $A^4k-la^2nd/i^2-a^3$ . Of Falconer, a genus of composite plants, now referred to *Saussurea*. [B, 42, 121.]—**A. costus** [Falconer]. See under **SAUSSUREA**.

**AUCTIO** (Lat.), n. f.  $A^4k(a^3-u^4k)-shi^2(t)^2-o$ . Gen., *auctio* (-nis). From *augere*, to increase. See **ACCRETION**.

**AUCUTOVILLE** (Fr.), n. Ok-to-vel. A place in the department of Calvados, France, where there is a cold spring containing iron, magnesium, and carbonic acid. [L, 49.]

**AUCTUS** (Lat.), adj.  $A^4k(a^3-u^4k)-tu^3s(tu^4s)$ . From *augere*, to increase. 1. Grown, especially beyond the usual limits; persisting and increasing in growth. 2. Increased by the adhesion of another part or organ. [B, 198.]

**AUCUBA** (Lat.), n. f.  $A^4k(a^3-u^4k)-u^2(u^4)-ba^3$ . Fr., *aucube*. Of Thunberg, a genus of low evergreen shrubs with leathery leaves, belonging to the *Cornaceae*, or, according to some, to the *Caprifoliaceae*. [B, 49, 170.]—**A. japonica** [Thunberg]. A Japanese shrub from 6 to 10 feet high. [B, 49, 121.]—**A. himalaica** [Hooker fil.]. A species indigenous to the eastern Himalayas, from 15 to 20 feet high. [B, 49.]

**AUCUBEÆ** (Lat.), n. f. pl.  $A^4k(a^3-u^4k)-u^2(u^4)-be^2-e(a^3-e^2)$ . Of Endlicher, a suborder of plants belonging to the *Cornaceae*, including *Aucuba* and three or four other genera. [B, 170.]

**AUCUPALIS** (Lat.), adj.  $A^4k(a^3-u^4k)-u^2(u^4)-pa(pa^3)/li^2s$ . See **AUCUPARIUS**.

**AUCUPARIA** (Lat.), n. f.  $A^4k(a^3-u^4k)-u^2(u^4)-pa(pa^3)/ri^2-a^3$ . See **SORBUS**.—**Baccæ** (seu *Fructus*) *aucupariæ*. The berries of the *Sorbus a.* [B, 180.]

**AUCUPARIUM** (Lat.), n. n.  $A^4k(a^3-u^4k)-u^2(u^4)-pa(pa^3)/ri^2-u^3m$  (-u<sup>4</sup>m). Birdlime. [B, 180.]

**AUCUPARIUS** (Lat.), adj.  $A^4k(a^3-u^4k)-u^2(u^4)-pa(pa^3)/ri^2-u^3s$  (-u<sup>4</sup>s). From *auceps* (from *avis*, a bird, and *capere*, to take), a bird-catcher. Pertaining to or suitable for bird-catching. [B.] See **AUCUPARIUM** and **SORBUS aucuparia**.

**AUDACIA** (Lat.), n. f.  $A^4(a^3-u^4)-da(da^3)/shi^2(ki^2)-a^3$ . Gr., *τόλμα*, *τόλμα*. The boldness of delirium or insanity. [A, 325; L, 84.]

**AUDBIDH** (Sanscr.), n. Lit., produced of itself from the earth; a salt consisting chiefly of sodium sulphate mixed with sodium chloride, occurring as an efflorescence on rocks in India and occasionally used in medicine. [B, 181.]

**AUDE** (Lat.), n. f.  $A^4(a^3-u^4)-de(da)$ . Gr., *αὐδή*. Fr., *voix*. Ger., *Stimme*, *Laut*. The voice, also a sound. [A, 322, 325.]

**AUDIBERTIA** (Lat.), n. f. O-di<sup>2</sup>-be<sup>2</sup>rt/i<sup>2</sup>-a<sup>3</sup>. Fr., *audibertia*. Bentham's name for a genus of labiate under-shrubs of the tribe *Monardeæ*; akin, on the one hand, to *Rosmarinus*, and on the other, to some sections of *Salvia*. [B, 121.]—**A. decurrens** [Nutt]

tall], **A. grandiflora** [Bentham]. A California species, mentioned among the medicinal plants of the State. [*Proc. of the Am. Pharm. Assoc.*, xix, p. 304 (B); B, 214.]—**A. polystachya** [Bentham]. The white sage, a California species. Its flowers are used by the Indians as a condiment, like parsley. [*Proc. of the Am. Pharm. Assoc.*, xxvii, p. 163 (B); B, 214.]—**A. spinulosa** [Nuttall], **A. stachyoides** [Bentham]. A species growing in northern California, mentioned among the medicinal plants of the State. [*Proc. of the Am. Pharm. Assoc.*, xix, p. 304 (B); B, 214.]

**AUDIEN-BOULOHA**, n. A Madagascar shrub, perhaps a species of *Tournefortia*. [Bory [B, 121].]

**AUDIERNE** (Fr.), n. O-di<sup>2</sup>-e<sup>2</sup>-rn. A sea-bathing resort in the department of Finistère, France. [A, 385; L, 57, 87.]

**AUDIMETER**, n. A<sup>4</sup>d-i<sup>2</sup>m'e<sup>2</sup>t-u<sup>6</sup>r. Fr., *audimètre*. See *AUDIOMETER*.

**AUDINAC** (Fr.), n. O-di<sup>2</sup>n-a<sup>4</sup>k. A place in the department of Ariège, France, where there are carbonated chalybeate springs. [A, 385; L, 87.]

**AUDIOMETER**, n. A<sup>4</sup>d-i<sup>2</sup>-o<sup>2</sup>m'e<sup>2</sup>t-u<sup>6</sup>r. From *audire*, to hear, and *μέτρον*, a measure. Fr., *audiomètre*. Ger., *Gehörmesser*. An instrument devised by Hughes for measuring the sensitivity of the ear for sounds of small intensity. It consists of a microphone which is attached to a clock and which also forms part of a galvanic circuit. The galvanic current which passes through this circuit likewise passes through two induction coils, one 100 metres, the other 9 metres in length. Between these two coils, which are placed parallel to each other and about 30 centimetres apart, is a third induction coil, 100 metres in length, which moves freely along a graduated bar and can thus be placed at any point intermediate between the two primary coils. The latter are so constructed that they induce in the movable coil two currents in opposite directions, and which consequently counteract each other. The movable coil is connected with a telephone which repeats the ticking of the clock (magnified by the microphone) in greater or less intensity, according as the difference between the two currents induced in the movable coil is greater or less. When the movable coil is so placed that the two currents are equal, no sound is audible. This point is designated as zero on the scale, and the distance between this and the first of the two inducing coils is divided into 200 degrees. The instrument is used by placing the movable coil at the zero point and then gradually sliding it toward the first coil until the person listening at the telephone first perceives the ticking of the clock. The number of degrees (representing the intensity of the least sound audible) is then read off. [B, 22.]

**AUDIPHONE**, n. A<sup>4</sup>d-i<sup>2</sup>-fon. From *audire*, to hear, and *φωνή*, the voice. Syn.: *ostephone* [Thomas]. A fan-shaped instrument of hard rubber or well-lacquered pasteboard, devised by Rhodes, for improving the hearing power of the deaf. The upper margin is provided with a little metal plate for laying on the teeth or on the zygoma, and at the lower margin there is a handle. By properly pressing the instrument against the anterior upper teeth, a forward convexity is given to it, and the sound-waves falling on it are conducted through the bones of the head to the labyrinth. There is an arrangement of cords by which the necessary curvature may be maintained. [F.]

**AUDITION**, n. A<sup>4</sup>d-i<sup>2</sup>sh'u<sup>3</sup>n. Gr., *ἀκοή*. Lat., *auditus*, *auditis* (from *audire*, to hear). Fr., *audition*, *ouïe*. Ger., *Gehör*. It., *udito*. Sp., *audición*. The act, sense, or function of hearing. [F.]—**A. active** (Fr.). The hearing which takes place when one listens. [L, 109.] See *AUSCULTATION*—**A. colorée** (Fr.). See *COLOR HEARING*.—**A. passive** (Fr.). The hearing of sounds which strike the ear without any effort being made to catch them. [L, 109.]—**Contre-a.** (Fr.). Ger., *Hinüberhören*. The hearing with one ear of the vibrations of a tuning-fork placed on the mastoid process of the opposite side; most marked with vibrations of more than a thousand to the second. Baumgarten first employed this test in the diagnosis and prognosis of disease of the middle ear and the internal ear. [*Ann. des mal. de l'oreille*, etc., March, 1887, p. 98 (F).]—**Mental a.** Fr., *a. mentale*. The remembrance of a sound, or the formation of an idea or a mental image founded on past auditory impressions. [A, 390.]—**Verbal mental a.** Fr., *a. mentale verbale, parole intérieure*. The same as mental a., the sounds remembered being those of words. [A, 390.]

**AUDITORY**, adj. A<sup>4</sup>d-i<sup>2</sup>t-o-ri<sup>2</sup>. Gr., *ἀκουστικός*. Lat., *auditorius*. Fr., *auditif*. Ger., *hörend*, *das Gehör* (oder *das Ohr*) *betreffend*. It., *uditivo*. Sp., *uditivo*. Syn.: *acoustic*, *auricular*. Relating to the sense of hearing or to the ear. [F.]

**AUDITUS** (Lat.), n. m. A<sup>4</sup>d(a<sup>2</sup>-u<sup>4</sup>d)-i(e)<sup>2</sup>tu<sup>3</sup>s(tu<sup>3</sup>s). Gen., *auditus*. See *AUDITION*.—**A. acior** [Darwin]. See *PARACUSIS acris*.—**A. dimicilis**, **A. gravitas**, **A. imminutus**. Diminished power of hearing. [A, 325; L, 132.]

**AUDORN** (Ger.), n. A<sup>3</sup>u-do<sup>2</sup>rn. The *Marrubium vulgare*. [L, 57.]

**AUERBACH, AUERBACHER** (Ger.), n's. A<sup>3</sup>u-e<sup>2</sup>r-ba<sup>3</sup>ch<sup>2</sup>-ba<sup>3</sup>ch<sup>2</sup>-e<sup>2</sup>r. A mineral spring in the Grand Duchy of Hesse. [L, 105.]

**AUERSWALDIA** (Lat.), n. f. A<sup>3</sup>u-e<sup>2</sup>rs-va<sup>3</sup>l'd-i<sup>2</sup>-a<sup>3</sup>. In botany, Hoffmann's name for the receptacle of a *Sphaeria*. [B, 121.]

**AUFATHMEN** (Ger.), v. intr. A<sup>3</sup>uf-a<sup>2</sup>t-me<sup>2</sup>n. To breathe anew. [A, 315.]

**AUFÄTZEN** (Ger.), v. tr. A<sup>3</sup>uf-e<sup>2</sup>tz-e<sup>2</sup>n. To open (e. g., an abscess) by means of caustics. [A, 315.]

**AUFBAHEN** (Ger.), v. tr. A<sup>3</sup>uf-ba-he<sup>2</sup>n. To cause (an abscess) to open by fomenting. [A, 315.]

**AUFBAUCHEN** (Ger.), **AUFBAUSCHEN** (Ger.), v's intr. A<sup>3</sup>uf-ba<sup>3</sup>-uch<sup>2</sup>-e<sup>2</sup>n, -ba<sup>3</sup>-ush-e<sup>2</sup>n. To swell up. [A, 315.]

**AUFBEIZEN** (Ger.), v. tr. A<sup>3</sup>uf-blitz-en. 1. To corrode. [L, 46.] 2. See *AUFÄTZEN*.

**AUFBERSTEN** (Ger.), v. intr. A<sup>3</sup>uf-be<sup>2</sup>rst-e<sup>2</sup>n. To crack, chap. [A, 315.]

**AUFBINDEN** (Ger.), v. tr. A<sup>3</sup>uf-bi<sup>2</sup>nd-e<sup>2</sup>n. To loosen, unbind. [A, 315.]—**Den Verband a.** To remove the dressings. [A, 315.]

**AUFBLÄHEN** (Ger.), v. tr. A<sup>3</sup>uf-blä-he<sup>2</sup>n. To inflate; as a n., inflation, distension. [A, 315.]—**A<sup>4</sup>d.** Flatulent. [A, 315.]—**A. des Leibes.** See *TYMPANITES*.

**AUFBLÄHUNG** (Ger.), n. A<sup>3</sup>uf-blä-hung. 1. Inflation, distension, flatulence. [L, 46.] 2. In the pl., *A<sup>4</sup>en*, elevated lesions of the skin. [L, 43.]—**A. des Unterleibes.** See *TYMPANITES*.

**AUFBLASEN** (Ger.), v. tr. A<sup>3</sup>uf-blä<sup>3</sup>-ze<sup>2</sup>n. See *AUFBLÄHEN*.

**AUFBLÄTTERUNG** (Ger.), n. A<sup>3</sup>uf-blē<sup>2</sup>t-te<sup>2</sup>r-ung. Exfoliation, desquamation. [L, 59.]

**AUFBLÜHEN** (Ger.), v. intr. A<sup>3</sup>uf-blū<sup>6</sup>-he<sup>2</sup>n. To blossom; as a n., inflorescence, also the time of flowering. [B, 36, 131.]—**Gleichzeitiges A.** See *ANTHESIS perfecta*.

**AUFBRAUSEN** (Ger.), v. intr. A<sup>3</sup>uf-bra<sup>3</sup>-u-ze<sup>2</sup>n. To boil, to effervesce, to ferment; as a n., ebullition, effervescence, fermentation. [L, 46.]—**A<sup>4</sup>d.** Effervescent. [L, 46.]

**AUFBRECHEN** (Ger.), v. intr. A<sup>3</sup>uf-bre<sup>2</sup>ch<sup>2</sup>-e<sup>2</sup>n. To open, expand (said of buds); as a n., an eruption, also the pointing and bursting of an abscess. [B, 131; E, L, 43, 80.]

**AUFDAMPFEN** (Ger.), v. tr. and intr. A<sup>3</sup>uf-da<sup>3</sup>mpf-e<sup>2</sup>n. To evaporate. [A, 315.]

**AUFDÖRREN** (Ger.), v. tr. A<sup>3</sup>uf-du<sup>3</sup>-r-re<sup>2</sup>n. To desiccate. [A, 315.]

**AUFDUNSEN** (Ger.), v. intr. A<sup>3</sup>uf-dun-se<sup>2</sup>n. To be swollen, bloated. [A, 315.]

**AUFDUNSTEN** (Ger.), v. intr. A<sup>3</sup>uf-dunst-e<sup>2</sup>n. To rise in vapor. [A, 315.]

**AUFDÜNSTEN** (Ger.), v. tr. A<sup>3</sup>uf-du<sup>6</sup>nst-e<sup>2</sup>n. To evaporate. [A, 315.]

**AUFEINANDERLIEGEND** (Ger.), adj. A<sup>3</sup>uf-in-a<sup>3</sup>n'de<sup>2</sup>r-le-ge<sup>2</sup>nd. In botany, applied. [B, 123.]

**AUFERNÄHREN** (Ger.), v. tr. A<sup>3</sup>uf-e<sup>2</sup>r-na-re<sup>2</sup>n. To nourish, to bring up. [M, 7.]

**AUFERWECKEN** (Ger.), v. tr. A<sup>3</sup>uf-e<sup>2</sup>r-ve<sup>2</sup>k-e<sup>2</sup>n. To resuscitate. [M, 7.]

**AUFFALLEND** (Ger.), adj. A<sup>3</sup>uf-fa<sup>3</sup>-le<sup>2</sup>nd. In botany, conspicuous. [B, 198.]

**AUFFANGGLAS** (Ger.), n. A<sup>3</sup>uf-fa<sup>3</sup>ng-e<sup>2</sup>-gla<sup>3</sup>s. In optics, an objective. [B, 48.]

**AUFFRESSEN** (Ger.), v. tr. A<sup>3</sup>uf-fre<sup>2</sup>s-se<sup>2</sup>n. To corrode; as a n., corrosion. [B, 131; L, 46.]

**AUFFRISCHUNG** (Ger.), n. A<sup>3</sup>uf-fri<sup>2</sup>sh-ung. See *ANALEPSIS* (1st def.).

**AUFFRUCHTIG** (Ger.), adj. A<sup>3</sup>uf-fruch<sup>2</sup>t-i<sup>2</sup>g. See *APOCARPOUS*.

**AUFFÜTTERN** (Ger.), v. tr. A<sup>3</sup>uf-fu<sup>6</sup>t-te<sup>2</sup>rn. To feed artificially. [L, 46.]

**AUFFÜTTERUNG** (Ger.), n. A<sup>3</sup>uf-fu<sup>6</sup>t-te<sup>2</sup>r-ung. Artificial feeding.

**AUFGÄTTERN** (Ger.), v. tr. A<sup>3</sup>uf-ga<sup>3</sup>t-te<sup>2</sup>rn. To keep an animal's mouth open while administering medicine. [M, 7.]

**AUFGEBLÄHT** (Ger.), adj. A<sup>3</sup>uf-ge<sup>2</sup>-blat. Inflated, tympanic. [B, 131; L, 80.]

**AUFGEBLASEN** (Ger.), adj. A<sup>3</sup>uf-ge<sup>2</sup>-blä<sup>3</sup>-ze<sup>2</sup>n. See *AUFGEBLÄHT*.—**A<sup>4</sup>heit**. Inflation, distension, turgescence, emphysema, tympanites. [M, 7.]

**AUFGEBOGEN** (Ger.), adj. A<sup>3</sup>uf-ge<sup>2</sup>-bo-ge<sup>2</sup>n. In botany, ascending. [B, 198.]

**AUFGEBORSTEN** (Ger.), adj. A<sup>3</sup>uf-ge<sup>2</sup>-borst-e<sup>2</sup>n. See *DISPANSUS*.—**A. Jagersprossig**. See *DISPANSO-ANABLASTICUS*.

**AUFGEDUNSEN** (Ger.), adj. A<sup>3</sup>uf-ge<sup>2</sup>-duns-e<sup>2</sup>n. Swollen, bloated. [M, 7.]—**A<sup>4</sup>heit**. Distension, inflation, swelling. [A, 315.]—**Bleiche A<sup>4</sup>heit**. Leucopneumatism. [L, 80.]

**AUFGEGOSSEN** (Ger.), adj. A<sup>3</sup>uf-ge<sup>2</sup>-go<sup>2</sup>s-se<sup>2</sup>n. Infused. [L, 43.]

**AUFGEHÄUFT** (Ger.), adj. A<sup>3</sup>uf-ge-hoigt. In botany, suspended (like an embryo in the ovum). [B, 198.]

**AUFGEHEND** (Ger.), adj. A<sup>3</sup>uf-ge-hēnd. Germinating, budding. [L, 46.]

**AUFGEKLEBT** (Ger.), adj. A<sup>3</sup>uf-ge<sup>2</sup>-kle<sup>2</sup>bt. In botany, adherent, adhesive. [B, 198.]

**AUFGELAUFEN** (Ger.), adj. A<sup>3</sup>uf-ge<sup>2</sup>-la<sup>3</sup>-uf-e<sup>2</sup>n. Bloated, swollen, inflated. [B, 131.]

**AUFGELEINT** (Ger.), adj. A<sup>3</sup>uf-ge<sup>2</sup>-limt. In botany, agglutinated. [B, 198.]

RHODES'S AUDIPHONE,  
SIDE-VIEW. (AFTER  
POMEROY.)

**AUFGELOST** (Ger.), adj. A<sup>3</sup>uf-ge<sup>2</sup>-lu<sup>3</sup>st. Dissolved; in botany, *dissolutus* (q. v.). [B, 198; L, 80.]

**AUFGEREGTHEIT** (Ger.), n. A<sup>3</sup>uf-ge<sup>2</sup>-re<sup>2</sup>gt-hit. Agitation, excitement. [A, 301.]

**AUFGERICHTET** (Ger.), adj. A<sup>3</sup>uf-ge<sup>2</sup>-ri<sup>2</sup>ch<sup>2</sup>t-e<sup>2</sup>t. In botany, elevated (*elevatus*); sometimes in the sense of erect, sometimes in that of ascending. [B, 198.]

**AUFGEROLLT** (Ger.), adj. A<sup>3</sup>uf-ge<sup>2</sup>-rolt. In botany, convolutive. [B, 198.]

**AUFGESCHÜRZT** (Ger.), adj. A<sup>3</sup>uf-ge<sup>2</sup>-shu<sup>2</sup>rtst. Shrunken in the flank (said of horses). [L, 46.]

**AUFGESCHWOLLEN** (Ger.), adj. A<sup>3</sup>uf-ge<sup>2</sup>-shwol-le<sup>2</sup>n. Swollen, bloated; in botany, tumid. [B, 131; L, 80.]—A<sup>3</sup>sein. Turgescence. [L, 80.]

**AUFGESETZT** (Ger.), adj. A<sup>3</sup>uf-ge<sup>2</sup>-ze<sup>2</sup>tst. In botany, *impositus* or *superpositus*; resting upon a part without being connected with it by a pedicle. [B, 198.]

**AUFGESPRUNGEN** (Ger.), adj. A<sup>3</sup>uf-ge<sup>2</sup>-sprung-e<sup>2</sup>n. In botany, *rimosus* (q. v.). [B, 193.]

**AUFGESTREUT** (Ger.), adj. A<sup>3</sup>uf-ge<sup>2</sup>-stroit. In botany, *aspersus* (q. v.). [B, 198.]

**AUFGETAUCHT** (Ger.), adj. A<sup>3</sup>uf-ge<sup>2</sup>-ta<sup>3</sup>-uch<sup>2</sup>t. In botany, *emersus*, projecting from the water. [B, 198.]

**AUFGETRIEBEN** (Ger.), adj. A<sup>3</sup>uf-ge<sup>2</sup>-treb-e<sup>2</sup>n. Turgid, inflated. [B, 198.]—A<sup>3</sup>heit. Intumescence. [L, 46.]

**AUFGEWACHSEN** (Ger.), adj. A<sup>3</sup>uf-ge<sup>2</sup>-va<sup>3</sup>ch<sup>2</sup>s-e<sup>2</sup>n. In botany, innate, adnate. [B, 131, 198; L, 46.]

**AUFGEWORFEN** (Ger.), adj. A<sup>3</sup>uf-ge<sup>2</sup>-vorf-e<sup>2</sup>n. Elevated, puffy. [L, 59.]

**AUFGIESSEN** (Ger.), v. tr. A<sup>3</sup>uf-ge<sup>2</sup>-se<sup>2</sup>n. To affuse, to sprinkle, to infuse; as a n., see **AUFGIESSUNG**.

**AUFGIESSUNG** (Ger.), n. A<sup>3</sup>uf-ge<sup>2</sup>-sung. Affusion, infusion. [L, 46.]

**AUFGUSS** (Ger.), n. A<sup>3</sup>uf-gus. See **AUFGIESSUNG**.—A-, **Absud**. An infuso-decoction. [L, 80.]—A<sup>3</sup>symp. A syrup made by adding sugar to an infusion or a tincture. [L, 57.]—A<sup>3</sup>thierchen, A. **würmchen**. The *Infusoria*. [B, 131.]—Geistiger A. An alcoholic infusion. [L, 80.]—Heisser A. A hot infusion. [L, 80.]—Kalter A. A cold infusion. [L, 80.]—Spirituöser A. See **Geistiger A.**—Wässriger A. An aqueous infusion. [L, 80.]

**AUFHÄNGE** (Ger.), n. A<sup>3</sup>uf-he<sup>2</sup>ng-e<sup>2</sup>. A supporting apparatus. [A, 315.]—A<sup>3</sup>band. A suspensory ligament or bandage. [L, 43.]—A<sup>3</sup>muskel. A suspensory muscle. [A, 315.]

**AUFHÄNGEN, AUFHÄNGUNG** (Ger.), n's. A<sup>3</sup>uf-he<sup>2</sup>ng-e<sup>2</sup>n, -ung. Suspension. [A, 315; L, 57.]

**AUFHAUFEN** (Ger.), v. tr. A<sup>3</sup>uf-hoif-e<sup>2</sup>n. To accumulate; as a refl. v. (*sich a.*), to accumulate, to be congested with; as a n., accumulation, congestion, stasis. [L, 43, 80; M, 7.]—A<sup>3</sup>d. Cumulative. [L, 80.]

**AUFHEBEBINDE** (Ger.), n. A<sup>3</sup>uf-ha-be<sup>2</sup>-bi<sup>2</sup>nd-e<sup>2</sup>. A truss or a suspensory bandage. [L, 46.]

**AUFHEBEMUSKEL** (Ger.), n. A<sup>3</sup>uf-ha-be<sup>2</sup>-musk-e<sup>2</sup>. A levator muscle. [L, 46.]

**AUFHEBER** (Ger.), n. A<sup>3</sup>uf-hab-e<sup>2</sup>r. 1. A levator muscle. 2. An elevator (the instrument). [A, 315.]

**AUFHEBUNGSBAND** (Ger.), n. A<sup>3</sup>uf-hab-ungs-ba<sup>2</sup>nd. A suspensory ligament. [L, 80.]

**AUFHEITERN** (Ger.), v. tr. A<sup>3</sup>uf-hit-e<sup>2</sup>rn. To exhilarate. [L, 80.]

**AUFHELLEN** (Ger.), v. tr. A<sup>3</sup>uf-he<sup>2</sup>l-le<sup>2</sup>n. To clarify; in microscopy, to make transparent. [A, 315; B, 270.]

**AUFHUSTEN** (Ger.), v. tr. and intr. A<sup>3</sup>uf-hust-e<sup>2</sup>n. To cough loudly, to cough up; as a n., expectoration. [L, 80; M, 6.]

**AUFKEIMEN** (Ger.), v. intr. A<sup>3</sup>uf-kim-e<sup>2</sup>n. To germinate, bud, sprout; as a n., germination. [B, 131.]

**AUFKLAFFEN** (Ger.), v. intr. A<sup>3</sup>uf-klaf-fe<sup>2</sup>n. To gape (said of wounds). [L, 46.]—A<sup>3</sup>d. In botany, *dispanus* (q. v.). [B, 198.]

**AUFKLAMMERN** (Ger.), v. tr. A<sup>3</sup>uf-klam-me<sup>2</sup>rn. To clamp. [A, 315.]

**AUFKLÄREN** (Ger.), v. tr. A<sup>3</sup>uf-klar-e<sup>2</sup>n. To clarify. [L, 46.]

**AUFKLÄRUNG** (Ger.), n. A<sup>3</sup>uf-klar-ung. Clarification. [L, 46.]

**AUFKNÄTTERN** (Ger.), v. intr. A<sup>3</sup>uf-kna<sup>2</sup>t-te<sup>2</sup>rn. To crepitate, crackle. [B, 131.]

**AUFKNISTERN** (Ger.), v. intr. A<sup>3</sup>uf-kni<sup>2</sup>st-e<sup>2</sup>rn. See **AUFKNÄTTERN**.

**AUFKNÜPFEN** (Ger.), v. tr. A<sup>3</sup>uf-knu<sup>2</sup>pf-e<sup>2</sup>n. To resolve, loosen. [L, 80.]

**AUFKOCHEN** (Ger.), v. tr. and intr. A<sup>3</sup>uf-koch-e<sup>2</sup>n. To boil; as a n., ebullition. [A, 315; L, 43.]

**AUFKOMMEN** (Ger.), n. A<sup>3</sup>uf-kom-me<sup>2</sup>n. Recovery, restoration to health. [L, 80.]

**AUFKRATZEN** (Ger.), v. tr. A<sup>3</sup>uf-kra<sup>2</sup>tz-e<sup>2</sup>n. To rasp, to scratch open. [A, 315.]

**AUFKUNFT** (Ger.), n. A<sup>3</sup>uf-kunft. See **AUFKOMMEN**.

**AUFLACHEN** (Ger.), v. tr. A<sup>3</sup>uf-lach-e<sup>2</sup>n. To incise a tree for the purpose of extracting the resin. [A, 315.]

**AUFLAGERUNG** (Ger.), n. A<sup>3</sup>uf-la<sup>3</sup>g-e<sup>2</sup>r-ung. An accumulation, a deposit. [A, 315.]

**AUFLAUF** (Ger.), n. A<sup>3</sup>uf-la<sup>3</sup>-uf. The tympanites of ruminants. [L, 80.]

**AUFLAUFEN** (Ger.), v. intr. A<sup>3</sup>uf-la<sup>3</sup>-uf-e<sup>2</sup>n. To swell, germinate, bud, shoot; as a n., swelling, inflation, intumescence, germination. [B, 131; L, 46.]

**AUFLEBEN** (Ger.), v. intr. A<sup>3</sup>uf-lab-e<sup>2</sup>n. To revive. [L, 80.]

**AUFLEGEN** (Ger.), v. tr. A<sup>3</sup>uf-lag-e<sup>2</sup>n. To apply (e. g., a blister, a poultice, etc.); as a n., see **AUFLEGUNG**. [A, 315.]

**AUFLEGUNG** (Ger.), n. A<sup>3</sup>uf-lag-ung. The act of applying (plasters, poultices, bandages, etc.). [A, 315.]

**AUFLIEGEN** (Ger.), v. intr. A<sup>3</sup>uf-leg-e<sup>2</sup>n. To lie, to recline; as a refl. v. (*sich a.*), to become sore from long lying. [A, 315.]—A<sup>3</sup>d. In botany, incumbent. [B, 131, 198.]

**AUFLÖCKERUNG** (Ger.), n. A<sup>3</sup>uf-lo<sup>2</sup>k-e<sup>2</sup>r-ung. Relaxation, softening. [L, 80.]

**AUFLÖSBAR** (Ger.), adj. A<sup>3</sup>uf-lu<sup>3</sup>s-ba<sup>2</sup>r. Soluble, also capable of being decomposed. [A, 315.]—A<sup>3</sup>keit. Solubility, also capability of decomposition. [A, 315.]

**AUFLÖSEN** (Ger.), v. tr. A<sup>3</sup>uf-lu<sup>3</sup>-e<sup>2</sup>n. To dissolve, resolve, melt, decompose, disorganize, loosen; as a n., a solution. [L, 80.]—A<sup>3</sup>d. Solvent, resolvent, diluent, laxative, aperitive, analytical. [A, 301, 315.]—A<sup>3</sup>de Mittel. Solvents. [A, 315.]

**AUFLÖSLICH** (Ger.), adj. A<sup>3</sup>uf-lu<sup>3</sup>-li<sup>2</sup>ch<sup>2</sup>. See **AUFLÖSBAR**.—A<sup>3</sup>keit. See **AUFLÖSBARKEIT**.

**AUFLÖSUNG** (Ger.), n. A<sup>3</sup>uf-lu<sup>3</sup>-z-ung. Solution, dissolution, analysis, decomposition. [A, 315; L, 80.]—A. **auf nassem Wege**. The process of solution when one or all of the bodies are liquid. [B, 48.] Cf. **ANALYSIS in the wet way**.—A. **auf trockenem Wege**. The process of solution when all the bodies are solid, and liquefaction is effected either by heat or by the interaction of the ingredients. [B, 48.] Cf. **ANALYSIS in the dry way**.—A. **der Linse**. Solution of the crystalline lens (i. e., soft cataract). [L, 135.]—A. **des Glaskörpers**. See **SYNCHESIS**.—A<sup>3</sup>s<sup>2</sup>fähig. Soluble, capable of being decomposed. [L, 46.]—A<sup>3</sup>s<sup>2</sup>fähigkeit. Solubility, capability of being decomposed. [L, 46.]—A<sup>3</sup>skraft. The solvent power or capacity. [L, 46.]—A<sup>3</sup>smittel. A menstruum or solvent. [B, 48.]—A<sup>3</sup>s<sup>2</sup>vermögen. 1. See **A<sup>3</sup>skraft**. 2. The resolving power (of the microscope). [B, 270.]—Gährende A. Decomposition by fermentation. [L, 46.]

**AUFNAHMSFÄHIGKEIT** (Ger.), n. A<sup>3</sup>uf-na<sup>3</sup>ms-fa<sup>2</sup>hi<sup>2</sup>g-keit. The power, possessed especially by amœboid cells, of ingesting foreign particles, the latter being often very large in proportion to the size of the cell. [Kollman, "Rec. zool. suisse," i, p. 259 (J).]

**AUFNAHMSÖFFNUNG** (Ger.), n. A<sup>3</sup>uf-na<sup>3</sup>ms-uf-f<sup>2</sup>nung. The mouth. [L, 59.]

**AUFNAHMSORGAN** (Ger.), n. A<sup>3</sup>uf-na<sup>3</sup>ms-or-ga<sup>2</sup>n. An organ for the reception of nourishment in plants. [B, 36.]

**AUFNÄHREN** (Ger.), v. tr. A<sup>3</sup>uf-nar-e<sup>2</sup>n. See **AUFFÜTTERN**.

**AUFNEHMEN** (Ger.), v. tr. A<sup>3</sup>uf-nam-e<sup>2</sup>n. To take up, absorb, appropriate. [A, 315.]

**AUFPLATZEN** (Ger.), n. A<sup>3</sup>uf-pla<sup>2</sup>tz-e<sup>2</sup>n. In botany, *ruptura* (as distinct from dehiscence). [B, 198.]—A<sup>3</sup>d. See **RUMPENS**.

**AUFQUALMEN** (Ger.), v. intr. A<sup>3</sup>uf-kwa<sup>2</sup>l-me<sup>2</sup>n. To rise in the form of vapor. [A, 315.]

**AUFQUELLEN** (Ger.), v. tr. and intr. A<sup>3</sup>uf-kwe<sup>2</sup>l-le<sup>2</sup>n. To cause to swell in water, to soak up, to steep; to well up, to bubble, to swell. [A, 315.]

**AUFRAFFEN** (Ger.), v. tr. A<sup>3</sup>uf-ra<sup>2</sup>ff-fe<sup>2</sup>n. To pick up; as a refl. v. (*sich a.*), to recover one's strength after an illness. [A, 315.]

**AUFRAUSPERN** (Ger.), v. tr. A<sup>3</sup>uf-rois<sup>2</sup>p-e<sup>2</sup>rn. To cough up. [A, 315.]

**AUFRECHT** (Ger.), adj. A<sup>3</sup>uf-re<sup>2</sup>ch<sup>2</sup>t. In botany, erect. [B, 198.]—A<sup>3</sup>abstehend. See **ERECTO-PATENS**.—A. **oblong**. Oblong and longer in the vertical than in the transverse direction (said of the separate segments of a tape-worm). [B, 27.]—A<sup>3</sup>stehend. The upright posture. [L, 80.]—A. **stehend**. In botany, erect. [B, 36.]

**AUFREGUNG** (Ger.), n. A<sup>3</sup>uf-rag-ung. Excitement, agitation, commotion. [A, 315; L, 80.]

**AUFREIBEN** (Ger.), v. tr. A<sup>3</sup>uf-rif-e<sup>2</sup>n. To fret, to gall, to chafe; as a n., attrition. [A, 315; L, 43.]

**AUFREISSEN** (Ger.), v. intr. A<sup>3</sup>uf-ris-se<sup>2</sup>n. To burst, to crack, to gape, to chap; as a n., see **AUFPLATZEN**. [B, 198; L, 46.]—A<sup>3</sup>d. See **RUMPENS**.

**AUFREIZUNG** (Ger.), n. A<sup>3</sup>uf-ritz-ung. Excitation. [M, 7.]

**AUFRECHTEMUSKEL** (Ger.), n. A<sup>3</sup>uf-ri<sup>2</sup>ch<sup>2</sup>t-e<sup>2</sup>-musk-e<sup>2</sup>. An erector muscle. [L, 46.]

**AUFRICHTEN** (Ger.), v. tr. A<sup>3</sup>uf-ri<sup>2</sup>ch<sup>2</sup>t-e<sup>2</sup>n. To erect; as a n., erection. [A, 315; L, 80.]—A<sup>3</sup>d. Erecting. [A, 315.]—See **Sich a<sup>3</sup>d.**—A<sup>3</sup>der Muskel. An erector muscle. [A, 315.]—Sich a<sup>3</sup>d. In botany, *erigens* (q. v.). [B, 198.]

**AUFRICHTER** (Ger.), n. A<sup>3</sup>uf-ri<sup>2</sup>ch<sup>2</sup>t-e<sup>2</sup>-r. An erector muscle. [L, 43.]

**AUFRICTUNG** (Ger.), n. A<sup>3</sup>uf-ri<sup>2</sup>ch<sup>2</sup>t-ung. Erection. [L, 46.]—A<sup>3</sup>s<sup>2</sup>vermögen. The power or capability of erection. [L, 50.]

**AUFRÖCHELN** (Ger.), v. intr. A<sup>3</sup>uf-ru<sup>2</sup>ch<sup>2</sup>-e<sup>2</sup>n. To make a rattling sound in the throat. [A, 315.]

**AUFRÜLPSEN** (Ger.), n. A<sup>3</sup>uf-ru<sup>2</sup>lps-e<sup>2</sup>n. Eructation. [L, 80.]

**AUFSÄUBERN** (Ger.), v. tr. A<sup>3</sup>uf-zoi-e<sup>2</sup>rn. To acidify, to leaven. [L, 46.]

**AUFSAUGEN** (Ger.), v. tr. A<sup>3</sup>uf-za<sup>3</sup>-ug-e<sup>2</sup>n. To absorb; as a n., absorption. [B, 131.]

**AUFSÄUGEN** (Ger.), v. tr. A<sup>3</sup>uf-*zoig*-e<sup>2</sup>n. To bring up (a child) by suckling. [A, 315.]

**AUFSÄUGUNG** (Ger.), n. A<sup>3</sup>uf-*za*<sup>3</sup>-ug-ung. Absorption. [B, 131.]—*Zurücksa*. Resorption. [K, 16.]

**AUFSALBEN** (Ger.), v. tr. A<sup>3</sup>uf-*za*<sup>3</sup>lb-e<sup>2</sup>n. To apply an ointment. [A, 315.]

**AUFSCHÄRFEN** (Ger.), v. tr. A<sup>3</sup>uf-*sharf*-e<sup>2</sup>n. To abrade. [A, 315.]

**AUFSCHÄRFUNG** (Ger.), n. A<sup>3</sup>uf-*sharf*-ung. Abrasion. [A, 315.]

**AUFSCHARRER** (Ger.), n. A<sup>3</sup>uf-*sha*<sup>3</sup>r-re<sup>2</sup>r. A scraping instrument. [L, 80.]

**AUFSCHÄUMEN** (Ger.), v. intr. A<sup>3</sup>uf-*shoim*-e<sup>2</sup>n. To froth, to foam; as a n., effervescence. [A, 315; L, 80.]

**AUFSCHIELEN** (Ger.), v. intr. A<sup>3</sup>uf-*shel*-e<sup>2</sup>n. To squint upward. [A, 315.]

**AUFSCHNIENEN** (Ger.), v. tr. A<sup>3</sup>uf-*shen*-e<sup>2</sup>n. To bind with splints. [A, 315.]

**AUFSCHIESSEN** (Ger.), v. intr. A<sup>3</sup>uf-*shes*-se<sup>2</sup>n. To shoot up, to spire, to grow rapidly (said of plants). [A, 315.]—A<sup>3</sup>d. Arborescent. [B, 131.]

**AUFSCHINDEN** (Ger.), v. refl. (*sich a.*) A<sup>3</sup>uf-*shi*<sup>2</sup>nd-e<sup>2</sup>n. To excoriate one's self. [A, 315.]

**AUFSCHLAG** (Ger.), n. A<sup>3</sup>uf-*shla*<sup>3</sup>g. A fomentation. [L, 80.]

**AUFSCHLESSEN** (Ger.), v. refl. (*sich a.*) A<sup>3</sup>uf-*shles*-se<sup>2</sup>n. To expand (said of buds and flowers). [A, 315.]

**AUFSCHMELZEN** (Ger.), v. intr. A<sup>3</sup>uf-*shme*<sup>2</sup>ltz-e<sup>2</sup>n. To melt, to dissolve, to liquefy. [A, 315.]

**AUFSCHNEIDEN** (Ger.), v. tr. A<sup>3</sup>uf-*shnid*-e<sup>2</sup>n. To make an incision, to dissect; as a n., dissection, incision. [L, 46.]

**AUFSCHNEIDUNG** (Ger.), n. A<sup>3</sup>uf-*shnid*-ung. Dissection, incision. [L, 46.]

**AUFSCHNITT** (Ger.), n. A<sup>3</sup>uf-*shni*<sup>2</sup>t. A slit, an incision. [A, 315.]

**AUFSCHOSSEN** (Ger.), v. intr. A<sup>3</sup>uf-*shos*-sen. To shoot, to sprout. [A, 315.]

**AUFSCHÖSSLING** (Ger.), n. A<sup>3</sup>uf-*shu*<sup>3</sup>s-li<sup>2</sup>ng. A shoot, a sprout. [B, 131.]

**AUFSCHRAMMEN** (Ger.), v. tr. A<sup>3</sup>uf-*shra*<sup>3</sup>m-me<sup>2</sup>n. To scratch (the skin). [A, 315.]

**AUFSCHRUNDEN** (Ger.), v. intr. A<sup>3</sup>uf-*shrund*-e<sup>2</sup>n. To crack, to chap. [A, 315.]

**AUFSCHWÄMMEN** (Ger.), **AUFSCHWELLEN** (Ger.), v's intr. A<sup>3</sup>uf-*schwam*-me<sup>2</sup>n, -*shwe*<sup>2</sup>le<sup>2</sup>n. To swell, bloat. [A, 315.]

**AUFSCHWELLUNG** (Ger.), n. A<sup>3</sup>uf-*shwe*<sup>2</sup>lung. Swelling, tumefaction, turgescence. [B, 131.]

**AUFSCHWUNG** (Ger.), n. A<sup>3</sup>uf-*shwung*. Exaltation. [M, 6.]

**AUFSEIGEN** (Ger.), v. tr. A<sup>3</sup>uf-*zig*-e<sup>2</sup>n. To wean (said of cattle). [A, 315.]

**AUFSEIDEN** (Ger.), v. tr. A<sup>3</sup>uf-*zed*-e<sup>2</sup>n. To boil gently; as a n., ebullition. [B, 131; L, 46.]

**AUFSITZEN** (Ger.), v. intr. A<sup>3</sup>uf-*zi*<sup>2</sup>tz-e<sup>2</sup>n. To sit up (with a sick person); as a refl. v. (*sich a.*), to become sore by sitting. [A, 315.]—A<sup>3</sup>d. In botany, sessile (*insidens*). [B, 198.]

**AUFSPALTEN** (Ger.), v. intr. A<sup>3</sup>uf-*spa*<sup>3</sup>lt-e<sup>2</sup>n. To split, to crack, to chap. [A, 315; L, 80.]

**AUFSPERRER** (Ger.), n. A<sup>3</sup>uf-*spe*<sup>2</sup>r-re<sup>2</sup>r. A dilator. [L, 135.]

**AUFSPRIESSEN** (Ger.), v. intr. A<sup>3</sup>uf-*spres*-se<sup>2</sup>n. To sprout, to shoot, to germinate. [A, 315.]

**AUFSPRINGEN** (Ger.), v. intr. A<sup>3</sup>uf-*spr*<sup>2</sup>ng-e<sup>2</sup>n. To crack, to chap; as a n., chapping, dehiscence. [A, 315; B, 36.]—A<sup>3</sup>d. Dehiscens. [B, 36.]—A. durch Klappen. A. durch Spalten. Valvular dehiscence. [B, 36.]—A. durch Zähne. See DEHISCENTIA *dentalis*.—A. in der Quere. Transverse dehiscence. [B, 198.]—A. in Karpellen. A. in Knospe. Carpellary or septicidal dehiscence. [B, 198.]—A. in Löchern. Porous dehiscence. [B, 198.]—A. in Ritzen. A. in Spalten. Dehiscence by chinks (*dehiscencia rimalis*). [B, 198.]—A. in Zähnen. See DEHISCENTIA *dentalis*.—A. nach aussen. Extrorse dehiscence. [B, 198.]—A. nach innen. Introrse dehiscence. [B, 198.]—Fachspaltiges A. Loculicidal dehiscence. [B, 198.]—Gliederiges A. Articular dehiscence. [B, 198.]—Halbklappiges A. Semivalvular dehiscence. [B, 198.]—Klappiges A. Valvular dehiscence. [B, 198.]—Quera<sup>3</sup>. Transverse dehiscence. [B, 198.]—Scheidewandbreissendes A. Septifragal dehiscence. [B, 198.]—Scheidewandspaltiges A. Septicidal dehiscence. [B, 198.]—Umschnittenes A. Circumscissile dehiscence. [B, 36.]—Zähliges A. See DEHISCENTIA *dentalis*.

**AUFSPRITZEN** (Ger.), v. tr. A<sup>3</sup>uf-*spr*<sup>2</sup>itz-e<sup>2</sup>n. To syringe. [B, 131.]

**AUFSPROSSEN** (Ger.), v. intr. A<sup>3</sup>uf-*spro*<sup>2</sup>s-se<sup>2</sup>n. To shoot, to sprout. [L, 46.]

**AUFSPRÖSSLING** (Ger.), n. A<sup>3</sup>uf-*spru*<sup>3</sup>s-li<sup>2</sup>ng. A shoot or sprout. [B, 131.]

**AUFSPRUDELN** (Ger.), v. intr. A<sup>3</sup>uf-*spru*<sup>2</sup>d-e<sup>2</sup>n. To bubble up (said of springs), to sparkle (said of wine). [A, 315.]

**AUFSTECHEN** (Ger.), v. tr. A<sup>3</sup>uf-*ste*<sup>2</sup>ch-e<sup>2</sup>n. To open by puncture. [L, 46.]

**AUFSTEHEN** (Ger.), v. intr. A<sup>3</sup>uf-*sta*-be<sup>2</sup>n. To ferment a second time (said of wine). [A, 315.]—A<sup>3</sup>d. In botany, *arrectus* (q. v.). [B, 198.]

**AUFSTEIGEN** (Ger.), v. intr. A<sup>3</sup>uf-*stig*-e<sup>2</sup>n. To ascend; as a n., an ascent. [L, 80.]—A<sup>3</sup>d. Ascending, assurgent. [B; L, 80.]—A. der Gebärmutter, A. der Mutter. An hysterical attack. [L, 43; M, 7.]—A. zum Kopfe. A mounting (as of blood) to the head. [L, 80.]

**AUFSTOSSEN** (Ger.), v. tr. and intr. A<sup>3</sup>uf-*sto*<sup>2</sup>s-se<sup>2</sup>n. 1. To chafe, to abrade. 2. To become sour, to ferment afresh, to belch up wind. 3. As a n., eructation. [L, 46.]

**AUFSTÖSSIG** (Ger.), adj. A<sup>3</sup>uf-*stu*<sup>2</sup>s-si<sup>2</sup>g. Sour, causing eructations. [M, 7.]—A<sup>3</sup>keit. Want of appetite. [M, 7.]

**AUFSTREBEND** (Ger.), adj. A<sup>3</sup>uf-*strab*-e<sup>2</sup>nd. In botany, assurgent. [B.]

**AUFSTREIFEN** (Ger.), v. tr. A<sup>3</sup>uf-*strif*-e<sup>2</sup>n. To wound, to gall. [L, 46.]

**AUFSTÜTZIG** (Ger.), adj. A<sup>3</sup>uf-*stu*<sup>2</sup>tz-i<sup>2</sup>g. Sick, having no appetite (said of cattle). [M, 7.]

**AUFÜSSEN** (Ger.), v. tr. A<sup>3</sup>uf-*zu*<sup>3</sup>s-se<sup>2</sup>n. To edulcorate. [B, 131.]

**AUFGAUCHEND** (Ger.), adj. A<sup>3</sup>uf-*ta*<sup>3</sup>-uch<sup>2</sup>-e<sup>2</sup>nd. In botany, emerging (*emergens*). [B, 198.]

**AUFTHAUEN** (Ger.), v. tr. A<sup>3</sup>uf-*ta*<sup>3</sup>-u-e<sup>2</sup>n. To liquefy. [A, 315.]

**AUFTHAUPUNKT** (Ger.), n. A<sup>3</sup>uf-*ta*<sup>3</sup>-u-punkt. The dew-point. [A, 315.]

**AUFTREIBEN** (Ger.), v. tr. A<sup>3</sup>uf-*trib*-e<sup>2</sup>n. To distend, to cause to swell; in chemistry, to sublime. [A, 315.]

**AUFTREIBUNG** (Ger.), n. A<sup>3</sup>uf-*trib*-ung. Distension. [L, 46.]—A. des Rückgrats. See RHACHIOPHYMA.

**AUFTRINKEN** (Ger.), v. tr. A<sup>3</sup>uf-*tri*<sup>2</sup>n<sup>2</sup>k-e<sup>2</sup>n. To absorb. [M, 7.]

**AUFTROCKNEN** (Ger.), v. tr. and intr. A<sup>3</sup>uf-*tro*<sup>2</sup>k-ne<sup>2</sup>n. To dry, to adhere to in drying. [A, 315.]

**AUFTROCKNUNG** (Ger.), n. A<sup>3</sup>uf-*tro*<sup>2</sup>k-nung. Desiccation. [A, 315.]

**AUFRÖPFELN, AUFRÖPFEN** (Ger.), v's tr. and intr. A<sup>3</sup>uf-*tru*<sup>2</sup>pf-e<sup>2</sup>n, -e<sup>2</sup>n. To apply to, or fall upon, in drops. [A, 315.]

**AUFWALL** (Ger.), n. A<sup>3</sup>uf-*va*<sup>3</sup>l. See AUFWALLUNG.

**AUFWALLEN** (Ger.), v. intr. A<sup>3</sup>uf-*va*<sup>3</sup>l-le<sup>2</sup>n. To boil, to bubble, to effervesce; as a n., effervescence, ebullition. [A, 315; L, 80.]

**AUFWÄLLEN** (Ger.), v. tr. A<sup>3</sup>uf-*val*-le<sup>2</sup>n. To boil gently. [A, 315.]

**AUFWALLUNG** (Ger.), n. A<sup>3</sup>uf-*va*<sup>3</sup>l-lung. A bubbling up, ebullition, effervescence, orgasm; in veterinary medicine, urticaria. [B, 131; L, 43, 46; M, 6.]—A<sup>3</sup>sieber. The urticaria of horses. [M, 6.]

**AUFWÄRTSKEHRUNG** (Ger.), n. A<sup>3</sup>uf-*varts*-ke<sup>2</sup>r-ung. A turning upward. [A, 315.]—A. der Augenlider. Eversion of the eyelids. [A, 315.]

**AUFWÄRTSZIEHER** (Ger.), n. A<sup>3</sup>uf-*varts*-tse-he<sup>2</sup>r. A levator muscle. [L, 59.]

**AUFWEICHEN** (Ger.), v. tr. and intr. A<sup>3</sup>uf-*wich*-e<sup>2</sup>n. To moisten, to soften, to become soft. [A, 315; L, 80.]—A<sup>3</sup>d. Emollient. [B, 131.]—A<sup>3</sup>des Mittel. An emollient. [A, 315.]

**AUFWEICHUNG** (Ger.), n. A<sup>3</sup>uf-*wich*-ung. The softening or breaking up of a tissue. [L, 135.]

**AUFWISCHEN** (Ger.), v. tr. A<sup>3</sup>uf-*vi*<sup>2</sup>sh-e<sup>2</sup>n. To sponge. [A, 309.]

**AUFZEHNEN** (Ger.), v. tr. A<sup>3</sup>uf-*tsar*-e<sup>2</sup>n. To absorb. [B, 131.]

**AUFZIEHEN** (Ger.), v. tr. and intr. A<sup>3</sup>uf-*tse*-he<sup>2</sup>n. 1. To come to a head (said of abscesses). [A, 315; L, 80.] 2. To breed, to rear. [A, 309.]

**AUFZIEHER** (Ger.), n. A<sup>3</sup>uf-*tse*-he<sup>2</sup>r. An elevator, a levator muscle. [L, 46.]

**AUFZUG** (Ger.), n. A<sup>3</sup>uf-*tsug*. In veterinary parlance, a portion of the shoe turned up in front and fastened upon the fore part of the hoof. [A, 315.]

**AUGAPFEL** (Ger.), n. A<sup>3</sup>ug-a<sup>3</sup>p-fe<sup>2</sup>l. The eyeball, also the pupil. [B; L, 115.]—A<sup>3</sup>abscess. See PANOPHTHALMITIS *purulenta*.—A<sup>3</sup>ausrottung. Removal of the eyeball. [L, 135.]—A<sup>3</sup>bindehaut. The ocular conjunctiva. [L, 115.]—A<sup>3</sup>colobom. See COLOBOMA *oculi*.—A<sup>3</sup>entzündung. See PANOPHTHALMITIS. —A<sup>3</sup>geschwulst. See EXOPHTHALMIA. —A<sup>3</sup>halter. See OPHTHALMOSIAT. —A<sup>3</sup>haut. Any of the tunics of the eye. [L, 80.]—A<sup>3</sup>krampf. See NYSTAGMUS. —A<sup>3</sup>krebs. Cancer of the eyeball. [L, 135.]—A<sup>3</sup>lähmung. Paralysis of the iris. [L, 46.]—A<sup>3</sup>starrkrampf. Spasm of the eyeball. [L, 59.]—A<sup>3</sup>vergrößerung. See OPHTHALMACROSIS. —A<sup>3</sup>vorfal. See EXOPHTHALMIA. —A<sup>3</sup>zuckung. See NYSTAGMUS. —Dicke A<sup>3</sup>haut. The sclerotic coat of the eye. [L, 80.]

**AUGASTA**, n. The Bengali name of a medicine which, according to Roxburgh, is derived from the *Agati grandiflora*. [L, 87.]

**AUGE** (Fr.), n. Ozh. 1. A term formerly applied to any vessel or receptacle of the body containing fluid. [L, 41.] 2. The space between the rami of the inferior maxilla of the horse. [L, 32.]—A<sup>3</sup>galvanique. A box divided into compartments for holding the cells of a galvanic battery. [L, 41.]

**AUGE** (Ger.), n. A<sup>3</sup>ug-e<sup>2</sup>. 1. The eye. 2. In botany, the eye or oculus; a bud, especially when it is first beginning to grow; the portion of a plant which is used in budding; also the disc-shaped spot in the top of a fruit formed by the persistent apex of the ovary. [B, 198.]—Abzieha<sup>3</sup>mmuskelnerv. See *Trochlear NERVE*. —Abziehender A<sup>3</sup>muskel. The external rectus muscle of the eye.

[L.]—**Adducirender A'muskel.** The internal rectus muscle of the eye. [L.]—**Aderhaut des A's.** See CHORIOID.—**Aegyptische A'nest.** See *Egyptian OPHTHALMIA*.—**Aeusserer A'muskel.** nerv. See *Trochlear NERVE*.—**Aeusserer A'muskelband.** *Aeusseres A'winkelband.* See *External tarsal ligament*.—**Amaurotisches Katzena.** See *Amaurotic cat's eye*.—**Angewachsenes A'nhäutchen.** See *Ocular conjunctiva*.—**Anziender A'muskel.** The internal rectus muscle of the eye. [L.]—**Arthritische A'entzündung.** See *OPHTHALMIA arthritica*.—**Attollirender A'muskel.** The superior rectus muscle of the eye. [L.]—**A'nabsc.** See *PANOPHTHALMITIS purulenta*.—**A'nachse.** See *Optic axis*.—**A'nader.** See *OPHTHALMIC VEIN*.—**A'naderhaut.** See CHORIOID.—**A'naderlass.** Abstraction of blood from the eye. [L. 135.]—**A'nähnlich.** Resembling an eye. [L. 46.]—**A'näpfel.** See AUGAPFEL.—**A'narterie.** See *OPHTHALMIC ARTERY*.—**A'narznei.** An ophthalmic medicine. [L. 46.]—**A'arzt.** See *OPHTHALMOLOGIST*.—**A'närztlich.** Ophthalmological. [L.]—**A'nauströtung.** Removal of the eye. [L. 46.]—**A'naußschälung.** Eucleation of the eye. [L. 46, 135.]—**A'naxe.** See *Optic axis*.—**A'nbad.** The washing of an eye, also the fluid used for that purpose. [L. 43, 46.]—**A'nbadwünchen.** See *A'nbecken*.—**A'nball.** The eyeball. [L. 46.]—**A'n balsam.** An eye-salve. [L. 46.]—**A'nbeben.** See NYSTAGMUS.—**A'nbecken.** *A'becker.* A basin or dish used for bathing the eyes. [L. 135.]—**A'nbersen.** Rupture of the eyeball.—**A'nbeschreibung.** See *OPHTHALMOLOGY*.—**A'nbeschützer.** An eye-protector.—**A'nbetrug.** An optical illusion. [L.]—**A'nbewegender.** The third cranial (motor oculi) nerve. [L. 43.]—**A'nbinde.** A bandage for the eyes. [L. 135.]—**A'nbindehaut.** See *Ocular conjunctiva*.—**A'n bistourie.** A bistoury for use on the eye. [L. 135.]—**A'nblasen.** The primitive optic vesicle. [L. 17.]—**A'nblasengrube.** See *Optic cup*.—**A'nblasenspalte.** See *Fetal ocular fissure*.—**A'nblasenstiel.** The pedicle of the optic vesicle; a projection in the brain of the embryo, at the extremity of which the vesicle is situated. [L. 17.]—**A'nblasenwurm.** See *CYSTERCUS cellulosus oculi*.—**A'nblenorrhöe.** See *Gonorrhoeal OPHTHALMIA*.—**A'nblenorrhöe der Neugeborenen.** See *OPHTHALMIA neonatorum*.—**A'nblinken.** *A'nblinzeln.* *A'nblinzeln.* See *NICTITATION*.—**A'nblinde.** *A'nblidigkeit.* Amblyopia. [L. 46, 135.]—**A'nblutader.** See *OPHTHALMIC VEIN*.—**A'nblutfluss.** See *A'nblutung*.—**A'nblutschwamm.** A fungous growth of the eye. [A. 317.]—**A'nblütthe.** See *ANAGALLIS arvensis*.—**A'nblutung. *A'nblutunterlaufung.* See *HEMOPHTHALMIA*.—**A'nbogen.** 1. The iris. [L. 46.] 2. See *Orbital arch*.—**A'nbogenfortsatz.** The zygomatic process of the superior maxilla. [L. 44.]—**A'nbogenschuppe.** Bojanus's term for the supra-temporal bone of Owen. [L. 27.]—**A'nbrand.** See *BLEPHARANTHRACOSIS*.—**A'nbraune.** The eyebrow. [A. 301.]—**A'nbraunenausfall.** See *A'nbraunenausfall*.—**A'nbrauenbogen.** See *Superciliary RIDGES*.—**A'nbrauenmuskel.** *A'nbrauenrunzler.* See *CORRUGATOR supercilii*.—**A'nbrauenzacke.** A term applied to a few fibres of the occipitofrontalis muscle which run down toward the inner canthus of the eye and the side of the nose. [A. 202.]—**A'nbraune.** The eyebrow. [L. 80.]—**A'nbraunenausfall.** Falling out of the eyebrows. [L. 46.]—**A'nbrauenbogen.** See *Superciliary RIDGES*.—**A'nbrauenbogenloch.** See *Supra-orbital FORAMEN*.—**A'nbrauenkraut.** The genus *Ophrys*. [A. 315.]—**A'nbrauenmuskel.** See *CORRUGATOR supercilii*.—**A'nbrauennerve.** See *Supra-orbital NERVE*.—**A'nbrauenrunzler.** See *CORRUGATOR supercilii*.—**A'nbraunen-Verschönerungsmittel.** See *CALIBLEPHARON*.—**A'nbrauneggend.** The superciliary region. [L. 43.]—**A'nbraunhaare.** The eyebrows. [L. 135.]—**A'nbreite.** The space between the eyes. [L. 30.]—**A'nbremsen.** See *A'nwech*.—**A'nbruch.** See *OPHTHALMOCELE*.—**A'nbürste.** See *A'nldkratzer*.—**A'nbutter.** 1. The secretion of the Meibomian glands. [L. 43.] 2. See *LIPITTUDO*.—**A'nbutterdrüsen.** See *Meibomian GLANDS*.—**A'ncatarrh.** Catarrhal conjunctivitis. [L. 57.]—**A'ndecke.** See *NICTITATION*.—**A'ndeckel.** 1. An eye-protector. 2. The eyelid. [L. 43.]—**A'ndeckelhaare.** The eyelashes. [L. 43.]—**A'ndiät.** *A'ndiätetik.* The hygiene of the eye, or dietetics with reference to the eye. [L. 46, 80.]—**A'ndienst.** See *A'ntrost*.—**A'ndouche.** Affusion of the eyes with water. [L. 43.]—**A'ndrücken.** Pain in the eyes, especially that due to pressure. [L. 46, 59.]—**A'ndrüse.** See *LACRYMAL GLAND*.—**A'ndrüsenentzündung.** See *OPHTHALMIA glandularis*.—**A'ndunkelheit.** A diminution or loss of the sight. [L. 135.]—**A'ndisen.** A cautery iron for use on the eye or its appendages. [L. 135.]—**A'ndelnerung.** Suppuration of the eye. [L. 43.]—**A'nentzündung.** Any inflammatory process in the eye. [L. 135.]—**A'nentzündung der Neugeborenen.** See *OPHTHALMIA neonatorum*.—**A'nfällig.** Manifest, distinct. [B. 198.]—**A'nfeld.** The visual field. [A. 317.]—**A'nfell.** 1. A corneal opacity. [L. 46.] 2. A pterygium. [A. 317.]—**A'nfenchigkeit.** A term applied to the aqueous or vitreous humor of the eye. [L. 80.]—**A'nfistel.** A lacrymal or corneal fistula. [L. 135.]—**A'nfliche.** An orbital or ocular surface.—**A'nflechte.** See *A'nflechte*.—**A'nflecke.** 1. A pigment spot on the eye. [B.] 2. See *A'nfell*.—**A'nfleckig.** See *OCULATE*.—**A'nfloss.** A discharge from the eye. [A. 301.]—**A'nflossig.** Affected with a watery discharge from the eyes. [L. 46.]—**A'nförmig.** See *OCULATE*.—**A'nforsatz.** An orbital process. [L. 80.]—**A'nfunkeln.** See *PHOTOPSIA*.—**A'nganglie.** See *Optic GANGLION*.—**A'ngefässe.** The vessels of the eye. [L. 135.]—**A'ngegend.** The region of the eye. [L. 80.]—**A'ngerienkürbis.** See *CUCURBITA citrulus*.—**A'ngeschwulst.** See *EXOPHTHALMIA*.—**A'ngeschwür.** An ulcer upon the cornea or the sclerotic. [L. 30.]—**A'ngespenser.** An optical illusion. [L. 80.]—**A'ngewölkt.** See *A'nfell*.—**A'nglas.** An eye-glass or the eye-piece of a telescope or microscope. [B.]—**A'ngläser.** Eye-glasses, spectacles. [A. 309.]—**A'nglasscheifer.** See *OPHTHALMIA*.—**A'ngrube.** 1. The orbit. 2. The depression above the eyes in certain animals. [L. 46.]—**A'ngrund.** See *FUNDUS oculi*.—**A'nhalter.** See *OPHTHALMOSTAT*.—**A'nhaut.** Any of the tunics of the eye. [L. 43.]—**A'nhäutchen.** See *LETCOMA*.—**A'nhelkunde.** *A'nhellehre.* See *OPHTHALMOLOGY*.—**A'nheraustre-****

**ten.** See *EXOPHTHALMIA*.—**A'nhintergrund.** See *FUNDUS oculi*.—**A'nhöhle.** The orbit. [L. 80.]—**A'nhöhlenarterie.** A term applied to any of the arteries contained within the orbit. [L. 80.]—**A'nhöhlenbogen.** See *Superciliary RIDGES*.—**A'nhöhlendach.** *A'nhöhlendecke.* The roof of the orbit. [A. 317; L. 80.]—**A'nhöhlentzündung.** Inflammation of the structures surrounding the eye. [L. 135.]—**A'nhöhlenfissur.** See *Sphenoidal fissure*.—**A'nhöhlenfläche.** The orbital surfaces of the bones which form the orbits. [L. 115.]—**A'nhöhlenflügel.** See *Alæ parvæ ossis sphenoidæ*.—**A'nhöhlenfortsatz.** An orbital process. [L. 80.]—**A'nhöhlenhaut.** A term applied to the orbital aponeurosis or to the periosteum of the orbit. [L. 80.]—**A'nhöhlenkamm.** See *CRISTA orbitalis*.—**A'nhöhlenkrebs.** An orbital cancer. [L. 135.]—**A'nhöhlenleuny.** See *Orbital NERVE*.—**A'nhöhlenrand.** The margin of the orbit. [L. 80.]—**A'nhöhlenschlagader.** See *Orbital ARTERY*.—**A'nhöhlenspalte.** See *Sphenoidal fissure*.—**A'nhöhlenwassersucht.** See *HYDROPHthalmia*.—**A'nhöhlenwinkel.** The angle of the orbit. [L. 80.]—**A'nhöhlfläche.** See *A'nhöhlenfläche*.—**A'nhindex.** See *Orbital INDEX*.—**A'nhücken.** Itching of the eyes. [A. 317.]—**A'nhkammer.** A chamber of the eye. [A. 301.]—**A'nhklappe.** See *EYELID*.—**A'nhklapperand.** See *A'nhiderrand*.—**A'nhklinik.** An eye-infirmity. [L. 46.]—**A'nhknorpel.** The tarsal cartilage. [A. 301.]—**A'nhknoten.** See *OPHTHALMIC GANGLION*.—**A'nhkrampf.** See *NYSTAGMUS*.—**A'nhkrankenanstalt.** An eye-infirmity. [L. 43.]—**A'nhkranken-zimmer.** A room designed for the treatment of diseases of the eyes. [L. 135.]—**A'nhkrankheit.** A disease affecting the eyes. [L. 43.]—**A'nhkrankheitslehre.** See *OPHTHALMOLOGY*.—**A'nhkrätze.** Gonorrhoeal ophthalmia. [L. 135.]—**A'nhkratzen.** Scarification of the conjunctiva. [L. 135.]—**A'nhkratzer.** An instrument for scarifying the conjunctiva. [L. 135.]—**A'nhkrebs.** Cancer of the eye. [L. 135.]—**A'nhkreis.** The orbit. [L. 40.]—**A'nhkugel.** The eyeball. [L. 80.]—**A'nhlefen.** The eyelids. [L. 80.]—**A'nhlehere.** See *OPHTHALMOLOGY*.—**A'nhleiden.** See *A'nhkrankheit*.—**A'nhleise.** *A'nhleiste.* The orbit. [L. 80.]—**A'nhleiste-fortsatz.** An orbital process. [L. 80.]—**A'nhlicht.** Eyesight. [L. 46.]—**A'nhlid.** An eyelid. [L. 43.]—**A'nhlidarterien.** See *Palpebral ARTERIES*.—**A'nhlidband.** A tarsal ligament. [L. 115.]—**A'nhlidbildung.** See *BLEPHAROPTOSIS*.—**A'nhlidbindehaut.** See *Palpebral conjunctiva*.—**A'nhlidblutaden.** The palpebral veins. [L. 115.]—**A'nhlidcarbunkel.** See *BLEPHARANTHRACOSIS*.—**A'nhlidcolobom.** See *COLOBOMA palpebrae*.—**A'nhliddrüsen.** The Meibomian glands. [L. 80.]—**A'nhlidrüseneentzündung.** See *BLEPHARITIS glandulosa*.—**A'nhlidarterien.** The palpebral arteries. [L. 32.]—**A'nhliderauswärtskehrung.** See *ECTROPION*.—**A'nhlidderbalgeschwulst.** A cystic tumor of the eyelid. [L. 135.]—**A'nhlidbänder.** The tarsal ligaments. [L. 80.]—**A'nhlidbeule.** A furuncle on the inner surface of the eyelid. [L. 135.]—**A'nhlidblinzeln.** See *NICTITATION*.—**A'nhlidderbindehaut.** The palpebral conjunctiva. [L.]—**A'nhlidderbindehautentzündung.** Palpebral conjunctivitis. [L. 50.]—**A'nhlidderbogen der A'nhlidarterien.** A term applied to the arcus tarseus inferior and the arcus tarseus superior (q. v.). [L. 80.]—**A'nhlidderbrand.** See *BLEPHARANTHRACOSIS*.—**A'nhliddercallosität.** See *A'nhlidverknorpelung*.—**A'nhliddercarbunkel.** See *BLEPHARANTHRACOSIS*.—**A'nhlidderdrüsen.** See *Meibomian GLANDS*.—**A'nhlidderdrüsenblennorrhöe.** *A'nhlidderdrüsenentzündung.* Inflammation of the Meibomian glands. **AUGELN** (Ger.), v. tr. Oig'e<sup>2</sup>ln. To graft or bud; as a n., a bud or graft. [L, 46.]

**AUGIA** (Lat.), n. f. A<sup>4</sup>(a<sup>3</sup>u<sup>4</sup>)-ji<sup>2</sup>(gi<sup>2</sup>)-a<sup>3</sup>. From *αὔγι*, brilliancy, on account of the lustre of the varnish. Fr., *augie*. A genus of anacardiaceous trees established by Loureiro, of uncertain botanical characters, perhaps allied to *Rhus*. [B, 42, 121.]—*A. chinensis*, *A. sinensis* [Loureiro]. A tree from the trunk of which a resinous juice is obtained, constituting, according to Loureiro, the true varnish (lac) of the Chinese. The resin contains an acrid principle which is dissipated by heat, and is said by Loureiro to be used as a resolvent, emmenagogue, and anthelmintic. [B, 88; 121.]

**AUGINOS** (Lat.), n. m. A<sup>4</sup>(a<sup>3</sup>u<sup>4</sup>)-ji<sup>2</sup>(ge<sup>2</sup>/no<sup>3</sup>). An ancient name for hyoscyamus. [Apuleius (A, 318).]

**AUGION**, n. A name said to have been applied by Dioscorides to the *Isatis*. [Bory (B, 121).]

**AUGMENT** (Fr.), n. Og-ma<sup>2</sup>n<sup>2</sup>. See *AUGMENTUM*.

**AUGMENTATION**, n. A<sup>4</sup>g-me<sup>2</sup>nt-a'shu<sup>3</sup>n. See *AUGMENTUM*.

**AUGMENTUM** (Lat.), n. n. A<sup>4</sup>g(a<sup>3</sup>u<sup>4</sup>)-me<sup>2</sup>nt-u<sup>3</sup>m(u<sup>4</sup>m). From *augere*, to increase. Gr., *αὔξω*, *αὔξω*. Fr., *augment*. Ger., *Zunehmen*. It., *Sp. aumento*. An old term for that period or stage of a disease in which it is increasing in intensity. [A, 268.]

**AUGNAT** (Fr.), n. On-ya<sup>3</sup>. A place in the department of Puy-de-Dôme, France, where there are springs containing sodium bicarbonate, iron, and lithium. [L, 49, 57.]

**AUGNATHUS** (Lat.), n. m. A<sup>4</sup>g(a<sup>3</sup>u<sup>4</sup>)-na<sup>3</sup>-thu<sup>3</sup>(thu<sup>4</sup>s). From *αὐ* cumulat., and *γνάθος*, the jaw. Fr., *agnathe*. It., *agnathate* [General]. A monster having a supplementary lower jaw (the rudiment of a second head). [I. Geoffroy St.-Hilaire (A, 385; D, 76).]

**AUGUO**, n. A Provençal name for the *Zostera oceanica*. [B, 121; L, 105.]

**AUGURE DE LIN, AUGURE DU LIN** (Fr.), n's. O-gu<sup>4</sup>r d' la<sup>2</sup>n<sup>2</sup>, du<sup>6</sup> la<sup>2</sup>n<sup>2</sup>. The *Cuscuta europea*. [B, 121; L, 105.]

**AUGUSTA**, n. A<sup>4</sup>g-u<sup>3</sup>st-a<sup>3</sup>. See *STRIBLING SPRINGS*.

**AUGUSTA** (Lat.), n. A<sup>3</sup>u-gust-a<sup>3</sup>. From the Empress of Austria, Carolina Augusta. Fr., *Augustée*. A genus of rubiaceae plants of the tribe *Rondeletieae*, established by Pohl. [B, 121.]

**AUGUSTAFELSENQUELLE** (Ger.), n. A<sup>3</sup>-u-gust-a<sup>3</sup>-fe<sup>2</sup>is/-e<sup>2</sup>n-kwe<sup>2</sup>le<sup>2</sup>. See *EMS*.

**AUGUSTA SPRINGS**, n. See *STRIBLING SPRINGS*.

**AUGUSTBRUNNEN** (Ger.), n. pl. A<sup>3</sup>u-gust-brun-ne<sup>2</sup>n. Mineral springs in Langenswambach. [L, 30.]

**AUGUSTEA** (Lat.), n. f. A<sup>3</sup>-u-gust-e<sup>2</sup>a<sup>3</sup>. See *AUGUSTA* (Lat.).

**AUGUSTHAER** (Ger.), n. A<sup>3</sup>u-gust-ha<sup>3</sup>f-e<sup>2</sup>r. See *AVENA sativa*.

**AUGUSTHOLZBAD** (Ger.), n. A<sup>3</sup>u-gust-holtz-ba<sup>3</sup>d. A place in the Canton of Luzerne, Switzerland, having an alkaline spring and a bathing establishment. [L, 30.]

**AUGUSTIA** (Lat.), n. f. A<sup>3</sup>-u-gust-i<sup>2</sup>a<sup>3</sup>. From August, a Berlin professor. A genus of begoniaceous plants made by Klotzsch; by De Candolle made a section of the genus *Begonia*, including the purely African species. [B, 121, 170.]

**AUGUSTINEA** (Lat.), n. f. A<sup>4</sup>g(a<sup>3</sup>u<sup>4</sup>)-u<sup>3</sup>st(i<sup>2</sup>)-i<sup>2</sup>n-e<sup>2</sup>a<sup>3</sup>. See *BACTRIS*.

**AUGUSTNUSS** (Ger.), n. A<sup>3</sup>u-gust-nus. The hazel-nut (*Corylus avellana*).

**AUGUSTPFLAUME** (Ger.), n. A<sup>3</sup>u-gust-pfla<sup>3</sup>-u-me<sup>2</sup>. The *Prunus insititia*. [L.]

**AUGUSTPILZ** (Ger.), n. A<sup>3</sup>u-gust-pilz. The *Boletus luteus*. [L.]

**AUGUSTSCHWAMM** (Ger.), n. A<sup>3</sup>u-gust-shwa<sup>3</sup>m. An edible mushroom resembling the *Agaricus arvensis*, but paler. [L, 30.]

**AUGUSTUSBAD** (Ger.), n. A<sup>3</sup>-u-gust-us-ba<sup>3</sup>d. A place in Saxony, near Dresden, where there is a spring containing iron, chlorides, and carbonates. [L, 135.]

**AUGWIRBEL** (Ger.), n. A<sup>3</sup>-ug-verb-e<sup>2</sup>l. The third cranial vertebra. [L.]

**AUJON** (Fr.), n. O-zho<sup>2</sup>n<sup>2</sup>. The *Ulex europæus*. [B, 121.]

**AUKLANDIA** (Lat.), n. f. A<sup>4</sup>-la<sup>2</sup>nd-i<sup>2</sup>a<sup>3</sup>. See *AUCKLANDIA*.

**AUKUBA** (Lat.), n. f. A<sup>4</sup>k'(a<sup>3</sup>u<sup>4</sup>k)-u<sup>3</sup>(u<sup>4</sup>)-ba<sup>3</sup>. See *ATCUBA*.

**AULA** (Lat.), n. f. A<sup>4</sup>(a<sup>3</sup>u<sup>4</sup>)-la<sup>3</sup>. Gr., *αὐλή*. Fr., *aule*. Syn.: common ventricular cavity, communication between the three ventricles, middle part of the foramen communis anterior, cavity of the basiventriculum, ventriculus communis loborum, ventriculus lobi communis (Fr., *vestibule des ventricules latéraux*; Ger., *mittlerer Theil des Vorderhirns, Verbindung der beiden Hemisphärenhöhlen untereinander und mit dem dritten Ventrikel*). B. G. Wilder's term for "the mesal portion of the prosocoele (prosencephalic ventricle), forming the dorso-cephalic part of what is commonly called the 'third ventricle'; extending ventrad to the level of the precommissure and including the slight interval (aulic recess) between the fornix columns." [I, 80.]

**AULACIA** (Lat.), n. f. A<sup>4</sup>(a<sup>3</sup>-u<sup>4</sup>)-a(a<sup>3</sup>)/si<sup>2</sup>(ki<sup>2</sup>)-a<sup>3</sup>. Fr., *aulacie*. A genus of rutaceous plants made by Loureiro, referred (although doubtfully) to *Clausena*. [B.]—*A. falcata* [Loureiro]. Syn.: *Cookia falcata* [De Candolle]. A species the leaves of which are used in Cochinchina as an emmenagogue. [B, 88.]—*A. punctata* [Rausch]. Syn.: *Cookia punctata* [Willdenow]. A Chinese species with an edible acid fruit. [B, 173.]

**AULACIDIUM** (Lat.), n. n. A<sup>4</sup>(a<sup>3</sup>-u<sup>4</sup>)-a<sup>3</sup>-si<sup>2</sup>d(ki<sup>2</sup>d)/i<sup>2</sup>-u<sup>3</sup>m(u<sup>4</sup>m). Fr., *aulacidie*. Richard's name for the genus *Salpinga*. [B, 121.]

**AULACINTHUS** (Lat.), n. m. A<sup>4</sup>(a<sup>3</sup>-u<sup>4</sup>)-a<sup>3</sup>-si<sup>2</sup>n(ki<sup>2</sup>n)/thu<sup>3</sup>s(thu<sup>4</sup>s). Fr., *aulacinthe*. Of E. Meyer, a genus of leguminous plants, now made a section of *Lotonosis*. [B, 42.]

**AULACOCALYX** (Lat.), n. f. A<sup>4</sup>(a<sup>3</sup>-u<sup>4</sup>)-a<sup>3</sup>-ko<sup>3</sup>k'a<sup>3</sup>-i<sup>2</sup>x(hu<sup>4</sup>x). Gen., *aulacocalycos* (-cis). From *αὐλακός*, furrowed, and *καλῶς*, a calyx. A genus of rubiaceae plants of the tribe *Albertheae*, established by the younger Hooker. [B, 42.]—*A. jasminiflora* [Hooker fil.]. A branching shrub of western Africa. [B.]

**AULACOMELE** (Lat.), n. f. A<sup>4</sup>(a<sup>3</sup>-u<sup>4</sup>)-a<sup>3</sup>-ko<sup>3</sup>(ko<sup>2</sup>)-me(ma)/le(la). From *αὐλακός*, furrowed, and *μῆλη*, a probe. Fr., *Aulacoméle*. Ger., *Hohlsonde*. Syn.: *specillum sulcatum*. An old name for a grooved probe. [A, 322; L, 41.]

**AULACOMNIE** (Lat.), n. f. pl. A<sup>4</sup>(a<sup>3</sup>-u<sup>4</sup>)-a<sup>3</sup>-ko<sup>3</sup>m-ni(ni<sup>2</sup>)/e<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). From *Aulacomnion*, one of the genera. Fr., *aulacomniées*. A family of mosses (*Braceae*). [B, 121.]

**AULACOPHORA** (Lat.), n. f. A<sup>4</sup>(a<sup>3</sup>-u<sup>4</sup>)-a<sup>3</sup>-ko<sup>3</sup>(o<sup>2</sup>o<sup>2</sup>)-ra<sup>3</sup>. Fr., *aulacophore*. A section of the genus *Cuculia*, established by De Candolle. [B, 42.]

**AULACOSPERMUM** (Lat.), n. n. A<sup>4</sup>(a<sup>3</sup>-u<sup>4</sup>)-a<sup>3</sup>-ko<sup>3</sup>(ko<sup>2</sup>)-spu<sup>3</sup>rm(spe<sup>2</sup>rm)/u<sup>3</sup>m(u<sup>4</sup>m). Fr., *aulacosperme*. Ledebour's name for the genus *Pleurosperrum*. [B, 121.]

**AULACOSTOMA** (Lat.), n. n. A<sup>4</sup>(a<sup>3</sup>-u<sup>4</sup>)-a<sup>3</sup>-ko<sup>3</sup>st(o<sup>2</sup>o<sup>2</sup>)-ma<sup>3</sup>. Gen., *aulacostomatos* (-tis). From *αὐλακός*, grooved, and *στόμα*, the mouth. Fr., *aulacostome*. A genus of leeches incapable of penetrating the human skin, found near Lyons; so called from the prominent folds that form the lower jaw. [L, 41.]

**AULEDIBRANCHIA** (Lat.), n. n. pl. A<sup>4</sup>(a<sup>3</sup>-u<sup>4</sup>)-e(a<sup>3</sup>-e<sup>2</sup>)-di(di<sup>2</sup>)-bra<sup>2</sup>n<sup>2</sup>(bra<sup>2</sup>n<sup>2</sup>/ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)-a<sup>3</sup>). See *AULODEBRANCHIA*.

**AULEUM** (Lat.), n. n. A<sup>4</sup>(a<sup>3</sup>-u<sup>4</sup>)-e(a<sup>3</sup>-e<sup>2</sup>)-i<sup>2</sup>n(u<sup>3</sup>m(u<sup>4</sup>m)). Gr., *αὐλαία*. Lit., a curtain; in botany, a corolla. [B, 1.]

**AULANIE** (Fr.), n. O-la<sup>2</sup>-ne. An old name for the hazel-nut. [L, 109.]

**AULASTOMA** (Lat.), n. n. A<sup>4</sup>(a<sup>3</sup>-u<sup>4</sup>)-a<sup>3</sup>st(a<sup>3</sup>st)/o<sup>2</sup>(o<sup>2</sup>)-ma<sup>3</sup>. Gen., *aulastomatos* (-tis). From *αὐλαστή*, See *AULACOSTOMA*.

**AULAX** (Lat.), n. f. A<sup>4</sup>(a<sup>3</sup>-u<sup>4</sup>)-a<sup>3</sup>x(a<sup>3</sup>x). Gen., *aulacos* (-cis). Gr., *αὐλαξ*. 1. A furrow. [A, 322.] 2. Of Bergius, a genus (Ger., *Bartnuss*) of proteaceous plants of the tribe *Proteeae*. [B, 121.]

**AULAXANTHUS** (Elliott), **AULAXIA** [Nuttall] (Lat.), n's n. and f. A<sup>4</sup>(a<sup>3</sup>-u<sup>4</sup>)-a<sup>3</sup>x(a<sup>3</sup>x)-a<sup>2</sup>n(thu<sup>3</sup>s(thu<sup>4</sup>s), -a<sup>2</sup>x(a<sup>3</sup>x)/i<sup>2</sup>-a<sup>3</sup>. See *PANICUM*.

**AULAXINA** (Lat.), n. f. A<sup>4</sup>(a<sup>3</sup>-u<sup>4</sup>)-a<sup>3</sup>x(a<sup>3</sup>x)-i(e)-u<sup>3</sup>na<sup>3</sup>. Fr., *aulaxine*. A genus of lichens, probably to be referred to *Opegrapha*. [Fée (B, 211).]

**AULAXIS** (Lat.), n. f. A<sup>4</sup>(a<sup>3</sup>-u<sup>4</sup>)-a<sup>3</sup>x(a<sup>3</sup>x)/i<sup>2</sup>s. Of Haworth, a section of the botanical genus *Saxifraga*. [B, 121.]

**AULAYA** (Lat.), n. f. O-la<sup>2</sup>ya<sup>3</sup>. See *HARVEYA*.

**AULÉDIBRANCHES** (Fr.), n. pl. O-la-de-bra<sup>2</sup>n<sup>2</sup>sh. See *AULODEBRANCHIA*.

**AULEUM** (Lat.), n. n. A<sup>4</sup>(a<sup>3</sup>-u<sup>4</sup>)-e(a<sup>3</sup>)/u<sup>3</sup>m(u<sup>4</sup>m). See *AULÆUM*.

**AULIC**, adj. A<sup>4</sup>l'ik. Lat., *aulicus*. Fr., *aulique*. Pertaining to the aula (q. v.). [I.]

**AULISCOS**, **AULISCUS**, **AULISKOS** (Lat.), n's m. A<sup>4</sup>(a<sup>3</sup>-u<sup>4</sup>)-i<sup>2</sup>sk(o<sup>2</sup>s, -u<sup>3</sup>s(u<sup>4</sup>s), -o<sup>2</sup>s. Gr., *αὐλίσκος* (dim. of *αὐλός*, a tube). See *CANNULA*.

**AULIX** (Lat.), n. f. A<sup>4</sup>(a<sup>3</sup>-u<sup>4</sup>)-i<sup>2</sup>x. Gen., *aul'icis*. Lit., a furrow (see *AULAX*); B. G. Wilder's term for the fissure of Monro. [K.]

**AULIZA, AULIZEA** (Lat.), n's f. A<sup>4</sup>(a<sup>3</sup>-u<sup>4</sup>)-i(e)/za<sup>3</sup>, -i<sup>2</sup>z-e<sup>2</sup>a<sup>3</sup>. See *EPIDENDRUM*.

**AULIZEUM** (Lat.), n. n. A<sup>4</sup>(a<sup>3</sup>-u<sup>4</sup>)-i<sup>2</sup>z-e<sup>2</sup>-u<sup>3</sup>m(u<sup>4</sup>m). Of Lindley, a section of the botanical genus *Epidendrum*, including species (the *Auliza* of Salisbury) having a split labellum. [B, 121.]

**AULLO**, n. An East Indian name for the *Paspalum frumentaceum*. [B, 121.]

**AULNE** (Fr.), n. On. See AUNE.—**A. blanc**. See *BETULA alba*.

**AULNÉE** (Fr.), n. O-na. See AUNÉE.

**AULOBRANCHIA** (Lat.), n. n. pl.  $A^1(a^3-u^1)-o(o^2)-bra^2n^2$ . ( $bra^3n^2$ · $ki^2(ch^3i^2)$ · $a^3$ . See AULODEOBRANCHIA.

**AULOCYSTIDÆ** (Lat.), n. f. pl.  $A^1(a^3-u^1)-o(o^2)-si^2st(ku^6st)^1-i^2d-e(a^3-e^2)$ . A family of the *Hermitia*. [L, 121.]

**AULODEOBRANCHIA** (Lat.), n. n. pl.  $A^1(a^3-u^1)-o^1-de^2-o(o^2)-bra^2n^2(bra^3n^2/ki^2(ch^3i^2)-a^3$ . From *αυλοειδής*, flute-like, and *βράγχιον*, a gill. Written also *Aulobranchia* and *Aulodibranchia*. Fr., *aule-dibranches* [Latreille], *auleidibranches*, *aulobranches*. Ger., *Flöten-fische*. A name applied by Latreille to a family of fishes having two branchiæ opening externally by perforations like those of a flute. [A, 322; B, 195.]

**AULODES** (Lat.), adj.  $A^1(a^3-u^1)-o^1-dez(das)$ . Gr., *αυλοειδής* (from *αὔλος*, a flute, and *εἶδος*, resemblance). Fr., *aulode*. Ger., *flötenförmig*. Flute-shaped. [A, 322, 385.]

**AULONEMIA** (Lat.), n. f.  $A^1(a^3-u^1)-o(o^2)-ne(ne^2)/mi^2-a^3$ . From *αὔλος*, a flute, and *νέμος*, a forest. A genus of gramineous plants of the tribe *Bambuseæ*, established by Goudot. [B, 121, 170.]—**A. Queko** [Goudot]. A New Granada species, the hollow stems of which are used for making flutes. [B, 121.]

**AULONJAT**, n. The *Agaricus caesareus*. [B, 88, 173.]

**AULOPOMINA** (Lat.), n. n. pl.  $A^1(a^3-u^1)-o(o^2)-pom-i(e)^1na^3$ . A division of the *Cyclophoridae*. [L, 234.]

**AULOPORIDÆ** (Lat.), n. f. pl.  $A^1(a^3-u^1)-o(o^2)-po^2r-i^2d-e(a^3-e^2)$ . The only family of the *Tubulosa* (q. v.). [L, 147.]

**AULOS** (Lat.), n. m.  $A^1(a^3-u^1)-o^1-s$ . Gr., *αὔλος*. Lit., a flute; a name anciently applied to any tube or canal. [A, 322.]

**AULOSTOMA** (Lat.), n. n.  $A^1(a^3-u^1)-o^2s-to^2m-a^3$ . A genus of *Nephelidæ*, including the leeches. [L, 235.]—**A. gulo** [Moquin-Tandon]. **A. nigrescens**, **A. nigrum**. The horse-leech; a variety about 4 inches long when extended, having the back of a dark olive green or nearly black, and the belly yellowish green. [L, 235.]

**AULOSTOMIDES** (Lat.), n. m. pl.  $A^1(a^3-u^1)-o(o^2)-sto^2m-i^2d-ez(as)$ . From *αὔλος*, a flute, and *στόμα*, the mouth. Fr., *aulostomides*. A family of acanthopterygian fishes having the snout prolonged in the shape of a flute. [Latreille (L, 180).]

**AULOSTOMUM** [Diesing] (Lat.), n. n.  $A^1(a^3-u^1)-o^2s-to^2m-a^3(u^1m)$ . See *AULOSTOMA*.—**A. vorax**. See *AULOSTOMUM gulo*.

**AULUK BAGDADIE** (Ar.), n. Mastic. [B, 88.]

**AULUS** (Lat.), n. m.  $A^1(a^3-u^1)-u^3s(u^4s)$ . See *AULOS*.

**AULUS** (Fr.), n. O-lu<sup>6</sup>. A place in the department of Ariège, France, where there are ferruginous and saline springs, the waters of which are used for herpetic affections. [A, 385.]

**AUMADE** (Fr.), n. O-ma<sup>3</sup>d. An axillary phlegmon. [L, 41.]

**AUMALE** (Fr.), n. O-ma<sup>3</sup>. A village in the department of the Seine-Inférieure, France, where there are chalybeate springs. [L, 49, 57, 105.]

**AUMARINO**, n. The *Salix vitellina*. [B, 121.] See *AMARINE*.

**AUMÉLI** (Fr.), n. O-ma-le. A sort of syrup resembling hydromel. [L, 109.]

**AUMOOKEERA** (Tamil), n. The *Withania somnifera*. [B, 172.]

**AUMURE** (Fr.), n. O-mu<sup>6</sup>r. The botanical genus *Parietaria*. [L, 49.]

**AUNAL-COUDOUANI** (Tamil), n. The *Adenantha pavonina*. [B, 121.]

**AUNÂTRE** (Fr.), n. O-na<sup>3</sup>tr. The botanical genus *Alnaster*, separated by Spach from the genus *Alnus*. [B, 51.]

**AUNE** (Fr.), n. On. The botanical genus *Alnus*. [L, 87.]—**A. blanc**. The *Betula alba*. [A, 321, 385.]—**A. commun**. The *Alnus glutinosa*. [L, 85.]—**A. noir**. The *Rhamnus frangula*. [B, 93.]—**A. rogné**. The *Alnus emarginata*. [B, 173.]—**A. visqueux**. The *Alnus glutinosa*. [L.]—**Écorce d'a**. The bark of *Alnus glutinosa*. [L, 65.]

**AUNÉE** (Fr.), n. O-na. The *Inula helenium*. [A, 385.]—**Alcoolat d'a composé**. Syn.: *élixir américain de Courcelles*. A preparation formerly in great repute as an antilactic; made by infusing 640 grammes of elecampane root, 480 of aristolochia root, 480 of sugar-cane root, and 30 of the root of *Arundo donax* in a sufficient quantity of boiling water to make 24 litres of liquid; expressing; adding 10 grammes of asarum root, 10 of the root of *Arca oleracea*, 160 of the leaves of *Persea gratissima*, 320 of the leaves of *Hypericum perforatum*, 80 of the leaves of *Sambucus nigra*, 40 of the leaves of a species of *Croton*, 20 of rosemary leaves, 20 of the leaves of *Justicia pectoralis*, 40 of orange flowers, 60 of the bark of *Mesua ferrea*, 30 of juniper berries, 20 of the flowers of *Tilia europæa*, 25 of opium,  $\frac{1}{2}$  a calabash, and 2,000 grammes of alcohol; macerating for three days, distilling off the spirituous part, expressing and burning the residue, and adding the ashes to the extractive liquid, together with water enough to enable an amount of aromatic water equal to that of the preparation already obtained to be distilled off over an open fire; mixing the two liquors; coloring the mixture with 60 grammes of *Papaver rhoeas* and 30 of madder root; and filtering. [Henry, Guibourt (A, 259).]—**Alcoolé d'a**. See *Tinctura HELENII*.—**A. antidyssenterique**. See *PULICARIA antidyssenterica*.—**A. britannique**. The *Inula britannica*. [B, 121.]—**A. commune**. See *A. officinale*.—**A. odorante**. The *Pulicaria odora*. [B, 173.]—**A. officinale** [Fr. Cod.]. Elecampane (*Inula helenium*); the rhizome is official in the Fr. Cod. [B, 113.]—**Camphre d'a**. *Helenin*. [B, 121.]—**Conserve d'a**. See *Conserva HELENII*. [B, 119.]—**Décoction d'a**. See *Decoctum HELENII*.—**Eau d'a**, **Eau distillée d'a**. A preparation

made by distilling elecampane rhizome with water. [B.]—**Fléctuaire d'a**. [Fr. Cod., 1837]. A preparation made of powdered elecampane root 1 part, distilled water of elecampane (*eau distillée d'a*), 2 parts, and sugar 8 parts. [B, 119.]—**Extrait alcoolique d'a**. See *Extractum HELENII alcoholicum*.—**Extrait aqueux d'a**. See *Extractum HELENII aquosum*.—**Extrait d'a**. [Fr. Cod.]. An extract made from elecampane rhizome by exhausting with cold water and evaporating the product to the consistence of a soft extract. [B, 113.] Cf. *Extractum HELENII aquosum*.—**Grande a**. See *A. officinale*.—**Huile d'a composée**. See *Oleum INULÆ compositum*.—**Huile essentielle d'a**. A volatile oil obtained by the distillation of elecampane rhizome. [B, 119.]—**Enolé d'a**. See *Vin d'a*.—**Oléule d'a**. See *Huile essentielle d'a*.—**Onguent d'a**. See *Unguentum INULÆ*.—**Poudre d'a**. [Fr. Cod.]. Powder of elecampane rhizome; made by drying the rhizome, powdering in a mortar, and passing through a sieve of 120 meshes to the (French) inch. [B.]—**Rhizome d'a officinale**. Elecampane rhizome. [B.]—**Sirop d'a**. See *Syrupus ENULÆ*.—**Teinture d'a**. See *Tinctura HELENII*.—**Tisane d'a**. [Fr. Cod.]. Elecampane tea; an infusion made with 2 parts of elecampane rhizome and 100 of boiling water. [B, 113.] Cf. *Tisane pectorale*.—**Vin d'a**. [Fr. Cod.]. Wine of elecampane; made by macerating 3 parts of elecampane rhizome in 6 of 60-per-cent. alcohol for twenty-four hours, adding 100 of white wine, macerating again for ten days, and filtering. [B, 113.] Cf. *Vinum ENULÆ*.

**AUNELLE** (Fr.), n. O-ne<sup>2</sup>l. See AUNE.

**AUNTOU**, n. A name in the Marquesas for the *Siegesbeckia orientalis*. [B, 121.]

**AUNLA**, n. A Ceylon name for the *Embllica myrobolans*. [B, 121.]

**AUNTHOOLPOPAVAY** (Tamil), n. The *Momordica dioica*. [B, 172.]

**AUNWERD** (Hind.), n. See AUNLA.

**AUPALU** (Telooogo), n. The *Piratinera utilis*. [B, 88.]

**AUR** (Russ.), n. The *Acorus calamus*. [A, 259.]

**AURA** (Lat.), n. f.  $A^1(a^3-u^1)-ra^3$ . Gen., *aur-re*.-rai. Gr., *αὔρα*. Fr., *esprit volatil*, *vapeur*, *petit vent*, *souffle*. Ger., *Hauch*, *Luft-hauch*, *Lüftchen*. Anelken. It., *venticello piacerole*. Sp., *aura*. 1. A gentle current of air, a subtle vapor, an emanation. [A, 311, 312, 322, 325, 385.] 2. A vague subjective sensation in any part of the body, often like that caused by a gentle current of air, which precedes an epileptic or hysterical paroxysm. [A, 385; D, 35, 50; K, 4.] 3. In botany, an essence or volatile principle supposed to emanate from the grains of pollen, and to constitute their fertilizing principle. [B, 7, 104.] 4. A sort of crow (the *tropiloth*) found in Mexico, which, according to Lémery, is used as a medicine, the flesh being considered antisyphilitic and the ashes of the feathers detersive and vulnerary. [B, 88.]—**Auditory a**. An a. (2d def.) referred to the auditory apparatus; it may consist of hissing, ringing, explosive, or vocal sounds, and may be preceded by a sensation of profound stillness. [D, 35.]—**A. d'avertissement** (Fr.). See A. (2d def.).—**A. dolorifica**. A sudden and transient pain. [M, 6.]—**A. electrica**. See *Electric a*.—**A. epileptica**. See A. (2d def.).—**A. gastro-glottique** (Fr.). See *Hysterical a*.—**A. hysterica**. See *Hysterical a*.—**A. intellectuelle** (Fr.). An epileptic a, consisting of an hallucination. [D, 72.] Cf. *Psychical a*.—**A. nervea**. Ger., *Nervendither*. See *A. vitalis*.—**A. of the special senses**. See *Auditory a*, *Gustatory a*, *Olfactory a*, and *Visual a*.—**A. oxygena**. A supposed atmosphere of oxygen surrounding the individual red blood-corpuscles. [A, 305.]—**A. polinarius**. See A. (3d def.).—**A. rabidica**. An a. (2d def.) said to precede a paroxysm of rabies. [M, 3.]—**A. sanguinis**. Ger., *Blutdunst*. Syn.: *halitus sanguinis*. The odor of fresh blood. [A, 305.]—**A. seminalls**. Fr., *vapeur* (ou *esprit volatil*) *spérmatique*. Ger., *Samenhauch*, *Samenluft*. It., *a. seminale*. Syn.: *a. seminis*, *spiritus genitalis*. 1. A supposed seminal emanation which was thought by Harvey, Vaillant, Spallanzani, and others to suffice for impregnation, without actual contact of the semen with the corresponding element in the female. [A, 4.] 2. See A. (3d def.).—**A. seminis**. See *A. seminalls*.—**A. spermaticque** (Fr.). See *A. seminalls*.—**A. vertiginosa**. Vertigo occurring as the introduction to a paroxysm of epilepsy. [A, 449.]—**A. vitalis**. Ger., *Lebenshauch*. 1. An old name for the vital principle. [A, 322, 325, 385.] 2. Van Helmont's term for vital heat. [L, 104.] 3. In botany, see A. (3d def.). Cf. *Vital a*.—**Electric a**. Lat., *a. electrica*. The "electric wind"; a sensation as of a current of air striking upon a part exposed to the discharge of static electricity from a number of fine points. [B.]—**Epileptic a**. Lat., *a. epileptica*. An a. (2d def.) preceding a paroxysm of epilepsy.—**Gustatory a**. An a. (2d def.) consisting of an abnormal sensation of taste, especially of a metallic character. [D, 35.]—**Hysterical a**. Lat., *a. hysterica*. An a. (2d def.) preceding a paroxysm of hysteria.—**Intellectual a**. See *A. intellectuelle*.—**Motor a**. Ger., *motorische a*. An a. (2d def.) in which there is a distinct sensation of muscular contraction, especially in the thumb, the great toe, or the side of the face; often followed by nausea and a sensation as of something rising in the throat. [B, 35.]—**Olfactory a**. An a. (2d def.) consisting of either a subjective sensation of smell or an odor proceeding from the patient. [D, 35.]—**Psychical a**. An a. (2d def.) constituted by a decided mental impression, as of horror, alarm, intellectual perversion, etc. [D, 35.] Cf. *A. intellectuelle*.—**Secretory a**. An a. (2d def.) characterized by an excessive secretion, as of saliva. [D, 35.]—**Sensitive a**, **Sensory a**. Ger., *sensorielle a*. An a. (2d def.) consisting of a sensation of cold, heat, tingling, numbness, pain (especially in the extremities), headache, vertigo, etc., appearing to move from the periphery toward the central organs. [D, 70.]—**Vaso-motor a**. Ger., *vaso-motorische a*. An a. (2d def.) characterized by paleness and numbness or redness and heat of the part in which it is felt; sometimes with an excessive flow of saliva. [D, 35.]—**Visceral a**. Fr., *a. viscérale*. The most common form of

a. (2d def.), consisting in sensations referred to some portion of the area of distribution of the pneumogastric nerve, such as a painful epigastric feeling, nausea, a sensation of choking, etc. [D. 35.]—**Visual a.** An a. (2d def.) consisting of some visual hallucination. Sparks, flashes of light, and even distinct colors may seem to be seen. [D. 35.]—**Vital a.** 1. See *A. vitalis*. 2. In Chinese medicine, the "circulating air," i. e., air (swallowed) which, starting from the "little heart," circulates through the body. "Disease appears only when vitiated air can find entrance, or when the circulation of the vital a. is defective." [Macgowan, "Lancet," Apr. 3, 1886, p. 652.]

**AURADE, AURADIN**, n's. A<sup>4</sup>rad, -ra<sup>2</sup>d-i<sup>2</sup>n. Fr., *aurade*, *auradine*. Sp., *aurado*. Syn.: *Neroli camphor*. A white crystallizable substance, soluble in ether, extracted by Plisson from the essential oil of orange-flowers; probably a hydrocarbon. [B. 93, 180.]

**AURAL**, adj. A<sup>4</sup>ra<sup>2</sup>l. Lat., *auralis* (from *aur* [q. v.], or *auris*, the ear). 1. Pertaining to the air or to an *aura* (q. v.). [B. 116.] 2. Pertaining to the ear or to the sense of hearing.

**AURAL**, n. A<sup>4</sup>ra<sup>2</sup>l. See **AURADE**.

**AURAMINE**, n. A<sup>4</sup>ra<sup>2</sup>m-en. A yellow powder, readily soluble in water, used as a yellow dye for cotton. It is prepared by the action of ammonium chloride and zinc chloride on tetramethyl diamidobenzophenone, and is thought to have the composition  $C_6H_4N(CH_3)_2-CN.HCl$ . [B. 258.]

**AURAMMONIUM**, n. A<sup>4</sup>a<sup>2</sup>m-mon<sup>1</sup>i<sup>2</sup>u<sup>3</sup>m. For deriv., see **AURUM** and **AMMONIUM**. A compound in which gold replaces hydrogen in ammonium (e. g., the radicle  $(NH_3)Au^+$ ). [B. 3.]

**AURANGIA**, n. An alchemical name for egg-shells. [B. 50.]

**AURANGIA** (Lat.), n. f. A<sup>4</sup>ra<sup>2</sup>u<sup>3</sup>-u<sup>3</sup>ra<sup>2</sup>a<sup>2</sup>n(a<sup>3</sup>n<sup>2</sup>)/ji<sup>2</sup>(gi<sup>2</sup>)-a<sup>3</sup>. For deriv., see **AURANTIUM**. See **AURANTIA hispallensis**.

**AURANTIA** (Lat.), n. f. sing. and n. pl. A<sup>4</sup>ra<sup>2</sup>u<sup>3</sup>-u<sup>3</sup>ra<sup>2</sup>a<sup>2</sup>n(a<sup>3</sup>n<sup>2</sup>)-shi<sup>2</sup>(ti<sup>2</sup>)-a<sup>3</sup>. Fr., *oranger* (2d def.), *orangers* (3d def.). Ger., *Kaisergelb* (1st def.). 1. A crystalline yellowish-red powder,  $N(C_6H_5(NO_2)_2)_2 \cdot NH_4$ , being the ammonium salt of hexanitrodiphenylamine. It is said to be exceedingly irritating to the skin, even in dilute solution, producing painful pustules like those caused by croton-oil; but this has been denied. [B. 49, 258.] 2. (Fem. of adj., *aurantius* [malus understood]) an orange. [B. 59.] 3. (Pl. of *aurantium* [q. v.]) oranges; also, of Jussieu and Correa, an order of plants corresponding, wholly or in part, to the *Aurantaceae*. [B. 121, 170.]—**Aurantia bacce**. See *Fructus aurantii immaturi*, under **AURANTIUS**.—**A. chinensis**. The China, or sweet, orange. [L. 119.]—**A. curassavientia** (seu *curassavica*). See *Fructus aurantii immaturi*, under **AURANTIUS**.—**A. dulcis**. The sweet orange. [B. 59.]—**A. hispallensis**. The Seville, or bitter, orange. [B. 59.]—**A. immatura**. See *Fructus aurantii immaturi*, under **AURANTIUS**.—**A. sinensis**. See *A. chinensis*.

**AURANTIACEÆ** (Lat.), n. f. pl. A<sup>4</sup>ra<sup>2</sup>u<sup>3</sup>-u<sup>3</sup>ra<sup>2</sup>a<sup>2</sup>n(a<sup>3</sup>n<sup>2</sup>)-shi<sup>2</sup>(ti<sup>2</sup>)-a<sup>3</sup>(se<sup>2</sup>)(ke<sup>2</sup>)-e(a<sup>3</sup>-e<sup>2</sup>). Fr., *aurantiacées*. Ger., *Orangengewächse*. It., *aurantiache*. The citronworts, the *Aurantia* of Correa (and in part of Jussieu); an order of dicotyledonous plants belonging to the *Thalamifloræ* (*Choripetalæ*), made by Mirbel, Jussieu, De Candolle, and others. By Bentham and Hooker it is included among the *Rutaceæ*, as the tribe *Auranticeæ* (q. v.). [B. 36, 42, 170.]

**AURANTIACEOUS**, adj. A<sup>4</sup>ra<sup>2</sup>a<sup>2</sup>n-shi<sup>2</sup>-a<sup>3</sup>shu<sup>3</sup>s. Lat., *aurantiacus*. Fr., *aurantiacé*. Resembling the orange, or belonging to or resembling the *Auranticeæ*. [B.]

**AURANTIACUS** (Lat.), adj. A<sup>4</sup>ra<sup>2</sup>u<sup>3</sup>-u<sup>3</sup>ra<sup>2</sup>a<sup>2</sup>n(a<sup>3</sup>n<sup>2</sup>)-ti<sup>2</sup>(ti<sup>2</sup>)-a<sup>3</sup>-ku<sup>3</sup>s-(ku<sup>3</sup>s). 1. Orange-colored. 2. Made with oranges (e. g., *tinctura ferri aurantiaci*). [B.]

**AURANTIE** (Lat.), n. f. pl. A<sup>4</sup>ra<sup>2</sup>u<sup>3</sup>-u<sup>3</sup>ra<sup>2</sup>a<sup>2</sup>n(a<sup>3</sup>n<sup>2</sup>)-shi<sup>2</sup>(ti<sup>2</sup>)-e(a<sup>3</sup>-e<sup>2</sup>). See **AURANTIA** (3d def.).

**AURANTIEÆ** (Lat.), n. f. pl. A<sup>4</sup>ra<sup>2</sup>u<sup>3</sup>-u<sup>3</sup>ra<sup>2</sup>a<sup>2</sup>n(a<sup>3</sup>n<sup>2</sup>)-ti<sup>2</sup>(ti<sup>2</sup>)-e<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). Fr., *aurantiées*. Of Reichenbach, a division of the *Hesperideæ* (of Bentham and Hooker, a tribe of the *Rutaceæ*) comprising *Limonia*, *Clausena*, *Luvunga*, *Atalantia*, *Citrus*, *Feronia*, *Egile*, and six other genera, in which the leaves are 1- to 3-foliate or pinnate; there are regular hermaphrodite flowers with either free or connate petals and stamens and an entire ovary containing from one to many ovules, and a simple terminal style, entire at the base; and the fruit is usually a pulpy, corticate berry with exalbuminous seeds. By Reichenbach it was divided into the *Limoneæ*, *Clauseneæ*, and *Citreeæ*. [B. 42, 170.]

**AURANTIIICOLLIS** (Lat.), adj. A<sup>4</sup>ra<sup>2</sup>u<sup>3</sup>-u<sup>3</sup>ra<sup>2</sup>a<sup>2</sup>n(a<sup>3</sup>n<sup>2</sup>)-ti<sup>2</sup>-i<sup>2</sup>-ko<sup>2</sup>/ti<sup>2</sup>s. From *aurantium*, an orange, and *collum*, the neck. Fr., *aurantiicolle*. Having an orange-colored neck (a zoological species-name). [B. 195.]

**AURANTIIIFLOREÆ** (Lat.), n. f. pl. A<sup>4</sup>ra<sup>2</sup>u<sup>3</sup>-u<sup>3</sup>ra<sup>2</sup>a<sup>2</sup>n(a<sup>3</sup>n<sup>2</sup>)-ti<sup>2</sup>-i<sup>2</sup>-flo<sup>2</sup>/re(a<sup>3</sup>-e<sup>2</sup>). From *aurantium*, an orange, and *flos*, a flower. Ger., *Orangenblüthler*. Of Reichenbach, a formation (*formatio*) of plants belonging to the *Idiocarpaceæ*, comprising the families *Hypericaceæ*, *Guttiferæ*, and *Hesperideæ*. [B. 170.]

**AURANTIIN, AURANTIN**, n's. A<sup>4</sup>ra<sup>2</sup>nt<sup>1</sup>/i<sup>2</sup>-i<sup>2</sup>n, -ra<sup>2</sup>nt<sup>1</sup>/i<sup>2</sup>n. Fr., *aurantine*, *aurantine*. Ger., *Aurantiin*. Syn.: *naringin*. A bitter crystallizable glucoside,  $C_{23}H_{36}O_{12} + 4H_2O$ , obtained by De Vrii from the leaves of *Citrus decurana*; formerly supposed to be identical with hesperidin. [B. 207, 244.]

**AURANTIUM** (Lat.), n. n. A<sup>4</sup>ra<sup>2</sup>u<sup>3</sup>-u<sup>3</sup>ra<sup>2</sup>a<sup>2</sup>n(a<sup>3</sup>n<sup>2</sup>)-shi<sup>2</sup>(ti<sup>2</sup>)-u<sup>3</sup>m-(u<sup>3</sup>m). Originally written *arantium*; deriv., through It., *aranz*, and Sp., *naranja*, from Ar., *narinj* (Sanser., *nāranga*, *nāryanga*, *nāgaranga*), having the color of minium. Fr., *orange*, *oranger*. Ger., *Orange*, *Pomeranze*. 1. The orange; also the specific name of the *Citrus a.*, or orange-tree. 2. In descriptive botany, a fruit like an orange. See **HESPERIDIUM**. 3. Of Tournefort, a genus of plants, in part the *Citrus* of Linnaeus. [B. 121, 123, 170.]—**Ætheroaleum aurantii**. Distilled oil of orange-peel. [B. 97.]—**Albedo**

**aurantiorum**. The white inner part of orange-peel. [B. 119.]—**Aqua corticum aurantii**. See *Aqua corticum aurantiorum*.—**Aqua corticum aurantiorum** [Netherl. Ph.]. Fr., *eau d'écorce d'orange*. Sp., *agua de corteza de naranja* [Sp. Ph.]. Syn.: *aqua citri aurantii* [Ed. Ph., 1826]. Orange-peel water; made by distilling orange-peel with water, with or without the addition of a small amount of alcohol, in quantity sufficient to produce, for 1 part of the orange-peel, 1 part of distillate [Sp. Ph.], 2 parts [Batav. Ph., 1805; Amsterd. Ph., 1792; Belg. Ph., 1825; Brunsw. Ph., 1777; Würt. Ph., 1798], 3 parts [Netherl. Ph.], 5 parts [U. S. Ph., 1820; Ed. Ph., 1826], or 9 parts [Sax. Ph., 1820]. [B. 95, 97, 119.]—**Aqua corticum aurantiorum alcoholica** (seu *spirituosa*, seu *vinosa*). See *Spiritus aurantii*.—**A. amaran**. The bitter orange. [B.]—**Aurantia curassavientia** (seu *curassavica*). Ger., *Curassaoappel*. See *Fructus aurantii immaturi*, under **AURANTIUS**.—**Aurantia dulcia**, *A. dulces*. The sweet orange; the fruit of *Citrus a.*, var. *aurantium*. [B.]—**Aurantia enascentia** (seu *immatura*). See *Fructus aurantii immaturi*, under **AURANTIUS**.—**Aurantii amari cortex** [U. S. Ph.], **Aurantii cortex** [Br. Ph.]. Bitter-orange peel. [B.] See under **ORANGE**.—**Aurantii corticis syrupus**. See *Syrupus aurantii*.—**Aurantii dulcis cortex** [U. S. Ph.]. Sweet-orange peel. [B.] See under **ORANGE**.—**Aurantii flores** [U. S. Ph.]. See under **AURANTIUS**.—**Aurantii floris aqua**. See under **AURANTIUS**.—**Aurantii oleum**. Oil of orange-peel. [B.] See under **ORANGE**.—**Aurantii tinctura**. See *Tinctura aurantii*.—**A. corniculatum** [Tournefort]. A subvariety (*corniculata*) of the *Citrus a.*, var. *bigaradia*. [B. 173.]—**A. dulci cortice sinense** [Ferraris]. The sweet orange. [B. 183.]—**A. fetiferum** [Ferraris]. A subvariety (the *Citrus fetifera* [Risso]) of the *Citrus a.*, var. *bigaradia*. [B. 173.]—**A. folio crispo** [Ferraris]. A subvariety of the bitter-orange tree (*Citrus a.*, var. *bigaradia*); the *Citrus crispifolia* of the gardens. [B. 173.]—**A. hermaphroditum** [Ferraris]. See *A. corniculatum*.—**A. hispallense** (seu *hispallense*). See *Aurantia hispallensis*.—**A. pumiliore** [Cluss.]. See *A. sinense*.—**A. roseum** [Ferraris]. A variety of the bergamot orange (*Citrus a.*, var. *bergamia*). [B. 173.]—**A. silvestre medulla dulc-amara**, *A. silvestre medulla minus amara*, etc. The wild orange-tree. [B. 183.]—**A. sinense** [Tournefort], **A. sinense foliis lanceolatis, acutis, glabris**. A variety of the *Citrus a.* [B. 173, 183.]—**A. stellatum** [Ferraris]. See *A. roseum*.—**A. striatum** [Ferraris]. A variety of the ordinary sweet orange, *Citrus a.* (the *Citrus a.*, var. *lunatum*, of the gardens). [B. 173.]—**A. violaceum** [Desfontaines]. A variety (the *Citrus violacea* of the gardens) of the *Citrus a.*, var. *bigaradia*. [B. 173.]—**A. virgatum** [Ferraris]. A variety of the *Citrus a.* (the *Citrus a.*, var. *mutabile* [Risso]). [B. 173.]—**A. vulgare** [Comm.]. The bitter-orange tree (*Citrus a.*, var. *bigaradia*). [B. 173.]—**Confectio aurantii** [Lond. Ph.]. Syn.: *conserva aurantii* [Ed. Ph.]. Confection of orange-peel; made with 1 part of orange-peel and 3 parts of sugar. [B. 98.]—**Conserva aurantii** [Sard. Ph., 1773; Ed. Ph.]. 1. Of the Sard. Ph., an electuary made of 2 parts of orange-pulp with the rind and 3 parts of sugar with water. [B. 119.] 2. Of the Ed. Ph., see *Confectio aurantii*.—**Conserva corticum aurantiorum**. See *Confectio aurantii*.—**Cortex aurantiorum**. Bitter-orange peel. [B. 180.] See under **ORANGE**.—**Cortex aurantiorum curassavientium**. The peel of the Curaçoa orange; rather thinner, larger, and of darker color than ordinary orange-peel, and with less of the white inner coating (*albedo*). [B. 180.]—**Cortex aurantiorum dulcium**. Sweet-orange peel. [B.]—**Cortex aurantiorum in quarto**. Orange-peels divided into connected quarters. [B. 180.]—**Elixir aurantii** [U. S. Ph.]. Elixir of orange, simple elixir; made by dissolving as thoroughly as possible 1 part of oil of orange-peel in 100 parts each of alcohol and water, and adding 100 parts of sugar. [B.]—**Elixir aurantiorum compositum** [Ger. Ph.]. Ger., *Pomeranzenelixer*. Compound elixir of orange; made by macerating 50 parts of orange-peel, 10 of cinnamon, and 2½ of potassium carbonate in 250 of sherry wine; expressing; adding to the expressed liquid, brought up to 230 parts by the addition of wine, 5 parts each of extract of gentian, extract of wormwood, extract of cascarrilla, and extract of buckbean (*Trifolium fibrinum*); allowing the whole to settle; and filtering. Various modifications of this formula were formerly official in a great number of pharmacopœias, under the names of *elixir viscerale* (seu *stomachicum*, seu *viscerale Hoffmanni*, seu *balsamicum Hoffmanni*, seu *balsanicum*, *stomachicum et temperatum Hoffmanni*), *essentia stomachicum*, *vinum amarum alcalisatum*, *tinctura amara seu stomachica*. The original formula contained no orange. A very similar preparation, but without the potassium salt, is the *vinum aurantiorum compositum* (q. v.). The preparation of this name in the Sp. Ph. of 1798 was made of 1½ oz. each of orange-peel and cinchona, 1 oz. each of wormwood tops, chamomile flowers, and Jamaica pepper, ¼ drachm of cochineal, 1½ lb. of water, and 4 oz. of alcohol, allowed to stand for three days, and filtered. [B. 97, 119, 205.] Cf. *ELIXIR viscerale Hoffmanni*.—**Essentia aurantii**. See *Tinctura aurantii*. [B. 119.]—**Essentia aurantii dulcis**. See *Tinctura aurantii dulcis*.—**Essentia corticum aurantiorum**. See *Tinctura aurantii*.—**Essentia corticum aurantiorum vinosum**. Wine of orange-peel; made by macerating 1 part of dried orange-peel in 8 parts of Spanish wine, and filtering. [Brunsw. Ph., 1777; Würt. Ph., 1798 (B. 97).]—**Extractum aurantii amari fluidum** [U. S. Ph.]. Fluid extract of bitter-orange peel; made by exhausting 100 parts by weight of powdered bitter-orange peel with alcohol and water; reserving the first 80 parts of the percolate; evaporating the rest to the consistence of a soft extract; mixing this with the reserved portion; and adding enough alcohol and water to bring the whole up to 100 parts by volume. [B.]—**Flavado corticis aurantii**, **Flavado corticum aurantiorum**. Orange zest; the yellow outer portion of orange-peel. [B. 95, 119.]—**Infusum aurantii** [Br. Ph.; Dubl. Ph.]. 1. Of the Br. Ph., a preparation made by steeping 1 part of bitter-orange peel in 20 parts of boiling distilled water, and straining. [B. 5.] 2. Of the Dubl. Ph., see *Infusum aurantii compositum*.—**Infusum aurantii compositum** [Br. Ph.; Lond. Ph.]. Syn.: *infusum aurantii* [Dubl.
